

CPC COOPERATIVE PATENT CLASSIFICATION

E FIXED CONSTRUCTIONS

BUILDING

E04 BUILDING

E04C STRUCTURAL ELEMENTS; BUILDING MATERIALS (for bridges [E01D](#); specially designed for insulation or other protection [E04B](#); elements used as building aids [E04G](#); for mining [E21](#); for tunnels [E21D](#); structural elements with broader range of application than for building engineering [F16](#), particularly [F16S](#))

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

1/00	Building elements of block or other shape for the construction of parts of buildings (of relatively thin form E04C 2/00 ; structural elongated elements designed for load-supporting E04C 3/00 , e.g. columns or pillars E04C 3/30 ; manufacture or material of building bricks, stones, or the like B28 , C03 , C04 ; paving elements E01C ; general building constructions E04B , e.g. walls E04B 2/00 , floors E04B 5/00 , roofs E04B 7/00 , ceilings E04B 9/00 ; {roof coverings E04D ; coverings for walls or ceilings E04F 13/00 ; floorings E04F 15/00 } structural elements specially designed for built-in conduit shafts E04F 17/00 ; {elements for buildings for particular purposes E04H 7/00 }; special elements for building ovens or furnaces F24B , F27D)	2/00	Building elements of relatively thin form for the construction of parts of buildings, e.g. sheet materials, slabs, or panels (materials or manufacture, see the relevant subclasses , e.g. B27N , D21J ; made in situ E04B ; specially designed for insulation or other protection E04B 1/62 ; load-carrying floor structures E04B 5/02 , E04B 5/16 ; roofs consisting of self-supporting slabs E04B 7/20 ; roof or like covering elements E04D 3/00 ; for lining or finishing E04F 13/00)
1/24	. {Elements for building-up floors, ceilings, roofs, arches, or beams (E04C 1/39 - E04C 1/42 take precedence; flooring E04F 15/00)}	2002/001	. {Mechanical features of panels}
1/34	. . {designed for use as filling elements}	2002/002	. . {Panels with integrated lifting means, e.g. with hoisting lugs}
1/36	. . . {between joists or girders}	2002/004	. . {Panels with profiled edges, e.g. stepped, serrated}
1/38	. . . {in ribbed or cross-ribbed floors, ceilings, or roofs consisting of reinforced concrete}	2002/005	. {Appearance of panels}
1/39	. characterised by special adaptations, e.g. serving for locating conduits, for forming soffits, cornices, or shelves, for fixing wall-plates or door-frames, for claustra	2002/007	. . {Panels with the appearance of a brick wall}
1/392	. . {for ventilating, heating or cooling}	2002/008	. . {Panels with the appearance of a natural stone wall}
1/395	. . {for claustra, fences, planting walls, e.g. sound-absorbing (pots for vertical horticulture A01G 9/022)}	2/02	. characterised by specified materials (translucent E04C 2/54)
1/397	. . {serving for locating conduits (E04C 1/392 takes precedence)}	2/04	. . of concrete or other stone-like material; of asbestos cement; {of cement and other mineral fibres} (E04C 2/26 takes precedence; material or manufacture B28 , C04)
1/40	. built-up from parts of different materials, e.g. composed of layers of different materials or stones with filling material or with insulating inserts	2/041	. . . {composed of a number of smaller elements, e.g. bricks, also combined with a slab of hardenable material}
1/41	. . composed of insulating material and load-bearing concrete, stone or stone-like material	2/042 {Apparatus for handling the smaller elements or the hardenable material; bricklaying machines for prefabricated panels (bricklaying machines in general E04G 21/22)}
1/42	. of glass or other transparent material {(panels made of glass bricks E04C 2/546)}	2/043 {of plaster (E04C 2/049 takes precedence)}
		2/044 {of concrete (E04C 2/049 takes precedence)}
		2002/045 {with two parallel leaves connected by tie anchors}
		2002/046 {Flat anchors}
		2002/047 {Pin or rod shaped anchors}
		2002/048 {Bent wire anchors}
		2/049 {completely or partially of insulating material, e.g. cellular concrete or foamed plaster}
		2/06	. . . reinforced

2/08	. . of metal, e.g. sheet metal (E04C 2/26 takes precedence)	2002/3438 {with saddle-shaped dimples, e.g. eggcrate type spacer sheets}
2/10	. . of wood, fibres, chips, vegetable stems, or the like; of plastics; of foamed products (E04C 2/049 , E04C 2/26 take precedence ; {hydraulic cement and mineral fibres E04C 2/04 })	2002/3444 {Corrugated sheets}
2/12	. . . of solid wood	2002/345 {with triangular corrugations}
2/14 reinforced	2002/3455 {with trapezoidal corrugations}
2/16	. . . of fibres, chips, vegetable stems, or the like	2002/3461 {with rectangular corrugations}
2/18 with binding wires, reinforcing bars, or the like	2002/3466 {with sinusoidal corrugations}
2/20	. . . of plastics	2002/3472 {with multiple layers of profiled spacer sheets}
2/205 {of foamed plastics, or of plastics and foamed plastics, optionally reinforced}	2002/3477	. . . {spaced apart by tubular elements parallel to the sheets}
2/22 reinforced (E04C 2/205 takes precedence)	2002/3483	. . . {spaced apart by spacers stamped from the sheets}
2/24	. . . laminated and composed of materials covered by two or more of groups E04C 2/12 , E04C 2/16 , E04C 2/20	2002/3488	. . . {spaced apart by frame like structures}
2/243 {one at least of the material being insulating}	2002/3494	. . . {Apparatus for making profiled spacer sheets}
2/246 {combinations of materials fully covered by E04C 2/16 and E04C 2/20 }	2/36	. . . spaced apart by transversely-placed strip material, e.g. honeycomb panels (honeycomb or other core members for layered products B32B)
2/26	. . composed of materials covered by two or more of groups E04C 2/04 , E04C 2/08 , E04C 2/10 or of materials covered by one of these groups with a material not specified in one of the groups {(of cement and mineral fibres E04C 2/04)}	2/365 {by honeycomb structures}
2/28	. . . combinations of materials fully covered by groups E04C 2/04 and E04C 2/08	2/38	. . with attached ribs, flanges, or the like, e.g. framed panels (concerned with attaching to other panels or elements to form a structure, see the places for the relevant structure, e.g. E04B 2/00)
2/284	. . . at least one of the materials being insulating	2/382	. . . {with a frame of concrete or other stone-like substance}
2/288 composed of insulating material and concrete, stone or stone-like material	2/384	. . . {with a metal frame}
2/2885 {with the insulating material being completely surrounded by, or embedded in, a stone-like material, e.g. the insulating material being discontinuous}	2/386	. . . {with a frame of unreconstituted or laminated wood}
2/292 composed of insulating material and sheet metal	2/388	. . . {with a frame of other materials, e.g. fibres, plastics}
2/296 composed of insulating material and non-metallic or unspecified sheet-material (E04C 2/288 takes precedence)	2/40	. . composed of a number of smaller components rigidly or movably connected together, e.g. interlocking, hingedly connected {of particular shape, e.g. not rectangular of variable shape or size, e.g. flexible or telescopic panels (E04C 2/041 takes precedence)}
2/30	. characterised by the shape or structure (translucent E04C 2/54)	2/405	. . . {composed of two or more hingedly connected parts}
2/32	. . formed of corrugated or otherwise indented sheet-like material; composed of such layers with or without layers of flat sheet-like material	2/42	. . Gratings; Grid-like panels (reinforcing elements E04C 5/00 ; built-in gratings E04F 19/10 ; gratings in general F16S 3/00)
2/322	. . . {with parallel corrugations}	2/421	. . . {made of bar-like elements, e.g. bars discontinuous in one direction}
2/324	. . . {with incisions or reliefs in the surface (E04C 2/326 takes precedence)}	2/422 {with continuous bars connecting at crossing points of the grid pattern}
2/326	. . . {with corrugations, incisions or reliefs in more than one direction of the element}	2/423 {with notches}
2/328	. . . {slightly bowed or folded panels not otherwise provided for}	2/425 {made of perforated bars}
2/34	. . composed of two or more spaced sheet-like parts (E04C 2/32 takes precedence ; spacers for cavity walls E04B 2/44)	2/426 {with continuous bars that remain unconnected at crossing points of the grid pattern, e.g. with undulating bars}
2/3405	. . . {spaced apart by profiled spacer sheets}	2/427	. . . {Expanded metal or other monolithic gratings}
2002/3411 {Dimpled spacer sheets}	2/428	. . . {Separate connecting means, e.g. connecting gratings to underlying structure}
2002/3416 {with cylindrical dimples}	2/44	. {characterised by the purpose}
2002/3422 {with polygonal dimples}	2/46	. . {specially adapted for making walls (E04C 2/52 , E04C 2/54 take precedence ; structure of slab-shaped elements E04B 1/02 ; walls of elements of relatively thin form E04B 2/72)}
2002/3427 {with conical dimples}	2/48	. . {as high as or higher than the room, i.e. having provisions concerning the connection with at least two floors (E04C 2/52 and E04C 2/54 take precedence)}
2002/3433 {with dimples extending from both sides of the spacer sheet}		

2/50	. . {Self-supporting slabs specially adapted for making floors ceilings, or roofs, e.g. able to be loaded (E04C 2/52 , E04C 2/54 take precedence; structures of slab-shaped elements E04B 1/02 ; floor structures E04B 5/00 ; roofs consisting of self-supporting slabs E04B 7/20 ; ceilings E04B 9/00 ; roof coverings E04D ; floor coverings E04F 15/00)}	2003/0456 {hollow flanged, i.e. "dogbone" metal beams}
2/52	. . with special adaptations for auxiliary purposes, e.g. serving for locating conduits (E04C 2/54 takes precedence; block-shaped elements therefor E04C 1/39 ; floor structures incorporating ducts E04B 5/48)	2003/046 {L- or T-shaped}
2/521	. . . {serving for locating conduits; for ventilating, heating or cooling}	2003/0465 {square- or rectangular-shaped}
2/523 {for ventilating}	2003/0469 {triangular-shaped}
2/525 {for heating or cooling (solar heat collectors F24S 10/00 ; heat storage F28D 20/00)}	2003/0473 {U- or C-shaped}
2/526	. . . {with adaptations not otherwise provided for, for connecting, transport; for making impervious or hermetic, e.g. sealings}	2003/0478 {X-shaped}
2/528 {Impervious or hermetic panels not otherwise provided for}	2003/0482 {Z- or S-shaped}
2/54	. Slab-like translucent elements (floors for transmitting light E04B 5/46 ; translucent or open-work ceilings E04B 9/32 , E04B 9/34 ; translucent roof coverings E04D 3/06 , E04D 3/28)	2003/0486	. . . {Truss like structures composed of separate truss elements}
2/543	. . {Hollow multi-walled panels with integrated webs}	2003/0491 {the truss elements being located in one single surface or in several parallel surfaces}
2/546	. . {made of glass bricks}	2003/0495 {the truss elements being located in several non-parallel surfaces}
3/00	Structural elongated elements designed for load-supporting (as building aids E04G)	3/06	. . . with substantially solid, i.e. unapertured, web (E04C 3/10 , E04C 3/11 take precedence {honeycomb girders E04C 3/083 })
3/005	. {Girders or columns that are rollable, collapsible or otherwise adjustable in length or height (girders as supporting members for forms E04G 11/54)}	3/065 {with special adaptations for the passage of cables or conduits through the web}
3/02	. Joists; Girders, trusses, or trusslike structures, e.g. prefabricated; Lintels; Transoms; {Braces} (E04C 3/38 takes precedence; for structures characterised by movable, separable, or collapsible parts E04B 1/343 ; {braced purlins E04B 7/024 })	3/07 at least partly of bent or otherwise deformed strip- or sheet-like material
2003/023	. . {Lintels}	3/08	. . . with apertured web, e.g. with a web consisting of bar-like components; Honeycomb girders (E04C 3/10 , E04C 3/11 take precedence)
2003/026	. . {Braces}	3/083 {Honeycomb girders; Girders with apertured solid web}
3/04	. . of metal (E04C 3/29 takes precedence; as reinforcing elements E04C 5/06 ; manufacture B21)	3/086 {of the castellated type}
2003/0404	. . . {beams, girders, or joists characterised by cross-sectional aspects}	3/09 at least partly of bent or otherwise deformed strip- or sheet-like material
2003/0408 {characterised by assembly or the cross-section}	3/10	. . . prestressed
2003/0413 {being built up from several parts}	3/11	. . . with non-parallel upper and lower edges, e.g. roof trusses (arched girders, portal frames E04C 3/38)
2003/0417 {demountable}	3/12	. . of wood, e.g. with reinforcements, with tensioning members (E04C 3/292 takes precedence)
2003/0421 {comprising one single unitary part}	3/122	. . . {Laminated}
2003/0426 {characterised by material distribution in cross section}	3/125	. . . {End caps therefor}
2003/043 {the hollow cross-section comprising at least one enclosed cavity}	3/127	. . . {with hollow cross section}
2003/0434 {the open cross-section free of enclosed cavities}	3/14	. . . with substantially solid, i.e. unapertured, web ((E04C 3/127), E04C 3/17 , E04C 3/18 take precedence)
2003/0439 {the cross-section comprising open parts and hollow parts}	3/145 {with special adaptations for the passage of cables or conduits through the web, e.g. reinforcements}
2003/0443 {characterised by substantial shape of the cross-section}	3/16	. . . with apertured web, e.g. trusses (E04C 3/17 , E04C 3/18 take precedence)
2003/0447 {circular- or oval-shaped}	3/17	. . . with non-parallel upper and lower edges, e.g. roof trusses
2003/0452 {H- or I-shaped}	3/18	. . . with metal {or other} reinforcements or tensioning members
		3/185 {Synthetic reinforcements}
		3/20	. . of concrete or other stone-like material, e.g. with reinforcements or tensioning members (reinforcing elements E04C 5/00)
		3/205	. . . {with apertured web, e.g. frameworks, trusses (E04C 3/26 takes precedence)}
		3/22	. . . built-up by elements jointed in line
		3/26	. . . prestressed (E04C 3/22 , E04C 3/29 take precedence; prestressing members E04C 5/08)
		3/28	. . of materials not covered by groups E04C 3/04 - E04C 3/20
		3/285	. . . {of glass}

- 3/29 . . built-up from parts of different material, {i.e. composite structures}
 - 3/291 . . . {with apertured web}
 - 3/292 . . . the materials being wood and metal
 - 3/293 . . . the materials being steel and concrete (concrete with internal reinforcements or tensioning members [E04C 3/20](#))
 - 3/294 of concrete combined with a girder-like structure extending laterally outside the element (light weight girders used as reinforcement [E04C 5/065](#); as part of a floor structure [E04B 5/23](#))
 - 3/30 . Columns; Pillars; Struts (not designed for end loading [E04C 3/02](#); posts, masts, as independent structures [E04H 12/00](#))
 - 3/32 . . of metal ([E04C 3/36](#) takes precedence)
 - 3/34 . . of concrete other stone-like material, with or without permanent form elements, with or without internal or external reinforcement, e.g. metal coverings ([E04C 3/36](#) takes precedence)
 - 3/36 . . of materials not covered by groups [E04C 3/32](#) or [E04C 3/34](#); of a combination of two or more materials
 - 3/38 . Arched girders or portal frames (straight girders able to be bent [E04C 3/02](#); inflatable [E04H 15/20](#))
 - 3/40 . . of metal ([E04C 3/46](#) takes precedence)
 - 3/42 . . of wood, e.g. units for rafter roofs ([E04C 3/46](#) takes precedence)
 - 3/44 . . of concrete or other stone-like material, e.g. with reinforcements or tensioning members ([E04C 3/46](#) takes precedence)
 - 3/46 . . of materials not covered by groups [E04C 3/40](#) - [E04C 3/44](#); of a combination of two or more materials
 - 5/00 Reinforcing elements, e.g. for concrete; Auxiliary elements therefor** ({methods or devices for making reinforcing materials [B21D](#)}; material composition {[C04B](#)}, [C21](#), [C22](#); arrangements of reinforcing elements, see the relevant subclasses)
- NOTES**
1. In this group, the following terms or expressions are used with the meanings indicated:
 - "reinforcing" means increasing any physical strength characteristic of the end product, e.g. compressive or flexural strength;
 - "elements" includes relatively large bodies, e.g. steel bars, as well as relatively small discrete bodies of any form, e.g. glass fibres.
 2. Discrete reinforcing elements, which are small compared with the reinforced building element, only characterised by their composition are classified in [C04B](#), e.g. steel fibres [C04B 14/48](#), plastic elements with a shape other than granular or fibrous [C04B 16/12](#)
- 5/01 . Reinforcing elements of metal, e.g. with non-structural coatings {([E04C 5/08](#) takes precedence)}
 - 5/012 . . {Discrete reinforcing elements, e.g. fibres}
 - 5/015 . . {Anti-corrosion coatings or treating compositions, e.g. containing waterglass or based on another metal (coating of discrete reinforcing elements [C04B 20/10](#))}
 - 5/017 . . . {Anti-corrosion coatings or treating compositions containing cement}
 - 5/02 . . of low bending resistance
 - 5/03 . . . with indentations, projections, ribs, or the like, for augmenting the adherence to the concrete
 - 5/04 . . . Mats ({combined with reinforcing elements protruding out of the plane of the mat [E04C 5/0627](#); three-dimensional mats [E04C 5/0636](#)}; bases for plaster [E04F 13/04](#))
 - 5/06 . . of high bending resistance, i.e. of essentially three-dimensional extent, e.g. lattice girders {anchorage devices specially adapted for balconies [E04B 1/0038](#); supporting devices for connector reinforcing rods for concrete walls [E04G 21/125](#)}
 - 5/0604 . . . {Prismatic or cylindrical reinforcement cages composed of longitudinal bars and open or closed stirrup rods ([E04C 5/0631](#) takes precedence)}
 - 5/0609 {Closed cages composed of two or more coaxing cage parts, e.g. transversally hinged or nested parts}
 - 5/0613 {Closed cages made of one single bent reinforcement mat}
 - 5/0618 {Closed cages with spiral- or coil-shaped stirrup rod}
 - 5/0622 {Open cages, e.g. connecting stirrup baskets ([E04C 5/0609](#) takes precedence)}
 - 5/0627 . . . {Three-dimensional reinforcements composed of a prefabricated reinforcing mat combined with reinforcing elements protruding out of the plane of the mat ([E04C 5/0645](#) takes precedence)}
 - 5/0631 {Reinforcing mats combined with separate prefabricated reinforcement cages or girders ([E04C 5/064](#) takes precedence)}
 - 5/0636 . . . {Three-dimensional reinforcing mats composed of reinforcing elements laying in two or more parallel planes and connected by separate reinforcing parts ([E04C 5/0645](#) takes precedence)}
 - 5/064 {the reinforcing elements in each plane being formed by, or forming a, mat of longitudinal and transverse bars}
 - 5/0645 . . . {Shear reinforcements, e.g. shearheads for floor slabs}
 - 5/065 . . . Light-weight girders, e.g. with precast parts (light-weight girders in general [E04C 3/08](#), [E04C 3/294](#))
 - 5/0653 {with precast parts}
 - 5/0656 {with lost formwork}
 - 5/07 . Reinforcing elements of material other than metal, e.g. of glass, of plastics, or not exclusively made of metal (metal elements with non-structural coatings [E04C 5/01](#))
 - 5/073 . . {Discrete reinforcing elements, e.g. fibres}
 - 5/076 . . . {Specially adapted packagings therefor, e.g. for dosing}
 - 5/08 . Members specially adapted to be used in prestressed constructions {(production of reinforced objects in general [B28B 23/00](#); prestressed structures produced in situ [E04G 21/12](#))}
 - 5/085 . . {Tensile members made of fiber reinforced plastics}
 - 5/10 . . Ducts
 - 5/12 . . Anchoring devices (tools or methods for tensioning {in situ} [E04G 21/12](#))

- 5/122 . . . {the tensile members are anchored by wedge-action}
- 5/125 . . . {the tensile members are profiled to ensure the anchorage, e.g. when provided with screw-thread, bulges, corrugations}
- 5/127 . . . {The tensile members being made of fiber reinforced plastics}
- 5/16 . Auxiliary parts for reinforcements, e.g. connectors, spacers, stirrups ([\(E04C 5/06 takes precedence;\)](#) [tools connecting reinforcing elements E04G 21/12](#))
- 5/161 . . {Protective caps for the ends of reinforcing bars}
- 5/162 . . {Connectors or means for connecting parts for reinforcements [\(E04C 5/168 takes precedence\)](#)}
- 5/163 . . . {the reinforcements running in one single direction}
- 5/165 {Coaxial connection by means of sleeves}
- 5/166 . . . {the reinforcements running in different directions}
- 5/167 {Connection by means of clips or other resilient elements}
- 5/168 . . {Spacers connecting parts for reinforcements and spacing the reinforcements from the form}
- 5/18 . . {Spacers} of metal or substantially of metal [{\(E04C 5/168 takes precedence\)}](#)}
- 5/20 . . of material other than metal or with only additional metal parts, e.g. concrete or plastics spacers with metal binding wires [{\(E04C 5/168 takes precedence\)}](#)}
- 5/201 . . . {Spacer blocks with embedded separate holding wire or clips}
- 5/203 . . . {Circular and spherical spacers}
- 5/205 . . . {Ladder or strip spacers}
- 5/206 . . . {Spacers having means to adapt the spacing distance}
- 5/208 . . . {Spacers especially adapted for cylindrical reinforcing cages}
