Communication concerning the priority document

With respect to the filing of the certified priority document(s) for the above-mentioned European patent application, we would like to inform you as follows:

The International Bureau [IB] has not received the priority document from the PCT receiving Office [RO] despite the applicant's request under Rule 17.1(b) or (b-bis) PCT.

- The EPO has not been able to include a copy of the previous application(s) in the file by means of the electronic priority documents exchange. Reference is made to Article 2(2) of the Decision of the President of the EPO dated 18 October 2018 on the filing of priority documents (OJ EPO 2018, A78).

Please note that as long as the priority document is missing, substantive examination can only begin if the patentability of the claimed subject-matter is not dependent on the validity of the priority right. However no European patent will be granted (i.e. no communication "Decision to grant a European patent pursuant to Article 97(1) EPC" [EPO Form 2006] will be despatched to the applicant) as long as the priority document is not on file.
