ELEVATORS; ESCALATORS OR MOVING WALKWAYS ({ apparatus for raising or lowering persons on theatrical stages or the like [A63J 5/12](#) } ; funicular railbound systems with rigid ground-supported tracks and cable traction, e.g. cliff railways, [B61B 9/00](#) ; arrangements of ammunition handlers in vessels [B63G 3/00](#) ; hoists, lifts, or conveyers for loading or unloading in general [B65G](#); braking or detent devices controlling normal movements of winding drums or barrels [B66D](#); ship-lifting devices [E02C](#); garages for many vehicles with mechanical means for lifting vehicles [E04H 6/12](#) ; hoists for feeding ammunition or projectiles to launching apparatus or to loading mechanisms [F41A 9/00](#)-)

NOTE

In this subclass, the following term is used with the meaning indicated:

- "elevator" covers the term "lift", and the two terms are interchangeable

B66B 1/00

Control systems of elevators in general (-safety devices [B66B 5/00](#) ; controlling door or gate operation [B66B 13/00](#) ; systems of general application [G05](#)-)

- U B66B 1/02 . Control systems without regulation, i.e. without retroactive action
- U B66B 1/06 . . electric
- U B66B 1/14 . . . with devices, e.g. push-buttons, for indirect control of movements
- B66B 1/16 with means for storing pulses controlling the movements of a single car or cage{(-[B66B 1/2433](#) takes precedence-)}
- B66B 1/18 with means for storing pulses controlling the movements of several cars or cages{(-[B66B 1/2458](#) takes precedence-)}
- B66B 1/20 and for varying the manner of operation to suit particular traffic conditions, e.g. "one-way rush-hour traffic",{(-[B66B 1/2466](#) takes precedence-)}
- U B66B 1/24 . Control systems with regulation, i.e. with retroactive action, for influencing travelling speed, acceleration, or deceleration
- B66B 1/28 . . electrical{(-detecting excessive speed [B66B 5/04](#)-); {(control of electrical motor [H02P](#))}}
- B66B 1/32 . . . effective on braking devices,{e.g. acting on electrically controlled brakes}{(-brake control [H02P](#), lift brakes per se [B66B 5/02](#)-)}
- U B66B 1/34 . Details,{e.g. call counting devices, data transmission from car to control system, devices giving information to the control system}
- B66B 1/3476 . . {Load weighing or car passenger counting devices}{(-[B66B 5/14](#) takes precedence-)}
- B66B 1/3492 . . {Position or motion detectors or driving means for the detector}{(-[B66B 1/40](#) , [B66B 1/50](#) take precedence; length measuring [G01B](#) ; speed measuring [G01P](#)-)}
- B66B 1/46 . . Adaptations of switches or switchgear{(-switches or switchgear in general, applications of switches or switchgear for floor-levelling purpose [H01H](#) ; panels for boards or switching arrangements [H02B 1/015](#)-)}
- B66B 1/48 . . . Adaptations of mechanically-operated limit switches{(-for cranes [B66C 13/50](#) ; for winding mechanisms [B66D 1/56](#)-)}
- U **B66B 5/00** **Application of checking, fault-correcting, or safety devices in elevators**
- B66B 5/0006 . {Monitoring devices or performance analysers}{(-[B66B 5/02](#) takes precedence-)}

	B66B 5/0087	• {Devices facilitating maintenance, repair or inspection tasks (-devices incorporated in the buffer B66B 5/288 ; railings on top of the car B66B 11/0226 -)}
U	B66B 5/02	• responsive to abnormal operating conditions
	B66B 5/021	• • {the abnormal operating conditions being independent of the system (alarm systems in general G08B)}
	B66B 5/028	• • {Safety devices separate from control system in case of power failure, for hydraulical lifts, e.g. braking the hydraulic jack (- B66B 5/16 takes precedence-)}
U	B66B 5/16	• • Braking or catch devices operating between cars, cages, or skips and fixed guide elements or surfaces in hoistway or well
U	B66B 5/18	• • • and applying frictional retarding forces
	B66B 5/20	• • • • by means of rotatable eccentrically-mounted members (- B66B 5/24 takes precedence-)
	B66B 5/22	• • • • by means of linearly-movable wedges (- B66B 5/24 takes precedence-)
U	B66B 5/28	• Buffer-stops for cars, cages, or skips
	B66B 5/288	• • {with maintenance features (-if not incorporated in the buffer B66B 5/0087 -)}
U	B66B 7/00	Other common features of elevators
	B66B 7/02	• Guideways; Guides (-arrangements in mine shafts E21D 7/02 -)
	B66B 7/04	• • {Riding means, e.g.} Shoes, Rollers, {between car and guiding means, e.g. rails, ropes} (-rollers adapted to match the shape of a special guiding means B66B 7/02 ; vibration attenuation systems acting between car and its supporting frame B66B 11/026 -)}
	B66B 9/00	Kinds or types of lifts in, or associated with, buildings or other structures (-characterised by control systems B66B 1/00 ; apparatus for raising or lowering persons on stages of theatres A63J 5/12-)
	B66B 9/04	• actuated pneumatically or hydraulically (-platforms for lifting or lowering through short distances B66F 7/00 -)
U	B66B 9/06	• inclined, e.g. serving blast furnaces
	B66B 9/08	• • associated with stairways, e.g. for transporting disabled persons (-facilitating access of invalids to vehicles A61G 3/02 -)}
	B66B 9/0846	• • • {Guide rail (- B66B 9/0807 takes precedence-)}
	B66B 9/10	• Paternoster type (-with devices for transferring goods into, or out of, the compartments B65G 17/00 -)
	B66B 9/16	• Mobile or transportable lifts specially adapted to be shifted from one part of a building or other structure to another part or to another building or structure (-devices for lifting or lowering bulky or heavy goods for loading or unloading purposes B66F 9/00 , e.g. fork-lift trucks B66B 9/06 -)
	B66B 9/187	• • with a liftway specially adapted for temporary connection to a building or other structure (- B66B 9/193 takes precedence-)
U	B66B 11/00	Main component parts of lifts in, or associated with, buildings or other structures
	B66B 11/006	• {Applications of loading and unloading equipment for lifts associated with buildings (-of general application B65G ; for paternoster lifts B65G 17/00 ; for mine lifts B66B 17/14 -)}
	B66B 11/0065	• {Roping (-Mining hoist B66B 15/08 -)}
	B66B 11/02	• Cages, {i.e. cars} (-doors, gates or other apparatus controlling access to, or exit from, cages B66B 13/00 -)

- U B66B 11/0226
 - {Constructional features, e.g. walls assembly, decorative panels, comfort equipment, thermal or sound insulation}

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[B66F 19/02](#) covered by [B66F 19/00](#)

U B66F 1/00

Devices, e.g. jacks, for lifting loads in predetermined steps

U B66F 1/02

• with locking elements, e.g. washers, co-operating with posts

B66F 1/025

• • {the devices being operated by fluid pressure ([B66F 1/08](#) takes precedence) }

B66F 3/00

Devices, e.g. jacks, adapted for uninterrupted lifting of loads ([mobile jacks of the garage type](#) [B66F 5/00](#))

B66F 3/08

• screw operated ([B66F 3/44](#) takes precedence; gearings [F16H](#))

B66F 3/12

• • comprising toggle levers ([lazy-tongs mechanisms](#) [B66F 3/22](#))

B66F 3/22

• Lazy-tongs mechanisms ([B66F 11/042](#) takes precedence) }

B66F 3/24

• fluid-pressure operated ([water-pressure machines](#) [F03B](#) ; hydraulic gearings [F16H](#) ; cylinders, pistons [F16J](#) ; fluid-pressure servomotors [F15B](#))

B66F 3/245

• • {comprising toggle levers ([lazy-tongs mechanisms](#) [B66F 3/22](#)) }

B66F 3/247

• • {pneumatically actuated ([B66F 3/35](#) takes precedence) }

U B66F 3/25

• • Constructional features

B66F 3/35

• • • Inflatable flexible elements, e.g. bellows ([inflatable load-engaging elements](#) [B66F 3/40](#) ; connection of valves to inflatable elastic bodies [B60C 29/00](#))

U B66F 3/36

• • • Load-engaging elements

B66F 3/40

• • • inflatable ([connection of valves to inflatable elastic bodies](#) [B60C 29/00](#))

B66F 7/00

Lifting frames, e.g. for lifting vehicles; Platform lifts ({ [B66F 11/04](#) takes precedence } ; for lift-truck platform [B66F 9/06](#))

B66F 7/02

• with platforms suspended from ropes, cables, or chains ([or screws and movable along pillars](#))

B66F 7/22

• with tiltable platforms ([tilting vehicles for unloading](#) [B65G 67/34](#))

B66F 7/26

• for selective lifting of parts of vehicles ([mobile garage jacks](#) [B66F 5/00](#))

B66F 9/00

Devices for lifting or lowering bulky or heavy goods for loading or unloading purposes ([mobile or transportable lifts in, or associated with, buildings and specially adapted to be shifted from one part of a building or other structure to another part or to another building or structure](#) [B66B 9/16](#) ; cranes [B66C](#))

B66F 9/06

• movable, with their loads, on wheels or the like, e.g. fork-lift trucks ([vehicle aspects](#) [B60](#) to [B62](#) ; vehicles predominantly for transporting loads and modified to facilitate loading or unloading [B60P 1/00](#) ; low-lift hand trucks for transporting goods [B62B 3/06](#))

C01B 21/02

- Preparation of nitrogen (by decomposition of ammonia{ [C01B 3/047](#) })

C01B 21/04

- Purification or separation of nitrogen (by liquefying [F25J](#)-)

C01B 21/06

- Binary compounds of nitrogen with metals, with silicon, or with boron, {or with carbon, i.e. nitrides; Compounds of nitrogen with more than one metal, silicon or boron} (-azides [C01B 21/08](#)-)

NOTES

Binary compounds, i.e. compounds of nitrogen with only one other element chosen from metals, silicon, boron or carbon, are classified in groups [C01B 21/06](#) or [C01B 21/0605](#) to [C01B 21/076](#). Compounds of nitrogen with more than one element chosen from metals, silicon or boron are classified in [C01B 21/0602](#)

Documents relating to several specific binary compounds are classified in [C01B 21/06](#) only and receive the indexing codes chosen from [C01B 21/0602](#) to [C01B 21/076](#) to identify the specific compounds

C01B 21/0637

- {with metals not specified in groups [C01B 21/0607](#) to [C01B 21/0635](#), other than aluminium, titanium, zirconium or hafnium-}

U C01B 21/064

- with boron

C01B 21/0648

- {After-treatment, e.g. grinding, purification (transformation of hexagonal into cubic or wurtzitic boron nitride [C04B 35/5831](#)-)}

C01B 21/076

- with titanium or zirconium {or hafnium}

C01B 21/082

- Compounds containing nitrogen and non-metals {and optionally metals} (-[C01B 21/06](#), [C01B 21/08](#) take precedence-)

U C01B 21/087

- containing one or more hydrogen atoms

U C01B 21/092

- containing also one or more metal atoms

C01B 21/0923

- {Metal imides or amides (-silicon imides or amides [C01B 21/087](#)-)}

C01B 21/12

- Carbamic acid {or thiocarbamic acid}; Salts thereof

U C01B 21/14

- Hydroxylamine; Salts thereof

U C01B 21/1409

- {Preparation}

C01B 21/1454

- {of hydroxylamine salts by processes not covered by one or more of groups [C01B 21/1418](#) to [C01B 21/1445](#), e.g. by conversion of one salt into another-}

U C01B 21/20

- Nitrogen oxides; Oxyacids of nitrogen; Salts thereof

C01B 21/206

- {Nitric anhydride (N_2O_5) (-[C01B 21/203](#) takes precedence-)}

C01B 21/22

- Nitrous oxide (N_2O) (-[C01B 21/203](#) takes precedence-)}

C01B 21/24

- Nitric oxide (NO) (-[C01B 21/203](#) takes precedence-)}

C01B 21/26

- Preparation by catalytic {or non-catalytic} oxidation of ammonia

C01B 21/30

- Preparation by oxidation of nitrogen (-[C01B 21/26](#) takes precedence-)}

C01B 21/34

- Nitrogen trioxide (N_2O_3) (-[C01B 21/203](#) takes precedence-)}

C01B 21/36

- Nitrogen dioxide (NO_2 , N_2O_4) { [C01B 21/203](#), [C01B 21/26](#), [C01B 21/30](#) take precedence-}

U C01B 21/38

- Nitric acid

C01B 21/40

- Preparation by absorption of oxides of nitrogen (-[C01B 21/26](#) takes precedence-)}

C01B 21/44

- Concentration (-[C01B 21/40](#) takes precedence-)}

C01B 21/46

- Purification; Separation; {Stabilisation (-[C01B 21/40](#) takes precedence-)}

C01B 39/00

Compounds having molecular sieve and base-exchange properties, e.g. crystalline zeolites; Their preparation; After-treatment, e.g. ion-exchange or dealumination (~~treatment to modify the sorption properties, e.g. shaping using a binder, [B01J 20/10](#) ; treatment to modify the catalytic properties, e.g. combination of treatments to make the zeolites appropriate to their use as a catalyst, [B01J 29/04](#) ; treatment to improve the ion-exchange properties [B01J 39/14](#) ; regeneration or reactivation of ion-exchange properties [B01J 49/00](#) ; preparation of stabilised suspensions used in detergents [C11D 3/12](#)~~)

NOTES

In this group, the following term is used with the meaning indicated:

- "zeolites" means:

- (i) crystalline aluminosilicates with base-exchange and molecular sieve properties, having three dimensional, microporous lattice framework structure of tetrahedral oxide units;
- (ii) compounds isomorphous to those of the former category, wherein the aluminium or silicon atoms in the framework are partly or wholly replaced by atoms of other elements, e.g. by gallium, germanium, phosphorus or boron.

Compounds classified in main group [C01B 39/00](#) are also classified in other groups of class [C01](#) according to their composition

- U C01B 39/02
 - Crystalline aluminosilicate zeolites; Isomorphous compound thereof; Direct preparation thereof; Preparation thereof starting from a reaction mixture containing a crystalline zeolite of another type, or from preformed reactants; After-treatment thereof
- C01B 39/023
 - {Preparation of physical mixtures or intergrowth products of zeolites chosen from group [C01B 39/04](#) or two or more of groups [C01B 39/14](#) to [C01B 39/48](#)}
- U C01B 39/06
 - Preparation of isomorphous zeolites characterised by measures to replace the aluminium or silicon atoms in the lattice framework by atoms of other elements,{i.e. by direct or secondary synthesis}
- C01B 39/10
 - the replacing atoms being {at least}phosphorus atoms
- C01B 39/12
 - the replacing atoms being {at least}boron atoms
- U C01B 39/14
 - Type A
- C01B 39/16
 - from aqueous solutions of an alkali metal aluminate and an alkali metal silicate excluding any other source of alumina or silica but seeds{(~~[C01B 39/145](#) takes precedence~~)}
- C01B 39/18
 - from a reaction mixture containing at least one aluminium silicate or aluminosilicate of a clay type, e.g. kaolin or metakaolin or its exotherm modification or allophane{(~~[C01B 39/145](#) takes precedence~~)}
- U C01B 39/20
 - Faujasite type, e.g. type X or Y
- C01B 39/22
 - Type X{(~~[C01B 39/205](#) takes precedence~~)}
- C01B 39/24
 - Type Y{(~~[C01B 39/205](#) takes precedence~~)}
- C01B 39/26
 - Mordenite type{(~~[C01B 39/023](#) , [C01B 39/026](#) , [C01B 39/06](#) take precedence~~)}
- C01B 39/28
 - Phillipsite or harmotome type{(~~[C01B 39/023](#) , [C01B 39/026](#) , [C01B 39/06](#) take precedence~~)}
- C01B 39/46
 - Other types characterised by their X-ray diffraction pattern and their defined composition{(~~[C01B 39/023](#) , [C01B 39/026](#) , [C01B 39/06](#) take precedence~~)}
- C01B 39/50
 - Zeolites wherein inorganic bases or salts occlude channels in the lattice framework, e.g. sodalite, cancrinite, nosean, hauynite{(~~ultramarine [C09C 1/32](#)~~)}

C01B 2203/00

Integrated processes for the production of hydrogen or synthesis gas (~~reactors or details thereof~~ [B01J 2208/00](#) to [B01J 2219/00](#))

- U C01B 2203/08 • Methods of heating or cooling
- U C01B 2203/0805 • • Methods of heating the process for making hydrogen or synthesis gas
- U C01B 2203/0838 • • • by heat exchange with exothermic reactions, other than by combustion of fuel
- C01B 2203/0844 • • • • the non-combustive exothermic reaction being another reforming reaction as defined in groups [C01B 2203/02](#) to [C01B 2203/0294](#)

Project: N/A (C02F)**C02F**

TREATMENT OF WATER, WASTE WATER, SEWAGE, OR SLUDGE (-separation in general [B01D](#); special arrangements on waterborne vessels of installations for treating water, waste water or sewage, e.g. for producing fresh water, [B63J](#); adding materials to water to prevent corrosion [C23F](#); treating radioactively-contaminated liquids [G21F 9/04](#) ; regeneration of reactants for recirculation into processes, see the relevant places for the processes-)

NOTE

When classifying in this subclass, classification is also made in group [B01D 15/08](#) insofar as subject matter of general interest relating to chromatography is concerned.

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:
[C02F 9/02](#) to [C02F 9/14](#) covered by [C02F 9/00](#) and subgroup

C02F 1/00

Treatment of water, waste water, or sewage (-[C02F 3/00](#) to [C02F 9/00](#) take precedence-)

C02F 1/001

- {Processes for the treatment of water whereby the filtration technique is of importance (-[C02F 1/44](#) takes precedence; construction of filters in general [B01D 24/00](#) to [B01D 41/00](#)-)}

- C02F 1/002
 - {using small portable filters for producing potable water, e.g. personal travel or emergency equipment, survival kits, combat gear} (-C02F 1/003 takes precedence-)
- C02F 1/003
 - {using household-type filters for producing potable water, e.g. pitchers, bottles, faucet mounted devices} (-C02F 9/005 takes precedence-)
- C02F 1/006
 - {Water distributors either inside a treatment tank or directing the water to several treatment tanks; Water treatment plants incorporating these distributors, with or without chemical or biological tanks} (-for settling tanks B01D 21/24-)
- C02F 1/02
 - by heating} (-methods of steam generation F22B ; preheating boiler feed-water or accumulating preheated boiler feed-water F22D-)
- C02F 1/20
 - by degassing, i.e. liberation of dissolved gases} (-degasification of liquids in general B01D 19/00 ; arrangement of degassing apparatus in boiler feed supply F22D-)
- C02F 1/24
 - by flotation} (-C02F 1/465 takes precedence-)
- C02F 1/28
 - by sorption} (-using ion-exchange C02F 1/42 ; sorbent compositions B01J-)
- U C02F 1/38
 - by centrifugal separation
- C02F 1/385
 - {by centrifuging suspensions} (-centrifuges B04B-)
- C02F 1/40
 - Devices for separating or removing fatty or oily substances or similar floating material} (-cleaning or keeping clear the surface of open water from oil or like materials E02B 15/04 ; devices in sewers for separating liquid or solid substances from sewage E03F 5/14 , e.g. for use in drains leading to the sewer E03F 5/16-)
- C02F 1/42
 - by ion-exchange} (-ion-exchange in general B01J-)

NOTE

When classifying in group C02F 1/42 , details of ion-exchangers can be further indexed by using indexing codes chosen from C02F 2001/422 to C02F 2001/427
- C02F 1/44
 - by dialysis, osmosis or reverse osmosis} (-general membrane separation processes B01D 61/00 , membrane modules B01D 63/00 , electrodialysis C02F 1/4693 , combination of membrane modules and bioreactors C02F 3/1268-)
- C02F 1/447
 - {by membrane distillation} (-distillation and evaporation without the use of membranes C02F 1/04-)
- U C02F 1/46
 - by electrochemical methods
- U C02F 1/461
 - by electrolysis
- U C02F 1/46104
 - {Devices therefor; Their operating or servicing}
- U C02F 1/46109
 - {Electrodes}

NOTE

When classifying in group C02F 1/46109 , details of devices for electrolysis can be further indexed by using indexing codes chosen from C02F 2001/46119 to C02F 2001/46166]
- C02F 2001/46152
 - {characterised by the shape or form} (-electrodes in particulate form or with conductive or non-conductive particles between them C02F 1/46114-)
- C02F 1/48
 - with magnetic or electric fields} (-C02F 1/46 takes precedence-)
- C02F 1/50
 - by addition or application of a germicide or by oligodynamic treatment} ({C02F 1/4606, C02F 1/467 , C02F 1/76 take precedence })
- C02F 1/52
 - by flocculation or precipitation of suspended impurities} (-C02F 1/463 takes precedence-)

- C02F 1/58
 - by removing specified dissolved compounds (using ion-exchange [C02F 1/42](#) ; softening water [C02F 5/00](#))
- C02F 1/586
 - {by removing ammoniacal nitrogen (for biological methods [C02F 3/00](#))}
- C02F 1/60
 - Silicon compounds (C02F 1/583 takes precedence)
- C02F 1/66
 - by neutralisation; pH adjustment (for degassing [C02F 1/20](#) ; using ion-exchange [C02F 1/42](#) ; for flocculation or precipitation of suspended impurities [C02F 1/52](#) ; for removing dissolved compounds [C02F 1/58](#))
- C02F 1/68
 - by addition of specified substances, e.g. trace elements, for ameliorating potable water (medicinal water [A61K](#))
- C02F 1/70
 - by reduction (C02F 1/4676 takes precedence)
- C02F 1/72
 - by oxidation (C02F 1/4672 takes precedence)
- C02F 1/74
 - with air (aeration of stretches of water [C02F 7/00](#))
- C02F 1/76
 - with halogens or compounds of halogens (C02F 1/4674 takes precedence)
- C02F 1/78
 - with ozone (C02F 1/4672 takes precedence)
- C02F 3/00**

Biological treatment of water, waste water, or sewage (C02F 1/006 takes precedence)
- C02F 3/005
 - {Combined electrochemical biological processes (aeration by electrolytically produced oxygen bubbles [C02F 3/202](#))}
- U C02F 3/02
 - Aerobic processes
- C02F 3/10
 - Packings; Fillings; Grids (packing elements in general [B01J 19/30](#) , [B01J 19/32](#))
- C02F 3/109
 - {Characterized by the shape (C02F 3/104 takes precedence)}
- U C02F 3/12
 - Activated sludge processes
- U C02F 3/20
 - using diffusers
- C02F 3/208
 - {Membrane aeration (C02F 3/201 takes precedence)}
- U C02F 3/30
 - Aerobic and anaerobic processes
- C02F 3/302
 - {Nitrification and denitrification treatment (C02F 3/308 takes precedence)}
- U C02F 3/34
 - characterised by the micro-organisms used
- C02F 3/347
 - {Use of yeasts or fungi (C02F 3/322 takes precedence)}
- C02F 5/00**

Softening water; Preventing scale; Adding scale preventatives or scale removers to water, e.g. adding sequestering agents (softening using ion-exchange [C02F 1/42](#))
- U C02F 5/02
 - Softening water by precipitation of the hardness
- C02F 5/04
 - using phosphates (C02F 5/06 takes precedence)
- U C02F 5/08
 - Treatment of water with complexing chemicals or other solubilising agents for softening, scale prevention or scale removal, e.g. adding sequestering agents
- U C02F 5/10
 - using organic substances
- C02F 5/12
 - containing nitrogen (C02F 5/14 takes precedence)
- U **C02F 9/00**

Multistage treatment of water, waste water, or sewage

NOTES

This group covers only those combined treating operations where the interest is directed to the relationship between the steps.

This group does not cover, for example, chemical treatment followed by settlement or biological treatment involving normal mechanical treatment.

- C02F 9/005
- {Portable or detachable small-scale multistage treatment devices, e.g. point of use or laboratory water purification systems (-single-stage processes in combination with filtration techniques [C02F 1/002](#) or [C02F 1/003](#)-)}
- U C02F 11/00 Treatment of sludge; Devices therefor**
- C02F 11/06
- by oxidation (-incinerators for burning waste liquors, e.g. sulfite liquor from paper-making plant [F23G 7/04](#)-)
- U C02F 11/12
- by de-watering, drying, or thickening
- U C02F 11/121
- • {Processes for mechanical dehydration of sludge, e.g. by filters}
- C02F 11/122
- • • using press filters (-[C02F 11/123](#) takes precedence-)
- C02F 11/18
- by thermal conditioning (-by pyrolysis [C02F 11/10](#)-)
- U C02F 2103/00 Nature of the water, waste water, sewage or sludge to be treated**
- C02F 2103/34
- from industrial activities not provided for in groups [C02F 2103/12](#) to [C02F 2103/32](#)
- U C02F 2103/36
- • from the manufacture of organic compounds
- C02F 2103/365
- • • from petrochemical industry (*e.g. refineries*)(~~e.g. refineries~~)
- U C02F 2201/00 Apparatus for treatment of water, waste water or sewage**
- C02F 2201/001
- Build in apparatus for autonomous on board water supply and wastewater treatment (*e.g. for aircrafts, cruiseships, oil drilling platforms, railway trains, space stations*)(~~e.g. for aircrafts, cruiseships, oil drilling platforms, railway trains, space stations~~)
- C02F 2201/008
- Mobile apparatus and plants, e.g. mounted on a vehicle (-for biological treatment [C02F 2203/008](#)-)
- C02F 2201/009
- Apparatus with independent power supply, e.g. solar cells, windpower, fuel cells (-for electrolysis apparatus [C02F 2201/46165](#)-)
- U C02F 2201/46
- Apparatus for electrochemical processes
- U C02F 2201/461
- • Electrolysis apparatus
- U C02F 2201/46105
- • • Details relating to the electrolytic devices
- C02F 2201/4619
- • • • Supplying gas to the electrolyte (-gas diffusion electrodes [C02F 2001/46166](#)-)
- U C02F 2303/00 Specific treatment goals**
- C02F 2303/22
- Eliminating or preventing deposits, scale removal, scale prevention (-[C02F 1/042](#) , [C02F 1/4602](#) , [C02F 5/00](#) take precedence-)
- U C02F 2305/00 Use of specific compounds during water treatment**
- C02F 2305/12
- Inert solids used as ballast for improving sedimentation (-[C02F 3/1226](#) takes precedence-)

Project: N/A (C03B)

- C03B 1/00 Preparing the batches (-chemical compositions [C03C](#)-)**
- U C03B 5/00 Melting in furnaces; Furnaces so far as specially adapted for glass manufacture**
- C03B 5/005
- {of glass-forming waste materials (-disposal or transformation of solid waste in general [B09B](#) ; treatment of radioactive waste [G21F 9/00](#)-)}
- C03B 5/02
- in electric furnaces,{e.g. by dielectric heating (electric heating in general [H05B](#))}
- U C03B 5/027
- • by passing an electric current between electrodes immersed in the glass bath, i.e. by direct resistance heating
- C03B 5/0275
- • • {Shaft furnaces (-[C03B 5/0277](#) takes precedence-)}

- U C03B 5/033
 - by using resistance heaters above or in the glass bath, i.e. by indirect resistance heating
- C03B 5/0336
 - • {Shaft furnaces (~~C03B 5/0338~~ takes precedence-)}
- C03B 5/04
 - in tank furnaces(~~C03B 5/02~~ takes precedence-)}
- C03B 5/06
 - in pot furnaces(~~C03B 5/02~~ takes precedence-)}
- C03B 5/10
 - in combined tank furnaces and pots(~~C03B 5/02~~ takes precedence-)}
- C03B 5/12
 - in shaft furnaces(~~C03B 5/02~~ takes precedence-)}
- C03B 5/14
 - in revolving cylindrical furnaces(~~C03B 5/02~~ takes precedence-)}
- U C03B 5/16
 - Special features of the melting process; Auxiliary means specially adapted for glass-melting furnaces
- C03B 5/163
 - {Electrochemical treatments, e.g. to prevent bubbling or to create bubbles (~~C03B 5/1672~~ , ~~C03B 5/185~~ take precedence-)}
- C03B 5/167
 - Means for preventing damage to equipment, e.g. by molten glass, hot gases, batches (~~C03B 5/20~~ , ~~C03B 5/42~~ take precedence-)
- C03B 5/173
 - Apparatus for changing the composition of the molten glass in glass furnaces, e.g. for colouring the molten glass (~~chemical aspects C03C-~~)
- C03B 5/225
 - Refining (~~C03B 5/18~~ takes precedence; { Refining agents ~~C03C 1/004~~ })
- C03B 5/23
 - Cooling the molten glass (~~C03B 5/18~~ , ~~C03B 5/225~~ take precedence-)
- C03B 5/235
 - Heating the glass (~~C03B 5/02~~ , ~~C03B 5/18~~ , ~~C03B 5/225~~ take precedence-)
- NOTE
- Devices for withholding dirt, foam, or batch are also classified in [C03B 5/202](#)
- C03B 5/2356
 - • {Submerged heating, e.g. by using heat pipes, hot gas or submerged combustion burners (~~bubblers C03B 5/193-~~)}
- U C03B 5/237
 - • Regenerators or recuperators specially adapted for glass-melting furnaces
- C03B 5/2375
 - • • {Regenerator brick design (~~brick shapes in general F27D 1/042-~~); Use of materials therefor; Brick stacking arrangements}
- U C03B 5/42
 - Details of construction of furnace walls, e.g. to prevent corrosion; Use of materials for furnace walls
- C03B 5/425
 - • Preventing corrosion or erosion (~~C03B 5/44~~ takes precedence-)
- U **C03B 7/00**
 - Distributors for the molten glass; Means for taking-off charges of molten glass; Producing the gob,{e.g. controlling the gob shape, weight or delivery tact}**
- C03B 7/01
 - Means for taking-off charges of molten glass(~~C03B 7/08~~ , ~~C03B 7/14~~ to ~~C03B 7/22~~ take precedence-)}
- U C03B 7/08
 - Feeder spouts, e.g. gob feeders
- C03B 7/092
 - Stirring devices; Homogenisation (~~C03B 5/18~~ takes precedence-)
- C03B 7/10
 - Cutting-off {or severing}the glass flow with the aid of knives or scissors {or non-contacting cutting means, e.g. a gas jet}; Construction of the blades used
- C03B 7/12
 - Cutting-off {or severing}a free-hanging glass stream,{e.g. by the combination of gravity and surface tension forces}
- C03B 7/14
 - Transferring molten glass or gobs to glass blowing or pressing machines (~~C03B 7/18~~ to ~~C03B 7/22~~ take precedence-)
- C03B 9/00 - C03B 23/00**
 - Shaping of glass (~~manufacture of fibres C03B 37/00-~~)**
- C03B 9/13
 - in gob feeder machines (~~C03B 9/28~~ , ~~C03B 9/29~~ take precedence-)
- C03B 9/14
 - in "blow" machines or in "blow-and-blow" machines (~~C03B 9/193~~ , ~~C03B 9/20~~ take precedence-)

- U C03B 9/16
 - • • in machines with turn-over moulds
- C03B 9/165
 - • • {Details of such machines, e.g. guide funnels, turn-over mechanisms} (-C03B 9/18 takes precedence-)
- U C03B 9/193
 - • in "press-and-blow" machines
- C03B 9/1932
 - • • {Details of such machines, e.g. plungers or plunger mechanisms for the press-and-blow machine, cooling of plungers} (-C03B 9/195 takes precedence-)
- C03B 9/28
 - in machines of the endless-chain type (-C03B 9/12 takes precedence-)
- C03B 9/29
 - Paste mould machines (-C03B 9/28 takes precedence-)
- C03B 9/292
 - • {Details of such machines} (-C03B 9/295 takes precedence-)
- C03B 9/30
 - Details of blowing glass (-for blowing with the mouth C03B 9/02-); Use of materials for the moulds
- U C03B 9/34
 - • Glass-blowing moulds not otherwise provided for
- C03B 9/342
 - • • {Neck moulds} (-C03B 9/325 takes precedence-)
- C03B 9/344
 - • • {Bottom moulds} (-C03B 9/335 takes precedence-)
- C03B 9/38
 - • Means for cooling, heating, or insulating glass-blowing machines {or for cooling the glass moulded by the machine}
- U C03B 9/40
 - • Gearing or controlling mechanisms specially adapted for glass-blowing machines
- C03B 9/41
 - • • Electric or electronic systems (-in general G05B 19/00-)
- C03B 9/42
 - • Means for fusing, burning-off, or edge-melting combined with glass-blowing machines (-uniting glass pieces by fusing C03B 23/20-)
- C03B 9/46
 - • Means for cutting the hot glass in glass-blowing machines (-burning-off C03B 9/42-)
- C03B 11/00**

Pressing {molten}glass {or performed glass reheated to equivalent low viscosity without blowing} (-shaping molten glass by a press-blow process C03B 9/00 , e.g. C03B 9/193 ; re-forming shaped glass C03B 23/00 ; re-heating the performed glass C03B 29/00 ; transporting the performed or pressed glass during its manufacture C03B 35/00-)
- U C03B 11/06
 - Construction of plunger or mould
- U C03B 11/08
 - • for making solid articles, e.g. lenses
- U C03B 11/084
 - • • {material composition or material properties of press dies therefor}
- C03B 11/086
 - • • • {of coated dies} (-use of materials as release or lubricating compositions C03B 40/02-)
- C03B 11/10
 - • for making hollow {or semi-hollow}articles
- C03B 11/12
 - Cooling, heating, or insulating the plunger, the mould, or the glass-pressing machine; {cooling or heating of the glass in the mould} (-C03B 9/38 takes precedence-)
- C03B 11/14
 - {Pressing laminated glass articles or glass}with metal inserts {or enclosures, e.g. wires, bubbles, coloured parts}
- C03B 13/00**

Rolling {molten}glass,{i.e. where the molten glass is shaped by rolling} (-re-forming shaped glass by rolling C03B 23/004 , C03B 23/033 , C03B 23/055-)
- C03B 13/14
 - Rolling other articles,{ i.e. not covered by C03B 13/01 to C03B 13/12 , e.g. channeled articles, briquette-shaped articles}
- C03B 17/00**

Forming {molten}glass by flowing-out, pushing-out,{extruding}or drawing downwardly or laterally from forming slits or by overflowing over lips

C03B 17/02	<ul style="list-style-type: none"> Forming {molten}glass coated with coloured layers; {Forming molten glass of different compositions or layers; Forming molten glass comprising reinforcements or inserts}
U C03B 18/00	Shaping glass in contact with the surface of a liquid
U C03B 18/02	<ul style="list-style-type: none"> Forming sheets
C03B 18/12	<ul style="list-style-type: none"> Making multi-layer, coloured or armoured glass (-chemical aspects C03C-)
C03B 18/14	<ul style="list-style-type: none"> Changing the surface of the glass ribbon, e.g. roughening (-by chemical methods C03C-)
C03B 19/00	Other methods of shaping glass (- manufacture or treatment of flakes, fibres or filaments from softened glass, minerals or slags C03B 37/00-)
C03B 19/01	<ul style="list-style-type: none"> by progressive fusion {or sintering}of powdered glass onto a shaping substrate, i.e. accretion,{e.g. plasma oxidation deposition (-making fibre preforms C03B 37/01291-)}

U C03B 2215/40	• Product characteristics
U C03B 2215/46	• • Lenses, e.g. bi-convex
C03B 2215/49	• • • Complex forms not covered by groups C03B 2215/47 or C03B 2215/48

Project: N/A (C03C)

U C03C 4/00	Compositions for glass with special properties
	<u>NOTE</u>
	When classifying in group C03C 4/00, classification is also made in the appropriate groups of group C03C 3/00 according to the glass composition.
U C03C 4/0007	• {for biologically-compatible glass}
C03C 4/0014	• • {-Biodegradable glass}
C03C 4/0021	• • {-for dental use}
C03C 4/0042	• {-for glass comprising or including particular isotopes}
C03C 4/0064	• {-for self-destructing glass (C03C 4/0014 takes precedence)}
C03C 4/0092	• {-for glass with improved high visible transmittance, e.g. extra-clear glass}
U C03C 17/00	Surface treatment of glass, not in the form of fibres or filaments, by coating (optical coatings of optical elements G02B 1/10)
U C03C 17/001	• {General methods for coating; Devices therefor}
U C03C 17/003	• • {for hollow ware, e.g. containers}
C03C 17/004	• • • {-Coating the inside}
C03C 17/005	• • • {-Coating the outside}
U C03C 17/34	• with at least two coatings having different compositions (C03C 17/44 takes precedence)
U C03C 17/36	• • at least one coating being a metal
C03C 17/3602	• • • {-the metal being present as a layer}
C03C 17/3605	• • • • {-Coatings of the type glass/metal/inorganic compound }
C03C 17/3607	• • • • {-Coatings of the type glass/inorganic compound/metal }
C03C 17/361	• • • • {-Coatings of the type glass/metal/inorganic compound/metal/inorganic compound/other}
C03C 17/3613	• • • • {-Coatings of type glass/inorganic compound/metal/inorganic compound/metal/other }

C03C 17/3615	• • • {Coatings of the type glass/metal/other inorganic layers, at least one layer being non-metallic}
C03C 17/3618	• • • {Coatings of type glass/inorganic compound/other inorganic layers, at least one layer being metallic }
C03C 17/3621	• • • {one layer at least containing a fluoride }
C03C 17/3623	• • • {one layer at least containing a chloride, bromide or iodide }
C03C 17/3626	• • • {one layer at least containing a nitride, oxynitride, boronitride or carbonitride }
C03C 17/3628	• • • {one layer at least containing a sulfide }
C03C 17/3631	• • • {one layer at least containing a selenide or telluride }
C03C 17/3634	• • • {one layer at least containing carbon, a carbide or oxycarbide }
C03C 17/3636	• • • {one layer at least containing silicon, hydrogenated silicon or a silicide }
C03C 17/3639	• • • {Multilayers containing at least two functional metal layers }
C03C 17/3642	• • • {the multilayer coating containing a metal layer }
C03C 17/3644	• • • {the metal being silver }
C03C 17/3647	• • • {in combination with other metals, silver being more than 50% }
C03C 17/3649	• • • {made of metals other than silver }
C03C 17/3652	• • • {the coating stack containing at least one sacrificial layer to protect the metal from oxidation }
C03C 17/3655	• • • {the multilayer coating containing at least one conducting layer }
C03C 17/3657	• • • {the multilayer coating having optical properties }
C03C 17/366	• • • • {Low-emissivity or solar control coatings }
C03C 17/3663	• • • • {specially adapted for use as mirrors }
C03C 17/3665	• • • • {specially adapted for use as photomask}
C03C 17/3668	• • • {the multilayer coating having electrical properties }
C03C 17/3671	• • • • {specially adapted for use as electrodes }
C03C 17/3673	• • • • {specially adapted for use in heating devices for rear window of vehicles}
C03C 17/3676	• • • • {specially adapted for use as electromagnetic shield}
C03C 17/3678	• • • • {specially adapted for use in solar cells }
C03C 17/3681	• • • {the multilayer coating being used in glazing, e.g. windows or windscreens }
C03C 17/3684	• • • {the multilayer coating being used for decoration purposes }
C03C 17/3686	• • • {the multilayer coating being used for ovens }
C03C 17/3689	• • • {one oxide layer being obtained by oxidation of a metallic layer }
C03C 17/3692	• • • {one metallic layer being obtained by reduction of an oxide layer }
C03C 17/3694	• • • {one layer having a composition gradient through its thickness }
C03C 17/3697	• • • {one metallic layer at least being obtained by electroless plating}
U C03C 23/00	Other surface treatment of glass not in the form of fibres or filaments
C03C 23/009	• {Poling glass}
U C03C 25/00	Surface treatment of fibres or filaments from glass, minerals, or slags {(woven fabrics D03; non-woven fabrics D04; treatment of fabrics in general or non-chemical aspects of treatment of glass fabrics D06M)}
C03C 25/007	• {by solution impregnating; solution doping or molecular stuffing of porous glass}
U C03C 25/10	• by coating

- U C03C 25/104 • • {to obtain optical fibres}
- U C03C 25/107 • • • {with inorganic coatings}
- C03C 25/1085 • • • • {Multiple inorganic coatings}
- C03C 25/109 • • • {with at least one organic coating and at least one inorganic coating}
- C03C 25/1095 • • {to obtain coated fabrics}
- C03C 25/70 • Cleaning, e.g. for reuse ({[C03C 25/002](#)}, [C03C 25/62](#) and [C03C 25/66](#) take precedence)

- U C03C 2214/00 **Nature of the non-vitreous component**
- C03C 2214/17 • in molecular form (*for molecular composites*)(~~for molecular composites~~)

Project: N/A (C04B)**C04B**

LIME, MAGNESIA; SLAG; CEMENTS; COMPOSITIONS THEREOF, e.g. MORTARS, CONCRETE OR LIKE BUILDING MATERIALS; ARTIFICIAL STONE(~~roofing granules [E04D 7/005](#)~~); **CERAMICS** (~~devitrified glass-ceramics [C03C 10/00](#)~~); **REFRACTORIES; TREATMENT OF NATURAL STONE**

NOTE

In this subclass, the following terms or expressions are used with the meanings indicated:

- "fillers" includes pigments, aggregates and fibrous reinforcing materials;
- "active ingredients" includes processing aids or property improvers, e.g. grinding aids used after the burning process or used in the absence of a burning process;
- "mortars", "concrete" and "artificial stone" are to be considered as a single group of materials, and therefore, in the absence of an indication to the contrary, they include mortar, concrete and other cementitious compositions.

In groups [C04B 7/00](#) to [C04B 32/00](#) , in the absence of an indication to the contrary, classification is made in the last appropriate place.

A composition classified in groups [C04B 26/00](#) or [C04B 28/00](#) is also classified in groups [C04B 14/00](#) to [C04B 24/00](#) if a filler or active ingredient is of interest.

In groups [C04B 2/00](#) to [C04B 32/00](#) and [C04B 38/00](#) to [C04B 41/00](#) it is desirable to classify the individual constituents of the mixtures, or other aspects relating to the mixtures or constituents, using Combination Sets with symbols chosen from groups [C04B 2/00](#) to [C04B 41/00](#) .

In groups [C04B 2/00](#) to [C04B 32/00](#) and [C04B 38/00](#) to [C04B 41/00](#) it is desirable to classify the function of the individual constituents of the mixtures, or other aspects relating to the properties or uses of the mixtures or products obtained, using Combination Sets with symbols chosen from groups [C04B 2103/00](#) to [C04B 2111/00](#) .

Groups [C04B 20/123](#) and [C04B 20/126](#) are used for indexing purposes only of documents classified in [C04B 20/12](#)

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

C04B 5/02 covered by [B01J 2/00](#) ,
C21B 3/06
C04B 33/132 to [C04B 33/138](#) covered by

C04B 2/00

Lime, magnesia or dolomite (-hydraulic lime cements [C04B 7/34](#)-)

C04B 2/02

- Lime{(-obtaining $\text{Ca}(\text{OH})_2$ otherwise than by simple slaking of quick lime [C01F 11/02](#)-)}

C04B 2/04

- • Slaking{(-simultaneous dehydrating of gypsum and slaking of lime [C04B 11/022](#)-)}

C04B 2/10

- Preheating, burning calcining or cooling (-decarbonation during burning of cement raw materials [C04B 7/43](#) ; { obtaining CaO or MgO otherwise than by thermal decomposition of the corresponding carbonates [C01F 11/02](#) , [C01F 5/02](#) })

C04B 2/12

- • in shaft or vertical furnaces (-shaft or vertical furnaces in general [F27B 1/00](#)-)

C04B 5/00

Treatment of {metallurgical}slag (-manufacture of slag wool [C03B](#) ; in, or for, the production of metals [C21B](#) , [C22B](#)-); Artificial stone from molten {metallurgical}slag (-mechanical aspects [B28B 1/54](#)-){ other cast stone [C04B 32/005](#)-}

C04B 5/06

- Ingredients, other than water, added to the molten slag {or to the granulating medium or before remelting}; Treatment with gases or gas generating compounds, e.g. to obtain porous slag

C04B 7/00

Hydraulic cements (-calcium sulfate cements [C04B 11/00](#)-)

U C04B 7/02

- Portland cement

C04B 7/06

- • using alkaline raw materials (-[C04B 7/60](#) takes precedence-)

C04B 7/12

- Natural pozzuolanes; Natural pozzuolana cements; {Artificial pozzuolanes or artificial pozzuolana cements other than those obtained from waste or combustion residues, e.g. burned clay; Treating inorganic materials to improve their pozzuolanic characteristics} (-cements containing slag [C04B 7/14](#)-)

C04B 7/14

- Cements containing slag (-slags from waste incineration [C04B 7/28](#)-)

U C04B 7/147

- • Metallurgical slag

U C04B 7/153

- • • Mixtures thereof with other inorganic cementitious materials or other activators

- C04B 7/17
 - • • with calcium oxide containing activators{(-C04B 7/1535 takes precedence-)}
- C04B 7/21
 - • • with calcium sulfate containing activators{(-C04B 7/1535 takes precedence-)}
- U C04B 7/24
 - Cements from oil shales, residues or waste other than slag
- C04B 7/26
 - • from raw materials containing flue dust,{i.e. fly ash(-C04B 7/243 takes precedence-)}
- C04B 7/28
 - • from combustion residues,{e.g. ashes or slags from waste incineration} ({C04B 7/243 } , C04B 7/26 take precedence-)
- C04B 7/345
 - Hydraulic cements not provided for in one of the groups C04B 7/02 to C04B 7/34
- U C04B 7/36
 - Manufacture of hydraulic cements in general
- C04B 7/361
 - • {Condition or time responsive control in hydraulic cement manufacturing processes (-controlling or regulating in general G05 ; F27B 7/42 takes precedence-)}
- C04B 7/38
 - • Preparing or treating the raw materials individually or as batches,{e.g. mixing with fuel; (-C04B 7/362 takes precedence-)}
- C04B 7/40
 - • • Dehydrating; Forming, e.g. granulating (-apparatus for granulating B01J 2/00-)
- C04B 7/42
 - • • Active ingredients added before, or during, the burning process (-after the burning process C04B 22/00 , C04B 24/00-)
- C04B 7/43
 - • Heat treatment, e.g. precalcining, burning, melting; Cooling{(-aspects only relating to the installation F27B-)}
- U C04B 7/44
 - • • Burning; Melting
- C04B 7/4407
 - • • • {Treatment or selection of the fuel therefor, e.g. use of hazardous waste as secondary fuel (-fuels in general C10L-); Use of particular energy sources, e.g. waste hot gases from other processes}
- C04B 7/4492
 - • • • {Inhibiting the formation of or eliminating incrustations in the cement kiln (-removing incrustations from rotary-drum furnaces F27B 7/2075-)}
- C04B 7/48
 - • Clinker treatment (-C04B 7/47 takes precedence-)
- U C04B 7/52
 - • • Grinding;{After-treatment of ground cement}
- C04B 7/522
 - • • • {After-treatment of ground cement (-C04B 7/368 takes precedence-)}
- C04B 7/60
 - • Methods for eliminating alkali metals or compounds thereof,{e.g. from the raw materials or during the burning process; methods for eliminating other harmful components(-avoiding environmental pollution C04B 7/364-)}
- U **C04B 9/00**
 - Magnesium cements or similar cements**
- C04B 9/20
 - Manufacture, e.g. preparing the batches (-preheating, burning, calcining or cooling lime stone, magnesite or dolomite C04B 2/10-)
- U **C04B 11/00**
 - Calcium sulfate cements**
- C04B 11/02
 - {Methods and apparatus for}dehydrating gypsum{(-for other purposes than cement manufacture C01F 11/466-)}
- C04B 11/028
 - • Devices therefor {characterised by the type of calcining devices used therefor or by the type of hemihydrate obtained}
- C04B 11/032
 - • • for the wet process, e.g. dehydrating in solution or under saturated vapour conditions,{i.e. to obtain alpha-hemihydrate(-C04B 11/0281 to C04B 11/0288 take precedence-)}
- C04B 11/036
 - • • for the dry process, e.g. dehydrating in a fluidised bed or in a rotary kiln, {i.e. to obtain beta-hemihydrate(-C04B 11/0281 to C04B 11/0288 take precedence-)}

- C04B 11/05 • obtaining anhydrite,{e.g. Keene`s cement} (-C04B 11/028 takes precedence-)
- C04B 11/26 • {strating from chemical gypsum}; starting from phosphogypsum or from waste, e.g. purification products of smoke (-C04B 11/02 takes precedence; chemical purification of smoke, fumes or exhaust gases B01D 53/00 { purification of gypsum C01F 11/46 })
- C04B 11/28 • Mixtures thereof with other inorganic cementitious materials (-C04B 7/04 , C04B 7/153 take precedence-)

C04B 12/00**Cements not provided for in groups C04B 7/00 to C04B 11/00**

- C04B 12/02 • Phosphate cements (-in, or for, the manufacture of ceramics C04B 33/00 , C04B 35/00-)
- C04B 12/04 • Alkali metal or ammonium silicate cements {Alkyl silicate cements; Silica sol cements; Soluble silicate cements} (-alkali metal silicates per se, their preparation C01B 33/32 ; ammonium silicates per se, their preparation C01C 1/00-)

**C04B 14/00 -
C04B 20/00****Use of materials as fillers (-ceramics C04B 33/00 , C04B 35/00 ; reinforcing elements for building materials E04C 5/00-)****C04B 14/00****Use of inorganic materials as fillers, e.g. pigments, for mortars, concrete or artificial stone; Treatment of inorganic materials specially adapted to enhance their filling properties in mortars, concrete or artificial stone (-expanding or defibrillating materials C04B 20/00-)**NOTE

Fillers with a well-defined shape other than granular are considered to be reinforcing elements and thus are classified in E04C 5/00 . However, if they are only characterised by their composition, classification is made in C04B only

- C04B 14/005 • {Inorganic fillers with a shape other than granular or fibrous} (-carbon nanotubes C04B 14/026-)
- U C04B 14/02 • Granular materials,{e.g. micro-balloons}
- U C04B 14/04 • • Silica-rich materials; Silicates
- C04B 14/045 • • {Alkali-metal containing silicates, e.g. petalite} (-waterglass C04B 12/04-)
- U C04B 14/06 • • • Quartz; Sand
- C04B 14/062 • • • • {Micro-silica, e.g. colloidal silica} (-preparing micro-silica slurries or suspensions C04B 18/148-)
- C04B 14/10 • • • Clay{-sepiolite C04B 14/042 ; grog C04B 18/025-}
- C04B 14/108 • • • • {Shale, slate} (-colliery shale C04B 18/125-)
- C04B 14/14 • • • Minerals of vulcanic origin{-granite C04B 14/048-}
- C04B 14/20 • • • Mica; Vermiculite{-Mechanical splitting B28D-}
- C04B 14/30 • • Oxides other than silica{ ferrites C04B 14/363-}
- C04B 14/306 • • • {Zirconium oxide} (-zircon C04B 14/046-)
- U C04B 14/36 • • Inorganic materials not provided for in groups{ C04B 14/022 and } C04B 14/04 to C04B 14/34
- C04B 14/365 • • • {Gypsum} (-synthetic gypsum C04B 18/0445 , C04B 18/064-)
- U C04B 14/38 • Fibrous materials; Whiskers
- C04B 14/386 • • {Carbon} (-carbon nanotubes C04B 14/026-)
- U C04B 14/42 • • Glass
- C04B 14/44 • • • Treatment for enhancing alkali resistance{ composition of alkali resistant glass fibres C03C 13/00 ; coating of glass fibres C03C 25/10-}
- C04B 14/46 • • Rock wool; {Ceramic or silicate fibres} (-C04B 14/40 , C04B 14/42 take precedence-)

	C04B 24/12	• Nitrogen containing compounds {organic derivatives of hydrazine(-hydrazine C04B 22/00 -)}
U	C04B 24/16	• Sulfur-containing compounds
U	C04B 24/20	• • Sulfonated aromatic compounds
	C04B 24/22	• • • Condensation {or polymerisation}products thereof
		NOTE In this group the following term is used with the meaning indicated: - "aldehydes" also covers other organic compounds reacting as aldehydes, e.g. glyoxylic acid
	C04B 24/24	• Macromolecular compounds {(- C04B 24/14 takes precedence; macromolecular compounds comprising sulfonate or sulfate groups C04B 24/16 -)}
	C04B 24/26	• • obtained by reactions only involving carbon-to-carbon unsaturated bonds{(- C04B 24/243 takes precedence-)}
	C04B 24/28	• • obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds{(- C04B 24/243 takes precedence-)}
	C04B 24/34	• • Natural resins, e.g. rosin{(- C04B 24/243 takes precedence-)}
	C04B 24/36	• • Bituminous materials, e.g. tar, pitch{(- C04B 24/243 takes precedence-)}
	C04B 24/38	• • Polysaccharides or derivatives thereof{(- C04B 24/243 takes precedence-)}
	C04B 24/40	• Compounds containing silicon, titanium or zirconium {or other organo-metallic compounds; Organo-clays; Organo-inorganic complexes}
	C04B 26/00 - C04B 32/00	<u>Compositions of mortars, concrete or artificial stone (-artificial stone from molten slag C04B 5/00-)</u>
	C04B 26/00	Compositions of mortars, concrete or artificial stone, containing only organic binders,{e.g. polymer or resin concrete(-mechanical aspects moulding polymer or resin concrete B29C 67/242-)}
U	C04B 26/02	• Macromolecular compounds
	C04B 26/26	• • Bituminous materials, e.g. tar, pitch{ C08L 95/00 takes precedence-}
U	C04B 26/28	• • Polysaccharides or derivatives thereof
	C04B 26/285	• • • {Cellulose or derivatives thereof, e.g. starch {(- C04B 26/24 takes precedence-)}
U	C04B 28/00	Compositions of mortars, concrete or artificial stone, containing inorganic binders or the reaction product of an inorganic and an organic binder, e.g. polycarboxylate cements
		NOTE While using Combination Sets in this main group, the presence of an organic binder is indicated with symbols chosen from group C04B 24/00 , and the presence of a supplementary inorganic binder with symbols chosen from groups C04B 7/00 to C04B 12/00
	C04B 28/001	• {containing unburned clay {(-polymer binder - clay mixtures used in well cementing C09K 8/44 -)}
U	C04B 28/02	• containing hydraulic cements other than calcium sulfates

- C04B 28/021
- {Ash cements, e.g. fly ash cements (-fly ash as filler [C04B 18/08](#)); Cements based on incineration residues, e.g. alkali-activated slags from waste incineration (-alkali-activated combustion residues as such [C04B 7/243](#); mixtures of the lime-pozzuolane type [C04B 28/18](#)); Kiln dust cements}
- C04B 28/06
- Aluminous cements (-monolithic refractories or refractory mortars [C04B 35/66](#)-)
- C04B 28/14
- containing calcium sulfate cements{ gypsum-paper plates [E04C](#)-}
- C04B 28/24
- containing alkyl, ammonium or metal silicates; containing silica sols{(-reaction mixtures resulting in mineral polymers [C04B 28/006](#); polymeric reaction products of alkali metal silicates with isocyanates [C08G 18/3895](#)-)}
- C04B 28/30
- containing magnesium cements {or similar cements}(-magnesium oxide cements [C04B 28/10](#)-)
- U C04B 32/00 Artificial stone not provided for in other groups of this subclass**
- C04B 32/005
- {Artificial stone obtained by melting at least part of the composition, e.g. metal (-[C04B 28/36](#) and [C03C](#) take precedence-)(-cast stone from molten slag [C04B 5/00](#); artificial stone obtained by melting the polymeric ingredient of the composition [C04B 26/00](#)-)}
- C04B 32/02
- with reinforcements{(-contains no documents; reinforcing elements [E04C 5/00](#)-)}
- NOTE**
This group is only used for indexing purposes
- C04B 33/00 Clay-wares (-monolithic refractories or refractory mortars [C04B 35/66](#); porous products [C04B 38/00](#)-)**
- NOTE**
In groups [C04B 33/00](#) to [C04B 33/36](#), from 01-10-2008 onwards, the indexing codes of groups [C04B 2235/00](#) to [C04B 2235/9646](#) are used (with the exception of **C04B2235/34H**, **C04B2235/602N**, [C04B 2235/604](#) and [C04B 2235/9661](#)) to identify aspects relating to ceramic starting mixtures and sintered ceramic products
- U C04B 33/02**
- Preparing or treating the raw materials individually or as batches
- C04B 33/13
- Compounding ingredients (-[C04B 33/36](#), [C04B 35/71](#) take precedence; { pigments for ceramics [C09C 1/0009](#) })
- C04B 33/132
- Waste materials; Refuse; {Residues} (-**C04B 33/16 takes precedence**; **C04B 33/16 takes precedence**; { waste glass [C04B 33/13](#) })
- C04B 33/1321
- {Waste slurries, e.g. harbour sludge, industrial muds (-slurries of specific well-defined waste streams, e.g. phosphate muds, other than red mud, [C04B 33/132](#)-)}
- C04B 33/1325
- {Hazardous waste other than combustion residues (-dredging sludge [C04B 33/1321](#)-)}
- C04B 33/135
- Combustion residues, e.g. fly ash, incineration waste{(-silica fume [C04B 33/132](#)-)}
- C04B 33/20
- for dry-pressing (-[C04B 33/13](#) takes precedence-)
- C04B 33/28
- Slip casting (-mechanical features [B28B 1/26](#)-)

U C04B 35/00

Shaped ceramic products characterised by their composition {(porous ceramic products [C04B 38/00](#); ceramic articles characterised by particular shape, see the relevant classes, e.g. linings for casting ladles, tundishes, cups or the like [B22D 41/02](#); ceramic substrates for microelectronic semi-conductors [H01L 23/15](#))}; Ceramics compositions (containing free metal bonded to carbides, diamond, oxides, borides, nitrides, silicides, e.g. cermets, or other metal compounds, e.g. oxynitrides or sulfides other than as macroscopic reinforcing agents [C22C](#); {shaping of ceramics [B28B](#)}); Processing powders of inorganic compounds preparatory to the manufacturing of ceramic products {(Chemical preparation of powders of inorganic compounds [C01](#); infiltration of sintered ceramic preforms with molten metal [C04B 41/51](#))}

NOTES

In this group, in the absence of an indication to the contrary, compositions are classified according to the constituent present in the highest proportion by weight.

In this group, magnesium is considered as an alkaline earth metal.

In this group, a composite is considered as a sintered material containing more than one phase, where the secondary phases are not resulting from sintering aids

In this group, fine ceramics are considered as products having a polycrystalline, fine-grained microstructure, e.g. of dimensions below 100 micrometers.

The production of ceramic powder is classified in this group in so far as it relates to the preparation of powder with specific characteristics.

In groups [C04B 35/00](#) to [C04B 35/83](#), from 01-01-2005 onwards, the indexing codes of groups [C04B 2235/00](#) to [C04B 2235/9692](#) are used to identify aspects relating to ceramic starting mixtures and sintered ceramic products

WARNING

Attention is drawn to WARNINGS 3 and 4 after subclass title

- U C04B 35/01
 - based on oxide ceramics
- C04B 35/013
 - • {containing carbon} (~~C04B 35/103~~ takes precedence-)
- U C04B 35/03
 - • based on magnesium oxide, calcium oxide or oxide mixtures derived from dolomite
- U C04B 35/04
 - • • based on magnesium oxide
- U C04B 35/043
 - • • • Refractories from grain sized mixtures
- U C04B 35/047
 - • • • • containing chromium oxide or chrome ore
- C04B 35/0476
 - • • • • {obtained from prereacted sintered grains ("*simultaneous sinter*") (~~"simultaneous-sinter"~~)}
- U C04B 35/10
 - • based on aluminium oxide
- U C04B 35/101
 - • • Refractories from grain sized mixtures
- C04B 35/1015
 - • • • {containing refractory metal compounds other than those covered by [C04B 35/103](#) to [C04B 35/106](#)-}
- C04B 35/103
 - • • • containing non-oxide refractory materials, e.g. carbon (~~C04B 35/106~~ takes precedence-)
- U C04B 35/111
 - • • Fine ceramics
- C04B 35/1115
 - • • • {Minute sintered entities, e.g. sintered abrasive grains or shaped particles such as platelets} (~~-abrasives C09K 3/14-~~)
- C04B 35/12
 - • based on chromium oxide (~~C04B 35/047~~ and [C04B 35/105](#) take precedence-)
- C04B 35/16
 - • based on silicates other than clay ({-zircon [C04B 35/48](#)-})
- U C04B 35/18
 - • • rich in aluminium oxide

C04B 35/185	• • • Mullite {3Al ₂ O ₃ -2SiO ₂ }
C04B 35/195	• • • Alkaline earth aluminosilicates, e.g. cordierite {or anorthite}
C04B 35/20	• • rich in magnesium oxide, {e.g. forsterite (-C04B 35/195 takes precedence-)}
C04B 35/22	• • rich in calcium oxide, {e.g. wollastonite (-C04B 35/195 takes precedence-)}
C04B 35/42	• • based on chromites (-C04B 35/047 and C04B 35/105 take precedence-)
C04B 35/46	• • based on titanium oxide or titanates (-containing also zirconium or hafnium oxides, zirconates or hafnates C04B 35/49-)
U C04B 35/462	• • based on titanates
U C04B 35/465	• • • based on alkaline earth metal titanates
U C04B 35/468	• • • • based on barium titanates
U C04B 35/4682	• • • • • {based on BaTiO ₃ perovskite phase}
C04B 35/4684	• • • • • {containing lead compounds (-C04B 35/472 takes precedence-)}
U C04B 35/4686	• • • • • {based on phases other than BaTiO ₃ perovskite phase}
C04B 35/4688	• • • • • {containing lead compounds (-C04B 35/472 takes precedence-)}
C04B 35/50	• based on rare-earth compounds {(-non-oxide rare earth compounds C04B 35/5156-)}
C04B 35/51	• based on compounds of actinides ({ non-oxide actinide compounds C04B 35/5158 } ; nuclear fuel materials G21C 3/62-)
U C04B 35/515	• based on non-oxide ceramics
U C04B 35/52	• • based on carbon, e.g. graphite
C04B 35/522	• • {Graphite (-C04B 35/536 takes precedence-)}
C04B 35/536	• • • based on expanded graphite {or complexed graphite}
C04B 35/547	• • based on sulfides or selenides {or tellurides}
C04B 35/56	• • based on carbides {or oxycarbides (-containing free metal binder C22C 29/00-)}
U C04B 35/565	• • • based on silicon carbide
C04B 35/571	• • • obtained from {Si-containing} polymer precursors {or organosilicon monomers}
C04B 35/573	• • • obtained by reaction sintering {or recrystallisation}
C04B 35/58	• • based on borides, nitrides, [i.e. nitrides, oxynitrides, carbonitrides or oxycarbonitrides] or silicides (-containing free binder metal C22C 29/00-)
U C04B 35/583	• • • based on boron nitride
C04B 35/5831	• • • • based on cubic boron nitrides {or Wurtzitic boron nitrides, including crystal structure transformation of powder}
U C04B 35/584	• • • based on silicon nitride
C04B 35/589	• • • obtained from {Si-containing} polymer precursors {or organosilicon monomers}
U C04B 35/622	• Forming processes; Processing powders of inorganic compounds preparatory to the manufacturing of ceramic products
NOTE In groups C04B 35/622 and subgroups indexing codes are given for aspects relating to the preparation, properties or mechanical treatment or to heat treatments of green bodies. The codes are chosen from C04B 2235/60 to C04B2235/66P	
C04B 35/62204	• • {using waste materials or refuse (-clay-ware containing waste materials C04B 33/132-)}

- C04B 35/62209
 - • • {using woody material, remaining in the ceramic products (-to obtain porous material by burning out [C04B 38/06](#)-)}
 - C04B 35/62222
 - • {obtaining ceramic coatings (-coating of mortars, concrete, artificial or natural stone or ceramics [C04B 41/45](#) ; laminated ceramic products [B32B 18/00](#) ; coating metallic materials [C23](#); coating of glass [C03C 17/00](#) , applying ceramic coatings on silicon for semi-conductor purposes [H01L](#)-)}
 - U C04B 35/62227
 - • {obtaining fibres}
 - U C04B 35/62231
 - • • {based on oxide ceramics}
 - C04B 35/6225
 - • • • {Fibres based on zirconium oxide, e.g. zirconates such as PZT}{~~0807~~}
 - C04B 35/62272
 - • • {based on non-oxide ceramics (-carbon nanotubes [C01B 31/0206](#) ; carbon fibers [D01F 9/12](#)-)}
 - U C04B 35/62277
 - • • • {Fibres based on carbides}
 - C04B 35/62281
 - • • • • {based on silicon carbide (-[C04B 35/571](#) takes precedence-)}
 - U C04B 35/62286
 - • • • {Fibres based on nitrides}
 - C04B 35/62295
 - • • • • {based on silicon nitride (-[C04B 35/589](#) takes precedence-)}
 - C04B 35/626
 - • Preparing or treating the powders individually or as batches{(-pigments for ceramics [C09C 1/0009](#)); preparing or treating macroscopic reinforcing agents for ceramic products, e.g. fibres; mechanical aspects section B}
- WARNING**
Groups [C04B 35/62605](#) to [C04B 35/62695](#) are not complete, see also other subgroups of [C04B 35/00](#) , e.g. [C04B 35/626](#)
- U C04B 35/62605
 - • • {Treating the starting powders individually or as mixtures}
 - C04B 35/62695
 - • • • {Granulation or pelletising (-devices for shaping artificial aggregates from ceramic mixtures [B28B 1/004](#)-)}
 - C04B 35/628
 - • • Coating the powders {or the macroscopic reinforcing agents}
 - U C04B 35/63
 - • • using additives specially adapted for forming the products,{e.g.. binder binders}
 - U C04B 35/632
 - • • • Organic additives
 - C04B 35/634
 - • • • • Polymers (-[C04B 35/636](#) takes precedence-)
 - C04B 35/64
 - • Burning or sintering processes (-[C04B 33/32](#) takes precedence; { powder metallurgy [B22F](#) })
 - C04B 35/65
 - • • Reaction sintering of free metal- or free silicon-containing compositions{(-[C04B 35/573](#) , [C04B 35/591](#) take precedence-)}
 - U C04B 35/653
 - • Processes involving a melting step
 - C04B 35/657
 - • • for manufacturing refractories (-[C04B 35/05](#) , [C04B 35/107](#) , [C04B 35/484](#) take precedence-)
 - C04B 35/66
 - Monolithic refractories or refractory mortars, including those whether or not containing clay{(-making or repairing of linings [F27D 1/16](#)-)}
 - C04B 35/71
 - Ceramic products containing macroscopic reinforcing agents (-[C04B 35/66](#) takes precedence; { infiltration of a porous ceramic matrix with a material forming a non-ceramic phase [C04B 41/00](#) , reaction infiltration with Si in order to form SiC [C04B 35/573](#) , in order to form Si₃N₄ [C04B 35/591](#) })
- NOTE**
In groups [C04B 35/71](#) to [C04B 35/83](#) the composition of the ceramic products is also classified in groups [C04B 35/01](#) to [C04B 35/597](#)
- U C04B 35/78
 - • containing non-metallic materials
 - C04B 35/80
 - • • Fibres, filaments, whiskers, platelets, or the like{(-carbon reinforced with carbon fibres see [C04B 35/83](#)-)}

C04B 37/00

Joining burned ceramic articles with other burned ceramic articles or other articles by heating (laminated products [B32B](#), [E04C](#); { soldering and welding materials [B23K 35/24](#) })

NOTE

In groups [C04B 37/00](#) to [C04B 37/04](#) , from 01-10-2008 onwards, features relating to interlayers, additional compositional information or further processing are indexed with codes chosen from [C04B 2237/00](#) to **C04B2237/70R**

WARNING

Groups [C04B 37/005](#) , [C04B 37/006](#) , [C04B 37/025](#) and [C04B 37/026](#) are no longer used for classification as from September 1, 2008. Aspects relating to interlayers are from that date indexed by codes chosen from [C04B 2237/02](#) to [C04B 2237/16](#)

- U C04B 37/02 • with metallic articles
- C04B 37/023 • • {characterised by the interlayer used ([-C04B 37/028](#) takes precedence-)}
- U C04B 37/04 • with articles made from glass

WARNING

Groups [C04B 37/042](#), [C04B 37/045](#) and [C04B 37/047](#) are not complete, see also [C04B 37/04](#)

- C04B 37/045 • • {characterised by the interlayer used ([-C04B 37/047](#) takes precedence-)}

C04B 38/00

Porous mortars, concrete, artificial stone or ceramic ware; Preparation thereof ([-treating slag with gases or gas generating material \[C04B 5/06\]\(#\) ; { expanded graphite \[C04B 35/536\]\(#\) } \)](#)

NOTE

Porous materials based on fibres, i.e. materials where the porosity is due to the spaces between the fibres, are not classified in this maingroup, but in one or more of the other relevant maingroups of this subclass, e.g. in [C04B 30/02](#)

- C04B 38/0003 • {containing continuous channels, e.g. of the "dead-end" type or obtained by pushing bars in the green ceramic product ([-B28B](#) takes precedence-)}
- C04B 38/0006 • {Honeycomb structures ([-from one or more corrugated sheets by winding or stocking \[C04B 38/0083\]\(#\)- \)](#)}
- C04B 38/009 • {Porous or hollow ceramic granular materials, e.g. micro-balloons ([-C04B 18/027](#) , [C04B 20/002](#) take precedence-)}
- U C04B 38/04 • by dissolving-out added substances
- C04B 38/045 • • {the dissolved-out substance being a monolithic element having approximately the same dimensions as the final article, e.g. a prepreg obtained by bonding together dissolvable particles ([-C04B 38/0022](#) takes precedence-)}
- C04B 38/06 • by burning-out added substances {by burning natural expanding materials or by sublimating or melting out added substances}

NOTE

Documents in which the characteristic feature is the choice of meltable or sublimable material or the physical aspects of the porous body obtained are classified accordingly, and symbols [C04B 38/0605](#) or [C04B 38/061](#) are allocated in Combination Sets.

- C04B 38/0615 • • {the burned-out substance being a monolithic element having approximately the same dimensions as the final article, e.g. a porous polyurethane sheet or a prepreg obtained by bonding together resin particles ([-C04B 38/0022](#) takes precedence-)}
- U C04B 38/063 • • {Preparing or treating the raw materials individually or as batches}

- C04B 38/0635 . . . {Compounding ingredients (~~C04B 38/0615~~ takes precedence-)}
- U C04B 38/0645 . . . {Burnable, meltable, sublimable materials}
- U C04B 38/065 . . . {characterised by physical aspects, e.g. shape, size or porosity}

NOTE

Documents having this group as classification symbol or as part of a Combination Set can also get symbol [C04B 38/0051](#) in the Combination Set, if the importance of the size of the pores obtained is emphasized.

- C04B 38/0655 {Porous materials (~~C04B 38/0625~~ takes precedence-)}
- C04B 38/067 {Macromolecular compounds (~~C04B 38/062~~ takes precedence; polysaccharides [C04B 38/0645](#)-)}
- C04B 38/069 {Other materials, e.g. catalysts (~~C04B 33/13~~ , [C04B 35/00](#) take precedence-)}
- C04B 38/10 . by using foaming agents (~~C04B 38/02~~ takes precedence-){or by using mechanical means, e.g. adding preformed foam}

C04B 40/00

Processes, in general, for influencing or modifying the properties of mortars, concrete or artificial stone compositions, e.g. their setting or hardening ability (~~active ingredients [C04B 22/00](#) to [C04B 24/00](#) ; hardening of a well-defined composition [C04B 26/00](#) to [C04B 28/00](#) ; making porous, cellular or lightening [C04B 38/00](#) ; mechanical aspects [B28](#) , e.g. conditioning the materials prior to shaping [B28B 17/02](#))~~)

- U C04B 40/0028 . {Aspects relating to the mixing step of the mortar preparation}
- C04B 40/0032 . . {Controlling the process of mixing, e.g. adding ingredients in a quantity depending on a measured or desired value (~~B28C 7/00~~ takes precedence-)}
- C04B 40/0057 . . {Energetic mixing (~~C04B 40/005~~ takes precedence-)}
- U C04B 40/02 . Selection of the hardening environment

NOTE

In this group the following term is used with the meaning indicated:
- "hardening" covers also setting, pre-curing and curing

- C04B 40/0259 . . {Hardening promoted by a rise in pressure (~~C04B 40/024~~ takes precedence-)}
- C04B 40/0263 . . {Hardening promoted by a rise in temperature (~~C04B 40/024~~ takes precedence-)}
- C04B 40/0268 . . . {Heating up to sintering temperatures (~~C04B 41/0072~~ takes precedence-)}
- C04B 40/0277 . . {Hardening promoted by using additional water, e.g. by spraying water on the green concrete element (~~steam hardening [C04B 40/024](#))~~}
- C04B 40/04 . Preventing evaporation of the mixing water (~~permanent coverings [C04B 41/00](#))~~)

C04B 41/00

After-treatment of mortars, concrete, artificial stone or ceramics; Treatment of natural stone (~~conditioning of the materials prior to shaping [C04B 40/00](#) ; applying liquids or other fluent materials to surfaces, in general [B05](#) ; grinding or polishing [B24](#) ; apparatus or processes for treating or working shaped articles of clay or other ceramic compositions, slag or mixtures containing cementitious material [B28B 11/00](#) ; working stone or stone-like materials [B28D](#) ; glazes, other than cold glazes, [C03C 8/00](#) ; etching, surface-brightening or pickling compositions [C09K 13/00](#))~~)

NOTE

In this group, multiple classification is made according to the following rules:

when the substrate to be treated is of the artificial stone type, e.g. concrete, classification is made in the range [C04B 41/00](#) to [C04B 41/5392](#) as well as in the range [C04B 41/60](#) to [C04B 41/72](#) when the substrate to be treated is of the ceramic type, classification is made in the range [C04B 41/00](#) to [C04B 41/5392](#) as well as in the range [C04B 41/80](#) to [C04B 41/91](#)

when the substrate to be treated is a-specific, classification is made only in the range [C04B 41/00](#) to [C04B 41/5392](#)

In groups [C04B 41/0018](#) to [C04B 41/53](#), in the absence of an indication to the contrary, classification is made in the last appropriate place.

Treating, e.g. coating or impregnating, a material with the same material or with a substance which ultimately is transformed into the same material is not considered after-treatment for this group but is classified as preparation of the material, e.g. a carbon body impregnated with a carbonisable substance is classified in [C04B 35/52](#).

In groups [C04B 41/00](#) to [C04B 41/53](#), it is desirable to add the indexing codes relating to the nature of the substrate being treated. The indexing codes, which are chosen from groups [C04B 26/00](#) to [C04B 38/00](#) should be unlinked.

In groups [C04B 41/00](#) to [C04B 41/53](#), it is desirable to add the indexing codes relating to aspects of the coating composition or to the method of application. The indexing codes, which are chosen from groups [C04B 41/00](#) to [C04B 41/5392](#) should be unlinked.

Attention is drawn to internal Note (2) following the title of subclass [C04B](#).

C04B 41/0036

• {Laser treatment} (-working by laser beam [B23K 26/00](#)-)

C04B 41/0045

• {Irradiation; Radiation, e.g. with UV or IR} (-[C04B 41/0036](#) takes precedence-)

C04B 41/45

• Coating or impregnating} (-paints [C09D](#)-), {e.g. injection in masonry, partial coating of green or fired ceramics, organic coating compositions for adhering together two concrete elements} (-ion-implantation [C04B 41/0027](#)-)}

NOTES

In group [C04B 41/45](#) and sub-groups, as a general rule, classification is made according to the end products, rather than according to the starting materials, in the coating or impregnating compositions.

In groups [C04B 41/45](#) to [C04B 41/528](#) the following term is used with the meaning indicated:

- "coating" covers material applied to the substrates as powdery material or applied from the gas or liquid phase, e.g. as a slurry; it only covers the use of preformed sheet-like elements in so far as the thickness of these sheets is small compared with the thickness of the substrate and so far as the resulting product is not exclusively one of the type classifiable in [B32B](#)

U C04B 41/4505

• • {characterised by the method of application}

C04B 41/4523

• • • {applied from the molten state} (-vitreous materials [C04B 41/5022](#)-); Thermal spraying, e.g. plasma spraying}

NOTE

Coating or impregnating with a specific material in the molten state is classified according to the specific material and get symbol [C04B 41/4523](#) in Combination Sets

C04B 41/4527

• • • • {Plasma spraying} (-deposition from the gas phase using plasma [C04B 41/4533](#)-)}

- U C04B 2235/00 Aspects relating to ceramic starting mixtures or sintered ceramic products**
- NOTE**
In this group, magnesium is considered as an alkaline earth metal.
- U C04B 2235/02 • Composition of constituents of the starting material or of secondary phases of the final product
- NOTE**
Indexing codes [C04B 2235/02](#) to [C04B 2235/5481](#) are to be used only if the aspect is not trivial or not standard, e.g. if water is used as a mixing medium for a powder, whereas normally an organic mixing medium is used or if not the standard alpha-alumina is used to make an alumina ceramic but gamma-alumina in stead.
- U C04B 2235/30 • • Constituents and secondary phases not being of a fibrous nature
- NOTE**
1. Indexing codes [C04B 2235/30](#) to [C04B 2235/549](#) are to be given to constituents or additives only if:
a. it is not obvious from the end product as such that the constituent or additive has been used for making the end product.
Examples:
- in case spinel is made from a certain clay in stead of from alumina and silica, the clay is coded, - when calcium zirconate and titania are used to make calcium zirconium titanate, a code should be given for the calcium zirconate constituent while normally calcium oxide or calcium carbonate and zirconia are used. The titania constituent of the starting mixture is not coded since it is to be expected that a single metal oxide is used to make a mixed metal oxide. b. it is not obvious from the "invention information" symbols that this constituent has been used to make the end product, e.g. if the "invention information" symbol given indicates that a zirconia-alumina composite is prepared it is common practice that zirconia and alumina constituents have been used and thus no codes for zirconia or alumina are given. In the same way, if an allocation indicates that an oxide ceramic contains carbon, no code for the addition of carbon is given. However for an alumina composite product comprising titania, the main symbol for composites based on alumina is given together with an indexing code for titania.
2. In groups [C04B 2235/32](#) to [C04B 2235/349](#) oxides are considered to comprise also metal salts from which they are formed by heating.
- U C04B 2235/34 • • • Non-metal oxides, non-metal mixed oxides, or salts thereof that form the non-metal oxides upon heating, e.g. carbonates, nitrates, (oxy)hydroxides, chlorides

- C04B 2235/3418

C07D 451/00 -
C07D 521/00

Heterocyclic compounds containing condensed hetero ring systems [C07D 451/00 - C07D 517/00](#) cover compounds containing one system of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring system, with or without other non- condensed hetero rings. For the purpose of classification in groups [C07D 451/00 - C07D 519/00](#), the degree of hydrogenation of the ring system is not taken into consideration. For the purpose of classification in groups [C07D 451/00 - C07D 463/00](#), [C07D 473/00 - C07D 477/00](#), [C07D 489/00](#), [C07D 499/00 - C07D 507/00](#), the wording of the groups has to be understood, in the absence of an indication to the contrary, as including ring systems further condensed with carbocyclic rings or ring systems, but excluding ring systems further condensed with other hetero rings, either directly or through a common carbocyclic ring system, e.g. sparteine is classified in group [C07D 471/22](#), not in group [C07D 455/02](#). In groups [C07D 471/00](#), [C07D 487/00](#), [C07D 491/00 - C07D 498/00](#) or [C07D 513/00 - C07D 517/00](#), the subdivision is based on the number of relevant hetero rings.

C07D 457/00

Heterocyclic compounds containing indolo [4, 3-f, g] quinoline ring systems, e.g. derivatives of ergoline, of the formula:

lysergic acid (-compounds of the cyclic peptide type derived from ergotamine [C07D 519/02](#)-)

C07D 461/00

Heterocyclic compounds containing indolo [3,2,1-d,e] pyrido [3,2,1,j] [1,5]-naphthyridine ring systems, e.g. vincamine (-dimeric indolo alkaloids [C07D 519/04](#)-)

C07D 463/00

Heterocyclic compounds containing 1-azabicyclo [4.2.0] octane ring systems, i.e. compounds containing a ring system of the formula:

, e.g. carbacephalosporins; Such ring systems being further

condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring

WARNING

The IPC subgroups of [C07D 463/00](#), introduced in the CPC scheme in October 2007, might be temporarily incomplete as a number of documents presently classified in CPC subgroups of [C07D 463/00](#) still needs reclassification to these IPC subgroups

C07D 463/02

• Preparation (-by microbiological processes [C12P 17/18](#)-)

C07D 471/00

Heterocyclic compounds containing nitrogen atoms as the only ring hetero atoms in the condensed system, at least one ring being a six-membered ring with one nitrogen atom, not provided for by groups [C07D 451/00](#) to [C07D 463/00](#)

U C07D 471/02

• in which the condensed system contains two hetero rings

C07D 471/04

• • Ortho-condensed systems (-carbacephalosporins [C07D 463/00](#)-)

C07D 477/00

Heterocyclic compounds containing 1-azabicyclo [3.2.0] heptane ring systems, i.e. compounds containing a ring system of the formula:

, carbapenicillins, thienamycins-; Such ring systems being

further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring

C07D 477/02

NOTES

This subclass covers compounds containing saccharide radicals. (see the definitions in Note 3. below).

This subclass does not cover polysaccharides which for the purpose of this subclass are defined as having more than five saccharide radicals attached to each other by glycosidic linkages.

In this subclass, the following expressions are used with the meaning indicated:

- "saccharide radical" which is derived from acyclic polyhydroxy-aldehydes or acyclic polyhydroxy-ketones, or from their cyclic tautomers, by removing hydrogen atoms or by replacing hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium, in accordance with either of the following definitions:

It consists of an uninterrupted carbon skeleton and oxygen atoms directly attached thereto, and;

is considered to be terminated by every bond to a carbon atom of a cyclic structure and by every bond to a carbon atom having three bonds to hetero atoms, e.g. ester or nitrile radicals, and;

contains within the carbon skeleton an unbranched sequence of at the most six carbon atoms in which at least three carbon atoms at least two in the case of a skeleton having only four carbon atoms have one single bond to an oxygen atom as the only hetero bond {but at least three for compounds in which at least one carbon to oxygen bond involved in a) or b) has been replaced by a carbon bond to a hetero atom other than oxygen} , and

in a cyclic or acyclic sequence, at least one other carbon atom {that is not doubly bound to a carbon atom, e.g. glycals} has two single bonds to oxygen atoms as the only hetero bonds, or

in an acyclic sequence, at least one other carbon atom {that is not doubly bound to a carbon atom} has one double bond to an oxygen atom as the only hetero bond;

{has in the gamma or delta position in respect to the carbon atom bearing those two single bonds or this double bond to oxygen a carbon atom bearing one single bond to oxygen}

{It is also a radical derived from a radical as defined in a. above by replacing at the most four of the specified hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium;}

- "heterocyclic radical" or "hetero ring" is considered to exclude saccharide radicals as defined above

Attention is drawn to the notes following the title of class [C07](#) .

The conditions 3) a) or 4) have not to be fulfilled in respect to **C07H19/00E1**

Where a compound may exist --- to be written in Kekulé form

For the purpose of this subclass, the following definitions apply:

A "hetero ring" is a ring having at least one halogen, nitrogen, oxygen, sulfur selenium or tellurium atom as a ring member;

Two rings are "condensed" if they share at least one ring member, i.e.

"spiro" and "bridged" are considered as condensed. The term "bridged" denotes the presence of at least one fusion other than ortho, peri and spiro;

A "condensed ring system" is a ring system in which all rings are condensed among themselves;
The "number of relevant rings" in a condensed ring system equals the number of scissions necessary to convert the ring system into one acyclic chain;
The "relevant rings" in a condensed system are chosen according to the following criteria consecutively:
Lowest number of ring members
Highest number of hetero atoms as ring members
Lowest number of members shared with other rings
Last place in the classification scheme

In the absence of specific places, hydrogenated or condensed hetero rings are classified with the parent ring

In the absence of an indication to the contrary, a compound is classified in the last appropriate place

Groups [C07H 3/04](#) and [C07H 3/06](#) take precedence over [C07H 3/08](#) to [C07H15/18D](#) -with the exception of [C07H 13/06](#) , [C07H13/12U](#) , [C07H15/00F](#) , [C07H 15/06](#) , [C07H 15/08](#) , [C07H15/10D2](#) , [C07H 15/16](#) - and over [C07H 15/20](#) as far as a phenyl radical is involved; the purpose of this inversion of the last place rule is to avoid multiple classification for documents describing compounds, having a complement inhibiting activity or belonging to the "blood-group substances" occurring in tissue fluids, in secretions and at cell and tissue surfaces (e.g. antigen determinants) or forming part of cell membranes. Documents in which both disaccharides and oligosaccharides of this kind are described are only classified in [C07H 3/06](#) .

Group [C07H 9/00](#) takes precedence over [C07H 11/00](#) to [C07H 15/00](#) when at least one ring heteroatom is different from oxygen, however anhydro derivatives of nucleosides and nucleotides [C07H 19/00](#) .

Group [C07H 15/252](#) takes precedence over [C07H 17/00](#) when the naphthalene ring is further condensed to a heteroring, and over [C07H 15/26](#) when the carbocyclic ring is substituted by a hetero ring]

C07H 3/00 **Compounds containing only hydrogen atoms and saccharide radicals having only carbon, hydrogen and oxygen atoms (-preparation by hydrolysis of di- or polysaccharides [C13](#) and subgroups; separation and purification of sucrose, glucose, fructose, lactose or maltose [C13](#)-)**

C07H 3/08 • Deoxysugars; Unsaturated sugars (-1,2-dideoxy-1-enoses [C07D](#)-);
Osones{(-[C07H 3/04](#) , [C07H 3/06](#) take precedence-)}

C07H 3/10 • Anhydrosugars, e.g. epoxides{(-[C07H 3/04](#) , [C07H 3/06](#) take precedence-)}

C07H 5/00 **Compounds containing saccharide radicals in which hetero bonds to oxygen have been replaced by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium or tellurium{ when the hetero-atom is substituted [C07H 11/00](#) , [C07H 13/00](#) , [C07H 15/00](#) , [C07H 17/00](#) ; when the hetero-atom(s) form(s) part of a heteroring [C07H 9/00](#) , [C07H 19/00](#) , [C07H 21/00](#) ; (-[C07H 3/04](#) , [C07H 3/06](#) , take precedence-)}**

U C07H 5/04 • to nitrogen
C07H 5/06 • • Aminosugars{ NH-acyl [C07H 11/00](#) , [C07H 13/00](#) ; NHR or NR2
[C07H 15/00](#)-}

C07H 7/00 **Compounds containing non-saccharide radicals linked to saccharide radicals by a carbon-to-carbon bond{(-[C07H 3/04](#) , [C07H 3/06](#) take precedence-)}**

- C07H 7/02
- Acyclic radicals, e.g. glycuronic acids {gamma-lactones of 2- or 3-ketohexanoic or -pentanoic acids and derivatives thereof, (-e.g. enol forms [C07D 307/62](#)), e.g. ascorbic acid (1); D-galacturono-gamma-lactone (2); D-glucono-gamma-lactone (3); saccharosonic acid (4); D-gulono-gammalactone (5) Images-}
- C07H 7/027
- • Keto-almonic acids { keto-almonic acids, e.g. 2-keto-gluconic acid (1); D-arabino-2-hexulsonic acid (2); 2-keto-gluco-pyranosic acid (3); xylo-2-furanosic acid (4) Images-}
- C07H 7/033
- • Uronic acids { uronic acids, e.g. galacturonic acid (1); galactofuranonic acid (2) Images-}

C07H 11/00

Compounds containing saccharide radicals esterified by inorganic acids; Metal salts thereof (-halo-sugars [C07H 5/02](#); thio-, seleno- or telluro-sugars [C07H 5/08](#); { acetals [C07H9/04D](#) } ; esterified by carbonic acid or derivatives thereof [C07H 13/12](#); { [C07H 3/04](#), [C07H 3/06](#) take precedence; [C07H 9/00](#) takes precedence when at least one ring heteroatom is different from oxygen, however anhydro derivatives of nucleosides and nucleotides [C07H 19/00](#))}

C07H 11/04

- Phosphates; Phosphites; Polyphosphates {-phosphonates [C07H 13/00](#)-}

C07H 13/00

Compounds containing saccharide radicals esterified by carbonic acid or derivatives thereof, or by organic acids, e.g. phosphonic acids { acetals [C07H9/04D](#); {-[C07H 3/04](#), [C07H 3/06](#), [C07H13/12U](#) take precedence; [C07H 9/00](#) takes precedence when at least one ring heteroatom is different from oxygen, however anhydro derivatives of nucleosides and nucleotides [C07H 19/00](#)-)}

C07H 13/02

- by carboxylic acids{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 13/04

- • having the esterifying carboxyl radicals attached to acyclic carbon atoms{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 13/08

- • having the esterifying carboxyl radicals directly attached to carbocyclic rings{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 13/10

- • having the esterifying carboxyl radicals directly attached to heterocyclic rings{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 13/12

- by acids having the group -X-C(=X)-X-, or halides thereof, in which each X means nitrogen, oxygen, sulfur, selenium or tellurium, e.g. carbonic acid, carbamic acid{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 15/00

Compounds containing hydrocarbon or substituted hydrocarbon radicals directly attached to hetero atoms of saccharide radicals { acylated on hetero atoms of the saccharide radical [C07H 13/00](#); derivatives of bis methylen dioxy carbohydrates [C07H9/04D](#); {-[C07H 3/04](#), [C07H 3/06](#), take precedence; [C07H 9/00](#) takes precedence when at least one ring heteroatom is different from oxygen, however anhydro derivatives of nucleosides and nucleotides [C07H 19/00](#)-)}

NOTE

In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals.

C07H 15/02

- Acyclic radicals, not substituted by cyclic structures{(-[C07H 3/04](#), [C07H 3/06](#), [C07H15/00F](#) take precedence-)}

C07H 15/04

- • attached to an oxygen atom of the saccharide radical{(-[C07H 3/04](#), [C07H 3/06](#) take precedence-)}

C07H 15/06

- • • being a hydroxyalkyl group esterified by a fatty acid,{ i.e. Image-}

C07H 15/08

- • • Polyoxyalkylene derivatives {-polyoxyalkylene derivatives of polyols in general [C07C 41/00](#), [C07C 43/00](#)-}

- C07H 15/10
- • • containing unsaturated carbon-to-carbon bonds{(-C07H 3/04 , C07H 3/06 take precedence-)}
- C07H 15/12
- • attached to a nitrogen atom of the saccharide radical{(-C07H 3/04 , C07H 3/06 , C07H15/10D2 take precedence-)}
- C07H 15/14
- • attached to a sulfur, selenium or tellurium atom of a saccharide radical{(-C07H 3/04 , C07H 3/06 , C07H15/10D2 take precedence-)}
- C07H 15/16
- • • Lincomycin; Derivatives thereof{6-deoxy-6-(possibly substituted)Derivatives thereof {6-deoxy-6-(possibly substituted) amino derivatives, e.g. lincosamines, celestosamines, clindamycins}
- C07H 15/18
- Acyclic radicals, substituted by carbocyclic rings{ chalcones and hydrogenated chalcones derived from saccharides substituted by 1-benzopyran-4-one radicals are to be classified in C07H 17/07 ; -(-C07H 3/04 , C07H 3/06 , C07H15/00F , C07H15/10D2 take precedence-)}
- C07H 15/20
- Carbocyclic rings{(-C07H15/00F , C07H15/10D2 take precedence-)}
- C07H 15/203
- • Monocyclic carbocyclic rings other than cyclohexane {or cyclohexene or cyclohexadiene}rings; cyclohexene, cyclohexadiene; Bicylic carbocyclic ring systems
- C07H 15/207
- • Cyclohexane rings {and cyclohexene and cyclohexadiene rings}not substituted by nitrogen atoms, e.g. kasugamycins
- U C07H 15/22
- • Cyclohexane rings, substituted by nitrogen atoms

	C07H 19/11	• • • • • containing cyclic phosphate {not to be used}
U	C07H 19/16	• • • Purine radicals
	C07H 19/167	• • • • with ribosyl as the saccharide radical {not used}
	C07H 19/173	• • • • with 2-deoxyribosyl as the saccharide radical {not used}
	C07H 19/19	• • • • with arabinosyl as the saccharide radical {not used}
	C07H 19/20	• • • • with the saccharide radical esterified by phosphoric or polyphosphoric acids {or other phosphorus containing acids}
	C07H 19/207	• • • • • the phosphoric or polyphosphoric acids being esterified by a further hydroxylic compound, e.g. flavine adenine dinucleotide or nicotinamide-adenine dinucleotide (-nicotinamide-adenine dinucleotide phosphate C07H 21/02-)
	C07H 19/213	• • • • • containing cyclic phosphate {not to be used}
	C07H 19/23	• • • Heterocyclic radicals containing two or more heterocyclic rings condensed among themselves or condensed with a common carbocyclic ring system, not provided for in groups C07H 19/14 to C07H 19/22 {not to be used}
	C07H 21/00	Compounds containing two or more mononucleotide units,{having separate phosphate or polyphosphate groups linked by saccharide radicals of nucleoside groups (-C07H15/10D2 takes precedence-)}e.g. nucleic acids
	C07H 23/00	Compounds containing boron, silicon or a metal, e.g. chelates, vitamin B12 (-esters with inorganic acids, C07H 11/00 ; metal salts: see parent compounds-)

Project: N/A (C07J)**C07J****STERIODS (seco-steroids C07C)**NOTE

This subclass covers compounds containing a cyclopenta[a]hydrophenanthrene skeleton or a ring structure derived therefrom:

- by contraction or expansion of one ring by one or two atoms;
- by contraction or expansion of two rings each by one atom;
- by contraction of one ring by one atom and expansion of one ring by one atom;
- by substitution of one or two carbon atoms of the cyclopenta[a]hydrophenanthrene skeleton, which are not shared by rings, by hetero atoms, in combination with the above defined contraction or expansion or not, or;

- by condensation with carbocyclic or heterocyclic rings in combination with one or more of the foregoing alterations or not.

C07J 7/00 Normal steroids containing carbon, hydrogen, halogen or oxygen substituted in position 17 beta by a chain of two carbon atoms ([C07J 5/00](#) takes precedence)

C07J 13/00 Normal steroids containing carbon, hydrogen, halogen or oxygen having a carbon-to-carbon double bond from or to position 17{(for carbonyl groups [C07J 1/00](#)-)}

C07J 17/00 Normal steroids containing carbon, hydrogen, halogen or oxygen, having an oxygen-containing hetero ring not condensed with the cyclopenta(a)hydrophenanthrene skeleton (-cardanolide, bufanolide [C07J 19/00](#)-)

U C07J 31/00 Normal steroids containing one or more sulfur atoms not belonging to a hetero ring

C07J 31/006 • {-not covered by [C07J 31/003](#)}

U C07J 41/00 Normal steroids containing one or more nitrogen atoms not belonging to a hetero ring

C07J 41/0033 • {-not covered by [C07J 41/0005](#)}

NOTE

In groups [C07J 41/0038](#) to [C07J 41/0094](#) all references to substituents in position 17-beta of the steroid skeleton include substituents at the 17-position when there is a double bond to or from position 17, and all references to an amide group include all nitrogen substituted carbonyl groups

C07J 51/00 Normal steroids with unmodified cyclopenta(a)hydrophenanthrene skeleton not provided for in groups [C07J 1/00](#) to [C07J 43/00](#)

C07J 71/00 Steroids in which the cyclopenta(a)hydrophenanthrene skeleton is condensed with a heterocyclic ring (-spiro-condensed heterocyclic rings [C07J 21/00](#) , [C07J 33/00](#) , [C07J 43/00](#)-)

Project: N/A (C07K)

C07K **PEPTIDES** {-peptides in foodstuffs [A23](#); obtaining protein compositions for foodstuffs, working-up proteins for foodstuffs [A23J](#); preparations for medicinal purposes [A61K](#); peptides containing beta-lactam rings [C07D](#); cyclic dipeptides not having in their molecule any other peptide link than those which form their ring, e.g. piperazine-2,5-diones, [C07D](#); ergot alkaloids of the cyclic peptide type [C07D 519/02](#) ; macromolecular compounds having statistically distributed amino acid units in their molecules, i.e. when the preparation does not provide for a specific; but for a random sequence of the amino acid units, homopolyamides and block copolyamides derived from amino acids [C08G 69/00](#) ; macromolecular products derived from proteins [C08H 1/00](#) ; preparation of glue or gelatine [C09H](#); single cell proteins, enzymes [C12N](#); genetic engineering processes for obtaining peptides [C12N 15/00](#) ; compositions for measuring or testing processes involving enzymes [C12Q](#); investigation or analysis of biological material [G01N 33/00](#)-)

NOTE

In this subclass, the following terms or expressions are used with the meanings indicated:

- "amino acids" are compounds in which at least one amino group and at least one carboxyl

group are bound to the same carbon skeleton and the nitrogen atom of the amino group may form part of a ring;

- "normal peptide link" is one between an alpha-amino group of an amino acid and the carboxyl group - in position 1 - of another alpha-amino acid;
- "abnormal peptide link" is a link where at least one of the linked amino acids is not an alpha-amino acid or a link formed by at least one carboxyl or amino group being part of the side chain of a alpha-amino acid;
- "peptides" are compounds containing at least two amino acid units, which are bound through at least one normal peptide link, including oligopeptides, polypeptides and proteins, where:
 - a. "linear peptides" may comprise rings formed through S-S bridges, or through a hydroxy or a mercapto group of an hydroxy- or mercapto-amino acid and the carboxyl group of another amino acid, (e.g. peptide lactones) but do not comprise rings which are formed only through peptide links;
 - b. "cyclic peptides" are peptides comprising at least one ring formed only through peptide links; the cyclisation may occur only through normal peptide links or through abnormal peptide links, e.g. through the 4-amino group of 2,4-diamino-butanoic acid. Thus, cyclic compounds in which at least one link in the ring is a non-peptide link are considered as "linear peptides";
- "depsipeptides" are compounds containing a sequence of at least two alpha-amino acids and at least one alpha-hydroxy carboxylic acid, which are bound through at least one normal peptide link and ester links, derived from the hydroxy carboxylic acids, where:
 - a. "linear depsipeptides" may comprise rings formed through S-S bridges, or through an hydroxy or a mercapto group of an hydroxy- or mercapto-amino acid and the carboxyl group of another amino- of hydroxy-acid but do not comprise rings formed only through peptide or ester links derived from hydroxy carboxylic acids, e.g. Gly-Ala-Gly-OCH₂CO₂H and Gly-OCH₂CO-Ala-Gly are considered as "linear depsipeptides", but HOCH₂CO-Gly-Ala-Gly does not contain an ester link, and is thus a derivative of Gly-Ala-Gly which is covered by [C07K 5/08](#) ;
 - b. "cyclic depsipeptides" are peptides containing at least one ring formed only through peptide or ester links - derived from hydroxy carboxylic acids -, e.g. Gly-Ala-Gly-OCH₂CO.

Fragments of peptides or peptides modified by removal or addition of amino acids, by substitution of amino acids by others, or by combination of these modifications, are classified as the parent peptides. However, fragments of peptides having only four or less amino acids are also classified in group [C07K 5/00](#) .

Peptides prepared by chemical processes and having an amino acid sequence derived from naturally occurring peptides are classified with the natural one.

Peptides prepared by recombinant DNA technology are not classified according to the host, but according to the original peptide expressed, e.g. HIV peptide expressed in E. coli is classified with HIV peptides.

When classifying in this subclass, classification is also made in group [B01D 15/08](#) insofar as subject matter of general interest relating to chromatography is concerned.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

C07K 5/023	covered by	C07K 5/0202

C07K 14/74	covered by	C07K 14/70539

C07K 1/00

General methods for the preparation of peptides {i.e. processes for the organic chemical preparation of peptides or proteins of any length}

- C07K 1/02 • in solution{(-[C07K 1/003](#) , [C07K 1/006](#) take precedence-)}
- C07K 1/04 • on carriers{(-[C07K 1/003](#) , [C07K 1/006](#) take precedence-)}
- C07K 1/06 • using protecting groups or activating agents{(-[C07K 1/003](#) , [C07K 1/006](#) take precedence-)}
- C07K 1/08 • • using activating agents{(-[C07K 1/003](#) , [C07K 1/006](#) take precedence-)}
- C07K 1/10 • using coupling agents{(-[C07K 1/006](#) takes precedence-)}
- C07K 1/12 • by hydrolysis {i.e. solvolysis in general}

U C07K 5/00

Peptides containing up to four amino acids in a fully defined sequence; Derivatives thereof

- U C07K 5/02 • containing at least one abnormal peptide link

- C07K 5/021
 - {containing the structure -NH-(X)n-C(=O)-, n being 5 or 6; for n > 6, classification in [C07K 5/06](#) to [C07K 5/10](#), according to the moiety having normal peptide bonds-}
- C07K 5/0227
 - {containing the (partial) peptide sequence -Phe-His-NH-(X)2-C(=O)-, e.g. Renin-inhibitors with n = 2 - 6; for n > 6 see [C07K 5/06](#) to [C07K 5/10](#)-}
- U C07K 5/04
 - containing only normal peptide links

NOTE

In groups [C07K 5/06](#) to [C07K 5/10](#) the following terms or expressions are used with the meaning indicated:

neutral: amino acids having in the sidechain the same number of amino groups and carboxylic acid groups or derivatives thereof, e.g. Gly;

basic: amino acids having in the sidechain more amino groups than carboxylic acid groups or derivatives thereof, e.g. Arg;

acidic: amino acids having in the sidechain more carboxylic acid groups or derivatives thereof than amino groups, e.g. Asp;

aliphatic: amino acids having only acyclic carbon atoms in the sidechain, e.g. Ala aromatic;

cycloaliphatic: amino acids having a carbocyclic ring in the sidechain, e.g. Phe

heterocyclic: amino acids wherein the sidechain contains or is part of a heteroring, e.g. Pro;

side chain: the R radical in the optionally functionalised amino acid R-CH(NH₂)CO₂H)

- U C07K 5/06
 - • Dipeptides
- U C07K 5/06008
 - • • {with the first amino acid being neutral}
- U C07K 5/06017
 - • • • {and aliphatic}
- C07K 5/0606
 - • • • • {the side chain containing heteroatoms not provided for by [C07K 5/06086](#) to [C07K 5/06139](#), e.g. Ser, Met, Cys, Thr-}
- C07K 5/12
 - • Cyclic peptides {with only normal peptide bonds in the ring}

NOTE

Cyclic peptides containing at least one abnormal peptide link are classified as linear peptides

- U **C07K 7/00**
Peptides having 5 to 20 amino acids in a fully defined sequence; Derivatives thereof

NOTE

In this subgroup cyclic compounds related to specific compounds which are classified in a specific group, e.g. [C07K 7/062](#), are classified in this specific group only

- U C07K 7/04
 - Linear peptides containing only normal peptide links
- C07K 7/08
 - • having 12 to 20 amino acids (-gastrins [C07K 14/595](#); somatostatins [C07K 14/655](#); melanotropins [C07K 14/68](#)-)
- C07K 7/086
 - • • {Bombesin; Related peptides (-having more than 20 amino acids [C07K 14/57572](#)-)}

- U **C07K 9/00**
Peptides having up to 20 amino acids, containing saccharide radicals and having a fully defined sequence; Derivatives thereof

- U C07K 9/001
 - {the peptide sequence having less than 12 amino acids and not being part of a ring structure}

C07K 9/005

- {containing within the molecule the substructure with $m, n > 0$ and $m+n > 0$, A,B,D,E being

heteroatoms; X being a bond or a chain, e.g. muramylpeptides-}

U C07K 11/00

Depsipeptides having up to 20 amino acids in a fully defined sequence; Derivatives thereof

C07K 11/02

- cyclic, e.g. valinomycins {Derivatives thereof}

U C07K 14/00

Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof

U C07K 14/005

- from viruses

NOTE

When classifying in this group, subject-matter related to viral proteins shall be classified by the symbol [C07K 14/005](#) together with (a number of) appropriate indexing codes out of [C12N 2710/00-C12N 2795/00](#)

WARNING

1. From March 15, 2012 groups [C07K 14/01](#) - [C07K 14/19](#) and subgroups thereof are no longer used for the classification of new documents. 2. Reclassification of the back-file follows the principle outlined in the Note here above

U C07K 14/08

- • RNA viruses

U C07K 14/18

- • • Togaviridae; {Flaviviridae}

C07K 14/1808

- • • {Alphaviruses or Group A arboviruses, e.g. sindbis, VEE, EEE, WEE, semliki forest virus (-rubella virus [C07K 14/19](#)-)}

C07K 14/1816

- • • {Flaviviridae, e.g. pestivirus, mucosal disease virus, bovine viral diarrhoea virus, classical swine fever virus (*hog cholera virus*), *border disease virus*} (*hog cholera virus*), *border disease virus*}

U C07K 14/195

- from bacteria

NOTE

In groups [C07K 14/20](#) to [C07K 14/365](#), where appropriate, after the bacteria terminology, the indication of the order (O), family (F) or genus (G) of the bacteria is given in brackets.

U C07K 14/315

- • from Streptococcus (G), e.g. Enterococci

C07K 14/3156

- • • {from Streptococcus pneumoniae (Pneumococcus)} (-Streptokinase [C07K 14/3153](#)-)}

U C07K 14/435

- from animals; from humans

U C07K 14/46

- • from vertebrates

U C07K 14/47

- • • from mammals

U C07K 14/4701

- • • • {not used}

C07K 14/4732

- • • • {Casein (-in foodstuffs [A23J](#)-)}

C07K 14/4738

- • • • {Cell cycle regulated proteins, e.g. cyclin, CDC, INK-CCR (-cell cycle dependent kinases [C12N 9/12](#)-)}

C07K 14/575

- • Hormones (-derived from pro-opiomelanocortin, pro-enkephalin or pro-dynorphin [C07K 14/665](#), e.g. corticotropin [C07K 14/695](#)-)

C07K 14/57572

- • • {Gastrin releasing peptide (-bombesin [C07K 7/086](#)-)}

C07K 14/705

- • Receptors; Cell surface antigens; Cell surface determinants{(-tumour specific antigens [C07K 14/4748](#)-)}

C07K 14/70575	<ul style="list-style-type: none"> • • {NGF/TNF-superfamily, e.g. CD70, CD95L, CD153, CD154 (-NGF C07K 14/48, TNF C07K 14/525-)}
C07K 14/70578	<ul style="list-style-type: none"> • • {NGF-receptor/TNF-receptor superfamily, e.g. CD27, CD30, CD40, CD95 (-NGF-receptor C07K 14/71, TNF-receptor C07K 14/7151-)}
C07K 14/72	<ul style="list-style-type: none"> • • for hormones{(-for neuromediators C07K 14/70571-)}
U C07K 14/81	<ul style="list-style-type: none"> • Protease inhibitors
U C07K 14/8107	<ul style="list-style-type: none"> • • {Endopeptidase (E.C. 3.4.21-99) inhibitors}
U C07K 14/811	<ul style="list-style-type: none"> • • • {Serine protease (E.C. 3.4.21) inhibitors}
U C07K 14/8114	<ul style="list-style-type: none"> • • • • {Kunitz type inhibitors}
C07K 14/8117	<ul style="list-style-type: none"> • • • • {Bovine/basic pancreatic trypsin inhibitor (BPTI, aprotinin)}(BPTI, aprotinin)
C07K 16/00	<p>Immunoglobulins [IGs], e.g. monoclonal or polyclonal antibodies{(-antibodies with enzymatic activity, e.g. abzymes C12N 9/0002-)}</p> <p><u>NOTES</u></p> <p>Documents characterised by the technical aspects of the construction of an antibody or fragment thereof, should be classified in C07K 16/00 to C07K 16/065 or C07K 16/46 to C07K 16/468</p> <p>Documents not characterised by the technical aspects of the construction of an antibody or fragment thereof, should be classified only according to their specificity, where necessary accompanied by one or more appropriate indexing codes</p>
U C07K 16/18	<ul style="list-style-type: none"> • against material from animals or humans
U C07K 16/28	<ul style="list-style-type: none"> • • against receptors, cell surface antigens or cell surface determinants
U C07K 16/2803	<ul style="list-style-type: none"> • • • {against the immunoglobulin superfamily}
C07K 16/283	<ul style="list-style-type: none"> • • • • {against Fc-receptors, e.g. CD16, CD32, CD64 (-CD23-C07K 16/2851 CD23 C07K 16/2851)}
C07K 16/2869	<ul style="list-style-type: none"> • • • {against hormone receptors (-for antibodies against neuromediator receptors C07K 16/286-)}
C07K 16/2875	<ul style="list-style-type: none"> • • • {against the NGF/TNF superfamily, e.g. CD70, CD95L, CD153, CD154 (-against NGF C07K 16/22, against TNF C07K 16/241-)}
C07K 16/46	<ul style="list-style-type: none"> • Hybrid immunoglobulins (-hybrids of an immunoglobulin with a peptide not being an immunoglobulin C07K 19/00-)
C07K 17/00	<p>Carrier-bound or immobilised peptides (-carrier-bound or immobilised enzymes C12N 11/00); Preparation thereof</p>
U C07K 2319/00	<p>Fusion polypeptide</p>
U C07K 2319/01	<ul style="list-style-type: none"> • containing a localisation/targetting motif
C07K 2319/055	<ul style="list-style-type: none"> • • containing a signal for localisation to secretory granules (for exocytosis)(for exocytosis)
U C07K 2319/20	<ul style="list-style-type: none"> • containing a tag with affinity for a non-protein ligand
C07K 2319/24	<ul style="list-style-type: none"> • • containing a MBP (maltose binding protein)-tag(maltose-binding protein)-tag
C07K 2319/61	<ul style="list-style-type: none"> • containing an enzyme fusion for detection (lacZ, luciferase)(lacZ, luciferase)
U C07K 2319/70	<ul style="list-style-type: none"> • containing domain for protein-protein interaction
C07K 2319/73	<ul style="list-style-type: none"> • • containing coiled-coiled motif (leucine zippers)(leucine zippers)
C07K 2319/735	<ul style="list-style-type: none"> • • containing a domain for self-assembly, e.g. a viral coat protein (includes phage display)(includes phage display)
U C07K 2319/90	<ul style="list-style-type: none"> • containing a motif for post-translational modification
C07K 2319/92	<ul style="list-style-type: none"> • • containing an intein ("protein splicing")domain("protein-splicing")domain

C07K 2319/95

- containing a motif/fusion for degradation (*ubiquitin fusions, PEST sequence*) (~~ubiquitin fusions, PEST sequence~~)

Project: N/A (C08B)**C08B**

POLYSACCHARIDES; DERIVATIVES THEREOF (~~polysaccharides containing less than six saccharide radicals attached to each other by glycosidic linkages~~ **C07H**; fermentation or enzyme-using processes **C12P 19/00** ; sugar industry **C13**; production of cellulose **D21**-)

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

- **C08B 37/06** covered by **C08B 37/0045**
- **C08B 37/10** covered by **C08B 37/0075**
- C08B 37/12** covered by **C08B 37/0039**

U C08B 1/00

{Preparatory treatment of cellulose for making derivatives thereof, e.g. pre-treatment, pre-soaking, activation}

C08B 1/003

- {Preparation of cellulose solutions, i.e. dopes, with different possible solvents, e.g. ionic liquids} (~~solutions used in the manufacture of monocomponent artificial filaments or cellulose or derivatives thereof~~ **D01F 2/02**-)

C08B 1/02

- Rendering cellulose suitable for esterification (~~esterification per se, C08B 3/00, C08B 5/00, C08B 7/00 or C08B 9/00~~-)

C08B 1/06

- Rendering cellulose suitable for etherification (~~etherification per se C08B 11/00~~-)

C08B 3/00

Preparation of cellulose esters of organic acids (~~rendering cellulose suitable for esterification~~ **C08B 1/02**-)

C08B 3/20

- Esterification with maintenance of the fibrous structure of the cellulose (~~surface esterification of textiles~~ **D06M 13/00**-)

U C08B 3/22

- Post-esterification treatments, including purification

C08B 3/30

- • Stabilising (~~by addition of stabilisers~~ **C08K**-)

C08B 5/00

Preparation of cellulose esters of inorganic acids, {e.g. phosphates} (~~rendering cellulose suitable for esterification~~ **C08B 1/02**-)

C08B 5/02

- Cellulose nitrate, {i.e. nitrocellulose} (~~rendering cellulose suitable for the preparation of cellulose nitrate~~ **C08B 1/04**-)

U C08B 5/04

- • Post-esterification treatments, {e.g. densification of powders}, including purification

C08B 5/08

- • • Stabilisation (~~by addition of stabilisers~~ **C08K**); {Post-treatment, e.g. phlegmatisation}

C08B 7/00

Preparation of cellulose esters of both organic and inorganic acids (~~rendering cellulose suitable for esterification~~ **C08B 1/02**-)

C08B 9/00

Cellulose xanthate; Viscose (~~formation of films~~ **C08J 5/18** ; formation of fibres **D01F**; rendering cellulose suitable for esterification **C08B 1/02**-)

C08B 11/00

Preparation of cellulose ethers (~~rendering cellulose suitable for etherification~~ **C08B 1/06**-)

U C08B 15/00

Preparation of other cellulose derivatives or modified cellulose, {e.g. complexes}

- C08B 15/05
- Derivatives containing elements other than carbon, hydrogen, oxygen, halogens or sulfur (-esters or phosphorous acids [C08B 5/00-](#))
- U C08B 30/00 Preparation of starch, degraded or non-chemically modified starch, amylose, or amylopectin**
- C08B 30/02
- Preparatory treatment, e.g. crushing of raw materials {or steeping process} (machines for preliminary washing [A23N](#))}
- C08B 30/12
- Degraded, {destructured} or non-chemically modified starch {e.g. mechanically, enzymatically or by irradiation; Bleaching of starch (-preparation of chemical derivatives of starch [C08B 31/00-](#))}
- C08B 30/20
- Amylose or amylopectin (-chemical derivatives thereof [C08B 33/00](#) , [C08B 35/00-](#))
- C08B 31/00 Preparation of derivatives of starch (-derivatives of amylose [C08B 33/00](#) ; derivatives of amylopectin [C08B 35/00](#))**
- C08B 37/00 Preparation of polysaccharides not provided for in groups [C08B 1/00](#) to [C08B 35/00](#) ; Derivatives thereof (-cellulose [D21](#) ; { microbiological processes [C12P](#) })**
- C08B 37/12
- Agar-agar; Derivatives thereof (not used)
- C08B 37/14
- Hemicellulose; Derivatives thereof (not used)
- C08B 37/18
- Reserve carbohydrates, e.g. glycogen, inulin, laminarin; Derivatives thereof (not used)

Project: N/A (C08F)**U C08F 2/00 Processes of polymerisation**NOTE

Group [C08F 2/00](#) and subgroups can be incomplete according to the following classification rules: - if a process of polymerisation is specifically used for only one type of polymer, it is not classified in [C08F 2/00](#) ; - in such a case, the classification symbol of [C08F 2/00](#) providing for the process of polymerisation may be used in the form of Combination Set in the groups providing for the polymer, e.g. ([C08F 36/04](#) , [C08F 2/14](#)) - this method of classification is applied only when a note after the group providing for the polymer explicitly indicates which symbols of [C08F 2/00](#) may be used for forming the Combination Set.

- C08F 2/001
- {Multistage polymerisation processes characterised by a change in reactor conditions without deactivating the intermediate polymer (-[C08F 295/00](#) , [C08F 297/00](#) take precedence-)}
- C08F 2/008
- {cleaning reaction vessels using chemicals (-mechanical methods [B08B 9/08-](#))}
- C08F 2/04
- Polymerisation in solution (-[C08F 2/32](#) takes precedence-)
- C08F 2/12
- Polymerisation in non-solvents (-[C08F 2/32](#) takes precedence-)
- C08F 2/58
- Polymerisation initiated by direct application of electric current (-electrolytic processes, e.g. electrophoresis [C25-](#))

C08F 4/00 Polymerisation catalysts (catalysts in general [B01J](#))NOTE

1. Group [C08F 4/00](#) and subgroups can be incomplete according to the following classification rules: - if a catalyst is specifically used for only one type of polymer, it is not classified in [C08F 4/00](#) ; - in such a case, the classification symbol of

[C08F 4/00](#) providing for the catalyst may be used as a symbol for a C-Set in the groups providing for the polymer, e.g. ([C08F 12/04](#) , [C08F 4/62](#)) - this method of classification is applied only when a note after the group providing for the polymer explicitly indicates which symbols of [C08F 4/00](#) may be used for forming the C-set.

2. When classifying in group [C08F 4/00](#) , the type of catalyst can be further indexed by using indexing codes chosen from [C08F 2410/00](#) , [C08F 2420/00](#) or their subgroups

- C08F 4/28 • Oxygen or compounds releasing free oxygen (redox systems [C08F 4/40](#))
- U C08F 4/42 • Metals; Metal hydrides; Metallo-organic compounds; Use thereof as catalyst precursors
- U C08F 4/44 • • selected from light metals, zinc, cadmium, mercury, copper, silver, gold, boron, gallium, indium, thallium, rare earths or actinides
- U C08F 4/46 • • • selected from alkali metals
- C08F 4/461 • • • • {Catalysts containing at least two different components covered by the same or by different subgroups of group [C08F 4/46](#) , e.g. butyllithium + propylrubidium}
- C08F 4/463 • • • • {selected from sodium or potassium (C08F 4/461 takes precedence)}
- C08F 4/48 • • • • selected from lithium, rubidium, caesium or francium (C08F 4/461 takes precedence)}
- C08F 4/52 • • • selected from boron, aluminium, gallium, indium, thallium or rare earths (C08F 4/14 takes precedence)
- C08F 4/60 • • • together with refractory metals, iron group metals, platinum group metals, manganese, rhenium {technetium} or compounds thereof

NOTES

In groups [C08F 4/60](#) to [C08F 4/64](#) , the term "component" comprises the transition metal or a compound thereof, pretreated or not { (pretreating per se [C08F 4/61](#) , [C08F 4/63](#) and [C08F 4/65](#)) }

Group [C08F 4/60003](#) takes precedence over groups [C08F 4/602](#) to [C08F 4/619](#)

- U C08F 4/60003 • • • • {the metallic compound containing a multidentate ligand, i.e. a ligand capable of donating two or more pairs of electrons to form a coordinate or ionic bond}(not used)

NOTE

For monoanionic compounds, the charge is on the last mentioned atom; for dianionic compounds, the charge is on the first and the last mentioned atoms except for compounds marked with * where the charge is on the marked atom

- C08F 4/60006 • • • • • {Bidentate ligand (not used)}
- C08F 4/60082 • • • • • {Tridentate ligand (not used)}
- C08F 4/60168 • • • • • {Tetra- or multi-dentate ligand (not used)}
- C08F 4/602 • • • • Component covered by group [C08F 4/60](#) with an organo-aluminium compound [(C08F 4/60003 - [C08F 4/60196](#) take precedence-)]
- C08F 4/6022 • • • • • {-Component of [C08F 4/60](#) containing at least two different metals-}
- C08F 4/603 • • • • Component covered by group [C08F 4/60](#) with a metal or compound covered by group [C08F 4/44](#) other than an organo-aluminium compound [(C08F 4/60003 - [C08F 4/60196](#) take precedence-)]

U	C08F 4/70 Iron group metals, platinum group metals or compounds thereof
U	C08F 4/7001 {the metallic compound containing a multidentate ligand, i.e. a ligand capable of donating two or more pairs of electrons to form a coordinate or ionic bond}(not used)

NOTE

For monoanionic compounds, the charge is on the last mentioned atom; for dianionic compounds, the charge is on the first and the last mentioned atoms except for compounds marked with * where the charge is on the marked atom

	C08F 4/7003 {Bidentate ligand (not used)}
--	-------------	---

- C08F 4/7039 {Tridentate ligand (not used)}
- C08F 4/708 {Tetra- or multi-dentate ligand (not used)}
- C08F 4/7095 {Cobalt, nickel or compounds thereof (-C08F 4/7001 to C08F 4/7093 take precedence)}
- C08F 4/72 . . selected from metals not provided for in group C08F 4/44 (-C08F 4/54 to C08F 4/70 take precedence)

C08F 6/00 **Post-polymerisation treatments (-C08F 8/00 takes precedence; of conjugated diene rubbers C08C-)**

NOTE

1. In groups C08F 6/00 to C08F 6/28 the treatment of specific polymers is indicated using the subdivision of C08L 23/00 to C08L 57/12 in the form of C-Sets. Example: (C08F 6/12 , C08L 25/06) 2. Groups C08F 6/001, C08F 6/006, C08F 6/008, C08F 6/02 , C08F 6/04 take precedence over the other groups.

- C08F 6/02 . Neutralisation of the polymerisation mass, e.g. killing the catalyst (-short-stopping C08F 2/42-){also removal of catalyst residues}
- U C08F 6/06 . Treatment of polymer solutions
- C08F 6/08 . . Removal of catalyst residues{ not used, see C08F 6/02-}
- C08F 6/26 . Treatment of polymers prepared in bulk {also solid polymers or polymer melts}

C08F 8/00 **Chemical modification by after-treatment (-graft polymers, block polymers, cross-linking with unsaturated monomers or with polymers C08F 251/00 to C08F 299/00 ; of conjugated diene rubbers C08C; cross-linking in general C08J-)**

NOTE

Classification is given in the form of C-Sets when sufficient information is provided concerning the polymer to be modified. In groups C08F 8/00 to C08F 8/50 , the chemical modification of specific polymers is indicated using the subdivisions of C08F 10/00 to C08F 34/04 , C08F 38/00 to C08F 38/04 , C08F 110/00 to C08F 134/04 , C08F 138/00 to C08F 138/04 , C08F 210/00 to C08F 234/04 , C08F 238/00 to C08F 299/08 . Example: (C08F 8/44 , C08F 16/06) Otherwise, only the C08F 8/00 - C08F 8/50 symbol(s) is (are) given.

- C08F 8/30 . Introducing nitrogen atoms or nitrogen-containing groups (-polymeric products of isocyanates or thiocyanates C08G-)
- C08F 8/50 . Partial depolymerisation
- U C08F 14/00 **Homopolymers and copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen**
- U C08F 14/18 . Monomers containing fluorine

WARNING

In group C08F 14/18 and subgroups, the method of polymerisation may be indicated using the subdivision of C08F 2/02 , C08F 2/04 , C08F 2/16 , C08F 2/38 , C08F 2/44 and C08F 2/46 in the form of C-Sets. Example: (C08F 14/22 , C08F 2/38)

- C08F 14/185 . . {-Monomers containing fluorine not covered by the groups C08F 14/20 to C08F 14/28-}

- U C08F 22/00** Homopolymers and copolymers of compounds having one or more unsaturated aliphatic radicals each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical and containing at least one other carboxyl radical in the molecule; Salts, anhydrides, esters, amides, imides or nitriles thereof
- U C08F 22/10** • Esters
- C08F 22/12** • • of phenols or saturated alcohols{(-C08F 22/105 takes precedence-)}
- C08F 22/26** • • of unsaturated alcohols{(-C08F 22/105 takes precedence-)}
- C08F 24/00** Homopolymers and copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (-cyclic esters of polyfunctional acids [C08F 18/00](#) ; cyclic anhydrides of unsaturated acids [C08F 20/00](#) , [C08F 22/00](#)-)
- C08F 30/00** Homopolymers and copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing phosphorus, selenium, tellurium or a metal (metal salts, e.g. phenolates or alcoholates, see the parent compounds)
- U C08F 32/00** Homopolymers and copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic ring system
- C08F 32/08** • having two condensed rings(-coumarone-indene polymers [C08F 244/00](#)-)
- C08F 34/00** Homopolymers and copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain and having one or more carbon-to-carbon double bonds in a heterocyclic ring (-cyclic esters of polyfunctional acids [C08F 18/00](#) ; cyclic anhydrides or imides [C08F 22/00](#)-)
- C08F 34/02** • in a ring containing oxygen(-coumarone-indene polymers [C08F 244/00](#)-)
- C08F 36/00** Homopolymers and copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds (-[C08F 32/00](#) takes precedence-)
- NOTE**
- In [C08F 36/00](#) to [C08F 36/22](#) the method of polymerisation may be indicated using the subdivision of [C08F 2/00](#) to [C08F 2/58](#) in the form of C-Sets; the nature of the catalyst may be indicated using the subdivision of [C08F 4/00](#) to [C08F 4/60](#), [C08F 4/62](#), [C08F 4/64](#), [C08F 4/642](#), [C08F 4/6421](#), [C08F 4/643](#) or [C08F 4/68](#) to [C08F 4/82](#) in the form of C-Sets. Example: ([C08F 36/04](#) , [C08F 4/642](#))
- U C08F 38/00** Homopolymers and copolymers of compounds having one or more carbon-to-carbon triple bonds
- C08F 38/04** • Vinylacetylene
- U C08F 114/00** Homopolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a halogen
- U C08F 114/18** • Monomers containing fluorine
- C08F 114/185** • • {-Monomers containing fluorine not covered by the groups [C08F 114/20](#) to [C08F 114/28](#)-}

- U C08F 122/00** Homopolymers of compounds having one or more unsaturated aliphatic radicals each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical and containing at least one other carboxyl radical in the molecule; Salts, anhydrides, esters, amides, imides or nitriles thereof
- U C08F 122/10** • Esters
- C08F 122/12** • • of phenols or saturated alcohols{(-[C08F 122/105](#) takes precedence-)}

- C08F 224/00** Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (-cyclic esters of polyfunctional acids [C08F 218/00](#) ; cyclic anhydrides of unsaturated acids [C08F 220/00](#) , [C08F 222/00](#) -)
- C08F 230/00** Copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing phosphorus, selenium, tellurium or a metal (metal salts, e.g. phenolates or alcoholates, see the parent compounds)
- U C08F 232/00** Copolymers of cyclic compounds containing no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic ring system
- C08F 232/08** • having condensed rings (-coumarone-indene polymers [C08F 244/00](#) -)
- C08F 234/00** Copolymers of cyclic compounds having no unsaturated aliphatic radicals in a side chain and having one or more carbon-to-carbon double bonds in a heterocyclic ring (-cyclic esters of polyfunctional acids [C08F 218/00](#) ; cyclic anhydrides or imides [C08F 222/00](#) -)
- C08F 234/02** • in a ring containing oxygen (-coumarone-indene polymers [C08F 244/00](#) -)
- C08F 236/00** Copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds (-[C08F 232/00](#) takes precedence-)
- NOTE**
- In [C08F 236/00](#) to [C08F 236/22](#) the method of polymerisation may be indicated using the subdivision of [C08F 2/00](#) to [C08F 2/58](#) in the form of C-Sets; the nature of the catalyst may be indicated using the subdivision of [C08F 4/00](#) to [C08F 4/60](#), [C08F 4/62](#), [C08F 4/64](#), [C08F 4/642](#), [C08F 4/6421](#), [C08F 4/643](#) or [C08F 4/68](#) to [C08F 4/82](#) in the form of C-Sets. Example: ([C08F 236/10](#) , [C08F 4/46](#))
- C08F 255/00** Macromolecular compounds obtained by polymerising monomers on to polymers of hydrocarbons as defined in group [C08F 10/00](#)
- U C08F 255/02** • on to polymers of olefins having two or three carbon atoms
- C08F 255/04** • • on to ethene-propene copolymers{(-[C08F 255/023](#) takes precedence-)}
- C08F 255/06** • • on to ethene-propene-diene terpolymers{(-[C08F 255/023](#) takes precedence-)}
- C08F 257/00** Macromolecular compounds obtained by polymerising monomers on to polymers of aromatic monomers as defined in group [C08F 12/00](#)
- C08F 259/00** Macromolecular compounds obtained by polymerising monomers on to polymers of halogen containing monomers as defined in group [C08F 14/00](#)
- C08F 261/00** Macromolecular compounds obtained by polymerising monomers on to polymers of oxygen-containing monomers as defined in group [C08F 16/00](#)

- C08F 263/00** Macromolecular compounds obtained by polymerising monomers on to polymers of esters of unsaturated alcohols with saturated acids as defined in group [C08F 18/00](#)
- C08F 265/00** Macromolecular compounds obtained by polymerising monomers on to polymers of unsaturated monocarboxylic acids or derivatives thereof as defined in group [C08F 20/00](#)
- C08F 267/00** Macromolecular compounds obtained by polymerising monomers on to polymers of unsaturated polycarboxylic acids or derivatives thereof as defined in group [C08F 22/00](#)
- C08F 269/00** Macromolecular compounds obtained by polymerising monomers on to polymers of heterocyclic oxygen-containing monomers as defined in group [C08F 24/00](#)
- C08F 271/00** Macromolecular compounds obtained by polymerising monomers on to polymers of nitrogen-containing monomers as defined in group [C08F 26/00](#)
- C08F 273/00** Macromolecular compounds obtained by polymerising monomers on to polymers of sulfur-containing monomers as defined in group [C08F 28/00](#)
- C08F 275/00** Macromolecular compounds obtained by polymerising monomers on to polymers of monomers containing phosphorus, selenium, tellurium or a metal as defined in group [C08F 30/00](#)
- C08F 277/00** Macromolecular compounds obtained by polymerising monomers on to polymers of carbocyclic or heterocyclic monomers as defined respectively in group [C08F 32/00](#) or in group [C08F 34/00](#)
- C08F 279/00** Macromolecular compounds obtained by polymerising monomers on to polymers of monomers having two or more carbon-to-carbon double bonds as defined in group [C08F 36/00](#)

NOTE

In [C08F 279/02](#) and [C08F 279/04](#) the method of polymerisation may be indicated using the subdivision of [C08F 2/02](#) , [C08F 2/16](#) , [C08F 2/18](#) or [C08F 2/22](#) in the form of C-Sets. Example: ([C08F 279/02](#) , [C08F 2/22](#))

- C08F 281/00** Macromolecular compounds obtained by polymerising monomers on to polymers of monomers having carbon-to-carbon triple bonds as defined in group [C08F 38/00](#)
- C08F 283/00** Macromolecular compounds obtained by polymerising monomers on to polymers provided for in subclass [C08G](#) {(on to polymers modified by introduction of aliphatic unsaturated end or side groups [C08F 290/00](#)-)}
- C08F 283/006** • {-on to polymers provided for in [C08G 18/00](#) (-[C08F 283/004](#) takes precedence-)}
- C08F 283/01** • on to unsaturated polyesters{(-[C08F 283/004](#) takes precedence-)}

NOTE

After the symbol of group [C08F 283/01](#) - [C08F 283/14](#) and using the C-Sets, notations concerning the method of polymerisation or the nature of the catalyst can be indicated. These notations are selected from groups [C08F 2/00](#) , [C08F 2/16](#) , [C08F 2/46](#) , [C08F 2/48](#) , [C08F 2/50](#) , [C08F 4/00](#) , [C08F 4/04](#) , [C08F 4/06](#) , [C08F 4/28](#) and [C08F 4/42](#) . Example: ([C08F 283/01](#) , [C08F 2/16](#))

- C08F 283/02** • on to polycarbonates or saturated polyesters{(-[C08F 283/004](#) takes precedence-)}

C08F 283/04	• on to polycarbonamides, polyesteramides or polyimides{(-C08F 283/004 takes precedence-)}
C08F 283/06	• on to polyethers, polyoxymethylenes or polyacetals{(-C08F 283/004 takes precedence-)}
C08F 283/10	• on to polymers containing more than one epoxy radical per molecule{(-C08F 283/004 takes precedence-)}
C08F 283/14	• on to polymers obtained by ring-opening polymerisation of carbocyclic compounds having one or more carbon-to-carbon double bonds in the carbocyclic ring, i.e. polyalkeneamers{(-C08F 283/004 takes precedence-)}
C08F 285/00	Macromolecular compounds obtained by polymerising monomers on to preformed graft polymers{(-C08F 283/00 takes precedence-)}
C08F 287/00	Macromolecular compounds obtained by polymerising monomers on to block polymers{(-C08F 283/00 takes precedence-)}
C08F 289/00	Macromolecular compounds obtained by polymerising monomers on to macromolecular compounds not provided for in groups C08F 251/00 to C08F 287/00
U C08F 290/00	Macromolecular compounds obtained by polymerising monomers on to polymers modified by introduction of aliphatic unsaturated end or side groups
U C08F 290/02	• on to polymers modified by introduction of unsaturated end groups
C08F 290/04	• • Polymers provided for in subclasses C08C or C08F
C08F 290/042	• • • {-Polymers of hydrocarbons as defined in group C08F 10/00 -}
C08F 290/044	• • • {-Polymers of aromatic monomers as defined in group C08F 12/00 -}
C08F 290/048	• • • {-Polymers of monomers having two or more carbon-to-carbon double bonds as defined in group C08F 36/00 -}
C08F 290/06	• • Polymers provided for in subclass C08G
U C08F 290/08	• on to polymers modified by introduction of unsaturated side groups
C08F 290/10	• • Polymers provided for in subclass C08B
C08F 290/12	• • Polymers provided for in subclasses C08C or C08F
C08F 290/122	• • • {-Polymers of hydrocarbons as defined in group C08F 10/00 -}
C08F 290/124	• • • {-Polymers of aromatic monomers as defined in group C08F 12/00 -}
C08F 290/128	• • • {-Polymers of monomers having two or more carbon-to-carbon double bonds as defined in group C08F 36/00 -}
C08F 290/14	• • Polymers provided for in subclass C08G
C08F 291/00	Macromolecular compounds obtained by polymerising monomers on to macromolecular compounds according to more than one of the groups C08F 251/00 to C08F 289/00
NOTE	
In C08F 291/00 the method of polymerisation may be indicated using the subdivision of C08F 2/02 , C08F 2/16 , C08F 2/18 or C08F 2/22 in the form of C-Sets. Example: (C08F 291/00 , C08F 2/16)	
C08F 291/18	• on to irradiated or oxidised macromolecules (-epoxidised C08F 291/10 -)
C08F 293/00	Macromolecular compounds obtained by polymerisation on to a macromolecule having groups capable of inducing the formation of new polymer chains bound exclusively at one or both ends of the starting macromolecule (-on to polymers modified by introduction of unsaturated end groups C08F 290/02-)

C08F 299/00	Macromolecular compounds obtained by interreacting polymers involving only carbon-to-carbon unsaturated bond reactions, in the absence of non-macromolecular monomers (in the presence of non-macromolecular monomers C08F 251/00 to C08F 291/00 ; involving other reactions C08G 81/00)
C08F 301/00	Macromolecular compounds not provided for in groups C08F 10/00 to C08F 299/00
C08F 2410/00	Catalyst preparation (not used)
C08F 2420/00	Metallocene catalysts (not used)
C08F 2500/00	Characteristics or properties of obtained polymers; Use thereof (not used)
C08F 2800/00	Copolymer characterised by the proportions of the comonomers expressed (not used)
C08F 2810/00	Chemical modification of a polymer (not used)

Project: N/A (C08G)

U C08G 18/00	Polymeric products of isocyanates or isothiocyanates (preparatory processes of porous or cellular materials, in which the monomers or catalysts are not specific C08J)
U C08G 18/06	• with compounds having active hydrogen
U C08G 18/08	• • Processes
C08G 18/0895	• • • {-Manufacture of polymers by continuous processes (C08G 18/0838 takes precedence)}
NOTES After the symbols C08G 18/10 and C08G 18/12 and separated by a "," sign, are indicated the reactive components of a second or following step by one of the symbols C08G 18/2805 , C08G 18/30 to C08G 18/38 , C08G 18/40 to C08G 18/64 without subnotations, C08G 18/65 to C08G 18/66 , C08G 18/70 to C08G 18/80 After the symbols C08G 18/10 and C08G 18/12 and separated by a "," sign are indicated the oligomerisation of isocyanate- or isothiocyanate groups in the prepolymers or in the added reactive components involving reaction of at least a part of the isocyanate- or isothiocyanate groups with each other in the reaction mixture by the symbols C08G 18/02 or C08G 18/09 respectively or by subnotations thereof	
C08G 18/14	• • • Manufacture of cellular products

- C08G 83/008 • {-Supramolecular polymers}

Project: N/A (C08J)**C08J**

WORKING-UP; GENERAL PROCESSES OF COMPOUNDING; AFTER-TREATMENT NOT COVERED BY SUBCLASSES [C08B](#), [C08C](#), [C08F](#), [C08G](#) (-mechanical aspects [B29](#); layered products, manufacture thereof [B32B](#); treatment of macromolecular material specially adapted to enhance its filling properties in mortars, concrete or artificial stone [C04B 16/04](#), [C04B 18/20](#), [C04B 20/00](#); treatment of textiles [D06](#)-)

NOTE

1. This subclass covers processes, not covered by subclasses [C08B](#) to [C08H](#), for treating polymers.

In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place

2. When classifying in subclass [C08J](#), the treatment of specific polymers is indicated using indexing codes chosen from [C08J 2300/00](#) or subgroups thereof.

Example:

- Preparation of particles of polystyrene by impregnation of the particles with the blowing agent: [C08J 9/18](#) and [C08J 2325/06](#).

The use of a polymeric component in minority, e.g. masterbatch, coating, impregnating agent or thin binder is indicated using indexing codes chosen from [C08J 2400/00](#) or subgroups thereof. Examples:

- Use of PMMA as masterbatch in a polystyrene composition: [C08J 3/226](#) and [C08J 2325/06](#) and [C08J 2433/10](#)

- Bonding of polystyrene by heating: [C08J 5/121](#) and [C08J 2325/06](#)

- Coating of a polyethylene substrate with a polyurethane coating: [C08J 7/047](#) and [C08J 2323/06](#) and [C08J 2475/04](#) - Use of ABS as an additive for foamed polyacrylamide: [C08J 9/0061](#) and [C08J 2333/26](#) and [C08J 2455/02](#)

In the following subgroups, the codes of [C08J 2300/00](#) to [C08J 2399/00](#) are used to specify: - [C08J 3/226](#): the polymeric material to which the masterbatch carrier is added. - [C08J 7/047](#): the polymeric substrate to be coated. - [C08J 9/0061](#): the polymeric component in majority in a multicomponents

foamable blend.

3. Group [C08J 2400/00](#) was introduced on January 1st, 2012. Patent documents are continuously being reclassified. As a consequence, documents published before 01/01/2012, and to which [C08J 2400/00](#) indexing codes were allocated, are indexed in the corresponding head group. Example: -

Use of PMMA as masterbatch in a polystyrene composition: [C08J 3/226](#) and [C08J 2325/06](#) and [C08J 2433/00](#), instead of [C08J 2433/10](#). In the following subgroups, the codes of [C08J 2400/00](#) to [C08J 2499/00](#) are used to specify: - [C08J 3/226](#): the polymeric carrier in a masterbatch. - [C08J 5/12](#): the chemical nature of the adhesive - [C08J 7/047](#): the chemical nature of the coating(s).

- [C08J 9/0061](#): the polymeric component in minority in a multicomponents foamable blend. - [C08J 9/224](#), [C08J 9/236](#), [C08J 9/36](#), [C08J 9/40](#) and [C08J 9/42](#): the polymer used for coating, binding, or impregnating the foam.

[C08J 9/26](#): the polymer to be leached out. - [C08J 9/33](#) and [C08J 9/35](#): the foam fragments included in the (foamable) polymer matrix. - in all other subgroups, when the presence of a polymeric component in minority is of relevance.

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

[C08J 5/14](#) covered by [B24D 3/20](#), [F16D 69/02](#)

[C08J 5/16](#) covered by [C10M](#)

U [C08J 3/00](#)

[C08J 3/12](#)

[C08J 3/124](#)

[C08J 3/126](#)

[C08J 3/128](#)

[C08J 3/14](#)

Processes of treating or compounding macromolecular substances

• Powdering or granulating{(-preparation of active ingredients, e.g. medical preparations in form of capsules [A61K 9/51](#); making granules [B29B 9/00](#)-)}

• {Treatment for improving the free-flowing characteristics (-agglomerates, granulates or microbeadlets [A61K 9/16](#); process or devices for granulating material, e.g. non-sticking properties [B01J 2/30](#); auxiliary treatment of particle [B29B 9/16](#)-)}

• {Polymer particles coated by polymer, e.g. core shell structures (-process or devices for granulating material, e.g. coating [B01J 2/003](#)-)}

• {Polymer particles coated by inorganic and organic compounds (-macromolecules [C08J 3/126](#)-)}

• • by precipitation from solutions{(-[C08J 3/122](#) takes precedence-)}

- C08J 3/16
 - • by coagulating dispersions{(-[C08J 3/122](#) takes precedence; treatment of polymer emulsion, e.g. coagulation [C08F 6/22](#)-)}
- C08J 3/18
 - Plasticising macromolecular compounds (-plasticisers [C08K](#)-)
- U C08J 3/20
 - Compounding polymers with additives, e.g. colouring
- C08J 3/205
 - • in the presence of a {continuous}liquid phase
- C08J 3/24
 - Crosslinking, e.g. vulcanising, of macromolecules (-mechanical aspects [B29C 35/00](#) ; crosslinking agents [C08K](#) ; { crosslinking aspects not classifiable in [C08G](#) , [C08F](#) , [C08K](#) ; compounding [C08J 3/20](#) })
- C08J 3/241
 - • {Preventing premature crosslinking by physical separation of components, e.g. encapsulation (-of other ingredients [C08K 9/00](#)-)}
- C08J 5/00**

Manufacture of articles or shaped materials containing macromolecular substances (-shaping of foodstuffs [A23P](#) ; manufacture of semi-permeable membranes [B01D 67/00](#) to [B01D 71/00](#) ; mechanical features, see the relevant classes, e.g. [B29](#))
- C08J 5/005
 - {Reinforced macromolecular compounds with nanosized materials, e.g. nanoparticles, nanofibres, nanotubes, nanowires, nanorods or nanolayered materials (-use of ingredients characterised by shape [C08K 7/00](#) ; nanotechnology for materials and surface science [B82Y 30/00](#)-)}
- C08J 5/04
 - Reinforcing macromolecular compounds with loose or coherent fibrous material (-after-treatment of threads during manufacture [D01F](#) ; { finishing of textiles [D06M](#) })
- C08J 5/12
 - Bonding of a preformed macromolecular material to the same or other solid material such as metal, glass, leather, e.g. using adhesives{(-mechanical aspects [B29C 65/00](#)-)}
- C08J 5/124
 - • {using adhesives based on a macromolecular component (-adhesive compositions per se [C09J 4/00](#) , [C09J 101/00](#) to [C09J 201/00](#)-)}
- C08J 5/18
 - Manufacture of films or sheets{ Producing films or sheets [B29D 7/01](#) ; wrappers or flexible covers, packaging materials of special type or form [B65D 65/00](#) - [B65D 65/466](#) ; shaping by stretching characterized by the choice of materials [B29C 55/005](#) ; layered products essentially comprising synthetic resin [B32B 27/00](#) - [B32B 27/42](#)-}
- C08J 5/20
 - Manufacture of shaped of ion-exchange resins [Use of macromolecular compounds as anion [B01J 41/14](#) or cation [B01J 39/20](#) exchangers]
- C08J 5/22
 - • Films, membranes, or diaphragms{(-ion-exchange in general, [B01J 39/18](#) - [B01J 39/22](#) , [B01J 41/12](#) - [B01J 41/16](#) , [B01J 43/00](#) , [B01J 45/00](#) , [B01J 47/12](#) - [B01J 49/00](#) ; fuel cells with polymeric electrolyte material [H01M 8/1018](#)-)}

NOTE

[N: Notes:

1. Membranes of which at least the ion-exchanging parts are inorganic, i.e. mixtures of non polymeric ion exchange compounds, e.g. inorganic salts, and at least one polymer are classified in [C08J 5/22](#) ; membranes based on cellulose are classified in [C08J 5/2212](#) .
2. Methods for incorporating reinforcement supports or filling bodies are classified in [C08J 5/2206](#) (the support or filling body has no ion exchange activity).
3. Groups, e.g. SO₂F, which do not have ion-exchanging properties, but which may, by simple hydrolysis in an alkaline, neutral or acid medium, be transformed into ion-exchanging groups, e.g. SO₂H, are considered as such.
4. Ion-exchanging fibrous fabrics are considered as heterogeneous membranes and are classified in [C08J 5/2275](#) ; they include composite membranes, mixtures of two or more (ion exchange) polymers.
5. Membranes obtained by homogeneous melting or from a solution are considered as homogeneous, even if the membrane contains (after

solidification of the melt or the solution) heterogeneous elements, e.g. filling bodies, supports e.g. in the form of fabrics, or the like, i.e. the ion exchange resin forms the membrane.

6. Reactions which change the nature of the ion-exchanging groups, introduction of ion-exchanging groups, after-treatment (membrane has already been formed) are classified in [C08J 5/2287](#).

7. Quaternising reactions are not considered as after-treatments.

- U C08J 5/2206 • • • {based on organic and/or inorganic macromolecular compounds}
- U C08J 5/2218 • • • • {Synthetic macromolecular compounds}
- U C08J 5/2231 • • • • • {based on macromolecular compounds obtained by reactions involving unsaturated carbon-to-carbon bonds}
- C08J 5/2243 • • • • • • {obtained by introduction of active groups capable of ion-exchange into compounds of the type [C08J 5/2231](#)}

- C08J 7/00 Chemical treatment or coating of shaped articles made of macromolecular substances (-coating with metallic material [C23C](#) ; electrolytic deposition of metals [C25](#)-)**
- C08J 7/04 • Coating{(-~~Coating compositions per se C09D 4/00 , C09D 101/00 to C09D 201/00~~ Coating compositions per se [C09D 4/00](#) , [C09D 101/00](#) to [C09D 201/00](#))}
- C08J 7/047 • • {with only one layer of a composition containing a polymer binder (-with more layers [C08J 7/042](#)-)}
- U C08J 7/12 • Chemical modification
- C08J 7/123 • • {Treatment by wave energy or particle radiation (-[C08J 7/18](#) takes precedence; surface shaping of articles by plasma treatment [B29C 59/14](#) , by wave energy or particle radiation [B29C 59/16](#)-)}

- C08J 9/00 Working-up of macromolecular substances to porous or cellular articles or materials; After-treatment thereof (-mechanical aspects [B29C 44/00](#) ; foamed polymeric products of isocyanates or isothiocyanates characterised by the monomers or catalysts used [C08G 18/00](#)-)**
- C08J 9/0085 • {Use of fibrous compounding ingredients (-[C08J 9/0076](#) takes precedence-)}
- U C08J 9/04 • using blowing gases generated by a previously added blowing agent
- U C08J 9/12 • • by a physical blowing agent
- U C08J 9/14 • • • organic
- C08J 9/149 • • • • {-Mixtures of blowing agents covered by more than one of the groups [C08J 9/141](#) to [C08J 9/143](#)-}

- NOTE
In groups [C08J 9/16](#) to [C08J 9/232](#) , the following term is used with the meaning indicated:
- "expandable" includes also expanding, pre-expanded or expanded
- C08J 9/24 • by surface fusion and bonding of particles to form voids, e.g. sintering (-of expandable particles [C08J 9/232](#)-)
- C08J 9/32 • from compositions containing microballoons, e.g. syntactic foams (-making microballoons [B01J 13/02](#)-)

- C08J 11/00 Recovery or working-up of waste materials (-polymerisation processes involving purification or recycling of waste polymers or their depolymerisation products [C08B](#) , [C08C](#) , [C08F](#) , [C08G](#) , [C08H](#) ; mechanical treatments [B29](#)-)**
- U C08J 11/04 • of polymers

- U C08J 11/06
 - • without chemical reactions
- C08J 11/08
 - • • using selective solvents for polymer components (working-up tar by extraction with selective solvents [C10C 1/18](#) ; working-up pitch, asphalt, bitumen by selective extraction [C10C 3/08](#))
- C08J 11/10
 - • by chemically breaking down the molecular chains of polymers or breaking of crosslinks, e.g. devulcanisation (depolymerisation to the original monomer [C07](#); production of liquid hydrocarbon mixtures from rubber or rubber waste [C10G 1/10](#) ; { depolymerisation of halogenated hydrocarbon polymers [C07C 17/367](#) ; depolymerisation of polyesters, [C07C 51/09](#) , [C07C 63/26](#) ; depolymerisation of polyamides [C07D 201/12](#) ; depolymerisation of rubber [C08C 19/08](#) })
- C08J 11/12
 - • • by dry-heat treatment only (destructive distillation of carbonaceous materials for production of gas, coke, tar or similar matters [C10B](#))
- C08J 11/16
 - • • by treatment with inorganic material ([C08J 11/14](#) takes precedence)
- U C08J 2201/00** **Foams characterised by the foaming process**
- U C08J 2201/02
 - characterised by mechanical pre- or post-treatments
- C08J 2201/032
 - • Impregnation of a formed object with a gas (expandable particles, e.g. polystyrene beads [C08J 9/18](#))
- C08J 2305/00** **Characterised by the use of polysaccharides or of their derivatives not provided for in groups [C08J 2301/00](#) or [C08J 2303/00](#)**
- U C08J 2309/00** **Characterised by the use of homopolymers or copolymers of conjugated diene hydrocarbons**
- C08J 2309/10
 - Latex ([C08J 2309/04](#) , [C08J 2309/08](#) take precedence)
- C08J 2315/00** **Characterised by the use of rubber derivatives ([C08J 2311/00](#) , [C08J 2313/00](#) takes precedence)**
- C08J 2319/00** **Characterised by the use of rubbers not provided for in groups [C08J 2307/00](#) to [C08J 2317/00](#)**
- U C08J 2323/00** **Characterised by the use of homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond; Derivatives of such polymers**
- U C08J 2323/02
 - not modified by chemical after treatment
- U C08J 2323/04
 - • Homopolymers or copolymers of ethene
- C08J 2323/08
 - • • Copolymers of ethene ([C08J 2323/16](#) takes precedence)
- U C08J 2323/10
 - • Homopolymers or copolymers of propene
- C08J 2323/14
 - • • Copolymers of propene ([C08J 2323/16](#) takes precedence)
- U C08J 2323/26
 - modified by chemical after-treatment
- C08J 2323/28
 - • by reaction with halogens or halogen-containing compounds ([C08J 2323/32](#) takes precedence)
- U C08J 2325/00** **Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring; Derivatives of such polymers**
- U C08J 2325/02
 - Homopolymers or copolymers of hydrocarbons
- U C08J 2325/04
 - • Homopolymers or copolymers of styrene
- C08J 2325/08
 - • • Copolymers of styrene ([C08J 2329/08](#) , [C08J 2335/06](#) , [C08J 2355/02](#) take precedence)

- U C08J 2329/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical; Hydrolysed polymers of esters of unsaturated alcohols with saturated carboxylic acids; Derivatives of such polymer
- C08J 2329/02 • Homopolymers or copolymers of unsaturated alcohols (~~-C08J 2329/14 takes precedence-~~)
- C08J 2329/10 • Homopolymers or copolymers of unsaturated ethers (~~-C08J 2335/08 takes precedence-~~)
- C08J 2331/00** Characterised by the use of copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, or carbonic acid, or of a haloformic acid (~~-of hydrolysed polymers C08J 2329/00-~~)
- U C08J 2333/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides, or nitriles thereof; Derivatives of such polymers.
- U C08J 2333/18 • Homopolymers or copolymers of nitriles
- C08J 2333/20 • • Homopolymers or copolymers of acrylonitrile (~~-C08J 2355/02 takes precedence-~~)
- U C08J 2335/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least one other carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; Derivatives of such polymers
- C08J 2335/02 • Characterised by the use of homopolymers or copolymers of esters (~~-C08J 2335/06 , C08J 2335/08 take precedence-~~)
- C08J 2335/04 • Homopolymers or copolymers of nitriles (~~-C08J 2335/06 , C08J 2335/08 take precedence-~~)
- C08J 2337/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (~~-of cyclic esters of polyfunctional acids C08J 2331/00 ; of cyclic anhydrides of unsaturated acids C08J 2335/00-~~); Derivatives of such polymers
- C08J 2343/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing boron, silicon, phosphorus, selenium, tellurium or a metal; Derivatives of such polymers (of metal salts, e.g. phenolates, alcoholates, see the parent compounds)
- C08J 2345/00** Characterised by the use of homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic ring system; Derivatives of such polymers (~~-of cyclic anhydrides or imides C08J 2335/00 ; of cyclic esters of polyfunctional acids C08J 2331/00-~~)

- C08J 2347/00** Characterised by the use of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds; Derivatives of such polymers (-C08J 2345/00 takes precedence; of conjugated diene rubbers C08J 2309/00 to C08J 2321/00-)
- C08J 2351/00** Characterised by the use of graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds (-for ABS polymers C08J 2355/02-); Derivatives of such polymers
- C08J 2353/00** Characterised by the use of homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C08J 2323/00 to C08J 2353/00
- C08J 2355/00** Characterised by the use of homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C08J 2323/00 to C08J 2353/00
- C08J 2361/00** Characterised by the use of condensation polymers of aldehydes or ketones (-with polyalcohols C08J 2359/00 ; with polynitriles C08J 2377/00-); Derivatives of such polymers
- C08J 2361/20 • Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (-with amino phenols C08J 2361/04-)
- C08J 2361/34 • Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C08J 2361/04 , C08J 2361/18 , and C08J 2361/20
- C08J 2365/00** Characterised by the use of macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain (-C08J 2307/00 to C08J 2357/00 , C08J 2361/00 take precedence-); Derivatives of such polymers
- C08J 2367/00** Characterised by the use of polyesters obtained by reactions forming a carboxylic ester link in the main chain (-of polyester-amides C08J 2377/12 ; of polyester-imides C08J 2379/08-); Derivatives of such polymers
- C08J 2367/02 • Polyesters derived from dicarboxylic acids and dihydroxy compounds; (-C08J 2367/06 takes precedence-)
- C08J 2367/04 • Polyesters derived from hydroxy carboxylic acids, e.g. lactones (-C08J 2367/06 takes precedence-)
- C08J 2371/00** Characterised by the use of polyethers obtained by reactions forming an ether link in the main chain (-of polyacetals C08J 2359/00 ; of epoxy resins C08J 2363/00 ; of polythioether-ethers C08J 2381/02 ; of polyethersulfones C08J 2381/06-); Derivatives of such polymers
- C08J 2371/08 • Polyethers derived from hydroxy compounds or from their metallic derivatives (-C08J 2371/02 takes precedence-)
- C08J 2373/00** Characterised by the use of macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C08J 2359/00 to C08J 2371/00-; Derivatives of such polymers
- C08J 2377/00** Characterised by the use of polyamides obtained by reactions forming a carboxylic amide link in the main chain (-of polyhydrazides C08J 2379/06 ; of polyamide-imides or polyamide acids C08J 2379/08-); Derivatives of such polymers
- C08J 2377/02 • Polyamides derived from omega-amino carboxylic acids or from lactams thereof (-C08J 2377/10 takes precedence-)

C08J 2377/04	• Polyamides derived from alpha-amino carboxylic acids ((C08J 2377/10 takes precedence-)
C08J 2377/06	• Polyamides derived from polyamines and polycarboxylic acids ((C08J 2377/10 takes precedence-)
C08J 2379/00	Characterised by the use of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen with or without oxygen, or carbon only, not provided for in groups C08J 2361/00 to C08J 2377/00
U C08J 2383/00	Characterised by the use of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon with or without sulfur, nitrogen, oxygen, or carbon only; Derivatives of such polymers
U C08J 2383/04	• Polysiloxanes
C08J 2383/06	• • containing silicon bound to oxygen-containing groups ((C08J 2383/12 takes precedence-)
C08J 2383/10	• Block- or graft-copolymers containing polysiloxane sequences ((obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C08J 2351/08 , C08J 2353/00)
C08J 2383/14	• in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms ((C08J 2383/10 takes precedence-)
C08J 2393/00	Characterised by the use of natural resins; Derivatives thereof ((of polysaccharides C08J 2301/00 to C08J 2305/00 ; of natural rubber C08J 2317/00)
C08J 2397/00	Characterised by the use of lignin-containing materials ((of polysaccharides C08J 2301/00 to C08J 2305/00)
C08J 2399/00	Characterised by the use of natural macromolecular compounds or of derivatives thereof not provided for in groups C08J 2301/00 to C08J 2307/00 or C08J 2389/00 to C08J 2397/00
C08J 2405/00	Characterised by the use of polysaccharides or of their derivatives not provided for in groups C08J 2401/00 or C08J 2403/00
U C08J 2409/00	Characterised by the use of homopolymers or copolymers of conjugated diene hydrocarbons
C08J 2409/10	• Latex ((C08J 2409/04 , C08J 2409/08 take precedence-)
C08J 2415/00	Characterised by the use of rubber derivatives ((C08J 2411/00 , C08J 2413/00 takes precedence-)

COMPOSITIONS OF MACROMOLECULAR COMPOUNDS (pesticides, herbicides [A01N](#); pharmaceuticals, cosmetics [A61K](#); explosives [C06B](#); compositions based on polymerisable monomers [C08F](#), [C08G](#); paints, inks, varnishes, dyes, polishes, adhesives [C09](#); lubricants [C10M](#); detergents [C11D](#); artificial filaments or fibres [D01F](#); textile treating compositions [D06](#))

NOTES

Compositions classified in [C08K](#) according to note 3 of [C08K](#), are not classified in [C08L](#).

Documents classified before 09.2003: Classification is given in the form of C-Sets. The polymer in majority is given a [C08L](#) symbol, and the minor components are characterised by Indexing Codes taken from the list below. The Indexing Codes are linked. The polymer in majority is always first in the C-set. List of **M08L** codes: [C08L 23/00](#) , [C08L 23/26](#) , [C08L 25/00](#) , [C08L 27/00](#) , [C08L 27/04](#) , [C08L 27/12](#) , [C08L 29/00](#) , [C08L 31/00](#) , [C08L 33/00](#) , [C08L 35/00](#) , [C08L 37/00](#) , [C08L 51/00](#) , [C08L 53/00](#) , [C08L 55/02](#) , [C08L 61/04](#) , [C08L 61/20](#) , [C08L 63/00](#) , [C08L 67/00](#) , [C08L 67/02](#) , [C08L 67/025](#) , [C08L 67/03](#) , [C08L 67/04](#) , [C08L 67/06](#) , [C08L 67/07](#) , [C08L 69/00](#) , [C08L 69/005](#) , [C08L 71/00](#) , [C08L 75/04](#) , [C08L 77/00](#) , [C08L 77/08](#) , [C08L 77/12](#) , [C08L 79/08](#) , [C08L 79/085](#) , [C08L 81/00](#) , [C08L 83/00](#) , [C08L 85/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/00](#) - [C08L 2666/86](#) . Documents from group [C08L 23/00](#) - [C08L 23/36](#) , [C08L 45/00](#) - [C08L 45/02](#) and [C08L 49/00](#) have all been reclassified following Note 3 below. An additive is classified in the last appropriate place in the list as selected for each [C08L](#) group. Examples:

- A composition based on a polyamide and a graft polymer is classified in ([C08L 77/00](#) , [C08L 2666/24](#)).
- A composition based on polyvinylchloride and containing CaCO₃ is classified according to note 4 of C08K, i.e. in ([C08K 3/26](#) , [C08L 27/06](#)). If this composition contains also a polyamide, then the classification will be ([C08L 27/06](#) , [C08L 77/00](#) , [C08K 3/26](#)).
- A composition based on a polysiloxane ([C08L 83/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C08L 83/04](#) , [C08L 83/04](#) , [C08L 2666/34](#) , [C08L 2666/58](#)).

From 01.09.2003 until April 2012: Classification is given in the form of C-Sets. The polymer in majority is given a [C08L](#) class, and the minor components are characterised by Indexing Codes taken from **M08L** or **M08K** and they are linked or unlinked. The polymer in majority is always first in the C-Set. List of **M08L** codes in the C-Set: [C08L 1/00](#) , [C08L 81/00](#) , [C08L 83/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/02](#) - [C08L 2666/08](#) , [C08L 2666/14](#) - [C08L 2666/26](#) . Examples:

- A blend of 60 parts polyvinylchloride ([C08L 27/06](#)) and 40 parts polyamide is classified in ([C08L 27/06](#) , [C08L 2666/20](#)) and [C08L 77/00](#) .
- A blend of 50 parts polyvinylchloride ([C08L 27/06](#)) and 50 parts polyamide ([C08L 77/00](#)) is classified

in ([C08L 27/06](#) , [C08L 2666/20](#)) and [C08L 77/00](#) , as well as in ([C08L 77/00](#) , [C08L 2666/04](#)) and [C08L 27/06](#) . c. A composition based on polyvinylchloride and containing CaCO₃ is classified according to [N: Note 4 of C08K, i.e. in ([C08K 3/26](#) , [C08L 27/06](#)). If this composition contains also a polyamide, then the classification will be ([C08L 27/06](#) , [C08L 2666/20](#)) and [C08K 3/26](#) . d. A composition based on a first polysiloxane ([C08L 83/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C08L 83/04](#) , [C08L 83/04](#) , [C08K 5/13](#) , [C08K 3/36](#)) and [C08L 2205/02](#) .

From April 2012 onwards, after the notation [C08L](#), notations concerning the other constituents of the composition may be added, in the form of C-Sets. The further constituent is added with an indexing code. The indexing codes are chosen from [C08L 1/00](#) - [C08L555/86](#) or [C08K](#) and they may be linked or unlinked: - [C08L 1/00](#) - [C08L 101/10](#) are linked. - [C08L 2201/00](#) - [C08L 2555/86](#) are unlinked. The polymer in majority is always first in the C-Set. Examples:
a. A blend of 60 parts polyvinylchloride ([C08L 27/06](#)) and 40 parts polyamide ([C08L 77/00](#)) is classified in ([C08L 27/06](#) , [C08L 77/00](#)). b. A blend of 50 parts polyvinylchloride ([C08L 27/06](#)) and 50 parts polyamide ([C08L 77/00](#)) is classified in ([C08L 27/06](#) , [C08L 77/00](#)) and ([C08L 77/00](#) , [C08L 27/06](#)). c. A composition based on polyvinylchloride and containing CaCO₃ is classified according to [N: Note 4 of [C08K](#), i.e. in ([C08K 3/26](#) , [C08L 27/06](#)). If this composition contains also a polyamide, then the classification will be ([C08L 27/06](#) , [C08L 77/00](#) , [C08K 3/26](#)). d. A composition based on a first polysiloxane ([C08L 83/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C08L 83/04](#) , [C08L 83/04](#) , [C08K 5/13](#) , [C08K 3/36](#)) and [C08L 2205/02](#) . e. A composition containing a polyamide in majority, a polyester and a polyethylene is classified in ([C08L 77/00](#) , [C08L 67/00](#) , [C08L 23/06](#)) and [C08L 2205/03](#) .

WARNING

"Rubber" includes:

natural or conjugated diene rubbers;
rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for compositions of such macromolecular compounds).

In this subclass:

compositions are classified according to the mutual proportions by weight of only the macromolecular constituents;
compositions are classified according to the macromolecular constituent or constituents present in the highest proportion: if all these constituents are present in equal proportions the composition is classified according to each of these constituents.

	C08L 31/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid or of a haloformic acid (of hydrolysed polymers C08L 29/00); Compositions of derivatives of such polymers
U	C08L 33/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and only one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides or nitriles thereof; Compositions of derivatives of such polymers
	C08L 33/04	• Homopolymers or copolymers of esters (of C08L 43/04 takes precedence)
U	C08L 33/06	• • of esters containing only carbon, hydrogen and oxygen, which oxygen atoms are present only as part of the carboxyl radical
	C08L 33/062	• • • {Copolymers with monomers not covered by C08L 33/06 }
U	C08L 33/18	• Homopolymers or copolymers of nitriles
	C08L 33/20	• • Homopolymers or copolymers of acrylonitrile (of C08L 55/02 takes precedence)
U	C08L 35/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least one other carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; Compositions of derivatives of such polymers
	C08L 35/02	• Homopolymers or copolymers of esters (of C08L 35/06 , C08L 35/08 take precedence)
	C08L 35/04	• Homopolymers or copolymers of nitriles (of C08L 35/06 , C08L 35/08 take precedence)
	C08L 37/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (of cyclic esters of polyfunctional acids C08L 31/00 ; of cyclic anhydrides of unsaturated acids C08L 35/00); Compositions of derivatives of such polymers
	C08L 43/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and containing boron, silicon, phosphorus, selenium, tellurium or a metal; Compositions of derivatives of such polymers (of metal salts, e.g. phenolates, alcoholates, see the parent compounds)
	C08L 45/00	Compositions of homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic ring system; Compositions of derivatives of such polymers (of cyclic anhydrides or imides C08L 35/00 ; of cyclic esters of polyfunctional acids C08L 31/00)
	C08L 47/00	Compositions of homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds; Compositions of derivatives of such polymers (of C08L 45/00 takes precedence; of conjugated diene rubbers C08L 9/00 to C08L 21/00)

	C08L 51/00 Compositions of graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds (-for ABS polymers C08L 55/02); Compositions of derivatives of such polymers
C08L 51/003	· {grafted on to macromolecular compounds obtained by reactions only involving unsaturated carbon-to-carbon bonds (- C08L 51/04 , C08L 51/06 take precedence-)}
C08L 55/00	Compositions of homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C08L 23/00 to C08L 53/00
U C08L 57/00	Compositions of unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds
U C08L 57/06	· Homopolymers or copolymers containing elements other than carbon and hydrogen
C08L 57/12	· · containing nitrogen atoms
C08L 59/00	Compositions of polyacetals; Compositions of derivatives of polyacetals (-of polyvinyl acetals C08L 29/14)
C08L 61/00	Compositions of condensation polymers of aldehydes or ketones (-with polyalcohols C08L 59/00 ; with polynitriles C08L 77/00); Compositions of derivatives of such polymers
C08L 61/20	· Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (-with aminophenols C08L 61/04 -)
C08L 61/34	· Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C08L 61/04 , C08L 61/18 and C08L 61/20
U C08L 63/00	Compositions of epoxy resins; Compositions of derivatives of epoxy resins
C08L 63/10	· Epoxy resins modified by unsaturated compounds
	<p><u>NOTE</u></p> <p>In groups C08L 65/00 to C08L 85/00 , in the absence of an indication to the contrary, compositions of macromolecular compounds, obtained by reactions forming two different linkages in the main chain, are classified only according to the linkage present in excess</p>
C08L 65/00	Compositions of macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain (-C08L 7/00 to C08L 57/00 , C08L 61/00 take precedence-); Compositions of derivatives of such polymers
C08L 67/00	Compositions of polyesters obtained by reactions forming a carboxylic ester link in the main chain (-of polyester-amides C08L 77/12 ; of polyester-imides C08L 79/08); Compositions of derivatives of such polymers
C08L 67/02	· Polyesters derived from dicarboxylic acids and dihydroxy compounds (- C08L 67/06 takes precedence-)
C08L 67/04	· Polyesters derived from hydroxycarboxylic acids, e.g. lactones (- C08L 67/06 takes precedence-)
C08L 71/00	Compositions of polyethers obtained by reactions forming an ether link in the main chain (-of polyacetals C08L 59/00 ; of epoxy resins C08L 63/00 ; of polythioether-ethers C08L 81/02 ; of polyether-sulfones C08L 81/06); Compositions of derivatives of such polymers
C08L 71/08	· Polyethers derived from hydroxy compounds or from their metallic derivatives (- C08L 71/02 takes precedence-){not used}
C08L 71/10	· · from phenols {not used}

C08L 73/00	Compositions of macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C08L 59/00 to C08L 71/00 ; Compositions of derivatives of such polymers
C08L 77/00	Compositions of polyamides obtained by reactions forming a carboxylic amide link in the main chain (of polyhydrazides C08L 79/06 ; of polyamideimides or polyamide acids C08L 79/08); Compositions of derivatives of such polymers
C08L 77/02	• Polyamides derived from omega-amino carboxylic acids or from lactams thereof (C08L 77/10 takes precedence-)
C08L 77/04	• Polyamides derived from alpha-amino carboxylic acids (C08L 77/10 takes precedence-)
C08L 77/06	• Polyamides derived from polyamines and polycarboxylic acids (C08L 77/10 takes precedence-)
C08L 79/00	Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen with or without oxygen or carbon only, not provided for in groups C08L 61/00 to C08L 77/00
U C08L 83/00	Compositions of macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon with or without sulfur, nitrogen, oxygen or carbon only; Compositions of derivatives of such polymers <u>NOTE</u> In this main group, from 01.09.2010 onwards, new documents are classified according to the following system. The composition is identified with the C-Set, e.g. (C08L 83/04 , C08L 83/04) (for a composition containing two or more siloxanes), while the info
U C08L 83/04	• Polysiloxanes
C08L 83/06	• • containing silicon bound to oxygen-containing groups (C08L 83/12 takes precedence-)
C08L 83/10	• Block- or graft-copolymers containing polysiloxane sequences (obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C08L 51/08 , C08L 53/00 -)
C08L 83/14	• in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (C08L 83/10 takes precedence-)
U C08L 87/00	Compositions of unspecific macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon bonds
C08L 87/005	• {Block or graft polymers not provided for in groups C08L 1/00 to C08L 85/04 }
C08L 89/00 - C08L 101/00	<u>Compositions of natural macromolecular compounds or of derivatives thereof (of polysaccharides C08L 1/00 to C08L 5/00 ; of natural rubber C08L 7/00-)</u>
C08L 89/00	Compositions of proteins; Compositions of derivatives thereof (foodstuff preparations A23J 3/00)
C08L 91/00	Compositions of oils, fats or waxes; Compositions of derivatives thereof (polishing compositions, ski waxes C09G ; soaps, detergent compositions C11D)
C08L 93/00	Compositions of natural resins; Compositions of derivatives thereof (polishing compositions C09G)

	C08L 93/02	• Shellac (French-polish C09F <i>French polish C09F</i>)
U	C08L 97/00	Compositions of lignin-containing materials
	C08L 97/002	• {Peat, lignite, coal (-ceramic products based on carbon or carbides C04B 35/00 ; working-up peat C10F 7/00 ; briquettes C10L 5/00 -)}
	C08L 99/00	Compositions of natural macromolecular compounds or of derivatives thereof not provided for in groups C08L 89/00 to C08L 97/00
U	C08L 101/00	Compositions of unspecified macromolecular compounds
U	C08L 101/02	• characterised by the presence of specified groups,{e.g. terminal or pendant functional groups}
	C08L 101/06	• • containing oxygen atoms{(C08L 101/025 takes precedence-)}
	C08L 101/12	• characterised by physical features, e.g. anisotropy, viscosity or electrical conductivity (-liquid crystal materials or compositions C09K 19/00-)
U	C08L 2205/00	Polymer mixtures characterised by other features
	C08L 2205/02	• containing two or more polymers of the same C08L -group
U	C08L 2207/00	Properties characterising the ingredient of the composition
U	C08L 2207/06	• Properties of polyethylene
	C08L 2207/066	• • LDPE (<i>radical process</i>)(radical process)
	C08L 2666/00	Composition of polymers characterized by a further compound in the blend, being organic macromolecular compounds, natural resins, waxes or and bituminous materials, non-macromolecular organic substances, inorganic substances or characterized by their function in the composition (not used)

NOTE

These codes are not used for the classification of new documents. They are a replacement of the combination classes.

U	C08L 2666/02	• Organic macromolecular compounds, natural resins, waxes or and bituminous materials
	C08L 2666/04	• • Macromolecular compounds according to groups C08L 7/00 to C08L 49/00 ,or C08L 55/00 to C08L 57/00 -; Derivatives thereof
	C08L 2666/08	• • • Homopolymers or copolymers according to C08L 7/00 to C08L 21/00 -; Derivatives thereof
	C08L 2666/10	• • • Homopolymers or copolymers according to C08L 39/00 to C08L 49/00 -; Derivatives thereof
	C08L 2666/12	• • • Homopolymers or copolymers not provided for in C08L 2666/06 to C08L 2666/10
	C08L 2666/14	• • • Macromolecular compounds according to C08L 59/00 to C08L 87/00 -; Derivatives thereof
	C08L 2666/16	• • • Addition or condensation polymers of aldehydes or ketones according to C08L 59/00 to C08L 61/00 -; Derivatives thereof
	C08L 2666/18	• • • Polyesters or polycarbonates according to C08L 67/00 to C08L 69/00 -; Derivatives thereof
	C08L 2666/20	• • • Macromolecular compounds having nitrogen in the main chain according to C08L 75/00 to C08L 79/00 -; Derivatives thereof
	C08L 2666/22	• • • Macromolecular compounds not provided for in C08L 2666/16 to C08L 2666/20
	C08L 2666/24	• • Graft or block copolymers according to groups C08L 51/00 , C08L 53/00 or C08L 55/02 -; Derivatives thereof

C08L 2666/26

- Natural polymers, natural resins or derivatives thereof according to [C08L 1/00](#) to [C08L 5/00](#) , [C08L 89/00](#) , [C08L 93/00](#) , [C08L 97/00](#) or [C08L 99/00](#)

Project: N/A (C09B)**C09B**

ORGANIC DYES OR CLOSELY-RELATED COMPOUNDS FOR PRODUCING DYES; MORDANTS; LAKES (fermentation or enzyme-using processes to synthesise a desired chemical compound [C12P](#))

NOTE

In this subclass, in the absence of an indication to the contrary, a compound is classified in the last appropriate place

WARNINGS

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

- C09B 69/10 • Polymeric dyes; Reaction products of dyes with monomers or with macromolecular compounds (addition products of alkylene oxide to dyes, [C09B 69/00](#) ; dyeing with polymeric dyes [D06P 1/0056](#))

Project: N/A (C09C)

- U C09C 1/00 Treatment of specific inorganic materials other than fibrous fillers (luminescent or tenebrescent materials [C09K](#)); Preparation of carbon black**
- C09C 1/0015 • {Pigments exhibiting interference colours, e.g. transparent platelets of appropriate thinness or flaky substrates, e.g. mica, bearing appropriate thin transparent coatings ([C09C 1/0078](#), [C09C 1/62](#) take precedence)}
- NOTE**
- 1. The optical properties of the interference pigments are depending on the order of the different layers applied on the substrate in view of their refractive indices; A refractive index < or = 1.8 is considered low, a refractive index >1.8 is considered high; A dye is always an organic, coloured material. An aluminium lake compound would for classification purposes also fall under this definition, as well as any coloured metal chelate or metal complex with organic ligands; An interference pigment can e.g. have a flaky, spherical or ellipsoidal core; A pigment comprising a core consisting of a metal is only considered as an interference pigment if it shows properties typical for interference pigments
- 2. In groups [C09C 1/0015](#) to [C09C 1/0075](#) it is desirable to add indexing codes relating to the compositional and structural details chosen from groups [C09C 2200/00](#) to [C09C 2220/20](#)
- C09C 1/0021 • • {comprising a core coated with only one layer having a high or low refractive index}

- C09C 1/52 . . . Channel black; {Preparation thereof-(separation or recovery [C09C 1/487](#))}
- C09C 1/54 . . . Acetylene black; Thermal black; {Preparation thereof-(separation or recovery [C09C 1/487](#))}

- U **C09C 3/00** **Treatment in general of inorganic materials, other than fibrous fillers, to enhance their pigmenting or filling properties (dyeing other macromolecular particles [C08J 3/20](#); dyeing macromolecular fibres [D06P](#))**

- C09C 3/006 . {Combinations of treatments provided for in groups [C09C 3/04](#) to [C09C 3/12](#)}

NOTE

When classifying in this group, it is desirable to classify the individual treatment steps with symbols chosen from groups [C09C 3/04](#) to [C09C 3/12](#).

Project: N/A (C09D)

C09D

COATING COMPOSITIONS, e.g. PAINTS, VARNISHES OR LACQUERS; FILLING PASTES; CHEMICAL PAINT OR INK REMOVERS; INKS; CORRECTING FLUIDS; WOODSTAINS; PASTES OR SOLIDS FOR COLOURING OR PRINTING; USE OF MATERIALS THEREFOR (-cosmetics [A61K](#) ; processes for applying liquids or other fluent materials to surfaces, in general, [B05D](#) ; staining wood [B27K 5/02](#) ; glazes or vitreous enamels [C03C](#) ; organic macromolecular compounds [C08](#) ; organic dyes or closely-related compounds for producing dyes, mordants or lakes, per se , [C09B](#) ; treatment of inorganic materials other than fibrous fillers used as pigments or fillers [C09C](#) ; natural resins, French polish, drying-oils, driers, turpentine, per se , [C09F](#) ; polishing compositions other than French polish, ski waxes [C09G](#) ; preparation of glue or gelatine [C09H](#), { [C08H 1/06](#) } ; adhesives or use of materials as adhesives [C09J](#) ; materials for sealing or packing joints or covers [C09K 3/10](#) ; materials for stopping leaks [C09K 3/12](#) ; processes for the electrolytic or electrophoretic production of coatings [C25D](#) ; textile-treating compositions [D06](#) ; paper-making [D21](#) ; conductors, insulators [H01B](#) -)

NOTES

In this subclass, the following terms or expressions are used with the meanings indicated:

- "use of materials for coating compositions" means the use of known or new polymers or products;
- "rubber" includes:
 - a) natural or conjugated diene rubbers;
 - b) rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for coating compositions based on such macromolecular compounds);
- "based on" is defined by means of Note 3, below;
- "filling pastes" means materials used to fill up the holes or cavities of a substrate in order to smooth its surface prior to coating.

In this subclass, coating compositions containing specific macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.

Example: a coating composition containing polyethene and amino-propyltrimethoxysilane is classified in group [C09D 123/06](#) .

However, coating compositions containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups [C09D 159/00](#) to [C09D 187/00](#) are classified according to the unsaturated non-macromolecular component in group [C09D 4/00](#) .

Example: a coating composition containing polyethene and styrene monomer is classified in group [C09D 4/06](#) .

Aspects relating to the physical nature of the coating compositions or to the effects produced, as defined in group [C09D 5/00](#) , if clearly and explicitly stated, are also classified in this subclass.

Coating compositions characterised by other features, e.g. additives, are classified in group [C09D 7/00](#) , unless the macromolecular constituent is specified.

In this subclass, coating compositions comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the composition is based. If the composition is based on two or more constituents,

present in equal proportions, the composition is classified according to each of these constituents.

Examples:

A coating composition containing 80 parts of polyethylene and 20 parts of polyvinylchloride

is classified in group [C09D 123/06](#) ;

A coating composition containing 40 parts of polyethylene and 40 parts of polyvinylchloride

is classified in groups [C09D 123/06](#) and [C09D 127/06](#) .

Documents classified up until 04.2012: after the notation of group [C09D 4/06](#) , and separated therefrom by a + sign, notations concerning the macromolecular compound may be added. The notations are selected from the main groups [C08F 251/00](#) to [C08F 291/00](#) and from the subgroups of [C08F 290/00](#) to [C08F 290/048](#) and [C08F 290/08](#) to [C08F 290/128](#) .

Example: a paint based on a mixture of methylmethacrylate monomer and a polymer of vinylchloride is classified in [C09D 4/06](#) + [C08F 259/04](#) .

From April 2012 onwards, after the notation [C09D 4/00](#) , classification concerning the monomer may be added, in the form of C-sets. The notation is selected from [C08F 210/00](#) to [C08F 246/00](#) , [C08G 77/00](#) to [C08G 77/04](#) or [C08G 77/20](#) to [C08G 77/30](#) . Ex.: A paint based on a mixture of methylmethacrylate monomer and a polymer of vinylchloride is classified ([C09D 4/06](#) , [C08F 259/04](#)).

Documents classified up until 09-2003: Classification is given in the form of C-Sets. The polymer in majority is given a [C09D 101/00](#) - [C09D 201/10](#) symbol, and the minor components are characterised by Indexing Codes taken from the list below. The Indexing Codes are linked. The polymer in majority is always first in the C-set. List of **M08L** codes: [C08L 23/00](#) , [C08L 23/26](#) , [C08L 25/00](#) , [C08L 27/00](#) , [C08L 27/04](#) , [C08L 27/12](#) , [C08L 29/00](#) , [C08L 31/00](#) , [C08L 33/00](#) , [C08L 35/00](#) , [C08L 37/00](#) , [C08L 51/00](#) , [C08L 53/00](#) , [C08L 55/02](#) , [C08L 61/04](#) , [C08L 61/20](#) , [C08L 63/00](#) , [C08L 67/00](#) , [C08L 67/02](#) , [C08L 67/025](#) , [C08L 67/03](#) , [C08L 67/04](#) , [C08L 67/06](#) , [C08L 67/07](#) , [C08L 69/00](#) , [C08L 69/005](#) , [C08L 71/00](#) , [C08L 75/04](#) , [C08L 77/00](#) , [C08L 77/08](#) , [C08L 77/12](#) , [C08L 79/08](#) , [C08L 79/085](#) , [C08L 81/00](#) , [C08L 83/00](#) , [C08L 85/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/00](#) - [C08L 2666/86](#) . Documents from group [C09D 123/00](#) - [C09D 123/36](#) , [C09D 145/00](#) - [C09D 145/02](#) and [C09D 149/00](#) have all been reclassified following Note 3 below. An additive is classified in the last appropriate place in the list as selected for each [C09D](#) group.

Examples: a. A coating composition based on a polyamide and a graft polymer is classified in ([C09D 177/00](#) , [C08L 2666/24](#)). b. A coating composition based on polyvinylchloride and containing CaCO₃ is classified according to note 4 of [C08K](#) , i.e. in [C08K 3/26](#) and [C09D 127/06](#) . If this coating composition contains also a polyamide, then the classification will be ([C09D 127/06](#) , [C08L 77/00](#) , [C08K 3/26](#)). c. A coating composition based on a polysiloxane ([C09D 183/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C09D 183/04](#) , [C08L 83/04](#) , [C08L 2666/34](#) , [C08L 2666/54](#)).

From 01.09.2003 until April 2012: Classification is given in the form of C-Sets. The polymer in majority is given a [C09D](#) symbol, and the minor components are characterised by Indexing Codes taken from **M08L** or **M08K** and they are linked or unlinked. The polymer in majority is always first in the C-set. List of indexing codes in the C-Sets: [C08L 1/00](#) , [C08L 81/00](#) , [C08L 83/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/02](#) - [C08L 2666/08](#) , [C08L 2666/14](#) - [C08L 2666/26](#) . Examples:

a. A coating of 60 parts polyvinylchloride ([C09D 127/06](#)) and 40 parts polyamide is classified in ([C09D 127/06](#) , [C08L 2666/20](#)), [C08L 77/00](#) . b. A coating of 50 parts polyvinylchloride ([C09D 127/06](#)) and 50 parts polyamide ([C09D 177/00](#)) is classified in ([C09D 127/06](#) , [C08L 2666/20](#)), and [C08L 77/00](#) , as well as ([C09D 177/00](#) , [C08L 2666/04](#)) and [C08L 27/06](#) . c. A coating composition based on polyvinylchloride and containing CaCO₃ is classified according to [N: Note 4 of [C08K](#) , i.e. in [C08K 3/26](#) , [C09D 127/06](#) . If this composition contains also a polyamide, then the classification will be ([C09D 127/06](#) , [C08L 2666/20](#)) and [C08K 3/26](#) .

d. A composition based on a first polysiloxane ([C09D 183/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C09D 183/04](#) , [C08L 83/00](#) , [C08K 5/13](#) , [C08K 3/36](#)) and [C08L 2205/02](#) .

From April 2012 onwards, after the notation of groups [C09D 101/00](#) to [C09D 201/00](#) , notations concerning the other constituents of the coating composition may be added, in the form of C-Sets. The further constituent is added with an indexing code. The indexing codes are chosen from [C08L 1/00](#) -[C08L 555/86](#) or [C08K](#) and they may be linked or unlinked: - [C08L 1/00](#) - [C08L 101/10](#) are linked. - [C08L 2201/00](#) - [C08L 2555/86](#) are unlinked. The polymer in majority is always first in the C-set. Examples:

a. A coating composition containing polyethylene and amino-propyltrimethoxysilane is classified in groups [C09D 123/06](#) and [C08K 5/544](#) (unlinked).

b. A coating composition containing 80 parts of polyethylene and 20 parts of polyvinylchloride is classified in ([C09D 123/06](#) , [C08L 27/06](#)). c. A coating composition containing 40 parts of polyethylene and 40 parts of polyvinylchloride is classified in ([C09D 123/06](#) , [C08L 27/06](#)) and ([C09D 127/06](#) , [C08L 23/06](#)). d. A coating composition containing 90% of polysiloxane ([C09D 183/04](#)) further containing 10% of polyester ([C08L 67/00](#)) and an alcohol is classified in ([C09D 183/04](#) , [C08L 67/00](#) , [C08K 5/05](#)).

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

C09D 177/06	• Polyamides derived from polyamines and polycarboxylic acids (– C09D 177/10 takes precedence–)
C09D 179/00	Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen, with or without oxygen, or carbon only, not provided for in groups C09D 161/00 to C09D 177/00
U C09D 183/00	Coating compositions based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon, with or without sulfur, nitrogen, oxygen, or carbon only; Coating compositions based on derivatives of such polymers
<u>NOTE</u>	
In this main group and its subgroups, from 01.09.2010 onwards, new documents are classified according to the following system. The coating composition is identified with the C-Set, e.g. (C09D 183/04 , C08L 83/04) (for a coating composition containing two or more siloxanes), while the information as to which different polymers are present in the coating composition is identified with additional indexing codes, e.g. C08G 77/12 and C08G 77/20 .	
U C09D 183/04	• Polysiloxanes
C09D 183/06	• containing silicon bound to oxygen-containing groups (– C09D 183/12 takes precedence–)
C09D 183/10	• Block or graft copolymers containing polysiloxane sequences (–obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C09D 151/08 , C09D 153/00 –)
C09D 183/14	• in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (– C09D 183/10 takes precedence–)
U C09D 187/00	Coating compositions based on unspecified macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon bonds
C09D 187/005	• {–Block or graft polymers not provided for in groups C09D 101/00 to C09D 185/04 }
C09D 189/00 - C09D 201/00	<u>Coating compositions based on natural macromolecular compounds or on derivatives thereof (based on polysaccharides C09D 101/00 to C09D 105/00 ; based on natural rubber C09D 107/00)</u>
C09D 189/00	Coating compositions based on proteins; Coating compositions based on derivatives thereof (–foodstuff preparations A23J 3/00 –)
C09D 191/00	Coating compositions based on oils, fats or waxes; Coating compositions based on derivatives thereof (–polishing compositions, ski waxes C09G ; soaps, detergent compositions C11D –)
C09D 193/00	Coating compositions based on natural resins; Coating compositions based on derivatives thereof (–polishing compositions C09G –)
U C09D 197/00	Coating compositions based on lignin-containing materials

C09D 197/002 • {Peat, lignite, coal (-briquettes [C10L 5/00](#) ; working-up peat ; ceramic products based on carbon or carbides-)}

C09D 199/00 Coating compositions based on natural macromolecular compounds or on derivatives thereof, not provided for in groups [C09D 189/00](#) to [C09D 197/00](#)

U C09D 201/00 Coating compositions based on unspecified macromolecular compounds

U C09D 201/02 • characterised by the presence of specified groups,{e.g. terminal or pendant functional groups}

C09D 201/06 • • containing oxygen atoms{(-[C09D 201/025](#) takes precedence-)}

Project: N/A (C09H)

C09H 11/00 Adhesives based on glue or gelatine

Project: N/A (C09J)

C09J ADHESIVES; NON-MECHANICAL ASPECTS OF ADHESIVE PROCESSES IN GENERAL; ADHESIVE PROCESSES NOT PROVIDED FOR ELSEWHERE; USE OF MATERIALS AS ADHESIVES (-surgical adhesives [A61L 24/00](#) ; processes for applying liquids or other fluent materials to surfaces in general [B05D](#); adhesives on the basis of non specified organic macromolecular compounds used as bonding agents in layered products [B32B](#); organic labelling fabrics or comparable materials or articles with deformable surface using adhesives and thermo-activatable adhesives respectively [B65C 5/02](#) , [B65C 5/04](#) ; organic macromolecular compounds [C08](#); production of multi-layer textile fabrics [D06M 17/00](#) ; preparation of glue or gelatine [C09H](#) ; adhesive labels, tag tickets or similar identification of indication means [G09F 3/10](#))

NOTES

In this subclass, the following terms or expressions are used with the meanings indicated:

- "use of materials as adhesives" means the use of known or new polymers or products;

- "rubber" includes:

a) natural or conjugated diene rubbers;

b) rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for adhesives based on such macromolecular compounds);

- "based on" is defined by means of Note 3, below.

In this subclass, adhesives containing specific macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.

Example: an adhesive containing polyethene and amino-propyltrimethoxysilane is classified in group [C09J 123/06](#) .

However, adhesives containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups [C09J 159/00](#) to [C09J 187/00](#) are classified according to the unsaturated non-macromolecular component in group [C09J 4/00](#) .

Example: an adhesive containing polyethene and styrene monomer is classified in group [C09J 4/06](#) .

Aspects relating to the physical nature of the adhesives or to the effects produced, as defined in group [C09J 9/00](#) , if clearly and explicitly stated, are also classified in this subclass. Adhesives characterised by other features,

e.g. additives, are classified in group [C09J 11/00](#) , unless the macromolecular constituent is specified.

In this subclass, adhesives comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the adhesive is based. If the adhesive is based on two or more constituents, present in equal proportions, the adhesive is classified according to each of these constituents.

Examples: An adhesive containing 80 parts of polyethene and 20 parts of polyvinylchloride

is classified in group [C09J 123/06](#) ;

An adhesive containing 40 parts of polyethene and 40 parts of polyvinylchloride is

classified in groups [C09J 123/06](#) and [C09J 127/06](#) .

An adhesive composition containing polyethylene and amino-propyltrimethoxysilane is classified in groups [C09J 123/06](#) and [C08K 5/544](#)
Documents classified up until 09-2003: Classification is given in the form of C-Sets. The polymer in majority is given a [C09J 101/00](#) - [C09J 201/10](#) symbol, and the minor components are characterised by Indexing Codes taken from the list below. The Indexing Codes are linked. The polymer in majority is always first in the C-set.

List of **M08L** codes: [C08L 23/00](#) , [C08L 23/26](#) , [C08L 25/00](#) , [C08L 27/00](#) , [C08L 27/04](#) , [C08L 27/12](#) , [C08L 29/00](#) , [C08L 31/00](#) , [C08L 33/00](#) , [C08L 35/00](#) , [C08L 37/00](#) , [C08L 51/00](#) , [C08L 53/00](#) , [C08L 55/02](#) , [C08L 61/04](#) , [C08L 61/20](#) , [C08L 63/00](#) , [C08L 67/00](#) , [C08L 67/02](#) , [C08L 67/025](#) , [C08L 67/03](#) , [C08L 67/04](#) , [C08L 67/06](#) , [C08L 67/07](#) , [C08L 69/00](#) , [C08L 69/005](#) , [C08L 71/00](#) , [C08L 75/04](#) , [C08L 77/00](#) , [C08L 77/08](#) , [C08L 77/12](#) , [C08L 79/08](#) , [C08L 79/085](#) , [C08L 81/00](#) , [C08L 83/00](#) , [C08L 85/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/00](#) - [C08L 2666/86](#) . An additive is classified in the last appropriate place in the list as selected for each [C09J](#) group. Examples:

a. An adhesive composition based on a polyamide and a graft polymer is classified in ([C09J 177/00](#) , [C08L 2666/24](#)). b. An adhesive composition based on polyvinylchloride and containing CaCO₃ is classified according to note 4 of [C08K](#) , i.e. in [C08K 3/26](#) and [C09J 127/06](#) . If this adhesive composition contains also a polyamide, then the classification will be ([C09J 127/06](#) , [C08L 77/00](#) , [C08K 3/26](#)). c. An adhesive composition based on a polysiloxane ([C09J 183/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C09J 183/04](#) , [C08L 83/04](#) , [C08L 2666/34](#) , [C08L 2666/54](#)).

3. From April 2012, after the notation [C09J 4/00](#) , classification concerning the monomer may be added, in the form of C-sets. The notation is selected from [C08F 210/00](#) to [C08F 246/00](#) , [C08G 77/00](#) to [C08G 77/04](#) or [C08G 77/20](#) to [C08G 77/30](#) . Ex. 1: An adhesive based on methylmethacrylate monomer is classified in ([C09J 4/00](#) , [C08F 220/00](#)). Ex. 2: An adhesive based on a dialkoxysilane monomer compound is classified in ([C09J 4/00](#) , [C08G 77/04](#)).

From 01.09.2003 until April 2012: Classification is given in the form of C-Sets. The polymer in majority is given a [C08L](#) class, and the minor components are characterised by Indexing Codes taken from **M08L** or [C08K](#) and they are linked or unlinked. The polymer in majority is always first in the C-set. List of indexing codes in the C-Sets: [C08L 1/00](#)

, [C08L 81/00](#) , [C08L 83/00](#) , [C08L 91/06](#) , [C08L 95/00](#) or [C08L 2666/02](#) - [C08L 2666/08](#) , [C08L 2666/14](#) - [C08L 2666/26](#) . Examples:

- a. An adhesive blend of 60 parts polyvinylchloride ([C09J 127/06](#)) and 40 parts polyamide is classified in ([C09J 127/06](#) , [C08L 2666/20](#)), [C08L 77/00](#) . b. An adhesive blend of 50 parts polyvinylchloride ([C09J 127/06](#)) and 50 parts polyamide ([C09J 177/00](#)) is classified in ([C09J 127/06](#) , [C08L 2666/20](#)), ([C09J 177/00](#) , [C08L 2666/04](#)), [C08L 77/00](#) and [C08L 27/06](#) . c. An adhesive composition based on polyvinylchloride and containing CaCO₃ is classified according to [N: Note 4 of [C08K](#) , i.e. in [C08K 3/26](#) , [C09J 127/06](#) . If this composition contains also a polyamide, then the classification will be ([C09J 127/06](#) , [C08L 2666/20](#)) and [C08K 3/26](#) . d. A composition based on a first polysiloxane ([C09J 183/04](#)) and containing a second polysiloxane, a phenol and silica is classified in ([C09J 183/04](#) , [C08L 83/00](#) , [C08K 5/13](#) , [C08K 3/36](#)) and [C08L 2205/02](#) .

From April 2012 onwards, after the notation of groups [C09J 101/00](#) to [C09J 201/00](#) , notations concerning the other constituents of the adhesive composition may be added, in the form of C-sets. The further constituent is added with an indexing code. The indexing codes are chosen from [C08L 1/00](#) - [C08L 555/86](#) or [C08K](#) and they may be linked or unlinked: - [C08L 1/00](#) - [C08L 101/16](#) are linked. - [C08L 2201/00](#) - [C08L 2555/86](#) are unlinked. The polymer in majority is always first in the C-set.

Examples:

- a. An adhesive composition containing polyethylene and amino-propyltrimethoxysilane is classified in groups [C09J 123/06](#) and [C08K 5/544](#) (unlinked). b. An adhesive containing 80 parts of polyethene and 20 parts of polyvinylchloride is classified in group ([C09J 123/06](#) , [C08L 27/06](#)). c. An adhesive containing 40 parts of polyethene and 40 parts of polyvinylchloride is classified in groups ([C09J 123/06](#) , [C08L 27/06](#)) and ([C09J 127/06](#) , [C08L 23/06](#)). d. An adhesive containing 90% of polysiloxane ([C09J 183/04](#)) further containing of polyester ([C08L 67/00](#)) and an alcohol is classified in ([C09J 183/04](#) , [C08L 67/00](#) , [C08K 5/05](#)).

WARNING

The following IPC group is not used in the CPC system: Subject matter covered by these groups is classified in the following CPC group: [C09J 163/02](#) covered by [C09J 163/00](#)

C09J 4/00

Adhesives based on organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond; { adhesives, based on monomers of macromolecular compounds of groups [C09J 183/00](#) to [C09J 183/16](#) }

C09J 5/00

Adhesive processes in general; Adhesive processes not provided for elsewhere, e.g. relating to primers (- devices for applying glue to surfaces to be joined [B05](#), [B27G 11/00](#))

U	C09J 7/00	Adhesives in the form of films or foils
		<u>NOTE</u> In this group, the indexing codes of subclass M09J are used
U	C09J 7/02	• on carriers
	C09J 7/04	• • on paper or textile fabric (adhesive bandages, dressings or adsorbent pads, {e.g. plasters} , A61F 13/02 -)
	C09J 9/00	Adhesives characterised by their physical nature or the effects produced, e.g. glue sticks (- C09J 7/00 takes precedence-)
	C09J 11/00	Features of adhesives not provided for in group C09J 9/00 , e.g. additives
U	C09J 101/00	Adhesives based on cellulose, modified cellulose, or cellulose derivatives
U	C09J 101/08	• Cellulose derivatives
	C09J 101/10	• • Esters of organic acids (-of both organic acids and inorganic acids C09J 101/20 -)
	C09J 101/16	• • Esters of inorganic acids (-of both organic acids and inorganic acids C09J 101/20 -)
U	C09J 101/26	• • Cellulose ethers
U	C09J 101/28	• • • Alkyl ethers
	C09J 101/286	• • • {substituted with acid radicals} (- C09J 101/282 takes precedence-)
	C09J 105/00	Adhesives based on polysaccharides or on their derivatives, not provided for in groups C09J 101/00 or C09J 103/00
U	C09J 109/00	Adhesives based on homopolymers or copolymers of conjugated diene hydrocarbons
	C09J 109/10	• Latex (- C09J 109/04 , C09J 109/08 take precedence-)
	C09J 115/00	Adhesives based on rubber derivatives (- C09J 111/00 , C09J 113/00 take precedence-)
	C09J 119/00	Adhesives based on rubbers, not provided for in groups C09J 107/00 to C09J 117/00
U	C09J 123/00	Adhesives based on homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one carbon-to-carbon double bond; Adhesives based on derivatives of such polymers
U	C09J 123/02	• not modified by chemical after-treatment
U	C09J 123/04	• • Homopolymers or copolymers of ethene
	C09J 123/08	• • • Copolymers of ethene (- C09J 123/16 takes precedence-)
U	C09J 123/10	• • Homopolymers or copolymers of propene
	C09J 123/14	• • • Copolymers of propene (- C09J 123/16 takes precedence-)
U	C09J 123/18	• • Homopolymers or copolymers of hydrocarbons having four or more carbon atoms
U	C09J 123/20	• • • having four to nine carbon atoms
	C09J 123/22	• • • • Copolymers of isobutene; Butyl rubber {Homo- or copolymers of other iso-olefines}
U	C09J 123/26	• modified by chemical after-treatment
	C09J 123/28	• • by reaction with halogens or compounds containing halogen (- C09J 123/32 takes precedence-)

- U C09J 125/00** Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an aromatic carbocyclic ring; Adhesives based on derivatives of such polymers
- U C09J 125/02 • Homopolymers or copolymers of hydrocarbons
- U C09J 125/04 • • Homopolymers or copolymers of styrene
- C09J 125/08 • • • Copolymers of styrene (~~C09J 129/08~~ , ~~C09J 135/06~~ , ~~C09J 155/02~~ take precedence-)
- U C09J 129/00** Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an alcohol, ether, aldehydo, ketonic, acetal, or ketal radical; Adhesives based on hydrolysed polymers of esters of unsaturated alcohols with saturated carboxylic acids; Adhesives based on derivatives of such polymers
- C09J 129/02 • Homopolymers or copolymers of unsaturated alcohols (~~C09J 129/14~~ takes precedence-)
- C09J 129/10 • Homopolymers or copolymers of unsaturated ethers (~~C09J 135/08~~ takes precedence-)
- C09J 131/00** Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid, or of a haloformic acid (~~based on hydrolysed polymers C09J 129/00~~); Adhesives based on derivatives of such polymers
- U C09J 133/00** Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by only one carboxyl radical, or of salts, anhydrides, esters, amides, imides, or nitriles thereof; Adhesives based on derivatives of such polymers
- C09J 133/04 • Homopolymers or copolymers of esters{ ~~C09J 143/04~~ takes precedence-}
- U C09J 133/06 • • of esters containing only carbon, hydrogen and oxygen, the oxygen atom being present only as part of the carboxyl radical
- C09J 133/062 • • • {~~Copolymers with monomers not covered by C09J 133/06~~}
- U C09J 133/18 • Homopolymers or copolymers of nitriles
- C09J 133/20 • • Homopolymers or copolymers of acrylonitrile (~~C09J 155/02~~ takes precedence-)
- U C09J 135/00** Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a carboxyl radical, and containing at least another carboxyl radical in the molecule, or of salts, anhydrides, esters, amides, imides or nitriles thereof; Adhesives based on derivatives of such polymers
- C09J 135/02 • Homopolymers or copolymers of esters (~~C09J 135/06~~ , ~~C09J 135/08~~ take precedence-)
- C09J 135/04 • Homopolymers or copolymers of nitriles (~~C09J 135/06~~ , ~~C09J 135/08~~ take precedence-)

C09J 137/00	Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon-to-carbon double bond, and at least one being terminated by a heterocyclic ring containing oxygen (based on polymers of cyclic esters of polyfunctional acids C09J 131/00 ; based on polymers of cyclic anhydrides of unsaturated acids C09J 135/00); Adhesives based on derivatives of such polymers
C09J 145/00	Adhesives based on homopolymers or copolymers of compounds having no unsaturated aliphatic radicals in a side chain, and having one or more carbon-to-carbon double bonds in a carbocyclic or in a heterocyclic system; Adhesives based on derivatives of such polymers (based on polymers of cyclic esters of polyfunctional acids C09J 131/00 ; based on polymers of cyclic anhydrides or imides C09J 135/00)
C09J 147/00	Adhesives based on homopolymers or copolymers of compounds having one or more unsaturated aliphatic radicals, at least one having two or more carbon-to-carbon double bonds; Adhesives based on derivatives of such polymers (C09J 145/00 takes precedence; based on conjugated diene rubbers C09J 109/00 to C09J 121/00)
C09J 151/00	Adhesives based on graft polymers in which the grafted component is obtained by reactions only involving carbon-to-carbon unsaturated bonds (based on ABS polymers C09J 155/02); Adhesives based on derivatives of such polymers
C09J 151/003	<ul style="list-style-type: none"> • {grafted on to macromolecular compounds obtained by reactions only involving unsaturated carbon-to-carbon bonds (C09J 151/04 , C09J 151/06 take precedence)}
C09J 155/00	Adhesives based on homopolymers or copolymers, obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C09J 123/00 to C09J 153/00
U C09J 157/00	Adhesives based on unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds
U C09J 157/06	<ul style="list-style-type: none"> • Homopolymers or copolymers containing elements other than carbon and hydrogen
C09J 157/12	<ul style="list-style-type: none"> • • containing nitrogen atoms
C09J 161/00	Adhesives based on condensation polymers of aldehydes or ketones (with polyalcohols C09J 159/00 ; with polynitriles C09J 177/00); Adhesives based on derivatives of such polymers
C09J 161/20	<ul style="list-style-type: none"> • Condensation polymers of aldehydes or ketones with only compounds containing hydrogen attached to nitrogen (with amino phenols C09J 161/04)
C09J 161/34	<ul style="list-style-type: none"> • Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups C09J 161/04 , C09J 161/18 and C09J 161/20
C09J 165/00	Adhesives based on macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain (C09J 107/00 to C09J 157/00 , C09J 161/00 take precedence); Adhesives based on derivatives of such polymers
C09J 167/00	Adhesives based on polyesters obtained by reactions forming a carboxylic ester link in the main chain (based on polyester-amides C09J 177/12 ; based on polyester-imides C09J 179/08); Adhesives based on derivatives of such polymers
C09J 167/02	<ul style="list-style-type: none"> • Polyesters derived from dicarboxylic acids and dihydroxy compounds (C09J 167/06 takes precedence)

C09J 167/04	<ul style="list-style-type: none"> • Polyesters derived from hydroxycarboxylic acids, e.g. lactones (-C09J 167/06 takes precedence-)
C09J 171/00	Adhesives based on polyethers obtained by reactions forming an ether link in the main chain (-based on polyacetals C09J 159/00 ; based on epoxy resins C09J 163/00 ; based on polythioether-ethers C09J 181/02 ; based on polyethersulfones C09J 181/06); Adhesives based on derivatives of such polymers
C09J 171/08	<ul style="list-style-type: none"> • Polyethers derived from hydroxy compounds or from their metallic derivatives (-C09J 171/02 takes precedence-){not used}
C09J 171/10	<ul style="list-style-type: none"> • • from phenols {not used}
C09J 173/00	Adhesives based on macromolecular compounds obtained by reactions forming a linkage containing oxygen or oxygen and carbon in the main chain, not provided for in groups C09J 159/00 to C09J 171/00 ; Adhesives based on derivatives of such polymers
C09J 177/00	Adhesives based on polyamides obtained by reactions forming a carboxylic amide link in the main chain (-based on polyhydrazides C09J 179/06 ; based on oC09Jn polyamide-imides C09J 179/08); Adhesives based on derivatives of such polymers
C09J 177/02	<ul style="list-style-type: none"> • Polyamides derived from omega-amino carboxylic acids or from lactams thereof (-C09J 177/10 takes precedence-)
C09J 177/04	<ul style="list-style-type: none"> • Polyamides derived from alpha-amino carboxylic acids (-C09J 177/10 takes precedence-)
C09J 177/06	<ul style="list-style-type: none"> • Polyamides derived from polyamines and polycarboxylic acids (-C09J 177/10 takes precedence-)
C09J 179/00	Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing nitrogen, with or without oxygen, or carbon only, not provided for in groups C09J 161/00 to C09J 177/00
U C09J 183/00	Adhesives based on macromolecular compounds obtained by reactions forming in the main chain of the macromolecule a linkage containing silicon, with or without sulfur, nitrogen, oxygen, or carbon only; Adhesives based on derivatives of such polymers <p><u>NOTE</u></p> <p>In this main group, from 01.09.2010 onwards, new documents are classified according to the following system. The adhesive is identified with the previous existing ECLA(+B) notation, e.g. C09J 183/04 +B4S (for an adhesive containing two or more siloxanes), while the information as to which different polymers are present in the adhesive is identified with additional indexing codes, e.g. C08G 77/12 and C08G 77/20</p>
U C09J 183/04	<ul style="list-style-type: none"> • Polysiloxanes
C09J 183/06	<ul style="list-style-type: none"> • • containing silicon bound to oxygen-containing groups (-C09J 183/12 takes precedence-)
C09J 183/10	<ul style="list-style-type: none"> • Block or graft copolymers containing polysiloxane sequences (-obtained by polymerising a compound having a carbon-to-carbon double bond on to a polysiloxane C09J 151/08 , C09J 153/00-)
C09J 183/14	<ul style="list-style-type: none"> • in which at least two but not all the silicon atoms are connected by linkages other than oxygen atoms (-C09J 183/10 takes precedence-)
U C09J 187/00	Adhesives based on unspecified macromolecular compounds, obtained otherwise than by polymerisation reactions only involving unsaturated carbon-to-carbon bonds

C09J 187/005	• {-Block or graft polymers not provided for in groups C09J 101/00 to C09J 185/04 }
C09J 189/00 - C09J 201/00	Adhesives based on natural macromolecular compounds or on derivatives thereof (-based on polysaccharides C09J 101/00 to C09J 105/00 ; based on natural rubber C09J 107/00-)
C09J 189/00	Adhesives based on proteins; Adhesives based on derivatives thereof (-foodstuff preparations A23J 3/00-)
C09J 191/00	Adhesives based on oils, fats or waxes; Adhesives based on derivatives thereof (-polishing compositions, ski waxes C09G ; soaps, detergent compositions C11D-)
C09J 193/00	Adhesives based on natural resins; Adhesives based on derivatives thereof (-polishing compositions C09G-)
U C09J 197/00	Adhesives based on lignin-containing materials
C09J 197/002	• {Peat, lignite, coal (-briquettes C10L 5/00 ; working-up peat; ceramic products based on carbon or carbides-)}
C09J 199/00	Adhesives based on natural macromolecular compounds or on derivatives thereof, not provided for in groups C09J 189/00 to C09J 197/00
U C09J 201/00	Adhesives based on unspecified macromolecular compounds
U C09J 201/02	• characterised by the presence of specified groups,{e.g. terminal or pendant functional groups}
C09J 201/06	• • containing oxygen atoms{(- C09J 201/025 takes precedence-)}
C09J 2499/00	Presence of natural macromolecular compounds or on derivatives thereof, not provided for in groups C09J 2489/00 to C09J 2497/00

Project: N/A (C09K)

U C09K 3/00	Materials not provided for elsewhere
	<u>NOTE</u> When classifying in groups C09K 3/10 to C09K 3/1028 the properties and uses of the material can be further indexed by using indexing codes chosen from C09K 2003/1034 to C09K 2003/1096 and the chemical nature of the materials can be further indexed by using indexing codes chosen from C09K 2200/00 to C09K 2200/0697
C09K 3/10	• {Materials in mouldable or extrudable form}for sealing or packing joints or covers (-filling pastes C09D 5/34 -)
C09K 3/12	• Materials for stopping leaks, e.g. in radiators, in tanks (-filling pastes C09D 5/34 -)
C09K 3/14	• Anti-slip materials; Abrasives{(-products specifically intended for the fabrication of abrasive tools, blocks or papers, or for operations of the kind of sand-blasting and barrelling B24B 31/14 , B24C 1/00 ; polishing compositions containing abrasive or grinding agents C09G 1/02 ; polishing of semi-conductors H01L ; friction compositions for brakes or clutches F16D 69/02 -)}
	<u>NOTE</u> In this group, boron and silicon are considered as being metals. Likewise for associations of carbon with metals, e.g. carbides.
C09K 3/1409	• • {Abrasive particles per se (-preparation of diamond C01B 31/06 -)}

- C09K 3/18
- for application to surfaces to minimize adherence of ice, mist or water thereto (-rendering particulate materials free flowing, in general, e.g. making them hydrophobic [B01J 2/30](#)); Thawing or antifreeze materials for application to surfaces (-used in liquids for heat-transfer, heat-exchange or heat-storage or for the production of heat or cold other than by combustion, e.g. radiator liquids, [C09K 5/00](#))
- C09K 3/30
- for aerosols (-aerosol containers [B65D 83/14](#))
- U C09K 5/00** **Heat-transfer, heat-exchange or heat-storage materials, e.g. refrigerants; Materials for the production of heat or cold by chemical reactions other than by combustion**
- C09K 5/02
- Materials undergoing a change of physical state when used (-[C09K 5/16](#) , [C09K 5/20](#) take precedence-)
- C09K 5/08
- Materials not undergoing a change of physical state when used (-[C09K 5/16](#) , [C09K 5/20](#) take precedence-)
- WARNING**
- The subgroups of [C09K 5/08](#) might be incomplete as some of the patent documents classified in [C09K 5/08](#) might need reclassification to one or more of groups [C09K 5/10](#) to [C09K 5/14](#)
- C09K 5/20
- Antifreeze additives therefor, e.g. for radiator liquids (-for application to surfaces [C09K 3/18](#) ; inhibiting corrosion by liquids [C23F 11/00](#)-)
- U C09K 8/00** **Compositions for drilling of boreholes or wells; Compositions for treating boreholes or wells, e.g. for completion or for remedial operations**
- NOTE**
- In groups [C09K 8/00](#) to [C09K 8/94](#) it is desirable to add indexing codes for aspects relating to compositions for drilling or treating boreholes or wells. The indexing codes are chosen from groups [C09K 2208/00](#) to [C09K 2208/32](#)
- U C09K 8/02**
- Well-drilling compositions
- U C09K 8/04**
- Aqueous well-drilling compositions
- C09K 8/06
- • Clay-free compositions (-containing inorganic compounds only [C09K 8/05](#)-)

macromolecular compositions [C08](#) ; in liquid fuels or lubricants [C10](#) ; in
fats, fatty substances, fatty oils or waxes [C11B 5/00](#) ; in detergents [C11D](#) ;
{ coating or impregnating carbon or graphite based bodies to protect them
from oxidation [C04B 41/45](#) } ; corrosion inhibiting compositions for metallic
material [C23F 11/00](#))
- NOTE
In groups [C09K 15/02](#) to [C09K 15/34](#), in the absence of an indication to the contrary, a composition is classified in the last appropriate place.
- U C09K 15/04 • containing organic compounds
- C09K 15/32 • • containing {two or more of} boron, silicon, phosphorus, selenium, tellurium or
a metal
- C09K 17/00** **Soil-conditioning materials or soil-stabilising materials** (~~specially adapted~~
~~for boreholes or wells~~ [C09K 8/00](#) ; fertilisers [C05](#) ; consolidating by placing
solidifying or pore-filling substances in the soil [E02D 3/12](#))
- NOTES
This group covers mixtures of soil-conditioning or soil-stabilising materials with
fertilisers characterised by their soil-conditioning or soil-stabilising activity.
This group does not cover mixtures of soil-conditioning or soil-stabilising
materials with fertilisers characterised by their fertilising activity which are
covered by subclass [C05G](#) .
For the purpose of classification in this group, the presence of fertilisers in the
composition is not taken into account.
In groups [C09K 17/02](#) to [C09K 17/50](#), in the absence of an indication to the contrary, materials are classified in the last appropriate place.

U C09K 19/00

Liquid crystal materials

NOTES

In groups [C09K 19/02](#) to [C09K 19/60](#) , { with the exception of groups [C09K 19/0208](#) to [C09K 19/0283](#) } ,in the absence of an indication to the contrary, materials are classified in the last appropriate place.

Mixtures containing two or more liquid crystal compounds covered individually by the same one of groups [C09K 19/04](#) to [C09K 19/40](#) are classified only in that group.

If liquid crystal components of the mixtures classified in groups [C09K 19/42](#) to [C09K 19/50](#) are of importance as such, they should also be classified according to the compounds in groups [C09K 19/04](#) to [C09K 19/40](#) .

- U C09K 19/04
 - characterised by the chemical structure of the liquid crystal components,{e.g. by a specific unit}
- C09K 19/0422

CRACKING HYDROCARBON OILS; PRODUCTION OF LIQUID HYDROCARBON MIXTURES, e.g. BY DESTRUCTIVE HYDROGENATION, OLIGOMERISATION, POLYMERISATION (cracking to hydrogen or synthesis gas [C01B](#); cracking or pyrolysis of hydrocarbon gases to individual hydrocarbons or mixtures thereof of definite or specific constitution [C07C](#); cracking to cokes [C10B](#)); RECOVERY OF HYDROCARBON OILS FROM OIL-SHALE, OIL-SAND, OR GASES; REFINING MIXTURES MAINLY CONSISTING OF HYDROCARBONS; REFORMING OF NAPHTHA; MINERAL WAXES (inhibiting corrosion or incrustation in general [C23F](#))

NOTES

In this subclass,

- groups [C10G 9/00](#) to [C10G 49/00](#) are limited to one-step processes;
- combined or multi-step processes are covered by groups [C10G 51/00](#) to [C10G 69/00](#) ;
- refining or recovery of mineral waxes is covered by group [C10G 73/00](#) .

In this subclass, the following terms or expressions are used with the meanings indicated:

- "in the presence of hydrogen" or "in the absence of hydrogen" mean treatments in which hydrogen, in free form or as hydrogen generating compounds, is added, or not added, respectively;
- "hydrotreatment" is used for conversion processes as defined in group [C10G 45/00](#) or group [C10G 47/00](#) ;
- "hydrocarbon oils" covers mixtures of hydrocarbons such as tar oils or mineral oils.

In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place.

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

[C10G 73/23](#) covered by [C10G 73/06](#)
 Groups [C10G 2/30](#) to [C10G 2/50](#)
 do not correspond to former or current IPC groups. The concordance CPC : IPC is as follows: - [C10G 2/30](#)
 - [C10G 2/50](#) : [C10G 2/00](#)

C10G 1/00

Production of liquid hydrocarbon mixtures from oil-shale, oil-sand, or non-melting solid carbonaceous or similar materials, e.g. wood, coal (-mechanical winning of oil from oil-shales, oil-sand, or the like [B03B](#)-)

C10G 1/006

- {-Combinations of processes provided in groups [C10G 1/02](#) to [C10G 1/08](#)-}

C10G 1/008

- {-Controlling or regulating of liquefaction processes (-controlling or regulation in general [G05](#)-)}

C10G 1/02

- by distillation (-destructive distillation of oil-shale [C10B 53/06](#)-)

C10G 3/00

Production of liquid hydrocarbon mixtures from oxygen-containing or organic materials, e.g. fatty oils, fatty acids (-production from non-melting solid oxygen-containing carbonaceous materials [C10G 1/00](#) ; preparation of individual hydrocarbons or mixtures thereof of definite or specified contribution [C07C](#)-)

WARNING

1. Groups [C10G 3/40](#) to [C10G 3/62](#) are not complete pending a reorganization. See also [C10G 3/00](#)
 2. Groups [C10G 3/40](#) to [C10G 3/62](#) do not correspond to former or current IPC groups.
- Concordance CPC : IPC for these groups is as follows: - [C10G 3/40](#) - [C10G 3/62](#) : [C10G 3/00](#)

C10G 3/60	• {Controlling or regulating the process (controlling or regulating in general G05)}
C10G 3/62	• {Catalyst regeneration (-regeneration or reactivation of catalysts in general B01J 38/00 -)}
C10G 7/00	Distillation of hydrocarbon oils (-distillation in general B01D-)
C10G 7/08	• Azeotropic or extractive distillation (-refining of hydrocarbon oils, in the absence of hydrogen, by extraction with selective solvents C10G 21/00 -)
C10G 7/12	• Controlling or regulating (-controlling or regulating in general G05)
U C10G 9/00	Thermal non-catalytic cracking, in the absence of hydrogen, of hydrocarbon oils
C10G 9/005	• {Coking (<i>in order to produce liquid products mainly</i>)} (in order to produce liquid products mainly)
C10G 11/00	Catalytic cracking, in the absence of hydrogen, of hydrocarbon oils (-cracking in direct contact with molten metals or salts C10G 9/34-)
U C10G 11/14	• with preheated moving solid catalysts
U C10G 11/18	• • according to the "fluidised-bed" technique
C10G 11/185	• • • {Energy recovery from regenerator effluent gases (-using steam turbines, see F01K 23/064 ; using gas turbines, see F01K 25/14 ; the combined use of gas and steam turbines, see F01K 3/185 -)}
C10G 11/187	• • • {Controlling or regulating (-controlling or regulating in general G05 -)}
U C10G 11/20	• by direct contact with inert heated gases or vapours
C10G 11/22	• • produced by partial combustion of the material to be cracked
U C10G 15/00	Cracking of hydrocarbon oils by electric means, electromagnetic or mechanical vibrations, by particle radiation or with gases superheated in electric arcs
C10G 15/12	• with gases superheated in an electric arc, e.g. plasma
U C10G 17/00	Refining of hydrocarbon oils in the absence of hydrogen, with acids, acid-forming compounds or acid-containing liquids, e.g. acid sludge
U C10G 17/02	• with acids or acid-containing liquids, e.g. acid sludge
U C10G 17/04	• • Liquid-liquid treatment forming two immiscible phases
C10G 17/07	• • • using halogen acids or oxyacids of halogen (-acids generating halogen C10G 27/02 -)
C10G 17/08	• with acid-forming oxides (-refining with CO ₂ or SO ₂ as a selective solvent C10G 21/06 -)
C10G 21/00	Refining of hydrocarbon oils in the absence of hydrogen, by extraction with selective solvents (-C10G 17/00 , C10G 19/00 take precedence; dewaxing oils C10G 73/02-)
U C10G 21/06	• characterised by the solvent used
U C10G 21/12	• • Organic compounds only
C10G 21/27	• • • Organic compounds not provided for in a single one of groups C10G 21/14 to C10G 21/26
C10G 21/30	• Controlling or regulating (-controlling or regulating in general G05 -)

U C10G 25/00	Refining of hydrocarbon oils in the absence of hydrogen, with solid sorbents
	NOTE When classifying in this group, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned.
C10G 25/003	• {-Specific sorbent material, not covered by C10G 25/02 or C10G 25/03 -}
U C10G 27/00	Refining of hydrocarbon oils in the absence of hydrogen, by oxidation
U C10G 27/04	• with oxygen or compounds generating oxygen
C10G 27/12	• • with oxygen-generating compounds, e.g. per-compounds, chromic acid, chromates {-plumbites or plumbates C10G 19/06 -}
C10G 31/00	Refining of hydrocarbon oils in the absence of hydrogen, by methods not otherwise provided for {-by distillation C10G 7/00 -}
C10G 31/11	• by dialysis
C10G 33/00	Dewatering or demulsification of hydrocarbon oils {-by distillation C10G 7/04 -}
C10G 33/08	• Controlling or regulating {-controlling or regulating in general G05 -}
U C10G 35/00	Reforming naphtha
	NOTE By reforming is meant the treatment of naphtha, in order to improve the octane number or its aromatic content.
U C10G 35/04	• Catalytic reforming
U C10G 35/06	• • characterised by the catalyst used
C10G 35/095	• • • containing crystalline aluminosilicates, e.g. molecular sieves {- C10G 35/065 takes precedence-}
C10G 35/24	• Controlling or regulating of reforming operations {-controlling or regulating in general G05 -}
C10G 45/00 - C10G 50/00	Hydrotreatment processes {-reforming of naphtha C10G 35/00 -}
C10G 45/58	• to change the structural skeleton of some of the hydrocarbon content without cracking the other hydrocarbons present, e.g. lowering pour point; Selective hydrocracking of normal paraffins {- C10G 32/00 takes precedence; improving or increasing the octane number or aromatic content of naphtha C10G 35/00 -}
C10G 45/68	• • Aromatisation of hydrocarbon oil fractions {-of naphtha C10G 35/00 -}
C10G 45/72	• Controlling or regulating {-controlling or regulating in general G05 -}
C10G 47/00	Cracking of hydrocarbon oils in the presence of hydrogen or hydrogen generating compounds, to obtain lower boiling fractions , {- C10G 15/00 takes precedence; destructive hydrogenation of non-melting solid carbonaceous or similar materials C10G 1/06 -}
C10G 47/36	• Controlling or regulating {-controlling or regulating in general G05 -}
C10G 49/00	Treatment of hydrocarbon oils in the presence of hydrogen or hydrogen-generating compounds, not provided for in a single one of the groups C10G 45/02 , C10G 45/32 , C10G 45/44 , C10G 45/58 or C10G 47/00
C10G 49/26	• Controlling or regulating {-controlling or regulating in general G05 -}

	C10G 50/00	Production of liquid hydrocarbon mixtures from lower carbon number hydrocarbons, e.g. by oligomerisation (-preparation of individual hydrocarbons or mixtures thereof of definite or specified constitution C07C-)
	C10G 50/02	· of hydrocarbon oils for lubricating purposes
U	C10G 53/00	Treatment of hydrocarbon oils in the absence of hydrogen, by two or more refining processes
U	C10G 53/02	· plural serial stages only
U	C10G 53/04	· · including at least one extraction step
	C10G 53/06	· · · including only extraction steps, e.g. deasphalting by solvent treatment followed by extraction of aromatics (-refining in one step with two or more solvents which are introduced or withdrawn separately C10G 21/02-)
	C10G 63/00	Treatment of naphtha by at least one reforming process and at least one other conversion process (-C10G 59/00 , C10G 61/00 take precedence-)
	C10G 69/00	Treatment of hydrocarbon oils by at least one hydrotreatment process and at least one other conversion process (-C10G 67/00 takes precedence-)
	C10G 69/14	· plural parallel stages only
	C10G 70/00	Working-up undefined normally gaseous mixtures obtained by processes covered by groups C10G 9/00 , C10G 11/00 , C10G 15/00 , C10G 47/00 , C10G 51/00
	C10G 71/00	Treatment by methods not otherwise provided for of hydrocarbon oils or fatty oils for lubricating purposes (-by Fischer-Tropsch C07C 1/00 ; lubricating compositions C10M-)
	C10G 71/02	· Thickening by voltolising (-chemical modification of drying oils by voltolising C09F 7/04-)
	C10G 73/00	Recovery or refining of mineral waxes, e.g. montan wax (-compositions essentially based on waxes C08L 91/00-)
U	C10G 73/02	· Recovery of petroleum waxes from hydrocarbon oils; Dewaxing of hydrocarbon oils
	C10G 73/34	· · Controlling or regulating (-controlling or regulating in general G05-)
	C10G 75/00	Inhibiting corrosion or fouling in apparatus for treatment or conversion of hydrocarbon oils, in general (-C10G 7/10 , C10G 9/16 take precedence; protection of pipes against corrosion or incrustation F16L 58/00-)
	C10G 2300/00	Aspects relating to hydrocarbon processing covered by groups C10G 1/00 - C10G 99/00
	C10G 2400/00	Products obtained by processes covered by groups C10G 9/00 to C10G 69/14

Project: N/A (C10H)

U	C10H 9/00	Acetylene gas generators according to Dobereiner's principle with fixed carbide bell

• • • • • {mono-hydroxy (-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) , [C10L 1/1828](#) take precedence-)}

C10L 1/1835

• • • • • {having at least two hydroxy substituted non condensed benzene rings (-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) , [C10L 1/1828](#) take precedence-)}

C10L 1/1837

• • • • • {hydroxy attached to a condensed aromatic ring system (-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) , [C10L 1/1828](#) take precedence-)}

C10L 1/185

• • • • Ethers; Acetals; Ketals; Aldehydes; Ketones{(-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) take precedence-)}

C10L 1/188

• • • • Carboxylic acids; {metal}salts thereof{(-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) take precedence-)}

C10L 1/189

• • • • • having at least one carboxyl group bound to an aromatic carbon atom{(-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) , [C10L 1/1885](#) , [C10L 1/1886](#) , [C10L 1/1888](#) take precedence-)}

C10L 1/1895

• • • • • {polycarboxylic acid (-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) , [C10L 1/1885](#) , [C10L 1/1886](#) , [C10L 1/1888](#) take precedence-)}

C10L 1/19

• • • • Esters {ester radical containing compounds; ester ethers; carbonic acid esters (-[C10L 1/1802](#) , [C10L 1/1805](#) , [C10L 1/1808](#) , [C10L 1/1811](#) , [C10L 1/1814](#) , [C10L 1/1817](#) take precedence-)}

C10L 1/192

• • • • {Macromolecular compounds} (-[C10L 1/1814](#) , [C10L 1/1817](#) take precedence-)

- C10L 1/198 obtained otherwise than by reactions involving only carbon-to-carbon unsaturated bonds {homo- or copolymers of compounds having one or more unsaturated aliphatic radicals, each having only one carbon to carbon double bond, and at least one being terminated by an acyloxy radical of a saturated carboxylic acid, of carbonic acid}
- U C10L 1/22 containing nitrogen
- C10L 1/222 containing at least one carbon-to-nitrogen single bond{(-C10L 1/221 takes precedence-)}
- C10L 1/2222 {(cyclo)aliphatic amines; polyamines (no macromolecular substituent 30C); quaternair ammonium compounds; carbamates (-C10L 1/221 takes precedence-)}
- C10L 1/2225 {hydroxy containing (-C10L 1/221 takes precedence-)}
- C10L 1/2227 {urea; derivatives thereof; urethane (-C10L 1/221 takes precedence-)}
- C10L 1/223 having at least one amino group bound to an aromatic carbon atom{(-C10L 1/221 , C10L 1/2227 take precedence-)}
- C10L 1/2235 {hydroxy containing (-C10L 1/221 , C10L 1/2227 take precedence-)}
- C10L 1/224 Amides; Imides {carboxylic acid amides, imides(-C10L 1/221 , C10L 1/2227 take precedence-)}
- C10L 1/226 containing at least one nitrogen-to-nitrogen bond, e.g. azo compounds, azides, hydrazines{(-C10L 1/221 takes precedence-)}
- C10L 1/228 containing at least one carbon-to-nitrogen double bond, e.g. guanidines, hydrazones, semicarbazones, imines; containing at least one carbon-to-nitrogen triple bond, e.g. nitriles{(-C10L 1/221 , C10L 1/226 take precedence-)}
- C10L 1/2283 {containing one or more carbon to nitrogen double bonds, e.g. guanidine, hydrazone, semi-carbazone, azomethine (-C10L 1/221 , C10L 1/226 take precedence-)}
- C10L 1/2286 {containing one or more carbon to nitrogen triple bonds, e.g. nitriles (-C10L 1/221 , C10L 1/226 take precedence-)}
- C10L 1/23 containing at least one nitrogen-to-oxygen bond, e.g. nitro-compounds, nitrates, nitrites{(-C10L 1/221 takes precedence-)}
- C10L 1/231 {nitro compounds; nitrates; nitrites (-C10L 1/221 takes precedence-)}
- C10L 1/232 containing nitrogen in a heterocyclic ring{(-C10L 1/221 takes precedence-)}
- C10L 1/233 containing nitrogen and oxygen in the ring, e.g. oxazoles{(-C10L 1/221 takes precedence-)}
- C10L 1/2335 {morpholino, and derivatives thereof (-C10L 1/221 takes precedence-)}
- C10L 1/234 Macromolecular compounds{(-C10L 1/221 takes precedence-)}
- C10L 1/236 obtained by reactions involving only carbon-to-carbon unsaturated bonds {derivatives thereof(-C10L 1/221 takes precedence-)}
- C10L 1/2362 {homo- or copolymers derived from unsaturated compounds containing nitrile groups (-C10L 1/221 takes precedence-)}
- C10L 1/2364 {homo- or copolymers derived from unsaturated compounds containing amide and/or imide groups (-C10L 1/221 takes precedence-)}
- C10L 1/2366 {homo- or copolymers derived from unsaturated compounds containing amine groups (-C10L 1/221 takes precedence-)}
- C10L 1/2368 {homo- or copolymers derived from unsaturated compounds containing heterocyclic compounds containing nitrogen in the ring (-C10L 1/221 takes precedence-)}

- C10L 1/238 obtained otherwise than by reactions involving only carbon-to-carbon unsaturated bonds(~~(-C10L 1/221 takes precedence-)~~)
- C10L 1/2381 {polyamides; polyamide-esters; polyurethane, polyureas (~~(-C10L 1/221 takes precedence-)~~)}
- C10L 1/2383 Polyamines or polyimines, or derivatives thereof{(poly)amines and imines; derivatives thereof (substituted by a macromolecular group containing 30C)(~~(-C10L 1/221 takes precedence-)~~)}
- C10L 1/2387 Polyoxyalkyleneamines{(poly)oxyalkylene amines and derivatives thereof (substituted by a macromolecular group containing 30C) (~~(-C10L 1/221 takes precedence-)~~)}
- U C10L 1/24 . . . containing sulfur, selenium and/or tellurium
- C10L 1/2493 {compounds of uncertain formula; ~~reactions of organic compounds(hydrocarbons, acids, esters)~~ *reactions of organic compounds (hydrocarbons, acids, esters)* with sulfur or sulfur containing compounds}
- U C10L 1/26 . . . containing phosphorus
- C10L 1/2633 {phosphorus bond to oxygen (~~(no P. C. bond))~~ *(no P. C. bond)*}
- C10L 1/2691 {Compounds of uncertain formula; ~~reaction of organic compounds(hydrocarbons acids, esters)~~ *reaction of organic compounds (hydrocarbons acids, esters)* with Px Sy, Px Sy Halz or sulfur and phosphorus containing compounds}
- U C10L 1/30 . . . compounds not mentioned before (complexes)
- C10L 1/305 {organo-metallic compounds (~~(containing a metal to carbon bond))~~ *(containing a metal to carbon bond)*}
- C10L 1/32 . consisting of coal-oil suspensions or aqueous emulsions {or oil emulsions}
- C10L 3/00** **Gaseous fuels; Natural gas; ~~Synthetic natural gas obtained by processes not covered by subclass C10G , C10K~~; Liquefied petroleum gas**
- C10L 3/06 . Natural gas; ~~Synthetic natural gas obtained by processes not covered by C10G , C10K 3/02 or C10K 3/04~~ {(~~liquefying by pressure and cold treatment F25J-~~)}
- C10L 3/12 . Liquefied petroleum gas{(~~liquefying by pressure and cold treatment F25J-~~)}
- C10L 5/00** **Solid fuels (~~produced by solidifying fluid fuels C10L 7/00~~)**
- C10L 5/02 . {Solid fuels such as}briquettes consisting mainly of carbonaceous materials of mineral {or non-mineral}origin (peat briquettes C10F)
- C10L 5/04 . . Raw material {of mineral origin}to be used; Pretreatment thereof{(~~pretreatment of fuels of non-mineral origin C10L 5/40-~~)}
- C10L 5/06 . . Methods of {shaping, e.g. pelletizing or}briquetting {(~~mechanical part of pressing briquettes B30B 11/00-~~)}
- C10L 5/08 . . . without the aid of extraneous binders (~~briquetting peat C10F-~~)
- C10L 5/24 . . Combating dust during {shaping or}briquetting; Safety devices against explosion
- C10L 5/26 . . After-treatment of the {shaped fuels, e.g.}briquettes
- C10L 5/28 . . . Heating the {shaped fuels, e.g.}briquettes; Coking the binders
- C10L 5/30 . . . Cooling the {shaped fuels, e.g.}briquettes
- C10L 5/34 . . Other details of the {shaped fuels, e.g.}briquettes
- U C10L 5/40 . essentially based on materials of non-mineral origin
- C10L 5/46 . . on sewage, house, or town refuse{(~~C10L 5/403 , C10L 5/406 take precedence-~~)}
- C10L 5/48 . . on industrial residues and waste materials{(~~C10L 5/403 , C10L 5/406 take precedence-~~)}

U C10L 7/00 C10L 7/02	Fuels produced by solidifying fluid fuels - liquid fuels (-lubricating compositions C10M-)
C10L 10/00	Use of additives to fuels or fires for particular purposes (-additives for liquid carbonaceous fuels characterised by their chemical nature C10L 1/10 ; using binders for briquetting solid fuels C10L 5/10 ; using additives to improve the combustion of solid fuels C10L 9/10 -) WARNINGS IPC8 subgroups C10L 10/00 , introduced in the CPC scheme in June 2006, might be temporarily incomplete as a number of documents presently classified under the main group needs reclassification to these IPC subgroups
C10L 10/18	- use of detergents or dispersants for purposes not provided for in groups C10L 10/02 - C10L 10/16
U C10L 11/00 C10L 11/04	Manufacture of firelighters - consisting of combustible material (-matches C06F-)
C10L 2200/00	Components of fuel compositions NOTE Additives in liquid fuels present in concentrations lower than 5% get a class taken from C10L 1/10 - C10L 1/308 and corresponding C10L 1/10 - C10L 1/308 . In groups C10L 1/32 to C10L 11/08 is such distinction between the terms additive and component not made.
C10L 2300/00	Mixture of two or more additives covered by the same group of C10L 1/00 - C10L 1/308 NOTE After the code and separated therefrom by a + sign, the codes C10L 2300/20 to C10L 2300/40 are added according to the number of components in the mixture. Example: C10L 1/16 A+ C10L 2300/20 corresponds to a mixture of two well defined hydrocarbons, e.g. mixture of hexane and benzene

Project: N/A (C10M)

C10M

LUBRICATING COMPOSITIONS (-well drilling compositions [C09K 8/02](#)-); **USE OF CHEMICAL SUBSTANCES EITHER ALONE OR AS LUBRICATING INGREDIENTS IN A LUBRICATING COMPOSITION** ((lubricants for medical use [A61](#)) ; mould release, i.e. separating, agents for metals [B22C 3/00](#) , for plastics or substances in a plastic state, in general [B29C 33/56](#) , for glass [C03B 40/02](#) ; use of particular substances in particular apparatus or conditions, see [F16N](#) or the relevant groups for the application, e.g. [A21D 8/08](#) , [B21C 9/00](#) , [H01B 3/18](#) ; immersion oils for microscopy [G02B 21/33](#)-)

NOTES

In this subclass, the following terms are used with the meanings indicated:

- "lubricant" or "lubricating composition" includes cutting oils, hydraulic fluids, metal drawing compositions, flushing oils, slushing oils, or the like;
- "aliphatic" includes "cycloaliphatic".

In respect of the classification of mixtures, attention is drawn to Note (4) (e) below.

In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place. Thus, a compound having an aromatic ring is classified as aromatic regardless of whether

the substituent(s) of interest are on the ring or on an aliphatic part of the molecule.

In this subclass:

metal or ammonium salts of a compound are classified as that compound;

salts or adducts formed between two or more organic compounds are classified according to all compounds forming the salt or adduct, if of interest;

a specified compound, e.g. phenols, acids, substituted by a macromolecular hydrocarbon radical is classified as that compound; base-materials or thickeners or additives consisting of a mixture for which no specific main group is provided are classified in the most indented group covering all essential constituents of the mixture, for example,

- a base-material mixture of ketone and amide - group

[C10M 105/00](#)

- a base-material mixture of ketone and ether

- group [C10M 105/08](#)

- an additive mixture of long and short chain esters - group

[C10M 129/00](#)

- an additive mixture of short chain aliphatic and aromatic carboxylic acids

- group [C10M 129/26](#) ;

except for aqueous lubricating compositions containing more than 10% water, which are classified separately, classification is made according to the type of ingredient or mixture of types of ingredient (base-material, thickener or additive) which characterises the composition. Attention is drawn to the fact that a mixture of essential ingredients characterised by only one of its components, rather than by the mixture as a whole, is not classified as a mixture, e.g. a lubricating composition consisting of:

- a known base-material and a new additive is classified only in the "additive"

part of the classification scheme;

- a known base-material with both a thickener and a further additive as essential ingredients, which may be individually classified as a mixture of thickener and additive;

- known base-material with a combination of additives as essential ingredients, which may be individually known or not, is classified in the appropriate place for the additive mixture.

In this subclass, it is desirable to add the indexing codes of:

- subclass **M10M**, relating to the chemical constitution of individual compounds of the lubricating compositions;

- subclass **M10N**, relating to physico-chemical aspects of the lubricating compositions or of their compounding ingredients.

For more information about the way of allocating these indexing codes, see the notes after the titles of the respective subclasses.

In this subclass, until May 2003, indexing codes were added, relating to:

- each of the essential ingredients of a mixture. However, in the case of an aqueous lubricating composition covered by group [C10M 173/00](#), the presence of water is not indicated;

- each of the essential reactants of a reaction product covered by groups [C10M 109/02](#), [C10M 121/04](#) or [C10M 159/12](#)

The indexing codes, which are chosen from groups [C10M 101/00](#) to [C10M 109/00](#), [C10M 113/00](#) to [C10M 121/00](#), [C10M 125/00](#) to [C10M 139/00](#),

[C10M 143/00](#) to [C10M 155/00](#) , [C10M 159/00](#) or [C10M 163/00](#) to [C10M 167/00](#) , were given using Combination Sets.

In this subclass, until May 2003, the indexing codes of subclass [C10N](#) were added.

Documents classified with Combination Sets according to internal Notes 2), 3) and 5) are in the state of being reclassified according to Note 1).

WARNING

The following groups are no longer used for the classification of new documents from January, 1978:

- [C10M 1/00](#) to [C10M 7/00](#)

The backlog of these groups is continuously being reclassified in groups [C10M 101/00](#) to [C10M 177/00](#) .

C10M 3/00	Liquid compositions essentially based on lubricating components other than mineral lubricating oils or fatty oils and their use as lubricants; Use as lubricants of single liquid substances (compositions in general essentially based on macromolecular compounds C08L)
C10M 7/00	Solid or semi-solid compositions essentially based on lubricating components other than mineral lubricating oils or fatty oils and their use as lubricants; Use as lubricants of single solid or semi-solid substances (compositions in general essentially based on macromolecular compounds C08L)
C10M 101/00	Lubricating compositions characterised by the base-material being a mineral or fatty oil (-containing more than 10% water C10M 173/00)
C10M 103/00	Lubricating compositions characterised by the base-material being an inorganic material (-containing more than 10% water C10M 173/00)
U C10M 105/00	Lubricating compositions characterised by the base-material being a non-macromolecular organic compound
C10M 105/02	• Well-defined hydrocarbons (-petroleum fractions C10M 101/02 -)
U C10M 105/56	• containing nitrogen
C10M 105/58	• • Amines, e.g. polyalkylene polyamines, quaternary amines (-polyalkylene polyamines with eleven or more monomer units C10M 107/44 -)
C10M 105/80	• containing atoms of elements not provided for in groups C10M 105/02 to C10M 105/78
U C10M 107/00	Lubricating compositions characterised by the base-material being a macromolecular compound
C10M 107/20	• containing oxygen (- C10M 107/18 takes precedence-)
C10M 107/54	• containing atoms of elements not provided for in groups C10M 107/02 to C10M 107/52
C10M 109/00	Lubricating compositions characterised by the base-material being a compound of unknown or incompletely defined constitution (-C10M 101/00 takes precedence-)
C10M 111/00	Lubrication compositions characterised by the base-material being a mixture of two or more compounds covered by more than one of the main groups C10M 101/00 to C10M 109/00 , each of these compounds being essential
C10M 111/06	• at least one of them being a compound of the type covered by group C10M 109/00

U	C10M 115/00	Lubricating compositions characterised by the thickener being a non-macromolecular organic compound other than a carboxylic acid or salt thereof
	C10M 115/02	• Hydrocarbons (–petroleum fractions C10M 121/02 –)
U	C10M 119/00	Lubricating compositions characterised by the thickener being a macromolecular compound
	C10M 119/04	• containing oxygen (–hydrocarbon polymers modified by oxidation C10M 119/02 –)
	C10M 119/30	• containing atoms of elements not provided for in groups C10M 119/02 to C10M 119/28
	C10M 123/00	Lubricating compositions characterised by the thickener being a mixture of two or more compounds covered by more than one of the main groups C10M 113/00 to C10M 121/00, each of these compounds being essential (–inorganic materials coated with organic compounds C10M 113/16–)
	C10M 123/06	• at least one of them being a compound of the type covered by group C10M 121/00
U	C10M 125/00	Lubricating compositions characterised by the additive being an inorganic material
	C10M 125/14	• Water (–aqueous lubricating compositions containing more than 10% water C10M 173/00 –)
	C10M 127/00	Lubricating compositions characterised by the additive being a non-macromolecular hydrocarbon (–petroleum fractions C10M 159/04–)
U	C10M 129/00	Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing oxygen
U	C10M 129/02	• having a carbon chain of less than 30 atoms
	C10M 129/68	• • Esters (–epoxidised C10M 129/66 –)
U	C10M 133/00	Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing nitrogen
U	C10M 133/02	• having a carbon chain of less than 30 atoms
	C10M 133/04	• • Amines, e.g. polyalkylene polyamines; Quaternary amines (–polyalkylene polyamines with eleven or more monomer units C10M 149/22 –)
U	C10M 135/00	Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing sulfur, selenium or tellurium
U	C10M 135/12	• Thio-acids; Thiocyanates; Derivatives thereof
U	C10M 135/14	• • having a carbon-to-sulfur double bond
	C10M 135/16	• • thiourea type, i.e. containing the group $\text{>N}-\overset{\text{S}}{\underset{\parallel}{\text{C}}}-\text{NK}$
	C10M 135/18	• • thiocarbamic type, e.g. containing the groups $\text{>N}-\overset{\text{S}}{\underset{\parallel}{\text{C}}}-\text{S}- \quad \text{or} \quad \text{>N}-\overset{\text{S}}{\underset{\parallel}{\text{C}}}-\text{O}-$
	C10M 139/00	Lubricating compositions characterised by the additive being an organic non-macromolecular compound containing atoms of elements not provided for in groups C10M 127/00 to C10M 137/00
	C10M 139/06	• having a metal-to-carbon bond (–metal complexes of unknown constitution C10M 159/18 –)

C10M 141/00	Lubricating compositions characterised by the additive being a mixture of two or more compounds covered by more than one of the main groups C10M 125/00 to C10M 139/00 , each of these compounds being essential
C10M 141/12	• at least one of them being an organic compound containing atoms of elements not provided for in groups C10M 141/02 to C10M 141/10
C10M 145/00	Lubricating compositions characterised by the additive being a macromolecular compound containing oxygen (oxidised hydrocarbons C10M 143/18 -)
C10M 155/00	Lubricating compositions characterised by the additive being a macromolecular compound containing atoms of elements not provided for in groups C10M 143/00 to C10M 153/00
C10M 157/00	Lubricating compositions characterised by the additive being a mixture of two or more macromolecular compounds covered by more than one of the main groups C10M 143/00 to C10M 155/00 , each of these compounds being essential
C10M 157/10	• at least one of them being a compound containing atoms of elements not provided for in groups C10M 157/02 to C10M 157/08
C10M 159/00	Lubricating compositions characterised by the additive being of unknown or incompletely defined constitution (carboxylic acids with less than 30 carbon atoms in the chain, of unknown or incompletely defined constitution C10M 129/56 -)
U C10M 169/00	Lubricating compositions characterised by containing as components a mixture of at least two types of ingredient selected from base-materials, thickeners or additives, covered by the preceding groups, each of these compounds being essential
C10M 169/06	• Mixtures of thickeners and additives
C10M 171/00	Lubricating compositions characterised by purely physical criteria, e.g. containing as base-material, thickener or additive, ingredients which are characterised exclusively by their numerically specified physical properties, i.e. containing ingredients which are physically well-defined but for which the chemical nature is either unspecified or only very vaguely indicated (chemically defined ingredients C10M 101/00 to C10M 169/00 ; petroleum fractions C10M 101/02 , C10M 121/02 , C10M 159/04 -)
C10M 171/06	• Particles of special shape or size
C10M 175/00	Working-up used lubricants to recover useful products (destructive distillation C10B ; extraction and elimination of PCBs C10G 7/006 , C10G 21/006 , C10G 25/006 ; combustion processes F23G ; Filtration, filters in general B01D -); Cleaning(in a mechanical way B08B ; integrated processes C23 ; solid waste B09B)
C10M 175/0091	• {Treatment of oils in a continuous lubricating circuit (e.g. motor oil system)}(e.g. motor-oil-system)
U C10M 2201/00	Inorganic compounds or elements as ingredients in lubricant compositions
C10M 2201/06	• Metal compounds (of chromium C10M 2201/086 -)
C10M 2201/08	• Inorganic acids or salts thereof (of phosphorus C10M 2201/085 , of chromium C10M 2201/086 , of boron C10M 2201/087 ; metal carbonates or bicarbonates C10M 2201/062 -)
C10M 2201/082	• • containing nitrogen (nitrides C10M 2201/061 -)
C10M 2201/084	• • containing sulfur, selenium or tellurium (sulfides, tellurides, selenides C10M 2201/065 -)

C10M 2205/00	Organic <u>macromolecular</u> hydrocarbon compounds or fractions, whether or not modified by oxidation as ingredients in lubricant compositions
	<p><u>NOTE</u></p> <p>Copolymers are indexed with the symbol for the main monomer always being present, (e.g. C10M 2205/026 , C10M 2205/022) according to the last place rule, followed by the symbol of the other monomers, (e.g. C10M 2205/022 , C10M 2205/00)</p>
C10M 2207/00	Organic <u>non-macromolecular</u> hydrocarbon compounds containing hydrogen, carbon and oxygen as ingredients in lubricant compositions
	<p><u>NOTE</u></p> <p>In this group compounds, (e.g. phenols, succinic acid) substituted by an alkyl group derived from a polymerised olefin are not considered as macromolecular compounds</p>
C10M 2207/28	• Esters (epoxidised esters C10M 2207/24)
C10M 2209/00	Organic <u>macromolecular</u> compounds containing oxygen as ingredients in lubricant compositions (-oxidised hydrocarbons C10M 2205/12)
U	C10M 2209/10 • Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds
U	C10M 2209/103 • • Polyethers, i.e. containing di- or higher polyoxyalkylene groups C10M 2209/107 • • of two or more specified different alkylene oxides covered by groups C10M 2209/104 to C10M 2209/106
C10M 2211/00	Organic <u>non-macromolecular</u> compounds containing halogen as ingredients in lubricant compositions
C10M 2213/00	Organic <u>macromolecular</u> compounds containing halogen as ingredients in lubricant compositions
C10M 2215/00	Organic <u>non-macromolecular</u> compounds containing nitrogen as ingredients in lubricant compositions
C10M 2215/02	• Amines, e.g. polyalkylene polyamines; Quaternary amines (polyalkylene polyamines with eleven or more monomer units C10M 2217/046)
C10M 2215/24	• having hydrocarbon substituents containing <u>thirty or more carbon atoms</u> , e.g. nitrogen derivatives of substituted succinic acid
C10M 2219/00	Organic <u>non-macromolecular</u> compounds containing sulfur, selenium or tellurium as ingredients in lubricant compositions
U	C10M 2219/04 • containing sulfur-to-oxygen bonds, i.e. sulfones, sulfoxides C10M 2219/046 • • Overbased sulfonic acid salts
C10M 2221/00	Organic <u>macromolecular</u> compounds containing sulfur, selenium or tellurium as ingredients in lubricant compositions
C10M 2221/02	• Macromolecular compounds obtained by reactions of monomers involving only carbon-to-carbon unsaturated bonds (sulfurised polyolefins C10M 2219/022)
C10M 2223/00	Organic <u>non-macromolecular</u> compounds containing phosphorus as ingredients in lubricant compositions
C10M 2225/00	Organic <u>macromolecular</u> compounds containing phosphorus as ingredients in lubricant compositions

C10M 2227/00 Organic non-macromolecular compounds containing atoms of elements not provided for in groups [C10M 2203/00](#) , [C10M 2207/00](#) , [C10M 2211/00](#) , [C10M 2215/00](#) , [C10M 2219/00](#) or [C10M 2223/00](#) as ingredients in lubricant compositions

C10M 2227/08 • having metal-to-carbon bonds (metal complexes of unknown constitution [C10M 2227/09](#))

C10M 2229/00 Organic macromolecular compounds containing atoms of elements not provided for in groups [C10M 2205/00](#) , [C10M 2209/00](#) , [C10M 2213/00](#) , [C10M 2217/00](#) , [C10M 2221/00](#) or [C10M 2225/00](#) as ingredients in lubricant compositions

C10M 2290/00 Mixtures of base materials or thickeners or additives (not used, see subgroups)

Project: N/A (C11B)

C11B ~~PRODUCING(pressing, extraction), REFINING AND PRESERVING FATS, FATTY SUBSTANCES(e.g. lanolin)~~~~PRODUCING (pressing, extraction), REFINING AND PRESERVING FATS, FATTY SUBSTANCES (e.g. lanolin),~~
FATTY OILS AND WAXES, INCLUDING EXTRACTION FROM WASTE MATERIALS; ESSENTIAL OILS; PERFUMES (drying-oils [C09F](#))

NOTE

In this subclass, boron and silicon are considered as metals

U C11B 1/00 Production of fats or fatty oils from raw materials

U C11B 1/02 • Pretreatment

C11B 1/04 • • of vegetable raw material{(-[C11B 1/025](#) takes precedence-)}

U C11B 3/00 Refining fats or fatty oils

C11B 3/008 • {by filtration, e.g. including ultra filtration, dialysis (-[C11B 3/005](#) takes precedence-)}

C11B 3/02 • by chemical reaction{(-[C11B 3/003](#) takes precedence-)}

U C11B 5/00 Preserving by using additives, e.g. anti-oxidants

NOTE

In groups [C11B 5/0007](#) to [C11B 5/0092](#) , in the absence of an indication to the contrary, a composition is classified in the last appropriate place

U C11B 5/0042 • {containing nitrogen}

C11B 5/005 • • {Amines or imines (-[C11B 5/0035](#) takes precedence-)}

C11B 5/0071 • {containing halogens, sulfur or phosphorus (-halogenated phenols [C11B 5/0035](#)-)}

U C11B 7/00 Separation of mixtures of fats or fatty oils into their constituents, e.g. saturated oils from unsaturated oils

NOTE

In groups [C11B 7/0008](#) to [C11B 7/0091](#) , in the absence of an indication to the contrary an invention is classified in the last appropriate place

C11B 7/0008 • {by differences of solubilities, e.g. by extraction, by separation from a solution by means of anti-solvents (-addition of a minor amount of solvent intended to lower the melting point [C11B 7/0083](#) , [C11B 7/0091](#)-)}

C11B 7/0016 • • {in hydrocarbons or halogenated hydrocarbons (-in pressure liquefied gases [C11B 7/005](#)-)}

- C11B 7/0041 • • {in mixtures of individualized solvents (*water is not taken into account*)}~~{water is not taken into account}~~
- C11B 7/0083 • {with addition of auxiliary substances, e.g. crystallisation promoters, filter aids, melting point depressors, (if a characterised solution is formed [C11B 7/0008](#)-)}
- C11B 9/00 Essential oils; Perfumes (-synthesis of chemical substances [C07](#)-)**
- C11B 11/00 Recovery or refining of other fatty substances, e.g. lanolin, waxes (-synthetic waxes [C07](#) , [C08](#) ; mineral waxes [C10G](#)-)**

- C12M APPARATUS FOR ENZYMOLOGY OR MICROBIOLOGY; {-APPARATUS FOR CULTURING MICROORGANISMS FOR PRODUCING BIOMASS, FOR GROWING CELLS OR FOR OBTAINING FERMENTATION OR METABOLIC PRODUCTS, i.e. BIOREACTORS OR FERMENTERS}**

NOTE

In this subclass the term microorganism includes prokaryotic and eukaryotic cells. Viruses, human, animal or plant cells, protozoa, tissues and unicellular algae are considered microorganisms.

When classifying an apparatus according to its use in group [C12M 21/00](#), classification should also be given in at least one of the groups [C12M 23/00](#)-[C12M 99/00](#).

This subclass covers apparatus or devices for the fermentation or for growing microorganisms or animal tissues of both laboratory and industrial scale, i.e. bioreactors.

This subclass covers also apparatus or devices for the pre-treatment or after-treatment of the biomass or microorganisms to be cultured or that have been cultured.

This subclass does not cover the methods or processes taking place in the bioreactors that are not based on the use of the parts of the apparatus.

This subclass does not cover:

apparatus for culturing plant tissue, which are covered by [A01H 4/001](#);

apparatus for preservation of living parts of bodies of humans or animals, which are covered by [A01N 1/0242](#);

apparatus or devices for testing sterility conditions not linked to a bioreactor or fermenter growing biomass, which are covered by [A61L 2/00](#), [G01N 31/226](#);

apparatus for biological treatment of water, waste water, sewage or sludge, which are covered by [C02F 3/00](#), [C02F 11/00](#);

apparatus for brewing of beer, which are covered by [C12C](#);

apparatus for production of wine or vinegar, which are covered by [C12G](#), [C12J 1/10](#);

apparatus or devices for DNA and RNA technology, which are covered by [B01L 7/52](#), [B01J 19/0046](#), [C12N 15/1003](#);

fermentation processes, which are covered by [C12P](#);

apparatus for bioleaching of ores, which are covered by [C22B 3/18](#);

removing cellulose from cellulosic substances, which is covered by [D21C](#);

apparatus or devices for sampling, detection, investigation or analysis of microorganisms or biosensors, which are covered by [G01N 33/48](#);

apparatus for automatic analysis not linked to a bioreactor or fermenter growing biomass, which are covered by [G01N 35/00](#);

testing or evaluating the effect of a chemical or biological compound involving human or animal cells, which are covered by [G01N 33/5005](#);
apparatus for immunological test processes, which are covered by [G01N 33/5302](#).

WARNING

Groups [C12M 21/00](#) to [C12M 99/00](#) do not correspond to former or current IPC groups.

Concordance CPC : IPC for these groups is as follows:

- [C12M 21/00](#) : [C12M 1/00](#) - [C12M 21/02](#) : [C12M 1/00](#) - [C12M 21/04](#)

C12M 21/00

{Bioreactors or fermenters specially adapted for specific uses (digesters for manure [A01C 3/023](#); apparatus for PCR [B01L 7/52](#); destroying or transforming solid waste [B09B 3/00](#); methods for genetic engineering [C12N 15/00](#), [C12Q 1/68](#); nucleic acid amplification reactions [C12Q 1/6844](#))}

- C12M 21/02 • {-Photobioreactors (culturing algae [A01G 33/00](#), [A01H 4/001](#), [C12N 1/12](#))}
- C12M 21/04 • {-for producing gas, e.g. biogas (digesters for manure with production of biogas [A01C 3/028](#), biological treatment of water, waste water or sewage [C02F 3/00](#), [C02F 11/02](#), preparation of natural gas or syngas [C10L 3/06](#), [C10L 3/10](#))}
- C12M 21/06 • {-for in vitro fertilization}
- C12M 21/08 • {-for producing artificial tissue or for ex-vivo cultivation of tissue (prostheses [A61F 2/00](#), grafts [A61L 27/00](#))}
- C12M 21/10 • {-adapted for the cultivation of avian eggs or in avian eggs, e.g. for vaccine production}
- C12M 21/12 • {-for producing fuels or solvents ([C12M 21/04](#) takes precedence; liquid carbonaceous fuels [C10L 1/00](#), solid fuels [C10L 5/00](#))}
- C12M 21/14 • {-for producing enzymes}
- C12M 21/16 • {-Solid state fermenters, e.g. for koji production}
- C12M 21/18 • {-Apparatus specially designed for the use of free, immobilized or carrier-bound enzymes}

C12M 23/00

{Constructional details, e.g. recesses, hinges (flow directing inserts in [C12M 27/18](#)-[C12M 27/24](#); apparatus for chemical or physical processes in general [B01J](#), chemical or physical laboratory apparatus in general [B01L](#))}

- C12M 23/02 • {-Form or structure of the vessel (large containers [B65D 88/00](#))}
- C12M 23/04 • • {-Flat or tray type, drawers ([C12M 23/10](#), [C12M 23/12](#), [C12M 23/16](#) take precedence)}
- C12M 23/06 • • {-Tubular ([C12M 23/08](#), [C12M 23/16](#) take precedence)}
- C12M 23/08 • • {-Flask, bottle or test tube}
- C12M 23/10 • • {-Petri dish (crystallising dishes [B01L 3/06](#))}
- C12M 23/12 • • {-Well or multiwell plates ([C12M 25/04](#) takes precedence)}
- C12M 23/14 • • {-Bags}
- C12M 23/16 • • {-Microfluidic devices; Capillary tubes (integrated microfluidic structures [B01L 3/5027](#); microreactors [B01J 19/0093](#))}
- C12M 23/18 • • {-Open ponds; Greenhouse type or underground installations}
- C12M 23/20 • {-Material Coatings (Immunocoatings [C12M 25/00](#))}
- C12M 23/22 • {-Transparent or translucent parts (glassware for laboratory use [B01L 3/00](#))}

C12M 23/24	• { Gas permeable parts }
C12M 23/26	• { flexible (flexible containers for laboratory use B01L 3/505)}
C12M 23/28	• { disposable or single use }
C12M 23/30	• { biodegradable }
C12M 23/32	• { Frangible parts }
C12M 23/34	• { Internal compartments or partitions }
C12M 23/36	• { Means for collection or storage of gas; Gas holders }
C12M 23/38	• { Caps; Covers; Plugs; Pouring means }
C12M 23/40	• { Manifolds; Distribution pieces (fluid transfer means B01L 3/563) }
C12M 23/42	• { Integrated assemblies, e.g. cassettes or cartridges }
C12M 23/44	• { Multiple separable units; Modules }
C12M 23/46	• { Means for fastening }
C12M 23/48	• { Holding appliances; Racks; Supports (holding devices for laboratory apparatus B01L 9/00) }
C12M 23/50	• { Means for positioning or orientating the apparatus (C12M 41/08 takes precedence) }
C12M 23/52	• { Mobile; Means for transporting the apparatus (transportable laboratories B01L 99/00) }
C12M 23/54	• { hand portable }
C12M 23/56	• { Floating elements }
C12M 23/58	• { Reaction vessels connected in series or in parallel (combinations of bioreactors with other apparatus, C12M 43/00) }
C12M 25/00	{Means for supporting, enclosing or fixing the microorganisms, e.g. immunocoatings}
C12M 25/01	• { Drops }
C12M 25/02	• { Membranes; Filters (filters or filtration in general B01D 24/00-B01D 41/00) }
C12M 25/04	• • { in combination with well or multiwell plates, i.e. culture inserts }
C12M 25/06	• { Plates; Walls; Drawers; Multilayer plates }
C12M 25/08	• • { electrically charged }
C12M 25/10	• { Hollow fibers or tubes (hollow fiber modules in general B01D 63/02) }
C12M 25/12	• • { the culture medium flowing outside the fiber or tube }
C12M 25/14	• { Scaffolds; Matrices (in general C12N 5/0068) }
C12M 25/16	• { Particles; Beads; Granular material; Encapsulation (chemical or physical processes conducted in the presence of fluids and solid particles B01J 8/00) }
C12M 25/18	• • { Fixed or packed bed }
C12M 25/20	• • { Fluidized bed (in chemical or physical processes B01J 8/18) }
C12M 27/00	{Means for mixing, agitating or circulating fluids in the vessel (by introduction of gas C12M 29/06, C12M 29/14, mixing in general or mixers per se B01F; mixing in apparatus for chemical or physical processes B01J)}
C12M 27/02	• { Stirrer or mobile mixing elements }
C12M 27/04	• • { with introduction of gas through the stirrer or mixing element }
C12M 27/06	• • { with horizontal or inclined stirrer shaft or axis }
C12M 27/08	• • { with different stirrer shapes in one shaft or axis }
C12M 27/10	• { Rotating vessel }
C12M 27/12	• • { Roller bottles; Roller tubes }
C12M 27/14	• { Rotation or movement of the cells support, e.g. rotated hollow fibers }

C12M 27/16	• {-Vibrating; Shaking; Tilting}
C12M 27/18	• {-Flow directing inserts}
C12M 27/20	• • {-Baffles; Ribs; Ribbons; Auger vanes}
C12M 27/22	• • {-Perforated plates, discs or walls}
C12M 27/24	• • {-Draft tube (C12M 29/08 takes precedence)}
C12M 29/00	{-Means for introduction, extraction or recirculation of materials, e.g. pumps (pumps per se F04B)}
C12M 29/02	• {-Percolation}
C12M 29/04	• {-Filters; Permeable or porous membranes or plates, e.g. dialysis}
C12M 29/06	• {-Nozzles; Sprayers; Spargers; Diffusers (per se B01F 3/04106 , B01J 19/26)}
C12M 29/08	• • {-Air lift}
C12M 29/10	• {-Perfusion}
C12M 29/12	• {-Pulsatile flow}
C12M 29/14	• {-Pressurized fluid}
C12M 29/16	• {-Hollow fibers (hollow fiber modules in general B01D 63/02)}
C12M 29/18	• {-External loop; Means for reintroduction of fermented biomass or liquid percolate (loop type reactors for chemical or physical processes B01J 19/2435)}
C12M 29/20	• {-Degassing; Venting; Bubble traps (means for collection or storage of gas C12M 23/36 ; gas collection apparatus for laboratory use B01L 5/02)}
C12M 29/22	• • {-Oxygen discharge}
C12M 29/24	• {-Recirculation of gas}
C12M 29/26	• {-Conditioning fluids entering or exiting the reaction vessel}
C12M 31/00	{-Means for providing, directing, scattering or concentrating light (C12M 41/06 takes precedence)}
C12M 31/02	• {-located outside the reactor}
C12M 31/04	• • {-Mirrors}
C12M 31/06	• • {-Lenses}
C12M 31/08	• {-by conducting or reflecting elements located inside the reactor or in its structure}
C12M 31/10	• {-by light emitting elements located inside the reactor, e.g. LED or OLED}
C12M 31/12	• {-Rotating light emitting elements}
C12M 33/00	{-Means for introduction, transport, positioning, extraction, harvesting, peeling or sampling of biological material in or from the apparatus (chemical or physical laboratory apparatus in general B01L, devices for taking cell samples A61B 10/0045, withdrawing or distributing predetermined quantities of fluid B01L 99/00)}
C12M 33/02	• {-by impregnation, e.g. using swabs or loops (fluid transport using swabs B01L 3/5029)}
C12M 33/04	• {-by injection or suction, e.g. using pipettes, syringes, needles (pipettes in general B01L 3/02)}
C12M 33/06	• • {-for multiple inoculation or multiple collection of samples}
C12M 33/07	• • {-Dosage or metering devices therefore}
C12M 33/08	• {-by vibration}
C12M 33/10	• {-by centrifugation (centrifuges in general B04B); Cyclones (cyclones in general B04C)}

C12M 33/12	• {-by pressure}
C12M 33/14	• {-with filters, sieves or membranes}
C12M 33/16	• {-Screw conveyor}
C12M 33/18	• {-Rollers}
C12M 33/20	• {-Ribbons}
C12M 33/22	• {-Settling tanks; Sedimentation by gravity (settling tanks per se B01D 21/02)}
C12M 35/00	{-Means for application of stress for stimulating the growth of microorganisms or the generation of fermentation or metabolic products; Means for electroporation or cell fusion (machines for extracting juice from animal or plant tissue by electroplasmolysis A23N 1/006, processes employing electric or wave energy B01J 19/08; treatment of microorganisms or enzymes with electrical or wave energy C12N 13/00; methods for cell fusion C12N 15/02; introduction of foreign genetic material C12N 15/87)}
C12M 35/02	• {-Electrical or electromagnetic means, e.g. for electroporation or for cell fusion}
C12M 35/04	• {-Mechanical means, e.g. sonic waves, stretching forces, pressure or shear stimuli}
C12M 35/06	• {-Magnetic means (C12M 35/02 takes precedence)}
C12M 35/08	• {-Chemical, biochemical or biological means, e.g. plasma jet, co-culture}
C12M 37/00	{-Means for sterilizing, maintaining sterile conditions or avoiding chemical or biological contamination (C12M 23/38 takes precedence; filtration in general and filters per se B01D 24/00-B01D 41/00; autoclaves B01J 3/04; treatment of microorganisms with electrical or wave energy C12N 13/00)}
C12M 37/02	• {-Filters}
C12M 37/04	• {-Seals}
C12M 37/06	• {-Means for testing the completeness of the sterilization (testing for sterility conditions C12Q 1/22)}
C12M 39/00	{-Means for cleaning the apparatus or avoiding unwanted deposits of microorganisms (apparatus for cleaning laboratory receptacles or instruments B01L 99/00; cleaning in general B08B)}
C12M 41/00	{-Means for regulation, monitoring, measurement or control, e.g. flow regulation (controlling or regulating chemical, physical or physicochemical processes B01J 19/0006; heating or cooling apparatus for laboratory use B01L 7/00; electro optical investigation of individual particles, flow cytometers G01N 15/14; automatic analysis G01N 35/00; controlling or regulating in general G05N)}
C12M 41/02	• {-of foam (foam prevention during gasification of liquids B01D 19/02)}
C12M 41/04	• • {-Means for foam enhancement (making foam by mixing B01F 3/04446)}
C12M 41/06	• {-of illumination}
C12M 41/08	• • {-Means for changing the orientation}
C12M 41/10	• • {-Filtering the incident radiation}
C12M 41/12	• {-of temperature (controlling the temperature of chemical or physical processes B01J 19/0013 , heating or cooling apparatus for laboratory use B01L 7/00)}
C12M 41/14	• • {-Incubators; Climatic chambers (per se B01L 1/00)}
C12M 41/16	• • {-by recirculation of culture medium at controlled temperature}
C12M 41/18	• • {-Heat exchange systems, e.g. heat jackets or outer envelopes}
C12M 41/20	• • • {-the heat transfer medium being a gas}
C12M 41/22	• • • {-in contact with the bioreactor walls}
C12M 41/24	• • • {-inside the vessel}

- C12M 41/26 • {-of pH}
- C12M 41/28 • {-of redox potential}
- C12M 41/30 • {-of concentration}
- C12M 41/32 • • {-of substances in solution}
- C12M 41/34 • • {-of gas}

NOTES

Documents relating to the use of vectors or hosts for the preparation of specific peptides, e.g. enzymes, are classified in subclass [C07K](#) or in group [C12N 9/00](#) according to the peptides, with the appropriate indexing codes.

Attention is drawn to Notes (1) to (3) following the title of Class [C12](#) . When classifying in this group, classification is also made in group [B01D 15/08](#) insofar as subject matter of general interest relating to chromatography is concerned.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

NOTE

In this group, the following words are used with the meanings indicated: - a "totipotent" cell can differentiate into all somatic lineages (ectoderm, mesoderm, endoderm), the germ line and extra-embryonic tissues such as the placenta; - a "pluripotent" cell is a somatic stem cell which can differentiate into cells of at least two of the three somatic lineages (ectoderm, mesoderm, endoderm); - a "multipotent" cell is restricted to one lineage; - "progenitor" and "precursor" cells are further restricted within the lineage. If not explicitly foreseen, totipotent cells are classified with pluripotent cells. Multipotent cells should not be classified with pluripotent cells. Unless provided for otherwise, committed progenitors are classified with their progeny.

- C12N 5/0018 • {Culture media for cell or tissue culture ~~(-media for specific animal cell type [C12N 5/06](#)-)}~~
- C12N 5/0068 • {General culture methods using substrates ~~(-for specific animal cell type [C12N 5/06](#)-)}~~
- C12N 5/04 • Plant cells or tissues~~(-culture media [C12N 5/0025](#)-)}~~
- C12N 5/06 • Animal cells or tissues; {Human cells or tissues ~~(-preservation of living cells or tissues [A01N 1/02](#)-)~~; Not used, see subgroups}

NOTE

In this group, the following words are used with the meanings indicated:

- a "totipotent" cell can differentiate into all somatic lineages (ectoderm, mesoderm, endoderm), the germ line and extra-embryonic tissues such as the placenta;
- a "pluripotent" cell is a somatic stem cell which can differentiate into cells of at least two of the three somatic lineages (ectoderm, mesoderm, endoderm);
- a "multipotent" cell is restricted to one lineage.

"Progenitor" and "precursor" cells are further restricted within the lineage.
If not explicitly foreseen, totipotent cells are classified with pluripotent cells.
Multipotent cells should not be classified with pluripotent cells

Viruses; Bacteriophages; Compositions thereof; Preparation or purification thereof (-preparing medicinal viral antigen or antibody composition, e.g. virus vaccines, [A61K 39/00](#))

WARNING

From March 15, 2012 groups [C12N 7/02](#) - [C12N 7/08](#) and subgroups thereof are no longer used for the classification of new documents. The documents in these (sub)groups are being reclassified to the corresponding codes in the range [C12N 2710/00-C12N 2795/00](#).

C12N 9/00

Enzymes; Proenzymes; Compositions thereof (~~preparations containing enzymes for cleaning teeth [A61K 8/66](#) , [A61Q 11/00](#) ; medicinal preparations containing enzymes or pro-enzymes [A61K 38/43](#) ; enzyme containing detergent compositions [C11D](#) ; { enzymes with nucleic acid structure, e.g. ribozymes, [C12N 15/113](#) }); Processes for preparing, activating, inhibiting, separating or purifying enzymes (~~preparation of malt [C12C 1/00](#)~~)~~

NOTE

Enzymes are generally categorized below according to the "Nomenclature and Classification of Enzymes" of the International Commission on Enzymes. Where appropriate, this designation appears in the groups below in parenthesis.

- U C12N 9/14 • Hydrolases (3)
- U C12N 9/16 • • acting on ester bonds (3.1)
- C12N 9/22 • • • Ribonucleases {RNAses, DNAses(~~catalytic nucleic acids [C12N 15/113](#)~~)}
- U C12N 9/48 • • acting on peptide bonds (3.4)
- C12N 9/50 • • • Proteinases {Endopeptidases (3.4.21-3.4.25)}
- C12N 9/98 • Preparation of granular or free-flowing enzyme compositions (~~[C12N 9/96](#) takes precedence~~)

C12N 15/00

Mutation or genetic engineering; DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification; Use of hosts therefor (~~mutants or genetically engineered micro-organisms, per se [C12N 1/00](#) , [C12N 5/00](#) , [C12N 7/00](#) ; new plants per se [A01H](#) ; plant reproduction by tissue culture techniques [A01H 4/00](#) ; new animals per se [A01K 67/00](#) ; use of medicinal preparations containing genetic material which is inserted into cells of the living body to treat genetic diseases, gene therapy [A61K 48/00](#)~~)

- C12N 15/02 • Preparation of hybrid cells by fusion of two or more cells, e.g. protoplast fusion(~~monoclonal antibodies [C07K 16/00](#) ; apparatus for cell fusion [C12M](#)~~)
- U C12N 15/09 • Recombinant DNA-technology
- C12N 15/10 • • Processes for the isolation, preparation or purification of DNA or RNA (~~chemical preparation of DNA or RNA [C07H 21/00](#) ; preparation of non-structural polynucleotides from micro-organisms or with enzymes [C12P 19/34](#)~~)

NOTE

After the symbol [C12N 15/10](#) to [C12N 15/1096](#), and separated therefrom by a + sign, it is desirable to add the indexing codes selected from groups [C12Q 2500/00](#) to **C12Q599/00** , relating to relevant technical features of the invention. When more than one indexing code is selected, the different codes are separated by a + sign. Example : [C12N 15/1037](#) + **C12Q537/125** + **C12Q521/537**

- U C12N 15/1034 • • • {Isolating an individual clone by screening libraries}
- C12N 15/1068 • • • • ~~{Template(nucleic acid)}~~ *{Template (nucleic acid)}* mediated chemical library synthesis, e.g. chemical and enzymatical DNA-templated organic molecule synthesis, libraries prepared by non ribosomal polypeptide synthesis (NRPS), DNA/RNA-polymerase mediated polypeptide synthesis}
- C12N 15/1079 • • • • {Screening libraries by altering the phenotype or phenotypic trait of the host (~~reporter assays [C12N 15/1086](#)~~)}

C12N 15/11	<ul style="list-style-type: none"> • DNA or RNA fragments; Modified forms thereof (DNA or RNA not used in recombinant technology, C07H 21/00 <i>DNA or RNA not used in recombinant technology, C07H 21/00</i>); {Non-coding nucleic acids having a biological activity} <p><u>NOTE</u></p> <p>Documents relating to DNA or its corresponding RNA and their use in recombinant DNA technology or the preparation of specific peptides, e.g. enzymes, are classified in subclass C07K or in group C12N 9/00 according to the peptides, with the appropriate indexing codes relating to their use in recombinant technology. Groups C12N 15/11 to C12N 15/117 cover also the use of non-coding nucleic acids as active ingredients in medicinal preparations. The C12N2300/00 ICO scheme has to be applied to these groups. C12P

FERMENTATION OR ENZYME-USING PROCESSES TO SYNTHESISE A DESIRED CHEMICAL COMPOUND OR COMPOSITION OR TO SEPARATE OPTICAL ISOMERS FROM A RACEMIC MIXTURE (~~brewing of beer~~ [C12C](#) ; producing vinegar [C12J](#) ; producing specific peptides or proteins [C07K](#) ; producing enzymes [C12N 9/00](#) ; DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification [C12N 15/00](#) ; measuring or testing processes involving enzymes or micro-organisms [C12Q](#) ; measuring or testing processes involving nucleic acid amplification reactions [C12Q 1/6844](#) ; fermentation processes to form a food composition, [A21](#) or [A23](#) ; compounds in general, see the relevant compound class, e.g. [C01](#) , [C07-](#))]

NOTE

This subclass covers the production of compounds or compositions by biochemical transformation of matter performed by using enzymes or micro-organisms, wherein micro-organisms are defined as any single-celled organisms, including bacteria, fungi, yeast or microalgae, or plant or mammalian cells in the form of cell cultures.

In this subclass, documents are primarily classified according to the compounds produced. In addition, if appropriate, classification according to the method or biocatalyst used to produce the compound is made.

Classification in groups [C12P 19/14](#) - [C12P 19/24](#) , [C12P 39/00](#) , [C12P 41/00](#) - [C12P 41/009](#) should only be made together with the corresponding product groups

WARNING

The following IPC groups are not used in the CPC scheme. Subject-matter covered by these groups is classified in the following CPC groups: - [C12P 21/04](#) covered by [C07K 7/50](#) -
[C12P 21/08](#) covered by [C07K 16/00](#)

C12P 1/00

Preparation of compounds or compositions, not provided for in groups [C12P 3/00](#) to [C12P 39/00](#) , by using micro-organisms or enzymes

NOTE

1. This group is used for the classification of documents relating to the production of compounds of unknown structure 2. When classifying in this group, classification should be made also in [C12R](#)

C12P 3/00

Preparation of elements or inorganic compounds except carbon dioxide{(~~Recovery of carbon dioxides as by-products~~ [C12F 3/02-](#))}

C12P 5/00

Preparation of hydrocarbons {or halogenated hydrocarbons}

C12P 5/002

• {cyclic (~~compounds containing at least three condensed carbocyclic rings~~ [C12P 15/00-](#))}

C12P 5/005

• • {aromatic (~~naphthacene~~ [C12P 29/00-](#))}

C12P 5/007

• {containing one or more isoprene units, i.e. terpenes (~~carotenes~~ [C12P 23/00-](#))}

C12P 5/02

• acyclic{(~~[C12P 5/007](#) takes precedence-~~)}

U C12P 7/00	Preparation of oxygen-containing organic compounds
C12P 7/40	• containing a carboxyl group {including Peroxycarboxylic acids (Fatty acids C12P 7/6409 <i>Fatty acids C12P 7/6409</i>)}
C12P 7/54	• • Acetic acid (vinegar C12J)
C12P 7/58	• • Aldonic, keto-almonic or saccharic acids (uronic acids C12P 19/00)
C12P 7/62	• Carboxylic acid esters (fatty acid esters C12P 7/6436)
U C12P 7/64	• Fats; Fatty oils; Ester-type waxes; Higher fatty acids, i.e. having at least seven carbon atoms in an unbroken chain bound to a carboxyl group; Oxidised oils or fats
U C12P 7/6436	• • {Fatty acid esters}
U C12P 7/6445	• • • {Glycerides}
C12P 7/6481	• • • • {Phosphoglycerides (phosphoglycerides having carboxylic acids with less than 7 carbon atoms, C12P 7/62)}
C12P 9/00	Preparation of organic compounds containing a metal or atom other than H, N, C, O, S or halogen (phosphoglycerides, C12P 7/6481)

C12P 13/02	• Amides, e.g. chloramphenicol {or polyamides; Imides or polyimides; Urethanes, i.e. compounds comprising N-C=O structural element or polyurethanes (peptides C12P 21/00 or C07K)}
C12P 13/04	• Alpha- or beta- amino acids (other amino acids C12P 13/005)
C12P 15/00	Preparation of compounds containing at least three condensed carbocyclic rings { Gibbanes C12P 27/00 ; naphthacenes C12P 29/00 }
C12P 17/00	Preparation of heterocyclic carbon compounds with only O, N, S, Se or Te as ring hetero atoms (C12P 13/04 to C12P 13/24 take precedence)
C12P 17/16	• containing two or more hetero rings { Thiamine open chain analogs C12P 17/167 ; i.e. not condensed among themselves or through a common carbocyclic ring system }
C12P 17/18	• containing at least two hetero rings condensed among themselves or condensed with a common carbocyclic ring system, e.g. rifamycin, { e.g. Rifamycin C12P 17/189 }
C12P 17/182	• • {Heterocyclic compounds containing nitrogen atoms as the only ring heteroatoms in the condensed system (Alloxazine or isoalloxazine, e.g. riboflavine C12P 25/00 <i>Alloxazine or isoalloxazine, e.g. riboflavine C12P 25/00</i>)}
C12P 17/185	• • {Heterocyclic compounds containing sulfur atoms as ring hetero atoms in the condensed system} { cepam nucleus C12P 35/00 ; penam nucleus C12P 37/00 }
C12P 17/188	• • {Heterocyclic compound containing in the condensed system at least one hetero ring having nitrogen atoms and oxygen atoms as the only ring heteroatoms (ergot-alkaloids C12P 17/183)}
C12P 19/00	Preparation of compounds containing saccharide radicals (keto-almonic acids C12P 7/58)
	NOTE Attention is drawn to the term "saccharide radical" in the first Note following the title of subclass C07H .
C12P 19/02	• Monosaccharides (2-ketogulonic acid C12P 7/60)
C12P 19/16	• produced by the action of an alpha-1, 6-glucosidase, e.g. amylose, debranched amylopectin (non-biological hydrolysis of starch C08B 30/00)

C12P 19/44	<ul style="list-style-type: none"> Preparation of O-glycosides, e.g. glucosides{ Polysaccharides and not substituted disaccharides C12P 19/04 , C12P 19/12 }
U C12P 19/46	<ul style="list-style-type: none"> • having an oxygen atom of the saccharide radical bound to a cyclohexyl radical, e.g. kasugamycin
U C12P 19/48	<ul style="list-style-type: none"> • • the cyclohexyl radical being substituted by two or more nitrogen atoms, e.g. destomycin, neamin
C12P 19/485	<ul style="list-style-type: none"> • • • {Having two saccharide radicals bound through only oxygen to non-adjacent ring carbons of the cyclohexyl radical, e.g. gentamycin, kanamycin, sisomycin, verdamycin, mutamycin, tobramycin, nebramycin, antibiotics 66-40B, 66-40D, XK-62-2, 66-40, G-418, G-52 { -see also C12P 19/54 } }
C12P 19/54	<ul style="list-style-type: none"> • • the cyclohexyl radical being bound directly to a nitrogen atom of two or more $\begin{array}{c} >N-C-N< \\ \\ N \end{array}$ radicals, e.g. streptomycin
C12P 19/60	<ul style="list-style-type: none"> • having an oxygen of the saccharide radical directly bound to a non-saccharide heterocyclic ring or a condensed ring system containing a non-saccharide heterocyclic ring, e.g. coumermycin, novobiocin{ C12P 19/605 }
C12P 19/605	<ul style="list-style-type: none"> • • {to a 1-benzopyran-2-on (or the chalcones and hydrogenated chalcones thereof, e.g. coumermycin, novobiocin, novenamin)}(or the chalcones and hydrogenated chalcones thereof, e.g. coumermycin, novobiocin, novenamin)}
C12P 21/00	Preparation of peptides or proteins (-single cell protein C12N 1/00 -)
C12P 21/06	<ul style="list-style-type: none"> produced by the hydrolysis of a peptide bond, e.g. hydrolysate products { -preparing foodstuffs by protein hydrolysis A23J 3/00 }
C12P 23/00	Preparation of compounds containing a cyclohexene ring having an unsaturated side chain containing at least ten carbon atoms bound by conjugated double bonds, e.g. carotenes (-containing heterorings C12P 17/00 -)
C12P 29/00	Preparation of compounds containing a naphthacene ring system, e.g. tetracycline (-C12P 19/00 takes precedence-)
U C12P 33/00	Preparation of steroids NOTES Attention is drawn to the definition of steroids in the note following the title of subclass C07J . In groups C12P 33/02 to C12P 33/20 , the terms "acting", "forming", "hydroxylating", "dehydroxylating" and "dehydrogenating" refer to the action of a micro-organism or enzyme rather than other chemical action.
C12P 33/12	<ul style="list-style-type: none"> Acting on D ring{ carbons 13 and 14 belong to the C ring; degradation of lateral chains C12P 33/005 }
C12P 33/20	<ul style="list-style-type: none"> containing heterocyclic rings{ reactions are also classified in groups C12P 33/00 to C12P 33/18 }
U C12P 37/00	Preparation of compounds having a 4-thia-1-azabicyclo [3.2.0] heptane ring system, e.g. penicillin
C12P 37/02	<ul style="list-style-type: none"> in presence of phenylacetic acid or phenylacetamide or their derivatives {not to be used}
C12P 2203/00	Fermentation products obtained from optionally pretreated or hydrolyzed cellulosic or lignocellulosic material as the carbon source (-ethanol C12P 7/10 -)

Project: N/A (C12Q)**C12Q**

MEASURING OR TESTING PROCESSES INVOLVING ENZYMES OR MICRO-ORGANISMS (-immunoassay [G01N 33/53](#)); **COMPOSITIONS OR TEST PAPERS THEREFOR; PROCESSES OF PREPARING SUCH COMPOSITIONS; CONDITION RESPONSIVE CONTROL IN MICROBIOLOGICAL OR ENZYMOLOGICAL PROCESSES**

NOTES

This subclass does not cover the observation of the progress or of the result of processes specified in this subclass by any of the methods specified in groups [G01N 3/00](#) to [G01N 29/00](#), which is covered by subclass [G01N](#).

In this subclass, the following expression is used with the meaning indicated:
"involving", when used in relation to a substance, includes the testing for the substance as well as employing the substance as a determinant or reactant in a test for a different substance.

Attention is drawn to Notes (1) to (3) following the title of class [C12](#).

In this subclass, test media are classified in the appropriate group for the relevant test process.

Documents describing the use of an electrode for analysis of a specific analyte are classified in [C12Q 1/001](#) or subgroups and not according to the last place rule

Documents relating to new peptides, e.g. enzymes, or new DNA or its corresponding mRNA, encoding for the peptides, and their use in measuring or testing processes are classified in subclass [C07K](#) or in group [C12N 9/00](#) according to the peptides, with the appropriate indexing codes relating to their use in diagnostics. However where the new nucleic acids are principally used in diagnostic processes, e.g. PCR, hybridisation reactions, the documents are also classified in group [C12Q 1/68](#)

When classifying in groups [C12Q 1/68](#) to [C12Q 1/70](#) it is desirable to classify with symbols from groups [C12Q 2500/00](#) to [C12Q 599/00](#), relating to relevant technical features of the invention, using Combination Sets.

In groups [C12Q 1/6876](#) - [C12Q 1/6895](#) and [C12Q 1/70](#) - [C12Q 1/708](#) it is desirable to add the indexing codes [C12Q 2600/00](#) to [C12Q 2600/178](#) which reflect the use of the product in combination with the virus groups only if the application refers to products.

C12Q 1/00

Measuring or testing processes involving enzymes, {nucleic acids} or micro-organisms (-measuring or testing apparatus with condition measuring or sensing means, e.g. colony counters [C12M 1/34](#)); **Compositions therefor; Processes of preparing such compositions**

Project: N/A (C22B)**C22B****PRODUCTION AND REFINING OF METALS (electrolytic [C25](#));
PRETREATMENT OF RAW MATERIALS**NOTE

In this subclass, groups for obtaining metals include obtaining the metals by non-metallurgical processes, and obtaining metal compounds by metallurgical processes, {as far as specifically indicated in the relevant groups} . Thus, for example, group [C22B 11/00](#) covers the production of silver by reduction of ammoniacal silver oxide in solution, and group [C22B 17/00](#) includes the production of cadmium oxide by a metallurgical process. Furthermore, although compounds of arsenic and antimony are classified in [C01G](#), production of the elements themselves is included in [C22B](#), as well as the production of their compounds by metallurgical processes.

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

[C22B 3/26](#) to [C22B 3/40](#) covered by
[C22B 3/0005](#)

C22B 1/00**Preliminary treatment of ores or scrap (-furnaces, sintering apparatus [F27B](#)-)**

C22B 1/005

- {Preliminary treatment of scrap (-[C22B 1/02](#) up to [C22B 1/26](#) take precedence-)}

C22B 1/02

- Roasting processes (-[C22B 1/16](#) takes precedence-)

U C22B 3/00**Extraction of metal compounds from ores or concentrates by wet processes**NOTE

This group covers methods directed to the extraction of three or more metals. For the recovery of one or two metals, see the other groups of this subclass concerning these metals

C22B 3/0004

- {Treatment or purification of solutions, e.g. obtained by leaching (-[C22B 3/04](#) takes precedence-)}

WARNING

Not used, see subgroups

C22B 3/0005

- {by liquid-liquid extraction using organic compounds, e.g. acyclic or carbocyclic compounds, heterocyclic compounds, organo-metallic compounds, alcohols, ethers, or the like (-[C22B 3/205](#) takes precedence-)}

U C22B 3/0006

C23C

COATING METALLIC MATERIAL; COATING MATERIAL WITH METALLIC MATERIAL; SURFACE TREATMENT OF METALLIC MATERIAL BY DIFFUSION INTO THE SURFACE, BY CHEMICAL CONVERSION OR SUBSTITUTION; COATING BY VACUUM EVAPORATION, BY SPUTTERING, BY ION IMPLANTATION OR BY CHEMICAL VAPOUR DEPOSITION, IN GENERAL (applying liquids or other fluent materials to surfaces in general [B05](#); making metal-coated products by extrusion [B21C 23/22](#); covering with metal by connecting pre-existing layers to articles, see the relevant places, e.g. [B21D 39/00](#), [B23K](#); working of metal by the action of a high concentration of electric current on a workpiece using an electrode [B23H](#); metallising of glass [C03C](#); metallising mortars, concrete, artificial stone, ceramics or natural stone [C04B 41/00](#); paints varnishes, laquers [C09D](#); enamelling of, or applying a vitreous layer to, metals [C23D](#); inhibiting corrosion of metallic material or incrustation in general [C23F](#); single-crystal film growth [C30B](#); manufacture of semiconductor devices [H01L](#); manufacture of printed circuits [H05K](#))

NOTE

In this subclass, an operation is considered as pre-treatment or after-treatment when it is specially adapted for, but quite distinct from, the coating process concerned and constitutes an independent operation. If an operation results in the formation of a permanent sub- or upper layer, it is not considered as pre-treatment or after-treatment and is classified as a multi-coating process.

WARNING

1. Groups [C23C 28/30](#) to [C23C 28/44](#) do not correspond to former or current IPC-groups. Concordance CPC : IPC for these groups is as follows - [C23C 28/30](#) - [C23C 28/44](#) : [C23C 28/00](#)

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

[C23C 14/36](#) to [C23C 14/44](#) covered by
[C23C 14/34](#) + subgr.

The following IPC group is not used in the CPC system. Subject-matter covered by the group is classified in the following CPC groups : [C23C 18/28](#) covered by [C23C 18/2006](#) - [C23C 18/2093](#)

C23C 2/00 -
C23C 6/00

Coating by applying the coating material in the molten state (casting [B22D](#), e.g. [B22D 19/08](#), [B22D 23/04](#), [B29](#); built-up welding [B23K](#), e.g. [B23K 5/18](#), [B23K 9/04](#))

C23C 2/02

- Pre-treatment of the material to be coated, e.g. for coating on selected surface areas (C23C 2/30 takes precedence)

C23C 2/14

- Removing excess of molten coatings; Controlling or regulating the coating thickness (controlling or regulating thickness in general [G05D 5/02](#))

C23C 2/26

- After-treatment (C23C 2/14 takes precedence)

C23C 2/30

- Fluxes or coverings on molten baths (C23C 2/22 takes precedence)

C23C 2/32

- using vibratory energy applied to the bath or substrate (C23C 2/14 takes precedence)

C23C 2/34

- characterised by the shape of the material to be treated (C23C 2/14 takes precedence)

C23C 4/00

Coating by spraying the coating material in the molten state, e.g. by flame, plasma or electric discharge (spraying guns [B05B](#); making alloys containing fibres or filaments by thermal spraying of metal [C22C 47/16](#); plasma guns [H05H](#))

U C23C 4/04

- characterised by the coating material

NOTES

In this subclass, the following expression is used with the meaning indicated:

- "non-woven fabrics" means fabrics formed wholly or partly of textile material by processes comprising operations other than the weaving, knitting, braiding, lacing, or knotting of yarns, threads, or filaments for which provision is made in other subclasses of Section D. This expression includes felts, cotton-wool, and wadding.

In this subclass:

- some of the non-woven fabrics can also be regarded as "layered products" within the meaning of subclass [B32B](#), and further classification in that subclass should be considered in accordance with the notes thereto;
 - in cases where the making of non-woven fabrics involves the use of particular chemical compounds or compositions, e.g. for treating or bonding fibres, filaments, or yarns, further classification in other appropriate subclasses should also be considered.

By varying the proportions of fibres or threads, and the chemical compounds or compositions, the final products may be given the appearance of paper, cardboard, leather or the like.

In this subclass, a number of groups, e.g. [D04H 1/067](#) , correspond to IPC2012.01

WARNING

1. Documents of the complete subclass [D04H](#) including all subgroups are in the process of being reorganised to the new groups corresponding to the IPC 2012.01 classification scheme defined below.

U	D04H 1/00	Non-woven fabrics formed wholly or mainly of staple fibres or like relatively short fibres
	D04H 1/005	<ul style="list-style-type: none"> • {Making three-dimensional articles by consolidation} (-D04H 1/22 takes precedence-)} <p><u>WARNING</u> This group is no longer used for the classification of new documents as from April 1, 2011. Project: N/A (D21H)**D21H 1/00****Paper; -Cardboard (fibreboard [D21J](#))**NOTE

Layered products classified in this group are also classified in subclass [B32B](#)

D21H 1/02

- Multi-ply material {finished plies}

D21H 1/04

- • by using an adhesive

D21H 1/06

- • Apparatus

D21H 1/08

- • with incorporated laminae of threads or fabric

D21H 3/00

Paper or cardboard prepared by adding substances to the pulp or to the formed web on the paper-making machine { and by applying substances to finished paper or cardboard (on the paper-making machine), also when the intention is to impregnate at least a part of the paper body}

NOTE

A compound is always classified in the last appropriate place.

D21H 3/82

- by adding insoluble coloured substances, e.g. powders, fibres, pieces of metal, for obtaining different colours in the paper {fancy papers; substances characterised by their physical appearance, e.g. form, rather than by their chemical constitution}

D21H 5/00

Special paper or cardboard not otherwise provided for (duplicating or recording paper [B41M](#))

- D21H 5/0005
- {-Processes or apparatus specially adapted for applying liquids or other fluent materials to finished paper or board, e.g. impregnating, coating (applying liquids to surfaces in general [B05](#); treating textile materials by liquids, gases or vapours [D06B](#); impregnated or coated fibreboard [D21J 1/08](#); apparatus for making patterned paper [D21H 5/06](#); printing machines [B41F](#))}
- NOTE
- Equipment related to specific chemical treatment, see relevant sub-groups for this treatment; e.g. parchmentising or vulcanising [D21H 5/08](#), treatment with viscose [D21H 17/25](#)
- D21H 5/005
- {-involving several different techniques of application (treatments in which the characteristics of a single treatment are of interest only, or in which all treatments have characteristics provided for in a single sub-group, see the relevant sub-groups for the single treatment; several superposed coatings [D21H 19/82](#); apparatus for making multi-ply material [D21H 1/06](#))}
- D21H 5/02
- Patterned paper
- D21H 5/04
- • marbled
- D21H 5/06
- • Apparatus
- D21H 5/08
- Vegetable parchment
- D21H 5/12
- characterised by the use of special fibrous materials (felts or other non-woven fabrics [D04](#))
- D21H 5/14
- • of cellulose fibres only
- D21H 5/16
- • • Tobacco or cigarette paper
- D21H 5/18
- • of inorganic fibres with or without cellulose fibres
- D21H 5/20
- • of organic non-cellulosic fibres too short for spinning, with or without cellulose fibres
- D21H 5/22
- Fungicidal, bactericidal, insecticidal, disinfecting, antiseptic, or corrosion-inhibiting paper {antistatic, antioxygenic paper (toilet paper [A47K 10/16](#))}
- D21H 5/24
- having enhanced flexibility or extensibility produced by mechanical treatment of the unfinished paper (crêping paper [B31F 1/12](#); {making patterned paper [D21F 11/006](#), apertured paper [D21F 11/008](#))}
- D21H 5/26
- Special paper or cardboard manufactured by dry method; { Apparatus or processes for forming webs by dry method from mainly short-fibre or particle material, e.g. paper pulp (making board from wood, e.g. lignocellulosic, particles or fibres [B27N 1/00](#) and subgroups; making non-woven fabrics from textile fibres [D04H 1/72](#); machines for forming diapers [A61F 13/15585](#); lap-forming devices in preliminary treatment of fibres, e.g. for spinning [D01G 25/00](#))}
- D21H 5/2678
- • ~~{Manufacture of layered products (assembly of superposed sheets)}~~ *{Manufacture of layered products (assembly of superposed sheets)}*, comprising the consolidation of such a structure (formation of a web by dry method directly on to other webs formed solely by dry method [D21H 5/2628](#) and subgroups)}

U D21H 17/00**Non-fibrous material added to the pulp, characterised by its constitution; Paper-impregnating material characterised by its constitution**NOTES

In this group, in the absence of an indication to the contrary, a material is classified in the last appropriate place.

In this group, it is desirable to classify the individual constituents of fibres used in the pulp or paper using Combination Sets with symbols chosen from groups [D21H 11/00](#) to [D21H 15/00](#).

D21H 17/71

- Mixtures of material ([D21H 17/69](#) takes precedence){ Pulp or paper comprising several different materials not incorporated by special processes ([D21H 23/10](#), [D21H 23/70](#), [D21H 23/76](#) take precedence)}

NOTE

In this group, it is desirable to classify the individual components of the mixtures using Combination Sets with symbols chosen from groups [D21H 17/00](#) or [D21H 21/00](#).

D21H 17/72

- • of organic material

D21H 17/73

- • of inorganic material

D21H 17/74

- • of organic and inorganic material

U D21H 27/00**Special paper not otherwise provided for, e.g. made by multi-step processes**NOTES

This group provides for the classification of paper with special properties or applications which are only partially or not at all provided for elsewhere in the classification. Whenever possible, however, these papers are classified according to the criteria used in the other groups of this subclass.

In this group, it is desirable to classify the individual constituents using Combination Sets with symbols chosen from groups [D21H 11/00](#) to [D21H 25/00](#).

D21H 27/002

- {-Tissue paper; Absorbent paper ([D21H 21/22](#), [D21H 27/02](#), [D21H 27/20](#) take precedence; toilet paper [A47K 10/00](#); absorbent pads for physiological fluids [A61L 15/16](#); making on paper-making machines [D21F 11/00](#))}

WARNING

Not complete. Documents presently classified elsewhere, mainly in [D21F](#) and [D21H](#), need reclassification to this group or its subgroups

D21H 27/004

- • {-characterised by specific parameters ([D21H 27/008](#) takes precedence)}

D21H 27/005

- • • {-relating to physical or mechanical properties, e.g. tensile strength, stretch, softness}

D21H 27/007

- • • • {-relating to absorbency, e.g. amount or rate of water absorption, optionally in combination with other parameters relating to physical or mechanical properties}

D21H 27/008

- • {-characterised by inhomogeneous distribution or incomplete coverage of properties, e.g. obtained by using materials of chemical compounds ([D21H 23/02](#), [D21H 23/76](#), [D21H 27/02](#) take precedence)}

PERMANENT WAY; PERMANENT-WAY TOOLS; MACHINES FOR MAKING RAILWAYS OF ALL KINDS (derailing or rerailing blocks on track, track brakes or retarders [B61K](#))

	E01B 1/00	Ballastway; Other means for supporting the sleepers or the track; Drainage of the ballastway (-draining by trenches, culverts, or conduits E01F 5/00 -)
	E01B 2/00	General structure of permanent way (-railway networks B61B 1/00 ; foundations for pavings E01C 3/00 ; foundations in general E02D -)
	E01B 3/00	Transverse or longitudinal sleepers (-for switches or crossings E01B 7/22 -); Other means resting directly on the ballastway for supporting rails
	E01B 3/02	• made from wood (-drying or impregnating B27K -)
U	E01B 3/04	• • Means for preventing cleaving
	E01B 3/08	• • • Straps or bands for hooping or encircling sleepers (-apparatus for hooping wooden railway sleepers on the spot E01B 31/28 -)
U	E01B 3/16	• made from steel
	E01B 3/20	• • Sleeper construction for special purposes, e.g. with openings for ballast working (-sleepers for shiftable track for heavy loads E01B 23/12 -)
	E01B 3/28	• made from concrete or from natural or artificial stone (-manufacture B28 -)
	E01B 3/32	• • with armouring or reinforcement (-hollow sleepers E01B 3/30 -)
	E01B 3/34	• • • with pre-tensioned armouring or reinforcement (-pre-tensioned armouring or reinforcing elements E04C 5/00 -)
	E01B 3/46	• made from different materials (- E01B 3/26 , E01B 3/42 take precedence-)
	E01B 5/00	Rails; Guard rails (-manufacture of rails B21B -); Distance-keeping means for them
	E01B 7/00	Switches; Crossings (-operating mechanisms B61L -)
	E01B 7/26	• Lubricating of switches (-lubricating of rails B61K 3/00 -)
	E01B 9/00	Fastening rails on sleepers, or the like (-fastening rails to bridges E01D 19/12 -)
U	E01B 9/02	• Fastening rails, tie-plates, or chairs directly on sleepers or foundations; Means therefor
U	E01B 9/04	• • Fastening on wooden or concrete sleepers or on masonry without clamp members
	E01B 9/06	• • • Railways spikes (-nails in general F16B -)
	E01B 9/10	• • • Screws or bolts for sleepers (-screws or bolts in general F16B -)
	E01B 9/14	• • • Plugs, sleeves, thread linings, or other inserts for holes in sleepers (-inserting plugs or sleeves E01B 31/26 -)
U	E01B 9/38	• Indirect fastening of rails by using tie-plates or chairs; Fastening of rails on the tie-plates or in the chairs
	E01B 9/40	• • Tie-plates for flat-bottom rails (-manufacture B21 -)
	E01B 11/00	Rail joints (-electrical connection of the rail B60M 5/00 -)
U	E01B 11/02	• Dismountable rail joints
U	E01B 11/36	• • Fastening means for fishplates
	E01B 11/38	• • • Loking arrangements for fastening means (-locking means for nuts or bolts in general F16B -)
	E01B 11/44	• Non-dismountable rail joints; Welded joints (-welding methods B23K -)
	E01B 11/56	• Special arrangements for supporting rail ends (-foot supports E01B 11/08 to E01B 11/14 -)
	E01B 11/62	• • Bridge chairs (-chairs E01B 9/54 to E01B 9/58 -)

	E01B 17/00	Cattle guards connected to the permanent way (-grids in general for preventing cattle from straying A01K 3/00-)
	E01B 19/00	Protection of permanent way against development of dust or against the effect of wind, sun, frost, or corrosion; Means to reduce development of noise (-snow fences E01F 7/02 , snow-ploughs E01H 8/02 , watering E01H 11/00-)
	E01B 21/00	Track superstructure adapted for tramways in paved streets (-paving E01C 9/04 , E01C 9/06-)
U	E01B 23/00	Easily dismountable or movable tracks, e.g. temporary railways; Details specially adapted therefor
U	E01B 23/02	• Tracks for light railways, e.g. for field, colliery, or mine use
	E01B 23/06	• • Switches (-turntables B60S , B61J-) ; Portable switches; Turnouts
U	E01B 23/10	• Shiftable tracks for heavy loads, e.g. carrying excavators
	E01B 23/14	• • Fastening or joining means (-fastening of rails by keys E01B 9/24-)
	E01B 25/00	Tracks for special kinds of railways (-systems B61B ; wheel tracks on roads E01C 9/02-)
U	E01B 25/16	• Tracks for aerial rope railways with a stationary rope
	E01B 25/18	• • Ropers; Supports, fastening or straining means for ropes (-ropes in general D07B ; masts E04H 12/00 ; ropes sockets F16G-)
	E01B 25/28	• Rail tracks for guiding vehicles when running on road or similar surface (-wheel tracks on roads E01C 9/02-)
	E01B 27/00 - E01B 37/00	<u>Making, maintaining, renewing, or taking-up the ballastway or the track; Tools or machines specially designed therefor</u> (-derailing or rerailing of machines B61K 5/00 ; removal of foreign matter from the permanent way, vegetation control applying liquids E01H-)
	E01B 27/04	• Removing the ballast; Machines therefor, whether or not additionally adapted for taking-up ballast (-E01B 27/06 , E01B 27/12 takes precedence; redistributing ballasting material E01B 27/02-)
U	E01B 27/06	• Renewing or cleaning the ballast in situ, with or without concurrent work on the track
	E01B 27/08	• • the track having been taken-up (-E01B 27/11 takes precedence-)
	E01B 27/10	• • without taking-up track (-E01B 27/11 takes precedence-)
U	E01B 27/12	• Packing sleepers, with or without concurrent work on the track; Compacting track-carrying ballast
	E01B 27/13	• • Packing sleepers, with or without concurrent work on the track (-preforming ballast cores or seats for sleepers E01B 27/02-)
	E01B 27/20	• • Compacting the material of the track-carrying ballastway, e.g. by vibrating the track, by surface vibrators (-of trackless ballastway E01B 27/02 ; for packing sleepers E01B 27/12-)
	E01B 29/00	Laying, rebuilding, or taking-up tracks; Tools or machines therefor (-E01B 27/00 , E01B 31/00 take precedence-)
	E01B 29/02	• Transporting, laying, removing, or renewing lengths of assembled track, assembled switches, or assembled crossings (-E01B 29/04 takes precedence-)
	E01B 29/04	• Lifting or levelling of tracks (-lifting devices in general B66F-)
	E01B 29/05	• Transporting, laying, removing, or renewing both rails and sleepers (-as assembled units E01B 29/02-)
	E01B 29/06	• Transporting, laying, removing or renewing sleepers (-E01B 29/05 takes precedence; carrying devices B65G 7/12-)

U	E01B 29/09	• • under, or from under, installed rails
	E01B 29/13	• • • for moving sleepers in a direction parallel to the rails, e.g. for spacing or aligning them (E01B 29/10 takes precedence)
	E01B 29/14	• • • for lifting sleepers up to the rails (lifting devices in general B66F)
	E01B 29/16	• Transporting, laying, removing, or replacing rails; Moving rails placed on sleepers in the track (E01B 29/05 takes precedence; moving or tilting heavy loads in general B65G 7/00)
	E01B 29/22	• • Raising rails from sleepers, e.g. for inserting sole-plates (lifting devices in general B66F)
	E01B 29/24	• Fixing or removing detachable fastening means or accessories thereof; Pre-assembling track components by detachable fastening means (E01B 29/02 , E01B 31/26 take precedence)
	E01B 29/26	• • the fastening means being spikes (E01B 29/16 takes precedence; hand-held tools for nail or staple driving or extracting B25C)
	E01B 29/28	• • the fastening means being of screw-and-nut type (portable apparatus for fixing or removing screws or the like B25B); Apparatus therefor, adapted to additionally drilling holes
	E01B 29/32	• Installing or removing track components, not covered by the preceding groups, e.g. sole-plates, rail anchors (E01B 31/26 takes precedence)
	E01B 29/40	• Means or arrangements for temporarily supporting laid tracks, or rails or sleepers in the track (temporary fishplates E01B 11/18)
	E01B 29/42	• Undetachably joining or fastening track components in or on the track, e.g. by welding, by gluing; Pre-assembling track components by gluing; Sealing joints with filling components (E01B 31/26 takes precedence; independent heating means E01B 31/18 ; welding in general B23K; gluing metal parts in general F16B 11/00)
	E01B 29/46	• • Devices for holding, positioning, or urging together the rail ends (adjusting the joint by moving rails E01B 29/20)
	E01B 31/00	Working rails, sleepers, baseplates, or the like, in or on the line; Machines, tools, or auxiliary devices specially designed therefor (characterised by features independent of use on assembled track B21 , B23 to B25 , B27)
U	E01B 31/02	• Working rail or other metal track components on the spot
	E01B 31/08	• • Bending, e.g. for straightening rails or rail joints (for aligning rail ends to be welded E01B 29/46)
	E01B 31/18	• • Reconditioning or repairing worn or damaged parts on the spot, e.g. applying inlays, building-up rails by welding (E01B 31/04 to E01B 31/12 take precedence); Heating or cooling of parts on the spot, e.g. for reducing joint gaps, for hardening rails
	E01B 31/20	• Working or treating non-metal sleepers in or on the line, e.g. marking, creosoting (working metal sleepers E01B 31/02)
	E01B 31/22	• • Cutting or grinding wooden sleepers, e.g. for forming rail seats (E01B 31/24 takes precedence)
	E01B 31/23	• • • Sectioning (combined with removal of segments from track E01B 29/11)
	E01B 31/24	• • Forming, treating, reconditioning, or cleaning holes in sleepers; Drilling-templates (E01B 29/28 , E01B 31/26 take precedence)
	E01B 31/28	• • Applying or removing anti-splitting or like reinforcing means (E01B 31/26 takes precedence; straps or bands therefor E01B 3/08)
	E01B 33/00	Machines or devices for shifting tracks, with or without lifting, e.g. for aligning track, for shifting excavator track (combined with sleeper packing machines E01B 27/17)

- E01B 35/00** Applications of measuring apparatus or devices for track-building purposes (~~-apparatus on locomotives or cars to indicate or record bad track sections [B61K 9/00](#) ; measuring angles, linear dimensions, or irregularities in general [G01B](#) , [G01C](#)-~~)
- E01B 37/00** Making, maintaining, renewing, or taking-up the ballastway or the track, not provided for in a single one of groups [E01B 27/00](#) to [E01B 35/00](#)
- E01B 2202/00 - E01B 2205/00** Making, maintaining, renewing, or taking-up the ballastway or the track; Tools or machines specially designed therefor (~~-derailing or rerailing of machines [B61K 5/00](#) ; removal of foreign matter from the permanent way, vegetation control applying liquids [E01H](#)-~~)
- U E01B 2203/00** Devices for working the railway-superstructure
- U E01B 2203/04** • Cleaning or reconditioning ballast or ground beneath

- E01C 19/1063
 - • • • {Controlling the operations (-E01C 19/1068 takes precedence-)}
- E01C 19/12
 - for distributing granular or liquid materials ({ E01C 19/002 , E01C 19/45 , E01C 19/46 , E01C 19/48 , E01C 23/03 , E01C 23/065 } , E01C 23/07 take precedence; for filling joints or grooves E01C 23/02 , E01C 23/09-)
- E01C 19/15
 - • for laying-down uncoated stone or similar materials, or for striking-off or spreading same without compacting, e.g. for crushed rock base courses, sand cushions for paving ({ E01C 19/466 } , E01C 19/52 take precedence; distributing E01C 19/20 ; { laying down and rolling E01C 19/482 })
- E01C 19/16
 - • for applying or spreading liquid materials, e.g. bitumen slurries ({ E01C 19/1054 , E01C 19/21 , } E01C 19/45 , { E01C 19/4813 , E01C 21/00 , } E01C 23/02 , E01C 23/03 , { E01C 23/065 , E01C 23/096 , E01C 23/0973 , E01C 23/0993 } , E01C 23/16 take precedence; { spreading-out or smoothing-down means as parts of spraying apparatus E01C 19/178 })
- E01C 19/17
 - • • Application by spraying {or throwing}
- E01C 19/18
 - • Devices for distributing road-metals mixed with binders, e.g. cement, bitumen, without consolidating or ironing effect (-E01C 19/20 , { E01C 19/21 , E01C 19/46 } , E01C 19/47 , { E01C 19/48 , E01C 21/00 , E01C 23/065 , E01C 23/07 } take precedence; conveying installation for concrete or the like B65G-)
- E01C 19/185
 - • • {for both depositing and spreading-out or striking-off the deposited mixture (-laying-down the materials and consolidating them, or finishing the surface, E01C 19/48-)}
- E01C 19/20
 - • Apparatus for distributing, e.g. spreading, granular or pulverulent materials, e.g. sand, gravel, salt, dry binders ({ E01C 19/21 , E01C 19/4813 , E01C 19/482 , E01C 23/098 , E01C 23/166 take precedence; } fertiliser distributors A01C 15/00 ; { permanently-installed devices for applying gritting or thawing materials E01H 10/005 ; mobile spreaders specially adapted for treating wintry roads E01H 10/007 })
- E01C 19/2005
 - • • {without driven loosening, discharging or spreading (-E01C 19/205 takes precedence-)}
- E01C 19/201
 - • • {with driven loosening, discharging or spreading parts, e.g. power-driven, drive derived from road-wheels (-E01C 19/205 takes precedence-)}
- E01C 19/21
 - • for simultaneously but separately applying liquid material and granular or pulverulent material, e.g. bitumen and grit, with or without spreading{(-with rolling E01C 19/4813-); for filling grooves and gritting the filling}
- E01C 19/22
 - for consolidating or finishing laid-down unset materials ({ E01C 19/002 , E01C 19/48 , E01C 21/00 } E01C 23/02 { E01C 23/065 } take precedence; apparatus for generating vibrations in general B06B-)
- E01C 19/23
 - • Rollers therefor; Such rollers usable also for compacting soil ({ E01C 19/41 , } E01C 19/43 , { E01C 19/52 , E01C 23/065 } take precedence; specially adapted for agricultural purposes A01B 29/00 ; garden rollers A01G 1/12 ; making or maintaining surfaces of snow or ice E01H 4/00 ; solely for soil compaction E02D 3/026-)
- E01C 19/231
 - • • {with both elastically-deformable and rigid rolling elements, e.g. pneumatic-tyred compactor with selectively operative or inoperative steel-faced roll (-with auxiliary elastically-deformable rolling elements for working only restricted zones E01C 19/27 ; rigid-roll rollers with conventional pneumatic-tyred tractors or traction-units E01C 19/25 , E01C 19/26 , E01C 19/28-)}
- E01C 19/233
 - • • • {the rigid rolling elements being vibrated or subjected to impacts (-with vibrated elastically-deformable rolling elements E01C 19/287-)}

- E01C 19/24
 - • • hand propelled ({ [E01C 19/235](#) , } [E01C 19/27](#) to [E01C 19/29](#) , { [E01C 19/41](#) } take precedence)
- E01C 19/25
 - • • propelled by animals or vehicles ({ [E01C 19/235](#) } , [E01C 19/26](#) to [E01C 19/29](#) take precedence-)
- E01C 19/26
 - • • self-propelled or fitted to road vehicles ({ [E01C 19/231](#) , [E01C 19/235](#) } , [E01C 19/27](#) to [E01C 19/29](#) take precedence-)
- E01C 19/264
 - • • {with attachments for work other than rolling, e.g. grading, scarifying (-rollers fitted to road-construction or earth-moving machinery [E01C 19/266](#)-)}
- E01C 19/266
 - • • {fitted to vehicles, road-construction or earth-moving machinery, e.g. auxiliary roll readily movable to operative position (-[E01C 19/268](#) , [E01C 19/4806](#) , [E01C 19/488](#) , [E01C 19/52](#) , [E01C 21/00](#) , [E01C 23/065](#) take precedence-); provided with means for facilitating transport; Means for transporting rollers; Arrangements or attachments for converting vehicles into rollers, e.g. rolling sleeves for wheels}
- E01C 19/268
 - • • {designed for rolling surfaces not situated in the plane of the riding surface of the apparatus, e.g. stepped-down surfaces, sloping edge of surfacing (-trench rollers [E02D 3/032](#) ; slope rollers [E02D 3/039](#)-)}
- E01C 19/27
 - • • with elastically-deformable rolling elements, e.g. pneumatic tyres ({ [E01C 19/231](#) takes precedence } ; vibrating or impacting [E01C 19/28](#)-)
- E01C 19/28
 - • • Vibrated rollers or rollers subjected to impacts, e.g. hammering blows ({ [E01C 19/235](#) , } [E01C 19/29](#) , { [E01C 19/41](#) } take precedence; { combined with non-vibrated elastically-deformable rolling elements [E01C 19/233](#) })
- E01C 19/281
 - • • {propelled by hand or by vehicles, e.g. towed (-[E01C 19/285](#) to [E01C 19/288](#) take precedence-)}
- E01C 19/282
 - • • {self-propelled, e.g. with an own traction-unit (-[E01C 19/285](#) to [E01C 19/288](#) take precedence-)}
- E01C 19/285
 - • • {with attachments for work other than rolling, e.g. dozer blades, shoes for conversion into plate vibrator; fitted to vehicles, road-construction or earth-moving machinery (-[E01C 19/29](#) , [E01C 19/4806](#) , [E01C 19/488](#) , [E01C 19/52](#) , [E01C 21/00](#) , [E01C 23/065](#) take precedence-); vibrated or the like auxiliary rolls, e.g. for rolling road edges; provided with means for facilitating transport}
- E01C 19/286
 - • • {Vibration or impact-imparting means; Arrangement, mounting or adjustment thereof; Construction or mounting of the rolling elements, transmission or drive thereto, e.g. to vibrator mounted inside the roll (-[E01C 19/287](#) and [E01C 19/288](#) take precedence-)}
- E01C 19/287
 - • • {with vibrated elastically-deformable or elastomer-faced rolling elements or with such elements subjected to impacts, e.g. multi-roll vibratory apparatus with an endless elastomer belt passed around the rolls (-rollers with both non-vibrated, elastically-deformable and vibrated rigid rolling elements [E01C 19/233](#)-)}
- E01C 19/29
 - • • Rolling apparatus adapted to apply a rolling pressure less than its weight, e.g. roller finishers travelling on formrail {combined with spread-out, strike-off or smoothing means; Rolling elements with controlled penetration or a controlled path of movement in a vertical plane, e.g. controlled by the formrails, by guides ensuring a desired configuration of the rolled surface}
- E01C 19/30
 - • Tamping or vibrating apparatus other than rollers {; Devices for ramming individual paving elements} ({ [E01C 19/41](#) , [E01C 19/43](#) , [E01C 19/4833](#) , [E01C 19/488](#) , [E01C 19/4886](#) , [E01C 19/52](#) , [E01C 21/00](#) , } [E01C 23/02](#) , [E01C 23/04](#) take precedence; vibrated depositing devices [E01C 19/12](#) ; tamping or vibrating rollers [E01C 19/28](#) ; portable percussion tools [B25D](#); tamping or vibrating soil [E02D 3/046](#)-)

- U E01C 19/34
- • • Power-driven rammers or tampers,{e.g. air-hammer impacted shoes for ramming stone-sett paving; Hand-actuated ramming or tamping machines, e.g. tampers with manually hoisted dropping weight}
- E01C 19/35
- • • • Hand-held or hand-guided tools (-E01C 19/36 to E01C 19/40 take precedence-)
- E01C 19/38
- • • • with means specifically for generating vibrations,{e.g. vibrating plate compactors, immersion vibrators(-E01C 19/40 , E01C 19/41 take precedence-)}
- U E01C 19/40
- • • • adapted to impart a smooth finish to the paving, e.g. tamping or vibrating finishers
- NOTE
When classifying in group [E01C 19/402](#) , classification is also made in groups [E01C 19/405](#) or [E01C 19/407](#) if of interest
- E01C 19/405
- • • • {with spreading-out, levelling or smoothing means other than the tamping or vibrating means for compacting or smoothing, e.g. with screws for spreading-out the previously dumped material, with non-vibratory lengthwise reciprocated smoothing beam (-E01C 19/407 takes precedence-)}
- E01C 19/42
- • Machines for imparting a smooth finish to freshly-laid paving courses other than by rolling, tamping or vibrating (-for distributing only [E01C 19/12](#) ; { hand-actuated smoothing tools [E01C 19/44](#) })
- E01C 19/44
- • Hand-actuated tools other than rollers, tampers, or vibrators, specially adapted for imparting a required finish to freshly-laid paving courses (-E01C 19/43 , { [E01C 23/02](#) }take precedence)
- E01C 19/45
- Portable apparatus for preparing, or for preparing and applying to the road, compound liquid binders, e.g. emulsified bitumen, fluxed asphalt (-applying only [E01C 19/16](#)-)
- E01C 19/46
- for preparing and placing the materials {e.g. slurry seals}{([E01C 19/002](#) , } [E01C 19/45](#) , { [E01C 21/00](#) , [E01C 23/065](#) }take precedence)
- E01C 19/47
- • Hydraulic cement concrete mixers combined with distributing means specially adapted for road building ({ [E01C 19/025](#) takes precedence } ; concrete mixers per se [B28C](#)-)
- E01C 19/48
- for laying-down the materials and consolidating them, or finishing the surface, {e.g. slip forms therefor, forming kerbs or gutters in a continuous operation in situ(-E01C 19/002 , [E01C 23/065](#) take precedence; devices for guiding or controlling the machines along a predetermined path [E01C 19/004](#)-)}
- E01C 19/4806
- • {with solely rollers for consolidating or finishing (-E01C 19/4886 takes precedence; combined with other consolidating or finishing means [E01C 19/488](#)-)}
- E01C 19/4813
- • • {the materials being simultaneously but separately applied binders and granular or pulverulent material (-such application per se [E01C 19/21](#)-)}
- E01C 19/482
- • • {the materials being uncoated stone or similar granular materials, e.g. sand (-laying-down uncoated stone or similar materials per se [E01C 19/15](#) ; distributing granular or pulverung materials per se [E01C 19/20](#)-)}
- E01C 19/4826
- • • {the materials being aggregate mixed with binders (-distributing per se [E01C 19/18](#)-)}
- E01C 19/4833
- • {with tamping or vibrating means for consolidating or finishing, e.g. immersed vibrators, with or without non-vibratory or non-percussive pressing or smoothing means (-E01C 19/4806 , [E01C 19/4886](#) take precedence; combined with rollers [E01C 19/488](#)-)}

- E01C 19/4866
 - {with solely non-vibratory or non-percussive pressing or smoothing means for consolidating or finishing} (~~E01C 19/4886~~ takes precedence; combined with rollers ~~E01C 19/488-~~)}
- E01C 19/488
 - {with rollers for consolidating or finishing combined with tamping, vibrating, pressing or smoothing consolidation or finishing means} (~~E01C 19/4886~~ takes precedence-)}
- E01C 19/4886
 - {for forming in a continuous operation kerbs, gutters, berms, safety kerbs, median barriers or like structures in situ, e.g. by slip-forming, by extrusion} (~~removable forms for kerbs, gutters or similar structures~~ ~~E01C 19/506~~ ; making conduits in situ ~~E02D 29/10-~~)}
- E01C 19/50
 - Removable forms or shutterings for road-building purposes (~~E01C 23/02~~ , ~~E01C 23/04~~ take precedence; permanent forms ~~E01C 3/00~~ to ~~E01C 7/00~~ , { ~~E01C 9/00~~ to ~~E01C 17/00~~ } ; slip forms ~~E01C 19/48-~~); Devices or arrangements for forming individual paving elements, e.g. kerbs, in situ
- E01C 19/502
 - {Removable forms or shutterings, e.g. side forms; Removable supporting or anchoring means therefor, e.g. stakes} (~~for forming individual elements~~ ~~E01C 19/508~~ ; for grooves or like channels ~~E01C 23/021-~~)}
- E01C 19/504
 - • {adapted to, or provided with, means to maintain reinforcing or load transfer elements in a required position} (~~removable supports for positioning reinforcing or load transfer elements in general~~ ~~E01C 23/045-~~)}
- E01C 19/508
 - {Devices or arrangements for forming individual paving elements in situ, e.g. by sectioning a freshly-laid slab} (~~permanent forms therefor~~ ~~E01C 9/001~~ ; imprinting freshly-laid paving to simulate stones ~~E01C 19/43~~ ; cutting sett paving ~~E01C 23/0906-~~)}
- U E01C 19/52
 - Apparatus for laying individual preformed surfacing elements, e.g. kerbstones
- E01C 19/526
 - {hand operated} (~~E01C 19/524~~ takes precedence-)}
- E01C 21/00**

Apparatus or processes for surface {soil}stabilisation for road building or like purposes, e.g. mixing local aggregate with binder ({ recycling in place or on the road involving soil stabilisation ~~E01C 23/065~~ } ; stabilising soil under existing surfacing ~~E01C 23/10~~ ; soil-conditioning or soil-stabilising materials ~~C09K 17/00~~ ; soil consolidation in general ~~E02D 3/12~~)
- E01C 21/02
 - Fusing, calcining, or burning soil in situ{(~~improving soil by thermal means in general~~ ~~E02D 3/11~~ ; devices for heating foundation or paving ~~E01C 23/14-~~)}
- E01C 23/00**

Auxiliary devices or arrangements for constructing, repairing, reconditioning, or taking-up road or like surfaces {apparatus for reconditioning of salvaged non-hydraulic compositions{for- in plant recycling of salvaged bituminous mixtures} ~~E01C 19/10-~~ }
- E01C 23/01
 - Devices or auxiliary means for setting-out or checking the configuration of new surfacing, e.g. templates, screed {or reference line} supports {~~form rails~~ ~~E01C 19/50-~~}; Applications of apparatus for measuring, indicating, or recording the surface configuration of existing surfacing, e.g. profilographs (~~E01C 23/07~~ takes precedence; measuring roughness or irregularity in general ~~G01B-~~)
- E01C 23/02
 - Devices for making, treating or filling grooves or like channels in not-yet-hardened paving, e.g. for joints or markings (~~surface patterning~~ ~~E01C 19/43-~~); Removable forms therefor (~~non-removable forms~~ ~~E01C 11/02-~~); Devices for introducing inserts or removable insert-supports in not-yet-hardened paving (~~E01C 23/04~~ takes precedence; non-removable {joint} insert supports ~~E01C 11/02-~~)
- E01C 23/021
 - {Removable, e.g. reusable, forms for grooves or like channels} (~~E01C 23/028~~ takes precedence; groove-forming members of groove-making apparatus ~~E01C 23/025~~ , ~~E01C 23/026-~~); Installing same prior to placing the paving(~~into laid paving~~ ~~E01C 23/026-~~)}

- E01C 23/023
 - {Removable joint-body supports (-E01C 23/045 take precedence-); Installing joint or like bodies, e.g. waterstops, prior to placing the paving(-into laid paving E01C 23/026 takes precedence-)}
- E01C 23/025
 - {Making or working grooves or like channels in laid paving, e.g. smoothing groove edges (-E01C 23/026 , E01C 23/028 take precedence-)}
- E01C 23/026
 - {Introducing preformed inserts into or filling grooves or like channels in laid paving, with or without concurrent making or working of groove or channel, e.g. filling groove with semi-plastic material (-E01C 23/028 takes precedence-)}
- E01C 23/03
 - Arrangements for curing paving; Devices for applying curing means; Devices for laying prefabricated underlay, e.g. sheets, membranes (-reinforcing elements E01C 23/04-); Protecting paving under construction or while curing, e.g. use of tents (-road barriers E01F 13/00-)
- E01C 23/04
 - Devices for laying {inserting or positioning}reinforcing elements or dowel bars {with or without joint bodies(-installing or inserting joint bodies per se E01C 23/023 , E01C 23/026-)}; Removable support for reinforcing {or load transfer}elements (non- removable supports therefor{ E01C 11/02 } E01C 11/16 ; side forms adapted to supporting reinforcement E01C 19/50-); Devices, e.g. removable forms, for making essentially horizontal ducts in paving, e.g. for prestressed reinforcements
- E01C 23/06
 - Devices or arrangements for working the finished surface (-working freshly laid paving E01C 19/42 to E01C 19/44 , E01C 23/02 ; mining picks E21C 35/18-); Devices for repairing {or reconditioning}the surface of damaged paving; {Recycling in place or on the road}
- E01C 23/065
 - {Recycling in place or on the road, i.e. hot or cold reprocessing of paving in situ or on the traffic surface, with or without adding virgin material or lifting of salvaged material; Repairs or resurfacing involving at least partial reprocessing of the existing paving (-in situ mixing of hydraulic cement concrete E01C 19/025 ; apparatus for in-plant recycling E01C 19/1004 , E01C 19/1036-)}
- E01C 23/07
 - Apparatus combining measurement of the surface configuration of paving with application of material in proportion to the measured irregularities (-measuring means only E01C 23/01 , { G01B })
- E01C 23/08
 - for roughening or patterning; for removing {the surface down to a predetermined depth}high spots or material bonded to the surface, e.g. markings; {for maintaining earth roads, clay courts or like surfaces by means of surface working tools, e.g. scarifiers, levelling blades} (-removing matter not bonded to the surface E01H 1/00 ; roughening or detaching ice E01H 5/12-)
- U E01C 23/085
 - • using power-driven tools, e.g. vibratory tools
- E01C 23/088
 - • • Rotary tools, e.g. milling drums{(-for forming recesses to receive marking materials E01C 23/0946-)}
- U E01C 23/09
 - for forming cuts, grooves, or recesses, e.g. for making joints or channels for markings, for cutting-out sections to be removed; for cleaning, treating, or filling cuts, grooves, recesses, or fiddures; for trimming paving edges
- E01C 23/0906
 - • {for forming, opening-out, cleaning, drying or heating cuts, grooves, recesses or, excluding forming, cracks, e.g. cleaning by sand-blasting or air-jet (-E01C 23/096 , E01C 23/0993 take precedence, save for E01C 23/0946-); for trimming paving edges}
- U E01C 23/0926
 - • • {with power-driven tools, e.g. vibrated, percussive cutters}
- U E01C 23/0933
 - • • • {rotary, e.g. circular-saw joint cutters}
- E01C 23/094
 - • • • • {about vertical or inclined axes, e.g. for core sampling (-E01C 23/0946 takes precedence-)}

- E01C 23/0946
 - • • • {specially for forming recesses to receive marking materials or markers, e.g. cutters for milling traffic line channels, core drills for button-setting (-other tools [E01C 23/0993](#)-)}
- E01C 23/096
 - • {for forming, opening-out, cleaning, drying or heating and filling (-[E01C 23/0993](#) takes precedence-)}
- E01C 23/0966
 - • {for filling or priming, with or without working the surface of the filling or applying particulate material thereto, e.g. for filling the joints of stone-sett paving (-[E01C 23/096](#) , [E01C 23/0993](#) take precedence-)}
- E01C 23/0993
 - • {for forming or installing surface markings or signals in the paving, e.g. grooving for striping or for producing rumble strips, forming marker-receiving recesses (-[E01C 23/0946](#) takes precedence-)}
- E01C 23/10
 - • for raising or levelling sunken paving; for filling voids under paving; for introducing material into substructure (-consolidating soil in general [E02D 3/12](#)-)
- E01C 23/12
 - • for taking-up, tearing-up, or {full-depth}breaking-up paving,{e.g. sett extractor} (adapted to both placing and removing{preformed}paving{elements} [E01C 19/52](#)-)
- E01C 23/121
 - • {with non-powered tools, e.g. rippers (-rollers with ripping attachments [E01C 19/264](#) , [E01C 19/27](#) , [E01C 19/285](#) ; roughening or patterning using non powered tools [E01C 23/082](#)-)}
- E01C 23/122
 - • {with power-driven tools, e.g. oscillated hammer apparatus (-hand-held breakers: percussion tools [B25D](#)-)}
- E01C 23/128
 - • {with hydrojets (-hydraulic cleaning [E01H 1/101](#)-)}
- E01C 23/14
 - for heating or drying foundation, paving, or materials thereon, e.g. paint (-[E01C 23/03](#) takes precedence; heating or drying devices incorporated in the paving [E01C 11/26](#) ; surface {soil} stabilisation by fusing, calcining or burning soil in situ [E01C 21/02](#) ; for street cleaning [E01H 1/08](#) ; melting snow or ice on surfacing [E01H 5/10](#)-)
- E01C 23/16
 - Devices for marking-out, applying, or forming traffic or like markings on finished paving (-[E01C 23/14](#) takes precedence; inserting or forming in not-yet-hardened paving [E01C 23/02](#) , in recesses formed in fully-set paving [E01C 23/09](#) ; marking-out playing courts or playgrounds [A63C 19/06](#) ; applying liquids or other fluent materials to surfaces in general [B05](#) ; road surface markings per se [E01F 9/04](#)-); Protecting fresh markings{(-indicating fresh markings [E01F 9/0128](#)-)}
- U E01C 23/20
 - • for forming markings in situ
- E01C 23/22
 - • • by spraying{(-[E01C 23/206](#) takes precedence-)}

Project: N/A (E01D)

- U **E01D 19/00** **Structural or constructional details of bridges**
- E01D 19/02
 - Piers {([E01D 19/005](#) takes precedence; towers for suspension bridges [E01D 19/14](#)); -Abutments (foundations [E02D](#)); {Protecting same against drifting ice-(against colliding vehicles [E01F 15/00](#))}

	E04G 21/207	• • • {Static templates for applying a predefined layer of mortar}
U	E04G 21/24	• Safety or protective measures preventing damage to building parts or finishing work during construction (as auxiliary structures for scaffolds E04G , { E04G 5/12 })
	E04G 21/241	• {for temporarily closing door or window openings}
	E04G 21/242	• {for temporarily covering the whole worksite, e.g. building, trench}
	E04G 21/243	• {for creating a temporary partition in a closed room}
	E04G 21/245	• {for temporarily protecting wall crowns}
	E04G 21/246	• {specially adapted for curing concrete in situ, e.g. by covering it with protective sheets}
	E04G 21/247	• {specific for protecting windows or doors leaves}
U	E04G 21/32	• Safety or protective measures for persons during the construction of buildings (relating to scaffolds E04G 5/00 ; climbing tools, e.g. climbing irons for masts A63B 27/00 ; ropes or belts for life saving A62B 1/16 , A62B 35/00)
U	E04G 21/3204	• {against falling down}
	E04G 21/3209	• • {Temporary tunnels specially adapted against falling objects}
U	E04G 21/3223	• • {Means supported by building floors or flat roofs, e.g. safety railings}
	E04G 21/3228	• • • {Folding railings for flat roof edge, e.g. to hide the railings from view when not in use}
U	E04G 21/3233	• • • {without permanent provision in the floor or roof}
	E04G 21/3238	• • • • {using counterweights}
	E04G 21/3242	• • • • {using clamps}
	E04G 21/3247	• • {Storey high safety barrier hung from the facade and sliding up from level to level as work progresses}
	E04G 21/3252	• • {Protections, e.g. cover, caps, against impaling on starter reinforcement bars}
	E04G 21/3261	• {Safety-nets; Safety mattresses; Arrangements on buildings for connecting safety-lines (jumping-sheets, jumping-mattresses A62B 1/22)}
	E04G 21/3266	• • {Safety nets}
	E04G 21/3271	• • {Safety mattresses}
	E04G 21/3276	• • {Arrangements on buildings for connecting safety-lines (fastening devices for devices for lowering persons from buildings A62B 1/04)}
	E04G 21/328	• • • {fastened to the roof covering or insulation}
	E04G 21/3285	• • • • {fastened to standing seams of the roof covering}
	E04G 21/329	• • • {with measures for dampening the fall}
	E04G 21/3295	• • {Guide tracks for safety lines (arrangements for bypassing safety track supports without life line disconnection A62B 35/0087)}

U E04G 23/00	Working measures on existing buildings, ({ domestic cleaning of walls or floors A47L 11/00; grinding floors or walls B24B 7/18; removing of wall coverings B44C 7/00; removing of paint from surfaces B44D 3/16; electrochemical desalination or re-alkalisation C04B 41/00); on foundations E02D 35/00, E02D 37/00; in connection with insulations E04B; subsequent or finishing work E04F)
	<u>NOTE</u>
	In addition to the subject matter referred out in this group, subject matter relating to working measures on existing buildings which are analogous to those used in constructing new buildings, are classified in the appropriate construction groups.
U E04G 23/002	• {Arrangements for cleaning building facades}
E04G 23/004	• • {-with arrangements for collecting waste water or cleaning products}
E04G 23/008	• {-Working measures on existing vertical ducts e.g. chimneys, garbage chutes}
U E04G 23/02	• Repairing, e.g. filling cracks; Restoring; Altering; Enlarging {(compositions of filling material C04B ; strengthening, widening, repairing of bridges E01D 22/00 ; drying damp layers by temporary mechanical ventilation E04B 1/7092)}
U E04G 23/0203	• • {Arrangements for filling cracks or cavities in building constructions}
E04G 23/0207	• • • {-in hollow structures e.g. cavity walls}
E04G 23/0211	• • • {-using injection}
E04G 23/0214	• • • {-using covering strips}
U E04G 23/0218	• • {Increasing or restoring the load-bearing capacity of building construction elements (E04G 23/0203 and E04G 23/0266 take precedence)}
E04G 23/0225	• • • {-of circular building elements e.g. by circular bracing}
E04G 23/0229	• • • {-of foundations or foundation walls}
E04G 23/0233	• • • {-of vaulted or arched building elements}
E04G 23/024	• • • {-of basement floors}
E04G 23/0244	• • • {-of beams at places of holes, e.g. drilled in them}
U E04G 23/0266	• • {Enlarging}
E04G 23/027	• • • {-Loft conversion by truss modification}
E04G 23/0274	• • {-Temporary shoring of wall opening}
E04G 23/0277	• • {-Repairing or restoring window or door frames (door frames E06B 1/00), window frames E06B 3/00 }
E04G 23/0281	• • {-Repairing or restoring roofing or roof covering (roof covering E04D 3/00)}
E04G 23/0285	• • {-Repairing or restoring flooring (flooring E04F 15/00)}
E04G 23/0288	• • {-Repairing or restoring floor slabs (floors E04B 5/00)}
E04G 23/0292	• • {-Repairing or restoring balconies (balcony structures E04B 1/003)}
E04G 23/0296	• • {-Repairing or restoring facades (covering or linings e.g. for walls E04F 13/00)}
U E04G 23/06	• Separating, lifting, removing of buildings; Making a new sub-structure
E04G 23/065	• • {-Lifting of buildings (E04G 21/163 takes precedence)}
U E04G 23/08	• Wrecking of buildings (of fences E04H 17/26 ; {Demolition agents based on cementitious or like materials C04B 41/0009 })
E04G 23/081	• • {-using hydrodemolition}
E04G 23/082	• • {-using shears, breakers, jaws and the like (metal-cutting or concrete-crushing implements mounted on backhoes E02F 3/965)}
E04G 23/083	• • {-using vaporising wire technique (particular applications of blasting techniques F42D 3/00)}

- E04G 23/084
 - • {-using breaker balls or the like}
- U E04G 25/00** **Shores or struts (specially designed for use in mines [E21D 15/00](#) { ; [E04G 21/26](#), [E04G 23/04](#) take precedence)); Chocks**
 - U E04G 25/04
 - telescopic {(locking of telescopic systems in general [F16B 7/10](#))}
 - U E04G 25/06
 - • with parts held together by positive means
 - E04G 25/061
 - • • {-by pins}
 - E04G 25/063
 - • • • {-with safety devices to avoid the accidental loss or unlocking of the pin, e.g. chains attaching the pin to the prop}
 - E04G 25/065
 - • • {-by a threaded nut}
 - E04G 25/066
 - • • {-by a wedge}
 - E04G 25/068
 - • • {-by a cam}

Project: N/A (E04H)

- U E04H 4/00** **Swimming or splash baths or pools (wave-producers for baths [A47K 3/10](#); separation [B01D](#); treatment of water [C02F](#); wave-producing pumps [F04D 35/00](#))**
 - E04H 4/0018
 - {-Easily movable or transportable swimming pools}
 - E04H 4/0031

FIXED OR MOVABLE CLOSURES FOR OPENINGS IN BUILDINGS, VEHICLES, FENCES OR LIKE ENCLOSURES IN GENERAL, e.g. DOORS, WINDOWS, BLINDS, GATES (-shades or blinds for greenhouses [A01G 9/22](#) ; curtains [A47H](#); lids for car boots or bonnets [B62D 25/10](#) ; skylights [E04B 7/18](#) ; sunshades, awnings [E04F 10/00](#)-)

NOTES

This subclass does not cover combinations of wings or frames with operating, mounting, latching or locking means of the type found in class [E05](#), which are covered by the relevant subclasses of class [E05](#), except such as are covered by groups [E06B 7/086](#) , [E06B 9/00](#) , or [E06B 11/02](#) of this subclass.

In this subclass, the following terms or expressions are used with the meanings indicated:

- "wing" means a swingable, slidable or otherwise movable member such as a door or window, for closing an opening;

- "wing frame" means the peripheral edge or edges which define the outer border of the wing.

For vehicle door or window arrangements, attention is drawn to Note (1) following the title of subclass [B60J](#).

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[E06B 11/06](#) covered by [E05B 65/0007](#)

E06B 1/00	Border constructions of openings in walls, floors, or ceilings; Frames to be rigidly mounted in such openings (E06B 5/00 takes precedence; features relating also to inner frames or wing frames, features relating solely to the mounting of inner frames E06B 3/00 ; corner joints or edge joints E06B 3/96)
E06B 1/003	• {Cavity wall closers; Fastening door or window frames in cavity walls (lintels E04C 3/02)}
E06B 1/02	• Base frames, i.e. template frames for openings in walls or the like, provided with means for securing a further rigidly-mounted frame; Special adaptations of frames to be fixed therein (E06B 1/003 , E06B 1/24 take precedence; fastening door or window frames per se E06B 1/56)
E06B 1/04	• Frames for doors, windows, or the like to be fixed in openings ({ of curvilinear outline E06B 1/006 ; } special adaptations for fixing in base frames E06B 1/02 ; features relating solely to the mounting of glass panes or other sheets E06B 3/00)
E06B 1/045	• {with separate wing abutment strips, e.g. adjustable; Door stops (sealing arrangements E06B 7/16)}
U E06B 1/12	• Metal frames
E06B 1/14	• • of special cross-section (E06B 1/18 , E06B 1/22 take precedence) {not used}
U E06B 1/26	• Frames of plastics
E06B 1/28	• • Hollow frames (E06B 1/30 takes precedence)
U E06B 1/36	• Frames uniquely adapted for windows
E06B 1/40	• • Frames with parts removable to admit the glass (E06B 1/38 takes precedence)
U E06B 1/52	• Frames specially adapted for doors
E06B 1/526	• • {for door wings that can be set up to open either left or right, outwards or inwards, e.g. provided with grooves for easily detachable hinges or latch plates (locks therefor E05B 63/04 ; hinges therefor E05D 7/02)}
E06B 1/56	• Fastening frames to the border of openings {or to similar contiguous frames (E06B 1/003 takes precedence)}
U E06B 1/60	• by mechanical means, e.g. anchoring means
E06B 1/6007	• • {between similar contiguous frames (bay windows E06B 1/363)}
E06B 1/6015	• • {Anchoring means (E06B 1/6007 , E06B 1/6046 to E06B 1/6092 take precedence)}
E06B 1/6023	• • • {completely hidden between the frame and the border of the opening, at least part of the means being previously fixed to the wall (E06B 1/6038 takes precedence)}
E06B 1/6046	• • • {Clamping means acting perpendicular to the wall opening; Fastening frames by tightening or drawing them against a surface parallel to the opening (E06B 1/6007 takes precedence)}

E06B 1/6069	<ul style="list-style-type: none"> • • • {Separate spacer means acting exclusively in the plane of the opening; Shims; Wedges; Tightening of a complete frame inside a wall opening} (E06B 1/6084 takes precedence-)
E06B 1/6084	<ul style="list-style-type: none"> • • • {Mounting frames elastically, e.g. with springs or other elastic material, between the wall and the frame} (E06B 1/6046 takes precedence-)
E06B 1/6092	<ul style="list-style-type: none"> • • • {Fastening door frames to the floor or ceiling; Jamb feet; Cross members uniting the jamb feet} (E06B 1/70 and E06B 3/9632 take precedence-)
E06B 1/62	<ul style="list-style-type: none"> • Tightening or covering joints between the border of openings and the frame {or between contiguous frames} (E06B 1/34 takes precedence-)
E06B 3/00	<p>Window sashes, door leaves, or like elements for closing {wall or like} openings; Layout of fixed or moving closures, e.g. windows {in wall or like openings}; Features of rigidly-mounted outer frames relating to the mounting of wing frames (E06B 5/00 takes precedence; shutters or the like E06B 9/00 ; glass panes C03-)</p>
E06B 3/01	<ul style="list-style-type: none"> • Removable or disappearing walls for hangars or other halls, e.g. for aircraft (-wall constructions E04B 2/00-)
E06B 3/02	<ul style="list-style-type: none"> • Wings made completely of glass{(E06B 3/4681 takes precedence-)}

GAS-FLOW SILENCERS OR EXHAUST APPARATUS FOR MACHINES OR ENGINES IN GENERAL; GAS-FLOW SILENCERS OR EXHAUST APPARATUS FOR INTERNAL COMBUSTION ENGINES ({ evacuation of fumes from the area where they are produced [B08B 15/00](#) ; arrangement of exhaust or silencing apparatus on percussive tools [B25D 17/12](#) } ; arrangements in connection with gas exhaust of propulsion units in vehicles [B60K 13/00](#) , { on ships or other waterborne vessels [B63H 21/32](#) , on aircraft [B64D 33/04](#) ; arrangement of exhaust or silencing apparatus on firearms [F41A 21/30](#) ; ground installations for reducing aircraft engine or jet noise [B64F 1/26](#) ; silencers specially adapted for steam engines [F01B 31/16](#) ; air-intake silencers for gas turbine or jet propulsion plants [F02C 7/045](#) ; jet pipe or nozzles for jet propulsion plants [F02K](#) } ; combustion-air intake silencers specially adapted for, or arranged on, internal-combustion engines [F02M 35/00](#) ; { combating noise or silencing in positive displacement machines or pumps [F04B 39/0027](#) , in rotary-piston machines or pumps [F04C 29/06](#) , in non-positive displacement pumps [F04D 29/66](#) ; means in valves for absorbing noise [F16K 47/02](#) ; noise absorbers in pipe system [F16L 55/02](#) ; conducting smoke or fumes from various locations to the outside [F23J 11/00](#) ; means for preventing or suppressing noise in air-conditioning or ventilation systems [F24F 13/24](#) } ; protecting against, or damping, noise in general [G10K 11/16](#))

NOTES

Attention is drawn to the notes preceding Class [F01](#), especially as regards Note 2(b).

F01N 1/00

Silencing apparatus characterised by method of silencing{ by cooling [F01N 3/02](#) ; using liquids [F01N 3/04](#) }

F01N 1/003

• {by using dead chambers communicating with gas flow passages (-resonance chambers [F01N 1/02](#) ; chambers containing sound-absorbing materials [F01N 1/24](#))}

U F01N 1/08

• by reducing exhaust energy by throttling or whirling

F01N 1/082

• • {the gases passing through porous members (-[F01N 1/081](#) takes precedence)}

F01N 1/086

• • {having means to impart whirling motion to the gases (-with helically or spirally shaped channels [F01N 1/12](#))}

F01N 1/089

• • {using two or more expansion chambers in series (-[F01N 1/083](#) , [F01N 1/084](#) , [F01N 1/086](#) take precedence)}

F01N 1/10

• • in combination with sound-absorbing materials (-[F01N 1/125](#) takes precedence)

F01N 1/12

• • using spirally or helically shaped channels (-cyclones [B04C](#))

F01N 1/14

• by adding air to exhaust gases ({in tailpipes [F01N 13/082](#) , [F01N 13/20](#))}

U F01N 1/16

• by using movable parts

F01N 1/166

• • {for changing gas flow path through the silencer or for adjusting the dimensions of a chamber or a pipe (-[F01N 1/165](#) takes precedence)}

F01N 1/20

• • having oscillating or vibrating movement{ the parts being resilient walls [F01N 1/22](#) }

F01N 1/24

• by using sound-absorbing materials (-[F01N 1/04](#) , [F01N 1/06](#) , [F01N 1/10](#) , [F01N 1/14](#) , [F01N 1/16](#) take precedence)

F01N 3/00	Exhaust or silencing apparatus having means for purifying, rendering innocuous, or otherwise treating exhaust (electric control F01N 9/00 ; monitoring or diagnostic devices for exhaust-gas treatment apparatus F01N 11/00 ; { collecting or removing exhaust gases of vehicle engines in workshops B08B 15/00 , on highways E01C 1/005 })
F01N 3/005	• {for draining or otherwise eliminating condensates or moisture accumulating in the apparatus} (F01N 3/02 takes precedence-)} {e0809}
F01N 3/02	• for cooling, or for removing solid constituents of, exhaust (by means of electric or electrostatic separators F01N 3/01 ; { mixing air with exhaust in tailpipes F01N 13/082 , F01N 13/20 })
U F01N 3/021	• • by means of filters
F01N 3/023	• • • using means for regenerating the filters, e.g. by burning trapped particles (by electrically controlling the supply of combustible mixture or its constituents only F02D 41/0235 -)
F01N 3/033	• • • in combination with other devices{ with adsorbents or absorbents F01N 3/0821 -}
F01N 3/05	• • by means of air, e.g. by mixing exhaust with air (silencers working by addition of air to exhaust F01N 1/14 ; arrangements for the supply of additional air for the thermal or catalytic conversion of noxious components of exhaust F01N 3/30 ; { in tailpipes F01N 13/082 })
F01N 3/08	• for rendering innocuous (using electric or electrostatic separators F01N 3/01 ; chemical aspects B01D 53/92 -)

INTERNAL-COMBUSTION PISTON ENGINES; COMBUSTION ENGINES IN GENERAL (plants in which engines use combustion products [F02C](#), [F02G](#); internal-combustion turbines [F02C](#))

NOTES

In this subclass, the following terms or expressions are used with the meanings indicated:

- "positive ignition" means ignition by a source external to the working fluid, e.g. by spark or incandescent source;
- "charging" means forcing air or fuel-air mixture into engine cylinders and thus embraces super-charging;
- "scavenging" means forcing the combustion residues from the cylinders other than by movement of the working pistons and thus embraces tuned exhaust systems.

Attention is drawn to the Notes preceding class [F01](#), specially as regards Note (1).

Engines with specified cycles or number of cylinders are classified in group [F02B 75/02](#) or [F02B 75/16](#) , unless other classifying features predominate.

**F02B 1/00 -
F02B 11/00**

Engines characterised by the working fluid to be compressed, or characterised by the type of ignition (-with both fuel-air mixture compression and air-compression, or with both positive ignition and compression ignition [F02B 11/00](#) ; with pre-combustion chambers [F02B 19/00](#) ; having air storage chambers [F02B 21/00](#) ; with special shape or construction of other combustion chambers [F02B 23/00](#))

F02B 1/00

Engines characterised by fuel-air mixture compression (-characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition [F02B 11/00](#) ; characterised by precombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00](#))

NOTE

- in this group the following indexing codes are used: [F02B 2700/02](#) to [F02B 2720/30](#)

- F02B 1/02 • with positive ignition (-with non-timed positive ignition [F02B 9/06-](#))
- F02B 1/12 • with compression ignition (-with fuel-air charge ignited by compression ignition of an additional fuel [F02B 7/00-](#))
- F02B 3/00** **Engines characterised by air compression and subsequent fuel addition (-characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition [F02B 11/00](#) ; characterised by precombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00-](#))**
- NOTE
- in this group the following indexing codes are used:
[F02B 2700/02](#) to [F02B 2720/30](#)
- F02B 3/02 • with positive ignition (-with non-timed positive ignition [F02B 9/06-](#))
- F02B 3/06 • with compression ignition (-[F02B 13/02](#) takes precedence; with fuel-air charge ignited by compression ignition of an additional fuel [F02B 7/00-](#))
- F02B 3/08 • • Methods of operating (-[F02B 3/12](#) takes precedence-)
- F02B 5/00** **Engines characterised by positive ignition (- [F02B 1/02](#) , [F02B 3/02](#) take precedence; with non-timed positive ignition [F02B 9/06](#) ; characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition [F02B 11/00](#) ; characterised by precombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00-](#))**
- F02B 7/00** **Engines characterised by the fuel-air charge being ignited by compression ignition of an additional fuel (-characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition [F02B 11/00](#) ; characterised by precombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00-](#))**
- F02B 9/00** **Engines characterised by other types of ignition (-characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition [F02B 11/00](#) ; characterised by precombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00-](#))**
- NOTE
- in this group the following indexing codes are used:
[F02B 2700/02](#) to [F02B 2720/30](#)
- F02B 9/02 • with compression ignition (-[F02B 1/12](#) , [F02B 3/06](#) take precedence-)
- F02B 11/00** **Engines characterised by both fuel-air mixture compression and air compression, or characterised by both positive ignition and compression ignition, e.g. in different cylinders (-characterised by recombustion chambers [F02B 19/00](#) ; characterised by air-storage chambers [F02B 21/00](#) ; characterised by special shape or construction of combustion chambers [F02B 23/00-](#))**
- F02B 11/02 • convertible from fuel-air mixture compression to air compression or vice-versa

F02B 13/00 - F02B 17/00	Engines characterised by the method of introducing fuel into cylinders (characterised by use of gaseous or solid fuels F02B 43/00 , F02B 45/00 ; carburettors, fuel-injection apparatus F02M)
U F02B 15/00	Engines characterised by the method of introducing liquid fuel into cylinders and not otherwise provided for
F02B 15/02	<ul style="list-style-type: none"> • having means for sucking fuel directly into cylinder
F02B 19/00 - F02B 23/00	Engines characterised by having pre-combustion chambers or air storage chambers, or characterised by shape or construction of combustion chambers to improve operation (engines with incandescent chambers F02B 9/08)
F02B 19/00	Engines characterised by precombustion chambers (engines with incandescent chambers F02B 9/08)
F02B 19/10	<ul style="list-style-type: none"> • with fuel introduced partly into pre-combustion chamber, and partly into cylinder (F02B 19/02 to F02B 19/08 take precedence)
F02B 19/1019	<ul style="list-style-type: none"> • • {with only one pre-combustion chamber (F02B 19/1004 take precedence)}
U F02B 19/1023	<ul style="list-style-type: none"> • • • {pre-combustion chamber and cylinder being fed with fuel-air mixture(s)}
F02B 19/1071	<ul style="list-style-type: none"> • • • • {pre-combustion chamber having only one orifice, <i>(i.e. an orifice by means of which it communicates with the cylinder)</i> (i.e. an orifice by means of which it communicates with the cylinder); the intake system comprising two distinct intake conduits}
F02B 19/12	<ul style="list-style-type: none"> • with positive ignition (F02B 19/02 to F02B 19/10 take precedence)
F02B 19/14	<ul style="list-style-type: none"> • with compression ignition (F02B 19/02 to F02B 19/10 take precedence)
F02B 19/16	<ul style="list-style-type: none"> • Chamber shapes or constructions not specific to sub-groups F02B 19/02 to F02B 19/10
F02B 19/165	<ul style="list-style-type: none"> • • {The shape or construction of the pre-combustion chambers is specially adapted to be formed, at least in part, of ceramic material (surface coverings of combustion-gas-swept parts F02B 77/02 ; shaped ceramic products characterised by their composition or ceramic compositions C04B 35/00 ; ceramic material for engine casings F02F 7/0087)}
F02B 23/00	Other engines characterised by special shape or construction of combustion chambers to improve operation (engines with incandescent chambers F02B 9/08)
NOTE	
- in this group the following indexing codes are used:	
F02B 2700/02 to F02B 2720/30	
U F02B 23/02	<ul style="list-style-type: none"> • with compression ignition
F02B 23/04	<ul style="list-style-type: none"> • • the combustion space being subdivided into two or more chambers (with pre-combustion chambers F02B 19/00)
F02B 23/06	<ul style="list-style-type: none"> • • the combustion space being arranged in working piston (F02B 23/04 takes precedence)
U F02B 23/0618	<ul style="list-style-type: none"> • • • {having in-cylinder means to influence the charge motion}
F02B 23/063	<ul style="list-style-type: none"> • • • • {the combustion space in the piston interacting fluid dynamically with the cylinder head, the injector body or the cylinder wall (F02B 23/04 takes precedence)}
F02B 23/0672	<ul style="list-style-type: none"> • • • {Omega-piston bowl, i.e. the combustion space having a central projection pointing towards the cylinder head and the surrounding wall being inclined towards the cylinder center axis (the surrounding wall being exactly vertical F02B 23/0696)}

F02B 25/00 - F02B 31/00	Engines characterised by provisions for charging or scavenging (-aspects concerned with driven charging or scavenging pumps F02B 33/00 to F02B 39/00 -)
F02B 25/00	Engines characterised by using fresh charge for scavenging cylinders (-aspects characterised by provision of driven charging or scavenging pumps F02B 33/00 to F02B 39/00 -)
	NOTE - in this group the following indexing codes are used: F02B 2700/02 to F02B 2700/038
U F02B 25/14	• using reverse-flow scavenging, e.g. with both outlet and inlet ports arranged near bottom of piston stroke
F02B 25/16	• • the charge flowing upward essentially along cylinder wall opposite the inlet ports{(- F02B 25/145 takes precedence-)}
F02B 25/18	• • the charge flowing upward essentially along cylinder wall adjacent the inlet ports, e.g. by means of deflection rib on piston{(- F02B 25/145 takes precedence-)}
F02B 25/20	• Means for reducing the mixing of charge and combustion residues or for preventing escape of fresh charge through outlet ports not provided for in, or of interest apart from, subgroups F02B 25/02 to F02B 25/18
F02B 25/26	• Multi-cylinder engines other than those provided for in, or of interest apart from, groups F02B 25/02 to F02B 25/24 (-internal-combustion aspects of rotary engines with movable cylinders F02B 57/00 -)
F02B 27/00	Use of kinetic or wave energy of charge in induction systems, or of combustion residues in exhaust systems, for improving quantity of charge or for increasing removal of combustion residues (-aspects characterised by provision of driven charging or scavenging pumps F02B 33/00 to F02B 39/00 , e.g. use of driven apparatus for immediate conversion of combustion gas pressure into pressure of fresh charge F02B 33/42 -)
F02B 27/02	• the systems having variable, i.e. adjustable, cross-sectional areas, chambers of variable volume, or like variable means (-in exhaust systems only F02B 27/06 -)
U F02B 27/0205	• • {characterised by the charging effect}
F02B 27/021	• • • {Resonance charging (-combined with oscillating pipe charging F02B 27/0221 -)}
U F02B 27/0226	• • {characterised by the means generating the charging effect}
F02B 27/0231	• • • {Movable ducts, walls or the like (- F02B 27/0257 takes precedence-)}
U F02B 27/0247	• • • {Plenum chambers; Resonance chambers or resonance pipes}
F02B 27/0263	• • • • {the plenum chamber and at least one of the intake ducts having a common wall, and the intake ducts wrap partially around the plenum chamber, i.e. snail-type (- F02B 27/0257 takes precedence-)}
F02B 29/00	Engines characterised by provision for charging or scavenging not provided for in groups F02B 25/00 , F02B 27/00 or F02B 33/00 to F02B 39/00-; Details thereof
F02B 29/02	• Other fluid-dynamic features of induction systems for improving quantity of charge (-for also imparting a rotation to the charge in the cylinder F02B 31/00 ; structural features of induction systems F02M -)
F02B 29/08	• Modifying distribution valve timing for charging purposes (- F02B 29/06 takes precedence; valve gear therefor F01L -)
F02B 31/00	Modifying induction systems for imparting a rotation to the charge in the cylinder (-structural features of induction systems F02M -)
U F02B 31/04	• by means within the induction channel, e.g. deflectors

- U F02B 31/06
 - • Movable means, e.g. butterfly valves
- U F02B 31/08
 - • • having multiple air inlets, {i.e. having main and auxiliary intake passages}
- F02B 31/082
 - • • {the main passage having a helical shape around the intake valve axis; Engines characterised by provision of driven charging or scavenging pumps (-introducing fuel into cylinders by air-pressure [F02B 13/00](#) ; after-charging [F02B 29/06](#) ; arrangements of such pumps or other auxiliary apparatus on engines [F02B 67/00](#) ; combined engine pump control, control dependent on variables other than those generic to pump [F02D-](#))}
- F02B 33/00 -

CONTROLLING COMBUSTION ENGINES (cyclically operating valves for combustion engines [F01L](#); controlling combustion engine lubrication [F01M](#); cooling internal combustion engines [F01P](#); supplying combustion engines with combustible mixtures or constituents thereof, e.g. carburettors, injection pumps [F02M](#); starting of combustion engines [F02N](#); controlling of ignition [F02P](#); controlling gas-turbine plants, jet-propulsion plants, or combustion-product engine plants, see the relevant subclasses for these plants)

NOTES

Attention is drawn to the notes preceding class [F01](#).

In this subclass, the following words are used with the meanings indicated:

- "Fuel injection" means the introduction of a combustible substance into a space, e.g. cylinder, by means of a pressure source, e.g. a pump, continuously or cyclically acting behind the substance;
- "Supercharging" means supplying to the working space, e.g. cylinder, combustion-air pressurised by means of a pressure source, e.g. a pump.

F02D 1/00 - F02D 17/00

Controlling, e.g. regulating, fuel injection (peculiar to engines characterised by their use of non-liquid fuels, pluralities of fuels, or non-fuel substances added to the combustible mixtures [F02D 19/00](#) ; peculiar to supercharged engines [F02D 23/00](#) ; automatic controllers for prime movers, in general [G05D](#))

F02D 1/00

Controlling fuel-injection pumps, e.g. of high pressure injection type (-[F02D 3/00](#) takes precedence; controlling fuel-injection electrically [F02D 41/30](#)) {pumping elements on fuel pressure acting for varying fuel delivery in quantity or timing [F02M](#)}

NOTE

- in this subclass the following indexing codes are used: [F02D 2700/0282](#) and [F02D 2700/10](#)

- U F02D 1/02
 - not restricted to adjustment of injection timing, e.g. varying amount of fuel delivered

F02F	CYLINDERS, PISTONS OR CASINGS, FOR COMBUSTION ENGINES; ARRANGEMENTS OF SEALINGS IN COMBUSTION ENGINES (specially adapted for rotary-piston or oscillating-piston internal-combustion engines F02B; specially adapted for gas-turbine plants F02C; specially adapted for jet-propulsion plants F02K)
-------------	--

NOTES

Attention is drawn to the notes preceding class F01.

In considering the relationship between class F16 and subclass F02F, class F16 will take precedence unless the subject-matter is specific to combustion engines.

F02F 1/00	Cylinders; Cylinder heads (in general F16J)
------------------	--

F02F 1/004	• {Cylinder liners (-F02F 1/08 , F02F 1/16 take precedence-)}
F02F 1/02	• having cooling means (-cylinder heads F02F 1/26-)
U F02F 1/18	• Other cylinders
F02F 1/186	• • {for use in engines with two or more pistons reciprocating within same cylinder (-such engines per se F02B 75/28-)}
U F02F 1/24	• Cylinder heads
U F02F 1/26	• • having cooling means
U F02F 1/28	• • • for air cooling
U F02F 1/30	• • • • Finned cylinder heads
F02F 1/34	• • • • with means for directing or distributing cooling medium (-F02F 1/32 takes precedence-)
U F02F 1/36	• • • for liquid cooling
F02F 1/40	• • • • Cylinder heads with means for directing, guiding, or distributing liquid stream (-F02F 1/38 takes precedence-)
U F02F 1/42	• • Shape or arrangement of intake or exhaust channels in cylinder heads
U F02F 1/4214	• • • {specially adapted for four or more valves per cylinder}
F02F 1/4221	• • • • {particularly for three or more inlet valves (-mechanisms for driving such valves F01L 1/265-)}
F02F 1/4228	• • • {Helically-shaped channels} (-F02B 31/00 takes precedence-)}
U F02F 1/4285	• • • {of both intake and exhaust channel}
F02F 1/4292	• • • • {with liners (-F02F 1/4257 , F02F 1/4271 take precedence-)}
F02F 3/00	Pistons (-in general F16J-)
U F02F 3/02	• having means for accomodating or controlling heat expansion
F02F 3/022	• • {the pistons having an oval circumference or non-cylindrical shaped skirts, e.g. oval (-F02F 3/025 , F02F 3/027 take precedence-)}
F02F 3/10	• having surface coverings (-F02F 3/02 takes precedence-)
F02F 3/26	• having combustion chamber in piston head (-the surface thereof being covered F02F 3/14-)
F02F 5/00	Piston rings, e.g. associated with piston crown{ not used see F16J 9/00 }
F02F 7/00	Casings, e.g. crankcases (-engine casings in general F16M-){or frames}
U F02F 7/0021	• {Construction}
F02F 7/0031	• • {Construction kit principle (<i>modular engines</i>) (modular engines)}

U F02F 7/0065	• {Shape of casings for other machine parts and purposes, e.g. utilisation purposes, safety}
F02F 7/008	• • {Sound insulation (-see also F02B 77/13-)}
F02F 7/0095	• {Constructing engine casings (-welded casings F02F 7/0034-)}
F02F 11/00	Arrangements of sealings in combustion engines (-piston rings F02F 5/00 { not used, see F16J 9/00 } ; sealings per se F16J-)
U F02F 2200/00	Manufacturing
F02F 2200/06	• Casting (-casting of pistons F02F 2003/0007-)

Project: N/A (F02K)**F02K**

JET-PROPULSION PLANTS (arrangement or mounting of jet-propulsion plants in land vehicles or vehicles in general [B60K](#); arrangement or mounting of jet-propulsion plants in waterborne vessels [B63H](#); controlling aircraft attitude, flight direction or altitude by jet reaction [B64C](#); arrangement or mounting of jet-propulsion plants in aircraft [B64D](#); plants characterised by the power of the working fluid being divided between jet-propulsion and another form of propulsion, e.g. propeller, [F02B](#), [F02C](#); features of jet-propulsion plants common to gas-turbine plants, air intakes or fuel supply control of air-breathing jet-propulsion plants [F02C](#))

NOTES

In this subclass, the following expression is used with the meaning indicated:

- "jet-propulsion plants" means plants using combustion to produce a fluid stream from which a propulsive thrust on the plant is obtained on the reaction principle.

Attention is drawn to the notes preceding class [F01](#).

Project: N/A (F02M)**U F02M 7/00**

Carburettors with means for influencing, e.g. enriching or keeping constant, fuel/air ratio of charge under varying conditions (choke valves for starting [F02M 1/00](#))

F02M 7/06

• {Means for enriching charge on sudden air throttle opening, i.e. at acceleration, e.g. storage means in passage way system}

U F02M 21/00

Apparatus for supplying engines with non-liquid fuels, e.g. gaseous fuels stored in liquid form

NOTE

- in this group the following indexing codes are used: [F02M 2700/12](#) to [F02M 2700/13](#)

U F02M 21/02

• for gaseous fuels (apparatus for vaporising liquid fuel by heat [F02M 31/00](#); engines with apparatus generating gas from solid fuel, e.g. from wood, [F02B 43/08](#))

F02M 21/0203

• • {characterised by the type of gaseous fuel}

F02M 21/0206

• • • {Non-hydrocarbon fuels, e.g. hydrogen, ammonia or carbon monoxide}

F02M 21/0209

• • • {Hydrocarbon fuels, e.g. methane or acetylene}

F02M 21/0212

• • • • {comprising at least 3 C-Atoms, e.g. liquefied petroleum gas (LPG), propane, butane or dimethyl ether (DME)}

F02M 21/0215

• • • • {Mixtures of gaseous fuels; Natural gas; Biogas; Mine gas; Landfill gas}

F02M 21/0218

• • {Details on the gaseous fuel supply system, e.g. tanks, valves, pipes, pumps, rails, injectors or mixers}

F02M 21/0221

• • • {Fuel storage reservoirs, e.g. cryogenic tanks}

F02M 21/0224

• • • • {Secondary gaseous fuel storages}

F02M 21/0227

• • • {Means to treat or clean gaseous fuels or fuel systems, e.g. removal of tar, cracking, reforming or enriching}

F02M 21/023

• • • {Valves; Pressure or flow regulators in the fuel supply or return system}

F02M 21/0233

• • • • {Details of actuators therefor}

F02M 21/0236

• • • • {Multi-way valves; Multiple valves forming a multi-way valve system}

F02M 21/0239

• • • • {Pressure or flow regulators therefor}

F02M 21/0242

• • • • {Shut-off valves; Check valves; Safety valves; Pressure relief valves}

F02M 21/0245	• • • {-High pressure fuel supply systems; Rails; Pumps; Arrangement of valves}
F02M 21/0248	• • • {-Injectors}
F02M 21/0251	• • • • {-Details of actuators therefor}
F02M 21/0254	• • • • • {-Electric actuators, e.g. solenoid or piezoelectric}
F02M 21/0257	• • • • {-Details of the valve closing elements, e.g. valve seats, stems or arrangement of flow passages}
F02M 21/026	• • • • • {-Lift valves, i.e. stem operated valves}
F02M 21/0263	• • • • • • {-Inwardly opening single or multi nozzle valves, e.g. needle valves}
F02M 21/0266	• • • • • • • {-Hollow stem valves; Piston valves; Stems having a spherical tip}
F02M 21/0269	• • • • • • • {-Outwardly opening valves, e.g. poppet valves}
F02M 21/0272	• • • • • {-Ball valves; Plate valves; Valves having deformable or flexible parts, e.g. membranes; Rotatable valves}
F02M 21/0275	• • • • • {-for in-cylinder direct injection, e.g. injector combined with spark plug}
F02M 21/0278	• • • • • {-Port fuel injectors for single or multipoint injection into the air intake system}
F02M 21/0281	• • • • • {-Adapters, sockets or the like to mount injection valves onto engines; Fuel guiding passages between injectors and the air intake system or the combustion chamber}
F02M 21/0284	• • • {-Arrangement of multiple injectors or fuel-air mixers per combustion chamber}
F02M 21/0287	• • • {-characterised by the transition from liquid to gaseous phase (F02M 21/06 takes precedence); Injection in liquid phase; Cooling and low temperature storage}
F02M 21/029	• • • {-Arrangement on engines or vehicle bodies; Conversion to gaseous fuel supply systems}
F02M 21/0293	• • • {-Safety devices; Fail-safe measures}
F02M 21/0296	• • • {-Manufacturing or assembly; Materials, e.g. coatings}
U F02M 21/04	• • Gas-air mixing apparatus (carburettors adapted to use liquid and gaseous fuels F02M 13/08 ; carburetting gases in general C10J)
F02M 21/042	• • • {-Mixer comprising a plurality of bores or flow passages}
F02M 21/045	• • • {-Vortex mixer}
F02M 21/047	• • • {-Venturi mixer}
U F02M 25/00	Engine-pertinent apparatus for adding non-fuel substances or small quantities of secondary fuel to combustion-air, main fuel, or fuel-air mixture (F02M 43/00 takes precedence; adding secondary air to fuel-air mixture F02M 23/00)
U F02M 25/022	• Adding fuel and water emulsion, water or steam
F02M 25/0221	• • {-Details of the water supply system, e.g. pumps or arrangement of valves}
F02M 25/0222	• • • {-Water recovery or storage}
F02M 25/0224	• • • • {-Water treatment or cleaning (F02M 25/032 takes precedence)}
F02M 25/0225	• • • • {-Water atomisers or mixers, e.g. using ultrasonic waves}
F02M 25/0227	• • • {-Control aspects; Arrangement of sensors; Diagnostics; Actuators}
F02M 25/0228	• • • {-Adding fuel and water emulsion}
U F02M 25/06	• adding lubricant vapours or exhaust gases
U F02M 25/07	• • adding exhaust gases; { Exhaust gas recirculation (EGR)}
F02M 25/0701	• • • {-Handling or preventing deposits, corrosion or wear caused by impurities, e.g. means or measures for preventing sticking of EGR valves (F02M 25/0718 and F02M 25/074 take precedence)}

F02M 25/0702	• • • {-Detecting, diagnosing or alerting an abnormal function of the EGR system}
F02M 25/0703	• • • {-having means for connecting parts of the EGR system to each other or to another engine part}
F02M 25/0704	• • • {-EGR systems specially adapted for supercharged engines}
U F02M 25/0706	• • • • {-for a single turbocharger}
F02M 25/071	• • • • • {-Mixed pressure loops, i.e. wherein recirculated exhaust gas is either taken out upstream of the turbine and reintroduced upstream of the compressor, or is taken out downstream of the turbine and reintroduced downstream of the compressor}
F02M 25/0714	• • • {-Manufacturing or assembling of EGR systems; Special materials or coatings therefor; Design details not provided for in groups F02M 25/0703 or F02M 25/0734 }
F02M 25/0715	• • • {-Details or layout of the EGR duct, e.g. arrangement in relation to engine parts or by having a cleaner, a cooler, an impeller or mixer in the recirculation duct}
F02M 25/0717	• • • • {-Connections of the EGR duct to the exhaust system}
F02M 25/0718	• • • • • {-EGR in combination with means to clean engine-out exhaust gases (the means being installed in the recirculation duct F02M 25/074)}
F02M 25/0719	• • • • • {-an EGR valve being located at or near the connection portion}
F02M 25/072	• • • • {-Connections of the EGR duct to the intake system}
F02M 25/0721	• • • • • {-Heat shielding or protection means}
F02M 25/0722	• • • • • {-Means for improving the mixing of air and recirculated exhaust gases, e.g. multiple openings to the intake system; Venturis}
F02M 25/0723	• • • • • {-Feeding recirculated exhaust gases into the intake runner in close proximity to the intake valve or directly into the combustion chamber}
F02M 25/0724	• • • • • {-an EGR valve being located at or near the connection portion}
F02M 25/0726	• • • • • {-Coolers in the recirculation duct}
F02M 25/0727	• • • • • {-Layout or concepts, e.g. flow charts}
F02M 25/0728	• • • • • • {-with coolers having a bypass}
F02M 25/0729	• • • • • • • {-characterised by details of the bypass valve}
F02M 25/073	• • • • • • • {-with air cooled heat exchangers}
F02M 25/0731	• • • • • • • {-with liquid cooled heat exchangers}
F02M 25/0732	• • • • • • • {-with a plurality of coolers}
F02M 25/0734	• • • • • • • {-Constructional details of the cooler, e.g. pipes, plates, ribs, insulation or materials}
F02M 25/0735	• • • • • • • {-the cooler being combined with another device e.g. valve, heater, compressor, filter, or being arranged on a special engine location}
F02M 25/0736	• • • • • • • {-Air cooled heat exchangers (layout or concepts thereof F02M 25/073)}
F02M 25/0737	• • • • • • • {-Liquid cooled heat exchangers (layout or concepts thereof F02M 25/0731)}
F02M 25/0738	• • • • • • • {-Temperature control}
F02M 25/0739	• • • • • • • {-Compressors or the like in the recirculation duct}
F02M 25/074	• • • • • • • {-Means installed in the EGR duct to clean or treat the recirculated gases, e.g. by catalyst, condensate trap, particulate filter, heater or by electric means}
F02M 25/0742	• • • • • • • {-Means for adding another fluid to the recirculation duct; Reformers}
F02M 25/0743	• • • • • • • {-Temporary storage of recirculated exhaust gas (F02M 25/0752 takes precedence)}

- F02M 25/0744 {Two or more EGR valves disposed in parallel}
- F02M 25/0745 {Two or more EGR valves disposed in series}
- F02M 25/0746 {Timing means in the recirculation duct, e.g. Rotex chargers, cyclically operating valves, regenerators; Means to handle pressure pulsations}
- F02M 25/0747 {Special arrangements of the recirculation duct on the engine, e.g. cylinder head, liner, piston, spark plug, in the manifolds, or with a specially adapted combustion chamber}
- F02M 25/0748 {EGR specially adapted for multicylinder engines or engines having multiple EGR passages}
- F02M 25/0749 {EGR specially adapted for engines where exhaust from one cylinder or a cylinder group is directed to the intake of the engine}
- F02M 25/0751 {a main EGR passage being split-up into multiple passages}
- F02M 25/0752 . . . {Internal exhaust gas recirculation, i.e. the residual exhaust gases are trapped in the cylinder or pushed back from the intake or the exhaust manifold into the combustion chamber without the use of additional pipes}
- F02M 25/0753 . . . {Sensors in or related to EGR systems}
- F02M 25/0754 {for temperature, pressure or flow rate}
- F02M 25/0755 {for characterising a multi-component gas, e.g. for the composition, density or viscosity of the gas}
- F02M 25/0756 {EGR valve position sensors (details on the sensor installation in the valve housing [F02M 25/0794](#))}
- F02M 25/077 . . . {Details of EGR valves}
- F02M 25/0771 {related to the EGR valve actuator or actuation systems}
- F02M 25/0772 {the EGR valve being positioned by an electric actuator, e.g. a solenoid-type actuator}
- F02M 25/0773 {the actuator being a rotary actuator, e.g. stepper motor}
- F02M 25/0774 {the EGR valve being positioned by vacuum}
- F02M 25/0776 {having pressure modulation valves controlling the vacuum}
- F02M 25/0777 {using electronic means, e.g. electromagnetic valves}
- F02M 25/0778 {Constructional details of the pneumatic actuator or mounting thereof}
- F02M 25/0779 {the EGR valve being positioned by positive pressure; Check valves therefor}
- F02M 25/078 {the EGR valve being controlled by changing the air intake pressure}
- F02M 25/0781 {the EGR valve being controlled by exhaust pressure}
- F02M 25/0782 {the EGR valve being controlled by changing the exhaust back pressure}
- F02M 25/0784 {the EGR valve being controlled by fuel pressure}
- F02M 25/0785 {the EGR valve being directly controlled by the operator ([F02M 25/0786](#) takes precedence)}
- F02M 25/0786 {an intake air throttle and EGR valve being operated together}
- F02M 25/0787 {Constructional details of the EGR valve output members, e.g. type of valve, closing members or housings}
- F02M 25/0788 {Lift valves, e.g. poppet valves}
- F02M 25/0789 {Details of the pintle, spindle, springs, bearings, or the connection or sealing towards the actuator}
- F02M 25/079 {Details of the valve closing member, the valve seat or the flow passages}
- F02M 25/0792 {having two or more valve closing members}

	F02M 25/0793	• • • • • {Flap valves, rotary valves or other sliding valves; Resilient valves}
	F02M 25/0794	• • • • • {Details related to the EGR valve housing}
	F02M 25/0795	• • • • • {with means for heating or cooling the EGR valve}

SYSTEMS ACTING BY MEANS OF FLUIDS IN GENERAL; FLUID-PRESSURE ACTUATORS, e.g. SERVO-MOTORS; DETAILS OF FLUID-PRESSURE SYSTEMS, NOT OTHERWISE PROVIDED FOR ({ hydraulically or pneumatically operated lifting devices for soil-working machines [A01B 63/10](#) ; hydraulic drawing presses [B21D](#); hydraulic or pneumatic manipulators [B25J](#); hydraulic or pneumatic tipping devices for vehicles [B60P 1/00](#) ; hydraulic or pneumatic remote control for railway signals [B61L 7/04](#) ; hydraulic or pneumatic mine supports [E21D 15/44](#)); motors, turbines, compressors, blowers, pumps [F01](#) to [F04](#); {fluid signal amplifiers, relays [F15C](#) } ; fluid dynamics [F15D](#); fluid clutches or brakes [F16D](#); fluid springs [F16F](#); fluid gearing [F16H](#); pistons, cylinders packing [F16J](#); valves, taps, cocks, actuating-floats [F16K](#); safety valves with auxiliary fluid operation of the main valve [F16K 17/10](#) ; fluid-operating means for valves [F16K 31/12](#) ; pipes, pipe joints [F16L](#); lubricating [F16N](#))

NOTE

In this subclass, the following terms are used with the meaning stated:

- "Telemotor" means a system or device in which a substantially constant amount of fluid is trapped between an input member and an output member to act as a fluid link;

- "Servomotor" means a fluid-pressure actuator, e.g. a piston and cylinder, directly controlled by a valve or other device

which is responsive to operation of an initial controlling member; "Servomotor" does not cover a telemotor. The initial

controlling member may be adjacent to the servomotor or at a distance, and may be, for example a hand lever.

U F16D 1/08	• • with clamping hub; with hub and longitudinal key
F16D 1/0805	• • {with radial clamping due to deformation of a resilient body or a body of fluid (- F16D 1/091 takes precedence; elastic couplings F16D 3/80 ; fluid pressure clutches F16D 25/04 -)}
F16D 1/0817	• • {with radial clamping due to rotation along an eccentric surface, e.g. arcuate wedging elements (-similar clutches F16D 17/00 ; similar free-wheel clutches F16D 41/06 -)}
F16D 1/0823	• • {with radial clamping of a helical wrap spring on the shaft or in the hub bore (-similar clutches F16D 13/025 , F16D 13/08 , F16D 27/025 , F16D 27/105 ; similar slip couplings F16D 7/022 ; similar free-wheel clutches F16D 41/206 -)}
F16D 1/0829	• • {with radial loading of both hub and shaft by an intermediate ring or sleeve (- F16D 1/0817 , F16D 1/0823 , F16D 1/093 take precedence-)}
F16D 1/0852	• • {with radial clamping between the mating surfaces of the hub and shaft (- F16D 1/0805 to F16D 1/0817 , F16D 1/09 take precedence-)}
F16D 1/0858	• • • {due to the elasticity of the hub (<i>including shrink fits</i>)}(including shrink fits)
F16D 1/09	• • with radial clamping due to axial loading of at least one pair of conical surfaces{(-tapered keys F16D 1/0882 -)}
F16D 2001/0906	• • • {-using a hydraulic fluid to clamp or disconnect, not provided for in F16D 1/091 -}
F16D 1/093	• • • using one or more elastic segmented conical rings forming at least one of the conical surfaces, the rings being expanded or contracted to effect clamping (- F16D 1/091 takes precedence-)
F16D 1/095	• • • • with clamping effected by ring contraction only{(-for connecting two abutting shafts F16D 1/02 -)}
U F16D 1/10	• Quick-acting couplings in which the parts are connected by simply bringing them together axially
U F16D 1/108	• • having retaining means rotating with the coupling and acting by interengaging parts, i.e. positive coupling
F16D 1/116	• • the interengaging parts including a continuous or interrupted circumferential groove in the surface of one of the coupling parts (-circlips for retaining hubs on shafts F16B 21/18 -)
F16D 1/12	• allowing adjustment of the parts about the axis (-during motion F16D 3/10 -)
F16D 3/00	Yielding couplings, i.e. with means permitting movement between the connected parts during the drive (-couplings disconnectable simply by axial movement F16D 1/10 ; slip couplings F16D 7/00-)
F16D 3/02	• adapted to specific functions (universal joints, see the appropriate groups)

- F16D 3/12
 - • specially adapted for accumulation of energy to absorb shocks or vibration (by making use of fluid elements [F16D 3/80](#)-)
- U F16D 3/16
 - Universal joints in which flexibility is produced by means of pivots or sliding or rolling connecting parts
- F16D 3/20
 - • one coupling part entering a sleeve of the other coupling part and connected thereto by sliding or rolling members (F16D 3/18 , [F16D 3/24](#) take precedence-)
- NOTE
 "coupling parts" means the driving member and the driven member of the coupling to be mounted on and rotate as a unit with the shafts or their equivalents between which the coupling is placed. An intermediate member interconnecting these parts is regarded as such an equivalent.
- U F16D 3/22
 - • the rolling members being balls, rollers, or the like, guided in grooves or sockets in both coupling parts
- U F16D 3/223
 - • • the rolling members being guided in grooves in both coupling parts
- F16D 3/229
 - • • • Prismatic coupling parts having each groove centre-line lying on planes parallel to the axis of the respective coupling part (F16D 3/224 , [F16D 3/226](#) take precedence-)
- F16D 3/26
 - • Hooke's joints or other joints with an equivalent intermediate member to which each coupling part is pivotally or slidably connected (F16D 3/18 , [F16D 3/20](#) take precedence-)
- F16D 3/38
 - • with a single intermediate member with trunnions or bearings arranged on two axes perpendicular to one another (F16D 3/36 takes precedence-)
- U F16D 3/382
 - • • {constructional details of other than the intermediate member}
- F16D 3/385
 - • • • {Bearing cup; Bearing construction; Bearing seal; Mounting of bearing on the intermediate member (mounting of bearing in fork [F16D 3/382](#)-)}
- F16D 3/50
 - with the coupling parts connected by one or more intermediate members (F16D 3/16 takes precedence-)
- F16D 3/60
 - • comprising pushing or pulling links attached to both parts (F16D 3/64 takes precedence-)
- F16D 3/72
 - • with axially-spaced attachments to the coupling parts (F16D 3/56 takes precedence-)
- F16D 3/725
 - • {with an intermediate member made of fibre-reinforced resin (made of rubber-like material [F16D 3/74](#) ; shafts made of fibre-reinforced resin [F16C 3/026](#)-)}
- F16D 3/74
 - • the intermediate member or members being made of rubber or other {rubber-like} flexible material
- F16D 3/80
 - in which a fluid is used (fluid couplings allowing continuous slip [F16D 31/00](#) to [F16D 35/00](#)-)
- F16D 3/82
 - • with a coupling element in the form of a pneumatic tube (similar clutches [F16D 25/04](#)-)
- F16D 7/00**
Slip couplings, e.g. slipping on overload, for absorbing shock (combined with yielding shaft couplings [F16D 3/14](#) ; fluid slip couplings [F16D 31/00](#) to [F16D 35/00](#)-)
- F16D 7/02
 - of the friction type (couplings in which overload initiates a decrease of coupling pressure or a disconnection, see the relevant groups for clutches{ e.g. for friction overload clutches [F16D 43/21](#) })
- F16D 7/021
 - {with radially applied torque-limiting friction surfaces (F16D 7/022 takes precedence-)}

F16H

GEARING{~~steering of motor vehicles by differentially driving ground-engaging elements on opposite vehicle sides [B62D 11/02](#)~~}

NOTE

1. Combinations including mechanical gearings are classified in groups [F16H 37/00](#) or [F16H 47/00](#) , unless they are provided for in groups [F16H 1/00](#) to [F16H 35/00](#) .
2. In this subclass, sets of rigidly-connected members are regarded as single members.
3. In this subclass, the following terms or expressions are used with the meanings indicated:
 - "toothed gearing" includes worm gearing and other gearing involving at least one wheel or sector provided with teeth or the equivalent, EXCEPT gearing with chains or toothed belts, which is treated as friction gearing;
 - "conveying motion" includes transmitting energy, and means that the applied and resultant motions are of the same kind, though they may differ in, e.g. speed, direction extent:
 - "rotary" implies that the motion may continue indefinitely;
 - "oscillating" means moving about an axis to an extent which is limited by the construction of the gearing, and which may exceed one revolution, the movement being alternately forwards and backwards during continued operation of the gearing;
 - "reciprocating" means moving substantially in a straight line, the movement being alternately forwards and backwards during continued operation of the gearing;
 - "reversing" or "reversal" means that an applied movement in one direction may produce a resultant movement in either of two opposed directions at will;

- "central gears" includes any gears whose axis is the main axis of the gearing. Attention is drawn to the following places:

[A01D 69/06](#) Gearings in harvesting machines
[A63H 31/00](#) Gearing for toys
[B21B 35/12](#) Toothed-wheel gearing for metal-rolling mills

- • • Valve seats ~~(-for double-seat valves [F16K 1/44](#)-)~~

WARNING

Subgroups of [F16K 1/42](#) are not complete pending a reorganisation, see also [F16K 1/42](#)]

F16K 3/00		Gate valves or sliding valves, i.e. cut-off apparatus with closing members having a sliding movement along the seat for opening and closing (F16K 5/00 takes precedence; in barrages or weirs E02B 8/04)
U	F16K 3/02	• with flat sealing faces; Packings therefor
U	F16K 3/04	• • with pivoted closure members
	F16K 3/06	• • • in the form of closure plates arranged between supply and discharge passages (F16K 3/10 takes precedence)
	F16K 3/16	• • with special arrangements for separating the sealing faces or for pressing them together (F16K 3/10 , F16K 3/14 take precedence)
	F16K 3/22	• with sealing faces shaped as surfaces of solids of revolution (F16K 13/02 takes precedence; with resilient valve members F16K 3/28)
U	F16K 3/24	• • with cylindrical valve members
	F16K 3/243	• • • {Packings} (F16K 3/246 takes precedence)}
U	F16K 3/26	• • • with fluid passages in the valve member
	F16K 3/267	• • • • {Combination of a sliding valve and a lift valve} (F16K 3/262 , F16K 3/265 take precedence)}
F16K 5/00		{Plug valves;}Taps or cocks comprising only cut-off apparatus having at least one of the sealing faces shaped as a more or less complete surface of a solid of revolution, the opening and closing movement being predominantly rotary (taps of the lift-valve type F16K 1/00)
F16K 7/00		Diaphragm {valves or}cut-off apparatus, e.g. with a member deformed, but not moved bodily, to close the passage (container gates or closures operating by deformation of flexible walls B65D 90/56 ; means for plugging pipes or hoses F16L 55/10){Pinch valves}
U	F16K 7/02	• with tubular diaphragm
U	F16K 7/04	• • constrictable by external radial force
	F16K 7/06	• • • by means of a screw-spindle, cam, or other mechanical means(F16K 7/045 takes precedence)}
U	F16K 11/00	Multiple-way valves, e.g. mixing valves; Pipe fittings incorporating such valves
U	F16K 11/02	• with all movable sealing faces moving as one unit
U	F16K 11/06	• • comprising only sliding valves,{i.e. sliding closure elements}
U	F16K 11/065	• • • with linearly sliding closure members
U	F16K 11/07	• • • • with cylindrical slides
	F16K 11/0716	• • • • • {with fluid passages through the valve member}(F16K 11/0704 , F16K 11/0708 , F16K 11/0712 take precedence)}
U	F16K 11/078	• • • with pivoted and linearly movable closure members
U	F16K 11/0782	• • • • {Single-lever operated mixing valves with closure members having flat sealing faces}
	F16K 11/0787	• • • • • {with both the supply and the discharge passages being on the same side of the closure members}(F16K 11/0785 takes precedence)}
U	F16K 11/10	• with two or more closure members not moving as an unit
	F16K 11/14	• • operated by one actuating member, e.g. a handle (with one plug turning in another F16K 11/12)
	F16K 11/20	• • operated by separate actuating members (with one plug turning in another F16K 11/12)
F16K 13/00		Other constructional types of cut-off apparatus (means for plugging pipes or hoses F16L 55/10); Arrangements for cutting-off

F16K 13/08	• Arrangements for cutting-off {not used}
F16K 15/00	Check valves {(-valves specially adapted for inflatable balls A63B 41/00 -)}
U F16K 15/02	• with guided rigid valve members
F16K 15/021	• • {the valve member being a movable body around which the medium flows when the valve is open {(- F16K 15/025 to F16K 15/12 take precedence-)}} <u>WARNING</u> not yet complete
F16K 15/025	• • {the valve being loaded by a helicoidal spring {(- F16K 15/03 to F16K 15/12 take precedence-)}}}
U F16K 15/03	• • with a hinged closure member
F16K 15/031	• • • {the hinge being flexible {(- F16K 15/035 takes precedence-)}}}
F16K 15/033	• • • {spring-loaded {(- F16K 15/035 takes precedence-)}}}
U F16K 15/04	• • shaped as balls
F16K 15/044	• • • {spring-loaded {(- F16K 15/042 takes precedence-)}}}
U F16K 15/18	• with actuating mechanism; Combined check valves and actuated valves
F16K 15/181	• • {for check valves with a hinged closure member {(- F16K 15/188 takes precedence-)}}}
F16K 15/183	• • {for ball check valves {(- F16K 15/186 , F16K 15/188 take precedence-)}}}
F16K 15/185	• • {for check valves with flexible valve members {(- F16K 15/188 takes precedence-)}}}
F16K 15/20	• specially designed for inflatable bodies, e.g. tyres {(-connecting valves to inflatable bodies B60C 29/00 -)}
U F16K 17/00	Safety valves; Equalising valves,{e.g. pressure relief valves}
F16K 17/02	• opening on surplus pressure on one side; closing on insufficient pressure on one side {(-check valves F16K 15/00 -)}
U F16K 17/14	• • with fracturing member
U F16K 17/16	• • • with fracturing diaphragm;{Rupture discs}
F16K 17/1606	• • • • {of the reverse-buckling-type {(- F16K 17/1633 takes precedence-)}}}
F16K 17/162	• • • • {of the non reverse-buckling-type {(- F16K 17/1633 takes precedence-)}}}
U F16K 17/18	• opening on surplus pressure on either side
F16K 17/19	• • Equalising valves predominantly for tanks{ when combined with safety valve by change of position F16K 17/36 -}
F16K 17/20	• Excess-flow valves {(-actuated in consequence of shock or similar extraneous influence F16K 17/36 -)}
U F16K 17/22	• • actuated by the difference of pressure between two places in the flow line
U F16K 17/24	• • • acting directly on the cutting-off member
U F16K 17/28	• • • • operating in one direction only
F16K 17/285	• • • • • {the cutting-off member being a ball {(- F16K 17/30 takes precedence-)}}}
U F16K 17/36	• actuated in consequence of extraneous circumstances, e.g. shock, change of position
F16K 17/363	• • {the closure members being rotatable or pivoting {(- F16K 17/386 takes precedence-)}}}
F16K 17/366	• • {the closure member being a movable ball {(- F16K 17/38 takes precedence-)}}} <u>WARNING</u> not yet complete, see also F16K 17/36

- U F16K 17/38
 - • of excessive temperature
- F16K 17/383
 - • • {the valve comprising fusible, softening or meltable elements, e.g. used as link, blocking element, seal, closure plug (~~-F16K 17/386~~ takes precedence-)}
- F16K 17/40
 - with a fracturing member, e.g. fracturing diaphragm, glass, fusible joint (~~-valves opening on surplus pressure F16K 17/14-~~)

REFRIGERATORS; COLD ROOMS; ICE-BOXES; COOLING OR FREEZING APPARATUS NOT COVERED BY ANY OTHER SUBCLASS (-refrigerated show cases [A47F 3/04](#) ; thermally-insulated vessels for domestic use [A47J 41/00](#) ; refrigerated vehicles, see the appropriate subclasses of classes [B60](#) to [B64](#) ; containers with thermal insulation in general [B65D 81/38](#) ; heat-transfer, heat-exchange or heat-storage materials, e.g. refrigerants, or materials for the production of heat or cold by chemical reactions other than by combustion [C09K 5/00](#) ; thermally-insulated vessels for liquefied or solidified gases [F17C](#) ; air-conditioning or air-humidification [F24F](#) ; refrigeration machines, plants or systems [F25B](#) ; cooling of instruments and comparable apparatus without refrigeration [G12B](#) ; cooling of engines or pumps, see the relevant classes-)

NOTES

In this subclass, the following term is used with the meaning indicated:

- "device" means an enclosed space to be cooled; such devices being associated either with refrigerating machinery, e.g. in a refrigerator, or with other cold sources, e.g. in an ice-box.

Attention is drawn to Note (2) following the title of subclass [F24F](#) .

- F25J 3/04096 {-of argon or argon enriched stream}
- F25J 3/04103 {-using solely hydrostatic liquid head}
- F25J 3/04109 . . . {-Arrangements of compressors and /or their drivers (using work extraction by mechanical coupling of compression and cold expansion [F25J 3/04381](#))}
- F25J 3/04115 {-characterised by the type of prime driver e.g. hot gas expander}
- F25J 3/04121 {-Steam turbine as the prime mechanical driver}
- F25J 3/04127 {-Gas turbine as the prime mechanical driver}
- F25J 3/04133 {-Electrical motor as the prime mechanical driver}
- F25J 3/04139 {-Combination of different types of drivers mechanically coupled to the same compressor, possibly split on multiple compressor casings}
- F25J 3/04145 {-Mechanically coupling of different compressors of the air fractionation process to the same driver(s)}
- F25J 3/04151 . . . {-Purification and (pre-)cooling of the feed air; recuperative heat-exchange with product streams (not used)}
- F25J 3/04157 {-Afterstage cooling and so-called "pre-cooling" of the feed air upstream the air purification unit and main heat exchange line ([F25J 3/04618](#) takes precedence)}
- F25J 3/04163 {-Hot end purification of the feed air (arrangements of cold regenerators [F25J 5/00](#))}
- F25J 3/04169 {-by adsorption of the impurities (adsorption in general [B01D 53/02](#))}
- F25J 3/04175 {-at a pressure of substantially more than the highest pressure column}
- F25J 3/04181 {-Regenerating the adsorbents}

- F25J 3/04187 {-Cooling of the purified feed air by recuperative heat-exchange; Heat-exchange with product streams (arrangements of cold exchangers [F25J 5/002](#))}
- F25J 3/04193 {-Division of the main heat exchange line in consecutive sections having different functions}
- F25J 3/042 {-having an intermediate feed connection}
- F25J 3/04206 {-including a so-called "auxiliary vaporiser" for vaporising and producing a gaseous product}
- F25J 3/04212 {-and simultaneously condensing vapor from a column serving as reflux within the or another column}
- F25J 3/04218 {-Parallel arrangement of the main heat exchange line in cores having different functions e.g. in low pressure and high pressure cores ([F25J 3/04503](#) takes precedence)}
- F25J 3/04224 {-Cores associated with a liquefaction or refrigeration cycle}
- F25J 3/0423 {-Subcooling of liquid process streams}
- F25J 3/04236 {-Integration of different exchangers in a single core, so-called integrated cores ([F25J 3/04624](#) takes precedence)}
- F25J 3/04242 {-Cold end purification of the feed air}
- F25J 3/04248 . . . {-Generation of cold for compensating heat leaks or liquid production, e.g. by Joule-Thompson expansion}
- F25J 3/04254 {-using the cold stored in external cryogenic fluids (closed loop [F25J 3/04278](#))}
- F25J 3/0426 {-The cryogenic component does not participate in the fractionation}
- F25J 3/04266 {-and being liquefied hydrocarbons}
- F25J 3/04272 {-and comprising means for reducing the risk of pollution of hydrocarbons into the air fractionation}
- F25J 3/04278 {-using external refrigeration units, e.g. closed mechanical or regenerative refrigeration units}
- F25J 3/04284 {-using internal refrigeration by open-loop gas work expansion, e.g. of intermediate or oxygen enriched (waste-)streams ([F25J 3/04333](#) takes precedence)}
- F25J 3/0429 {-of feed air, e.g. used as waste or product air or expanded into an auxiliary column}
- F25J 3/04296 {-Claude expansion, i.e. expanded into the main or high pressure column}
- F25J 3/04303 {-Lachmann expansion, i.e. expanded into oxygen producing or low pressure column}
- F25J 3/04309 {-of nitrogen}
- F25J 3/04315 {-Lowest pressure or impure nitrogen, so-called waste nitrogen expansion}
- F25J 3/04321 {-of oxygen}
- F25J 3/04327 {-of argon or argon enriched stream}
- F25J 3/04333 {-using quasi-closed loop internal vapor compression refrigeration cycles, e.g. of intermediate or oxygen enriched (waste-)streams}
- F25J 3/04339 {-of air}
- F25J 3/04345 {-and comprising a gas work expansion loop}
- F25J 3/04351 {-of nitrogen}
- F25J 3/04357 {-and comprising a gas work expansion loop}
- F25J 3/04363 {-of oxygen}

F25J 3/04369 {-of argon or argon enriched stream}
F25J 3/04375 {-Details relating to the work expansion, e.g. process parameter etc.}
F25J 3/04381 {-using work extraction by mechanical coupling of compression and expansion so-called companders}
F25J 3/04387 {-using liquid or hydraulic turbine expansion}
F25J 3/04393 {-using multiple or multistage gas work expansion}
F25J 3/044	. . . {-using a single pressure main column system only (F25J 3/0446 , F25J 3/04624 , F25J 3/04636 take precedence)}
F25J 3/04406	. . . {-using a dual pressure main column system (F25J 3/0446 , F25J 3/04624 , F25J 3/04636 and F25J 3/04715 take precedence)(not used)}
F25J 3/04412 {-in a classical double column flowsheet, i.e. with thermal coupling by a main reboiler-condenser in the bottom of low pressure respectively top of high pressure column}
F25J 3/04418 {-with thermally overlapping high and low pressure columns}
F25J 3/04424 {-without thermally coupled high and low pressure columns, i.e. a so-called split columns}
F25J 3/0443 {-A main column system not otherwise provided, e.g. a modified double column flowsheet}
F25J 3/04436	. . . {-using at least a triple pressure main column system (F25J 3/0446 , F25J 3/04624 , F25J 3/04636 and F25J 3/04715 take precedence)(not used)}
F25J 3/04442 {-in a double column flowsheet with a high pressure pre-rectifier}
F25J 3/04448 {-in a double column flowsheet with an intermediate pressure column}
F25J 3/04454 {-a main column system not otherwise provided, e.g. serially coupling of columns or more than three pressure levels}
U F25J 3/0446	. . . {-using the heat generated by mixing two different phases}
F25J 3/04466 {-for producing oxygen as a mixing column overhead gas by mixing gaseous air feed and liquid oxygen}
F25J 3/04472	. . . {-using the cold from cryogenic liquids produced within the air fractionation unit and stored in internal or intermediate storages (not used)}
F25J 3/04478 {-for controlling purposes, e.g. start-up or back-up procedures (F25J 3/04496 takes precedence)}
F25J 3/04484 {-for purity control during steady state operation}
F25J 3/0449 {-for rapid load change of the air fractionation unit}
F25J 3/04496 {-for compensating variable air feed or variable product demand by alternating between periods of liquid storage and liquid assist}
F25J 3/04503 {-by exchanging "cold" between at least two different cryogenic liquids, e.g. independently from the main heat exchange line of the air fractionation and/or by using external alternating storage systems}
F25J 3/04509 {-within the cold part of the air fractionation, i.e. exchanging "cold" within the fractionation and/or main heat exchange line}
F25J 3/04515 {-Simultaneously changing air feed and products output}
F25J 3/04521	. . . {-Coupling of the air fractionation unit to an air gas-consuming unit, so-called integrated processes (combined plants, e.g. engine plant combined with an industrial process F01K 23/064 ; gas-turbine plants supplying working fluid to a chemical process F02C 6/10)(not used)}
F25J 3/04527 {-Integration with an oxygen consuming unit, e.g. glass facility, waste incineration or oxygen based processes in general}
F25J 3/04533 {-for the direct combustion of fuels in a power plant, so-called "oxyfuel combustion"}

F25J 3/04539	• • • • {for the H ₂ /CO synthesis by partial oxidation or oxygen consuming reforming processes of fuels}
F25J 3/04545	• • • • • {-for the gasification of solid or heavy liquid fuels, e.g. integrated gasification combined cycle (IGCC)}
F25J 3/04551	• • • • • {-for the metal production}
F25J 3/04557	• • • • • {-for pig iron or steel making e.g. blast furnace, Corex}
F25J 3/04563	• • • • {-Integration with an nitrogen consuming unit, e.g. for purging, inerting, cooling or heating}
F25J 3/04569	• • • • • {-for enhanced or tertiary oil recovery}
F25J 3/04575	• • • • • {-for a gas expansion plant e.g. dilution of the combustion gas in a gas turbine}
F25J 3/04581	• • • • • {-Hot gas expansion of indirect heated nitrogen}
F25J 3/04587	• • • • • {-for the NH ₃ synthesis e.g. for adjusting the H ₂ /N ₂ ratio}
F25J 3/04593	• • • • {-The air gas consuming unit is also fed by an air stream}
F25J 3/046	• • • • • {-Completely integrated air feed compression, i.e. common MAC}
F25J 3/04606	• • • • • {-Partially integrated air feed compression, i.e. independent MAC for the air fractionation unit plus additional air feed from the air gas consuming unit}
F25J 3/04612	• • • • {-Heat exchange integration with process streams, e.g. from the air gas consuming unit}
F25J 3/04618	• • • • • {-for cooling an air stream fed to the air fractionation unit}
F25J 3/04624	• • • {-using integrated mass and heat exchange, so-called non-adiabatic rectification, e.g. dephlegmator, reflux exchanger}
F25J 3/0463	• • • • {-Simultaneously between rectifying and stripping sections, i.e. double dephlegmator}
F25J 3/04636	• • • {-using a hybrid air separation unit, e.g. combined process by cryogenic separation and non-cryogenic separation techniques (F25J 3/04733 and F25J 3/04757 take precedence)}
F25J 3/04642	• • • {-Recovering noble gases from air (from gas mixtures other than air F25J 3/028 or F25J 3/0685)}
U F25J 3/04648	• • • • [argon (not used)]
F25J 3/04654	• • • • • {-Producing crude argon in a crude argon column}
F25J 3/0466	• • • • • • {-as a parallel working rectification column or auxiliary column system in a single pressure main column system}
F25J 3/04666	• • • • • • {-as a parallel working rectification column of the low pressure column in a dual pressure main column system}
F25J 3/04672	• • • • • • • {-having a top condenser}
F25J 3/04678	• • • • • • • {-cooled by oxygen enriched liquid from high pressure column bottoms}
F25J 3/04684	• • • • • • • • {-and a bottom re-boiler (F25J 3/04696 takes precedence)}
F25J 3/0469	• • • • • • • • {-and an intermediate re-boiler/condenser (F25J 3/04696 takes precedence)}
F25J 3/04696	• • • • • • • • • {-a bottom re-boiler and an intermediate re-boiler/condenser}
F25J 3/04703	• • • • • • • • • {-being arranged in more than one vessel}
F25J 3/04709	• • • • • • • {-as an auxiliary column system in at least a dual pressure main column system}
F25J 3/04715	• • • • • • • • {-The auxiliary column system simultaneously produces oxygen}
F25J 3/04721	• • • • • • • {-Producing pure argon, e.g. recovered from a crude argon column}

- F25J 3/04727 {-using an auxiliary pure argon column for nitrogen rejection ([F25J 3/04739](#) takes precedence)}
- F25J 3/04733 {-using a hybrid system, e.g. using adsorption, permeation or catalytic reaction}
- F25J 3/04739 {-in combination with an auxiliary pure argon column}
- F25J 3/04745 {-Krypton and/or Xenon}
- F25J 3/04751 {-Producing pure krypton and/or xenon recovered from a crude krypton/xenon mixture}
- F25J 3/04757 {-using a hybrid system, e.g. using adsorption, permeation or catalytic reaction}
- F25J 3/04763 . . . {-Start-up or control of the process; Details of the apparatus used (not used)}
- F25J 3/04769 {-Operation, control and regulation of the process; Instrumentation within the process}
- F25J 3/04775 {-Air purification and pre-cooling}
- F25J 3/04781 {-Pressure changing devices, e.g. for compression, expansion, liquid pumping}
- F25J 3/04787 {-Heat exchange, e.g. main heat exchange line; Subcooler, external reboiler-condenser ([F25J 3/04793](#) and [F25J 3/0486](#) take precedence)}
- F25J 3/04793 {-Rectification, e.g. columns; Reboiler-condenser ([F25J 3/0486](#) takes precedence)}
- F25J 3/048 {-Argon recovery}
- F25J 3/04806 {-High purity argon purification}
- F25J 3/04812 {-Different modes, i.e. "runs" of operation ([F25J 3/04472](#) takes precedence)}
- F25J 3/04818 {-Start-up of the process}
- F25J 3/04824 {-Stopping of the process, e.g. defrosting or deriming; Back-up procedures}
- F25J 3/0483 {-Rapid load change of the air fractionation unit}
- F25J 3/04836 {-Variable air feed, i.e. "load" or product demand during specified periods e.g. during periods with high respectively low power costs ([F25J 3/0483](#) takes precedence)}
- F25J 3/04842 {-Intermittent process, so-called batch process}
- F25J 3/04848 {-Control strategy, e.g. advanced process control or dynamic modeling}
- F25J 3/04854 {-Safety aspects of operation}
- F25J 3/0486 {-of vaporisers for oxygen enriched liquids, e.g. purging of liquids}
- F25J 3/04866 {-Construction and layout of air fractionation equipments, e.g. valves, machines ([F25J 5/00](#) takes precedence)}
- F25J 3/04872 {-Vertical layout of cold equipments within in the cold box, e.g. columns, heat exchangers etc.}
- F25J 3/04878 {-Side by side arrangement of multiple vessels in a main column system, wherein the vessels are normally mounted one upon the other or forming different sections of the same column (multiple vessels of a crude argon column [F25J 3/04703](#))}
- F25J 3/04884 {-Arrangement of reboiler-condensers}
- F25J 3/0489 {-Modularity and arrangement of parts of the air fractionation unit, in particular of the cold box, e.g. pre-fabrication, assembling and erection, dimensions, horizontal layout "plot" ([F25J 3/04872](#) takes precedence)}
- F25J 3/04896 {-Details of columns, e.g. internals, inlet/outlet devices}

F25J 3/04903 {-Plates or trays}
F25J 3/04909 {-Structured packings}
F25J 3/04915 {-Combinations of different material exchange elements, e.g. within different columns}
F25J 3/04921 {-within the same column}
F25J 3/04927 {-Liquid or gas distribution devices}
F25J 3/04933 {-Partitioning walls or sheets}
F25J 3/04939 {-Vertical, e.g. dividing wall columns (details of dephlegmators F25J 5/007)}
F25J 3/04945 {-Details of internal structure; insulation and housing of the cold box}
F25J 3/04951 {-Arrangements of multiple air fractionation units or multiple equipments fulfilling the same process step, e.g. multiple trains in a network (F25J 3/04636 takes precedence)}
F25J 3/04957 {-and inter-connecting equipments upstream of the fractionation unit (s), i.e. at the "front-end"}
F25J 3/04963 {-and inter-connecting equipment within or downstream of the fractionation unit(s) (F25J 3/04393 takes precedence)}
F25J 3/04969 {-Retrofitting or revamping of an existing air fractionation unit}
F25J 3/04975 {-adapted for special use of the air fractionation unit, e.g. transportable devices by truck or small scale use}
F25J 3/04981 {-for portable medical or home use}
F25J 3/04987 {-for offshore use}
F25J 3/04993 {-for space applications, e.g. for rocket use}
U F25J 3/06	. by partial condensation (F25J 3/08 takes precedence; by rectification F25J 3/02 ; { purification of hydrocarbons in general C07C 7/00 ; (not used))}
F25J 3/0605	. . {-characterised by the feed stream (for air F25J 3/04)(not used)}
F25J 3/061	. . . {-Natural gas or substitute natural gas}
F25J 3/0615 {-Liquefied natural gas}
F25J 3/062	. . . {-Refinery gas, cracking gas, coke oven gas, gaseous mixtures containing aliphatic unsaturated C _n H _m or gaseous mixtures of undefined nature}
F25J 3/0625	. . . {-H ₂ /CO mixtures, i.e. synthesis gas; Water gas or shifted synthesis gas-(production of carbon monoxide containing gas in general C01B 31/18 , C10J , C10K ; production of hydrogen containing gas C01B 3/00)}
F25J 3/063	. . {-characterised by the separated product stream (not used)}
F25J 3/0675	. . . {-separation of H ₂ /CO mixtures, i.e. of synthesis gas-(production of carbon monoxide containing gas in general C01B 31/18 , C10J , C10K , production of hydrogen containing gas C01B 3/00)}
F25J 3/068	. . . {-separation of H ₂ /N ₂ mixtures, i.e. of ammonia synthesis gas-(in general C01B 3/00)}
F25J 3/0685	. . . {-separation of noble gases (from air F25J 3/04642 ; in general C01B 23/00)}
F25J 3/069 {-of helium}
F25J 3/0695	. . {-Start-up or control of the process; Details of the apparatus used}
U F25J 5/00	Arrangements of cold exchangers or cold accumulators in separation or liquefaction plants (heat exchangers F28C, F28D, F28F)
F25J 5/002	. {-for continuously recuperating cold, i.e. in a so-called recuperative heat exchanger}
F25J 5/005	. . {-in a reboiler-condenser e.g. within a column}

- F25J 5/007 • • {-combined with mass exchange, i.e. in a so-called dephlegmator}
- U F25J 2235/00** **Processes or apparatus involving steps for increasing the pressure or for conveying of liquid process streams (not used)**
- F25J 2235/52 • the fluid being oxygen enriched compared to air ("~~crude oxygen~~")(~~"crude oxygen"~~)
- F25J 2235/60 • the fluid being (~~a mixture of~~) ~~hydrocarbons~~(~~a mixture of~~) ~~hydrocarbons~~
- U F25J 2240/00** **Processes or apparatus involving steps for expanding of process streams (not used)**
- F25J 2240/02 • Expansion of a process fluid in a work-extracting turbine (~~i.e. isentropic expansion~~), ~~e.g. of the feed stream~~(~~i.e. isentropic expansion~~), ~~e.g. of the feed stream~~

Project: N/A (F26B)**F26B**

DRYING SOLID MATERIALS OR OBJECTS BY REMOVING LIQUID THEREFROM (-racks for drying fruit and vegetables [A01F 25/12](#) ; drying foodstuffs [A23](#); drying hair [A45D 20/00](#) ; body-drying implements [A47K 10/00](#) ; drying household articles [A47L](#), { e.g. drying footwear [A47L 23/20](#) ; } drying gases and vapours [B01D](#); chemical and physical processes for dewatering or like separating liquids from solids [B01D 43/00](#) ; centrifugal apparatus [B04](#); drying ceramics [C04B 33/30](#) ; drying yarns and fabrics in association with some other form of treatment [D06C](#); drying frames for laundry without heating or positive air circulation, domestic and like spin-dryers, wringing and hot pressing laundry [D06F](#); furnaces, kilns, ovens [F27](#); { treatment including a drying step of semiconductor substrates, e.g. wafers, [H01L 21/67028](#) })

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

F26B 11/06	covered by	F26B 11/0486
F26B 13/02	covered by	F26B 13/10
F26B 13/04	covered by	F26B 13/10
F26B 13/20	covered by	F26B 13/104
F26B 23/08	covered by	F26B 3/343
F26B 3/347		

- F26B 1/00** **Preliminary treatment of solid materials or objects to facilitate drying,{e.g. mixing or backmixing the materials to be dried with predominantly dry solids(-[F26B 5/005](#) takes precedence-)}**
- F26B 1/005 • {by means of desintegrating, e.g. crushing, shredding, milling the materials to be dried (-[F26B 17/102](#) , [F26B 17/103](#) take precedence-)}
- F26B 3/00** **Drying solid materials or objects by processes involving the application of heat (-in specific machines or apparatus [F26B 9/00](#) to [F26B 19/00](#)-)**
- F26B 3/02 • by convection, i.e. heat being conveyed from a heat source to the materials or objects to be dried by a gas or vapour, e.g. air{(-[F26B 3/283](#) and [F26B 3/343](#) take precedence-)}
- F26B 3/04 • • the gas or vapour circulating over or surrounding the materials or objects to be dried (-[F26B 3/14](#) takes precedence-)
- F26B 3/06 • • the gas or vapour flowing through the materials or objects to be dried (-[F26B 3/14](#) takes precedence-)
- F26B 3/08 • • • so as to loosen them, e.g. to form a fluidised bed{(-"fluidised-bed" technique in general [B01J 8/24](#) ; centrifugal fluidised beds [F26B 7/007](#)-)}

- F26B 3/082
 - • • {arrangements of devices for distributing fluidising gas, e.g. grids, nozzles (~~F26B 3/0926~~ takes precedence; such devices per se [B01J 8/44](#))}
- U F26B 3/10
 - • the gas or vapour carrying the materials or objects to be dried with it
- F26B 3/12
 - • • in the form of a spray, {i.e. sprayed or dispersed emulsions or suspensions (~~spray drying of solutions~~ [B01D 1/18](#))}
- U F26B 3/18
 - by conduction, i.e. the heat is conveyed from the heat source, e.g. gas flame, to the materials or objects to be dried by direct contact
- F26B 3/20
 - • the heat source being a heated surface {e.g. a moving belt or conveyer} (~~F26B 3/22~~ takes precedence)
- U F26B 3/22
 - • the heat source and the materials or objects to be dried being in relative motion, e.g. of vibration
- F26B 3/225
 - • • {the materials or objects to be dried being immersed in a fluidised bed of heated particles} (~~for webs~~ [F26B 13/106](#))
- U F26B 3/28
 - by radiation, e.g. from the sun
- F26B 3/30
 - • from infra-red-emitting elements {(~~by radiation emanating from passages containing heated fluids other than combustion gases~~ [F26B 23/10](#))}
- U F26B 3/32
 - by development of heat within the materials or objects to be dried, {e.g. by fermentation or other microbiological action}
- F26B 3/36
 - • by using mechanical effects, e.g. by friction (~~by using ultrasonic vibrations~~ [F26B 5/02](#))
- F26B 5/00**

Drying solid materials or objects by processes not involving the application of heat (~~separating liquids from solids by straining~~ [B01D](#) ; replacing liquids in wet solids by other liquids, e.g. water by spirit, [B01D 12/00](#) ; drying by electrophoresis [B01J](#))
- F26B 5/005
 - {by dipping them into or mixing them with a chemical liquid, e.g. organic; chemical, e.g. organic, dewatering aids (~~F26B 3/005~~ takes precedence; using chemical vapours or gases [F26B 21/14](#))}
- F26B 5/02
 - by using ultrasonic vibrations {(~~using sonic energy generated by pulse jet combustion~~ [F26B 23/026](#))}
- F26B 5/04
 - by evaporation or sublimation of moisture under reduced pressure, e.g. in a vacuum {(~~F26B 11/049~~ and [F26B 17/128](#) take precedence)}
- NOTE**

In subgroups [F26B 5/04](#) and [F26B 5/06](#) , the term "not including the application of heat" is disregarded for classification purposes. When drying with the use of vacuum, frequently heat is applied to compensate for the cooling effect or to promote sublimation from the frozen state
- F26B 5/044
 - • {for drying materials in a batch operation in an enclosure having a plurality of shelves which may be heated (~~F26B 5/045~~ takes precedence)}
- F26B 7/00**

Drying solid materials or objects by processes using a combination of processes not covered by a single one of groups [F26B 3/00](#) and [F26B 5/00](#) {(~~F26B 1/005~~ , [F26B 5/04](#) , [F26B 23/026](#) take precedence)}
- F26B 9/00**

Machines or apparatus for drying solid materials or objects at rest or with only local agitation; Domestic airing cupboards {(~~domestic laundry drying cabinets or chambers having heating or ventilating means~~ [D06F 58/10](#))}
- F26B 9/02

NOTES

This subclass covers measuring of position or displacement in terms of linear or angular dimensions.

In this subclass, the groups are distinguished by the means of measurement which is of major importance. Thus the mere application of other means for giving a final indication does not affect the classification.

Attention is drawn to the Notes following the title of class [G01](#).

Machines operated on similar principles to the hand-held devices specified in this subclass are classified with these devices.

Measuring arrangements or details thereof covered by two or more of groups [G01B 3/00](#) - [G01B 17/00](#) are classified in group [G01B 21/00](#) if no single other group can be selected as being predominantly applicable.

G01B 3/00

Instruments as specified in the subgroups and characterised by the use of mechanical measuring means (-arrangements for measuring particular parameters [G01B 5/00](#) ; devices of general interest specially adapted or mounted for storing and repeatedly paying-out and re-storing lengths of material [B65H 75/34](#) -)

G01B 3/14

- Templates for checking contours{(-templates for mounting doors or windows [E04F 21/0007](#))}

G01B 3/22

- Feeler-pin gauges, e.g. dial gauges (-for determining profiles [G01B 5/20](#) -)

U G01B 3/38

- Gauges with an open yoke and opposed faces i.e. calipers, in which the internal distance between the faces is fixed, although it may be preadjustable

G01B 3/42

- • of limit-gauge type, i.e. "go/no-go"(-[G01B 3/40](#) takes precedence-)

U G01B 3/46

- Plug gauges for internal dimensions with engaging surfaces which are at a fixed distance, although they may be preadjustable

G01B 3/50

- • of limit-gauge type, i.e. "go/no-go"(-[G01B 3/48](#) takes precedence-)

U G01B 3/56

- Gauges for measuring angles or tapers, e.g. conical calipers

Project: N/A (G01C)**G01C**

MEASURING DISTANCES, LEVELS OR BEARINGS; SURVEYING; NAVIGATION; GYROSCOPIC INSTRUMENTS; PHOTOGRAMMETRY OR VIDEOGRAMMETRY (measuring dimensions or angles of objects [G01B](#); measuring liquid level [G01F](#); measuring intensity or direction of magnetic fields, other than the earth's field, in general [G01R](#); radio navigation, determining distance or velocity by use of propagation effects, e.g. Doppler effects, propagation time, of radio waves, analogous arrangements using other waves [G01S](#); optical systems therefor [G02B](#); maps, globes [G09B](#))

NOTES

In this subclass, the following term is used with the meaning indicated:

"navigation" means determining the position and course of land vehicles, ships, aircraft, and space vehicles.

Attention is drawn to the Notes following the title of class [G01](#).

G01C 1/00**Measuring angles** (in compasses [G01C 17/00](#))

- U G01C 1/02
 - Theodolites
- G01C 1/06
 - • Arrangements for reading scales (in general [G01D](#))
- U G01C 1/08
 - Sextants
- G01C 1/10
 - • including an artificial horizon ([G01C 1/14](#) takes precedence; artificial horizons per se [G01C 15/14](#))
- G01C 1/12
 - • • with a stabilised mirror (tilt compensation in general [G12B](#))
- G01C 1/14
 - • Periscopic sextants (periscopes in general [G02B 23/08](#))

G01C 3/00**Measuring distances in line of sight; optical rangefinders** (tapes, chains or wheels for measuring length [G01B](#); coupling rangefinders with operating parts of photographic apparatus [G03B](#))

- U G01C 3/02
 - Details
- G01C 3/04
 - • Adaptation of rangefinders for combination with telescopes or binoculars (rangefinders coupled with focussing arrangements of cameras [G03B 13/20](#))
- G01C 3/10
 - using a parallactic triangle with variable angles and a base of fixed length in the observation station, e.g. in the instrument (active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves, [G01S 17/48](#))
- G01C 3/12
 - • with monocular observation at a single point, e.g. coincidence type ([G01C 3/20](#) takes precedence)
- G01C 3/14
 - • with binocular observation at a single point, e.g. stereoscopic type ([G01C 3/20](#) takes precedence)
- G01C 3/18
 - • with one observation point at each end of the base ([G01C 3/20](#) takes precedence)
- G01C 3/22
 - using a parallactic triangle with variable angles and a base of fixed length at, near, or formed by the object (active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves, [G01S 17/48](#))
- G01C 3/24
 - using a parallactic triangle with fixed angles and a base of variable length in the observation station, e.g. in the instrument (active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves, [G01S 17/48](#))

G01C 3/26	<ul style="list-style-type: none"> • using a parallax triangle with fixed angles and a base of variable length, at, near, or formed by the object (active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves, G01S 17/48)

- G01L 27/007 • {-Malfunction diagnosis, i.e. diagnosing a sensor defect (malfunction detection of sensor not measuring a specific variable per se [G01D 3/08](#))}

Project: N/A (G01M)**G01M**

TESTING STATIC OR DYNAMIC BALANCE OF MACHINES OR STRUCTURES; TESTING STRUCTURES OR APPARATUS NOT OTHERWISE PROVIDED FOR{(-devices for testing the performance of portable percussive tools with fluid-pressure drive [B25D 9/005](#)-)}

NOTE

Attention is drawn to the Note following the title of Class [G01](#).

WARNING

Subject matter covered by these groups is classified in the following CPC groups: - **G01M/38** covered by [G01M 1/14](#) and [G01M 1/30](#) and subgroups

G01M 1/00

Testing static or dynamic balance of machines or structures (-balancing rotary bowls of centrifuges [B04B 9/14](#) ; apparatus characterised by the means for holding wheels or parts thereof [B60B 30/00](#) ; determining the stability factors of ships [B63B](#); stabilising of aircraft [B64C 17/00](#) ; control systems for balancing automatically in operation [G05](#); balancing rotors of dynamo-electric machines [H02K 15/16](#)-)

- U G01M 1/02 • Details of balancing machines or devices
- G01M 1/04 • • Adaptation of bearing support assemblies for receiving the body to be tested{(-tyre chucks in general [G01M 17/021](#)-)}
- G01M 1/08 • • Instruments for indicating directly the magnitude and phase of the unbalance (-measuring electrical variables in general [G01R](#)-)
- G01M 1/12 • Static balancing; Determining position of centre of gravity (-by determining unbalance [G01M 1/14](#)-)
- G01M 1/14 • Determining unbalance (-[G01M 1/30](#) , **G01M1/38** take precedence-)
- U G01M 1/16 • • by oscillating or rotating the body to be tested
- G01M 1/22 • • • and converting vibrations due to unbalance into electric variables (-measuring vibrations in general [G01H](#) ; microphones or like acoustic electromechanical transducers [H04R](#)-)
- G01M 1/225 • • • {for vehicle wheels (-in situ [G01M 1/28](#)-)}
- G01M 1/30 • Compensating unbalance (-**G01M1/38** takes precedence; counterweights [F16F 15/28](#)-)
- G01M 1/32 • • by adding material to the body to be tested, e.g. by correcting-weights (-correcting-weights per se [F16F 15/32](#)-)

G01M 3/00

Investigating fluid-tightness of structures (-investigating permeability of porous material, investigating the presence of flaws in general [G01N](#)-) { membrane leak detection in blood dialysis [A61M 1/1692](#) ; detecting infusion flow leakage [A61M 5/16831](#) }

- G01M 3/005 • {using pigs or moles (-[G01M 3/246](#) , [G01M 3/2823](#) take precedence-)}
- G01M 3/007 • {Leak detector calibration, standard leaks (-[G01M 3/207](#) takes precedence-)}
- U G01M 3/02 • by using fluid or vacuum
- G01M 3/022 • • {Test plugs for closing off the end of a pipe (-means for stopping flow from pipes [F16L 55/10](#)-)}

- U G01M 3/04
 - • by detecting the presence of fluid at the leakage point
- G01M 3/042
 - • • {by using materials which expand, contract, disintegrate, or decompose in contact with a fluid (-G01M 3/12 takes precedence-)}
- U G01M 3/06
 - • • by observing bubbles in a liquid pool
- U G01M 3/08
 - • • • for pipes, cables or tubes; for pipe joints or seals; for valves;{for welds}
- G01M 3/085
 - • • • • {for pipe joints or seals (-G01M 3/088 takes precedence-)}
- G01M 3/16
 - • • using electric detection means (-G01M 3/06 , G01M 3/12 , G01M 3/20 , G01M 3/24 , G01M 3/26 take precedence-){ G01M 3/045 takes precedence-}
- G01M 3/165
 - • • • {by means of cables or similar elongated devices, e.g. tapes (-construction of cables in general H01B-)}
- U G01M 3/20
 - • • using special tracer materials, e.g. dye, fluorescent material, radioactive material
- G01M 3/202
 - • • • {mass spectrometer detection systems}(-mass spectrometers H01J 49/26)}
- G01M 3/205
 - • • • • {accessories and associated equipment, pump constructions}(-pumps F04-)}
- U G01M 3/22
 - • • • for pipes, cables or tubes; for pipe joints or seals; for valves;{for welds; for containers, e.g. radiators}
- U G01M 3/226
 - • • • • {for containers, e.g. radiators}
- G01M 3/229
 - • • • • • {removably mounted in a test cell}(-test cells also in G01M 3/3281 and G01M 3/363-)}
- U G01M 3/26
 - • by measuring rate of loss or gain of fluid, e.g. by pressure-responsive devices, by flow detectors
- G01M 3/28
 - • • for pipes, cables or tubes; for pipe joints or seals; for valves{for welds (not used)}
- G01M 3/2807
 - • • • {for pipes (-G01M 3/2892 , G01M 3/30 take precedence-)}
- G01M 3/2838
 - • • • {for cables}(-G01M 3/30 takes precedence-)}
- G01M 3/2846
 - • • • {for tubes (-G01M 3/30 takes precedence-)}
- G01M 3/2853
 - • • • {for pipe joints or seals (-G01M 3/30 takes precedence-)}
- G01M 3/2876
 - • • • {for valves}(-G01M 3/30 takes precedence-)}
- G01M 3/2884
 - • • • {for welds}(-G01M 3/30 takes precedence-)}
- G01M 3/2892
 - • • • {for underground fuel dispensing systems (-G01M 3/30 takes precedence-)}
- U G01M 3/32
 - • • for containers, e.g. radiators
- U G01M 3/3236
 - • • • {by monitoring the interior space of the containers}
- G01M 3/3245
 - • • • • {using a level monitoring device (-G01M 3/3272 takes precedence-)}
- G01M 3/3254
 - • • • • {using a flow detector}(-G01M 3/3245 , G01M 3/3272 take precedence-)}
- G01M 3/3263
 - • • • • {using a differential pressure detector (-G01M 3/3245 , G01M 3/3272 take precedence-)}
- G01M 3/38
 - by using light (-G01M 3/02 takes precedence-)
- G01M 5/00**

Investigating the elasticity of structures, e.g. deflection of bridges, air-craft wings (-G01M 9/00 takes precedence; strain gauges G01B-)
- G01M 5/0025
 - {of elongated objects, e.g. pipes, masts, towers or railways (-G01M 5/0058 takes precedence-)}
- G01M 5/0066
 - {by exciting or detecting vibration or acceleration}(-vibration testing of structures G01M 7/00-)}

	G01M 5/0075	<ul style="list-style-type: none"> • {by means of external apparatus, e.g. test benches or portable test systems (-G01M 5/005 takes precedence-)}
	G01M 7/00	Vibration-testing of structures; Shock-testing of structures (-G01M 9/00 takes precedence; { generating vibrations B06, G10, H04R; vibration measurement G01H; material testing G01N 3/00 })
	G01M 7/02	<ul style="list-style-type: none"> • Vibration-testing {by means of a shake table}
	G01M 9/00	Aerodynamic testing; Arrangements in or on wind tunnels (-building aspects Section E; investigating properties of materials in general G01N-)
U	G01M 9/06	<ul style="list-style-type: none"> • Measuring arrangements specially adapted for aerodynamic testing
	G01M 9/062	<ul style="list-style-type: none"> • • {Wind tunnel balances; Holding devices combined with measuring arrangements (-measuring components of force in general G01L 5/16-)}
	G01M 9/065	<ul style="list-style-type: none"> • • {dealing with flow (-measuring volume flow G01F ; measuring speed of fluids G01P 5/00-)}
	G01M 10/00	Hydrodynamic testing; Arrangements in or on ship-testing tanks or water tunnels (building aspects Section E; investigating properties of materials in general G01N; { methods for designing, building, maintaining, converting, refitting, repairing or determining properties of vessels, not otherwise provided for and using towing tanks or model basins for designing B63B 9/02 ; for determining vessel properties with respect to stability or balance B63B 9/08 ; apparatus for indicating vessel attitude, e.g. inclination or duration of roll B63B 39/00 })
U	G01M 11/00	Testing of optical apparatus; Testing structures by optical methods not otherwise provided for WARNING Groups G01M 11/30 - G01M 11/39 do not correspond to former or future IPC groups. Concordance CPC : IPC for these groups is as follows: - G01M 11/30 - G01M 11/39 : G01M 11/00
	G01M 11/02	<ul style="list-style-type: none"> • Testing of optical properties {of lenses}
U	G01M 11/0242	<ul style="list-style-type: none"> • • {by measuring geometrical properties or aberrations}
	G01M 11/025	<ul style="list-style-type: none"> • • • {by determining the shape of the object to be tested (-measuring contours or curvatures by optical means G01B 11/24-)}
	G01M 11/0278	<ul style="list-style-type: none"> • • • {Detecting defects of the object to be tested, e.g. scratches or dust (-investigating the presence of flaws or contamination on materials by optical means G01N 21/88-)}
	G01M 11/0285	<ul style="list-style-type: none"> • • {by measuring material or chromatic transmission properties (-G01M 11/0292 takes precedence-)}
	G01M 11/0292	<ul style="list-style-type: none"> • • {of objectives by measuring the optical modulation transfer function (-photometry G01J-)}
U	G01M 11/06	<ul style="list-style-type: none"> • • Testing of alignment of vehicle head-light devices
	G01M 11/061	<ul style="list-style-type: none"> • • • {Details of the mechanical construction of the light measuring system (-G01M 11/064 takes precedence-)}
	G01M 11/08	<ul style="list-style-type: none"> • Testing of mechanical properties (-G01M 11/005 takes precedence-)}
	G01M 11/088	<ul style="list-style-type: none"> • • {of optical fibres; Mechanical features associated with the optical testing of optical fibres (-material testing in general G01N-)}
	G01M 11/30	<ul style="list-style-type: none"> • {Testing of optical devices, constituted by fibre optics or optical waveguides (-measuring a given physical parameter of optical fibres, see the relevant subclasses, e.g. G01B, G01N; equipment for monitoring, testing or fault measuring in optical transmission systems H04B 10/07-)}

- U G01M 11/33 • • {with a light emitter being disposed at one fibre or waveguide end-face, and a light receiver at the other end-face}
- G01M 11/332 • • • {using discrete input signals (~~-G01M 11/333 takes precedence-~~)}
- G01M 11/35 • • {in which light is transversely coupled into or out of the fibre or waveguide, e.g. using integrating spheres (~~-G01M 11/31 takes precedence-~~)}

Project: N/A (G01N)

G01N

INVESTIGATING OR ANALYSING MATERIALS BY DETERMINING THEIR CHEMICAL OR PHYSICAL PROPERTIES (separating components of materials in general [B01D](#), [B01J](#), [B03](#), [B07](#); apparatus fully provided for in a single other subclass, see the relevant subclass e.g. [B01L](#); measuring or testing processes other than immunoassay, involving enzymes or micro-organisms [C12M](#), [C12Q](#); investigation of foundation soil in situ [E02D 1/00](#); sensing humidity changes for compensating measurements of other variables or for compensating readings of instruments for variations in humidity, see [G01D](#) or the relevant subclass for the variable measured; testing or determining the properties of structures [G01M](#); measuring or investigating electric or magnetic properties of materials [G01R](#); systems or methods in general, using reception or emission of radiowaves or other waves and based on propagation effects, e.g. Doppler effect, propagation time, direction of propagation, [G01S](#); determining sensitivity, graininess, or density of photographic materials [G03C 5/02](#); testing component parts of nuclear reactors [G21C 17/00](#); {controlling or regulating non-electric variables [G05D](#); measuring degree of ionisation of ionised gases, i.e. plasma [H05H 1/0006](#); testing electrographic developer properties [G03G 15/0848](#) })

NOTES

In this subclass, the following terms are used with the meanings indicated :

- "investigating" means testing or determining;
- "materials" includes solid, liquid or gaseous media, e.g. the atmosphere.

Attention is drawn to the Notes following the title of class [G01](#).

Inventions relating to investigating the properties of materials, specially adapted for use in processes covered by subclass [B23K](#), are classified in group [B23K 31/12](#).

U G01N 1/00

Sampling; Preparing specimens for investigation

G01N 1/02

- Devices for withdrawing samples (for medical or veterinary purposes [A61](#); {sampling of foundation soil [E02D 1/04](#)}; obtaining samples of soil or well fluids [E21B 49/00](#); {collecting or conveying radioactive samples [G01T 7/00](#), e.g. [G01T 7/02](#), [G01T 7/08](#) })

G01N 1/10

- in the liquid or fluent state {burettes, pipettes [B01L 3/02](#); Sampling of ground water [E02D 1/06](#); metering by volume of fluids or fluent solid material [G01F 11/00](#), [G01F 13/00](#)}

U G01N 2001/1031

- • {Sampling from special places}

G01N 2001/1037

- • • {from an enclosure (*hazardous waste, radioactive*)} (~~hazardous waste, radioactive~~)

G01N 1/16

- • with provision for intake at several levels { [G01N 1/2035](#) } (~~G01N 1/12~~, [G01N 1/14](#) take precedence)

G01N 1/18

- • with provision for splitting samples into portions (~~G01N 1/12~~, [G01N 1/14](#) take precedence; fraction-collection apparatus for chromatography [B01D 15/08](#))

G01N 1/20

- • for flowing or falling materials { [G01N 1/2035](#) } (~~G01N 1/12~~, [G01N 1/14](#) take precedence)

G01N 1/22

- in the gaseous state ({specially adapted for biological material [G01N 33/497](#); measuring breath flow [A61B 5/087](#)})

U G01N 1/2202

- • {involving separation of sample components during sampling}

G01N 2001/222

- • • {other features (not used)}

U G01N 1/2247

- • {Sampling from a flowing stream of gas}

- U G01N 1/2258 {in a stack or chimney}
- G01N 2001/2261 {preventing condensation (*heating lines*)}(*heating lines*)}
- G01N 1/24 . . . Suction devices{(-G01N 1/22 to G01N 1/2294 take precedence-)}
- G01N 1/28 . Preparing specimens for investigation{ including physical details of (bio-)chemical methods covered elsewhere, e.g. G01N 33/50 , C12Q } (-mounting specimens on microscopic slides G02B 21/34 ; means for supporting the objects or the materials to be analysed in electron microscopes H01J 37/20 ; { laboratory gas handling apparatus B01L 5/00 })
- G01N 1/2813 . . {Producing thin layers of samples on a substrate, e.g. smearing, spinning-on, (-G01N 1/30 takes precedence-)}
- G01N 1/286 . . {involving mechanical work, e.g. chopping, disintegrating, compacting, homogenising (-microtomes G01N 1/06 ; pulverising in general B02C ; mixing in general B01F-)}
- G01N 1/30 . . Staining; Impregnating {Fixation; Dehydration; Multistep processes for preparing samples of tissue, cell or nucleic acid material and the like for analysis}
- G01N 1/34 . . Purifying; Cleaning{(-processes or apparatus for extracting or separating nucleic acids from biological samples C12N 15/1003-)}
- G01N 3/00** **Investigating strength properties of solid materials by application of mechanical stress (strain gauges G01B; measuring stress in general G01L)**
- NOTE
- This group covers the stressing of materials not only below but also beyond the elastic limit, e.g. until breaking occurs.
- U G01N 3/02 . Details
- G01N 3/06 . . Special adaptations of indicating or recording means (-indicating or recording means for measuring in general G01D-)
- G01N 3/08 . by applying steady tensile or compressive forces (-G01N 3/28 takes precedence-)
- G01N 3/10 . . generated by pneumatic or hydraulic pressure (-G01N 3/18 takes precedence-)
- G01N 3/12 . . . Pressure testing (-testing fluid-tightness G01M 3/00-)
- G01N 3/14 . . generated by dead weight, e.g. pendulum; generated by springs tension (-G01N 3/18 takes precedence-)
- G01N 3/16 . . applied through gearing (-G01N 3/18 takes precedence-)
- G01N 3/165 . . . {generated by rotation, i.e. centrifugal force (-for testing structures or apparatus G01M 99/004-)}
- G01N 3/20 . by applying steady bending forces (-G01N 3/26 , G01N 3/28 take precedence-)
- G01N 3/22 . by applying steady torsional forces (-G01N 3/26 , G01N 3/28 take precedence-)
- G01N 3/24 . by applying steady shearing forces (-G01N 3/26 , G01N 3/28 take precedence-)
- G01N 3/32 . by applying repeated or pulsating forces (-generation of such forces in general, see the relevant classes or subclasses, e.g. B06 , G10-)
- U G01N 3/40 . Investigating hardness or rebound hardness
- G01N 3/42 . . by performing impressions under a steady load by indentors, e.g. sphere, pyramid (-G01N 3/54 takes precedence-)
- G01N 3/48 . . by performing impressions under impulsive load by indentors, e.g. falling ball (-G01N 3/54 takes precedence-)
- G01N 3/50 . . by measuring rolling friction, e.g. by rocking pendulum (-G01N 3/54 takes precedence-)

	G01N 3/52	<ul style="list-style-type: none"> • by measuring extent of rebound of a striking body (G01N 3/54 takes precedence)
U	G01N 3/56	<ul style="list-style-type: none"> • Investigating resistance to wear or abrasion
	G01N 3/567	<ul style="list-style-type: none"> • {by submitting the specimen to the action of a fluid or of a fluidised material, e.g. cavitation, jet abrasion (G01N 3/565 takes precedence)}
	G01N 3/60	<ul style="list-style-type: none"> • Investigating resistance of materials, e.g. refractory materials, to rapid heat changes{thermal testing of structures or apparatus G01M 99/002}
	G01N 5/00	Analysing materials by weighing, e.g. weighing small particles separated from a gas or liquid (G01N 9/00 takes precedence; {weighing per se G01G})
	G01N 5/02	<ul style="list-style-type: none"> • by absorbing or adsorbing components of a material and determining change of weight of the adsorbent, e.g. determining moisture content{ absorption bulbs B01D 53/00}
U	G01N 7/00	Analysing materials by measuring the pressure or volume of a gas or vapour
	G01N 7/02	<ul style="list-style-type: none"> • by absorption, adsorption, or combustion of components and measurement of the change in pressure or volume of the remainder{ absorption bulbs B01D 53/00}
	G01N 7/14	<ul style="list-style-type: none"> • by allowing the material to emit a gas or vapour, e.g. water vapour, and measuring a pressure or volume difference{ determining urea G01N 33/48742}
	G01N 9/00	Investigating density or specific gravity of materials; Analysing materials by determining density or specific gravity{weighing apparatus G01G}
	G01N 9/002	<ul style="list-style-type: none"> • {using variation of the resonant frequency of an element vibrating in contact with the material submitted to analysis (G01N 9/34 takes precedence)}
	G01N 9/36	<ul style="list-style-type: none"> • Analysing materials by measuring the density or specific gravity, e.g. determining quantity of moisture{methods of measurement in general G01N 9/02 to G01N 9/32}
U	G01N 11/00	Investigating flow properties of materials, e.g. viscosity, plasticity; Analysing materials by determining flow properties
U	G01N 11/10	<ul style="list-style-type: none"> • by moving a body within the material
	G01N 11/12	<ul style="list-style-type: none"> • • by measuring rising or falling speed of the body; by measuring penetration of wedged gauges (G01N 11/16 takes precedence)
	G01N 11/14	<ul style="list-style-type: none"> • • by using rotary bodies, e.g. vane (G01N 11/16 takes precedence)
	G01N 13/00	Investigating surface or boundary effects, e.g. wetting power; Investigating diffusion effects; Analysing materials by determining surface, boundary, or diffusion effects {scanning-probe techniques or apparatus G01Q}
	G01N 15/00	Investigating characteristics of particles; Investigating permeability, pore-volume, or surface-area of porous materials {identification of micro-organisms C12Q}
	G01N 15/02	<ul style="list-style-type: none"> • Investigating particle size or size distribution (G01N 15/04 , G01N 15/10 take precedence; by measuring osmotic pressure G01N 7/10 ; by filtering B01D ; by sifting B07B)
	G01N 15/0255	<ul style="list-style-type: none"> • {with mechanical, e.g. inertial, classification, and investigation of sorted collections (with centrifuges G01N 15/042)}
	G01N 15/0272	<ul style="list-style-type: none"> • {with screening; with classification by filtering (B01D takes precedence)}
U	G01N 15/04	<ul style="list-style-type: none"> • Investigating sedimentation of particle suspensions
	G01N 15/042	<ul style="list-style-type: none"> • • {by centrifuging and investigating centrifugates (centrifuges per se B04B)}

- G01N 15/06
- Investigating concentration of particle suspensions (~~G01N 15/04~~ , ~~G01N 15/10~~ take precedence; by weighing ~~G01N 5/00~~)

NOTE

References listed below indicate CPC places which could also be of interest when carrying out a search in respect of the subject matter covered by the preceding group and its subgroups:

- Investigating or analysing materials;
- by the use of optical means: [G01N 21/00](#)
 , e.g. [G01N 21/47](#) , [G01N 21/90](#)
 ;
- by other radiations or by particles:
[G01N 23/00](#) , e.g. [G01N 23/02](#) ,
[G01N 23/201](#) ;
- by measuring impedance: [G01N 27/02](#)
 , e.g. [G01N 27/06](#) , [G01N 27/22](#)
 ;
- by electrochemical means: [G01N 27/00](#)
 , e.g. [G01N 27/26](#) , **G01N27/56B**
 ;
- by measuring absorption of sonic or ultrasonic vibrations: [G01N 29/00](#) , e.g. [G01N 29/02](#)

- U G01N 15/0606
- {by collecting particles on a support}
- G01N 15/0612
- {Optical scan of the deposits (~~G01N 15/0625~~ takes precedence)}
- G01N 15/0618
- {of the filter type (~~G01N 15/0643~~ takes precedence)}
- G01N 15/0656
- {using electric, e.g. electrostatic methods or magnetic methods (~~by investigating individual particles [G01N 15/1031](#) , [G01N 15/12](#)~~)}
- U G01N 15/10
- Investigating individual particles
- G01N 15/1031
- {by measuring electrical or magnetic effects thereof, e.g. onconductivity or capacity (~~using nano-scale size effects, other than for sizing or counting, by translocation through nano-pores [G01N 33/48721](#) ; involving the use of Coulter counters [G01N 15/12](#)~~)}
- G01N 2015/105
- {Other than optical measurement of deformation of individual particles (~~optical measurement [G01N 2015/1495](#)~~)}
- G01N 15/1056
- {Micro-structural devices for other than electro-optical measurement (~~for electro-optical measurement [G01N 15/1484](#)~~)}
- G01N 2015/1062
- {counting the particles by other than electro-optical means (~~by electro-optical means [G01N 2015/1486](#)~~)}

G01N 19/00 Investigating materials by mechanical methods (~~G01N 3/00 to G01N 17/00 take precedence~~)

- G01N 19/02
- Measuring coefficient of friction between materials (~~testing of tyres [G01M 17/02](#) ; determinations of friction coefficient used in vehicle braking or traction control systems [B60T 8/172](#)~~)
- G01N 19/08
- Detecting presence of flaws or irregularities (~~measuring roughness or irregularity of surfaces [G01B 5/28](#)~~)

G01N 21/00 Investigating or analysing materials by the use of optical means, i.e. using infra-red, visible or ultra-violet light (~~G01N 3/00-G01N 19/00 take precedence~~)

NOTE

This group does not cover the investigation of spectral properties of light per se, or measurements of the properties of materials where spectral properties of light are sensed and primary emphasis is placed on creating, detecting or analysing the spectrum providing that the properties of the materials to be investigated

are of minor importance (see also Note (4) after the title of class [G01](#)). Those subjects are covered by group [G01J 3/00](#).

- U G01N 21/01 • Arrangements or apparatus for facilitating the optical investigation
- U G01N 21/03 • • Cuvette constructions
- G01N 21/0303 • • • {Optical path conditioning in cuvettes, e.g. windows; adapted optical elements or systems; path modifying or adjustment (~~-G01N 21/031 to G01N 21/15 take precedence-~~)}
- G01N 21/0317 • • • {High pressure cuvettes; (~~-G01N 21/0332 to G01N 21/15 take precedence-~~)}
- G01N 21/0332 • • • {with temperature control (~~-control of temperature G05D 23/00 ; cryostats F17C 3/08-~~)}
- G01N 21/05 • • • Flow-through cuvettes (~~-G01N 21/09 takes precedence; handling fluid samples G01N 1/10-~~)
- G01N 21/07 • • • Centrifugal type cuvettes (~~-G01N 21/09 takes precedence; centrifuges per se B04B-~~)
- G01N 21/13 • • Moving of cuvettes or solid samples to or from the investigating station{ handling materials for automatic analysis [G01N 35/00](#)}
- G01N 2021/135 • • • {Sample holder displaceable (~~-in automatised apparatus G01N 35/02-~~)}
- G01N 21/17 • Systems in which incident light is modified in accordance with the properties of the material investigated (~~-where the material investigated is optically excited causing a change in wavelength of the incident light G01N 21/63-~~)
- U G01N 21/1702 • • {with opto-acoustic detection, e.g. for gases or analysing solids}
- G01N 2021/1708 • • • {with piezotransducers (~~-probes for investigating or analysing materials by the use of ultrasonic, sonic or infrasonic waves G01N 29/24-~~)}
- G01N 2021/1757 • • {Time modulation of light being essential to the method of light modification, e.g. using single detector (~~-circuits for photometry with modulation, using one detector G01J 1/44-~~)}
- G01N 21/21 • • Polarisation-affecting properties (~~-G01N 21/19 takes precedence-~~)
- G01N 21/211 • • • {Ellipsometry (~~-optical thickness measurement G01B 11/06-~~)}
- U G01N 21/25 • • Colour; Spectral properties, i.e. comparison of effect of material on the light at two or more different wavelengths or wavelength bands
- U G01N 21/251 • • • {Colorimeters; Construction thereof}
- G01N 21/253 • • • • {for batch operation, i.e. multisample apparatus (~~-analytical automats G01N 35/00-~~)}
- G01N 21/27 • • • using photo-electric detection (~~-G01N 21/31 takes precedence-~~){circuits for computing concentration(~~-logarithmic circuits G06G 7/24 ; photometric circuits in general G01J-~~)}
- G01N 21/272 • • • • {for following a reaction, e.g. for determining photometrically a reaction rate (*photometric cinetic analysis*)}(~~photometric cinetic analysis~~)
- G01N 21/29 • • • using visual detection (~~-G01N 21/31 takes precedence-~~)
- G01N 21/31 • • • Investigating relative effect of material at wavelengths characteristic of specific elements or molecules, e.g. atomic absorption spectrometry(~~-G01N 21/72 takes precedence-~~)}
- G01N 21/314 • • • • {with comparison of measurements at specific and non-specific wavelengths (~~-dual wavelength spectrometry G01J 3/427-~~)}
- G01N 21/3151 • • • • • {using two sources of radiation of different wavelengths (~~-G01N 21/33 to G01N 21/39 take precedence-~~)}
- G01N 21/33 • • • • using ultra-violet light (~~-G01N 21/39 takes precedence-~~)
- G01N 21/35 • • • • using infra-red light (~~-G01N 21/39 takes precedence-~~)

- U G01N 21/3504 for analysing gases, e.g. multi-gas analysis
- G01N 21/3518 Devices using gas filter correlation techniques; Devices using gas pressure modulation techniques
- NOTE
- This group also covers devices without instrumental sources, e.g. radiometric-type devices using ambient infra-red light.
- G01N 21/3554 for determining moisture content
- G01N 21/3577 for analysing liquids, e.g. polluted water
- WARNING
- Group [G01N 21/3577](#) is incomplete pending reclassification of documents from group [G01N 21/35](#).
- Until reclassification is complete, groups [G01N 21/3577](#) and [G01N 21/35](#) should be considered in order to perform a complete search.
- G01N 21/37 using pneumatic detection{(-opto-acoustic detection [G01N 21/1702](#)-)}
- G01N 21/41 Refractivity; Phase-affecting properties, e.g. optical path length{(-[G01N 21/21](#) takes precedence-)}
- U G01N 21/45 using interferometric methods; using Schlieren methods
- G01N 21/453 {Holographic interferometry{(-for dimensional measurements [G01B 9/021](#) to [G01B 9/029](#)-)}}}
- G01N 21/47 Scattering, i.e. diffuse reflection{(-[G01N 21/25](#) , [G01N 21/41](#) take precedence-)}{ [G01N 21/55](#) takes precedence-}
- G01N 21/4738 {Diffuse reflection{(-precedence is given to [G01N 21/55](#) - [G01N 21/57](#) if specular component is taken into consideration-)}, e.g. also for testing fluids, fibrous materials}
- G01N 21/4788 {Diffraction{(-for sizing particles [G01N 15/0205](#)-)}}}
- G01N 21/4795 {spatially resolved investigating of object in scattering medium{(-in vivo [A61B](#)-)}}}
- U G01N 21/49 within a body or fluid
- G01N 21/51 inside a container, e.g. in an ampoule{(-[G01N 21/53](#) takes precedence; checking containers for cleanliness [B08B 9/46](#)-)}
- G01N 21/53 within a flowing fluid, e.g. smoke{(-alarm devices actuated by smoke [G08B 17/10](#)-)}
- U G01N 21/55 Specular reflectivity
- U G01N 21/552 Attenuated total reflection
- G01N 21/553 {and using surface plasmons{(-fluorescence excitation [G01N 21/648](#) ; enhanced Raman [G01N 21/658](#)-)}}}
- G01N 21/59 Transmissivity{(-[G01N 21/25](#) takes precedence-)}
- U G01N 21/5907 {Densitometers}
- G01N 21/5911 {of the scanning type{(-scanning per se [G02B](#)-)}}}
- G01N 21/61 Non-dispersive gas analysers{(-[G01N 21/3504](#) takes precedence-)}
- U G01N 21/62 Systems in which the material investigated is excited whereby it emits light or causes a change in wavelength of the incident light
- U G01N 21/63 optically excited
- G01N 21/636 {using an arrangement of pump beam and probe beam; using the measurement of optical non-linear properties; (-non-linear optics per se [G02F 1/35](#)-)}}}

- U G01N 21/64
 - • Fluorescence; Phosphorescence
- G01N 21/6428
 - • • {Measuring fluorescence of fluorescent products of reactions or of fluorochrome labelled reactive substances, e.g. measuring quenching effects, using measuring "optrodes"(-in vivo [A61B 5/00](#) ; immunoassay [G01N 33/53](#)-)}

 - by investigating breakdown voltage (-[G01N 27/60](#) , [G01N 27/62](#) take precedence; testing of articles or specimens of solids or fluids for dielectric strength or breakdown voltage [G01R 31/12](#)-)
- G01N 29/00**

Investigating or analysing materials by the use of ultrasonic, sonic or infrasonic waves; Visualisation of the interior of objects by transmitting ultrasonic or sonic waves through the object (-[G01N 3/00](#) to [G01N 27/00](#) take precedence; measuring or indicating of ultrasonic, sonic or infrasonic waves in general [G01H](#); systems using the reflection or reradiation of acoustic waves, e.g. acoustic imaging, [G01S 15/00](#) ; obtaining records by techniques analogous to photography using ultrasonic, sonic or infrasonic waves [G03B 42/06](#) ; { medical diagnosis by ultrasounds [A61B 8/00](#) ; generating or transmitting mechanical or acoustic waves [B06B](#), [G10K](#); seismic or acoustic prospecting or detecting [G01V 1/00](#))}
- G01N 29/02
 - Analysing fluids (-using acoustic emission techniques [G01N 29/14](#) ; { constructional or flow details for analysing fluids [G01N 29/222](#) ; optoacoustic fluid cells [G01N 29/2425](#) })
- G01N 29/022
 - • {Fluid sensors based on micro-sensors, e.g. quartz crystal-microbalance (QCM), surface acoustic wave (SAW) devices, tuning forks, cantilevers, flexural plate wave (FPW) devices (micro-devices per se [B81B](#))}
- G01N 29/04
 - Analysing solids (-using acoustic emission techniques [G01N 29/14](#)-)
- G01N 29/045
 - • {by imparting shocks to the workpiece and detecting the vibrations or the acoustic waves caused by the shocks (-measuring resonant frequency [G01H 13/00](#) ; measuring strength properties by application of mechanical stress [G01N 3/00](#)-)}
- G01N 29/046
 - • • {using the echo of particles imparting on a surface; using acoustic emission of particles (-investigating concentration of particle suspensions [G01N 15/06](#) ; devices for measuring flow of solids in suspension [G01F 1/74](#)-)}
- G01N 29/06
 - • Visualisation of the interior, e.g. acoustic microscopy{(-medical or veterinary diagnosis using sonic waves [A61B 8/00](#) ; representation of acoustic wave distribution [G01H 3/125](#) , [G01H 9/002](#) ; short-range imaging systems using reflection of acoustic waves [G01S 15/8906](#)-)}
- G01N 29/0609
 - • • {Display arrangements, e.g. colour displays (indicating or recording in connection with measuring in general [G01D](#))}
- U G01N 29/0618
 - • • • {synchronised with scanning, e.g. in real-time}
- G01N 29/0627
 - • • • {Cathode-ray tube displays (-in general [G01R 13/20](#)-)}
- U G01N 29/0654
 - • • {Imaging}
- G01N 29/0663
 - • • • {by acoustic holography (-acoustical holography per se [G03H 3/00](#)-)}
- G01N 29/0672
 - • • • {by acoustic tomography (-medical tomography [A61B 8/13](#)-)}
- U G01N 29/07
 - • by measuring propagation velocity or propagation time of acoustic waves
- G01N 29/075
 - • • {by measuring or comparing phase angle (-measuring frequencies or phase angles per se [G01R 23/00](#) , [G01R 25/00](#)-)}
- G01N 29/12
 - • by measuring frequency or resonance of acoustic waves{(-measuring frequency or resonant frequency of mechanical vibrations or acoustic waves in general [G01H 1/06](#) , [G01H 3/04](#) , [G01H 13/00](#) ; acoustic resonators [G10K 11/04](#) ; vibration or shock testing of structures [G01M 7/00](#)-)}

- G01N 29/14
 - using acoustic emission techniques{(-echo of particles [G01N 29/046](#) ; measuring mechanical vibrations or acoustic waves in solids in general [G01H 1/00](#)-)}
- U G01N 29/22
 - Details,{e.g. general constructional or apparatus details}
- G01N 29/221
 - • {Arrangements for directing or focusing the acoustical waves (-electronic orientation or focusing [G01N 29/262](#) ; sound directing or focusing [G10K 11/26](#) ; mechanical steering of sound transducers or their beams [G10K 11/35](#)-)}
- G01N 29/222
 - • {Constructional or flow details for analysing fluids (-optoacoustic fluid cells [G01N 29/2425](#)-)}
- G01N 29/223
 - • {Supports, positioning or alignment in fixed situation (-mounting transducers per se [G10K 11/004](#)-)}
- G01N 29/24
 - • Probes{(-transducers for acoustic waves [B06B](#) , [G10K](#) ; for measuring [G01H](#)-)}
- G01N 29/2412
 - • • {using the magnetostrictive properties of the material to be examined, e.g. electromagnetic acoustic transducers [EMAT]; (-investigating the presence of flaws using eddy currents [G01N 27/90](#) , magnetostrictive transducers [B06B 1/08](#) , measuring magnetostrictive properties [G01R 33/18](#)-)}
- G01N 29/2418
 - • • {using optoacoustic interaction with the material, e.g. laser radiation, photoacoustics (-photoacoustic cells [G01N 21/1702](#) ; measuring characteristics of vibrations by using radiation-sensitive means [G01H 9/00](#) ; acousto-optical conversion techniques for short-range imaging [G01S 15/8965](#) ; sound-producing devices using laser bundle [G10K 15/046](#)-)}
- G01N 29/2431
 - • • {using other means for acoustic excitation, e.g. heat, microwaves, electron beams (-sound producing devices not otherwise provided for [G10K 15/04](#)-)}
- G01N 29/2456
 - • • {Focusing probes (-focusing arrangements [G01N 29/221](#)-)}
- G01N 29/2487
 - • • {Directing probes, e.g. angle probes (-directing arrangements [G01N 29/221](#)-)}
- G01N 29/26
 - • Arrangements for orientation or scanning {by relative movement of the head and the sensor(-mechanical steering of sound transducers or their beams [G10K 11/35](#)-)}
- G01N 29/262
 - • • {by electronic orientation or focusing, e.g. with phased arrays (-phased arrays per se [G10K 11/34](#)-)}
- G01N 29/28
 - • providing acoustic coupling {e.g. water(-impedance matching [G10K 11/02](#)-)}
- U G01N 29/34
 - Generating the ultrasonic, sonic or infrasonic waves,{e.g. electronic circuits specially adapted therefor}
- G01N 29/348
 - • {with frequency characteristics, e.g. single frequency signals, chirp signals (-measuring frequency of mechanical vibrations or acoustic waves in general [G01H 1/06](#) , [G01H 3/04](#) ; measuring frequency or analysing frequency spectra [G01R 23/00](#)-)}
- U G01N 29/36
 - Detecting the response signal,{e.g. electronic circuits specially adapted therefor}
- G01N 29/40
 - • by amplitude filtering, e.g. by applying a threshold {or by gain control}
- G01N 29/42
 - • by frequency filtering {or by tuning to resonant frequency}
- G01N 29/44
 - Processing the detected response signal,{e.g. electronic circuits specially adapted therefor(-digital signal processing per se [G06F 17/00](#)-)}
- U G01N 29/4409
 - • {by comparison}
- G01N 29/4436
 - • • {with a reference signal (-amplitude comparison [G01N 29/48](#)-)}
- G01N 29/449
 - • {-Statistical methods not provided for in [G01N 29/4409](#) , e.g. averaging, smoothing and interpolation-}

- G01N 29/46 • • by spectral analysis, e.g. Fourier analysis {or wavelet analysis(-spectral signal processing per se [G06F 17/14](#)-)}

G01N 30/00 Investigating or analysing materials by separation into components using adsorption, absorption or similar phenomena or using ion-exchange, e.g. chromatography (-[G01N 3/00](#) to [G01N 29/00](#) take precedence; separation for the preparation or production of components [B01D 15/00](#), [B01D 53/02](#), [B01D 53/14](#); solid sorbent compositions in general [B01J 20/00](#); ion-exchange in general [B01J 39/00](#) to [B01J 49/00](#)-){or field flow fractionation(-for preparation or production of components [B01D 21/00](#), [B01D 43/00](#), [B01D 45/00](#) or [B03C](#)-)}

NOTE

In this group, the following term is used with the meaning indicated:

- "conditioning" refers to the adjustment or control of environmental parameters, e.g. temperature or pressure.

- U G01N 30/0005 • {Field flow fractionation}
- G01N 2030/007 • • {programming of driving force (-carrier programming [G01N 30/02](#)-)}
- U G01N 30/02 • Column chromatography
- U G01N 30/04 • • Preparation or injection of sample to be analysed
- G01N 30/16 • • • Injection (-[G01N 30/24](#) takes precedence-)
- U G01N 30/26 • • Conditioning of the fluid carrier; Flow patterns
- U G01N 30/28 • • • Control of physical parameters of the fluid carrier
- G01N 30/32 • • • • of pressure or speed (-[G01N 30/36](#) takes precedence-)
- G01N 30/34 • • • • of fluid composition, e.g. gradient (-[G01N 30/36](#) takes precedence-)
- U G01N 30/38 • • • Flow patterns
- G01N 30/46 • • • • using more than one column{(-[G01N 30/44](#) takes precedence-)}
- U G01N 30/461 • • • • • {with serial coupling of separation columns}
- G01N 30/462 • • • • • {with different eluents or with eluents in different states (-[G01N 30/463](#) takes precedence-)}
- U G01N 30/62 • • Detectors specially adapted therefor
- G01N 30/72 • • • Mass spectrometers{(-mass spectrometers per se [H01J 49/00](#)-)}
- G01N 30/7206 • • • • {interfaced to gas chromatograph (-interfaces in general for introducing or extracting samples to be analysed with specially adapted mass spectrometer, see [H01J 49/04](#)-)}
- G01N 30/722 • • • • • {through a gas permeable barrier (*membranes, porous layers*)}(*membranes, porous layers*)}
- G01N 30/7233 • • • • {interfaced to liquid or superfluid chromatograph (-interfaces in general for introducing or extracting samples to be analysed with specially adapted mass spectrometer, see [H01J 49/04](#)-)}
- G01N 30/724 • • • • • {Nebulising, aerosol formation or ionisation (-spraying or atomising in general [B05B](#)-)}
- G01N 30/74 • • • Optical detectors{ measurement of intensity, velocity, spectral content, polarisation, or phase of infra-red, visible or ultra-violet light [G01J](#)}
- G01N 30/76 • • • Acoustical detectors{ measurement of mechanical vibrations or ultrasonic, sonic or infrasonic waves [G01H](#)}
- U G01N 30/86 • • Signal analysis
- G01N 30/8675 • • • {Evaluation, i.e. decoding of the signal into analytical information (-for analysis of specific compounds see also [G01N 30/88](#) and subgroups of [G01N 33/00](#); chemical libraries per se [C40B](#)-)}

- G01N 30/88
- Integrated analysis systems specially adapted therefor, not covered by a single one of the groups [G01N 30/04](#) to [G01N 30/86](#) (signal analysis systems per se [G06F](#), [G06G](#))
- G01N 30/96
- using ion-exchange (~~-[G01N 30/02](#) , [G01N 30/90](#) take precedence-~~)
- G01N 31/00**
- Investigating or analysing non-biological materials by the use of the chemical methods specified in the subgroup (-testing the effectiveness or completeness of sterilisation procedures without using enzymes or microorganisms [A61L 2/28](#) ; measuring or testing processes involving enzymes or micro-organisms [C12Q 1/00](#)); Apparatus specially adapted for such methods**
- G01N 31/005
- {investigating the presence of an element by oxidation (~~-[G01N 31/12](#) takes precedence-~~)}
- G01N 31/007
- {by measuring the quantity of water resulting therefrom (~~-[G01N 31/12](#) takes precedence-~~)}
- NOTE**
- The observation of the progress of the reaction specified below by any of the methods specified in groups [G01N 3/00](#) to [G01N 3/00](#) to [G01N 29/00](#) , if this is of major importance, is dealt with in the group concerned.
- G01N 31/02
- using precipitation{ measuring deposition or liberation of materials from an electrolyte [G01N 27/42](#)-}
- G01N 31/12
- using combustion (~~-[G01N 25/20](#) takes precedence-~~)
- U G01N 31/16
- using titration
- G01N 31/18
- • Burettes specially adapted for titration (~~-burettes in general [B01L 3/02](#)-~~)
- G01N 31/22
- using chemical indicators (~~-[G01N 31/02](#) takes precedence-~~)
- G01N 31/223
- • {for investigating presence of specific gases or aerosols (~~-[G01N 31/221](#) , [G01N 31/222](#) take precedence; actuation of fire alarm by presence of smoke or gases [G08B 17/10](#)-~~)}
- U G01N 33/00**
- Investigating or analysing materials by specific methods not covered by the preceding groups**
- G01N 33/0004
- {Gaseous mixtures, e.g. polluted air (~~-gaseous biological material [G01N 33/497](#) ; exhaust gas of internal combustion engines [G01M 15/102](#)-~~)}
- G01N 33/0009
- • {General constructional details of gas analysers, e.g. portable test equipment (~~-[G01N 1/22](#) takes precedence-~~)}
- G01N 33/0011
- • • {Sample conditioning (~~-in general [G01N 1/28](#)-~~)}
- G01N 33/0013
- • • • {by a chemical reaction (~~-[G01N 33/0024](#) takes precedence-~~)}
- G01N 33/0014
- • • • {by eliminating a gas (~~-[G01N 33/0013](#) and [G01N 33/0024](#) take precedence-~~)}
- G01N 33/0026
- • • {use of an alternating circulation of another gas (~~-calibrating gas analysers [G01N 33/0006](#)-~~)}
- U G01N 33/0027
- • • {concerning the detector}
- G01N 33/0031
- • • • {comprising two or more sensors, e.g. a sensor array (~~-electrochemical electrode arrays [G01N 27/27](#)-~~)}
- G01N 33/0036
- • • • {Specially adapted to detect a particular component (~~-all the other sub-groups of [G01N 33/0004](#) take precedence-~~)}
- G01N 33/0057
- • • • • {for warfare agents or explosives (~~-properties of explosives [G01N 33/227](#)-~~)}
- U G01N 33/0062
- • • {concerning the measuring method, e.g. intermittent, or the display, e.g. digital}

	G01N 33/0063	<ul style="list-style-type: none"> • • • {using a threshold to release an alarm or displaying means (-alarm arrangements G08B , e.g. fire alarm actuated by the presence of smoke or gases G08B 17/10 , for other abnormal conditions G08B 21/00-)}
	G01N 33/007	<ul style="list-style-type: none"> • • • {Arrangements to check the analyser (-calibrating G01N 33/0006-)}

 - • • of gaseous biological material, e.g. breath{(-for evaluating respiratory organs [A61B 5/08](#)-)}
- G01N 33/4972
 - • • • {Determining alcohol content}{-for vehicle safety devices [B60K 28/06](#)-}

G01N 33/50

- • Chemical analysis of biological material, e.g. blood, urine; Testing involving biospecific ligand binding methods; Immunological testing (-measuring or testing processes involving enzymes or micro-organisms, compositions or test papers therefor; processes for forming such compositions, condition responsive control in microbiological or enzymological processes [C12Q-](#))

NOTES

The expression "involving", when used in relation to a material includes the testing for the material as well as employing the material as a determinant or reactant in a test for a different material.

In groups [G01N 33/52](#) to [G01N 33/96](#) , in the absence of an indication to the contrary, an invention is also classified in the last appropriate place.

Documents relating to new peptides or new DNA or its corresponding mRNA, encoding for the peptides, and their use in measuring or testing processes are classified in subclass [C07K](#) or in group [C12N 9/00](#) according to the peptides, with the appropriate indexing codes relating to their use in diagnostics. However, if the investigating or analysing aspects are of interest, the documents are classified in this group

G01N 33/5005

- • • {involving human or animal cells (-immunoassay [G01N 33/56966](#); immunoassays of protozoa [G01N 33/56905](#); protozoa in screening assays [C12Q 1/025](#))}

G01N 33/5094

- • • {for blood cell populations (-red blood cells [G01N 33/80-](#))}

G01N 33/5097

- • • {involving plant cells (-immunoassays of plant cells [G01N 33/56961](#) ; unicellular algae, photoplankton and photosynthetic bacteria in screening assays [C12Q 1/025](#)-)}

G01N 33/52

- • • Use of compounds or compositions for colorimetric, spectrophotometric or fluorometric investigation, e.g. use of reagent paper {and including single- and multilayer analytical elements (-immunological elements [G01N 33/54386](#) ; involving labelled immunochemicals [G01N 33/58](#) ; for haemoglobin or occult blood [G01N 33/72-](#))}

G01N 33/53

- • • Immunoassay; Biospecific binding assay (-preparations containing antigens or antibodies for therapeutic purposes [A61K 39/00](#) ; haptens in general, see the relevant places in class [C07](#) ; proteins in general [C07K-](#))

U G01N 33/5302

- • • • {Apparatus specially adapted for immunological test procedures}

G01N 33/5304

- • • • • {Reaction vessels, e.g. agglutination plates (-for solid-phase systems [G01N 33/543-](#))}

U G01N 33/531

- • • • • Production of immunochemical test materials

U G01N 33/532

- • • • • Production of labelled immunochemicals

G01N 33/535

- • • • • • with enzyme label {or co-enzymes, co-factors, enzyme inhibitors or enzyme substrates}

U G01N 33/536

- • • • • with immune complex formed in liquid phase

U G01N 33/537

- • • • • with separation of immune complex from unbound antigen or antibody

G01N 33/538

- • • • • • by sorbent column, particles or resin strip {i.e. sorbent materials}

G01N 33/539

- • • • • • involving precipitating reagent {e.g. ammonium sulfate}

G01N 33/541

- • • • • • Double or second antibody {i.e. precipitating antibody}

U G01N 33/543

- • • • • with an insoluble carrier for immobilising immunochemicals

G01N 33/54353

- • • • • • {with ligand attached to the carrier via a chemical coupling agent (-coatings [G01N 33/54393-](#))}

G01N 33/5436

- • • • • • {with ligand physically entrapped within the solid phase (-liposomes [G01N 33/5432](#) ; immunological test elements [G01N 33/54386-](#))}

U G01N 33/544

- • • • • the carrier being organic

- U G01N 33/545 Synthetic resin
- G01N 33/546 as water suspendable particles{ not used, see [G01N 33/54313](#)}
- G01N 33/547 with antigen or antibody attached to the carrier via a bridging agent{ not used, see [G01N 33/54353](#)}
- G01N 33/549 with antigen or antibody entrapped within the carrier{ not used, see [G01N 33/5436](#)}
- G01N 33/563 involving antibody fragments{ not used, see [G01N 33/6857](#)}
- G01N 33/564 for pre-existing immune complex or autoimmune disease {i.e. systemic lupus erythematosus, rheumatoid arthritis, multiple sclerosis, rheumatoid factors or complement components C1-C9}
- G01N 33/566 using specific carrier or receptor proteins as ligand binding reagents {where possible specific carrier or receptor proteins are classified with their target compounds}
- U G01N 33/569 for micro-organisms, e.g. protozoa, bacteria, viruses
- G01N 33/571 for venereal disease, e.g. syphilis, gonorrhoea{(-herpes [G01N 33/56994](#) ; chlamydia [G01N 33/56927](#)-)}
- G01N 33/577 involving monoclonal antibodies{ binding reaction mechanisms characterised by the use of monoclonal antibodies; monoclonal antibodies per se are classified with their corresponding antigens; [G01N 33/53](#) to [G01N 33/576](#) take precedence-}
- G01N 33/58 involving labelled substances {(-[G01N 33/53](#) takes precedence; for testing in vivo [A61K 49/00](#)-)}
- G01N 33/60 involving radioactive labelled substances {(-tracers [G21H 5/02](#)-)}
- G01N 33/68 involving proteins, peptides or amino acids{ involving lipoproteins [G01N 33/92](#)}
- G01N 33/72 involving blood pigments, e.g. haemoglobin, bilirubin {or other porphyrins; involving occult blood}
- G01N 33/74 involving hormones {or other non-cytokine intercellular protein regulatory factors such as growth factors, including receptors to hormones and growth factors}
- G01N 33/76 Human chorionic gonadotropin {including luteinising hormone, follicle stimulating hormone, thyroid stimulating hormone or their receptors}
- G01N 33/80 involving blood groups or blood types {or red blood cells(-white blood cells [G01N 33/56972](#)-)}
- G01N 33/82 involving vitamins {or their receptors}
- G01N 33/86 involving blood coagulating time {or factors, or their receptors}
- G01N 33/88 involving prostaglandins {or their receptors}
- G01N 33/92 involving lipids, e.g. cholesterol,{lipoproteins, or their receptors(-steroid hormones [G01N 33/743](#)-)}
- G01N 33/94 involving narcotics {or drugs or pharmaceuticals, neurotransmitters or associated receptors}
- G01N 33/948 {Sedatives, e.g. cannabinoids, barbiturates {(-opiates [G01N 33/9486](#)-)}
- G01N 35/00** **Automatic analysis not limited to methods or materials provided for in any single one of groups [G01N 1/00](#) to [G01N 33/00](#); Handling materials therefor**
- G01N 35/00029 . . {provided with flat sample substrates, e.g. slides {(-[G01N 35/028](#) takes precedence-)}
- U G01N 35/00584 . . {Control arrangements for automatic analysers}
- U G01N 35/00722 . . {Communications; Identification}
- U G01N 2035/00891 . . . {Displaying information to the operator}

 - involving antibodies to sugar part of glycoproteins ~~(-lectins from plants [G01N 2333/42](#), lectins from mammals [G01N 2333/4724](#)-)~~
- U G01N 2400/10
 - Polysaccharides, i.e. having more than five saccharide radicals attached to each other by glycosidic linkages; Derivatives thereof, e.g. ethers, esters
- G01N 2400/38
 - • Heteroglycans, i.e. polysaccharides having more than one sugar residue in the main chain in either alternating or less regular sequence, e.g. gluco- or galactomannans, e.g. Konjac gum, Locust bean gum, Guar gum ~~(-proteoglycans [G01N 2333/4722](#)-)~~
- G01N 2405/00**
Assays, e.g. immunoassays or enzyme assays, involving lipids ~~(-lipopolysaccharides [G01N 2400/50](#)-)~~
- U G01N 2496/00**
Reference solutions for assays of biological material

G01N 2496/25

- containing added polymers to stabilise biological material against degradation or maintain viscosity or density, e.g. gelatin, polyacrylamides, polyvinyl alcohol (-casein [G01N 2333/4731](#), albumins [G01N 2333/76](#), polysaccharides [G01N 2400/10](#)-)

G01N 2496/45

- containing protease inhibitors, e.g. sulfonylfluorides, chloromethylketones, organophosphates (-peptide-based protease inhibitors [G01N 2333/81](#)-)

U G01N 2500/00

Screening for compounds of potential therapeutic value

G01N 2500/04

- Screening involving studying the effect of compounds C directly on molecule A (e.g. C are potential ligands for a receptor A, or potential substrates for an enzyme A) (e.g. C are potential ligands (agonists or antagonists) for a receptor A, or potential substrates for an enzyme A)

U G01N 2800/00

Detection or diagnosis of diseases

NOTE

1. The indexing codes [G01N 2800/02](#) - [G01N 2800/44](#) are based on The Merck Manual of Diagnosis and Therapy (17th. Edition, Mark Beers and Robert Berkow). 2. For diseases caused by micro-organism where the microorganism is detected, which subject matter is classified in [G01N 33/569](#) and subgroups, [G01N 33/571](#) or [G01N 33/576](#), the present indexing scheme is not used. 3. For cancers, which subject matter is classified in [G01N 33/574](#) and subgroups, the present indexing scheme is not used. 4. When indexing in the following scheme, the organ takes precedence, e.g. inflammation of the skin is indexed with dermatological disorders and not with immunology or allergic disorders, asthma with pulmonary disorders and not with immunology or allergic disorders. Exception is made for thrombosis which is indexed with haematological disorders.

G01N 2800/24

- Immunology or allergic disorders (-SLE [G01N 2800/104](#)-)

G01N 2800/26

- Infectious diseases, e.g. generalised sepsis

NOTE

Indexing code [G01N 2800/26](#) is not used for documents already classified in one or more of groups [G01N 33/569](#) and subgroups, [G01N 33/571](#) or [G01N 33/576](#) and subgroups

G01N 2800/70

- Mechanisms involved in disease identification (-[G01N 2800/02](#) - [G01N 2800/44](#) take precedence-)

Project: N/A (G01P)

U G01P 1/00

Details of instruments

G01P 1/06

- Indicating or recording devices, e.g. for remote indication {(indicating or recording in general [G01D](#); registering or indicating working conditions of vehicles [G07C 5/00](#))}

WARNING

This group is no longer used for the classification of new documents from April 1, 2005. The backlog of this group is being continuously reclassified to [G01P 1/07](#), and [G01P 1/12](#) and s.gr.

U G01P 13/00

Indicating or recording presence, absence, or direction, of movement (electric switches [H01H](#); counting moving objects [G06M 7/00](#))

G01P 13/008

- {-by using a window mounted in the fluid carrying tube [G01P 13/0013](#), [G01P 13/0026](#), [G01P 13/004](#) take precedence}

MEASURING ELECTRIC VARIABLES; MEASURING MAGNETIC VARIABLES (-measuring physical variables of any kind by conversion into electric variables, see Note (4) following the title of class [G01](#); measuring diffusion of ions in an electric field, e.g. electrophoresis, electro-osmosis [G01N](#); investigating non-electric or non-magnetic properties of materials by using electric or magnetic methods [G01N](#); indicating correct tuning of resonant circuits [H03J 3/12](#) ; monitoring electronic pulse counters [H03K 21/40](#) ; monitoring operation of communication systems [H04-](#))

NOTES

This subclass covers:

- measuring all kinds of electric or magnetic variables directly or by derivation from other electric or magnetic variables;
- measuring all kinds of electric or magnetic properties of materials;
- testing electric or magnetic devices, apparatus or networks, (e.g. discharge tubes, amplifiers) or measuring their characteristics;
- indicating presence or sign of current or voltage;
- NMR, EPR or other spin-effect apparatus, not specially adapted for a particular application;
- equipment for generating signals to be used for carrying out such tests and measurements.

In this subclass, the following terms or expressions are used with the meanings indicated :

- "measuring" includes investigating;
- "instruments" or "measuring instruments" means electro-mechanical measuring mechanisms;
- "arrangements for measuring" means apparatus, circuits, or methods for measuring;

Attention is drawn to the Notes following the title of class [G01](#).

In this subclass, group [G01R 17/00](#) takes precedence over groups [G01R 19/00](#) to [G01R 31/00](#) .

G01R 1/00	Details of instruments or arrangements of the types included in groups G01R 5/00 to G01R 13/00 and G01R 31/00 (constructional details particular to {electromechanical} arrangements for measuring the electric consumption G01R 11/02)
G01R 1/02	• General constructional details (details of a kind applicable to measuring arrangements not specially adapted for a specific variable G01D 7/00)
G01R 1/025	• {concerning dedicated user interfaces, e.g. GUI, or dedicated keyboards (G01R 31/31912 takes precedence)}
G01R 1/04	• • Housings; Supporting members; Arrangements of terminals ("burn-in" aspects G01R 31/286 ; terminals H01R ; terminal strips or boards H02B ; housings for electrical apparatus H05K)
G01R 1/0408	• • {Test fixtures or contact fields; Connectors or connecting adaptors; Test clips; Test sockets (G01R 1/067 takes precedence; mass production testing systems G01R 31/01 ; testing of connections G01R 31/04 ; for testing printed circuit boards G01R 31/2808)}
G01R 1/0416	• • • {Connectors, terminals (G01R 1/0425 and G01R 1/0433 take precedence; with measurement function for battery poles G01R 31/3696 ; in general H01R)}
U G01R 1/0433	• • • {Sockets for IC`s or transistors}
G01R 1/0483	• • • {Sockets for un-leaded IC`s having matrix type contact fields, e.g. BGA or PGA devices; Sockets for unpackaged, naked chips (for IC`s with connecting points around the edges only G01R 1/0433)}
G01R 1/06	• • Measuring leads; Measuring probes (G01R 19/145 , G01R 19/165 take precedence; end pieces for leads H01R 11/00)
G01R 1/067	• • • Measuring probes (plugs, sockets or clips G01R 1/0408 ; testing of connections G01R 31/04 ; contacting IC`s for test purposes when probe design is not the essential feature G01R 31/2886 ; using radiation beam as probe G01R 31/302 ; end pieces for wires terminating in a probe H01R 11/18)
G01R 1/06705	• • • {Apparatus for holding or moving single probes (for moving multiple probe heads or ICs under test G01R 31/2886)}
U G01R 1/06711	• • • {Probe needles; Cantilever beams; "Bump" contacts; Replaceable probe pins}
G01R 1/06733	• • • • {Geometry aspects (G01R 1/06727 takes precedence)}
G01R 1/06788	• • • • {Hand-held or hand-manipulated probes, e.g. for oscilloscopes or for portable test instruments (end pieces terminating in a probe H01R 11/18)}
G01R 1/07	• • • • Non-contact-making probes (wireless interface with the DUT G01R 31/3025)
G01R 1/073	• • • • Multiple probes (G01R 1/06783 , G01R 1/06794 , G01R 1/071 , G01R 1/072 take precedence)
U G01R 1/07307	• • • • {with individual probe elements, e.g. needles, cantilever beams or bump contacts, fixed in relation to each other, e.g. bed of nails fixture or probe card}
G01R 1/07314	• • • • • {the body of the probe being perpendicular to test object, e.g. bed of nails or probe with bump contacts on a rigid support (on an elastic support, e.g. a film, G01R 1/0735)}
U G01R 1/07364	• • • • • {with provisions for altering position, number or connection of probe tips; Adapting to differences in pitch}
G01R 1/07378	• • • • • {using an intermediate adapter, e.g. space transformers (G01R 1/07371 takes precedence)}
G01R 1/10	• • Arrangements of bearings (bearings in general F16C)

G01R 1/16	• • Magnets (in general H01F -)
G01R 1/18	• • Screening arrangements against electric or magnetic fields, e.g. against earth's field (measuring shielding efficiency H05K 9/0069 -)
G01R 1/20	• Modifications of basic electric elements for use in electric measuring instruments; Structural combinations of such elements with such instruments (instrument transformers per se H01F 38/20 -)
G01R 1/203	• • {Resistors used for electric measuring e.g. decade resistors standards, resistors for comparators, series resistors, shunts (resistors in general H01C ; microwave or radiowave terminations H01P 1/26 ; coupling devices H01R -)}
G01R 1/206	• • {Switches for connection of measuring instruments or electric motors to measuring loads (switches in general H01H -)}
G01R 1/22	• • Tong testers acting as secondary windings of current transformers (voltage or current isolation using transformers G01R 15/18 -)
G01R 1/36	• Overload protection arrangements or circuits for electric measuring instruments (in general H02H -)
G01R 1/38	• Arrangements for altering the indicating characteristic, e.g. by modifying the air gap (circuits G01R 15/005 -)
G01R 1/44	• Modifications of instruments for temperature compensation (When measuring current or voltage G01R 19/32 -)
G01R 3/00	Apparatus or processes specially adapted for the manufacture {or maintenance} of measuring instruments, {e.g. of probe tips}
G01R 5/00	Instruments for converting a single current or a single voltage into a mechanical displacement (vibration galvanometers G01R 9/02-)
G01R 5/22	• Thermoelectric instruments (measuring effective values of currents or voltages using thermoconverters G01R 19/03 -)
G01R 5/28	• Electrostatic instruments (combined with radiation detector G01T ; { electrometers without passively moving electrodes G01R 15/165 ; measuring electrostatic fields G01R 29/12 ; measuring charge G01R 29/24 })
G01R 7/00	Instruments capable of converting two or more currents or voltages into a single mechanical displacement (- G01R 9/00 takes precedence-)
G01R 7/04	• for forming a quotient (for measuring resistance G01R 27/08 -)
G01R 11/00	Electromechanical arrangements for measuring time integral of electric power {i.e. electric energy} or current, e.g. of consumption (other arrangements for measuring time integral of electric power or current G01R 22/00 ; Boards, panels, desks for energy meters, H02B 1/03 } ; monitoring electric consumption of electrically-propelled vehicles B60L 3/00-)
	<u>NOTE</u>
	For the definition of "arrangement" see Note (2) under G01R
G01R 11/02	• Constructional details (applicable to electric measuring instruments in general G01R 1/00 -)
G01R 11/12	• • Arrangements of bearings (bearings in general F16C -)
G01R 11/24	• • Arrangements for avoiding or indicating fraudulent use (measures against unauthorised operation of bolts, nuts or pins F16B 41/005 ; security seals G09F 3/03 ; preventing of tampering with detection circuits in signaling or alarm circuits G08B 29/046 -)

- G01R 11/25
- Arrangements for indicating or signalling faults (seals [G09F 3/03](#) ; preventing tampering with detection circuits in signalling or alarm circuits [G08B 29/046](#)-)
- NOTE**
Groups [G01R 11/48](#) to [G01R 11/66](#) take precedence over groups [G01R 11/30](#) to [G01R 11/46](#) .
- G01R 11/36
- Induction meters, e.g. Ferraris meters (-~~Ferraris instruments G01R 5/20~~ *Ferraris instruments G01R 5/20*)
- G01R 11/56
- Special tariff meters (-tariff metering in general [G01D 4/00](#)-)
- G01R 11/57
- Multi-rate meters (-[G01R 11/63](#) takes precedence-)
- G01R 13/00**
- Arrangements for displaying electric variables or waveforms (-display by mechanical displacement only [G01R 5/00](#) , [G01R 7/00](#) , [G01R 9/00](#) ; recording frequency spectrum [G01R 23/18](#)-)**
- G01R 13/02
- for displaying measured electric variables in digital form ({ using LCD`s or LED`s [G01R 13/40](#) } ; counters [G06M](#) ; analogue/digital conversion in general [H03M 1/00](#)-)
- U G01R 13/04
- for producing permanent records
- G01R 13/12
- Chemical recording, e.g. clydonographs (-[G01R 13/14](#) takes precedence-)
- G01R 13/20
- Cathode-ray oscilloscopes; {Oscilloscopes using other screens than CRT`s, e.g. LCD`s; (-control arrangements or circuits for cathode-ray tube indicators [G09G 1/00](#) ; cathode ray tubes [H01J 31/00](#)-)}
- G01R 13/202
- {Non-electric appliances, e.g. scales, masks (-luminescent screens for CRT provided with permanent marks or references [H01J 29/34](#) ; optical or photographic arrangements combined with CRT vessels [H01J 29/89](#)-)}
- G01R 13/204
- {Using means for generating permanent registrations, e.g. photographs (-optical or photographic arrangements combined with CRT vessel [H01J 29/89](#)-)}
- G01R 13/206
- {Arrangements for obtaining a 3- dimensional representation (-stereoscopic T.V. [H04N 13/00](#)-)}
- G01R 13/22
- Circuits therefor (-circuits for generating pulses, e.g. saw-tooth waveforms [H03K 3/00](#)-)
- G01R 13/26
- Circuits for controlling the intensity of the electron beam {or the colour of the display}(-brilliance control [H01J 29/98](#)-)
- G01R 13/28
- Circuits for simultaneous or sequential presentation of more than one variable (-electronic switches [H03K 17/00](#)-)
- G01R 13/34
- Circuits for representing a single waveform by sampling, e.g. for very high frequencies (-sample and hold arrangements [G11C 27/02](#)-)
- G01R 13/342
- {for displaying periodic H.F. signals (-[G01R 13/345](#) takes precedence-)}
- G01R 13/345
- {for displaying sampled signals by using digital processors by intermediate A.D. and D.A. convertors (*control circuits for CRT indicators*);(-~~control circuits for CRT indicators~~)}
- G01R 13/36
- using length of glow discharge, e.g. glowlight oscilloscopes (-discharge tubes [H01J](#)-)
- G01R 13/38
- using the steady or oscillatory displacement of a light beam by an electromechanical measuring system (-such measuring systems per se [G01R 5/00](#) , [G01R 7/00](#) , [G01R 9/00](#)-)
- G01R 13/40
- using modulation of a light beam otherwise than by mechanical displacement, e.g. by Kerr effect(-visual indication of correct tuning [H03J 3/14](#)-)}
- U G01R 13/401
- {for continuous analogue, or simulated analogue, display}
- G01R 13/402
- {using active, i.e. light-emitting display devices, e.g. electroluminescent display (-[G01R 13/36](#) and [G01R 13/42](#) take precedence-)}

	G01R 13/404	<ul style="list-style-type: none"> • {for discontinuous display, i.e. display of discrete values (analogue/digital conversion H03M 1/00)}

- G01R 19/32
 - Compensating for temperature change ({ [G01R 19/02](#) to [G01R 19/30](#) take precedence } ; modifications of instruments for temperature compensation [G01R 1/44](#)-)
- G01R 21/00**

Arrangements for measuring electric power or power factor (-[G01R 7/12](#) takes precedence-)
- G01R 21/001
 - {Measuring real or reactive component; Measuring apparent energy (-[G01R 21/01](#) , [G01R 21/02](#) , [G01R 21/08](#) , [G01R 21/10](#) and [G01R 21/127](#) take precedence-)}
- G01R 21/007
 - {Adapted for special tariff measuring (-[G01R 21/01](#) , [G01R 21/02](#) , [G01R 21/08](#) , [G01R 21/10](#) , [G01R 21/1278](#) and [G01R 21/1333](#) take precedence-)}
- G01R 21/01
 - in circuits having distributed constants (-[G01R 21/04](#) , [G01R 21/07](#) , [G01R 21/09](#) , [G01R 21/12](#) take precedence-)
- G01R 21/02
 - by thermal methods {e.g. calorimetric}
- G01R 21/06
 - by measuring current and voltage (-[G01R 21/08](#) to [G01R 21/133](#) take precedence-)
- G01R 21/07
 - • in circuits having distributed constants (-[G01R 21/09](#) takes precedence-)
- G01R 21/08
 - by using galvanomagnetic effect devices, e.g. Hall effect devices (-such devices per se [H01L](#) ; { for current measurements only, see [G01R 15/20](#) })
- G01R 21/10
 - by using square-law characteristics of circuit elements, e.g. diodes, to measure power absorbed by loads of known impedance (-[G01R 21/02](#) takes precedence-)
- G01R 21/127
 - by using pulse modulation (-[G01R 21/133](#) takes precedence; { digital multiplication via delta sigma modulation [G06F 7/60](#) })
- G01R 22/00**

Arrangements for measuring time integral of electric power or current, e.g. by electricity meters (-electromechanical arrangements therefor [G01R 11/00](#) ; monitoring electric consumption of electrically-propelled vehicles [B60L 3/00](#) ; coin freed devices [G07F 15/00](#))]

NOTE

An arrangement for measuring time integral of electric power is classified in group [G01R 21/00](#) if the essential characteristic is the measuring of electric power.

G01R 23/00		Arrangements for measuring frequencies; Arrangements for analysing frequency spectra (-frequency discriminators H03D ; { high frequency probes G01R 1/06772 })
	G01R 23/02	• Arrangements for measuring frequency, e.g. pulse repetition rate{(-using vibrating reeds G01R 9/04 -)}Arrangements for measuring period of current or voltage{(-measuring short-time intervals G04F -)}
U	G01R 23/06	• • by converting frequency into an amplitude of current or voltage
	G01R 23/09	• • • using analogue integrators, e.g. capacitors establishing a mean value by balance of input signals and defined discharge signals or leakage{(-radiation-measuring instruments in which pulses generated by a radiation detector are integrated G01T 1/15 -)}
	G01R 23/14	• • by heterodyning; by beat-frequency comparison{(-generation of oscillations by beating unmodulated signals of different frequencies H03B 21/00 -)}
	G01R 23/15	• • Indicating that frequency of pulses is either above or below a predetermined value or within or outside a predetermined range of values, by making use of non-linear or digital elements{(indicating that pulse width is above or below a certain limit)}(indicating that pulse width is above or below a certain limit)}
	G01R 23/155	• • • {giving an indication of the number of times this occurs, i.e. multi-channel analysers (for pulse characteristics)}(for pulse characteristics)}
	G01R 23/16	• Spectrum analysis; Fourier analysis{(-computing with Fourier series or Walsh functions G06F 17/14 , G06G 7/19 ; spectral data processing-)}
	G01R 23/17	• • with optical{or acoustical}auxiliary devices
	G01R 23/173	• • Wobulating devices similar to swept panoramic receivers{(-panoramic receivers per se H03J 7/32 -)}
	G01R 23/20	• • Measurement of non-linear distortion,{e.g. harmonics or noise, (- G01R 31/31708 takes precedence; noise figure G01R 29/26 -)}
G01R 25/00		Arrangements for measuring phase angle between a voltage and a current, or between voltages or currents (-measuring power factor G01R 21/00 ; measuring position of individual pulses in a pulse train G01R 29/02 ; phase discriminators H03D)
	G01R 25/08	• by counting of standard pulses{(-measuring time intervals G04F -)}
G01R 27/00		Arrangements for measuring resistance, reactance, impedance, or electric characteristics derived therefrom{(-measuring super-conductive properties G01R 33/1238 -)}
	G01R 27/02	• Measuring real or complex resistance, reactance, impedance, or other two-pole characteristics derived therefrom, e.g. time constant{(-by measuring phase angle only G01R 25/00 -)}
		NOTE Groups G01R 27/02 to G01R 27/22 cover variables that directly or indirectly can be measured over two poles of a component or a Thevenin two-pole equivalent. Subgroup G01R 27/26 also covers other techniques, e.g. using electro magnetic waves or network analyzers
	G01R 27/14	• • Measuring resistance by measuring current or voltage obtained from a reference source{(- G01R 27/16 , G01R 27/20 , G01R 27/22 take precedence-)}
	G01R 27/22	• • Measuring resistance of fluids{(-measuring vessels, electrodes therefor G01N 27/07 -)}
U	G01R 27/26	• • Measuring inductance or capacitance; Measuring quality factor, e.g. by using the resonance method; Measuring loss factor; Measuring dielectric constants; {Measuring impedance or related variables}

G01R 27/2605	• • • {Measuring capacitance (-capacitive sensors G01D 5/24 -)}
G01R 27/2617	• • • {Measuring dielectric properties, e.g. constants (-testing dielectric strength G01R 31/12 ; detecting insulation faults G01R 31/025 ; G01R 27/2688 takes precedence-)}
G01R 27/2623	• • • • {Measuring-systems or electronic circuits (- G01R 27/2635 , G01R 27/2682 take precedence-)}
G01R 27/2629	• • • • {Bridge circuits (-bridges for measuring loss angle G01R 27/2694 -)}
U G01R 27/2635	• • • • {Sample holders, electrodes or excitation arrangements, e.g. sensors or measuring cells}
G01R 27/2658	• • • • • {Cavities, resonators, free space arrangements, reflexion or interference arrangements (- G01R 27/2647 takes precedence; optical methods G01R 27/2682 -)}
G01R 27/2688	• • • {Measuring quality factor or dielectric loss, e.g. loss angle, or power factor (-power factor related to power measurements G01R 21/006 ; testing capacitors G01R 31/016 -)}
G01R 27/28	• Measuring attenuation, gain, phase shift or derived characteristics of electric four pole networks, i.e. two-port networks {using network analysers}Measuring transient response (-in line transmission systems H04B 3/46 -)
G01R 29/00	Arrangements for measuring or indicating electric quantities not covered by groups G01R 19/00 to G01R 27/00
G01R 29/02	• Measuring characteristics of individual pulses, e.g. deviation from pulse flatness, rise time, duration (-of amplitude G01R 19/00 ; of repetition rate G01R 23/00 ; of phase difference of two cyclic pulse trains G01R 25/00 ; monitoring pattern of pulse trains H03K 5/19 -)
U G01R 29/027	• • Indicating that a pulse characteristic is either above or below a predetermined value or within or beyond a predetermined range of values
G01R 29/0273	• • • {the pulse characteristic being duration i.e. width (<i>indicating that frequency of pulses is above or below a certain limit</i>)} (<i>indicating that frequency of pulses is above or below a certain limit</i>)}
G01R 29/0276	• • • {the pulse characteristic being rise time (measuring rate of change G01R 19/12)}
G01R 29/033	• • • giving an indication of the number of times this occurs,{i.e. multi-channel analysers (<i>the characteristic being frequency</i>)}(<i>the characteristic being frequency</i>)}
G01R 29/0807	• • {characterised by the application (not used, see subgroups)}
G01R 29/0814	• • • {Field measurements related to measuring influence on or from apparatus, components or humans (-EMC, EMI and similar testing in general G01R 31/001 -), e.g. in ESD, EMI, EMC, EMP testing, measuring radiation leakage; detecting presence of micro- or radiowave emitters; dosimetry; testing shielding; measurements related to lightning}
G01R 29/0821	• • • • {rooms and test sites therefor, e.g. anechoic chambers, open field sites or TEM cells (-for testing antennas G01R 29/105 -)}
G01R 29/085	• • • • {for detecting presence or location of electric lines or cables (-fault detection G01R 31/02 ; fault location G01R 31/08 -)}
G01R 29/0857	• • • • {Dosimetry, i.e. measuring the time integral of radiation intensity; Level warning devices for personal safety use (-Nuclear radiation dosimetry G01T -)}
G01R 29/0864	• • {characterised by constructional or functional features (not used, see subgroups)}
G01R 29/0871	• • • {Complete apparatus or systems; circuits, e.g. receivers or amplifiers (- G01R 29/0878 , G01R 29/0892 take precedence; dosimeters, warning devices G01R 29/0857 -)}

	G01R 29/0878	<ul style="list-style-type: none"> • • {Sensors; antennas; probes; detectors (-Wave guide measuring sections G01R 1/24-)}
U	G01R 29/10	<ul style="list-style-type: none"> • • Radiation diagrams of aerials;{Antenna testing in general}
	G01R 29/105	<ul style="list-style-type: none"> • • {using anechoic chambers; Chambers or open field sites used therefor (-test sites used for measuring on other objects than aerials G01R 29/0828 ; wave absorbing devices H01Q 17/00-)}
	G01R 29/12	<ul style="list-style-type: none"> • Measuring electrostatic fields {or voltage-potential}
	G01R 29/20	<ul style="list-style-type: none"> • Measuring number of turns; Measuring transformation ratio or coupling factor of windings ({testing or} calibrating instrument transformers G01R 35/02-)
	G01R 29/24	<ul style="list-style-type: none"> • Arrangements for measuring quantities of charge (-electrostatic instruments G01R 5/28 ; indicating presence of current G01R 19/15 ; electrolytic meters, calorimetric meters, for measuring time integral of electric current G01R 22/02 , G01R 22/04-)
	G01R 29/26	<ul style="list-style-type: none"> • Measuring noise figure; Measuring signal-to-noise ratio {Measuring jitter, i.e. phase noise,(-distortion G01R 23/20 ; noise measuring in individual transistors G01R 31/2616 , G01R 31/2626-)}
	G01R 31/00	<p>Arrangements for testing electric properties; Arrangements for locating electric faults; Arrangements for electrical testing characterised by what is being tested not provided for elsewhere (-measuring leads, measuring probes G01R 1/06 ; { measuring superconductive properties G01R 33/1238 ; data processing equipment for testing or function monitoring G06F15/20B } ; indicating electrical condition of switchgear or protective devices H01H 71/04 , H01H 73/12 , H02B 11/10 , H02H 3/04 ; testing or measuring semiconductors or solid state devices during manufacture H01L 22/00 ; testing substation equipment, e.g. mobile phones H04M 1/24 ; testing or monitoring of control systems G05B 23/02 ; { testing or monitoring transmitters or receivers H04B 17/00 })</p>
	G01R 31/001	<ul style="list-style-type: none"> • {Measuring interference from external sources to, or emission from, the device under test, e.g. EMC, EMI, EMP or ESD testing (-measuring electromagnetic fields G01R 29/08 ; circuits for generating HV pulses in dielectric strength testing G01R 31/14-)}
	G01R 31/003	<ul style="list-style-type: none"> • {Environmental or reliability tests (-of individual semiconductors G01R 31/2642 ; of PCB's G01R 31/2817 ; of IC's G01R 31/2855 ; of other circuits G01R 31/2849-)}
U	G01R 31/005	<ul style="list-style-type: none"> • {Testing of electric installations on transport means}
	G01R 31/006	<ul style="list-style-type: none"> • • {on road vehicles, e.g. automobiles or trucks (-testing of ignition installations peculiar to internal combustion engines F02P 17/00-)}
	G01R 31/01	<ul style="list-style-type: none"> • Subjecting similar articles in turn to test, e.g. "go/no-go" tests in mass production; Testing objects at points as they pass through a testing station (-G01R 31/18 takes precedence; { for testing batteries G01R 31/36 })
	G01R 31/013	<ul style="list-style-type: none"> • • {Testing passive components (-relays G01R 31/3278 ; electrical windings, e.g. inductors G01R 31/06-)}
	G01R 31/016	<ul style="list-style-type: none"> • • • {Testing of capacitors (-measuring capacitance G01R 27/2605-)}
	G01R 31/02	<ul style="list-style-type: none"> • Testing of electric apparatus, lines or components, for short-circuits, discontinuities, leakage {of current}, or incorrect line connection{(-G01R 31/001 , G01R 31/005 , G01R 31/01 , G01R 31/08 , G01R 31/12 , G01R 31/24 , G01R 31/26 , G01R 31/28 , G01R 31/327 , G01R 31/34 , G01R 31/36 , G01R 31/40 , G01R 31/44 take precedence; measuring electromagnetic field leakage G01R 29/0821 ; testing of sparking plugs H01T 13/58-)}
	G01R 31/021	<ul style="list-style-type: none"> • • {Testing of cables or conductors (-testing of electric windings G01R 31/06 ; testing of insulation of cables G01R 31/1272 ; testing LANs H04L 12/2697 ; testing line transmission systems H04B 3/46-)}

G01R 31/024	<ul style="list-style-type: none"> • {Arrangements for indicating continuity or short-circuits in electric apparatus or lines, leakage or ground faults (-in electric windings G01R 31/06 ; measuring resistance to earth G01R 27/18-)}

RADIO DIRECTION-FINDING; RADIO NAVIGATION; DETERMINING DISTANCE OR VELOCITY BY USE OF RADIO WAVES; LOCATING OR PRESENCE-DETECTING BY USE OF THE REFLECTION OR RERADIATION OF RADIO WAVES; ANALOGOUS ARRANGEMENTS USING OTHER WAVES ({for special applications, see the relevant subclasses, e.g. [A61B](#), [G01F](#), [G01N](#), [G02B](#); measuring dimensions or angles of objects [G01B](#); navigation in general [G01C](#); measuring infrasonic, sonic or ultrasonic vibrations in general [G01H](#); measuring infra-red, visible, or ultra-violet radiation in general [G01J](#); transducers per se, see the relevant subclasses, e.g. [G01L](#), [H01L](#), [H04R](#); measuring direction or velocity of flowing fluids by reception or emission of radiowaves or other waves and based on propagation effects caused in the fluid itself [G01P](#); measuring electric or magnetic variables in general [G01R](#); detecting masses or objects by methods not involving reflection or radiation of radio, acoustic or other waves [G01V](#); {time-interval measuring [G04F](#); aerials [H01Q](#))

NOTES

In this subclass, the following term is used with the meaning indicated:

- "transponder" means an arrangement which reacts to an incoming interrogating or detecting wave by emitting a specific answering or identifying wave.

Attention is drawn to the Notes following the title of class [G01](#) and to Note (1) following the title of subclass [G09B](#).

WARNING

The following IPC group is not used in the CPC scheme. Subject matter covered by this group is classified in the following CPC groups: - [G01S 7/26](#) covered by [G01S 7/06](#)

G01S 1/00

Beacons or beacon systems transmitting signals having a characteristic or characteristics capable of being detected by non-directional receivers and defining directions, positions, or position lines fixed relatively to the beacon transmitters; Receivers co-operating therewith (-position fixing by co-ordinating a plurality of determinations of direction or position lines [G01S 5/00](#)-)
