

CPC COOPERATIVE PATENT CLASSIFICATION

H ELECTRICITY

(NOTE omitted)

H04 ELECTRIC COMMUNICATION TECHNIQUE

(NOTE omitted)

H04W WIRELESS COMMUNICATION NETWORKS (broadcast communication [H04H](#); communication systems using wireless links for non-selective communication, e.g. wireless extensions [H04M 1/72](#))

NOTES

1. This subclass covers :
 - communication networks for selectively establishing one or a plurality of wireless communication links between a desired number of users or between users and network equipment, for the purpose of transferring information via these wireless communication links;
 - networks deploying an infrastructure for mobility management of wireless users connected thereto, e.g. cellular networks, WLAN [Wireless Local Area Network], wireless access networks, e.g. WLL [Wireless Local Loop] or self-organising wireless communication networks, e.g. ad hoc networks;
 - planning or deployment specially adapted for the above-mentioned wireless networks;
 - services or facilities specially adapted for the above-mentioned wireless networks;
 - arrangements or techniques specially adapted for the operation of the above-mentioned wireless networks.
2. This subclass does not cover :
 - communication systems using wireless extensions, i.e. wireless links without selective communication, e.g. cordless telephones, which are covered by group [H04M 1/72](#);
 - broadcast communication, which is covered by subclass [H04H](#).

WARNING

In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

4/00	Services specially adapted for wireless communication networks; Facilities therefor	4/08	• • User group management
		4/10	• • Push-to-Talk [PTT] or Push-On-Call services
		4/12	• Messaging; Mailboxes; Announcements
		4/14	• • Short messaging services, e.g. short message services [SMS] or unstructured supplementary service data [USSD]
		4/16	• Communication-related supplementary services, e.g. call-transfer or call-hold
		4/18	• Information format or content conversion, e.g. adaptation by the network of the transmitted or received information for the purpose of wireless delivery to users or terminals
4/02	• Services making use of location information	4/185	• • {by embedding added-value information into content, e.g. geo-tagging}
4/021	• • Services related to particular areas, e.g. point of interest [POI] services, venue services or geofences	4/20	• Services signaling; Auxiliary data signalling, i.e. transmitting data via a non-traffic channel
4/022	• • • {with dynamic range variability}	4/203	• • {for converged personal network application service interworking, e.g. OMA converged personal network services [CPNS]}
4/023	• • {using mutual or relative location information between multiple location based services [LBS] targets or of distance thresholds}	4/21	• • for social networking applications
4/024	• • Guidance services	4/23	• • for mobile advertising
4/025	• • {using location based information parameters}	4/24	• Accounting or billing
4/026	• • • {using orientation information, e.g. compass}	4/30	• Services specially adapted for particular environments, situations or purposes
4/027	• • • {using movement velocity, acceleration information}	4/33	• • for indoor environments, e.g. buildings
4/029	• • Location-based management or tracking services	4/35	• • for the management of goods or merchandise
4/06	• Selective distribution of broadcast services, e.g. multimedia broadcast multicast service [MBMS]; Services to user groups; One-way selective calling services	4/38	• • for collecting sensor information
		4/40	• • for vehicles, e.g. vehicle-to-pedestrians [V2P]

4/42	. . . for mass transport vehicles, e.g. buses, trains or aircraft	8/30	. Network data restoration; {Network data reliability; Network data fault tolerance}
4/44	. . . for communication between vehicles and infrastructures, e.g. vehicle-to-cloud [V2C] or vehicle-to-home [V2H]	12/00	Security arrangements; Authentication; Protecting privacy or anonymity
4/46	. . . for vehicle-to-vehicle communication [V2V]	12/009	. {specially adapted for networks, e.g. wireless sensor networks, ad-hoc networks, RFID networks or cloud networks}
4/48	. . . for in-vehicle communication	12/02	. Protecting privacy or anonymity, e.g. protecting personally identifiable information [PII]
4/50	. Service provisioning or reconfiguring	12/03	. Protecting confidentiality, e.g. by encryption
4/60	. Subscription-based services using application servers or record carriers, e.g. SIM application toolkits	12/033	. . of the user plane, e.g. user's traffic
4/70	. Services for machine-to-machine communication [M2M] or machine type communication [MTC]	12/037	. . of the control plane, e.g. signalling traffic
4/80	. Services using short range communication, e.g. near-field communication [NFC], radio-frequency identification [RFID] or low energy communication	12/04	. Key management, e.g. using generic bootstrapping architecture [GBA]
4/90	. Services for handling of emergency or hazardous situations, e.g. earthquake and tsunami warning systems [ETWS]	12/041	. . Key generation or derivation
8/00	Network data management	12/043	. . using a trusted network node as an anchor
8/005	. {Discovery of network devices, e.g. terminals}	12/0431	. . . Key distribution or pre-distribution; Key agreement
8/02	. Processing of mobility data, e.g. registration information at HLR [Home Location Register] or VLR [Visitor Location Register]; Transfer of mobility data, e.g. between HLR, VLR or external networks	12/0433	. . . Key management protocols
8/04	. . Registration at HLR or HSS [Home Subscriber Server]	12/047	. . without using a trusted network node as an anchor
8/06	. . Registration at serving network Location Register, VLR or user mobility server	12/0471	. . . Key exchange
8/065	. . . {involving selection of the user mobility server}	12/06	. Authentication
8/08	. . Mobility data transfer	12/062	. . Pre-authentication
8/082	. . . {for traffic bypassing of mobility servers, e.g. location registers, home PLMNs or home agents}	12/065	. . Continuous authentication
8/085	. . . {involving hierarchical organized mobility servers, e.g. hierarchical mobile IP [HMIP]}	12/068	. . {using credential vaults, e.g. password manager applications or one time password [OTP] applications}
8/087	. . . {for preserving data network PoA address despite hand-offs}	12/069	. . using certificates or pre-shared keys
8/10	. . . between location register and external networks	12/08	. Access security
8/12	. . . between location registers or mobility servers	12/082	. . using revocation of authorisation
8/14	. . . between corresponding nodes	12/084	. . using delegated authorisation, e.g. open authorisation [OAuth] protocol
8/16	. . . selectively restricting mobility {data} tracking	12/086	. . using security domains
8/18	. Processing of user or subscriber data, e.g. subscribed services, user preferences or user profiles; Transfer of user or subscriber data	12/088	. . using filters or firewalls
8/183	. . {Processing at user equipment or user record carrier}	12/10	. Integrity
8/186	. . {Processing of subscriber group data}	12/102	. . Route integrity, e.g. using trusted paths
8/20	. . Transfer of user or subscriber data	12/104	. . Location integrity, e.g. secure geotagging
8/205	. . . {Transfer to or from user equipment or user record carrier}	12/106	. . Packet or message integrity
8/22	. Processing or transfer of terminal data, e.g. status or physical capabilities	12/108	. . Source integrity
8/24	. . Transfer of terminal data	12/12	. Detection or prevention of fraud
8/245	. . . {from a network towards a terminal}	12/121	. . Wireless intrusion detection systems [WIDS]; Wireless intrusion prevention systems [WIPS]
8/26	. Network addressing or numbering for mobility support	12/122	. . . Counter-measures against attacks; Protection against rogue devices
8/265	. . {for initial activation of new user}	12/125	. . Protection against power exhaustion attacks
8/28	. . Number portability {; Network address portability}	12/126	. . Anti-theft arrangements, e.g. protection against subscriber identity module [SIM] cloning
		12/128	. . Anti-malware arrangements, e.g. protection against SMS fraud or mobile malware
		12/30	. Security of mobile devices; Security of mobile applications
			<u>WARNING</u>
			Group H04W 12/30 is impacted by reclassification into group H04W 12/33 .
			Groups H04W 12/30 and H04W 12/33 should be considered in order to perform a complete search.

12/33	<ul style="list-style-type: none"> using wearable devices, e.g. using a smartwatch or smart-glasses <p>WARNING</p> <p>Group H04W 12/33 is incomplete pending reclassification of documents from group H04W 12/30.</p> <p>Groups H04W 12/30 and H04W 12/33 should be considered in order to perform a complete search.</p>	16/00	Network planning, e.g. coverage or traffic planning tools; Network deployment, e.g. resource partitioning or cells structures

- 28/0247 . . {based on conditions of the access network or the infrastructure network (central resource management [H04W 28/16](#))}
- 28/0252 . . {per individual bearer or channel (dynamic wireless traffic scheduling [H04W 72/12](#))}
- 28/0257 . . . {the individual bearer or channel having a maximum bit rate or a bit rate guarantee}
- 28/0263 . . . {involving mapping traffic to individual bearers or channels, e.g. traffic flow template [TFT]}
- 28/0268 . . {using specific QoS parameters for wireless networks, e.g. QoS class identifier [QCI] or guaranteed bit rate [GBR] (negotiating SLA or negotiating QoS [H04W 28/24](#))}
- 28/0273 . . {adapting protocols for flow control or congestion control to wireless environment, e.g. adapting transmission control protocol [TCP] (wireless network protocols or protocol adaptations to wireless operation, e.g. wireless application protocol [H04W 80/00](#))}
- 28/0278 . . {using buffer status reports (dynamic wireless traffic scheduling definition [H04W 72/1205](#))}
- 28/0284 . . {detecting congestion or overload during communication (monitoring arrangements [H04L 43/00](#))}
- 28/0289 . . {Congestion control (performing reselection for handling the traffic [H04W 36/22](#); load shedding arrangements in network planning [H04W 16/08](#); dynamic wireless traffic scheduling [H04W 72/12](#))}
- 28/0294 . . {forcing collision (non-scheduled or contention based wireless access channel [H04W 74/08](#))}
- 28/04 . . Error control

NOTE

When classifying in this group, classification is also made in the appropriate groups under [H04L 1/00](#).

- 28/06 . . Optimizing {the usage of the radio link}, e.g. header compression, information sizing {, discarding information (system modifying transmission characteristic according to link quality by modifying frame length [H04L 1/0007](#); dynamic adaptation of the packet size for flow control or congestion control [H04L 47/365](#))}
- 28/065 . . . {using assembly or disassembly of packets}
- 28/08 . . Load balancing or load distribution

WARNING

Group [H04W 28/08](#) is impacted by re-classification into groups [H04W 28/0804](#) - [H04W 28/0846](#) and groups [H04W 28/0858](#) - [H04W 28/0992](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 28/0804 . . . {between access entities (reselecting a network for handling traffic [H04W 36/22](#); wireless resource allocation where an allocation plan is defined based on load [H04W 72/0486](#))}

WARNING

Groups [H04W 28/0804](#) - [H04W 28/0823](#) are incomplete pending re-classification of documents from group [H04W 28/08](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 28/0808 {between base stations}
- 28/0812 {of same hierarchy level}
- 28/0815 {of different hierarchy levels, e.g. Master Evolved Node B [MeNB] or Secondary Evolved node B [SeNB]}
- 28/0819 {of different Radio Access Technologies [RATs], e.g. LTE or WiFi}
- 28/0823 {between wireless and wire-based access points, e.g. via LTE and via DSL connected access points}
- 28/0827 . . . {Triggering entity}

WARNING

Groups [H04W 28/0827](#) - [H04W 28/0838](#) are incomplete pending re-classification of documents from group [H04W 28/08](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 28/0831 {Core entity}
- 28/0835 {Access entity, e.g. eNB}
- 28/0838 {User device}
- 28/0842 . . . {among core entities}

WARNING

Group [H04W 28/0842](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0842](#) should be considered in order to perform a complete search.

- 28/0846 . . . {between network providers, e.g. operators (selecting a network or a communication service [H04W 40/18](#))}

WARNING

Group [H04W 28/0846](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0846](#) should be considered in order to perform a complete search.

- 28/085 . . . {among bearers or channels}

28/0858 . . . {among entities in the uplink}

WARNING

Group [H04W 28/0858](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0858](#) should be considered in order to perform a complete search.

28/0867 . . . {among entities in the downlink}

WARNING

Group [H04W 28/0867](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0867](#) should be considered in order to perform a complete search.

28/0875 . . . {to or through Device to Device [D2D] links, e.g. direct-mode links}

WARNING

Group [H04W 28/0875](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0875](#) should be considered in order to perform a complete search.

28/0883 . . . {between entities in ad-hoc networks}

WARNING

Groups [H04W 28/0883](#) and [H04W 28/0892](#) are incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#), [H04W 28/0883](#) and [H04W 28/0892](#) should be considered in order to perform a complete search.

28/0892 . . . {between different intermediate nodes}

28/09 . . . {Management thereof}

WARNING

Group [H04W 28/09](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/09](#) should be considered in order to perform a complete search.

28/0908 . . . {based on time, e.g. for a critical period only}

WARNING

Group [H04W 28/0908](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0908](#) should be considered in order to perform a complete search.

28/0917 . . . {based on the energy state of entities}

WARNING

Group [H04W 28/0917](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0917](#) should be considered in order to perform a complete search.

28/0925 . . . {using policies}

WARNING

Groups [H04W 28/0925](#) - [H04W 28/095](#) are incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0925](#) should be considered in order to perform a complete search.

28/0933 . . . {based on load-splitting ratios}

28/0942 . . . {based on measured or predicted load of entities- or links}

28/095 . . . {based on usage history, e.g. usage history of devices}

28/0958 . . . {based on metrics or performance parameters}

WARNING

Groups [H04W 28/0958](#) – [H04W 28/0983](#) are incomplete pending re-classification of documents from group [H04W 28/08](#).

All groups listed in this Warning should be considered in order to perform a complete search.

28/0967 . . . {Quality of Service [QoS] parameters}

28/0975 . . . {for reducing delays}

28/0983 . . . {for optimizing bandwidth or throughput}

28/0992 . . . {based on the type of application}

WARNING

Group [H04W 28/0992](#) is incomplete pending re-classification of documents from group [H04W 28/08](#).

Groups [H04W 28/08](#) and [H04W 28/0992](#) should be considered in order to perform a complete search.

28/10 . . Flow control {between communication endpoints}

28/12 . . . using signalling between network elements

28/14 . . . using intermediate storage

28/16 . Central resource management; Negotiation of resources or communication parameters, e.g. negotiating bandwidth or QoS [Quality of Service]

28/18 . . Negotiating wireless communication parameters

28/20 . . . Negotiating bandwidth

28/22 . . . Negotiating communication rate

28/24 . . Negotiating SLA [Service Level Agreement]; Negotiating QoS [Quality of Service]

28/26 . . Resource reservation

36/00 Hand-off or reselection arrangements**NOTE**

In this group, local priority rules supersede the first-place priority rule (FPPR) applying throughout [H04W](#)

WARNING

Group [H04W 36/00](#) is impacted by reclassification into group [H04W 36/03](#).

Groups [H04W 36/00](#) and [H04W 36/03](#) should be considered in order to perform a complete search.

- 36/0005 . . {Control or signalling for completing the hand-off}

WARNING

Group [H04W 36/0005](#) is impacted by reclassification into groups [H04W 36/0007](#) and [H04W 36/0009](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 36/0007 . . {for multicast or broadcast services, e.g. MBMS (multicast or broadcast application services [H04W 4/06](#); resource management for broadcast services [H04W 72/005](#); connection management for selective distribution or broadcast [H04W 76/40](#))}

WARNING

Group [H04W 36/0007](#) is incomplete pending reclassification of documents from group [H04W 36/0005](#).

Groups [H04W 36/0005](#) and [H04W 36/0007](#) should be considered in order to perform a complete search.

- 36/0009 . . {for a plurality of users or terminals, e.g. group communication or moving wireless networks (user group management [H04W 4/08](#); processing of subscriber group data [H04W 8/186](#))}

WARNING

Group [H04W 36/0009](#) is incomplete pending reclassification of documents from group [H04W 36/0005](#).

Groups [H04W 36/0005](#) and [H04W 36/0009](#) should be considered in order to perform a complete search.

- 36/0011 . . {for data session or connection}
 36/0016 . . . {for hand-off preparation}
 36/0022 . . . {for transferring sessions between adjacent core network technologies}
 36/0027 . . . {for a plurality of sessions or connections, e.g. multi-call, multi-bearer connections}
 36/0033 . . . {with transfer of context information}
 36/0038 {of security context information}
 36/0044 {of quality context information}
 36/005 . . {involving radio access media independent information, e.g. MIH [Media independent Hand-off]}

- 36/0055 . . {Transmission and use of information for re-establishing the radio link}

WARNING

Group [H04W 36/0055](#) is impacted by reclassification into groups [H04W 36/0058](#), [H04W 36/0069](#) and [H04W 36/0079](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 36/0058 . . . {Transmission of hand-off measurement information, e.g. measurement reports}

WARNING

Group [H04W 36/0058](#) is incomplete pending reclassification of documents from group [H04W 36/0055](#).

Groups [H04W 36/0005](#) and [H04W 36/0058](#) should be considered in order to perform a complete search.

- 36/0061 . . . {of neighbor cell information}

- 36/0066 . . . {of control information between different types of networks in order to establish a new radio link in the target network}

- 36/0069 . . . {in case of dual connectivity, e.g. CoMP, decoupled uplink/downlink or carrier aggregation (allocation of physical resources in CoMP or in carrier aggregation [H04L 5/0035](#))}

WARNING

Group [H04W 36/0069](#) is incomplete pending reclassification of documents from group [H04W 36/0055](#).

Groups [H04W 36/0055](#) and [H04W 36/0069](#) should be considered in order to perform a complete search.

- 36/0072 . . . {of resource information of target access point}

- 36/0077 . . . {of access information of target access point}

- 36/0079 . . . {in case of hand-off failure or rejection}

WARNING

Group [H04W 36/0079](#) is incomplete pending reclassification of documents from groups [H04W 36/0055](#) and [H04W 36/30](#).

Groups [H04W 36/0055](#), [H04W 36/30](#) and [H04W 36/0079](#) should be considered in order to perform a complete search.

- 36/0083 . . {Determination of parameters used for hand-off, e.g. generation or modification of neighbour cell lists}

WARNING

Group [H04W 36/0083](#) is impacted by reclassification into groups [H04W 36/00835](#), [H04W 36/00837](#), and [H04W 36/0085](#).

All groups listed in this Warning should be considered in order to perform a complete search.

36/00835 . . . {Determination of the neighbour cell list}

WARNING

Group [H04W 36/00835](#) is incomplete pending reclassification of documents from group [H04W 36/0083](#).

Groups [H04W 36/0083](#) and [H04W 36/00835](#) should be considered in order to perform a complete search.

36/00837 . . . {Determination of triggering parameters for hand-off}

WARNING

Group [H04W 36/00837](#) is incomplete pending reclassification of documents from group [H04W 36/0083](#).

Groups [H04W 36/0083](#) and [H04W 36/00837](#) should be considered in order to perform a complete search.

36/0085 . . . {Hand-off measurements}

WARNING

Group [H04W 36/0085](#) is incomplete pending reclassification of documents from group [H04W 36/0083](#).

Groups [H04W 36/0083](#) and [H04W 36/0085](#) should be considered in order to perform a complete search.

36/0088 {Scheduling hand-off measurements}

36/0094 {Definition of hand-off measurement parameters}

36/02 . . Buffering or recovering information during reselection (; Modification of the traffic flow during hand-off)

36/023 . . {Buffering or recovering information during reselection}

36/026 . . {Multicasting of data during hand-off}

36/03 . . {Reselecting a link using a direct mode connection}

WARNING

Group [H04W 36/03](#) is incomplete pending reclassification of documents from group [H04W 36/00](#).

Groups [H04W 36/03](#) and [H04W 36/00](#) should be considered in order to perform a complete search.

36/04 . . Reselecting a cell layer in multi-layered cells

36/06 . . Reselecting a communication resource in the serving access point

36/08 . . Reselecting an access point

36/10 . . Reselecting an access point controller

36/12 . . Reselecting a serving backbone network switching or routing node

WARNING

Group [H04W 36/12](#) is impacted by reclassification into group [H04W 36/125](#).

Groups [H04W 36/12](#) and [H04W 36/125](#) should be considered in order to perform a complete search.

36/125 . . {involving different types of service backbone}

WARNING

Group [H04W 36/125](#) is incomplete pending reclassification of documents from group [H04W 36/12](#).

Groups [H04W 36/12](#) and [H04W 36/125](#) should be considered in order to perform a complete search.

36/14 . . Reselecting a network or an air interface

36/16 . . Performing reselection for specific purposes

36/165 . . {for improving the overall network performance ([H04W 36/18](#) - [H04W 36/22](#) take precedence)}

36/18 . . for allowing seamless reselection, e.g. soft reselection

36/20 . . for optimising the interference level

36/22 . . for handling the traffic

36/24 . . Reselection being triggered by specific parameters {used to improve the performance of a single terminal}

36/245 . . {by historical data}

36/26 . . by agreed or negotiated communication parameters

36/28 . . . involving a plurality of connections, e.g. multi-call, multi-bearer connections

36/30 . . by measured or perceived connection quality data

WARNING

Group [H04W 36/30](#) is impacted by reclassification into groups [H04W 36/305](#) and [H04W 36/0079](#)

Groups [H04W 36/30](#), [H04W 36/305](#) and [H04W 36/0079](#) should be considered in order to perform a complete search.

36/305 . . . {Reselection due to radio link failure (control signalling for hand-off failure [H04W 36/0079](#))}

WARNING

Group [H04W 36/305](#) is incomplete pending reclassification of documents from group [H04W 36/30](#).

Groups [H04W 36/30](#) and [H04W 36/305](#) should be considered in order to perform a complete search.

36/32 . . by location or mobility data, e.g. speed data

36/34 . . Reselection control

36/36 . . by user or terminal equipment

36/365 . . . {by manual user interaction}

36/38 . . by fixed network equipment

36/385 . . . {of the core network}

40/00 Communication routing or communication path finding

40/005 . . {Routing actions in the presence of nodes in sleep or doze mode}

40/02 . . Communication route or path selection, e.g. power-based or shortest path routing

40/023 . . {Limited or focused flooding to selected areas of a network}

40/026 . . {Route selection considering the moving speed of individual devices}

40/04 . . based on wireless node resources

40/06	. . . based on characteristics of available antennas	52/0209	. . . {in terminal devices (terminal devices per se H04W 88/02)}
40/08	. . . based on transmission power	52/0212	. . . {managed by the network, e.g. network or access point is master and terminal is slave}
40/10	. . . based on available power or energy	52/0216 {using a pre-established activity schedule, e.g. traffic indication frame}
40/12	. . based on transmission quality or channel quality	52/0219 {where the power saving management affects multiple terminals}
40/125	. . . {using a measured number of retransmissions as a link metric}	52/0222 {in packet switched networks}
40/14	. . . based on stability	52/0225 {using monitoring of external events, e.g. the presence of a signal}
40/16	. . . based on interference	52/0229 {where the received signal is a wanted signal}
40/18	. . based on predicted events	52/0232 {according to average transmission signal activity}
40/20	. . based on geographic position or location	52/0235 {where the received signal is a power saving command}
40/205	. . . {using topographical information, e.g. hills, high rise buildings}	52/0238 {where the received signal is an unwanted signal, e.g. interference or idle signal}
40/22	. . using selective relaying for reaching a BTS [Base Transceiver Station] or an access point	52/0241 {where no transmission is received, e.g. out of range of the transmitter}
40/24	. Connectivity information management, e.g. connectivity discovery or connectivity update	52/0245 {according to signal strength}
40/242	. . {aging of topology database entries}	52/0248 {dependent on the time of the day, e.g. according to expected transmission activity}
40/244	. . {using a network of reference devices, e.g. beaconing}	52/0251 {using monitoring of local events, e.g. events related to user activity}
40/246	. . {Connectivity information discovery}	52/0254 {detecting a user operation or a tactile contact or a motion of the device}
40/248	. . {Connectivity information update}	52/0258 {controlling an operation mode according to history or models of usage information, e.g. activity schedule or time of day}
40/26	. . for hybrid routing by combining proactive and reactive routing	52/0261 {managing power supply demand, e.g. depending on battery level}
40/28	. . for reactive routing	52/0264 {by selectively disabling software applications}
40/30	. . for proactive routing	52/0267 {by controlling user interface components}
40/32	. . for defining a routing cluster membership	52/027 {by controlling a display operation or backlight unit}
40/34	. Modification of an existing route	52/0274 {by switching on or off the equipment or parts thereof}
40/36	. . due to handover	52/0277 {according to available power supply, e.g. switching off when a low battery condition is detected}
40/38	. . adapting due to varying relative distances between nodes	52/028 {switching on or off only a part of the equipment circuit blocks}
48/00	Access restriction (access security to prevent unauthorised access H04W 12/08); Network selection; Access point selection	52/0283 {with sequential power up or power down of successive circuit blocks, e.g. switching on the local oscillator before RF or mixer stages}
48/02	. Access restriction performed under specific conditions	52/0287 {changing the clock frequency of a controller in the equipment}
48/04	. . based on user or terminal location or mobility data, e.g. moving direction, speed	52/029 {reducing the clock frequency of the controller}
48/06	. . based on traffic conditions	52/0293 {having a sub-controller with a low clock frequency switching on and off a main controller with a high clock frequency}
48/08	. Access restriction or access information delivery, e.g. discovery data delivery (signalling during connection H04W 76/00)	52/0296 {switching to a backup power supply}
48/10	. . using broadcasted information	52/04	. TPC
48/12	. . using downlink control channel	52/06	. . TPC algorithms
48/14	. . using user query {or user detection}	52/08	. . . Closed loop power control
48/16	. Discovering, processing access restriction or access information	52/10	. . . Open loop power control
48/17	. {Selecting a data network PoA [Point of Attachment]}	52/12	. . . Outer and inner loops
48/18	. Selecting a network or a communication service	52/125 {cascaded outer loop power control}
48/20	. Selecting an access point	52/14	. . . Separate analysis of uplink or downlink
52/00	Power management, e.g. TPC [Transmission Power Control], power saving or power classes {(gain control in transmitters or power amplifiers H03G 3/3042)}		
52/02	. Power saving arrangements {(in wired systems H04L 12/12 ; signaling of mobile application services, e.g. low battery notifications H04W 4/20)}		
52/0203	. . {in the radio access network or backbone network of wireless communication networks}		
52/0206	. . . {in access points, e.g. base stations (access point devices per se H04W 88/08)}		

52/143 {Downlink power control}	52/327 {Power control of multicast channels}
52/146 {Uplink power control}	52/34	. . . TPC management, i.e. sharing limited amount of power among users or channels or data types, e.g. cell loading
52/16	. . . Deriving transmission power values from another channel	52/343 {taking into account loading or congestion level}
52/18	. . TPC being performed according to specific parameters	52/346 {distributing total power among users or channels}
52/20	. . . using error rate	52/36	. . . with a discrete range or set of values, e.g. step size, ramping or offsets
52/22	. . . taking into account previous information or commands	52/362 {Aspects of the step size}
52/221 {using past power control commands}	52/365 {Power headroom reporting}
52/223 {predicting future states of the transmission}	52/367 {Power values between minimum and maximum limits, e.g. dynamic range}
52/225 {Calculation of statistics, e.g. average, variance}	52/38	. . TPC being performed in particular situations
52/226 {using past references to control power, e.g. look-up-table}	52/383	. . . {power control in peer-to-peer links}
52/228 {using past power values or information}	52/386	. . . {centralized, e.g. when the radio network controller or equivalent takes part in the power control}
52/24	. . . using SIR [Signal to Interference Ratio] or other wireless path parameters	52/40	. . . during macro-diversity or soft handoff
52/241 {taking into account channel quality metrics, e.g. SIR, SNR, CIR, Eb/Io}	52/42	. . . in systems with time, space, frequency or polarisation diversity
52/242 {taking into account path loss}	52/44	. . . in connection with interruption of transmission
52/243 {taking into account interferences}	52/46	. . . in multi hop networks, e.g. wireless relay networks
52/244 {Interferences in heterogeneous networks, e.g. among macro and femto or pico cells or other sector / system interference [OSI]}	52/48	. . . during retransmission after error or non-acknowledgment
52/245 {taking into account received signal strength}	52/50	. . . at the moment of starting communication in a multiple access environment
52/246 {where the output power of a terminal is based on a path parameter calculated in said terminal}	52/52	. . using AGC [Automatic Gain Control] circuits or amplifiers
52/247 {where the output power of a terminal is based on a path parameter sent by another terminal}	52/54	. . Signalisation aspects of the TPC commands, e.g. frame structure
52/248 {where transmission power control commands are generated based on a path parameter}	52/545	. . . {modifying TPC bits in special situations}
52/26	. . . using transmission rate or quality of service QoS [Quality of Service]	52/56	. . . Detection of errors of TPC bits
52/262 {taking into account adaptive modulation and coding [AMC] scheme (AMC per se H04L 1/0001)}	52/58	. . . Format of the TPC bits
52/265 {taking into account the quality of service QoS}	52/60	. . . using different transmission rates for TPC commands
52/267 {taking into account the information rate}	56/00	Synchronisation arrangements
52/28	. . . using user profile, e.g. mobile speed, priority or network state, e.g. standby, idle or non transmission	56/0005	. {synchronizing of arrival of multiple uplinks}
52/281 {taking into account user or data type priority}	56/001	. {Synchronization between nodes}
52/282 {taking into account the speed of the mobile}	56/0015	. . {one node acting as a reference for the others}
52/283 {Power depending on the position of the mobile}	56/002	. . {Mutual synchronization}
52/285 {taking into account the mobility of the user}	56/0025	. . {synchronizing potentially movable access points}
52/286 {during data packet transmission, e.g. high speed packet access [HSPA]}	56/003	. {Arrangements to increase tolerance to errors in transmission or reception timing}
52/287 {when the channel is in stand-by}	56/0035	. {detecting errors in frequency or phase}
52/288 {taking into account the usage mode, e.g. hands-free, data transmission, telephone}	56/004	. {compensating for timing error of reception due to propagation delay}
52/30	. . using constraints in the total amount of available transmission power	56/0045	. . {compensating for timing error by altering transmission time}
52/32	. . . TPC of broadcast or control channels	56/005	. . {compensating for timing error by adjustment in the receiver}
52/322 {Power control of broadcast channels}	56/0055	. {determining timing error of reception due to propagation delay}
52/325 {Power control of control or pilot channels}	56/006	. . {using known positions of transmitter and receiver}
		56/0065	. . {using measurement of signal travel time}
		56/007	. . . {Open loop measurement}
		56/0075 {based on arrival time vs. expected arrival time}

56/008 {detecting arrival of signal based on received raw signal}	72/0466	. . . {the resource being a scrambling code}
56/0085 {detecting a given structure in the signal}	72/0473	. . . {the resource being transmission power}
56/009	. . . {Closed loop measurements}	72/048	. . {where an allocation plan is defined based on terminal or device properties}
56/0095	. . {estimated based on signal strength}	72/0486	. . {where an allocation plan is defined based on load}
60/00	Affiliation to network, e.g. registration; Terminating affiliation with the network, e.g. de-registration	72/0493	. . {where an allocation plan is defined based on a resource usage policy}
60/005	. {Multiple registrations, e.g. multihoming}	72/06	. . {where an allocation plan is defined} based on a ranking criteria of the wireless resources
60/02	. by periodical registration	72/08	. . {where an allocation plan is defined} based on quality criteria
60/04	. using triggered events	72/082	. . . {using the level of interference}
60/06	. De-registration or detaching	72/085	. . . {using measured or perceived quality}
64/00	Locating users or terminals {or network equipment} for network management purposes, e.g. mobility management	72/087	. . . {using requested quality}
64/003	. {locating network equipment}	72/10	. . {where an allocation plan is defined} based on priority criteria
64/006	. {with additional information processing, e.g. for direction or speed determination}	72/12	. {Dynamic} Wireless traffic scheduling {; Dynamically scheduled allocation on shared channel}
68/00	User notification, e.g. alerting and paging, for incoming communication, change of service or the like	72/1205	. . {Schedule definition, set-up or creation}
68/005	. {Transmission of information for alerting of incoming communication}	72/121	. . . {for groups of terminals or users}
68/02	. Arrangements for increasing efficiency of notification or paging channel	72/1215	. . . {for collaboration of different radio technologies}
68/025	. . {Indirect paging}	72/1221	. . . {based on age of data to be sent}
68/04	. multi-step notification using statistical or historical mobility data	72/1226	. . . {based on channel quality criteria, e.g. channel state dependent scheduling}
68/06	. using multi-step notification by changing the notification area	72/1231 {using measured or perceived quality}
68/08	. using multi-step notification by increasing the notification area	72/1236 {using requested quality}
68/10	. using simulcast notification	72/1242	. . . {based on precedence or priority of the traffic information}
68/12	. Inter-network notification	72/1247	. . . {based on priority of the information source or recipient}
72/00	Local resource management, e.g. wireless traffic scheduling or selection or allocation of wireless resources	72/1252	. . . {based on load}
	NOTE	72/1257	. . . {based on resource usage policy}
	In this group, local priority rules supersede the first-place priority rule (FPPR) applying throughout H04W	72/1263	. . {Schedule usage, i.e. actual mapping of traffic onto schedule; Multiplexing of flows into one or several streams; Mapping aspects; Scheduled allocation}
72/005	. {Resource management for broadcast services}	72/1268	. . . {of uplink data flows}
72/02	. Selection of wireless resources by user or terminal	72/1273	. . . {of downlink data flows}
72/04	. Wireless resource allocation	72/1278	. . {Transmission of control information for scheduling}
72/0406	. . {involving control information exchange between nodes}	72/1284	. . . {in the uplink, i.e. from terminal to network}
72/0413	. . . {in uplink direction of a wireless link, i.e. towards network}	72/1289	. . . {in the downlink, i.e. towards the terminal}
72/042	. . . {in downlink direction of a wireless link, i.e. towards terminal}	72/1294 {using a grant or specific channel (H04W 72/14 takes precedence)}
72/0426	. . . {between access points}	72/14	. . using a grant {or specific} channel
72/0433	. . . {between access point and access point controlling device}	74/00	Wireless channel access, e.g. scheduled or random access
72/044	. . {where an allocation plan is defined based on the type of the allocated resource}	74/002	. {Transmission of channel access control information}
72/0446	. . . {the resource being a slot, sub-slot or frame}	74/004	. . {in the uplink, i.e. towards network}
72/0453	. . . {the resource being a frequency, carrier or frequency band}	74/006	. . {in the downlink, i.e. towards the terminal}
72/046	. . . {the resource being in the space domain, e.g. beams}	74/008	. . {with additional processing of random access related information at receiving side}
		74/02	. Hybrid access techniques
		74/04	. Scheduled {or contention-free} access (H04W 74/02 takes precedence)
		74/06	. . using polling
		74/08	. Non-scheduled {or contention based} access, e.g. random access, ALOHA, CSMA [Carrier Sense Multiple Access] (H04W 74/02 takes precedence)

- 74/0808 . . {using carrier sensing, e.g. as in CSMA}
- 74/0816 . . . {carrier sensing with collision avoidance}
- 74/0825 . . . {carrier sensing with collision detection}
- 74/0833 . . {using a random access procedure}
- 74/0841 . . . {with collision treatment}
- 74/085 {collision avoidance}
- 74/0858 {collision detection}
- 74/0866 . . {using a dedicated channel for access}
- 74/0875 . . . {with assigned priorities based access}
- 74/0883 . . . {for un-synchronized access}
- 74/0891 . . . {for synchronized access}

76/00 Connection management

- 76/10 . Connection setup
- 76/11 . . Allocation or use of connection identifiers
- 76/12 . . Setup of transport tunnels
- 76/14 . . Direct-mode setup
- 76/15 . . Setup of multiple wireless link connections
- 76/16 . . . Involving different core network technologies, e.g. a packet-switched [PS] bearer in combination with a circuit-switched [CS] bearer
- 76/18 . . Management of setup rejection or failure
- 76/19 . . Connection re-establishment
- 76/20 . Manipulation of established connections
- 76/22 . . Manipulation of transport tunnels
- 76/23 . . Manipulation of direct-mode connections
- 76/25 . . Maintenance of established connections
- 76/27 . . Transitions between radio resource control [RRC] states
- 76/28 . . Discontinuous transmission [DTX]; Discontinuous reception [DRX]
- 76/30 . Connection release
- 76/32 . . Release of transport tunnels
- 76/34 . . Selective release of ongoing connections
- 76/36 . . . for reassigning the resources associated with the released connections
- 76/38 . . triggered by timers
- 76/40 . for selective distribution or broadcast
- 76/45 . . for Push-to-Talk [PTT] or Push-to-Talk over cellular [PoC] services
- 76/50 . for emergency connections

80/00 Wireless network protocols or protocol adaptations to wireless operation

- 80/02 . Data link layer protocols
- 80/04 . Network layer protocols, e.g. mobile IP [Internet Protocol]
- 80/045 . . {involving different protocol versions, e.g. MIPv4 and MIPv6}
- 80/06 . Transport layer protocols, e.g. TCP [Transport Control Protocol] over wireless {(transmission control protocol/Internet protocol [TCP/IP] or user datagram protocol [UDP] [H04L 69/16](#))}
- 80/08 . Upper layer protocols {(network arrangements or communication protocols for networked applications [H04L 67/00](#))}
- 80/085 . . {involving different upper layer protocol versions, e.g. LCS - SUPL or WSN-SOA-WSDP}
- 80/10 . . adapted for {application} session management, e.g. SIP [Session Initiation Protocol] {(connection management [H04W 76/00](#); arrangements for session management [H04L 67/14](#))}

- 80/12 . . Application layer protocols, e.g. WAP [Wireless Application Protocol]

84/00 Network topologies

NOTE

In this group, local priority rules supersede the first-place priority rule (FPPR) applying throughout [H04W](#)

- 84/005 . {Moving wireless networks}
- 84/02 . Hierarchically pre-organised networks, e.g. paging networks, cellular networks, WLAN [Wireless Local Area Network] or WLL [Wireless Local Loop]
- 84/022 . . {One-way selective calling networks, e.g. wide area paging}
- 84/025 . . . {with acknowledge back capability}
- 84/027 . . . {providing paging services}
- 84/04 . Large scale networks; Deep hierarchical networks
- 84/042 . . . {Public Land Mobile systems, e.g. cellular systems}
- 84/045 {using private Base Stations, e.g. femto Base Stations, home Node B}
- 84/047 {using dedicated repeater stations}
- 84/06 . . . Airborne or Satellite Networks (space-based or airborne stations [H04B 7/185](#))
- 84/08 . . . Trunked mobile radio systems
- 84/10 . . Small scale networks; Flat hierarchical networks
- 84/105 . . . {PBS [Private Base Station] network ([H04W 84/12](#) - [H04W 84/16](#) take precedence)}
- 84/12 . . . WLAN [Wireless Local Area Networks]
- 84/14 . . . WLL [Wireless Local Loop]; RLL [Radio Local Loop]
- 84/16 . . . WPBX [Wireless Private Branch Exchange]
- 84/18 . Self-organising networks, e.g. ad-hoc networks or sensor networks
- 84/20 . . Master-slave {selection or change} arrangements
- 84/22 . . with access to wired networks

88/00 Devices specially adapted for wireless communication networks, e.g. terminals, base stations or access point devices

- 88/005 . {Data network PoA devices}
- 88/02 . Terminal devices
- 88/021 . . {adapted for Wireless Local Loop operation}
- 88/022 . . {Selective call receivers}
- 88/023 . . . {with message or information receiving capability}
- 88/025 . . . {Selective call decoders}
- 88/026 {using digital address codes}
- 88/027 {using frequency address codes}
- 88/028 {using pulse address codes}
- 88/04 . . adapted for relaying to or from another terminal or user
- 88/06 . . adapted for operation in multiple networks {or having at least two operational modes}, e.g. multi-mode terminals
- 88/08 . Access point devices
- 88/085 . . {Access point devices with remote components}
- 88/10 . . adapted for operation in multiple networks, e.g. multi-mode access points
- 88/12 . Access point controller devices
- 88/14 . Backbone network devices
- 88/16 . Gateway arrangements

- 88/18 . Service support devices; Network management devices
- 88/181 . . {Transcoding devices; Rate adaptation devices}
- 88/182 . . {Network node acting on behalf of an other network entity, e.g. proxy}
- 88/184 . . {Messaging devices, e.g. message centre}
- 88/185 . . {Selective call encoders for paging networks, e.g. paging centre devices}
- 88/187 . . . {using digital or pulse address codes}
- 88/188 . . . {using frequency address codes}
- 92/00 Interfaces specially adapted for wireless communication networks**
- 92/02 . Inter-networking arrangements
- 92/04 . Interfaces between hierarchically different network devices
- 92/045 . . {between access point and backbone network device}
- 92/06 . . between gateways and public network devices
- 92/08 . . between user and terminal device
- 92/10 . . between terminal device and access point, i.e. wireless air interface
- 92/12 . . between access points and access point controllers
- 92/14 . . between access point controllers and backbone network device
- 92/16 . Interfaces between hierarchically similar devices
- 92/18 . . between terminal devices
- 92/20 . . between access points
- 92/22 . . between access point controllers
- 92/24 . . between backbone network devices
- 99/00 Subject matter not provided for in other groups of this subclass**
