

# CPC COOPERATIVE PATENT CLASSIFICATION

**H03H** **IMPEDANCE NETWORKS, e.g. RESONANT CIRCUITS; RESONATORS** (measuring, testing [G01R](#); arrangements for producing a reverberation or echo sound [G10K 15/08](#); impedance networks or resonators consisting of distributed impedances, e.g. of the waveguide type, [H01P](#); control of amplification, e.g. bandwidth control of amplifiers, [H03G](#); tuning resonant circuits, e.g. tuning coupled resonant circuits, [H03J](#); networks for modifying the frequency characteristics of communication systems [H04B](#))

## NOTES

1. This subclass covers :
  - networks comprising lumped impedance elements;
  - networks comprising distributed impedance elements together with lumped impedance elements;
  - networks comprising electromechanical or electro-acoustic elements;
  - networks simulating reactances and comprising discharge tubes or semiconductor devices;
  - constructions of electromechanical resonators.
2. In this subclass, the following expression is used with the meaning indicated:  
"passive elements" means resistors, capacitors, inductors, mutual inductors or diodes.
3. Attention is drawn to the Notes following the titles of class [B81](#) and subclass [B81B](#) relating to "micro-structural devices" and "micro-structural systems".
4. In this subclass, main groups with a higher number take precedence.

<b>1/00</b>	<b>Constructional details of impedance networks whose electrical mode of operation is not specified or applicable to more than one type of network (constructional details of electromechanical transducers <a href="#">H03H 9/00</a>)</b>	<b>2003/0071</b>	. . {of bulk acoustic wave and surface acoustic wave elements in the same process}
1/0007	. {of radio frequency interference filters}	3/0072	. . {of micro-electro-mechanical resonators or networks (micro-membranes or micro-beams <a href="#">B81B 2203/01</a> ; manufacture of micro-structural devices in general <a href="#">B81C</a> )}
2001/0014	. {Capacitor filters, i.e. capacitors whose parasitic inductance is of relevance to consider it as filter}	3/0073	. . . {Integration with other electronic structures}
2001/0021	. {Constructional details}	3/0075	. . . {Arrangements or methods specially adapted for testing micro-electro-mechanical resonators or networks}
2001/0028	. . {RFI filters with housing divided in two bodies}	3/0076	. . . {for obtaining desired frequency or temperature coefficients}
2001/0035	. . {Wound magnetic core}	3/0077	. . . . {by tuning of resonance frequency}
2001/0042	. . {Wound, ring or feed-through type capacitor}	3/0078	. . . . . {involving adjustment of the transducing gap}
2001/005	. . {Wound, ring or feed-through type inductor}	3/013	. . for obtaining desired frequency or temperature coefficient ( <a href="#">H03H 3/0076</a> ) <a href="#">H03H 3/04</a> , <a href="#">H03H 3/10</a> take precedence)
2001/0057	. . {comprising magnetic material}	3/02	. . for the manufacture of piezo-electric or electrostrictive resonators or networks ( <a href="#">H03H 3/08</a> takes precedence)
2001/0064	. . {comprising semiconductor material}	2003/021	. . . {the resonators or networks being of the air-gap type}
2001/0071	. . {comprising zig-zag inductor}	2003/022	. . . {the resonators or networks being of the cantilever type}
2001/0078	. . {comprising spiral inductor on a substrate}	2003/023	. . . {the resonators or networks being of the membrane type}
2001/0085	. . {Multilayer, e.g. LTCC, HTCC, green sheets (inside PCB filters <a href="#">H05K</a> )}	2003/025	. . . {the resonators or networks comprising an acoustic mirror}
2001/0092	. {Inductor filters, i.e. inductors whose parasitic capacitance is of relevance to consider it as filter}	2003/026	. . . {the resonators or networks being of the tuning fork type}
1/02	. of RC networks, e.g. integrated networks	2003/027	. . . {the resonators or networks being of the micro-electro-mechanical [MEMS] type}
<b>2/00</b>	<b>Networks using elements or techniques not provided for in groups <a href="#">H03H 3/00</a> - <a href="#">H03H 21/00</a></b>	2003/028	. . . {for obtaining desired values of other parameters}
2/001	. {comprising magnetostatic wave network elements}	3/04	. . . for obtaining desired frequency or temperature coefficient
2/003	. {comprising optical fibre network elements (optical elements per se <a href="#">G02B</a> , <a href="#">G02F</a> ; transmission systems using light waves <a href="#">H04B 10/00</a> )}	2003/0407	. . . . {Temperature coefficient}
2/005	. {Coupling circuits between transmission lines or antennas and transmitters, receivers or amplifiers}	2003/0414	. . . . {Resonance frequency}
2/006	. . {Transmitter or amplifier output circuits}		
2/008	. . {Receiver or amplifier input circuits}		
<b>3/00</b>	<b>Apparatus or processes specially adapted for the manufacture of impedance networks, resonating circuits, resonators</b>		
3/007	. for the manufacture of electromechanical resonators or networks		

2003/0421	. . . . . {Modification of the thickness of an element}	7/06	. . including resistors ( <a href="#">H03H 7/075</a> , <a href="#">H03H 7/09</a> , <a href="#">H03H 7/12</a> , <a href="#">H03H 7/13</a> take precedence)
2003/0428	. . . . . {of an electrode}	7/065	. . . Parallel T-filters
2003/0435	. . . . . {of a piezoelectric layer}	7/07	. . . Bridged T-filters
2003/0442	. . . . . {of a non-piezoelectric layer}	7/075	. . Ladder networks, e.g. electric wave filters
2003/045	. . . . . {Modification of the area of an element}	7/09	. . Filters comprising mutual inductance
2003/0457	. . . . . {of an electrode}	7/12	. . Bandpass or bandstop filters with adjustable bandwidth and fixed centre frequency ( <a href="#">H03H 7/09</a> takes precedence; automatic control of bandwidth in amplifiers <a href="#">H03G 5/16</a> )
2003/0464	. . . . . {operating on an additional circuit element, e.g. a passive circuit element connected to the resonator}	7/13	. . using electro-optic elements
2003/0471	. . . . . {of a plurality of resonators at different frequencies}	7/17	. . {Structural details of sub-circuits of frequency selective networks}
2003/0478	. . . . . {in a process for mass production}	<b>WARNING</b> not complete, pending reorganisation, see provisionally also <a href="#">H03H 7/0107</a> , <a href="#">H03H 7/0123</a> - <a href="#">H03H 7/07</a> , <a href="#">H03H 7/09</a> - <a href="#">H03H 7/13</a> and <a href="#">H03H 7/42</a>	
2003/0485	. . . . . {during the manufacture of a cantilever}		
2003/0492	. . . . . {during the manufacture of a tuning-fork}		
3/06	. . for the manufacture of magnetostrictive resonators or networks		
3/08	. . for the manufacture of resonators or networks using surface acoustic waves		
3/10	. . . for obtaining desired frequency or temperature coefficient	7/1708	. . . {Comprising bridging elements, i.e. elements in a series path without own reference to ground and spanning branching nodes of another series path ( <a href="#">H03H 7/07</a> takes precedence)}
<b>5/00</b>	<b>One-port networks comprising only passive electrical elements as network components</b>	7/1716	. . . {Comprising foot-point elements}
5/003	. {comprising distributed impedance elements together with lumped impedance elements}	7/1725	. . . . {Element to ground being common to different shunt paths, i.e. Y-structure}
5/006	. {comprising simultaneously tunable inductance and capacitance}	7/1733	. . . . {Element between different shunt or branch paths ( <a href="#">H03H 7/425</a> takes precedence)}
5/02	. without voltage- or current-dependent elements	7/1741	. . . {Comprising typical LC combinations, irrespective of presence and location of additional resistors (when resistors are present, also classify in <a href="#">H03H 7/06</a> - <a href="#">H03H 7/07</a> )}
5/10	. . comprising at least one element with prescribed temperature coefficient	7/175	. . . . {Series LC in series path ( <a href="#">H03H 7/1783</a> takes precedence)}
5/12	. with at least one voltage- or current-dependent element	7/1758	. . . . {Series LC in shunt or branch path ( <a href="#">H03H 7/1791</a> takes precedence)}
<b>7/00</b>	<b>Multiple-port networks comprising only passive electrical elements as network components</b> (receiver input circuits <a href="#">H04B 1/18</a> ; networks simulating a length of communication cable <a href="#">H04B 3/40</a> )	7/1766	. . . . {Parallel LC in series path ( <a href="#">H03H 7/1783</a> takes precedence)}
7/002	. {Gyrators}	7/1775	. . . . {Parallel LC in shunt or branch path ( <a href="#">H03H 7/1791</a> takes precedence)}
7/004	. {Capacitive coupling circuits not otherwise provided for}	7/1783	. . . . {Combined LC in series path}
2007/006	. {MEMS}	7/1791	. . . . {Combined LC in shunt or branch path}
2007/008	. . {the MEMS being trimmable}	7/18	. Networks for phase shifting
7/01	. Frequency selective two-port networks	7/185	. . {comprising distributed impedance elements together with lumped impedance elements}
7/0107	. . {Non-linear filters}	7/19	. . Two-port phase shifters providing a predetermined phase shift, e.g. "all-pass" filters
7/0115	. . {comprising only inductors and capacitors ( <a href="#">H03H 7/075</a> , <a href="#">H03H 7/09</a> , <a href="#">H03H 7/12</a> , <a href="#">H03H 7/13</a> take precedence)}	7/20	. . Two-port phase shifters providing an adjustable phase shift
7/0123	. . {comprising distributed impedance elements together with lumped impedance elements}	7/21	. . providing two or more phase shifted output signals, e.g. n-phase output
2007/013	. . {Notch or bandstop filters}	7/24	. Frequency- independent attenuators
7/0138	. . {Electrical filters or coupling circuits}	7/25	. . comprising an element controlled by an electric or magnetic variable ( <a href="#">H03H 7/27</a> takes precedence)
7/0146	. . . {Coupling circuits between two tubes, not otherwise provided for}	7/251	. . . {the element being a thermistor}
7/0153	. . {Electrical filters; Controlling thereof}	7/253	. . . {the element being a diode}
7/0161	. . . {Bandpass filters ( <a href="#">H03H 7/12</a> takes precedence)}	7/255	. . . . {the element being a PIN diode}
7/0169	. . . . {Intermediate frequency filters}	7/256	. . . . {the element being a VARACTOR diode}
7/0176	. . . . {without magnetic core}	7/258	. . . {using a galvano-magnetic device}
7/0184	. . . . {with ferromagnetic core}	7/27	. . comprising a photo-electric element
2007/0192	. . {Complex filters}	7/30	. Time-delay networks {(analogue shift registers <a href="#">G11C 27/04</a> )}
7/03	. . comprising means for compensation of loss	7/32	. . with lumped inductance and capacitance

- 7/325 . . . {Adjustable networks}
- 7/34 . . with lumped and distributed reactance
- 7/345 . . . {Adjustable networks}
- 7/38 . Impedance-matching networks
- 7/383 . . {comprising distributed impedance elements together with lumped impedance elements}
- 2007/386 . . {Multiple band impedance matching}
- 7/40 . . Automatic matching of load impedance to source impedance
- 7/42 . Balance/unbalance networks
- 7/422 . . {comprising distributed impedance elements together with lumped impedance elements}
- 7/425 . . {Balance-balance networks}
- WARNING**  
not complete, pending reorganisation, see provisionally also [H03H 1/00 - H03H 1/0007](#), [H03H 7/0107](#), [H03H 7/0123 - H03H 7/07](#), [H03H 7/09 - H03H 7/13](#), [H03H 7/42](#) and [H03H 7/422](#)
- 7/427 . . . {Common-mode filters ([H02J 3/01](#) and [H02M 1/126](#) takes precedence)}
- WARNING**  
not complete, pending reorganisation, see provisionally also [H03H 1/00 - H03H 1/0007](#), [H03H 7/0107](#), [H03H 7/0123 - H03H 7/07](#), [H03H 7/09 - H03H 7/13](#) and [H03H 7/42](#)
- 7/46 . Networks for connecting several sources or loads, working on different frequencies or frequency bands, to a common load or source ([for use in multiplex transmission systems H04J 1/00](#))
- 7/461 . . {particularly adapted for use in common antenna systems}
- 7/463 . . {Duplexers}
- 7/465 . . . {having variable circuit topology, e.g. including switches}
- 7/466 . . {particularly adapted as input circuit for receivers}
- 7/468 . . {particularly adapted as coupling circuit between transmitters and antennas}
- 7/48 . Networks for connecting several sources or loads, working on the same frequency or frequency band, to a common load or source ([phase shifters providing two or more output signals H03H 7/21](#))
- 7/482 . . {particularly adapted for use in common antenna systems}
- 7/485 . . {particularly adapted as input circuit for receivers}
- 7/487 . . {particularly adapted as coupling circuit between transmitters and antennas}
- 7/52 . One-way transmission networks, i.e. unilines
- 7/54 . Modifications of networks to reduce influence of variations of temperature
- 9/00 Networks comprising electromechanical or electro-acoustic devices; Electromechanical resonators** ([making single crystals C30B](#); [selection of materials thereof H01L](#); [piezo-electric, electrostrictive or magnetostrictive devices per se H01L 41/00](#); [electromechanical transducers H04R](#))
