B23B
(continued) 2. In this subclass non-limiting references (in the sense of paragraph 39 of the Guide to the IPC) may still be displayed in the scheme.

Turning

- 1/00** **Methods for turning or working essentially requiring the use of turning-machines; Use of auxiliary equipment in connection with such methods**
- 3/00** **General-purpose turning-machines or devices, e.g. centre lathes with feed rod and lead screw; Sets of turning-machines**
- 3/02 . Small lathes, e.g. for toolmakers ([specially designed for watchmakers G04D 3/00](#))
- 3/04 . Turning-machines in which the workpiece is rotated by means at a distance from the headstock
- 3/06 . Turning-machines or devices characterised only by the special arrangement of constructional units ([B23Q 37/00 takes precedence](#); structural features of details, [see the relevant groups](#); such features of general applicability [B23Q](#))
- 3/065 . . {Arrangements for performing other machining operations, e.g. milling, drilling}
- 3/08 . Turning-machines characterised by the use of faceplates
- 3/10 . . with the faceplate horizontal, i.e. vertical boring and turning machines
- 3/12 . . with the faceplate vertical, i.e. face lathes
- 3/14 . . Mountings or drives of faceplates ({[rotatable members, e.g. faceplates B23Q 1/50](#)})
- 3/16 . Turret lathes for turning individually-chucked workpieces ({[turrets B23B 29/24](#)})
- 3/161 . . {lathe with one toolslide carrying one turret head}
- 3/162 . . . {Arrangements for performing other machining operations, e.g. milling, drilling}
- 3/164 . . {lathe with one toolslide carrying two or more turret heads}
- 3/165 . . . {Arrangements for performing other machining operations, e.g. milling, drilling}
- 3/167 . . {lathe with two or more toolslides carrying turrets}
- 3/168 . . . {Arrangements for performing other machining operations, e.g. milling, drilling}
- 3/22 . Turning-machines or devices with rotary tool heads ({[B23B 5/08](#), [B23B 5/14](#) and [B23B 5/16 take precedence](#)})
- 3/24 . . the tools of which do not perform a radial movement; Rotary tool heads therefor
- 3/26 . . the tools of which perform a radial movement; Rotary tool heads thereof
- 3/265 . . . {Surfacing or grooving flanges}
- 3/30 . Turning-machines with two or more working-spindles, e.g. in fixed arrangement
- 3/32 . . for performing identical operations simultaneously on two or more workpieces
- 3/34 . Short turning-machines with one or multiple working-spindles attended from the end ([B23B 3/12 takes precedence](#))
- 3/36 . Associations of only turning-machines directed to a particular metal-working result ([if the metal-working result is not essential B23Q 39/00](#))

5/00**Turning-machines or devices specially adapted for particular work; Accessories specially adapted therefor**

- 5/02 . for turning hubs or brake drums ([B23B 5/04 takes precedence](#))
- 5/04 . for reconditioning hubs or brake drums or axle spindles without removing same from the vehicle
- 5/06 . for turning valves or valve bodies ({[turning conical surfaces in general B23B 5/38](#); tools for working valve seats [B23B 51/106](#)})
- 5/08 . for turning axles, bars, rods, tubes, rolls, i.e. shaft-turning lathes, roll lathes; Centreless turning
- 5/10 . . for turning pilgrim rolls
- 5/12 . . for peeling bars or tubes by making use of cutting bits arranged around the workpiece ([otherwise than by turning B23D 79/12](#))
- 5/14 . Cutting-off lathes ({[B23D 21/00 takes precedence](#)} shearing [B23D](#))
- 5/16 . for bevelling, chamfering, or deburring the ends of bars or tubes
- 5/161 . . {Devices attached to the workpiece}
- 5/162 . . . {with an internal clamping device}
- 5/163 . . . {with an external clamping device}
- 5/165 . . {Workpieces clamped on a bench, e.g. a vice}
- 5/166 . . {Devices for working electrodes}
- 5/167 . . {Tools for chamfering the ends of bars or tubes}
- 5/168 . . . {with guiding devices}
- 5/18 . for turning crankshafts, eccentrics, or cams, e.g. crankpin lathes
- 5/20 . . without removing same from the engine
- 5/26 . for simultaneously turning internal and external surfaces of a body
- 5/28 . for turning wheels or wheel sets or cranks thereon, i.e. wheel lathes
- 5/32 . . for reconditioning wheel sets without removing same from the vehicle; Underfloor wheel lathes for railway vehicles
- 5/36 . for turning specially-shaped surfaces by making use of relative movement of the tool and work produced by geometrical mechanisms, i.e. forming-lathes
- 5/365 . . {for toroidal surfaces}
- 5/38 . . for turning conical surfaces inside or outside, e.g. taper pins ({[for turning valves or valve bodies B23B 5/06](#)})
- 5/40 . . for turning spherical surfaces inside or outside
- 5/46 . . for turning helical or spiral surfaces ([thread cutting B23G](#))
- 5/48 . . . for cutting grooves, e.g. oil grooves of helicoidal shape
- 7/00** **Automatic or semi-automatic turning-machines with a single working-spindle, e.g. controlled by cams; Equipment therefor; Features common to automatic and semi-automatic turning-machines with one or more working-spindles ({arrangements or accessories for enabling machine tools not specially designed only for thread cutting to be used for this purpose B23G 3/00})**
- 7/02 . Automatic or semi-automatic machines for turning of stock

- 7/04 . . Turret machines
- 7/06 . . with sliding headstock
- 7/10 . . Accessories, e.g. guards {(guards [B23Q 11/08](#) takes precedence)}
- 7/12 . Automatic or semi-automatic machines for turning of workpieces
- 9/00 Automatic or semi-automatic turning-machines with a plurality of working-spindles, e.g. automatic multiple-spindle machines with spindles arranged in a drum carrier able to be moved into predetermined positions; Equipment therefor (equipment applicable to single-spindle machines [B23B 7/00](#))**
- 9/005 . {Spindle carriers: constructional details, drives for the spindles, or the like}
- 9/02 . Automatic or semi-automatic machines for turning of stock
- 9/08 . Automatic or semi-automatic machines for turning of workpieces
- 11/00 Automatic or semi-automatic turning-machines incorporating equipment for performing other working procedures, e.g. slotting, milling, rolling {(B23B 3/065 and B23B 3/16 take precedence; machines incorporating a plurality of sub-assemblies, each capable of performing a metal-working operation, the sub-assemblies being arranged to operate simultaneously at different stations [B23Q 39/04](#))}**
- 13/00 Arrangements for automatically conveying or chucking or guiding stock**
- 13/02 . for turning-machines with a single working-spindle
- 13/021 . . {Feeding device having intermittent movement}
- 13/022 . . . {being placed in the spindle}
- 13/024 {including two collets}
- 13/025 . . {with stock drum}
- 13/027 . . {Feeding by pistons under fluid-pressure}
- 13/028 . . {the material being fed from a reel}
- 13/04 . for turning-machines with a plurality of working-spindles
- 13/06 . Arrangements for switching-off the drive of turning-machines after the stock has been completely machined
- 13/08 . Arrangements for reducing vibrations in feeding-passages or for damping noise (damping noise in general [G10K](#))
- 13/10 . with magazines for stock
- 13/12 . Accessories, e.g. stops, grippers
- 13/121 . . {Stops (stops for equipment for precise positioning of tool or work into particular locations not otherwise provided for [B23Q 16/00](#))}
- 13/123 . . {Grippers, pushers or guiding tubes (arrangements for reducing vibrations in feeding-passages or for damping noise [B23B 13/08](#))}
- 13/125 . . . {Feed collets (feeding device having intermittent movement being placed in the spindle including two collets [B23B 13/024](#); collet chucks [B23B 31/20](#))}
- 13/126 . . {Supports}
- 13/128 . . {Stock rest handling devices, e.g. ejectors}

Components or accessories particularly for turning machines

- 23/00 Tailstocks; Centres {(for grinding machines [B24B 41/062](#))}**
- 23/005 . {the centres being adjustable}
- 23/02 . Dead centres
- 23/025 . . {the centres being adjustable}
- 23/04 . Live centres
- 23/045 . . {the centres being adjustable}
- 25/00 Accessories or auxiliary equipment for turning-machines (for machine tools in general [B23Q](#); cooling or lubricating [B23Q 11/12](#))**
- 25/02 . Arrangements for chip-breaking in turning-machines (on cutting tools [B23B 27/22](#))
- 25/04 . Safety guards specially designed for turning machines {(B23Q 11/08 takes precedence; in general [F16P](#))}
- 25/06 . Measuring, gauging, or adjusting equipment on turning-machines for setting-on, feeding, controlling, or monitoring the cutting tools or work (measuring devices or gauges [G01B](#))
- 25/065 . . {Tool setting height gauges}
- 27/00 Tools for turning or boring machines (for drilling machines [B23B 51/00](#)); Tools of a similar kind in general; Accessories therefor**
- NOTE**
- all subgroups except [B23B 27/12](#) relate to tools with a shank
- 27/002 . {with vibration damping means}
- 27/005 . {Geometry of the chip-forming or the clearance planes, e.g. tool angles ([B23B 27/141](#) and [B23B 27/22](#) take precedence)}
- 27/007 . {for internal turning (boring bars [B23B 29/02](#), boring heads [B23B 29/03](#); milling cutters [B23C 5/00](#); reamers [B23D 77/00](#))}
- 27/02 . Cutting tools with straight main part and cutting edge at an angle ([B23B 27/04](#) - [B23B 27/08](#) take precedence)
- 27/04 . Cutting-off tools ([B23B 27/08](#) takes precedence ; toolholders for cutting-off inserts [B23B 29/043](#))
- 27/045 . . {with chip-breaking arrangements}
- 27/06 . Profile cutting tools, i.e. forming-tools
- 27/065 . . {Thread-turning tools}
- 27/08 . Cutting tools with blade- or disc-like main parts {(with disc-like main parts [B23B 27/083](#))}
- 27/083 . . {Cutting tools with disc-like main parts}
- 27/086 . . {with yieldable support for the cutting insert}
- 27/10 . Cutting tools with special provision for cooling {(drills with lubricating or cooling equipment [B23B 51/06](#); features relating to lubricating or cooling of milling cutters [B23C 5/28](#); arrangements or devices for cooling or lubricating tools or work [B23Q 11/10](#))}
- 27/12 . . with a continuously-rotated circular cutting edge; Holders therefor
- 27/14 . Cutting tools of which the bits or tips {or cutting inserts} are of special material

- 27/141 . . {Specially shaped plate-like cutting inserts, i.e. length greater or equal to width, width greater than or equal to thickness (with specially shaped plate-like exchangeable cutting inserts, e.g. chip-breaking groove, B23B 27/1603; with removable plate-like milling cutting inserts of special shape B23C 5/202)}
- 27/143 . . . {characterised by having chip-breakers}
- 27/145 . . . {characterised by having a special shape}
- 27/146 {Means to improve the adhesion between the substrate and the coating}
- 27/148 . . {Composition of the cutting inserts}
- 27/16 . . with exchangeable cutting bits {or cutting inserts}, e.g. able to be clamped
- 27/1603 . . . {with specially shaped plate-like exchangeable cutting inserts, e.g. chip-breaking groove (B23B 27/1614 - B23B 27/1655 take precedence)}
- 27/1607 {characterised by having chip-breakers}
- 27/1611 {characterised by having a special shape}
- 27/1614 . . . {with plate-like cutting inserts of special shape clamped against the walls of the recess in the shank by a clamping member acting upon the wall of a hole in the insert (B23B 27/1644 takes precedence)}
- 27/1618 {characterised by having chip-breakers}
- 27/1622 {characterised by having a special shape}
- 27/1625 . . . {with plate-like cutting inserts of special shape clamped by a clamping member acting almost perpendicularly on the chip-forming plane (B23B 27/1644 takes precedence)}
- 27/1629 {in which the clamping member breaks the chips}
- 27/1633 {in which the chip-breaking clamping member is adjustable}
- 27/1637 {characterised by having chip-breakers}
- 27/164 {characterised by having a special shape}
- 27/1644 . . . {with plate-like cutting inserts of special shape clamped by a clamping member acting almost perpendicularly on the chip-forming plane and at the same time upon the wall of a hole in the cutting insert}
- 27/1648 {characterised by having chip-breakers}
- 27/1651 {characterised by having a special shape}
- 27/1655 . . . {Adjustable position of the plate-like cutting inserts of special form}
- 27/1659 . . . {with plate-like exchangeable cutting inserts (B23B 27/1662 - B23B 27/1681 take precedence)}
- 27/1662 . . . {with plate-like cutting inserts clamped against the walls of the recess in the shank by a clamping member acting upon the wall of a hole in the cutting insert (B23B 27/1677 takes precedence)}
- 27/1666 . . . {with plate-like cutting inserts clamped by a clamping member acting almost perpendicularly on chip-forming plane (B23B 27/1677 takes precedence)}
- 27/167 {in which the clamping member breaks the chips}
- 27/1674 {in which the chip-breaking clamping member is adjustable}
- 27/1677 {with plate-like cutting inserts clamped by a clamping member acting almost perpendicularly on the chip-forming plane and at the same time upon the wall of a hole in the insert}
- 27/1681 {Adjustable position of the plate-like cutting inserts}
- 27/1685 {Adjustable position of the cutting inserts (B23B 27/1655 and B23B 27/1681 take precedence)}
- 27/1688 {Height of the cutting tip adjustable}
- 27/1692 {Angular position of the cutting insert adjustable around an axis parallel to the chip-forming plane}
- 27/1696 {Angular position of the cutting insert adjustable around an axis generally perpendicularly to the chip-forming plane}
- 27/18 . . with cutting bits or tips {or cutting inserts} rigidly mounted, e.g. by brazing
- 27/20 . . . with diamond bits {or cutting inserts}
- 27/22 . Cutting tools with chip-breaking equipment { (B23B 27/045, B23B 27/143, B23B 27/16 take precedence; arrangements for chip-breaking B23B 25/02; for milling tools B23C 5/165)}
- 27/24 . Knurling tools
- 29/00 Holders for non-rotary cutting tools (B23B 27/12 takes precedence); Boring bars or boring heads; Accessories for tool holders**
- 29/02 . Boring bars
- 29/022 . . {with vibration reducing means}
- 29/025 . . {Boring toolholders fixed on the boring bar}
- 29/027 . . {Steadies for boring bars (auxiliary devices, e.g. steadies, rests B23Q 1/76)}
- 29/03 . Boring heads
- 29/034 . . with tools moving radially, e.g. for making chamfers or undercuttings
- 29/03403 . . . {radially adjustable before starting manufacturing}
- 29/03407 {by means of screws and nuts}
- 29/0341 {Cartridges}
- 29/03414 {adjustment of the tool placed in the hole being possible}
- 29/03417 {by means of inclined planes}
- 29/03421 {by pivoting the tool carriers or by elastic deformation}
- 29/03425 {by means of gears and racks}
- 29/03428 {by means of an eccentric}
- 29/03432 . . . {radially adjustable during manufacturing}
- 29/03435 {by means of screws and nuts}
- 29/03439 {Boring and facing heads}
- 29/03442 {Grooving tool}
- 29/03446 {by means of inclined planes}
- 29/0345 {Boring and facing heads}
- 29/03453 {Grooving tool}
- 29/03457 {by pivoting the tool carriers or by elastic deformation}
- 29/0346 {Boring and facing heads}
- 29/03464 {Grooving tool}
- 29/03467 {by means of gears and racks}
- 29/03471 {Boring and facing heads}
- 29/03475 {Grooving tool}
- 29/03478 {by means of an eccentric}
- 29/03482 {Boring and facing heads}

- 29/03485 {Grooving tool}
- 29/03489 {Adjustment means not specified or not covered by the groups [B23B 29/03435](#) - [B23B 29/03478](#)}
- 29/03492 {Boring and facing heads}
- 29/03496 {Grooving tool}
- 29/04 Tool holders for a single cutting tool
- 29/043 {with cutting-off, grooving or profile cutting tools, i.e. blade- or disc-like main cutting parts ([B23B 29/14](#) takes precedence)}
- 29/046 {with an intermediary toolholder}
- 29/06 Tool holders equipped with longitudinally-arranged grooves for setting the cutting tool
- 29/08 Tool holders equipped with grooves arranged crosswise to the longitudinal direction for setting the cutting tool
- 29/10 with adjustable counterbase for the cutting tool
- 29/12 Special arrangements on tool holders
- 29/125 {Vibratory toolholders}
- 29/14 affording a yielding support of the cutting tool, e.g. by spring clamping ({[cutting tools with yieldable support for the cutting insert B23B 27/086](#)})
- 29/16 for supporting the workpiece in a backrest
- 29/18 for retracting the cutting tool
- 29/20 for placing same by shanks in sleeves of a turret
- 29/205 {the tools being adjustable}
- 29/22 for tool adjustment by means of shims or spacers
- 29/24 Tool holders for a plurality of cutting tools, e.g. turrets ({[indexing devices B23Q 16/00](#)})
- 29/242 {Turrets, without description of the angular positioning device ([turret lathes for turning individually-chucked workpieces B23B 3/16](#); turrets with manually operated angular positioning devices [B23B 29/282](#); turrets with power operated angular positioning devices [B23B 29/323](#))}
- 29/244 {Toolposts, i.e. clamping quick-change toolholders, without description of the angular positioning device ([toolposts with manually operated angular positioning devices B23B 29/285](#); [toolposts with power operated angular positioning devices B23B 29/326](#))}
- 29/246 {Quick-change tool holders}
- 29/248 {with individually adjustable toolholders}
- 29/26 Tool holders in fixed position
- 29/28 Turrets manually adjustable about a vertical {or horizontal} pivot ({[indexing devices B23Q 16/00](#)})
- 29/282 {Turrets with manually operated angular positioning devices}
- 29/285 {Toolposts with manually operated angular positioning devices}
- 29/287 {Turret toolholder with manually operated angular positioning devices}
- 29/32 Turrets adjustable by power drive, i.e. turret heads ({[indexing devices B23Q 16/00](#)})
- 29/323 {Turrets with power operated angular positioning devices}
- 29/326 {Toolposts with power operated angular positioning devices}
- 29/34 Turrets equipped with triggers for releasing the cutting tools
- 31/00** **Chucks** ({[allowing axial oscillation of percussion tool bits B25D 17/08](#)}); **Expansion mandrels; Adaptations thereof for remote control** ([faceplates B23Q 1/50](#); rotary devices holding by magnetic and/or electrical force acting directly on work [B23Q 3/152](#))
- WARNING**
- Group [B23B 31/00](#) is impacted by reclassification into groups [B23B 2231/56](#), [B23B 2231/565](#), and [B23B 2231/58](#).
- All groups listed in this Warning should be considered in order to perform a complete search.
- 31/001 {Protection against entering of chips or dust}
- 31/003 {Work or tool ejection means}
- 31/005 {Cylindrical shanks of tools}
- 31/006 {Conical shanks of tools}
- 31/008 {with arrangements for transmitting torque}
- 31/02 Chucks
- WARNING**
- Group [B23B 31/02](#) is impacted by reclassification into groups [B23B 31/0261](#), [B23B 2231/56](#), [B23B 2231/565](#), and [B23B 2231/58](#).
- All groups listed in this Warning should be considered in order to perform a complete search.
- 31/021 {Faceplates}
- 31/023 {for screw-threads}
- 31/025 {for gears}
- 31/026 {the radial or angular position of the tool being adjustable ([boring heads with tools moving radially B23B 29/034](#); holding tools yieldably [B23B 31/08](#); with means for adjusting the chuck with respect to the working spindle [B23B 31/36](#))}
- WARNING**
- Group [B23B 31/026](#) is impacted by reclassification into group [B23B 31/0261](#).
- Groups [B23B 31/026](#) and [B23B 31/0261](#) should be considered in order to perform a complete search.
- 31/0261 {for centering the tool}
- WARNING**
- Group [B23B 31/0261](#) is incomplete pending reclassification of documents from groups [B23B 31/02](#) and [B23B 31/026](#).
- Groups [B23B 31/02](#), [B23B 31/026](#), and [B23B 31/0261](#) should be considered in order to perform a complete search.
- 31/028 {the axial positioning of the tool being adjustable ([B23B 31/208](#) takes precedence; with means for adjusting the chuck with respect to the working spindle [B23B 31/36](#))}
- 31/06 Features relating to the removal of tools; Accessories therefor
- 31/07 Ejector wedges

- 31/08 . . holding tools yieldably
- 31/083 . . . {axially}
- 31/086 {having an overload clutch}
- 31/10 . . characterised by the retaining or gripping devices or their immediate operating means

NOTE

Group [B23B 31/12](#) takes precedence over groups [\(B23B 31/101, B23B 31/102, B23B 31/103 - B23B 31/117](#)

- 31/101 . . . {Chucks with separately-acting jaws movable radially ([B23B 31/1602, B23B 31/16062, B23B 31/161, B23B 31/16137, B23B 31/16175, B23B 31/16212, B23B 31/1625 and B23B 31/16283](#) take precedence; Chucks with simultaneously acting jaws moving radially [B23B 31/16](#))}
- 31/102 . . . {Jaws, accessories or adjustment means ([B23B 31/16008, B23B 31/1605, B23B 31/16087, B23B 31/16125, B23B 31/16162, B23B 31/162, B23B 31/16237, B23B 31/1627](#) take precedence)}
- 31/103 . . . Retention by pivotal elements, e.g. catches, pawls
- 31/107 . . . Retention by laterally-acting detents, e.g. pins, screws, wedges; Retention by loose elements, e.g. balls

WARNING

Group [B23B 31/107](#) is impacted by reclassification into group [B23B 31/1079](#). Groups [B23B 31/107](#) and [B23B 31/1079](#) should be considered in order to perform a complete search.

- 31/1071 {Retention by balls (balls acting as jaws [B23B 31/22](#))}
- 31/1072 {Retention by axially or circumferentially oriented cylindrical elements (cylindrical elements acting as jaws [B23B 31/22](#))}

WARNING

Group [B23B 31/1072](#) is impacted by reclassification into groups [B23B 31/10741](#) and [B23B 31/1079](#). Groups [B23B 31/1072, B23B 31/10741, and B23B 31/1079](#) should be considered in order to perform a complete search.

- 31/1073 {Retention by conical elements (conical elements acting as jaws [B23B 31/22](#))}
- 31/10741 {Retention by substantially radially oriented pins}

WARNING

Group [B23B 31/10741](#) is incomplete pending reclassification of documents from group [B23B 31/1072](#). Groups [B23B 31/1072](#) and [B23B 31/10741](#) should be considered in order to perform a complete search.

- 31/1075 {Retention by screws}
- 31/1076 {with conical ends}
- 31/1077 {acting on a floating pin}

- 31/1078 {Retention by wedges}
- 31/1079 {Retention by spring or wire}

WARNING

Group [B23B 31/1079](#) is incomplete pending reclassification of documents from groups [B23B 31/107](#) and [B23B 31/1072](#).

Groups [B23B 31/107, B23B 31/1072, and B23B 31/1079](#) should be considered in order to perform a complete search.

- 31/11 . . . Retention by threaded connection
- 31/1107 {for conical parts}
- 31/1115 {using conical threads}
- 31/1122 {using cylindrical threads}
- 31/113 . . . Retention by bayonet connection
- 31/117 . . . Retention by friction only, e.g. using springs, resilient sleeves, tapers
- 31/1171 {not used, see subgroups and [B23B 31/117](#)}
- 31/1172 {using fluid-pressure means to actuate the gripping means}
- 31/1173 {using springs}
- 31/1174 {using fluid-pressure means to actuate the gripping means}
- 31/1175 {using elastomer rings or sleeves}
- 31/1176 {using fluid-pressure means to actuate the gripping means}
- 31/1177 {using resilient metallic rings or sleeves}
- 31/1178 {using fluid-pressure means to actuate the gripping means}
- 31/1179 {using heating and cooling}
- 31/12 . . . Chucks with simultaneously-acting jaws, whether or not also individually adjustable
- 31/1207 {moving obliquely to the axis of the chuck in a plane containing this axis}
- 31/1215 {Details of the jaws}
- 31/1223 {using fluid-pressure means in the chuck to actuate the gripping means}
- 31/123 {with locking arrangements (locking arrangements for chucks with simultaneously-acting jaws moving radially actuated by one or more spiral grooves [B23B 31/16041](#))}
- 31/1238 {Jaws movement actuated by a nut with conical screw-thread}
- 31/1246 {Jaws movement actuated by a bolt with conical screw-thread}
- 31/1253 {Jaws movement actuated by an axially movable member}
- 31/1261 {pivotaly movable in a radial plane}
- 31/1269 {Details of the jaws}
- 31/1276 {using fluid-pressure means to actuate the gripping means}
- 31/1284 {with a centre}
- 31/1292 {using mechanical transmission through the spindle}

31/14 involving the use of centrifugal force

WARNING

Group [B23B 31/14](#) is impacted by reclassification into groups [B23B 31/141](#) and [B23B 31/142](#).

Groups [B23B 31/14](#), [B23B 31/141](#) and [B23B 31/142](#) should be considered in order to perform a complete search.

31/141 {To counterbalance the jaws}

WARNING

Group [B23B 31/141](#) is incomplete pending reclassification of documents from group [B23B 31/14](#).

Groups [B23B 31/14](#) and [B23B 31/141](#) should be considered in order to perform a complete search.

31/142 {To grip a tool or workpiece}

WARNING

Group [B23B 31/142](#) is incomplete pending reclassification of documents from group [B23B 31/14](#).

Groups [B23B 31/14](#) and [B23B 31/142](#) should be considered in order to perform a complete search.

31/16 moving radially

31/16004 {Jaws movement actuated by one or more spiral grooves}

31/16008 {Details of the jaws}

31/16012 {Form of the jaws}

31/16016 {Fixation on the master jaw}

31/1602 {Individually adjustable jaws}

31/16025 {using fluid-pressure means to actuate the gripping means}

31/16029 {using mechanical transmission through the spindle}

31/16033 {with a centre}

31/16037 {using mechanical transmission through the spindle ([B23B 31/16029](#) takes precedence)}

31/16041 {with locking arrangements (locking arrangements for chucks with simultaneously-acting jaws moving obliquely to the axis of the chuck in a plane containing this axis [B23B 31/123](#))}

31/16045 {Jaws movement actuated by screws and nuts or oblique racks}

31/1605 {Details of the jaws}

31/16054 {Form of the jaws}

31/16058 {Fixation on the master jaw}

31/16062 {Individually adjustable jaws}

31/16066 {using fluid-pressure means to actuate the gripping means}

31/1607 {using mechanical transmission through the spindle}

31/16075 {with a centre}

31/16079 {using mechanical transmission through the spindle ([B23B 31/1607](#) takes precedence)}

31/16083 {Jaws movement actuated by gears and racks}

31/16087 {Details of the jaws}

31/16091 {Form of the jaws}

31/16095 {Fixation on the master jaw}

31/161 {Individually adjustable jaws}

31/16104 {using fluid-pressure means to actuate the gripping means}

31/16108 {using mechanical transmission through the spindle}

31/16112 {with a centre}

31/16116 {using mechanical transmission through the spindle ([B23B 31/16108](#) takes precedence)}

31/1612 {Jaws movement actuated by cam surface in a radial plane}

31/16125 {Details of the jaws}

31/16129 {Form of the jaws}

31/16133 {Fixation on the master jaw}

31/16137 {Individually adjustable jaws}

31/16141 {using fluid-pressure means to actuate the gripping means}

31/16145 {using mechanical transmission through the spindle}

31/1615 {with a centre}

31/16154 {using mechanical transmission through the spindle ([B23B 31/16145](#) takes precedence)}

31/16158 {Jaws movement actuated by coaxial conical surfaces}

31/16162 {Details of the jaws}

31/16166 {Form of the jaws}

31/1617 {Fixation on the master jaw}

31/16175 {Individually adjustable jaws}

31/16179 {using fluid-pressure means to actuate the gripping means}

31/16183 {using mechanical transmission through the spindle}

31/16187 {with a centre}

31/16191 {using mechanical transmission through the spindle ([B23B 31/16183](#) takes precedence)}

31/16195 {Jaws movement actuated by levers moved by a coaxial control rod}

31/162 {Details of the jaws}

31/16204 {Form of the jaws}

31/16208 {Fixation on the master jaw}

31/16212 {Individually adjustable jaws}

31/16216 {using fluid-pressure means to actuate the gripping means}

31/1622 {using mechanical transmission through the spindle}

31/16225 {with a centre}

31/16229 {using mechanical transmission through the spindle ([B23B 31/1622](#) takes precedence)}

31/16233 {Jaws movement actuated by oblique surfaces of a coaxial control rod}

31/16237 {Details of the jaws}

31/16241 {Form of the jaws}

31/16245 {Fixation on the master jaw}

31/1625 {Individually adjustable jaws}

- 31/16254 {using fluid-pressure means to actuate the gripping means}
- 31/16258 {using mechanical transmission through the spindle}
- 31/16262 {with a centre}
- 31/16266 {using mechanical transmission through the spindle ([B23B 31/16258](#) takes precedence)}
- 31/1627 {Details of the jaws}
- 31/16275 {Form of the jaws}
- 31/16279 {Fixation on the master jaw}
- 31/16283 {Individually adjustable jaws}
- 31/16287 {using fluid-pressure means to actuate the gripping means}
- 31/16291 {with a centre}
- 31/16295 {with means preventing the ejection of the jaws}
- 31/18 pivotally movable in planes containing the axis of the chuck
- 31/185 {moving first parallel to the axis then pivotally in planes containing the axis of the chuck}
- 31/19 moving parallel to the axis of the chuck {([B23B 31/185](#) takes precedence)}
- 31/20 Longitudinally-split sleeves, e.g. collet chucks

WARNING

Group [B23B 31/20](#) is impacted by reclassification into groups [B23B 31/2012](#), [B23B 31/20125](#), [B23B 31/2025](#), [B23B 31/206](#), [B23B 31/2072](#), and [B23B 31/2073](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 31/201 {Characterized by features relating primarily to remote control of the gripping means}

WARNING

Group [B23B 31/201](#) is impacted by reclassification into groups [B23B 31/2012](#), [B23B 31/20125](#), [B23B 31/206](#), [B23B 31/2072](#), and [B23B 31/2073](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 31/2012 {Threaded cam actuator}

WARNING

Groups [B23B 31/2012](#) and [B23B 31/20125](#) are incomplete pending reclassification of documents from groups [B23B 31/20](#) and [B23B 31/201](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 31/20125 {Axially fixed cam, moving jaws}

- 31/202 {Details of the jaws}

WARNING

Group [B23B 31/202](#) is impacted by reclassification into group [B23B 31/2025](#).

Groups [B23B 31/202](#) and [B23B 31/2025](#) should be considered in order to perform a complete search.

- 31/2025 {Wherein the sleeve is split into two relatively movable parts}

WARNING

Group [B23B 31/2025](#) is incomplete pending reclassification of documents from groups [B23B 31/20](#) and [B23B 31/202](#).

Groups [B23B 31/20](#), [B23B 31/202](#), and [B23B 31/2025](#) should be considered in order to perform a complete search.

- 31/204 {using fluid-pressure means to actuate the gripping means ([B23B 31/207](#) take precedence)}

- 31/206 {Reciprocating cam actuator ([B23B 31/207](#) takes precedence)}

WARNING

Group [B23B 31/206](#) is incomplete pending reclassification of documents from groups [B23B 31/20](#) and [B23B 31/201](#).

Groups [B23B 31/20](#), [B23B 31/201](#), and [B23B 31/206](#) should be considered in order to perform a complete search.

- 31/207 {using mechanical transmission through the spindle}

WARNING

Group [B23B 31/207](#) is impacted by reclassification into groups [B23B 31/2072](#), [B23B 31/2073](#), [B23B 2270/025](#), and [B23B 2270/027](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 31/2072 {Axially moving cam, fixed jaws}

WARNING

Group [B23B 31/2072](#) is incomplete pending reclassification of documents from groups [B23B 31/20](#), [B23B 31/201](#), and [B23B 31/207](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 31/2073 {Axially fixed cam, moving jaws
([B23B 31/20125](#) takes precedence)}
- WARNING**
- Group [B23B 31/2073](#) is incomplete pending reclassification of documents from groups [B23B 31/20](#), [B23B 31/201](#), and [B23B 31/207](#).
- All groups listed in this Warning should be considered in order to perform a complete search.
- 31/208 {with a tool positioning stop (axial positioning of the tool being adjustable [B23B 31/028](#))}
- 31/22 Jaws in the form of balls {(retention by balls [B23B 31/1071](#))}
- 31/223 {Jaws in the form of cylindrical elements (retention by cylindrical elements [B23B 31/1072](#))}
- 31/226 {Jaws in the form of conical elements (retention by conical elements [B23B 31/1073](#))}
- 31/24 . . characterised by features relating primarily to remote control of the gripping means {(B23B 31/201 takes precedence)}
- 31/26 . . . using mechanical transmission through the working-spindle {(B23B 31/16 and [B23B 31/40](#) take precedence)}
- 31/261 {clamping the end of the toolholder shank}
- 31/263 {by means of balls}
- 31/265 {by means of collets}
- 31/266 {using a threaded spindle}
- 31/268 {using a bayonet connection}
- 31/28 . . . using electric or magnetic means in the chuck
- 31/30 . . . using fluid-pressure means in the chuck {(B23B 31/10 and [B23B 31/40](#) take precedence)}
- 31/302 {Hydraulic equipment, e.g. pistons, valves, rotary joints}
- 31/305 {the gripping means is a deformable sleeve}
- 31/307 {Vacuum chucks}
- 31/32 . . with jaws carried by diaphragm
- 31/34 . . with means enabling the workpiece to be reversed or tilted
- 31/36 . . with means for adjusting the chuck with respect to the working-spindle
- 31/38 . . with overload clutches {(B23B 31/086 takes precedence)}
- 31/39 . . Jaw changers
- 31/40 . . Expansion mandrels
- 31/4006 . . {Gripping the work or tool by a split sleeve (collet chucks [B23B 31/20](#))}
- 31/4013 . . . {Details of the jaws}
- 31/402 . . . {using fluid-pressure means to actuate the gripping means}
- 31/4026 {using mechanical transmission through the spindle}
- 31/4033 . . . {using mechanical transmission through the spindle ([B23B 31/4026](#) takes precedence)}
- 31/404 . . {Gripping the work or tool by jaws moving radially controlled by conical surfaces (see also [B23B 31/16158](#))}

- 31/4046 . . . {Details of the jaws}
- 31/4053 . . . {using fluid-pressure means to actuate the gripping means}
- 31/406 {using mechanical transmission through the spindle}
- 31/4066 . . . {using mechanical transmission through the spindle ([B23B 31/406](#) takes precedence)}
- 31/4073 . . {Gripping the work or tool between planes almost perpendicular to the axis}
- 31/408 . . {Work or tool supported by two conical surfaces}
- 31/4086 . . {Work or tool gripped by a roller movable on an inclined plane}
- 31/4093 . . {Tube supporting means including a centerhole}
- 31/42 . . characterised by features relating primarily to remote control of the gripping means
- 33/00 Drivers; Driving centres, Nose clutches, e.g. lathe dogs**
- 33/005 . {Drivers with driving pins or the like}

Boring; Drilling (for surgical purposes [A61B 17/16](#); in metal using electric current [B23H 9/14](#); by laser beam [B23K 26/00](#); earth or rock drilling [E21B](#))

- 35/00 Methods for boring or drilling, or for working essentially requiring the use of boring or drilling machines; Use of auxiliary equipment in connection with such methods**
- 35/005 . {Measures for preventing splintering}
- 37/00 Boring by making use of ultrasonic energy (essentially using abrasive material [B24B](#), e.g. [B24B 1/04](#))**
- 39/00 General-purpose boring or drilling machines or devices; Sets of boring and/or drilling machines**
- 39/003 . {Drilling machine situated underneath the workpiece}
- 39/006 . {Portal drilling machines}
- 39/02 . Boring machines; Combined horizontal boring and milling machines
- 39/04 . Co-ordinate boring or drilling machines; Machines for making holes without previous marking
- 39/06 . . Equipment for positioning work
- 39/08 . . Devices for programme control
- 39/10 . characterised by the drive, e.g. by fluid-pressure drive pneumatic power drive
- 39/12 . Radial drilling machines
- 39/14 . with special provision to enable the machine or the drilling or boring head to be moved into any desired position, e.g. with respect to immovable work
- 39/16 . Drilling machines with a plurality of working-spindles; Drilling automatons
- 39/161 . . {with parallel work spindles}
- 39/162 . . . {having gear transmissions}
- 39/163 . . . {having crank pin transmissions}
- 39/165 . . . {having universal joint transmissions}
- 39/166 . . . {having flexible shaft transmissions}
- 39/167 . . . {having belt and chain transmissions}
- 39/168 . . {with the work spindles being oblique to each other}
- 39/18 . . Setting work or tool carrier along a straight index line
- 39/20 . . Setting work or tool carrier along a circular index line; Turret head drilling machines

- 39/205 . . . {Turret head drilling machines}
- 39/22 . . with working-spindles in opposite headstocks
- 39/24 . . designed for programme control
- 39/26 . . in which the working position of tool or work is controlled by copying discrete points of a pattern (features of copying devices [B23Q 35/02](#))
- 39/28 . . Associations of only boring or drilling machines directed to a particular metal-working result (if not producing a particular metal-working result [B23Q 39/00](#))
- 41/00 Boring or drilling machines or devices specially adapted for particular work** {(surgical drilling machines [A61B 17/16](#)); Accessories specially adapted therefor}
 - 41/003 . {for drilling elongated pieces, e.g. beams}
 - 41/006 . . {the machining device being moved along a fixed workpiece}
 - 41/02 . for boring deep holes; Trepanning, e.g. of gun or rifle barrels
 - 41/04 . for boring polygonal or other non-circular holes
 - 41/06 . for boring conical holes
 - 41/10 . for boring holes in steam boilers
 - 41/12 . for forming working surfaces of cylinders, of bearings, e.g. in heads of driving rods, or of other engine parts
 - 41/14 . for very small holes
 - 41/16 . for boring holes with high-quality surface
- 43/00 Boring or drilling devices able to be attached to a machine tool, whether or not replacing an operative portion of the machine tool** (if specially adapted for particular work [B23B 41/00](#))
 - 43/02 . to the tailstock of a lathe
- 45/00 Hand-held or like portable drilling machines, e.g. drill guns; Equipment therefor** (details or components, e.g. casings, bodies, of portable power-driven tools not particularly related to the operation performed [B25F 5/00](#))
 - 45/001 . {Housing of the drill, e.g. handgrip}
 - 45/003 . {Attachments}
 - 45/005 . . {Flexible shafts}
 - 45/006 . {Keys for operating the chucks}
 - 45/008 . {Gear boxes, clutches, bearings, feeding mechanisms or like equipment}
 - 45/02 . driven by electric power
 - 45/04 . driven by fluid-pressure or pneumatic power
 - 45/042 . . {Turbine motors}
 - 45/044 . . {Rotary vane type motors}
 - 45/046 . . {Piston engines}
 - 45/048 . . . {Internal combustion piston engines}
 - 45/06 . driven by man-power
 - 45/08 . . for drilling rails or profiled stock
 - 45/10 . . by using a fiddle bow or a belt
 - 45/12 . . by using a ratchet brace
- 47/26 . . . Liftable or lowerable drill heads or headstocks; Balancing arrangements therefor {(weight and flexion compensation [B23Q 11/001](#))}
- 47/28 . . Drill jigs for workpieces (equipment for setting or guiding the drill [B23B 49/00](#))
 - 47/281 . . {Jigs for drilling cylindrical parts}
 - 47/282 . . {Jigs for drilling spherical parts}
 - 47/284 . . {Jigs for drilling rivets or bolts}
 - 47/285 . . {Jigs for drilling ski bindings}
 - 47/287 . . {Jigs for drilling plate-like workpieces (templates for marking the position of fittings on wings or frames [E05D 11/0009](#))}
- 47/288 . . . {involving dowelling}
- 47/30 . . Additional gear with one or more working-spindles attachable to the main working-spindle and mounting the additional gear {(multi-spindle drilling machines [B23B 39/16](#))}
- 47/32 . . Arrangements for preventing the running-out of drills or fracture of drills when getting through
- 47/34 . . Arrangements for removing chips out of the holes made; Chip- breaking arrangements attached to the tool {(chip-breaking in turning machines [B23B 25/02](#); in turning tools [B23B 27/22](#))}
- 49/00 Measuring or gauging equipment on boring machines for positioning or guiding the drill; Devices for indicating failure of drills during boring; Centering devices for holes to be bored** (marking-out equipment [B25H 7/00](#); measuring devices, gauges [G01B](#))
 - 49/001 . {Devices for detecting or indicating failure of drills}
 - 49/003 . {Stops attached to drilling tools, tool holders or drilling machines ([B23B 51/104](#) takes precedence)}
 - 49/005 . . {Attached to the drill}
 - 49/006 . . {Attached to drilling machines}
 - 49/008 . . . {Attached to the nose of the drilling machines}
 - 49/02 . Boring templates or bushings
 - 49/023 . . {Bushings and their connection to the template}
 - 49/026 . . {Boring bushing carriers attached to the workpiece by glue, magnets, suction devices or the like}

- 2231/2018 . . . with a saw-tooth profile
- 2231/2021 . . . comprising two different cones
- 2231/2024 . . Non-circular surfaces of collets for the transmission of torque
- 2231/2027 . . Gripping surfaces, i.e. the surface contacting the tool or workpiece
- 2231/2029 . . . Conical
- 2231/2032 . . . with non-cylindrical cross section
- 2231/2035 . . . Polygonal
- 2231/2037 . . . Roughened
- 2231/204 . . . with saw tooth profiles
- 2231/2043 . . . Discontinuous, interrupted or split
- 2231/2045 . . . comprising two or more diameters, e.g. stepped
- 2231/2048 . . Collets comprising inserts
- 2231/2051 . . . brazed in position
- 2231/2054 . . . glued in position
- 2231/2056 . . . where the insert forms part of the surface gripping the workpiece or tool
- 2231/2059 . . . Hard inserts
- 2231/2062 . . . Inserts mechanically clamped in the collet
- 2231/2064 . . . Inserts in the form of a roll
- 2231/2067 . . . Soft inserts
- 2231/207 . . . Inserts welded in position
- 2231/2072 . . Jaws of collets
- 2231/2075 . . . of special form
- 2231/2078 . . Jaw carriers, i.e. components retaining the collet itself
- 2231/2081 . . Keys, spanners or wrenches to operate the collet chuck
- 2231/2083 . . Collets comprising screw threads
- 2231/2086 . . Collets in which the jaws are formed as separate elements, i.e. not joined together
- 2231/2089 . . Slits of collets
- 2231/2091 . . . extending from both axial ends of the collet
- 2231/2094 . . . Helical
- 2231/2097 . . . having a special form not otherwise provided for
- 2231/22 . . Compensating chucks, i.e. with means for the compensation of irregularities of form or position
- 2231/24 . . Cooling or lubrication means
- 2231/26 . . Detection of clamping ([in general B23Q 17/006](#))
- 2231/28 . . Dust covers ([nose pieces in chucks B23B 2231/44](#), [dust covers for turning, boring or drilling in general B23B 2260/058](#))
- 2231/30 . . Chucks with four jaws
- 2231/32 . . Guideways for jaws
- 2231/34 . . Jaws

WARNING

Group [B23B 2231/34](#) is impacted by reclassification into groups [B23B 2231/341](#) and [B23B 2231/342](#).

Groups [B23B 2231/34](#), [B23B 2231/341](#), and [B23B 2231/342](#) should be considered in order to perform a complete search.

- 2231/341 . . Jaws with hard inserts

WARNING

Group [B23B 2231/341](#) is incomplete pending reclassification of documents from group [B23B 2231/34](#).

Groups [B23B 2231/34](#) and [B23B 2231/341](#) should be considered in order to perform a complete search.

- 2231/342 . . Padded or cushioned jaws

WARNING

Group [B23B 2231/342](#) is incomplete pending reclassification of documents from group [B23B 2231/34](#).

Groups [B23B 2231/34](#) and [B23B 2231/342](#) should be considered in order to perform a complete search.

- 2231/345 . . Different jaws
- 2231/36 . . Sealed joints
- 2231/365 . . using O-rings
- 2231/38 . . Keyless chucks for hand tools
- 2231/40 . . Chucks having a pivotal retention element in the form of a laterally acting cam
- 2231/42 . . Chucks operated by a motor which is movable to engage with, or disengage from, the chuck operating means
- 2231/44 . . Nose pieces ([dust covers in chucks B23B 2231/28](#), [dust covers for turning, boring or drilling in general B23B 2260/058](#))
- 2231/46 . . Pins
- 2231/48 . . Polygonal cross sections
- 2231/50 . . Devices to counteract clamping forces exerted within the spindle in order to release the tool or workpiece
- 2231/52 . . Chucks with means to loosely retain the tool or workpiece in the unclamped position
- 2231/54 . . Chucks for taps
- 2231/56 . . Chucks with more than one set of gripping means

WARNING

Groups [B23B 2231/56](#) and [B23B 2231/565](#) are incomplete pending reclassification of documents from groups [B23B 31/00](#) and [B23B 31/02](#).

All groups listed in this Warning should be considered in order to perform a complete search.

- 2231/565 . . . Wherein only one means is usable at a time
- 2231/58 . . Self-grasping, i.e., automatic grasping upon insertion of tool or workpiece

WARNING

Group [B23B 2231/58](#) is incomplete pending reclassification of documents from groups [B23B 31/00](#) and [B23B 31/02](#).

Groups [B23B 31/00](#), [B23B 31/02](#), and [B23B 2231/58](#) should be considered in order to perform a complete search.

2233/00 Details of centres or drivers

- 2233/04 . . Means to allow the facing of the axial end of the workpiece near the axis of rotation

2233/08	• Centres or drivers comprising a ball	2251/043	• • Helix angles
2233/12	• Centres or drivers with a special arrangement of bearings or with special bearings	2251/046	• • • Variable
2233/16	• Centres or drivers comprising chucks	2251/08	• Side or plan views of cutting edges
2233/20	• Centres or drivers with convex surfaces	2251/082	• • Curved cutting edges
2233/24	• Centres or drivers with inserts	2251/085	• • Discontinuous or interrupted cutting edges
2233/28	• Centres or drivers supporting the workpiece at three points around the circumference	2251/087	• • Cutting edges with a wave form
2233/32	• Yieldable centres	2251/12	• Cross sectional views of the cutting edges
2235/00	Turning of brake discs, drums or hubs	2251/122	• • Bevelled cutting edges
2235/04	• Machining of brake discs	2251/125	• • Rounded cutting edges
2235/045	• • Simultaneous machining of both sides of the brake disc	2251/127	• • Sharp cutting edges
2235/12	• Machining of brake drums	2251/14	• Configuration of the cutting part, i.e. the main cutting edges
2235/16	• Machining of hubs	2251/18	• Configuration of the drill point
2235/21	• Compensation of run out	2251/20	• Number of cutting edges
2240/00	Details of connections of tools or workpieces	2251/201	• • Single cutting edge
2240/04	• Bayonet connections	2251/202	• • Three cutting edges
2240/08	• Brazed connections	2251/204	• • Four cutting edges
2240/11	• Soldered connections	2251/205	• • Five cutting edges
2240/16	• Welded connections	2251/207	• • Six cutting edges
2240/21	• Glued connections	2251/208	• • Eight cutting edges
2240/24	• Connections using hollow screws, e.g. for the transmission of coolant	2251/24	• Overall form of drilling tools
2240/28	• Shrink-fitted connections, i.e. using heating and cooling to produce interference fits (shrink fits chucks B23B 31/1179)	2251/241	• • Cross sections of the diameter of the drill
2240/32	• Press fits	2251/242	• • • increasing in a direction towards the shank from the tool tip
2240/36	• Connections using a tongue and a hollow of corresponding prismatic form	2251/244	• • • decreasing in a direction towards the shank from the tool tip
2247/00	Details of drilling jigs	2251/245	• • • Variable cross sections
2247/02	• Jigs for drilling spectacles (machines for drilling spectacle lenses B28D 1/143)	2251/247	• • Drilling tools having a working portion at both ends of the shank
2247/04	• Jigs using one or more holes as datums for drilling further holes	2251/248	• • Drills in which the outer surface is of special form
2247/06	• Jigs for drilling holes for lock sets for doors	2251/28	• Arrangement of teeth
2247/08	• Jigs for drilling overlapping or interfering holes	2251/282	• • Unequal spacing of cutting edges in the circumferential direction
2247/10	• Jigs for drilling inclined holes	2251/285	• • Cutting teeth arranged at different heights
2247/12	• Drilling jigs with means to affix the jig to the workpiece	2251/287	• • Cutting edges having different lengths
2247/14	• Jigs for drilling flanges	2251/40	• Flutes, i.e. chip conveying grooves
2247/16	• Jigs for drilling stairs and associated components, e.g. banisters or handrails	2251/402	• • with increasing depth in a direction towards the shank from the tool tip
2247/18	• Jigs comprising V-blocks	2251/404	• • with decreasing depth in a direction towards the shank from the tool tip
2247/20	• Jigs for drilling holes for lock wires in bolts or nuts	2251/406	• • of special form not otherwise provided for
2250/00	Compensating adverse effects during turning, boring or drilling	2251/408	• • Spiral grooves
2250/04	• Balancing rotating components (vibration damping B23B 2250/16)	2251/42	• Types of drill
2250/08	• Compensation of centrifugal force (use of centrifugal force B23B 2270/04)	2251/422	• • Deep hole drills, e.g. ejector drills
2250/12	• Cooling and lubrication	2251/424	• • • Gun drills
2250/125	• • Improving heat transfer away from the working area of the tool by conduction	2251/426	• • Microdrills
2250/16	• Damping of vibrations (balancing rotating components B23B 2250/04)	2251/428	• • Drills for cutting plugs of material
2251/00	Details of tools for drilling machines	2251/44	• Margins, i.e. the area of the circumference following the axial cutting edge in the direction of rotation
2251/02	• Connections between shanks and removable cutting heads	2251/443	• • Double margin drills
2251/04	• Angles, e.g. cutting angles	2251/446	• • Drills with variable margins
		2251/46	• Drills having a centre free from cutting edges or with recessed cutting edges
		2251/48	• Chip breakers
		2251/50	• Drilling tools comprising cutting inserts
		2251/505	• • set at different heights
		2251/52	• Depth indicators
		2251/54	• Drilling tools having provision for drilling different diameters
		2251/56	• Guiding pads
		2251/58	• Guiding rolls

2251/60	. Drills with pilots	2260/082	. Holes
2251/603	. . Detachable pilots, e.g. in the form of a drill	2260/084	. Hirth couplings
2251/606	. . . being a twist drill	2260/088	. Indication scales
2251/62	. Drilling tools having means to reinforce the shank, e.g. drills having small shanks being gripped by devices having a larger shank	2260/09	. Knurled surfaces
2251/64	. Drills operating in the reverse direction, i.e. in the unscrewing direction of a right-hand thread	2260/092	. Lasers
2251/66	. Drills with provision to be used as a screwdriver	2260/094	. Levels, e.g. spirit levels
2251/68	. Drills with provision for suction (use of suction in turning, boring or drilling in general B23B 2270/62)	2260/096	. Levers
2251/70	. Drills with vibration suppressing means	2260/098	. Magazines
2260/00	Details of constructional elements	2260/10	. Magnets
2260/002	. Accumulators	2260/102	. Magnetostrictive elements
2260/004	. Adjustable elements	2260/104	. Markings, i.e. symbols or other indicating marks
2260/0045	. . Two elements adjustable relative to each other in three mutually perpendicular directions	2260/106	. Nuts
2260/008	. Bearings	2260/108	. Piezoelectric elements
2260/0082	. . Sliding contact bearings	2260/11	. Planetary drives
2260/0085	. . Needle roller bearings	2260/112	. Projections
2260/0087	. . Preloading of bearings	2260/114	. Rings
2260/016	. Bolts	2260/116	. Rollers or rolls
2260/018	. Brushes	2260/118	. Suction pads or vacuum cups, e.g. for attachment of guides to workpieces
2260/02	. Cams	2260/12	. Stops (depth controls B23B 2260/0482)
2260/022	. Balls	2260/122	. Safety devices
2260/024	. Batteries	2260/124	. Screws
2260/026	. Bushings, e.g. adapter sleeves	2260/126	. Seals
2260/028	. Chains	2260/128	. Sensors
2260/03	. Clamps	2260/1285	. . Vibration sensors
2260/032	. Diaphragms	2260/132	. Serrations (cutting inserts with serrated bottom surfaces B23B 2200/167)
2260/034	. Drawbars	2260/134	. Spacers or shims (shims for supporting cutting inserts B23B 2205/16)
2260/036	. Cables	2260/136	. Springs
2260/038	. Cartridges	2260/138	. Screw threads
2260/04	. Centre drills of known configuration, e.g. the provision of a centre drill in centres or chucks	2260/1381	. . Conical
2260/042	. Collets of known configuration, i.e. devices using a collet	2260/1383	. . with round thread profile
2260/044	. Clutches	2260/1385	. . with square thread profile
2260/0445	. . Overload clutches	2260/1386	. . with trapezoidal thread profile
2260/048	. Devices to regulate the depth of cut	2260/1388	. . with special profile not otherwise provided for
2260/0482	. . Depth controls, e.g. depth stops (stops B23B 2260/12)	2260/142	. Valves
2260/0485	. . Depth gauges	2260/144	. Wear indicators
2260/0487	. . Depth indicators (indication scales B23B 2260/088)	2260/146	. Wedges
2260/056	. Differential screw threads	2260/158	. Worms and worm wheels
2260/058	. Dust covers (dust covers in chucks B23B 2231/28 , nose pieces in chucks B23B 2231/44)	2265/00	Details of general geometric configurations
2260/062	. Electric motors	2265/08	. Conical
2260/0625	. . Linear motors	2265/12	. Eccentric
2260/066	. Electrostrictive elements	2265/16	. Elliptical
2260/068	. Flexible members	2265/32	. Polygonal
2260/07	. Gears	2265/322	. . Square
2260/072	. Grooves	2265/324	. . Pentagonal
2260/0725	. . Spiral	2265/326	. . Hexagonal
2260/076	. Harmonic drive gearboxes, i.e. reduction gearing including wave generator, flex spline and a circular spline	2265/328	. . Octagonal
2260/078	. Hand tools used to operate chucks or to assemble, adjust or disassemble tools or equipment used for turning, boring or drilling	2265/34	. Round
2260/0785	. . for unclamping cutting inserts	2265/36	. Spherical
		2270/00	Details of turning, boring or drilling machines, processes or tools not otherwise provided for
		2270/02	. Use of a particular power source
		2270/022	. . Electricity

2270/025 . . Hydraulics

WARNING

Group [B23B 2270/025](#) is incomplete pending reclassification of documents from group [B23B 31/207](#).

Groups [B23B 31/207](#) and [B23B 2270/025](#) should be considered in order to perform a complete search.

2270/027 . . Pneumatics

2270/04 . Use of centrifugal force ([compensating centrifugal force B23B 2250/08](#))

2270/06 . Use of elastic deformation

2270/08 . Clamping mechanisms; Provisions for clamping ([B23B 2210/00 takes precedence](#))

2270/09 . Details relating to unclamping

2270/10 . Use of ultrasound

2270/12 . Centering of two components relative to one another

2270/14 . Constructions comprising exactly two similar components

2270/16 . Constructions comprising three or more similar components

2270/20 . Internally located features, machining or gripping of internal surfaces

2270/205 . . Machining or gripping both internal and external surfaces

2270/22 . Externally located features, machining or gripping of external surfaces ([machining or gripping of both internal and external surfaces B23B 2270/205](#))

2270/24 . Tool, chuck or other device activated by the coolant or lubrication system of the machine tool

2270/26 . Burnishing

2270/28 . Cleaning

2270/30 . Chip guiding or removal ([use of suction B23B 2270/62, drilling tools with provision for suction B23B 2251/68](#))

2270/32 . Use of electronics

2270/34 . Means for guiding

2270/36 . Identification of tooling or other equipment

2270/38 . Using magnetic fields ([magnets B23B 2260/10](#))

2270/48 . Measuring or detecting

2270/483 . . Measurement of force

2270/486 . . Measurement of rotational speed

2270/54 . Methods of turning, boring or drilling not otherwise provided for

2270/56 . Turning, boring or drilling tools or machines with provision for milling

2270/58 . Oblique elements

2270/60 . Prevention of rotation

2270/62 . Use of suction ([suction pads or vacuum cups B23B 2260/118, drilling tools with provision for suction B23B 2251/68, chip removal B23B 2270/30](#))
