

Compilation of Changes to the CPC Scheme Between 2014.12 and 2015.01

Presentation Details

- | | |
|---|--|
| Entries for new symbols and headings: | <i>Black text in italics</i> |
| Entries for existing symbols and headings | |
| —text insertions: | <i>Green text in italics with yellow background</i> |
| —text deletions: | Red strikethrough text with grey background |
| Entries for deleted symbols and headings: | Black strikethrough text |
- Entries arranged by project.
 - In cases when the originating project cannot be found, "N/A" is given for the Project information (e.g. the change could be due to an Editorial Correction).
 - Projects ending in "-F" indicate finalisation after reclassification was completed.

Project: MP0121 (B33)

M B33 {ADDITIVE MANUFACTURING TECHNOLOGY}

Project: MP0121 (B33Y)

M B33Y {ADDITIVE MANUFACTURING, i.e. MANUFACTURING OF THREE-DIMENSIONAL [3D3-D] OBJECTS BY ADDITIVE DEPOSITION, ADDITIVE AGGLOMERATION OR ADDITIVE LAYERING, e.g. BY 3D3-D PRINTING, STEREO LITHOGRAPHY OR SELECTIVE LASER SINTERING}

NOTES

1. This subclass covers additive manufacturing, irrespective of the process or material used.
2. This subclass is intended to enable a comprehensive search of subject matter related to additive manufacturing by combination of classification symbols of this subclass with classification symbols from other subclasses. Therefore this subclass covers aspects of additive manufacturing (e.g. 3D printing) that might also be entirely or partially covered elsewhere in CPC.
3. This subclass is for obligatory supplementary classification of subject matter already classified as such in other classification places, when the subject matter contains an aspect of additive manufacturing.
4. The classification symbols of this subclass are not listed first when assigned to patent documents.
5. In this subclass, multi-aspect classification is applied, so that aspects of subject matter that are covered by more than one of its groups should be classified in each of those groups.

M B33Y 10/00 {Processes of additive manufacturing}

M B33Y 30/00 {Apparatus for additive manufacturing; -Details thereof or accessories therefor}

M B33Y 40/00 {Auxiliary operations or equipment, e.g. for material handling}

M B33Y 50/00 {Data acquisition or data processing for additive manufacturing}

M B33Y 50/02 • {for controlling or regulating additive manufacturing processes}

M B33Y 70/00 {Materials specially adapted for additive manufacturing}

M B33Y 80/00 {Products made by additive manufacturing}

M B33Y 99/00 {Subject matter not provided for in other groups of this subclass}

Project: RP0066 (G03B)

G03B 7/081

- • Analogue circuits

WARNING

Group G03B 7/081 is incomplete pending reclassification of documents from group G03B 7/0807.

Until reclassification is complete, groups G03B 7/0807 and G03B 7/081 should be considered in order to perform a complete search.

G03B 7/087

- • for control of both exposure time and aperture ~~{see provisionally also G03B 7/081}~~

WARNING

Group G03B 7/087 is incomplete pending reclassification of documents from group G03B 7/081.

Until reclassification is complete, groups G03B 7/081 and G03B 7/087 should be considered in order to perform a complete search.

G03B 7/089

- • for storage of exposure value in mirror reflex cameras ~~{see provisionally also G03B 7/081}~~

WARNING

Group G03B 7/089 is incomplete pending reclassification of documents from group G03B 7/081.

Until reclassification is complete, groups G03B 7/081 and G03B 7/089 should be considered in order to perform a complete search.

G03B 7/091

- • Digital circuits

WARNING

Group G03B 7/091 is incomplete pending reclassification of documents from group G03B 7/0807.

Until reclassification is complete, groups G03B 7/0807 and G03B 7/091 should be considered in order to perform a complete search.

G03B 7/097

- • for control of both exposure time and aperture ~~{see provisionally also G03B 7/091}~~

WARNING

Group G03B 7/097 is incomplete pending reclassification of documents from group G03B 7/091.

Until reclassification is complete, groups G03B 7/091 and G03B 7/097 should be considered in order to perform a complete search.

G03B 21/00

Projectors or projection-type viewers; -Accessories therefor (devices for changing pictures [G03B 23/00](#); Zoetropes [G03B 25/00](#); photographic printing apparatus [G03B 27/00](#); arrangements for obtaining special effects on stages or in circuses or in arenas [F21W 2111/06](#); optical projection comparators [G01B 9/08](#); projection microscopes [G02B 21/36](#)){ laser projectors using scanning devices [H04N 9/3129](#); interactive projectors, e.g. whiteboards, with input means to control the projection [G06F 3/00](#); optical distortion correction, e.g. keystone [G03B 21/14](#); projection devices comprising an electronic spatial light modulator and peculiar thereto [H04N 5/74](#) or [H04N 9/31](#)}

WARNING

Groups [G03B 21/001](#) to [G03B 21/008](#) are **not complete pending a reorganisation**; **see also** *incomplete pending reclassification of documents from group [G03B 21/00](#)*.

Until reclassification is complete, groups [G03B 21/00](#) and [G03B 21/001](#) to [G03B 21/008](#) should be considered in order to perform a complete search.

G03B 21/14

- Details

WARNING

Groups [G03B 21/142](#) to [G03B 21/147](#) are **not complete pending a reorganisation**; **see also** *incomplete pending reclassification of documents from group [G03B 21/14](#)*.

Until reclassification is complete, groups [G03B 21/14](#) and [G03B 21/142](#) to [G03B 21/147](#) should be considered in order to perform a complete search.

G03B 21/20

- • Lamp houses (condensers per se [G02B](#))

WARNING

Groups [G03B 21/2006](#) to [G03B 21/2093](#) are **not complete pending a reorganisation**; **see also** [G03B 21/20](#)

U G03B 21/58

- • • collapsible, e.g. foldable; of variable area

G03B 21/585

- • • {Inflatable screens}

WARNING

Not complete pending a reorganisation; **see also** Group [G03B 21/585](#) *is incomplete pending reclassification of documents from group [G03B 21/58](#)*.

Until reclassification is complete, groups [G03B 21/58](#) and [G03B 21/585](#) should be considered in order to perform a complete search.

G03B 21/608

- • • {Fluid screens}

WARNING

Not complete pending a reorganisation; **see also** Group [G03B 21/608](#) *is incomplete pending reclassification of documents from group [G03B 21/60](#)*.

Until reclassification is complete, groups [G03B 21/60](#) and [G03B 21/608](#) should be considered in order to perform a complete search.

Project: RP0110 (G02B)

G02B 1/105

- {Protective coatings~~(-anti-fouling arrangements G02B 27/0006)~~}

WARNING

Group G02B 1/105 is no longer used for the classification of documents as of January 15, 2015. The backfile of this group is being reclassified into groups G02B 1/14, G02B 1/16 - G02B 1/18.

Until reclassification is complete, groups G02B 1/105 and G02B 1/14 - G02B 1/18 should be considered in order to perform a complete search.

U G02B 1/11

- • Anti-reflection coatings

G02B 1/111

- • • {using ~~one or more~~ layers comprising organic ~~material~~ materials ~~(-G02B 1/118 takes precedence-)~~}

WARNING

Group G02B 1/111 is incomplete pending reclassification of documents from group G02B 1/118.

Until reclassification is complete, groups G02B 1/111 and G02B 1/118 should be considered in order to perform a complete search.

G02B 1/113

- • • {using ~~one or more layers comprising~~ inorganic ~~material~~ layer materials only~~(-G02B 1/118 takes precedence-)~~}

WARNING

Groups G02B 1/113 - G02B 1/116 are incomplete pending reclassification of documents from group G02B 1/118.

Until reclassification is complete, groups G02B 1/113 - G02B 1/116 and G02B 1/118 should be considered in order to perform a complete search.

G02B 1/116

- • • • {including ~~one or more~~ electrically conducting layers}

NOTE

When {the arrangement of} electrically conducting layers also exhibit an anti-static effect, classification is also made in group G02B 1/16

Project: RP0111 (H02P)

H02P

CONTROL OR REGULATION OF ELECTRIC MOTORS, ELECTRIC GENERATORS, OR DYNAMO-ELECTRIC CONVERTERS; ~~CONTROLLING TRANSFORMERS, REACTORS OR CHOKE COILS~~ (~~{ specially adapted for electrically propelled vehicles B60L}; structure of the starter, brake, or other control devices, see the relevant subclasses, e.g. mechanical brake F16D, mechanical speed regulator G05D, variable resistor H01C, starter switch H01H; systems for regulating electric or magnetic variables using transformers, reactors or choke coils G05F; arrangements structurally associated with motors, generators, dynamo-electric converters, transformers, reactors or choke coils, see the relevant subclasses, e.g. H01F, H02K; connection or control of one generator, transformer, reactor, choke coil, or dynamo-electric converter with regard to conjoint operation with similar or other source of supply H02J; control or regulation of static converters H02M)~~

NOTES

This subclass ~~covers~~ covers arrangements for starting, regulating, electronically commutating, braking, or otherwise controlling motors, generators, dynamo-

electric converters, clutches, brakes, gears, transformers, reactors or choke coils, of the types classified in the relevant subclasses, e.g. [H01F](#), [H02K](#).

This subclass ~~does not cover~~ *does not cover* similar arrangements for the apparatus of the types classified in subclass [H02N](#), which arrangements are covered by that subclass.

In this subclass, the following terms or expressions are used with the meanings indicated:

- *"control"* means influencing a variable in any way, e.g. changing its direction or its value (including changing it to or from zero), maintaining it constant, ~~or~~ limiting its range of variation;
- *"regulation"* means maintaining a variable at a desired value, or within a desired range of values, by comparison of the actual value with the desired value.

In this subclass, it is desirable to add the indexing codes of groups [H02P 2101/00](#) and [H02P 2103/00](#)

Project: RP0112 (H01Q)

H01Q

AERIALS (~~microwave radiators for near-field therapeutic treatment [A61N 5/04](#) ; apparatus for testing aerials or for measuring aerial characteristics [G01R](#); waveguides [H01P](#); radiators or aerials for microwave heating [H05B 6/72](#)~~)

NOTES

This subclass covers:

- in addition to the primary active radiating elements,
 - a) secondary devices for absorbing or for modifying the direction or polarisation of waves radiated from aerials,
 - and
 - b) combinations with auxiliary devices such as earthing switches, lead-in devices, and lightning protectors;
- both transmitting and receiving aerials

This subclass does not cover devices of the waveguide type, such as resonators or lines, not designed as radiating elements, which are covered by subclass [H01P](#).

In this subclass, the following expression is used with the meaning indicated:

- "active radiating element" covers corresponding parts of a receiving aerial.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups: -- [H01Q 5/01](#) covered by [H01Q 5/0003](#) to [H01Q 5/0096](#) -- [H01Q 5/02](#) covered by [H01Q 5/0003](#) to [H01Q 5/0096](#)]

Project: RP0113 (G01R)

G01R 29/08

- Measuring electromagnetic field characteristics{ measuring electrostatic fields [G01R 29/12](#) ; for determining a voltage [G01R 15/14](#) ; measuring magnetic fields [G01R 33/00](#) ; ~~Receiver~~ *Measuring or estimating received* signal strength indication (RSSI) ~~[H04B 17/0042](#) [H04B 17/318](#)~~}

Project: RP0113 (H04N)

- H04N 21/24
 - • • {Monitoring of processes or resources, e.g. monitoring of server load, available bandwidth, upstream requests (~~monitoring of server performance or load [G06F 11/34](#) ; ~~monitoring or testing of transmitters in general [H04B 17/0002](#)~~ ; arrangements for observation, testing or troubleshooting for broadcast or for distribution combined with broadcast [H04H 20/12](#)-)}~~
- H04N 21/44209
 - • • {Monitoring of downstream path of the transmission network originating from a server, e.g. bandwidth variations of a wireless network (~~monitoring or testing of receivers in general by measuring channel quality parameters [H04B 17/0042](#)~~ ; arrangements for maintenance or administration in data switching networks involving bandwidth and capacity management [H04L 12/2439](#)-)}
- H04N 21/4424
 - • • {Monitoring of the internal components or processes of the client device, e.g. CPU or memory load, processing speed, timer, counter or percentage of the hard disk space used (~~error monitoring in general [G06F 11/30](#) ; ~~monitoring or testing of receivers in general with feedback of measurements to the transmitter [H04B 17/0067](#)~~ ; arrangements for monitoring conditions of receiving stations in broadcast systems [H04H 60/32](#) ; diagnosis, testing or measuring for television receivers [H04N 17/04](#)-)}~~
- H04N 21/44245
 - • • {Monitoring the upstream path of the transmission network, e.g. its availability, bandwidth (~~monitoring or testing of receivers in general by measuring channel quality parameters [H04B 17/0042](#)~~)}

Project: RP0114 (G06K)

- G06K 7/0013
 - [by galvanic contacts, e.g. card connectors for ISO-7816 compliant smart cards or memory cards, e.g. SD card readers (~~connectors in general [H01R 13/00](#) ; connectors for SIM cards used in mobile phones or the like [H04B 1/38](#) [H04B 1/3816](#)~~)}

Project: RP0115 (A61K)**A61K****PREPARATIONS FOR MEDICAL, DENTAL, OR TOILET**

PURPOSES (~~devices or methods specially adapted for bringing pharmaceutical products into particular physical or administering forms [A61J 3/00](#) ; chemical aspects of, or use of materials for deodorisation of air, for disinfection or sterilisation, or for bandages, dressings, absorbent pads or surgical articles [A61L](#) ; { compounds per se [C01](#) , [C07](#) , [C08](#) , [C12N](#) } ; soap compositions [C11D](#) ; { micro-organisms per se [C12N](#) }~~)

NOTES

This subclass covers the following subject matter, whether set forth as a composition (mixture), process of preparing the composition or process of treating using the composition:

Drug or other biological compositions which are capable of:

- preventing, alleviating, treating or curing abnormal or pathological conditions of the living body by such means as destroying a parasitic organism, or limiting the effect of the disease or abnormality by chemically altering the physiology of the host or parasite ([biocides \[A01N 25/00\]\(#\)](#) to [A01N 65/00](#)) ;
- maintaining, increasing, decreasing, limiting, or destroying a physiological body function, e.g. vitamin compositions, sex sterilants, fertility inhibitors, growth promoters, or the like (sex sterilants for invertebrates, e.g. insects, [A01N](#) ; plant growth regulators [A01N 25/00](#) to [A01N 65/00](#)) ;

- diagnosing a physiological condition or state by an in vivo test, e.g. X-ray contrast or skin patch test compositions (measuring or testing processes involving enzymes or micro-organisms [C12Q](#) ; in vitro testing of biological material, e.g. blood, urine, [G01N](#) , e.g. [G01N 33/48](#))

Body treating compositions generally intended for deodorising, protecting, adorning or grooming the body, e.g. cosmetics, dentifrices, tooth filling materials.

Attention is drawn to the definitions of groups of chemical elements following the title of section C.

Attention is drawn to the notes in class [C07](#) , for example the notes following the title of the subclass [C07D](#) , setting forth the rules for classifying organic compounds in that class, which rules are also applicable, if not otherwise indicated, to the classification of organic compounds in [A61K](#) .

In this subclass, *with the exception of group A61K 8/00, the last place priority rule is applied, i.e. at each hierarchical level*, in the absence of an indication to the contrary, classification is made in the last appropriate place.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

A61K 6/033	covered by	A61K6/06A
A61K 9/133	covered by	
A61K 9/127		
A61K 9/18	covered by	A61K 9/14
A61K 9/22	covered by	A61K 9/20
A61K 9/24	covered by	
A61K 9/209		
A61K 9/26	covered by	A61K 9/2077
,		
A61K 9/30	covered by	A61K 9/28
A61K 9/32	covered by	A61K 9/28
A61K 9/34	covered by	A61K 9/28
A61K 9/36	covered by	A61K 9/28
A61K 9/38	covered by	A61K 9/28
A61K 9/40	covered by	A61K 9/28
A61K 9/42	covered by	A61K 9/28
A61K 9/44	covered by	
A61K 9/2072		
A61K 9/46	covered by	
A61K 9/0007		
A61K 9/52	covered by	A61K 9/50
A61K 9/54	covered by	A61K 9/5073
,		
A61K 9/5078		A61K 9/5084
A61K 9/56	covered by	A61K 9/50
A61K 9/58	covered by	A61K 9/50
A61K 9/60	covered by	A61K 9/50
A61K 9/62	covered by	A61K 9/50
A61K 9/64	covered by	A61K 9/50
A61K 9/66	covered by	A61K 9/48
A61K 9/68	covered by	
A61K 9/0058		
A61K 9/72	covered by	
A61K 9/0073		
A61K 45/08	covered by	A61K 31/00
,		
A61K 47/04	covered by	
A61K 47/02		

[A61K 50/00](#) covered by [A61K 9/0009](#),
[C09J 9/02](#)

The following IPC indexing codes are not used in the CPC scheme:

[A61K 101/00](#) - [A61K 135/00](#)

Subgroups of [A61K 48/00](#) are incomplete (Jan. 2003). Documents are being reclassified from [A61K 48/00](#) to its subgroups

A61K 8/00

Cosmetic or similar toilet preparations (casings or accessories for storing or handling of solid or pasty toilet or cosmetic substances [A45D 40/00](#))

NOTE

Use of cosmetics or similar toilet preparations is further classified in subclass [A61Q](#).

1. Use of cosmetics or similar toilet preparations is mandatorily further classified in subclass [A61Q](#). 2. In each of groups [A61K 8/02](#) and [A61K 8/18](#), in the absence of an indication of the contrary, classification is made in the last appropriate place. 3. Attention is drawn to the Notes in class [C07](#), for example the notes following the title of subclass [C07D](#), setting forth the rules for classifying organic compounds in that class, which rules are also applicable, if not otherwise indicated, to the classification of organic compounds in group [A61K 8/00](#). 4. Salts or complexes of organic compounds are classified according to the base compounds. If a complex is formed between two or more compounds, classification is made for each compound.

1. Use of cosmetics or similar toilet preparations is mandatorily further classified in subclass [A61Q](#).

2. Attention is drawn to the Notes in class [C07](#), for example the notes following the title of subclass [C07D](#), setting forth the rules for classifying organic compounds in that class, which rules are also applicable, if not otherwise indicated, to the classification of organic compounds in group [A61K 8/00](#).

3 Salts or complexes of organic compounds are classified according to the base compounds. If a complex is formed between two or more compounds, classification is made for each compound.

WARNING

Group [A61K 8/00](#) and subgroups are incomplete. See provisionally also [A61K7/00](#) and subgroups.

A61K 8/02

- characterised by special physical form

NOTE

In this group, the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, classification is made in the last appropriate place.

A61K 8/18

- characterised by the composition

NOTE

In this group, the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, classification is made in the last appropriate place.

A61K 35/00

Medicinal preparations containing materials or reaction products thereof with undetermined constitutionNOTE

(1) In this group, classification is made for each active component or material. For each active component or material, classification is then made in the last appropriate place.

(2) When classifying in this group, ~~the last place rule~~ (applied throughout A61K) does not apply. Namely, classification is also made for each active component or material in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned.

WARNING

Groups A61K 35/13, A61K 35/15, A61K 35/17, A61K 35/19, A61K 35/33, A61K 35/35, A61K 35/51, A61K 35/57, A61K 35/61 do not correspond to former or future IPC. Concordance CPC : IPC for these groups is as follows: - A61K 35/13 : A61K 35/12 - A61K 35/15 : A61K 35/14 - A61K 35/17 : A61K 35/14 - A61K 35/19 : A61K 35/14 - A61K 35/33 : A61K 35/12 - A61K 35/35 : A61K 35/12 - A61K 35/51 : A61K 35/48 - A61K 35/57 : A61K 35/56 - A61K 35/61 : A61K 35/56

A61K 35/12

- Materials from mammals; ~~compositions~~ Compositions comprising non-specified tissues or cells; ~~Compositions~~ comprising non-embryonic stem cells (~~uncharacterized stem cells~~ A61K 35/545); ~~Genetically modified cells~~ (gene therapy C12N 5/10; uncharacterised stem cells A61K 35/545; vaccines or medicinal preparations containing antigens or antibodies A61K 39/00-)

NOTE

~~When~~ If the cells are ~~characterized~~ characterised, classification is given ~~under~~ made in the group covering the corresponding tissue or tissue of origin.

A61K 35/36

- Skin; Hair; Nails; ~~Sebacious~~ Sebaceous glands; Cerumen; {Epidermis; ~~Epithelial cells~~; Keratinocytes; ~~Langerhans cells~~; ~~Ecdodermal cells~~ Ectodermal cells (-islets of Langerhans A61K 35/39-)}

NOTE

~~Epithelial cells of specific tissues, e.g. lung epithelium, are classified under the respective tissue~~

Project: RP0116 (F21V)

F21V

DETAILS OF LIGHTING DEVICES, OF GENERAL APPLICATIONNOTE

1. Groups F21V 1/00-F21V 14/00 cover aspects related to light emission or distribution. Groups F21V 15/00-F21V 31/00 cover aspects not related to light emission or distribution.

~~1. Groups F21V 1/00-F21V 14/00 cover details of those parts involved in light emission or distribution. Groups F21V 15/00-F21V 31/00 cover details of those parts not so involved.~~

2. Details of non-electric lighting devices or systems are classified in groups F21V 35/00-F21V 37/00 only if a special adaptation related to the use of a non-electric light source is of interest.

~~In this subclass have been included only those lighting device details which were considered to be of a kind applicable to the lighting devices of more than one of the subclasses F21L, **F21M**, **F21P**, **F21Q**, F21S. Inventions concerned with~~

details of the kinds provided for are to be classified in this subclass, even though they are only stated to be applied to a device of a single subclass.

3. In this subclass, it is desirable to add the indexing codes of subclasses F21W and F21Y

WARNING

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

F21V 8/00 covered by ~~G02B 6/0001~~ G02B 6/00

F21V 29/00

Protecting lighting devices from thermal damage; Cooling or heating arrangements specially adapted for lighting devices or systems (reflectors specially adapted for cooling F21V 7/20; cooling of air-treatment systems with air-flow over lighting fixtures F24F 3/056; lighting fixtures combined with outlets for air-treatment systems F24F 13/078; cooling of projectors G03B 21/16 { cooling of lighting devices or systems specially adapted for vehicles F21S 48/32})

WARNING

Groups F21V 29/20 to F21V 29/40 do not correspond to former or current IPC groups. Concordance CPC : IPC for these groups is as follows:
F21V 29/20-F21V 29/40 : F21V 29/00

Groups F21V 29/002 - F21V 29/006, F21V 29/02, F21V 29/20, F21V 29/22 12, F21V 29/30, F21V 29/40, and F21V 29/402 are no longer used for the classification of documents as of January 15, 2015. The backfile of these groups is being reclassified into groups F21V 29/002 - F21V 29/89.

Until reclassification is complete, groups F21V 29/002 - F21V 29/006 and F21V 29/02, F21V 29/20, F21V 29/22 12, F21V 29/30, F21V 29/40, and F21V 29/402 should be considered in order to perform a complete search.

Project: RP0118 (A62C)

A62C 2/24

- Operating or controlling mechanisms{(-emergency operation of doors and windows E05F 1/002 , ~~E05F 15/2015~~ E05F 15/72)}

Project: RP0118 (B60J)

B60J 5/0495

	A01D 76/00 - A01D 93/00	<u>Haymakers (-combined with mowers A01D 43/04-); Crop Conditioners</u>
		<u>NOTE</u> In groups A01D 76/00 to A01D 87/00 , the following terms are used with the meanings indicated:

- "hay" includes all mowed forage crop in a dry or partially dry state;
- "haymakers" covers all apparatus working on mowed forage cropland on the ground with the intention to make hay, with the exception of "rakes" which are covered by group [A01D 7/00](#)

- A01D 76/003 • {Hand-operated wheeled rakes (~~hand-operated rakes [A01D 7/00](#)~~)}
- A01D 76/006 • {Hay-sweeps (~~rakes for making stacks [A01D 85/001](#) ; sweep rakes [A01D 87/08](#)~~)}

U A01D 78/00**Haymakers with tines moving with respect to the machine**

- A01D 78/001 • {Side-delivery rakes (~~[A01D 78/04](#) takes precedence~~)}
- U A01D 78/08 • with tine-carrying rotary heads or wheels
- U A01D 78/10 • • the tines rotating about a substantially vertical axis
- A01D 78/1007 • • • {Arrangements to facilitate transportation specially adapted therefor (~~[A01D 78/1021](#) takes precedence; for other agricultural machines or implements [A01B 73/00](#) ; carriers [A01D 80/005](#)~~)}
- A01D 78/1028 • • • {Pivotable rotor support arms (~~[A01D 78/1007](#) takes precedence~~)}
- A01D 78/1064 • • • {Arrangements of tines (~~[A01D 78/1007](#) takes precedence~~)}

A01D 80/00**Parts or details of, or accessories for, haymakers (parts or details specific for one type of machine, see the relevant groups for these machines)**

- A01D 80/005 • {Carriers for the transport of haymakers (~~Arrangements of the haymaker to facilitate transportation [A01D 78/1007](#)~~ *Arrangements of the haymaker to facilitate transportation [A01D 78/1007](#)*)}

A01D 82/00**Crop conditioners, i.e. machines for crushing or bruising stalks (~~combined with harvesters [A01D 43/10](#)~~)****A01D 84/00****Haymakers not provided for in a single one of groups [A01D 76/00](#) to [A01D 82/00](#)**

- A01D 84/02 • with flexible tools

U A01D 85/00**Arrangements for making or setting stacks**

- A01D 85/001 • {making or setting stacks of cereals or grass, e.g. rack formers, fixed haystacks (~~rakes for making windrows, haysweeps [A01D 76/006](#) ; drying racks [A01F 25/12](#)~~)}
- A01D 85/005 • {Forming groups of bales, e.g. bale sledges (~~loaders for bales [A01D 87/12](#) ; vehicles for loading bales [A01D 90/08](#)~~)}

A01D 87/00**Loaders for hay or like field crops (~~combined with mowers [A01D 43/06](#) ; { loading in forage silos [A01F 25/18](#) ; } ; loading in general [B65G](#) , [B66](#)~~)**

- A01D 87/0007 • {with chopping devices (~~harvesters with loaders [A01D 43/06](#) ; forage harvesters [A01D 43/08](#) ; special adaptations of cutting machines for hay, straw or fodder [A01F 29/00](#)~~)}
- A01D 87/0015 • {Arrangements for making a strand (~~forming round bales [A01F 15/07](#)~~)}
- A01D 87/0023 • {Coupling arrangements between tractors, loaders or vehicles (~~for harvesters [A01D 67/005](#)~~)}
- A01D 87/003 • {with gripping or clamping devices (~~manure loaders [A01C 3/04](#)~~)}
- A01D 87/0053 • {Tractor-mounted loaders (~~buck-rakes, transporting rakes [A01D 87/08](#) ; manure loaders [A01C 3/04](#) ; fork loaders, fork lifts [B66F](#) ; earth-moving machines [E02F](#)~~)}
- A01D 87/02 • with conveyer belts {or conveyor chains, with or without pick-up means}

A01D 87/08	• with sweep rakes,{i.e. buck-rakes, e.g. transporting rakes(-gripping or clamping devices A01D 87/003 ; fork loaders A01D 87/0053 -)}
A01D 87/10	• with blowers{(-blowing and conveying B65G 53/00 ; loading or distributing arrangements in forage silos A01F 25/18 -)}
U A01D 87/12	• Loaders for sheaves, stacks or bales
A01D 87/122	• • {for bales on the ground (-vehicles for loading A01D 90/08 -)}
A01D 89/00	Pick-ups for loaders, chaff-cutters, balers, field-threshers, or the like {i.e. attachments for picking-up hay or the like field crops(- field threshers with windrow pick-up apparatus A01D 41/10-)}
A01D 89/006	• {Accessories (-feeding devices for baling presses A01F 15/10 ; for cutting machines A01F 29/10 -)}
A01D 90/00	Vehicles for carrying harvested crops with means for self-loading or unloading (-combined with mowers A01D 43/06 ; load transporting vehicles modified to facilitate loading in general B60P ; bucket cars, i.e having scraper bowls E02F 3/64-)
A01D 90/02	• Loading means{(-loaders A01D 87/00 ; pick-ups A01D 89/00 -)}
U A01D 90/04	• • with additional cutting means
A01D 90/06	• • • with chaff cutters,{i.e. choppers}used as loading and cutting means (- A01D 43/08 takes precedence-)
U A01D 90/08	• • with bale-forming means additionally used for loading; with means for picking-up bales and transporting them into the vehicle
A01D 90/083	• • • {Round-bale trailers (-trailers in general B62D -)}
A01D 90/10	• Unloading means{(-manure distributors A01C 3/06 -)}
A01D 90/12	• with additional devices or implements (-arrangements of coupling devices A01B 59/00 -)
A01D 91/00	Methods for harvesting agricultural products (essentially requiring the use of particular machines, see the relevant groups for the machines)
A01D 91/04	• Products growing above the soil (-fruit, hops A01D 46/00 -)

Project: N/A (A01F)

U A01F 7/00	Threshing apparatus
U A01F 7/02	• with rotating tools (threshing cylinders or concaves A01F 12/18)
U A01F 7/06	• • with axles in line with the feeding direction; { Axial threshing machines}
A01F 7/062	• • • {-with a rotating cage}
A01F 7/065	• • • {-with cage sweep mechanisms}
A01F 7/067	• • • {-with material-flow influencing means}

A61B 1/00

Instruments for performing medical examinations of the interior of cavities or tubes of the body by visual or photographic inspection, e.g. endoscopes (-examination of body cavities or body tracts using ultrasonic, sonic or infrasonic waves [A61B 8/12](#) ; instruments, e.g. endoscopes, for taking a cell sample [A61B 10/00](#) ; endoscopic cutting instruments [A61B 17/32](#) ; surgical instruments using a laser beam being directed along or through a flexible conduit [A61B 18/22](#) ; technical endoscopes [G02B 23/24](#)); Illuminating arrangements therefor (-for the eyes [A61B 3/00](#))

- U A61B 1/00002 • {Operational features of endoscopes}
- U A61B 1/00004 • • {-characterised by electronic signal processing}
- A61B 1/00009 • • • {-of image signals ([G06T](#) takes precedence)}
- U A61B 1/00064 • {Constructional details of the endoscope body}
- A61B 1/00066 • • {-Proximal part of endoscope body, e.g. handles (-[A61B 1/0052](#) takes precedence-)}
- A61B 1/00071 • • {-Insertion part of the endoscope body (-[A61B 1/0055](#) takes precedence-)}
- U A61B 1/0008 • • • {-characterised by distal tip features}

	A61B 1/00087	• • • {Tools (-A61B 17/00234 takes precedence-)}
U	A61B 1/00131	• {Accessories for endoscopes}
	A61B 1/00135	• • {Oversleeves (-A61B 1/00142 takes precedence-)}
	A61B 1/00163	• {Optical arrangements (-A61B 1/002 , A61B 1/06 take precedence-)}
	A61B 1/00165	• • {with light-conductive means, e.g. fibre optics (-A61B 1/07 takes precedence-)}
U	A61B 1/00174	• • {characterised by the viewing angles}
	A61B 1/00181	• • • {for multiple fixed viewing angles (-A61B 1/00193 takes precedence-)}
	A61B 1/002	• having rod-lens arrangements (-A61B 1/055 takes precedence-)
	A61B 1/04	• combined with photographic or television appliances{(-camera adapters G03B 17/48-)}
U	A61B 1/12	• with cooling or rinsing arrangements
	A61B 1/127	• • {with means for preventing fogging (-A61B 1/253 takes precedence-)}
	A61B 1/24	• for the mouth, i.e. stomatoscopes, e.g. with tongue depressors (-tongue depressors per se A61B 13/00-); Instruments for opening or keeping open the mouth (-combined with saliva removers A61C 17/00 ; mouth openers for animals A61D 15/00-)
	A61B 1/32	• Devices for opening or enlarging the visual field, e.g. of a tube of the body (-dilators A61M 29/00-)
	A61B 3/00	Apparatus for testing the eyes; Instruments for examining the eyes (-eye inspection using ultrasonic, sonic or infrasonic waves A61B 8/10 ; devices for treatment of the eyes A61F 9/00 ; exercisers for the eyes A61H 5/00 ; optical systems in general G02B-)
	A61B 3/0008	• {provided with illuminating means (-A61B 3/117 takes precedence; goniolescopes used for laser treatment A61F 9/009 ; illuminating means for optical instruments G02B 27/00-)}
	A61B 3/0075	• {provided with adjusting devices, e.g. operated by control lever (-manipulators B25J-)}
U	A61B 3/02	• Subjective types, i.e. testing apparatus requiring the active assistance of the patient
U	A61B 3/028	• • for testing visual acuity; for determination of refraction, e.g. phoropters
	A61B 3/032	• • • Devices for presenting test symbols or characters, e.g. test chart projectors (-A61B 3/036 takes precedence-)
	A61B 3/04	• • • Trial frames; Sets of lenses for use therewith (-lenses per se G02C 7/02-)
U	A61B 3/10	• Objective types, i.e. instruments for examining the eyes independent of the patients' perceptions or reactions
	A61B 3/1005	• • {for measuring distances inside the eye, e.g. thickness of the cornea (-A61B 3/11 takes precedence-)}
U	A61B 3/103	• • for determining refraction, e.g. refractometers, skiascopes
	A61B 3/1035	• • • {for measuring astigmatism (-testing astigmatism A61B 3/036-)}
	A61B 3/12	• • for looking at the eye fundus, e.g. ophthalmoscopes (-A61B 3/13 takes precedence-)
	A61B 3/125	• • • with contact lenses (-contact lenses per se G02C 7/04-)

A61B 5/00

Detecting, measuring or recording for diagnostic purposes (~~radiation diagnosis [A61B 6/00](#) ; diagnosis by ultrasonic, sonic or infrasonic waves [A61B 8/00](#)~~); **Identification of persons** (~~measuring or recording in general subclasses of [G01](#); medical informatics [G06F 19/30](#)~~)}

WARNING

Groups [A61B 5/40](#) - [A61B 5/748](#) do not correspond to former or present IPC groups. Concordance CPC : IPC for these groups is as follows: [A61B 5/40](#) : [A61B 5/00](#) [A61B 5/41](#) : [A61B 5/00](#) [A61B 5/42](#) : [A61B 5/00](#) [A61B 5/43](#) : [A61B 5/00](#) [A61B 5/44](#) : [A61B 5/00](#) [A61B 5/45](#) : [A61B 5/00](#) [A61B 5/48](#) : [A61B 5/00](#) [A61B 5/68](#) : [A61B 5/00](#) [A61B 5/70](#) : [A61B 5/00](#) [A61B 5/72](#) : [A61B 5/00](#) [A61B 5/74](#) : [A61B 5/00](#)

A61B 5/0002

- Remote monitoring of patients using telemetry, e.g. transmission of vital signals via a communication network (~~[A61B 5/07](#) takes precedence; transmission systems for measured values [G08C](#); transmission [H04B](#); transmission of digital information [H04L](#); wireless communication networks [H04W](#)~~)

U A61B 5/0004

- {characterised by the type of physiological signal transmitted}

A61B 5/0013

- • {Medical image data (~~[A61B 1/00011](#) , [A61B 6/56](#) , [A61B 8/56](#) take precedence~~)}

U A61B 5/0015

- • {characterised by features of the telemetry system}

A61B 5/0017

- • • {transmitting optical signals (~~transmission by light [H04B 10/00](#)~~)}

A61B 5/002

- • • {Monitoring the patient using a local or closed circuit, e.g. in a room or building (~~[A61B 5/0017](#) takes precedence~~)}

A61B 5/0033

- {Features or image-related aspects of imaging apparatus classified in [A61B 5/00](#) , e.g. for MRI, optical tomography or impedance tomography apparatus; arrangements of imaging apparatus in a room (image data processing or generation [G06T](#))}

WARNING

Group [A61B 5/0033](#) and subgroups are not complete pending a reorganisation

A61B 5/004

- {adapted for image acquisition of a particular organ or body part (~~[A61B 5/0082](#) takes precedence; arrangements for optical scanning [A61B 5/0062](#)~~)}

A61B 5/0048

- {Detecting, measuring or recording by applying mechanical forces or stimuli (~~[A61B 5/021](#) , [A61B 5/4884](#) and [A61B 9/00](#) take precedence~~)}

WARNING

Group [A61B 5/0048](#) and subgroups are not complete pending a reorganisation, see also groups [A61B 5/00](#) , [A61B 5/022](#) , [A61B 5/11](#)

A61B 5/0059

- {using light, e.g. diagnosis by transillumination, diascopy, fluorescence (~~[A61B 5/0093](#) , [A61B 5/1455](#) , [A61B 5/02416](#) and [A61B 5/0261](#) take precedence~~)}

A61B 5/0073

- {by tomography, i.e. reconstruction of 3D images from 2D projections (~~[A61B 5/0066](#) takes precedence~~)}

A61B 5/0075

- {by spectroscopy, i.e. measuring spectra, e.g. Raman spectroscopy, infrared absorption spectroscopy (~~[A61B 5/0071](#) takes precedence~~)}

U A61B 5/0082

- {adapted for particular medical purposes}

A61B 5/0084

- • {for introduction into the body, e.g. by catheters (~~[A61B 5/1459](#) takes precedence~~)}

A61B 5/01

- Measuring temperature of body parts; {Diagnostic temperature sensing, e.g. for malignant or inflamed tissue} (~~clinical thermometers [G01K 5/22](#) ; thermometers for special purposes [G01K 13/00](#)~~)

- U A61B 5/02
 - Detecting, measuring or recording pulse, heart rate, blood pressure or blood flow; Combined pulse/heart-rate/blood pressure determination; Evaluating a cardiovascular condition not otherwise provided for, e.g. using combinations of techniques provided for in this group with electrocardiography or electroauscultation; Heart catheters for measuring blood pressure
- A61B 5/021
 - • Measuring pressure in heart or blood vessels (~~A61B 5/0205~~ takes precedence)
 - WARNING
[A61B 5/02108](#) and subgroups are not complete pending a reorganisation; see also group [A61B 5/021](#)
- U A61B 5/02108
 - • {from analysis of pulse wave characteristics}
- A61B 5/02116
 - • • {of pulse wave amplitude (~~A61B 5/02225~~ takes precedence)}
- A61B 5/02141
 - • Details of apparatus construction, e.g. pump units or housings therefor, cuff pressurising systems, arrangements of fluid conduits or circuits (~~A61B 5/02233~~, [A61B 5/0235](#) take precedence)
- A61B 5/0215
 - • by means inserted into the body (~~A61M 25/00~~)
- U A61B 5/022
 - • by applying pressure to close blood vessels, e.g. against the skin; Ophthalmodynamometers
 - WARNING
Subgroups of [A61B 5/022](#) are not complete pending a reorganisation; see also this group
- A61B 5/02233
 - • • {Occluders specially adapted therefor (~~A61B 17/132~~)}
- A61B 5/024
 - • Detecting, measuring or recording pulse rate or heart rate (~~A61B 5/0205~~, [A61B 5/021](#) take precedence)
- A61B 5/02416
 - • {using photoplethysmograph signals, e.g. generated by infra-red radiation (~~A61B 5/14552~~ takes precedence)}
- A61B 5/02444
 - • {Details of sensor (~~A61B 5/02427~~ takes precedence)}
- U A61B 5/0245
 - • by using sensing means generating electric signals, {i.e. ECG signals}
- A61B 5/025
 - • • within occluders, e.g. responsive to Korotkoff sounds (~~A61B 7/04~~)
- A61B 5/026
 - • Measuring blood flow (~~A61B 3/1233~~, [A61B 3/1241](#) take precedence)
- A61B 5/029
 - • • Measuring or recording blood output from the heart, e.g. minute volume (~~A61B 8/065~~ takes precedence)
- A61B 5/03
 - Detecting, measuring or recording fluid pressure within the body other than blood pressure, e.g. cerebral pressure; {Measuring pressure in body tissues or organs (~~A61B 5/205~~ takes precedence)}
- A61B 5/036
 - {by means introduced into body tracts (~~A61B 5/032~~ and [A61B 5/035](#) take precedence)}
- U A61B 5/04
 - Detecting, measuring or recording bioelectric signals of the body of parts thereof
- A61B 5/04005
 - {Detecting magnetic fields produced by bio-electric currents (~~A61B 5/04005~~ measuring magnetic variables in general [G01R 33/00](#))}
- U A61B 5/04012
 - {Analysis of electro-cardiograms, electro-encephalograms, electro-myograms}
- A61B 5/04014
 - • {by measuring frequency distribution using a set of filters (~~A61B 5/04014~~ arrangements for analysing frequency spectra in general [G01R 23/00](#))}
- U A61B 5/0402
 - • Electrocardiography, i.e. ECG
- A61B 5/04023
 - • {Physical templates or devices for measuring ECG waveforms, e.g. an electrocardiograph ruler or caliper (~~A61B 5/04525~~ takes precedence)}

- A61B 5/0408
 - • • Electrodes specially adapted therefor (for foetal cardiography [A61B 5/0448](#) ; for electroencephalograph signals [A61B 5/0478](#) ; for electromyography [A61B 5/0492](#)-)
 - A61B 5/04085
 - • • {Multiple electrode holders (A61B 5/04286 , [A61B 5/0422](#) take precedence-)}
 - U A61B 5/0428
 - • • Input circuits specially adapted therefor
 - A61B 5/04282
 - • • {using insulating or floating elements, e.g. transformers, opto-couplers (transformers for specific applications [H01F 38/00](#) ; amplifiers [H03F](#); optocouplers [H04B 10/80](#)-)}
 - A61B 5/044
 - • • Displays specially adapted therefor (arrangements for displaying electric variables or waveforms, e.g. cathode-ray oscilloscopes, [G01R 13/00](#)-)}
 - U A61B 5/0452
 - • • Detecting specific parameters of the electrocardiograph cycle
 - A61B 5/0456
 - • • {Detecting R peaks, e.g. for synchronising diagnostic apparatus} (physiological signal analysis for synchronising or triggering a measurement or image acquisition [A61B 5/7285](#)-)
 - A61B 5/0476
 - • Electroencephalography (devices for psychotechnics [A61B 5/16](#)-)}
 - A61B 5/048
 - • • Detecting the frequency distribution of signals (analysing frequency spectra in general [G01R 23/00](#)-)}
 - A61B 5/0482
 - • • using biofeedback (biofeedback per se [A61B 5/486](#)-)}
 - A61B 5/0496
 - • Electro-oculography, e.g. detecting nystagmus (measuring or inducing nystagmus [A61B 5/4863](#)-)}
 - A61B 5/05
 - Detecting, measuring or recording for diagnosis by means of electric currents or magnetic fields; {Measuring using microwaves or radiowaves} (A61B 5/02 , [A61B 5/04](#) , [A61B 5/11](#) take precedence-)
 - A61B 5/055
 - • involving electronic or nuclear magnetic resonance, e.g. magnetic resonance imaging (arrangements or instruments for measuring magnetic variables involving electronic or nuclear magnetic resonance, in general [G01R 33/20](#)-)
 - A61B 5/0555
 - • • {Means for positioning of patients (for radiation diagnosis or therapy [A61B 6/04](#)-)}
 - A61B 5/06
 - Devices, other than using radiation, for detecting or locating foreign bodies (or removing same [A61B 17/50](#)-); {determining position of probes within or on the body of the patient}
 - A61B 5/061
 - • {Determining position of a probe within the body employing means separate from the probe, e.g. sensing internal probe position employing impedance electrodes on the surface of the body (A61B 1/00158 takes precedence-)}
- WARNING**
[A61B 5/061](#) and subgroups are not complete pending a reorganisation, see also group(s) [A61B 5/06](#)
- A61B 5/064
 - • • {using markers (A61B 5/062 takes precedence-)}
 - U A61B 5/07
 - Endoradiosondes
 - A61B 5/076
 - • {Permanent implantations} (telemetry using implanted circuitry [A61B 5/0031](#) ; implanted stimulators for therapy [A61N 1/362](#) , [A61N 1/372](#)-)
 - A61B 5/08
 - Detecting, measuring or recording devices for evaluating the respiratory organs (A61B 5/0205 takes precedence-)
 - A61B 5/0806
 - • {by whole-body plethysmography (measuring blood flow using plethysmography [A61B 5/0295](#) ; impedance plethysmography [A61B 5/053](#) ; measuring volume of the body or parts thereof [A61B 5/1073](#)-)}
 - A61B 5/0816
 - • {Measuring devices for examining respiratory frequency (measuring frequency of electric signals [G01R 23/00](#)-)}

- A61B 5/082

 - {Evaluation by breath analysis, e.g. determination of the chemical composition of exhaled breath}(-A61B 5/083 , A61B 5/091 take precedence-)
 - WARNING
Group A61B 5/082 is not complete pending a reorganisation, see also group A61B 5/083
- A61B 5/0826

 - {Detecting or evaluating apnoea events}(-A61B 5/4818 takes precedence-)
 - WARNING
Group A61B 5/0826 is not complete pending a reorganisation, see also group A61B 5/08
- U A61B 5/083

 - • Measuring rate of metabolism by using breath test, e.g. measuring rate of oxygen consumption
- A61B 5/0836

 - • • {Measuring rate of C02 production-}
- U A61B 5/087

 - • Measuring breath flow
- A61B 5/09

 - • • using an element rotated by the flow{(-toys actuated by air current A63H 33/40-)}
- A61B 5/103

 - Detecting, measuring or recording devices for testing the shape, pattern, {colour,}size or movement of the body or parts thereof, for diagnostic purposes}(-A61B 5/08 takes precedence; measuring aids for tailors A41H 1/00 ; measuring instruments specially adapted for dentistry A61C 19/04-)
- A61B 5/1032

 - • {Determining colour for diagnostic purposes}(-measuring colour in general G01J 3/46-)}
- U A61B 5/107

 - • Measuring physical dimensions, e.g. size of the entire body or parts thereof
- A61B 5/1071

 - • • {measuring angles, e.g. using goniometers}(-A61B 5/1123 takes precedence-)}
- A61B 5/1072

 - • • {measuring distances on the body, e.g. measuring length, height or thickness}(-A61B 5/1076 takes precedence-)}
- A61B 5/1075

 - • • {for measuring dimensions by non-invasive methods, e.g. for determining thickness of tissue layer}(-A61B 8/0858 takes precedence-)}
- A61B 5/1076

 - • • {for measuring dimensions inside body cavities, e.g. using catheters}(-A61B 3/1005 takes precedence-)}
- A61B 5/11

 - • Measuring movement of the entire body or parts thereof, e.g. head or hand tremor, mobility of a limb}(-for measuring pulse A61B 5/02-){(-A61B 5/1038 takes precedence; motion detection to correct for motion artifacts in physiological signals A61B 5/721-)}
- A61B 5/1104

 - • • {induced by stimuli or drugs; (-A61B 5/1102 takes precedence; investigating medicinal preparations G01N 33/15-)}
- A61B 5/1107

 - • • {Measuring contraction of parts of the body, e.g. organ, muscle}(-apparatus for measuring work or force in general G01L-)}
- A61B 5/1123

 - • • {Discriminating type of movement, e.g. walking or running}(-A61B 5/1116 , A61B 5/112 take precedence-)}
- U A61B 5/1126

 - • • {using a particular sensing technique}
- A61B 5/1128

 - • • • {using image analysis}(-A61B 5/1127 takes precedence-)}
- A61B 5/117

 - Identification of persons, e.g. finger-printing, foot-printing, impression techniques}(-dental impression cups or articulators A61C 9/00 , A61C 11/00 ; recognition of data G06K ; recognising finger-prints G06K 9/00 ; identification tags G09F 3/00-)}
- A61B 5/12

 - Audiometering{Evaluation or the auditory system, not limited to hearing capacity}(-A61B 5/04845 , A61B 5/4023 take precedence-)}

- A61B 17/3498 . . {Valves therefor, e.g. flapper valves, slide valves} (-haemostasis valves A61M 39/06 ; check valves A61M 39/24-)
- A61B 17/42 . . Gynaecological or obstetrical instruments or methods ({ ligaturing clamps or clips for the umbilical cord A61B 17/122 ; curettage A61B 17/3207 } ; dilators A61M 29/00-)
- A61B 2017/4233 . . {Operations on Fallopian tubes, e.g. sterilization} (-A61B 2017/1125 takes precedence-)
- A61B 17/425 . . for reproduction or fertilisation (-specially adapted for use with animals A61D 19/00-){(not used, see subgroups)}
- A61B 17/435 . . . for embryo{or ova}transplantation
- A61B 17/46 . . Embryotomes (-for animals A61D 1/10-)
- A61B 17/50 . Instruments, other than pincettes or toothpicks, for removing foreign bodies from the human body (-locating otherwise A61B 5/06 ; locating by radiation A61B 6/00 ; { removing calculi A61B 17/22 ; from the eyes A61F 9/00709 })
- A61B 17/54 . Chiropractors` instruments,{e.g. pedicure(-chiropractic devices A61H 1/008-)}
- A61B 17/56 . Surgical instruments or methods for treatment of bones or joints; Devices specially adapted therefor(-orthopaedic methods or devices for non-surgical treatment of bones or joints A61F 5/00-)

NOTE

1. Documents concerning exclusively surgical methods are classified only in this group.
2. Surgical instruments or devices are classified only in the relevant subgroups

- A61B 17/58 . . for osteosynthesis, e.g. bone plates, screws,{setting implements}or the like (-A61B 17/14 , A61B 17/16 take precedence; { splints A61B 5/01 ; traction bandages A61F 13/10 })
- U A61B 17/60 . . . for external osteosynthesis, e.g. distractors, contractors
- A61B 17/62 Ring frames, i.e. devices extending around the bones to be positioned ({ A61B 17/6433 } , A61B 17/66 take precedence-)
- A61B 17/64 Devices extending alongside the bones to be positioned{ not used, see subgroups and A61B 17/60-}
- A61B 17/6408 {Devices not permitting mobility, e.g. fixed to bed, with or without means for traction or reduction} (-without surgery A61F 5/04-)

- A61B 17/6416 {with non-continuous, e.g. hinged, pin-clamp connecting element}(-[A61B 17/6425](#) , [A61B 17/6441](#) take precedence-)}
 - A61B 17/645 {comprising a framework}(-[A61B 17/6425](#) , [A61B 17/6441](#) take precedence-)}
 - U A61B 17/66 {Alignment}, compression or distraction mechanisms
 - A61B 17/663 {for jaw bones, e.g. subcutaneous distractors with external access}(-periodontal bone regeneration [A61C 8/0006](#)-)}
 - A61B 17/68 . . . Internal fixation devices,{including fasteners and spinal fixators, even if a part thereof projects from the skin}(-bone staples [A61B 17/0642](#) ; dental regeneration membranes [A61C 8/0006](#)-)}
- WARNING
Subgroups [A61B 17/686](#) and [A61B 17/688](#) are not complete pending a reorganisation. See also [A61B 17/68](#) , [A61B 17/683](#) and [A61B 17/86](#)
- U A61B 17/70 Spinal positioners or stabilisers;{Bone stabilisers comprising fluid filler in an implant}
 - A61B 17/7001 {Screws or hooks combined with longitudinal elements which do not contact vertebrae}(-[A61B 17/7058](#) takes precedence-)}
 - U A61B 17/7002 {Longitudinal elements, e.g. rods}
 - A61B 17/7004 {with a cross-section which varies along its length}(-[A61B 17/7019](#) takes precedence-)}
 - A61B 17/7008 {with parts of, or attached to, the longitudinal elements, bearing against an outside of the screw or hook heads, e.g. nuts on threaded rods}(-[A61B 17/7007](#) takes precedence-)}
 - A61B 17/701 {Longitudinal elements with a non-circular, e.g. rectangular, cross-section}(-[A61B 17/7005](#) , [A61B 17/7007](#) take precedence-)}
 - A61B 17/7011 {Longitudinal element being non-straight, e.g. curved, angled or branched}(-adjustable length longitudinal elements [A61B 17/7014](#) ; [A61B 17/7019](#) takes precedence, e.g. coil springs-)}
 - A61B 17/7013 {the shape of the element being adjustable before use}(-adjustable length plates [A61B 17/7014](#)-)}
 - A61B 17/7041 {with single longitudinal rod offset laterally from single row of screws or hooks}(-[A61B 17/7044](#) takes precedence-)}
 - A61B 17/7046 {the screws or hooks being mobile in use relative to the longitudinal element}(-[A61B 17/7035](#) takes precedence-)}
- WARNING
incomplete see [A61B 17/7001](#)
- A61B 17/7049 {Connectors, not bearing on the vertebrae, for rigidly linking longitudinal elements together}(-[A61B 17/7055](#) , [A61B 17/7053](#) , [A61B 17/7019](#) take precedence-)}

A61B 17/8858	• • • • • {laterally or radially expansible(-inflatable A61B 17/8855 -)}
A61B 17/8872	• • • • {Instruments for putting said fixation devices against or away from the bone(- A61B 17/7074 , A61B 17/808 take precedence-)}
U A61B 17/8875	• • • • {Screwdrivers, spanners or wrenches}
A61B 17/8894	• • • • • {holding the implant into or through which the screw is to be inserted (- A61B 17/7082 , A61B 17/7091 take precedence-)}
A61B 17/92	• • • • Impactors or extractors, e.g. for removing intramedullary devices{(-insertion or extraction of artificial joints A61F 2/4603 -)}
A61B 18/00	Surgical instruments, devices or methods for transferring non-mechanical forms of energy to or from the body (-eye surgery A61F 9/007 ; ear surgery A61F 11/00-)
U A61B 2018/00571	• {for achieving a particular surgical effect}
A61B 2018/00613	• • {Irreversible electroporation(-reversible electroporation A61N 1/327 -)}
A61B 18/02	• by cooling, e.g. cryogenic techniques (-devices for cooling specific reflex points of the body within cell-life limits A61H 39/06 -)
A61B 18/04	• by heating(-by applying electromagnetic radiation A61B 18/18 ; hyperthermia using electric or magnetic fields, radiation or ultrasound A61N -)
U A61B 18/12	• • by passing a current through the tissue to be heated, e.g. high-frequency current
U A61B 18/14	• • • Probes or electrodes therefor
U A61B 18/1442	• • • • {Probes having pivoting end effectors, e.g. forceps}
A61B 2018/1452	• • • • • {including means for cutting (- A61B 2018/146 takes precedence-)}
A61B 18/1492	• • • • • {having a flexible, catheter-like structure, e.g. for heart ablation (- A61B 18/1477 takes precedence-)}
A61B 18/18	• by applying electromagnetic radiation, e.g. microwaves(-radiation therapy A61N 5/00 -)
U A61B 18/20	• • using laser

- A61B 18/201
 - • • {the beam being delivered through a hollow tube, e.g. forming an articulated arm (-through a flexible conduit [A61B 18/22](#)); Hand-pieces therefor}
- A61B 2018/2035
 - • • {Beam shaping; Optical components therefor (-[A61B 2018/2255](#) takes precedence-)}
- A61B 2018/2065
 - • • {Multiwave; Wavelength mixing, e.g. using four or more wavelengths (-pilot laser [A61B 2018/2025](#)-)}
- U A61B 18/22
 - • • the beam being directed along or through a flexible conduit, e.g. an optical fibre; {Couplings}, hand-pieces therefor
- A61B 2018/2238
 - • • • {with means for selectively laterally deflecting the tip of the fibre (-with balloon [A61B 2017/22051](#)-)}
- A61B 2018/225
 - • • • {Features of handpieces (-[A61B 2018/2255](#) takes precedence-)}
- U A61B 2018/2255
 - • • • {Optical elements at the distal end of probe tips}
- A61B 2018/2272
 - • • • • {with a reflective or refractive surface for deflecting the beam (-[A61B 2018/2261](#) , [A61B 2018/2266](#) take precedence-)}
- A61B 18/24
 - • • • with a catheter (-[A61B 18/26](#) , [A61B 18/28](#) take precedence-)
- A61B 19/00**

Instruments, implements or accessories for surgery or diagnosis not covered by any of the groups [A61B 1/00](#) to [A61B 17/00](#) , e.g. for stereotaxis, sterile operation, luxation treatment, wound edge protectors ({ surgeon`s or patient`s gowns or dresses, surgical masks [A41D 13/00](#) } ; devices for carrying-off, for treatment of, or for carrying-over, body liquids [A61M 1/00](#)-)

WARNING

Groups [A61B 19/20](#) - [A61B 19/56](#) do not correspond to former or current IPC groups.

Concordance CPC : IPC for these groups is as follows: - [A61B 19/20](#) - [A61B 19/56](#) : [A61B 19/00](#)
- A61B 19/02
 - Protective casings or covers for appliances or instruments, e.g. boxes or sterile covers; Instrument tables or cupboards; Doctors` bags (-cleaning devices for surgical instruments [A61B 19/34](#) ; instrument-protective drapes [A61B 19/081](#) ; for sterilising articles [A61L 2/00](#) ; for cleaning for sterilising hypodermic or infusion needles or syringes [A61M 5/001](#) ; for preservation of living parts of the human or animal body [A01N 1/02](#)-)}
- U A61B 2019/0202
 - • {with a lid or cover}
- A61B 2019/0221
 - • • {Types of closures or fasteners (-using adhesives [A61B 2019/0201](#)-)}
- A61B 2019/0225
 - • • • {Locking clamps (-[A61B 2019/0229](#) takes precedence-)}
- A61B 2019/0226
 - • • • {Draw-strings (-ties [A61B 2019/0228](#)-)}
- A61B 2019/0228
 - • • • {Ties (-draw-strings [A61B 2019/0226](#)-)}
- A61B 2019/0229
 - • • • {Toggle latches or clamps (-locking clamps [A61B 2019/0225](#) ; swingable wire bails [A61B 2019/0231](#)-)}
- A61B 2019/0231
 - • • • {Swingable wire bails or handles (-[A61B 2019/0229](#) takes precedence; carrying handles [A61B 2019/0281](#)-)}
- A61B 2019/0232
 - • • • {having additional locking means (-permanent closure means [A61B 2019/0245](#)-)}
- A61B 19/0248
 - • {Furniture specially adapted for surgery or diagnosis, e.g. cabinets, carts, cupboards or tables (-supports for surgeons [A61B 19/28](#) ; medicine cabinets [A47B 67/00](#) ; accommodation for nursing [A61G 12/00](#)-)}
- U A61B 2019/025
 - • • {Carts or trolleys}
- A61B 2019/0251
 - • • • {Mayo stands (-other holding stands [A61B 2019/0259](#)-)}

- A61B 19/0256
 - {Holders for articles, e.g. magnetic holders, racks, stands (-holders for suture needles or materials [A61B 17/06061](#) ; supports as part of surgical instruments [A61B 19/26](#) ; drapes with means to hold surgical instruments [A61B 19/10](#) ; hangers for particular articles [A47F 7/00](#) ; for tooth drills [A61C 3/04](#) ; for receptacles and tubing attached to beds [A61G 7/0503](#) ; for pharmaceutical containers [A61J 1/16](#) ; for irrigation devices [A61M 3/0266](#) ; racks for syringes or for hypodermic or infusion needles [A61M 5/008](#) ; for infusion devices [A61M 5/1414](#) ; for catheters [A61M 25/02](#) ; holding devices for laboratory apparatus [B01L 9/00](#) ; racks for work tools [B25H 3/04](#)-)}
- A61B 2019/0259
 - • {Stands (-Mayo stands [A61B 2019/0251](#)-)}
- A61B 19/026
 - {Casings for packaging, protecting or dispensing articles (-for endoscopes [A61B 1/00142](#) ; for test samples [A61B 10/0096](#) ; for sutures [A61B 17/06114](#) ; for ligaturing clips [A61B 17/1222](#) ; for gloves or finger-stalls [A61B 19/045](#) ; for dental floss [A61C 15/043](#) ; for dental instruments [A61C 19/02](#) ; for prostheses [A61F 2/0095](#) ; for contraceptive devices [A61F 6/005](#) ; for bandages or the like [A61F 15/001](#) ; for pharmaceutical products [A61J 1/00](#) ; for catheters [A61M 25/002](#) ; in general [B65D](#) , e.g. with dispensing means [B65D 83/00](#) ; for ampoules [B65D 85/42](#) ; for clinical thermometers [G01K 1/083](#) ; for optical fibres [G02B 6/444](#) ; for X-ray films [G03C 3/003](#)-)}
- A61B 19/0262
 - • {for sharps (-for suture needles [A61B 17/06114](#) ; for scalpel-blades [A61B 17/3215](#) ; for wound clamps [A61B 17/105](#) ; for used sharps [A61B 19/0288](#) ; for syringes or for hypodermic or infusion needles [A61M 5/002](#) , [A61M 5/1626](#) , [A61M 5/3202](#)-)}
- A61B 2019/0263
 - • • {including foam blocks for retaining sharps (-for retaining suture needles [A61B 2017/06147](#)-)}
- A61B 19/0264
 - • {Carrying bags, cases, trusses (-bags for midwives [A61B 17/48](#) ; bags in general [A45C](#) ; first-aid kits [A61F 17/00](#)-)}
- A61B 19/0271
 - • {Trays (-serving trays [A47G 23/06](#)-)}
- A61B 2019/0274
 - • {containing a preservative liquid, e.g. an antiseptic liquid (-bactericidal products in casings for used articles [A61B 2019/0293](#)-)}
- A61B 2019/0278
 - • {having multiple compartments (-multiple flexible pouches [A61B 2019/027](#)-)}
- A61B 2019/0281
 - • {having carrying handles (-swingable locking handles [A61B 2019/0231](#)-)}
- A61B 2019/0285
 - • {waterproof (-for prostheses [A61F 2250/0076](#)-)}
- A61B 2019/0286
 - • {transparent (-for surgical instruments or accessories [A61B 2017/00902](#) ; for prostheses [A61F 2250/0091](#)-)}
- A61B 19/0287
 - {Casings for removing or collecting used articles (-for sutures [A61B 17/06161](#) ; accessories for operating tables, e.g. for collecting body wastes [A61G 13/10](#) ; combustible sputum cups [A61J 19/06](#) ; sterilising refuse [A61L 11/00](#) ; for destroying hypodermic or infusion needles or syringes [A61M 5/3278](#) ; disposal of medical waste by destroying it or transforming it into something useful or harmless [B09B 3/0075](#) ; for domestic refuse or the like [B65F](#)-)}
- A61B 19/0288
 - • {for sharps (-for suture needles [A61B 17/06161](#) ; for scalpel-blades [A61B 17/3217](#) ; for syringes or for hypodermic or infusion needles [A61M 5/3205](#)-)}
- A61B 2019/0289
 - • • {having additional means for destroying used sharps (-for destroying used hypodermic or infusion needles or syringes [A61M 5/3278](#)-)}
- A61B 19/029
 - • {for absorbent articles, e.g. bandages, cotton balls, covers, drapes, dressings, garments, gauze, gowns, napkins, sponges, swabs or towels (-devices for determining blood loss [A61B 5/02042](#)-)}
- A61B 2019/0291
 - • • {for sponges (-counting means [A61B 2019/4821](#)-)}
- A61B 2019/0293
 - • {containing anti-microbial, anti-viral, bactericidal or disinfectant products (-preservative liquid in packages or dispensers [A61B 2019/0274](#)-)}

- A61B 19/04
 - Operating gloves; Finger-stalls for operating; Devices for treating them, e.g. cleaning, powdering (-glove-boxes for manipulating, gloves therefor [B25J 21/02-](#))
- A61B 19/08
 - Surgical drapes (-bandages, dressings or absorbent pads [A61F 13/00-](#))
- A61B 19/081
 - {for protection of instruments, e.g. microscopes (-for part of endoscope entering the body [A61B 1/00142-](#))}
- A61B 2019/086
 - {for extremities, e.g. having collection pouch (-[A61B 19/12](#) takes precedence-)}
- A61B 19/10
 - {with means to retain or hold surgical implements(-holders for articles [A61B 19/0256-](#))}
- A61B 19/12
 - tubular, e.g. for arms or legs(-[A61B 19/087](#) takes precedence-)}
- A61B 19/20

- A61F 13/4942 {-the barrier not being integral with the top- or back-sheet}
- A61F 13/49426 {-the barrier having an absorbent medium}
- A61F 13/49446 {-the edge leakage prevention means being an impermeable sheet or impermeable part of a sheet placed on or under the top sheet ([A61F 13/49413](#) takes precedence)}
- A61F 13/49453 {-the edge leakage prevention sheet being combined with the impermeable backing sheet, e.g. integral with the backing sheet}
- A61F 13/4946 {-the edge leakage prevention means being an absorbent medium ([A61F 13/49426](#) takes precedence)}
- A61F 13/49466 {-the edge leakage prevention means being at the waist region}
- A61F 13/49473 {-the edge leakage prevention means having a continuous closed form, e.g. circle, ellipse, rectangle}
- U A61F 13/496 in the form of pants or briefs
- A61F 13/4963 {-characterized by the seam}
- U A61F 13/51 . . . characterised by the outer layers {(wicking or transfer layers [A61F 13/537](#))}
- U A61F 13/511 Topsheet, i.e. the permeable cover or layer facing the skin
- A61F 13/51104 {-the top sheet having a three-dimensional cross-section e.g. corrugations, embossments, recesses or projections}
- A61F 13/51108 {-the top sheet having corrugations or embossments having one axis relatively longer than the other axis e.g. forming channels or grooves in a longitudinal direction}
- A61F 13/51113 {-comprising an additive e.g. lotion or odour control [A61F 13/51108](#) takes precedence}
- A61F 13/51121 {-characterised by the material}
- A61F 13/5116 {-being formed of multiple layers ([A61F 13/5123](#) takes precedence)}
- U A61F 13/512 characterised by its apertures, e.g. perforations

- A61F 13/5121 {characterised by the vertical shape of the apertures e.g. three dimensional apertures , e.g. macro-apertures}
- A61F 13/5123 {the apertures being formed on a multilayer top sheet}
- A61F 13/5125 {the apertures not being formed through the complete thickness of the topsheet e.g. blind holes (blind holes in a single layered topsheet [A61F 13/51104](#))}
- A61F 13/5126 {characterised by the planar distribution of the apertures, e.g. in a predefined pattern}
- A61F 13/513 {characterised by its function or properties, e.g. stretchability, breathability, rewet, visual effect;} having areas of different permeability
- A61F 13/51305 {having areas of different permeability}
- A61F 13/51311 {the permeability gradient being in the vertical direction}
- A61F 13/51394 {creating a visual effect, e.g. having a printed or coloured topsheet, printed or coloured sub-layer but being visible from the topsheet, other than embossing for purposes of bonding, wicking, acquisition, leakage-prevention}
- U A61F 13/514 backsheet, i.e. the impermeable cover or layer furthest from the skin ({[A61F 13/15211](#), [A61F 13/15252](#) take precedence)}
- A61F 13/51401 {characterised by the material}
- A61F 13/51403 {with activating means, e.g. for closing apertures upon contact with water}
- A61F 13/51405 {treated or coated, e.g. with moisture repellent agent}
- A61F 13/51456 {characterised by its properties}
- A61F 13/51458 {being air-pervious or breathable}
- A61F 13/5146 {having apertures of perforations}
- A61F 13/51462 {being defined by a value or parameter}
- A61F 13/51464 {being stretchable or elastomeric}
- A61F 13/51466 {providing stretchability without the use of elastic material}
- A61F 13/51474 {characterised by its structure}
- A61F 13/51476 {being three-dimensional, e.g. embossed, textured, pleated, or with three-dimensional features, like gathers or loops}
- A61F 13/51478 {being a laminate, e.g. multi-layered or with several layers}
- A61F 13/5148 {having an impervious inner layer and a cloth-like outer layer}
- A61F 13/51484 {being inhomogeneous in the plane of the sheet, i.e. having zones of different properties or structures}
- A61F 13/51496 {having visual effects}
- A61F 13/51498 {Details not otherwise provided for}
- A61F 13/52 Layers coated or treated to decrease absorbency
- U A61F 13/53 characterised by the absorbing medium ([A61F 13/20](#) takes precedence)
- U A61F 13/531 having a homogeneous composition through the thickness of the pad ([A61F 13/538](#), [A61F 13/539](#) take precedence)
- U A61F 13/532 inhomogeneous in the plane of the pad
- A61F 13/5323 {having absorbent material located in discrete regions, e.g. pockets}
- U A61F 13/534 having an inhomogeneous composition through the thickness of the pad ({[A61F 13/538](#), [A61F 13/539](#) take precedence; homogeneous cores with tissue wrapping [A61F 13/53](#))}
- A61F 13/53409 {having a folded core}
- A61F 13/53418 {having a C-folded cross-section}

- A61F 13/53427 {having an e-folded cross-section}
- A61F 13/53436 {having an undulated or corrugated cross-section}
- U A61F 13/537 characterised by a layer facilitating or inhibiting flow in one direction or plane, e.g. a wicking layer {(A61F 13/538 takes precedence)}
- A61F 13/53704 {the layer having an inhibiting function on liquid propagation}
- A61F 13/53708 {the layer having a promotional function on liquid propagation in at least one direction}
- A61F 13/53713 {the layer having a promotional function on liquid propagation in the vertical direction}
- A61F 13/53717 {the layer having a promotional function on liquid propagation in the horizontal direction}
- A61F 13/53743 {characterised by the position of the layer relative to the other layers}
- A61F 13/53752 {the layer is embedded in the absorbent core}
- A61F 13/53756 {the layer facing the back-sheet}
- A61F 13/5376 {characterised by the performance of the layer, e.g. acquisition rate, distribution time, transfer time}
- U A61F 13/551 Packaging before or after use {(general packaging of absorbent pads B65D 85/00)}
- A61F 13/55105 . . . {packaging of diapers}
- A61F 13/5511 {characterized by the container (A61F 15/00 takes precedence)}

U A61K 31/00

Medicinal preparations containing organic active ingredients

NOTE

When classifying in groups [A61K 31/00](#) to [A61K 41/00](#) the symbol [A61K 2300/00](#) may be added, using Combination Sets, to indicate a mixture of active ingredients.

In the preparation of new organic compounds and their use in medicinal preparations, classification is only made in the relevant subclasses [C07C](#) to [C07J](#) according to the type of compound. However, the inventions dealing with medicinal preparations containing at least two active organic ingredients are always classified in this group in addition to the classification for the type of compounds in [C07C](#) to [C07J](#) .

Attention is drawn to the notes in class [C07](#) , particularly to the definition of steroids given in Note (1) following the title of [C07J](#) and to the definition of carbohydrates and sugars given in the notes following the title of [C07H](#) .

Salts and complexes of organic active compounds are always classified according to the free active compounds. If a complex is formed between two or more active compounds, then they are classified according to all compounds forming the salts or complexes followed by the symbol [A61K 2300/00](#) (i.e. as a mixture of active organic compounds). According to the last place rule, organic active compounds forming salts with heavy metals should be classified in [A61K 33/24](#) to [A61K 33/38](#) and not in subgroups [A61K 31/28](#) to [A61K 31/32](#) , [A61K 31/555](#) or [A61K 31/714](#) .

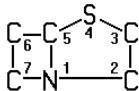

This does not apply to complexes, as apparent from the [A61K 31/00](#) scheme, wherein the complexes hemin and hematin are classified in [A61K 31/555](#) and cyanocobalamin in [A61K 31/714](#) .

From January 2003 onwards, the EPO copies into CPC the IPC classification of the first document received (family representative). However, blends of active ingredients receive the additional symbol [A61K 2300/00](#) as Combination Set.

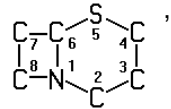

- U A61K 31/045
 - Hydroxy compounds, e.g. alcohols; Salts thereof, e.g. alcoholates
- A61K 31/07
 - • Retinol compounds, e.g. vitamin A (-retinoic acids [A61K 31/203](#)-)
- U A61K 31/095
 - Sulfur, selenium, or tellurium compounds, e.g. thiols

- A61K 31/105
- • Persulfides (-thiuram disulfides [A61K 31/145](#) ; thiosulfonic acids [A61K 31/185](#)-)
- A61K 31/13
- Amines{(-[A61K 31/04](#) takes precedence-)}
- A61K 31/135
- • having aromatic rings {e.g. ketamine, nortriptyline (-methadone [A61K 31/137](#)-)}
- A61K 31/137
- • • Arylalkylamines, e.g. amphetamine, epihephrine, salbutamol, ephedrine {or methadone}
- A61K 31/138
- • • Aryloxyalkylamines, e.g. propanolol, tamoxifen, phenoxybenzamine (-atenolol [A61K 31/165](#) ; pindolol [A61K 31/404](#) ; timolol [A61K 31/5377](#)-)
- A61K 31/14
- • Quaternary ammonium compounds, e.g. edrophonium, choline (-betaines [A61K 31/205](#)-)
- A61K 31/145
- • having sulfur, e.g. thiurams ($>N-C(S)-S-C(S)-N<$ and $>N-C(S)-S-S-C(S)-N<$), Sulfinylamines ($-N=SO$), Sulfonylamines ($-N=SO_2$)(-isothiurea [A61K 31/155](#)-)
- U A61K 31/16
- Amides, e.g. hydroxamic acids
- A61K 31/17
- • having the group $>N-C(O)-N<$ or $>N-C(S)-N<$, e.g. urea, thiourea, carmustine (-isoureas, isothiureas [A61K 31/155](#) ; sulfonylureas [A61K 31/64](#)-)
- A61K 31/175
- • • having the group $>N-C([O])-\overset{|}{N}-N<$, $>N-C(O)-N=N-$ or $>N-C([O])-\overset{|}{N}-N=$, e.g. carbonohydrazides, carbazones, semicarbazides, semicarbazones; Thioanalogues thereof
- A61K 31/18
- • Sulfonamides (-compounds containing a para-N-benzene-sulfonyl-N- group [A61K 31/63](#)-)
- A61K 31/185
- Acids; Anhydrides, halides or salts thereof, e.g. sulfur acids, imidic, hydrazonic, hydroximic acids (-hydroxamic acids [A61K 31/16](#) ; peroxy acids [A61K 31/327](#)-)
- NOTE**
Cyclic anhydrides are considered to be heterocyclic rings
- A61K 31/19
- • Carboxylic acids, e.g. valproic acid (-Salicylic acid [A61K 31/60](#)-)
- U A61K 31/195
- • • having an amino group
- A61K 31/197
- • • • the amino and the carboxyl group being attached to the same acyclic carbon chain, e.g. gamma-aminobutyric acid [GABA], beta-alanine, epsilon-aminocaproic acid, pantothenic acid (-carnitine [A61K 31/205](#)-)
- A61K 31/198
- • • • • Alpha-aminoacids, e.g. alanine, edetic acids [EDTA],(-betaine [A61K 31/205](#) ; proline [A61K 31/401](#) ; tryptophan [A61K 31/405](#) ; histidine [A61K 31/4172](#) ; peptides not degraded to individual aminoacids [A61K 38/00](#)-)
- U A61K 31/20
- • • having a carboxyl group bound to a chain of seven or more carbon atoms, e.g. stearic, palmitic, arachidic acids
- A61K 31/202
- • • • having three or more double bonds, e.g. linolenic (-eicosanoids, e.g. leukotrienes [A61K 31/557](#)-)
- A61K 31/203
- • • • Retinoic acids {Salts thereof}
- U A61K 31/21
- Esters, e.g. nitroglycerine, selenocyanates
- U A61K 31/215
- • of carboxylic acids
- U A61K 31/235
- • • having an aromatic ring attached to a carboxyl group
- U A61K 31/24
- • • • having an amino or nitro group
- A61K 31/245
- • • • • Amino benzoic acid types, e.g. procaine, novocaine (-salicylic acid esters [A61K 31/60](#)-)
- A61K 31/325
- Carbamic acids; Thiocarbamic acids; Anhydrides or salts thereof (-thiurams [A61K 31/145](#)-)

- U A61K 31/33 • Heterocyclic compounds
- U A61K 31/335 • • having oxygen as the only ring hetero atom, e.g. fungichromin
- U A61K 31/34 • • • having five-membered rings with one oxygen as the only ring hetero atom, e.g. isosorbide
- A61K 31/345 • • • Nitrofurans (-nitrofurantoin [A61K 31/4178](#))
- U A61K 31/38 • • having sulfur as a ring hetero atom
- A61K 31/382 • • • having six-membered rings, e.g. thioxanthenes (-thiotixene [A61K 31/496](#)-)
- A61K 31/395 • • having nitrogen as a ring hetero atom, e.g. guanethidine, rifamycins (-rifampin [A61K 31/496](#)-)
- U A61K 31/40 • • • having five-membered rings with one nitrogen as the only ring hetero atom, e.g. sulpiride, succinimide, tolmetin, buflomedil
- A61K 31/409 • • • • having four such rings, e.g. porphyrine derivatives, bilirubin, biliverdine (-hemin, hematin [A61K 31/555](#)-)
- U A61K 31/41 • • • having five-membered rings with two or more ring hetero atoms, at least one of which being nitrogen, e.g. tetrazole
- U A61K 31/425 • • • • Thiazoles
- U A61K 31/429 • • • • • condensed with heterocyclic ring systems
- A61K 31/43 • • • • • Compounds containing 4-thia-1-azabicyclo [3.2.0] heptane ring systems, i.e. compounds containing a ring system of the formula

e.g. penicillins, penems
- U A61K 31/435 • • • having six-membered rings with one nitrogen as the only ring hetero atom
- A61K 31/439 • • • • the ring forming part of a bridged ring system, e.g. quinuclidine (-8-azabicyclo [3.2.1] octanes [A61K 31/46](#)-)
- U A61K 31/44 • • • • Non condensed pyridines; Hydrogenated derivatives thereof
- A61K 31/4406 • • • • • only substituted in position 3, e.g. zimeldine (-nicotinic acid [A61K 31/455](#)-)
- A61K 31/4415 • • • • • Pyridoxine, i.e. Vitamin B6 (-pyridoxal phosphate [A61K 31/675](#)-)
- U A61K 31/4427 • • • • • containing further heterocyclic ring systems
- A61K 31/4439 • • • • • containing a five-membered ring with nitrogen as a ring hetero atom, e.g. omeprazole (-nicotine [A61K 31/465](#)-)
- U A61K 31/445 • • • • • Non condensed piperidines, e.g. piperocaine
- A61K 31/4515 • • • • • having a butyrophenone group in position 1, e.g. haloperidol (-pipamperone [A61K 31/4545](#)-)
- A61K 31/452 • • • • • Piperidinium derivatives (-pancuronium [A61K 31/58](#)-)
- U A61K 31/47 • • • • Quinolines; Isoquinolines
- U A61K 31/4738 • • • • • ortho- or peri-condensed with heterocyclic ring systems
- A61K 31/4745 • • • • • condensed with ring systems having nitrogen as a ring hetero atom, e.g. phenantrolines (-yohimbine derivatives, vinblastine [A61K 31/475](#) ; ergoline derivatives [A61K 31/48](#)-)
- A61K 31/4748 • • • • • forming part of bridged ring systems (-strychnine [A61K 31/475](#) ; morphinan derivatives [A61K 31/485](#)-)
- A61K 31/475 • • • • • having an indole ring, e.g. yohimbine, reserpine, strychnine, vinblastine (-vincamine [A61K 31/4375](#)-)
- A61K 31/495 • • • having six-membered rings with two {or more} nitrogen atoms as the only ring heteroatoms, e.g. piperazine {or tetrazines} (-[A61K 31/48](#) takes precedence-) (-with three nitrogen atoms [A61K 31/53](#)-)

- A61K 31/53
- • • having six-membered rings with three nitrogens as the only ring hetero atoms, e.g. chlorazaniol, melamine, (-melarsoprol [A61K 31/555](#))(-with four nitrogen atoms [A61K 31/495](#))}
- U A61K 31/54
- • • having six-membered rings with at least one nitrogen and one sulfur as the ring hetero atoms, e.g. sulthiame
- U A61K 31/542
- • • • ortho- or peri-condensed with heterocyclic ring systems
- A61K 31/545
- • • • Compounds containing 5-thia-1-azabicyclo [4.2.0] octane ring systems, i.e. compounds containing a ring system of the formula:
- 
- e.g. cephalosporins, {cefaclor, or cephalaxine}
- U A61K 31/55
- • • having seven-membered rings, e.g. azelastine, pentylenetetrazole
- U A61K 31/551
- • • • having two nitrogen atoms, e.g. dilazep
- A61K 31/5513
- • • • 1,4-Benzodiazepines, e.g. diazepam {or clozapine}
- A61K 31/557
- Eicosanoids, e.g. leukotrienes {or prostaglandins}
- U A61K 31/56
- Compounds containing cyclopenta[a]hydrophenanthrene ring systems; Derivatives, e.g. steroids
- NOTE
- Attention is drawn to Note (1) following the title of subclass [C07J](#) which explains what is covered by the term "steroids"
- U A61K 31/57
- • substituted in position 17 beta by a chain of two carbon atoms, e.g. pregnane, progesterone
- A61K 31/573
- • • substituted in position 21, e.g. cortisone, dexamethasone, prednisone {or aldosterone}
- A61K 31/58
- • containing heterocyclic rings, e.g. danazol, stanozolol, pancuronium or digitogenin (-digitoxin [A61K 31/7048](#))}
- U A61K 31/60
- Salicylic acid; Derivatives thereof
- A61K 31/609
- • Amides, e.g. salicylamide (-labetalol, metoclopramide [A61K 31/166](#))}
- A61K 31/612
- • having the hydroxy group in position 2 esterified, e.g. salicylsulfuric acid (-fosfosal [A61K 31/661](#))
- A61K 31/625
- • having heterocyclic substituents, e.g. 4-salicycloylmorpholine, (-sulfasalazine [A61K 31/635](#))
- U A61K 31/66
- Phosphorus compounds
- A61K 31/661
- • Phosphorus acids or esters thereof not having P-C bonds, e.g. fosfosal, dichlorvos, malathion {or mevinphos}
- A61K 31/70
- Carbohydrates; Sugars; Derivatives thereof (-sorbitol [A61K 31/047](#))
- NOTE
- In this group, the expressions are used with the meanings indicated in Note (3) following the title of the subclass [C07H](#)
- A61K 31/7012
- • Compounds having a free or esterified carboxyl group attached, directly or through a carbon chain, to a carbon atom of the saccharide radical, e.g. glucuronic acid, neuraminic acid (-gluconic acid [A61K 31/191](#) ; ascorbic acid [A61K 31/375](#))
- A61K 31/7016
- • Disaccharides, e.g. lactose, lactulose (-lactobionic acid [A61K 31/7032](#))
- U A61K 31/7028
- • Compounds having saccharide radicals attached to non-saccharide compounds by glycosidic linkages
- U A61K 31/7034
- • • attached to a carbocyclic compound, e.g. phloridzin

	A61K 31/704	<ul style="list-style-type: none"> • • • attached to a condensed carbocyclic ring system, e.g. sennosides, thiocolchicosides, escin, daunorubicin{(-digitoxin A61K 31/7048-)}
U	A61K 31/7042	<ul style="list-style-type: none"> • • Compounds having saccharide radicals and heterocyclic rings
	A61K 31/7048	<ul style="list-style-type: none"> • • • having oxygen as a ring hetero atom, e.g. leucoglucosan, hesperidin, erythromycin, nystatin {digitoxin or digoxin}
U	A61K 31/715	<ul style="list-style-type: none"> • • Polysaccharides, i.e. having more than five saccharide radicals attached to each other by glycosidic linkages; Derivatives thereof, e.g. ethers, esters
	A61K 31/726	<ul style="list-style-type: none"> • • • Glycosaminoglycans, i.e. mucopolysaccharides {(-chondroitin sulfate, dermatan sulfate A61K 31/737-)}
	A61K 31/737	<ul style="list-style-type: none"> • • • Sulfated polysaccharides, e.g. chondroitin sulfate, dermatan sulfate {(-A61K 31/727 takes precedence-)}
U	A61K 31/74	<ul style="list-style-type: none"> • Synthetic polymeric materials
	A61K 31/80	<ul style="list-style-type: none"> • • Polymers containing hetero atoms not provided for in groups A61K 31/755 to A61K 31/795
	A61K 35/02	<ul style="list-style-type: none"> • from inanimate materials (<i>carbon A61K 33/44</i>)
	A61K 35/04	<ul style="list-style-type: none"> • • Tars; Bitumens; Mineral oils; Ammonium bituminisulfonates, e.g. ichthyol bituminosulfonate (-carbon A61K 33/00-)

A61K 35/644	• • • {Beeswax; Propolis; Royal jelly; Honey}
A61K 35/646	• • • { arachnids <i>Arachnids</i> , e.g. spiders, scorpions, ticks or mites}
A61K 35/648	• • • {Myriapods, e.g. centipedes or millipedes}
A61K 35/65	• • {Amphibians, e.g. toads, frogs, salamanders; <i>or</i> newts}
N A61K 35/655	• • <i>Aquatic animals other than those covered by groups A61K 35/57 - A61K 35/65</i>
A61K 35/66	• Micro-organisms or materials thereof <i>therefrom</i> (mutated microorganisms or microorganisms per se C12R 1/00 ; microorganisms in food, for nutritional purposes A23L 1/3014 ; fungi, yeast or candida A61K 36/06 fungi, yeasts or candida A61K 36/06)
NOTE Classification is given in this group only the micro-organism is the active ingredient	
A61K 35/68	• • Protozoa{, e.g. flagella, amoebas, sporozoans, plasmodium or toxoplasma}
A61K 35/74	• • Bacteria{ (therapeutic use of a bacterial protein A61K 38/00 ; bacteria per se or mutant bacteria C12R 1/00 ; bacteria in food, for nutritional purposes A23L 1/3014)}
A61K 35/741	• • • {Probiotics (as part of food or functional food A23L 1/3014 ; probiotic yeast, <i>i.e.e.g.</i> saccharomyces A61K 36/06)}
A61K 35/742	• • • • {Spore-forming bacteria, e.g. Bacillus coagulans, <i>Bacillus subtilis, clostridium</i> or Lactobacillus sporogenes}
A61K 35/744	• • • • {Lactic acid bacteria, e.g. enterococci, pediococci, lactococci, streptococci, leuconostoc <i>or leuconostocs</i> }
A61K 35/745	• • • • • {Bifidobacteria}
A61K 35/747	• • • • • {Lactobacilli, e.g. L. acidophilus; <i>or</i> L. brevis}
A61K 35/748	• • • {Cyanobacteria; Spirulina; Blue-green algae; Blue <i>Cyanobacteria, i.e. blue-green bacteria or blue-green algae, e.g. spirulina</i> (-algae, microalgae or microphytes A61K 36/00 A61K 36/02)}
A61K 35/76	• • Viruses; {Bacteriophages; (viruses per se C12N 7/00 ; viral proteins per se C07K 14/005 ; use of virus as a vector C12N 15/86 ; use of virus or part thereof as vaccine A61K 39/12 ; therapeutic use of a viral protein A61K 38/16)} <i>Subviral particles; Bacteriophages</i>
A61K 35/761	• • • {Adenovirus}
A61K 35/763	• • • {Herpes virus}
A61K 35/765	• • • {Reovirus; Rotavirus}
A61K 35/766	• • • {Rhabdovirus, e.g. vesicular stomatitis virus}
A61K 35/768	• • • { Other oncolytic viruses <i>Oncolytic viruses not provided for in groups A61K 35/761 - A61K 35/766</i> }
A61K 36/00	Medicinal preparations of undetermined constitution containing material from algae, lichens, fungi or plants, or derivatives thereof, e.g. traditional herbal medicines{(-antigens from pollen A61K 39/36)}

NOTE

In this group, common names of plants, where given, are presented in brackets following their corresponding Latin names.

A61K 38/00

Medicinal preparations containing peptides (~~peptides containing beta-lactam rings [A61K 31/00](#) ; cyclic dipeptides not having in their molecule any other peptide link than those which form their ring, e.g. piperazine-2,5-diones, [A61K 31/00](#) ; ergot alkaloids of the cyclic peptide type [A61K 31/48](#) ; containing macromolecular compounds having statistically distributed amino acid units [A61K 31/74](#) ; medicinal preparations containing antigens or antibodies [A61K 39/00](#) ; medicinal preparations characterised by the non-active ingredients, e.g. peptides as drug carriers, [A61K 47/00](#)~~)

NOTES

The terms or expressions used in this group follow exactly the definitions given in Note (1) following the title of subclass [C07K](#) .

Preparations containing fragments of peptides or peptides modified by removal or addition of amino acids, by substitution of amino acids by others, or by combination of these modifications are classified as the preparations containing parent peptides. However, preparations containing fragments of peptides having only four or less amino acids are also classified in groups [A61K 38/05](#) to [A61K 38/07](#) .

Preparations containing peptides prepared by recombinant DNA technology are not classified according to the host, but according to the original peptide expressed, e.g. preparations containing HIV peptide expressed in E. coli are classified with the preparations containing HIV peptides.

This group covers also medicinal preparation containing DNA or RNA encoding for peptides as active ingredient.

Documents relating to new peptides, e.g. enzymes, or new DNA or RNA encoding for peptides and their use in medicinal preparations are classified in subclass [C07K](#) or in group [C12N 9/00](#) according to the peptides, with the appropriate indexing codes relating to their medical uses.

- A61K 38/005 • {Enzyme inhibitors}(~~protease inhibitors [A61K 38/55](#)~~)
- A61K 38/04 • Peptides having up to 20 amino acids in a fully defined sequence; Derivatives thereof ({ enzyme inhibitors [A61K 38/005](#) } ; gastrins{ [A61K 38/2207](#) } somatostatins [A61K 38/31](#) , melanotropins [A61K 38/34](#) ; { protease inhibitors [A61K 38/55](#) })
- A61K 38/08 • • Peptides having 5 to 11 amino acids(~~([A61K 38/043](#) to [A61K 38/046](#) take precedence)~~)
- A61K 38/10 • • Peptides having 12 to 20 amino acids(~~([A61K 38/043](#) to [A61K 38/046](#) take precedence)~~)
- A61K 38/12 • • Cyclic peptides{, e.g. bacitracins; Polymyxins; Gramicidins S, C; Tyrocidins A, B or C (~~[A61K 38/043](#) to [A61K 38/046](#) take precedence~~)}
- A61K 38/14 • • Peptides containing saccharide radicals; Derivatives thereof {e.g. bleomycin, phleomycin, muramylpeptides or vancomycin}
- A61K 38/16 • Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof(~~(enzyme inhibitors [A61K 38/005](#))~~)
- A61K 38/17 • • from animals; from humans(~~(enzyme inhibitors [A61K 38/005](#))~~)
- A61K 38/1703 • • • {from vertebrates}(~~([A61K 38/1767](#) takes precedence)~~)
- U A61K 38/177 • • • {Receptors; Cell surface antigens; Cell surface determinants}
- A61K 38/1796 • • • • {for hormones}(~~(for neuromediators [A61K 38/1787](#))~~)
- U A61K 38/19 • • • Cytokines; Lymphokines; Interferons
- A61K 38/191 • • • • {Tumor necrosis factors [TNF]}, e.g. lymphotoxin [LT] i.e. TNF-beta}
- A61K 38/193 • • • • {Colony stimulating factors [CSF]}
- A61K 38/22 • • • Hormones (~~(derived from pro-opiomelanocortin, pro-enkephalin or pro-dynorphin [A61K 38/33](#) , e.g. corticotropin [A61K 38/35](#))~~)

A61K 38/2207	• • • {Gastrins; Cholecystokinins [CCK]}
A61K 38/30	• • • Insulin-like growth factors (somatomedins), e.g. IGF-1, IGF-2{ insulin-like growth factor binding protein A61K 38/1754 -}
U A61K 38/43	• Enzymes; Proenzymes; Derivatives thereof
<p>NOTE</p> <p>In this group, 1. proenzymes are classified with the corresponding enzymes; 2. enzymes are generally categorised according to the "Nomenclature and Classification of Enzymes" of the International Commission of Enzymes. Where appropriate, this designation appears in the subgroups below in parenthesis. 3. the specific enzyme(s) used are additionally classified in C12Y .</p>	
A61K 38/54	• • Mixtures of enzymes or proenzymes covered by more than a single one of groups A61K 38/44 to A61K 38/46 or A61K 38/51 to A61K 38/53
U A61K 38/55	• Protease inhibitors
A61K 38/57	• • from animals; from humans{(- A61K 38/553 , A61K 38/556 take precedence-)}
A61K 39/00	Medicinal preparations containing antigens or antibodies (-materials for immunoassay G01N 33/53-)
<p>NOTES</p> <p>Groups A61K 39/002 to A61K 39/295 cover preparations containing protozoa, bacteria, viruses, or subunits thereof, e.g. membrane parts.</p> <p>Preparation of antigen or antibody compositions is also classified in subclass C12N , if the step of cultivating the micro-organism is of interest.</p> <p>Documents relating to new peptides, e.g. enzymes, or new DNA or RNA encoding for peptides and their use in medicinal preparations are classified in subclass C07K or in group C12N 9/00 according to the peptides, with the appropriate indexing codes relating to their medical uses.</p> <p>Documents relating to antibodies or DNA or RNA encoding for antibodies and their use in medicinal preparations are classified in group C07K 16/00 or in group C12N 9/0002 according to the antibodies, with the appropriate indexing codes relating to their medical uses.</p> <p>Documents relating to new therapeutical uses of antibodies or DNA or RNA encoding for antibodies are classified in group C07K 16/00 or in group C12N 9/0002 according to the antibodies, with the appropriate indexing codes relating to their medical uses.</p> <p>Documents relating to medicinal preparations containing different antibodies as active ingredients are classified in group C07K 16/00 according to the different active antibodies, with the appropriate indexing codes relating to their medical uses. However, documents relating to medicinal preparations containing antibodies and other compounds as active ingredients are classified in groups A61K 39/395 to A61K 39/42 , in association with symbol A61K 2300/00 in Combination Sets.</p>	
A61K 39/0005	• {Vertebrate antigens (-from snakes A61K 39/38 -)}
U A61K 39/02	• Bacterial antigens
A61K 39/05	• • {Actinobacteria, e.g. Actinomyces, Streptomyces, Nocardia, Bifidobacterium, Gardnerella}, Corynebacterium; Propionibacterium{(-Mycobacterium A61K 39/04 -)}
U A61K 39/12	• Viral antigens

A61K 39/295	<ul style="list-style-type: none"> • Polyvalent viral antigens (-vaccinia virus or variola virus A61K 39/285); Mixtures of viral and bacterial antigens
	<p>WARNING</p> <p>This group is no longer used for the classification of new documents as from April 1, 2012. The backlog of this group is being continuously reclassified to A61K 39/0015, to subgroups of A61K 39/0016 and of A61K 39/12</p>
A61K 39/395	<ul style="list-style-type: none"> • Antibodies (-agglutinins A61K 38/36 ; { as drug carriers A61K 47/48 }); Immunoglobulins; Immune serum, e.g. antilymphocytic serum
U A61K 2039/54	<ul style="list-style-type: none"> • {characterised by the route of administration}
U A61K 2039/541	<ul style="list-style-type: none"> • {Mucosal route}
A61K 2039/544	<ul style="list-style-type: none"> • • {to the airways (-intranasal A61K 2039/543-)}

A61K 47/10	<ul style="list-style-type: none"> • • Alcohols; Phenols; Salts thereof,{e.g. glycerol; Polyethylene glycol [PEG]; Poloxamers; PEG/POE alkyl ethers (-sugar alcohols A61K 47/26 ; copolymers containing polyalkylene glycol or poloxamer A61K 47/34-)}
A61K 47/14	<ul style="list-style-type: none"> • • Esters of carboxylic acids{e.g. fatty acid monoglycerides, medium-chain triglycerides, parabens}
A61K 47/20	<ul style="list-style-type: none"> • • containing sulfur,{e.g. DMSO, docusate, sodium lauryl sulfate (-A61K 47/183 , A61K 47/186 take precedence-)}
A61K 47/22	<ul style="list-style-type: none"> • Heterocyclic compounds,{e.g. ascorbic acid, tocopherol, pyrrolidones (-A61K 47/183 , A61K 47/186 take precedence-)}
A61K 47/26	<ul style="list-style-type: none"> • Carbohydrates,{e.g. mono-, di-, oligosaccharides, nucleic acids, sugar alcohols, amino sugars; Derivatives thereof, e.g. polysorbates, sorbitan fatty acid esters, glycyrrhizin (-A61K 47/183 , A61K 47/186 take precedence-)}
A61K 47/28	<ul style="list-style-type: none"> • Steroids,{e.g. cholesterol, bile acids, glycyrrhetic acid (-A61K 47/183 , A61K 47/186 take precedence-)}
U A61K 47/30	<ul style="list-style-type: none"> • Macromolecular compounds

- A61K 47/34
- • Macromolecular compounds obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds, {e.g. polyesters, polyamino acids, polysiloxanes, copolymers of polyalkylene glycol or poloxamer (-PEG or poloxamers [A61K 47/10](#)-)}
- NOTE
- This group does not cover polyalkoxylated compounds, which are classified according to the derivatized compounds. The following list provides examples of such polyalkoxylated compounds together with their relevant group:
- POE alkyl ethers [A61K 47/10](#)
 - PEG fatty acid esters [A61K 47/14](#)
 - poloxamines [A61K 47/18](#)
 - polysorbates [A61K 47/26](#)
 - POE castor oil [A61K 47/44](#)
- U A61K 47/36
- • Polysaccharides; Derivatives thereof, {e.g. gums, starch, alginate, dextrin, hyaluronic acid, chitosan, inulin, agar, pectin}
- A61K 47/40
- • Cyclodextrins; Derivatives thereof {(-cyclodextrin inclusion compounds [A61K 47/48969](#)-)}
- A61K 47/42
- • Proteins; Polypeptides; Degradation products thereof; Derivatives thereof {e.g. albumin, gelatin, zein (-oligopeptides having up to 5 amino acids [A61K 47/183](#) ; polyamino acids [A61K 47/34](#)-)}
- A61K 47/44
- Oils, fats or waxes according to more than one of groups [A61K 47/02](#) to [A61K 47/42](#) ; {Natural or modified natural oils, fats or waxes, e.g. (polyethoxylated) castor oil, montan wax, ozokerite, lignite, shellac, rosin, beeswax, lanolin (-synthetic glycerides, e.g. medium-chain triglycerides [A61K 47/14](#)-)}
- U A61K 47/48
- the non-active ingredient being chemically bound to the active ingredient, e.g. polymer drug conjugates
- U A61K 47/48007
- {the pharmacologically- or therapeutically-active agent being covalently bound or complexed to a modifying agent}
- NOTE
- The modifying agent being a macromolecular compound [A61K 47/48169](#), a peptide, protein or polyamino acid [A61K 47/48238](#), an antibody or immunoglobulin [A61K 47/48369](#)
- A61K 47/48015
- • {the modifying agent being an inorganic compound; e.g. inorganic ion that being chemically complexed with the pharmacologically- or therapeutically-active agent (-[A61K 47/48161](#) takes precedence-)}
- NOTE
- Classic ion pairs of medicinal agents are not classified in [A61K 47/48](#) but in [A61K 31/00](#)
- A61K 47/48023
- • {the modifying agent being an organic compound (-[A61K 47/48161](#) takes precedence-)}
- A61K 47/48061
- • • {the modifying agent being a heterocyclic compound (-[A61K 47/48153](#) takes precedence-)}
- U A61K 47/48169
- {the modifying agent being an organic macromolecular compound, i.e. an oligomeric, polymeric, dendrimeric molecule}
- NOTE
- a peptide, protein, polyamino acid being classified in [A61K 47/48238](#) and subgroups; an antibody in [A61K 47/48369](#) and subgroups. In case of block copolymers, the different (large) blocks are classified in the appropriate [A61K 47/48169](#) or [A61K 47/48238](#) subgroups

- U A61K 47/48192 . . . {the organic macromolecular compound has been obtained otherwise than by reactions only involving carbon-to-carbon unsaturated bonds, e.g. polyureas, polyurethanes}
- A61K 47/48207 . . . {the macromolecule is/contains a polyamide, e.g. nylon} (-polyamino acids [A61K 47/48238](#)-)}
- U A61K 47/48238 . . {the modifying agent being a protein, peptide, polyamino acid}

NOTE

antibodies or immunoglobulins are classified in [A61K 47/48369](#) subgroups. Special physical or galenic forms modified by covalent attachment or complexation of a protein, peptide or polyamino acid, are given the [A61K 47/48238](#) class in addition to their corresponding [A61K 47/48769](#) subgroup, e.g. a liposome modified on its surface by a peptide being classified in [A61K 47/48815](#) and [A61K 47/48238](#), a PLGA nanoparticle modified on its surface by a peptide being classified in [A61K 47/48915](#) and in [A61K 47/48238](#). Peptidic linkers used to connect a drug and a modifying agent are classified in [A61K 47/48338](#), the modifying agent being also classified if it being defined.

- A61K 47/48246 . . . {drug-peptide, protein or polyamino acid conjugates, i.e. the modifying agent being a protein, peptide, polyamino acid which being linked/complexed to a molecule that being the pharmacologically or therapeutically active agent} (-peptidic linker are classified in [A61K 47/48338](#)-)

NOTE

The connection of the drug to the peptide, protein or polyamino acid can be by a direct covalent linkage or through a linker. Fusion/chimeric proteins genetically produced, e.g. by recombinant DNA technology, are classified in [C07K 2319/00](#) and subgroups, not in [A61K 47/48246](#) and subgroups. [A61K 47/48246](#) and its subgroups only cover the conjugates wherein a peptide or protein being the pharmacologically or therapeutically active agent has been linked to another peptide or protein being the modifying agent via chemical methods. In that latter example of a chemically-produced peptide or protein-peptide or protein conjugate, what being classified in [A61K 47/48246](#) or in one of its subgroups being the peptide or protein used as modifying agent.

- A61K 47/48346 . . . {pretargeting systems involving a peptide or protein} (-not an antibody [A61K 47/48723](#)-)for targeting specific cells}

NOTE

The concept of "pre-targeting" covers the administration of the modifying agent (which being an agent able to target specific cells in the body), and of the pharmacologically or therapeutically active agent (drug D) in several steps, their "binding" occurring at the in vivo targeted site. It involves administration in at least two steps, for example: (i) a conjugate T-A corresponding to a targeting agent T able to target specific cells or receptors in the body (T) linked to a compound A, and (ii) a conjugate D-M corresponding to the drug D linked to a modifying agent M, able to target the compound A. The sequence involves e.g. the administration of T-A and then D-M. Between step (i) and step (ii), a further compound able to bind to both A and M may also be administered (e.g. during a clearing step). Classification being made according to the nature of T in the subgroups of [A61K 47/4813](#), [A61K 47/48346](#) and [A61K 47/48723](#). In [A61K 47/48346](#) and its subgroups, T being a peptide or protein, not being an antibody. If M being biotin and A being a (strept)avidin or a derivative thereof, then [A61K 47/48353](#) being used as classification symbol.

- U A61K 47/48369 . . {the modifying part being an antibody, an immunoglobulin, or a fragment thereof, e.g. a Fc-fragment}

- U A61K 47/48507 . . . {the modifying agent being a well defined antibody or immunoglobulin bearing at least one antigen-binding site}

NOTE

According to the nature of the antibody, the appropriate [A61K 47/48515](#) subgroup being given. If the pharmacologically or therapeutically active agent in the antibody conjugate being known, the appropriate [A61K 47/48384](#) subgroup being also given

- A61K 47/48707 . . . {antibody-chelate conjugate wherein the chelate being used for therapeutic purposes (-when radioabeled and used in radiodiagnosis or radiotherapy [A61K 51/1093](#) and the corresponding [A61K 51/1003](#) subgroup; antibody-chelate used for MRI [A61K 49/14](#)-)}

- U A61K 47/48723 . . . {pretargeting systems involving an antibody for targeting specific cells}

NOTE

The concept of "pre-targeting" covers the administration of the modifying agent (which being an agent able to target specific cells in the body), and of the pharmacologically or therapeutically active agent (drug D) in several steps, their "binding" occurring at the in vivo targeted site. It involves administration in at least two steps, for example: (i) a conjugate T-A corresponding to a targeting agent able to target specific cells or receptors in the body (T) linked to a compound A, and (ii) a conjugate D-M corresponding to the drug linked to a modifying agent M, able to target the compound A. The sequence involves e.g. the administration of T-A and then D-M. Between step (i) and step (ii), a further compound able to bind to A and M may also be administered (e.g. during a clearing step). Classification being made according to the nature of T in the subgroups of [A61K 47/4813](#) , [A61K 47/48346](#) and [A61K 47/48723](#) . In [A61K 47/48723](#) and its subgroups, T being an antibody. Classification being also made according to the nature of the antibody in the appropriate [A61K 47/48515](#) subgroup. If M and A form a pair of biotin and (strept)avidin (or derivatives of biotin and (strept)avidin), then [A61K 47/48753](#) being used as classification symbol

- A61K 47/4873 . . . {-clearing therapy or enhanced clearance, i.e. wherein an antibody clearing agent being used in addition to T-A and D-M according to the definitions in [A61K 47/48723](#)-}

- U A61K 47/48769 . . {the conjugate being characterized by a special physical or galenical form}

NOTE

The conjugates in the [A61K 47/48769](#) subgroups correspond (i) either to a pharmacologically or therapeutically active agent complexed/covalently linked to the special physical or galenical form, e.g. on the surface of a polymeric nanoparticle or liposome, or to polymeric chains in the matrix of a polymeric gel, (ii) or to a special physical or galenical form encapsulating the pharmacologically or therapeutically active agent and modified on its surface or matrix by a modifying agent. In case (i), classification being made according to the nature of the special physical or galenical form in the appropriate [A61K 47/48769](#) subgroup and may be completed by the appropriate [A61K 47/48](#) subgroup defining the compound to which the pharmacologically or therapeutically active agent being linked, e.g. [A61K 47/48053](#) in case of a drug linked to a phospholipid and inserted in the bilayer surface of a liposome. In case (ii), classification being made according to the nature of the modifying agent. Physical or galenical forms not modified by a modifying agent and/or wherein the pharmacologically or therapeutically active agent being not complexed/covalently linked to said forms, are not classified in [A61K 47/48](#) , but in [A61K 9/00](#) and its subgroups

- A61K 47/48776
- • • {forms of ingredients not provided for by groups [A61K 47/48784](#) to [A61K 47/48992](#) , e.g. cells, cell fragments, viruses, ghosts, red blood cells, viral vectors having the pharmacologically or therapeutically active agent complexed or covalently linked to, or being themselves modified by complexation or covalent linkage by a modifying agent-}

NOTE

Simple encapsulation in cells being isclassified in [A61K 9/5068](#) ; simple encapsulation in a virus capsid is classified in [A61K 9/5184](#)

- U A61K 47/48792
- • • {the form being a colloid, emulsion, i.e. having at least a dispersed/continuous oil phase and a dispersed/continuous aqueous phase, dispersion or suspension}

- A61K 47/488
- • • {the form being a micro-emulsion, nano-emulsion or micelle (-Simple encapsulation of a drug in micelle: [A61K 9/1075](#)-)}

NOTE

Micro-emulsion means that the dispersed phase being in the form of globules having a diameter above or equal to 1 micrometer. Nano-emulsion means that the dispersed phase being in the form of globules having a diameter below 1 micrometer. Micelles comprise a monolayer of surfactant molecules that are aggregated head-to-head and tail-to-tail, thus forming a small spherical particle; micelles can be normal, i.e. the surfactant heads are hydrophilic, or inverse. Micelles modified by a polymer because they incorporate a polymer-lipid conjugate are only classified in [A61K 47/488](#) if the polymer modifying the lipid being unusual. Micelles which are pegylated because they incorporate a pegylated lipid are not classified in [A61K 47/488](#) but in [A61K 9/1075](#)

- A61K 47/48815
- • • {the form being a liposome, i.e. a bilayered vesicle, having its surface modified by covalent attachment or complexation of the pharmacologically or therapeutically active agent and/or modifying agent.(-Simple encapsulation of a drug which being not functionalised on its surface by a modifying agent: see [A61K 9/127](#)-)}

NOTE

Liposomes modified by a polymer because they incorporate a polymer-lipid conjugate are only additionally classified in [A61K 47/48815](#) if the polymer modifying the lipid being unusual. Liposomes which are pegylated because they incorporate a pegylated lipid are not classified in [A61K 47/48815](#) but in [A61K 9/1271](#). When the surface of the liposome being functionalised by a modifying agent, classification being also made according to the nature of this modifying agent, e.g. a liposome modified on its surface by a peptide being classified in [A61K 47/48815](#) and [A61K 47/48238](#). In case of antibodies, see [A61K 47/48823](#) . Liposomes wherein the pharmacologically or therapeutically active agent being linked to a phospholipid of the liposomal surface are classified in [A61K 47/48815](#) and [A61K 47/48053](#)]

- U A61K 47/48853
- • • {the form being a particulate, powder, adsorbate, bead, sphere}
- A61K 47/48869
- • • {the form being a micro- or nano-capsule or a micro/nano-bubble, i.e. a hollow or gas micro- or nano-particle or sphere, a gas-filled micro- or nano-particle for use in therapy (-Micro- or nano-bubbles used only for ultrasound imaging are classified in [A61K 49/223](#) or [A61K 49/225](#) only-)}

NOTE

Pharmacologically or therapeutically active agents released from a micro- or nano-capsule by acoustic/ultrasound activation are also classified in [A61K 41/0028](#) and [A61K 9/0009](#)

- U A61K 47/48961
 - • • {the conjugate being in the form of a host-guest, i.e. being an inclusion complex, e.g. clathrate, cavitare, fullerene}
- A61K 47/48969
 - • • • {inclusion being performed with a cyclodextrin (-cyclodextrins used as simple excipients [A61K 47/40-](#))}

U A61K 49/00**Preparations for testing in vivo**

- U A61K 49/001
 - {Preparation for luminescence or biological staining}
- U A61K 49/0013
 - • {Luminescence}
- U A61K 49/0017
 - • • {Fluorescence in vivo}
- U A61K 49/0019
 - • • • {characterised by the fluorescent group}
- A61K 49/0021
 - • • • • {the fluorescent group being a small organic molecule (-oligomeric, polymeric, dendritic molecules: [A61K 49/0019-](#))}

NOTE

if this fluorescent group is complexed or covalently linked to a carrier, classification is also made according to the nature of the carrier in the appropriate [A61K 49/005](#) subgroup

- A61K 49/0023
 - • • • • {Di- or triarylmethane dye (-xanthene dyes [A61K 49/0041-](#))}
- U A61K 49/0032
 - • • • • {Methine dyes, e.g. cyanine dyes}
- A61K 49/0034
 - • • • • • {Indocyanine green, i.e. ICG, cardiogreen} üC1206}}
- A61K 49/0036
 - • • • • • {Porphyrins (-used in photodynamic therapy [A61K 41/0071](#) or [A61K 41/0076](#) ; used as targeting group or modifying agent for targeting a therapeutic compound [A61K 47/48069-](#))}
- A61K 49/0041
 - • • • • • {Xanthene dyes, used in vivo, e.g. administered to a mice, e.g. rhodamines, rose Bengal (-in vivo [G01N-](#))}
- U A61K 49/005
 - • • • • {characterised by the carrier molecule carrying the fluorescent agent}

NOTE

Classification is also made according to the nature of the fluorescent group in the appropriate subgroup of [A61K 49/0019](#)

- A61K 49/0052
 - • • • • {Small organic molecules (-oligomers, polymers, dendrimers [A61K 49/0054-](#))}
- U A61K 49/06
 - Nuclear magnetic resonance (NMR) contrast preparations; Magnetic resonance imaging (MRI) contrast preparations

NOTE

characterised only by the (inorganic) MRI-active nucleus, e.g. ¹²⁹Xe

- U A61K 49/18
 - • characterised by a special physical form, e.g. emulsions, microcapsules, liposomes

NOTE

Classification being also made according to the molecule complexing or bearing the MRI-active nucleus

- U A61K 49/1818
 - • • {particles, e.g. uncoated or non-functionalised microparticles or nanoparticles}

NOTE

For nanoparticles, i.e. having a size or diameter smaller than 1 micrometer, the subgroups [B82Y 5/00](#) and [B82Y 15/00](#) are also given

- U A61K 49/1821
 - • • • {coated or functionalised microparticles or nanoparticles}
- A61K 49/1824
 - • • • • {coated or functionalised nanoparticles (-liposomes [A61K 49/1812](#) ; nano-emulsions [A61K 49/1806](#) ; micelles [A61K 49/1809-](#))}

- U A61K 49/1827 {having a (super)(para)magnetic core, being a solid MRI-active material, e.g. magnetite, or composed of a plurality of MRI-active, organic agents e.g. Gd-chelates, or nuclei, e.g. Eu³⁺, encapsulated or entrapped in the core of the coated or functionalised nanoparticle}
- A61K 49/1833 {having a (super)(para)magnetic core coated or functionalised with a small organic molecule (-oligomeric, polymeric, dendrimeric [A61K 49/1851](#)-)}
- A61K 49/1851 {having a (super)(para)magnetic core coated or functionalised with an organic macromolecular compound, i.e. oligomeric, polymeric, dendrimeric organic molecule (-peptide or protein [A61K 49/1866](#) ; polyamino acid [A61K 49/1872](#) ; antibody [A61K 49/1875](#)-)}
- NOTE**
In case of block copolymers, the different (large) blocks are classified in the appropriate [A61K 47/48169](#) or [A61K 47/48238](#) subgroups
- A61K 49/20 . . containing free radicals {e.g. trityl radical for overhauser}
- A61K 49/22 . Echographic preparations; Ultrasound imaging preparation {Optoacoustic imaging preparations}
- U A61K 49/222 . . {characterised by a special physical form, e.g. emulsions, liposomes}
- A61K 49/225 . . . {Microparticles, microcapsules (-gas-filled to be classified in [A61K 49/223](#)-)}
- U A61K 51/00 Preparations containing radioactive substances for use in therapy or testing in vivo**
- U A61K 51/02 . characterised by the carrier, {i.e. characterised by the agent or material covalently linked or complexing the radioactive nucleus}
- U A61K 51/04 . . organic compounds
- NOTE**
Organic compounds used as carriers
- A61K 51/0402 . . . {carboxylic acid carriers, fatty acids (-amino acids [A61K 51/0406](#)-)}
- A61K 51/0404 . . . {Lipids, e.g. triglycerides; Polycationic carriers (-fatty acids [A61K 51/0402](#) ; cholesterol [A61K 51/0493](#) ; polycationic carriers being oligomers, polymers, dendrimers [A61K 47/48169](#)-)}
- A61K 51/0408 {Phospholipids (-liposomes encapsulating the radioactive probe or having no radiolabelled phospholipids [A61K 51/1231](#)-)}
- U A61K 51/041 . . . {Heterocyclic compounds.}
- NOTE**
Under this group, the last place rule is followed
- U A61K 51/0429 {having sulfur as a ring hetero atom}
- A61K 51/0434 {having six-membered rings, e.g. thioxanthenes (-thiotixene [A61K 51/0459](#)-)}
- A61K 51/044 {having nitrogen as a ring hetero atom, e.g. guanethidine, rifamycins (-rifampin [A61K 51/0459](#)-)}
- U A61K 51/0446 {having five-membered rings with one nitrogen as the only ring hetero atom, e.g. sulpiride, succinimide, tolmetin, buflomedil}

A61K 51/0451	<ul style="list-style-type: none"> • • • • {having four such rings, e.g. porphine derivatives, bilirubin, biliverdine (-hemin, hematin A61K 51/0472-)}
<u>NOTE</u>	
Porphyrins or texaphyrins used as complex-forming compounds, i.e. wherein the nitrogen atoms forming the central ring system complex the radioactive metal, are classified in A61K 51/0485	
A61K 51/0461	<ul style="list-style-type: none"> • • • • {having six-membered rings with three nitrogens as the only ring hetero atoms, e.g. chlorazanil, melamine (-melarsoprol A61K 51/0472-)}
A61K 51/0489	<ul style="list-style-type: none"> • • • {Phosphates or phosphonates, e.g. bone-seeking phosphonates; (-phospholipids: A61K 51/0408 ; nucleotides or nucleic acids: A61K 51/0491-)}
A61K 51/06	<ul style="list-style-type: none"> • • • Macromolecular compounds, {carriers being organic macromolecular compounds, i.e. organic oligomeric, polymeric, dendrimeric molecules (-peptides, proteins, polyamino acids A61K 51/08 ; antibodies A61K 51/10-)}
U A61K 51/08	<ul style="list-style-type: none"> • • • Peptides, e.g. proteins, {carriers being peptides, polyamino acids, proteins}
A61K 51/088	<ul style="list-style-type: none"> • • • • {conjugates with carriers being peptides, polyamino acids, proteins (-antibodies A61K 51/10-)}
<u>NOTE</u>	
The compound which bears, complexes or chelates the radioactive nucleus, is covalently linked/complexed to the carrier being a peptide, polyamino acid, protein (not being an antibody). Classification is also made according to the nature of the peptide or protein (e.g. if it is BSA, then A61K 51/081 is also indicated). In case of a conjugate comprising a complex-forming compound (chelating group) complexing a radioactive metal linked to the carrier (peptide, protein, polyamino acid in A61K 51/088), the nature of this complex-forming compound is not classified except if it is the real contribution of the claimed invention and it is an uncommon complexing or chelating group, e.g. ¹¹¹ In-DTPA-interleukin 2 is classified in A61K 51/088 ; new DTPA-like derivatives conjugated to interleukin 2 and complexing ¹¹¹ In for use in vivo is classified in A61K 51/0478 and A61K 51/088	
U A61K 51/10	<ul style="list-style-type: none"> • • • • Antibodies or immunoglobulins; Fragments thereof, {the carrier being an antibody or an immunoglobulin, or a fragment thereof, e.g. a camelised human single domain antibody, or the Fc fragment of an antibody}
U A61K 51/1093	<ul style="list-style-type: none"> • • • • {conjugates with carriers being antibodies}
<u>NOTE</u>	
The compound which bears, complexes or chelates the radioactive nucleus, being covalently linked or complexed to the carrier being an antibody Classification being also made according to the appropriate A61K 51/1003 subclass. In case of a conjugate comprising a complex-forming compound (chelating group) complexing a radioactive metal linked to the carrier (antibody in A61K 51/1093), the nature of this complex-forming compound being not classified except if it being the real contribution of the claimed invention and it being an uncommon complexing/chelating group, e.g. ¹¹¹ In-DTPA-herceptin being classified in A61K 51/1093 and A61K 51/1051 , new DTPA-like derivatives conjugated to herceptin and complexing ¹¹¹ In for use in vivo being classified in A61K 51/0478 , A61K 51/1093 and A61K 51/1051	
A61K 51/1096	<ul style="list-style-type: none"> • • • • • {-radioimmunotoxins, i.e. conjugates being structurally as defined in A61K 51/1093 , and including a radioactive nucleus for use in radiotherapeutic applications-}

	A61K 51/12	<ul style="list-style-type: none"> characterised by a special physical form, e.g. emulsion, microcapsules, liposomes, {characterized by a special physical form, e.g. emulsions, dispersions, microcapsules (-liposomes A61K 51/1234-)}

METHODS OR APPARATUS FOR STERILISING MATERIALS OR OBJECTS IN GENERAL; DISINFECTION, STERILISATION, OR DEODORISATION OF AIR; CHEMICAL ASPECTS OF BANDAGES, DRESSINGS, ABSORBENT PADS, OR SURGICAL ARTICLES; MATERIALS FOR BANDAGES, DRESSINGS, ABSORBENT PADS, OR SURGICAL ARTICLES (-preservation of bodies or disinfecting characterised by the agent employed [A01N](#) ; preserving, e.g. sterilising, food or foodstuffs [A23](#) ; preparations for medical, dental or toilet purposes [A61K](#) ; preparation of ozone [C01B 13/10](#)-)

WARNINGS

The following IPC groups are not used in the CPC system. Subject matter covered by these groups is classified in the following CPC groups:

[A61L 33/10](#) covered by [A61L 33/0011](#)

[A61L 33/14](#) covered by [A61L 33/0011](#)

[A61L 33/16](#) covered by [A61L 33/0047](#)

IPC7 groups [A61L 2/07](#) and subgroups, and [A61L 9/012](#) to [A61L 9/014](#) might be incomplete as relevant documents might still be classified in the hierarchical higher groups

A61L 2/00

Methods or apparatus for disinfecting or sterilising materials or objects other than foodstuffs or contact lenses; Accessories therefor (-for contact lenses [A61L 12/00](#) ; atomisers for disinfecting agents [A61M](#) ; sterilisation of packages or package contents in association with packaging [B65B 55/00](#) ; treatment of water, waste water, sewage or sludge [C02F](#) ; disinfecting paper [D21H 21/36](#) ; disinfecting devices for water closets [E03D](#) ; articles having provision for disinfection, see the relevant subclasses for these articles, e.g. [H04R 1/12](#)-)

- U A61L 2/02
 - using physical phenomena
- A61L 2/04
 - • Heat (-[A61L 2/08](#) takes precedence-)
- U A61L 2/16
 - using chemical substances
- A61L 2/18
 - • Liquid substances {or solutions comprising solids or dissolved gases}
- A61L 2/22
 - • Phase substances, e.g. smokes, aerosols {or sprayed or atomised substances}
- A61L 2/26
 - Accessories {or devices or components used for biocidal treatment}
- A61L 2/28
 - • Devices for testing the effectiveness or completeness of sterilisation, e.g. indicators which change colour (-apparatus involving enzymes or micro-organisms [C12M 1/34](#) ; methods involving enzymes or micro-organisms [C12Q 1/00](#)-)

A61L 9/00

Disinfection, sterilisation or deodorisation of air (-body deodorants [A61Q 15/00](#) ; purifying air by respirators [A62B](#) , [A62D 9/00](#) ; separating dispersed particles from gases or vapours [B01D 45/00](#) to [B01D 51/00](#) , [B03C 3/00](#) ; chemical or biological purification of waste gases [B01D 53/34](#) ; production of ozone [C01B 13/10](#) ; air-conditioning systems incorporating sterilisation [F24F 3/16](#)-)

- A61L 9/01
 - Deodorant compositions{(-compositions released by contact with a liquid [A61L 9/05](#)-)}
- A61L 9/012
 - • characterised by being in a special form, e.g. gels, emulsions{(-[A61L 9/048](#) takes precedence-)}
- A61L 9/015
 - using gaseous or vaporous substances, e.g. ozone (-[A61L 9/20](#) takes precedence; { evaporation in general [B01B 1/005](#) })
- U A61L 9/04
 - • using substances evaporated in the air without heating

A61L 9/042	<ul style="list-style-type: none"> • • {with the help of a macromolecular compound as a carrier or diluent (-A61L 9/048 takes precedence-)}
A61L 9/14	<ul style="list-style-type: none"> • using sprayed or atomised substances {including air-liquid contact processes}
U A61L 9/16	<ul style="list-style-type: none"> • using physical phenomena
A61L 9/18	<ul style="list-style-type: none"> • • Radiation (-A61L 9/22 takes precedence-)

A61L 2300/432
- characterised by a specific therapeutic activity or mode of action
 - • Inhibitors, antagonists (–[A61L 2300/402](#) to [A61L 2300/43](#) take precedence–)
- U A61L 2430/00** **Materials or treatment for tissue regeneration**
- A61L 2430/36
- for embolization or occlusion, e.g. vaso-occlusive compositions or devices (–artificial blood vessels [A61L 27/507](#)–)

Project: N/A (A61M)**A61M**

DEVICES FOR INTRODUCING MEDIA INTO, OR ONTO, THE BODY (–introducing media into or onto the bodies of animals [A61D 7/00](#) ; means for inserting tampons [A61F 13/26](#) ; devices for administering food or medicines orally [A61J](#); containers for collecting, storing or administering blood or medical fluids [A61J 1/05](#)–); **DEVICES FOR TRANSDUCING BODY MEDIA OR FOR TAKING MEDIA FROM THE BODY** (surgery [A61B](#); chemical aspects of surgical articles [A61L](#)); **DEVICES FOR PRODUCING OR ENDING SLEEP OR STUPOR**

NOTE

This subclass covers suction, pumping or atomising devices for medical use (e.g. cups, breast relievers, irrigators, sprays, powder insufflators, atomisers, inhalers), apparatus for general or local anaesthetics, devices or methods for causing a change in the state of consciousness, catheters, dilators, apparatus for introducing medicines into the body other than orally

Void

When classifying in this group, classification is also made in group [B01D 15/08](#) insofar as subject matter of general interest relating to chromatography is concerned

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

- Building blocks, strips, or similar building parts

A63H 33/048

- {to be assembled using hook and loop-type fastener or the like}

Project: N/A (B01B)

U B01B 1/00

Boiling; Boiling apparatus for physical or chemical purposes (preparation of starch [C08B 30/00](#); sugar industry [C13](#); steam generation [F22](#); domestic boilers [F24](#)); {Evaporation in general}

B01B 1/005

- {Evaporation or evaporation apparatus for physical or chemical purposes, e.g. evaporation of liquids for gas phase reactions (separation by evaporation [B01D](#); evaporation in chemical vapor deposition or similar processes [C23C](#); cooling by evaporation [F01P 9/02](#); evaporation of fuels to be feeded to combustion apparatus, e.g. burners [F23D](#); refrigeration involving evaporation [F25B](#); drying involving evaporation [F26B](#); evaporation for preparing samples for analysis [G01N](#))}

Project: N/A (B01D)

B01D

SEPARATION (~~separating solids from solids by wet methods [B03B](#), [B03D](#); by pneumatic jigs or tables [B03B](#); by other dry methods [B07](#); magnetic or electrostatic separation of solid materials from solid materials or fluids, separation by high-voltage electric fields [B03C](#); centrifuges, vortex apparatus [B04](#); presses per se for squeezing-out liquid from liquid-containing material [B30B 9/02](#) ; treatment of water [C02F](#), e.g. softening by ion-exchange [C02F 1/42](#) ; { arrangements of air intake cleaners in gas turbine plants [F02C 7/05](#) } ; arrangements or mounting of filters in air-conditioning, air-humidification or ventilation [F24F 13/28](#)-)~~

NOTE

This subclass covers:

- evaporation, distillation, crystallisation, filtration, dust precipitation, gas cleaning, absorption, adsorption;
- similar processes which are not concerned with, or limited to, separation (except in the case of absorption or adsorption).

In this subclass the terms or expressions are used with the meaning indicated:

- "filtration" and analogous terms include straining solids from fluids;
- "filter medium" is a porous material or porous arrangement of material used to filter solids from fluids;

- "filtering element" is a section of filter medium in addition to parts to which the medium is demountably or permanently fixed, including other sections of medium, end caps, peripheral frames or edge strips, but excluding housings;
 - "filter housing" is the fluid-constraining impervious vessel, whether open or closed, which contains, or is adapted to contain, one or more filtering elements or filter media;
 - "filter chamber" is the space within a housing, where filtering elements or filter media are located. Partitions may divide a single housing into a plurality of chambers;
 - "filtering apparatus" consists of filtering elements combined with housings, cleaning arrangements, motor or the like parts, which are characteristic of the particular type of apparatus. Ancillary devices such as pumps or valves are considered part of a filtering apparatus when inside the apparatus. Ancillary devices performing similar or different unit operation such as comminutors, mixers or non-filtering separators, whether or not inside the apparatus, are not considered part of a filtering apparatus. The term does not extend to apparatus, e.g. washing machines, of which the filter forms only a part. For apparatus used in drying or evaporation, [F26](#) takes precedence over [B01D](#).
- Group [B01D 59/00](#) takes precedence over the other groups of this subclass and over other subclasses in class [B01](#)

If the construction of the filtering element itself is of minor importance the document is classified in the subgroups B01D 29/11 , B01D 29/114 and B01D 29/117 , otherwise in the subgroups B01D 29/13 to B01D29/37
- B01D 29/114
 - • {arranged for inward flow filtration (-B01D 29/15 , B01D 29/33 take precedence-)}
- B01D 29/117
 - • {arranged for outward flow filtration (-B01D 29/23 , B01D 29/35 take precedence-)}
- U B01D 29/13
 - • Supported filter elements
- U B01D 29/15
 - • • arranged for inward flow filtration
- B01D 29/17
 - • • • open-ended {the arrival of the mixture to be filtered and the discharge of the concentrated mixture are situated on both opposite sides of the filtering element}
- U B01D 29/23
 - • • arranged for outward flow filtration
- B01D 29/25
 - • • • open-ended {the arrival of the mixture to be filtered and the discharge of the concentrated mixture are situated on both opposite sides of the filtering element}
- U B01D 29/39
 - with hollow discs side by side on, or around, one or more tubes, e.g. of the leaf type
- B01D 29/43
 - • mounted otherwise than transversely on the tube {mounted otherwise than axially on the tube}
- B01D 29/50
 - with multiple filtering elements, characterised by their mutual disposition (-B01D 29/39 takes precedence-)
- B01D 29/62
 - Regenerating the filter material in the filter (-devices for taking out of action one or more units of multi-unit filters, e.g. for regeneration, B01D 35/12-)
- B01D 29/76
 - Handling the filter cake in the filter for purposes other than for regenerating (-B01D 29/94 takes precedence-)
- U B01D 29/80
 - • for drying
- U B01D 29/82
 - • • by compression
- B01D 29/828
 - • • • {using screws (-B01D 29/6476 takes precedence-)}
- B01D 29/86
 - • Retarding cake deposition on the filter during the filtration period, e.g. using stirrers{(-B01D 29/908 takes precedence-)}
- U B01D 29/88
 - having feed or discharge devices
- B01D 29/885
 - • {with internal recirculation through the filtering element (-B01D 37/02 takes precedence-)}
- U B01D 29/90
 - • for feeding
- B01D 29/904
 - • • {directing the mixture to be filtered on the filtering element in a manner to clean the filter continuously (-B01D 29/115 , B01D 29/118 , B01D 29/17 , B01D 29/25 , B01D 29/336 , B01D 29/356 , B01D 29/902 , B01D 29/908 take precedence-)}
- B01D 29/906
 - • • {Special treatment of the feed stream before contacting the filtering element, e.g. cutting (-B01D 35/24 , B01D 37/02 , B01D 37/03 take precedence-)}
- B01D 29/96
 - in which the filtering elements are moved between filtering operations; Particular measures for removing or replacing the filtering elements; Transport systems for filters (-B01D 29/09 , B01D 29/70 take precedence-)

B01D 33/00

Filters with filtering elements which move during the filtering operation (-filters comprising loose filtering material moving or fluidised during filtration [B01D 24/28](#) to [B01D 24/36](#) ; centrifuges [B04B](#)-)

NOTE

See WARNING after subclass title, particularly items (7), (8), (11) and (14)

- U B01D 33/0003 • {Aspects of filters with filtering elements which move during the filtering operation}
- B01D 33/0006 • • {with rotating filtering surfaces}(-rotating brush filters [B01D 35/10](#)-)}
- B01D 33/0009 • • • {-with cylindrical filtering surfaces, e.g. hollow drums, rotating drum filters for paper making [D21B](#)-}
- B01D 33/0058 • • • {with filtering surfaces travelling along conveyers}(-tipping bucket type [B01D 35/08](#) ; brush filters [B01D 35/10](#)-)}
- U B01D 33/0061 • • {Accessories and components}

 - U B01D 61/46 • • • Apparatus therefor
 - B01D 61/48 • • • • having one or more compartments filled with ion-exchange material {e.g. electrodeionisation}
 - B01D 61/58 • Multistep processes{(-comprising reverse osmosis or hyperfiltration steps [B01D 61/022](#); comprising ultrafiltration or microfiltration steps [B01D 61/142](#))}
- NOTE**
In group [B01D 61/58](#) specific process steps within the multistep process are indexed by codes chosen from [B01D 61/02](#) to [B01D 61/56](#)

U B01D 67/00 Processes specially adapted for manufacturing semi-permeable membranes for separation processes or apparatus

NOTE

In group [B01D 67/00](#) it is desirable to add the indexing codes relating to membrane preparation chosen from groups [B01D 2323/00](#) to [B01D 2323/42](#)

- U B01D 67/0002 • {Organic membrane formation}
- B01D 67/0006 • • {by chemical reactions (-in-situ polymerisation, polycondensation, cross-linking or reaction for manufacturing composite membranes [B01D 69/125-](#))}
- U B01D 67/0009 • • {by phase separation, sol-gel transition, evaporation or solvent quenching}
- B01D 67/0013 • • • {Casting processes (-hollow fibre membrane manufacturing methods [B01D 69/08-](#))}
- U B01D 67/0039 • {Inorganic membrane formation}
- B01D 67/0069 • • {by deposition from the liquid phase, e.g. electrochemical deposition (-[B01D 67/0046](#) takes precedence-)}
- U B01D 67/0081 • {After-treatment of organic or inorganic membranes}
- B01D 67/0088 • • {Physical treatment with compounds, e.g. swelling, coating or impregnation (-involving chemical reactions [B01D 67/0093-](#))}

U B01D 69/00 Semi-permeable membranes for separation processes or apparatus characterised by their form, structure or properties; Manufacturing processes specially adapted therefor

NOTES

In this group, the following term is used with the meaning indicated:

- "properties" covers those of a mechanical, physical or chemical nature

Manufacturing processes, if considered of interest, are also classified in group [B01D 67/00](#)

WARNING

The following sub-groups of [B01D 69/00](#) are incomplete. Documents presently classified in the hierarchically higher groups are in the process of reclassification

[B01D 69/043](#)
[B01D 69/046](#)
[B01D 69/081](#)
[B01D 69/082](#)
[B01D 69/084](#)

 - • • {the mixing chamber being vertical with the outlet tube at its upper side}
- B01F 5/0074
 - • • {the mixing chamber being vertical and having an outlet tube at its bottom whose inlet is at a higher level than the inlet of the vortex creating jet, e.g. the jet being introduced at the bottom of the mixing chamber}
- U B01F 5/0077
 - {Mixing heads, i.e. compact mixing units or modules, using mixing valves for feeding and mixing at least two components (for homogenizing mixtures [B01F 5/0661](#), mixing valves [F16K 11/00](#))}
- B01F 5/008
 - • {of the mixing valve type}
- B01F 5/0082
 - {Interdigital mixers, i.e. the substances to be mixed are divided in substreams which are rearranged in an interdigital or interspersed manner ([B01F 13/0066](#) takes precedence)}
- B01F 5/0085
 - {Mixing drops, droplets, bodies of liquid which flow together or contact each other ([B01F 13/0069](#) takes precedence)}

- U B01F 5/02
 - Jet mixers {(B01F 5/0057 take precedence; with gas agitation, i.e. for fluidisation B01F 13/02)}
- U B01F 5/0206
 - {comprising submerged injectors, e.g. nozzles, for injecting high pressure jets in a large volume or in a mixing chamber (B01F 3/04106 takes precedence; injecting an additional component in a conduit B01F 5/0403)}
- U B01F 5/0218
 - {the injectors being movable, e.g. rotating}
- B01F 5/0225
 - {Pivoting, oscillating in a multidirectional way during jetting}
- B01F 5/0231
 - {Rotating during jetting}
- B01F 5/0237
 - {being vertically moved to bring the injector in or out of operative position}
- B01F 5/0243
 - {being moved or transported between different locations during jetting}
- B01F 5/025
 - {Moving to adjust the direction of jetting, the injectors being fixed during operation}
- U B01F 5/0256
 - {Mixing by intersecting jets (in a stream-impingement mixing head for polymers B29B 7/76)}
- B01F 5/0262
 - {the intersecting jets having the configuration of sheets, cylinders or cones}
- B01F 5/0275
 - {Mixing by jetting a component in a conduit for agitating its contents, i.e. using high pressure jets (injection under low pressure B01F 5/04; eductor type injector B01F 5/0413)}
- B01F 5/0281
 - {characterized by the specific design of the jet injector}
- B01F 5/0287
 - {the jet injector being of the RESS (explosive rapid expansion of supercritical solutions) or FIMS (fluid injection of molecular spray) type, i.e. the liquid is jetted in an environment (gas or liquid) by nozzles, in conditions of significant pressure drop, with the possible generation of shock waves}
- B01F 5/0293
 - {the jet injector being of coanda type, i.e. having a surface to attract the jet for adjusting its direction}
- U B01F 5/04
 - Injector mixers, {i.e. one or more components being added to a flowing main component (B01F 5/0057 takes precedence)}
- U B01F 5/0403
 - {Mixing conduits or tubes, i.e. conduits or tubes through which the main component is flown (mixing devices for gas burners F23D 14/62)}
- U B01F 5/0413
 - {provided with a venturi element}
- U B01F 5/0418
 - {with two or more venturi elements}
- B01F 5/042
 - {used alternatively}
- B01F 5/0421
 - {used simultaneously}
- B01F 5/0423
 - {used successively}
- B01F 5/0425
 - {characterized by the place of introduction of the main flow}
- B01F 5/0426
 - {the main flow being injected in the circumferential area of the venturi, creating an aspiration in the central part of the conduit}
- B01F 5/0428
 - {the main flow being injected in the central area of the venturi, creating an aspiration in the circumferential part of the conduit (B01F 5/043 takes precedence)}
- B01F 5/043
 - {Eductor or eductor type venturi, i.e. the main flow being injected through the venturi with high speed in the form of a jet}
- U B01F 5/045
 - {the additional component being introduced in the centre of the conduit}
- U B01F 5/0453
 - {by using two or more injector devices}
- B01F 5/0455
 - {used alternatively}
- B01F 5/0456
 - {used simultaneously}
- B01F 5/0458
 - {used successively}
- B01F 5/046
 - {arranged concentrically}

- B01F 5/0461 {characterized by the specific design of the injector}
- B01F 5/0463 {-Perforated, multi-opening, with a plurality of holes}
- B01F 5/0465 {-Porous injectors}
- B01F 5/0466 {-Ring, torus, toroidal or coiled configurations}
- B01F 5/0468 {-Rotatable injectors}
- B01F 5/047 {-the opening for introducing the supplementary stream being a slit}
- U B01F 5/0471 . . . {the additional component being introduced at the circumference of the conduit}
- U B01F 5/0475 {the conduit having a plurality of openings in the axial direction or in the circumferential direction}
- B01F 5/0478 {-with a plurality of perforations in the axial direction only}
- B01F 5/048 {-with a plurality of perforations in the circumferential direction only and covering the whole circumference}
- B01F 5/0481 {-the perforations being a complete cut-out in the circumferential direction covering the whole diameter of the tube, i.e. having two consecutive tubes placed consecutively, the additional component being introduced between them}
- B01F 5/0483 {-with a plurality of perforations aligned in a row perpendicular to the flow direction}
- B01F 5/0485 {-with a plurality of perforations in the axial and circumferential direction covering the whole surface}
- B01F 5/0486 {-characterized by the specific design of the injector}
- B01F 5/0488 {-A slit extending in the longitudinal direction only}
- B01F 5/049 {-A slit extending in the circumferential direction only}
- B01F 5/0491 {-Rotatable, e.g. placed on a rotatable housing or conduit}
- B01F 5/0493 {-A bundle of similar tubes, each of them having feedings on the circumferential wall, e.g. as mixer for a reactor}
- U B01F 5/06 . Mixers in which the components are pressed together through slits, orifices, or screens; { Static mixers; Mixers of the fractal type}{([B01F 7/164](#), [B01F 7/225](#) take precedence; } turbo-mixers [B01F 5/16](#); colloid-mills [B02C](#); mixing valves [F16K 11/00](#))}
- B01F 5/0601 . . {-Fractal mixers}
- U B01F 5/0602 . . {Static mixers, i.e. mixers in which the mixing is effected by moving the components jointly in changing directions, e.g. in tubes provided with baffles or obstructions ([B01F 5/0661](#), [B01F 5/0682](#) take precedence)}
- U B01F 5/0603 . . . {the mixture or the components moving in an irregular path, e.g. radially ([B01F 5/0646](#) takes precedence)}
- B01F 5/0604 {-the mixer being composed of stacked plates between which the material is moving, e.g. the plates being provided with grooves or orifices}
- B01F 5/0605 {-by means of elements placed in the receptacle for moving or guiding the components}
- B01F 5/0606 {-using baffles}
- B01F 5/0607 {-using dams}
- B01F 5/0608 {-using plates with holes, the holes being displaced from one plate to the next one to force the flow to make a bending movement}
- U B01F 5/0609 . . . {Mixing tubes, e.g. the material being submitted to a substantially radial movement or to a movement partially in reverse direction}

- U B01F 5/064 {with means for dividing a flow of material into separate subflows and for repositioning and recombining these subflows; Cross-mixing, e.g. conducting the outer layer of the material nearer to the axis of the tube or vice-versa ([B01F 5/0496](#) takes precedence; using baffles [B01F 5/061](#), for falling particle mixers [B01F 5/246](#))}
- U B01F 5/0641 {the subflows consisting of at least two flat layers which are recombined, e.g. using means having restriction or expansion zones}
- B01F 5/0642 {-using a simple by-pass for separating and recombining the flow, e.g. by using branches of different length}
- U B01F 5/0646 {Mixers composed of several consecutive mixing tubes; Mixing tubes being deformed or bent, e.g. having varying cross-section or being provided with inwardly extending profiles, e.g. with internal screw-thread profile ([B01F 5/0656](#) takes precedence)}
- B01F 5/0647 {-Mixers with bended, curved, coiled, wounded mixing tubes or comprising elements for bending the flow}
- B01F 5/0648 {-Mixers with a strong change of direction in the conduit for homogenizing the flow}
- B01F 5/065 {-Mixers with scallop-shaped tubes or surfaces facing each other}
- B01F 5/0651 {-Mixers with a converging cross-section}
- B01F 5/0652 {-Mixers with a converging-diverging cross-section}
- B01F 5/0653 {-Mixers with a diverging cross-section}
- B01F 5/0654 {-Mixers with a diverging-converging cross-section}
- B01F 5/0655 {-Mixers with a succession of converging-diverging cross-sections, i.e. undulating cross-section}
- B01F 5/0656 {-Mixing tubes having therein a cylindrical or conical insert provided with grooves, e.g. the tube being provided with inwardly extending profiles or grooves ([B01F 5/0665](#) takes precedence)}
- B01F 5/0657 {-the insert being provided with helical grooves}
- B01F 5/0658 {-the insert being provided with a labyrinth of grooves or a distribution of protrusions}
- U B01F 5/0661 . . {Mixers in which the components are pressed through slits while introducing shear, e.g. the slits being formed by balls and their seats, by the spiro of helical springs ([B01F 7/0075](#) takes precedence)}
- B01F 5/0662 . . . {-characterized by the configuration of the surfaces forming the slits}
- B01F 5/0663 {-the slits being formed between opposed planar surfaces, e.g. pushed again each other by springs}
- B01F 5/0664 {-with a plurality of parallel slits, e.g. formed between stacked plates}
- B01F 5/0665 {-the slits being formed between opposed conical or cylindrical surfaces}
- B01F 5/0666 {-the slits being formed between the balls and the seats of a bearing-like construction}
- B01F 5/0667 {-the slits being formed between the helical windings of a spring-like construction or by deforming a spring}
- B01F 5/0668 {-the opposed surfaces being provided with grooves}
- B01F 5/0669 {-Axial grooves formed on opposed surfaces, e.g. on cylinders or cones}
- B01F 5/067 {-Circumferential grooves formed on opposed surfaces, e.g. on planar surfaces or on cylinders or cones}
- B01F 5/0671 {-Helical grooves formed on opposed surfaces, e.g. on cylinders or cones}
- B01F 5/0672 {-Crossing sets of grooves forming a labyrinth formed on opposed surfaces, e.g. on planar surfaces or on cylinders or cones}

- B01F 5/0673 {Radial grooves formed on opposed surfaces, e.g. on planar surfaces}
- B01F 5/0675 {Spiral grooves formed on opposed surfaces, e.g. on planar surfaces}
- B01F 5/0676 {the grooves being formed on the outer surface of the cylindrical or conical core of the slits}
- B01F 5/0677 {the grooves being formed on the inner surface of the cylindrical or conical housing of the slits}
- B01F 5/0678 . . . {-characterized by the relative position of the surfaces during operation}
- B01F 5/0679 . . . {-the surfaces being maintained in a fixed position, spaced from each other, therefore maintaining the slit always open}
- B01F 5/068 . . . {-the surfaces being maintained in a fixed but adjustable position, spaced from each other, therefore allowing the slit spacing to be varied ([B01F 5/0681](#) takes precedence)}
- B01F 5/0681 . . . {-the surfaces being part of a valve construction, formed by opposed members in contact, e.g. automatic positioning caused by spring pressure}
- U B01F 5/0682 . . {Mixers in which the components are pressed together through screens, plates provided with orifices, foam-like inserts, or through a bed of loose bodies, e.g. beads ([B01F 7/0075](#) takes precedence)}
- B01F 5/0687 . . . {-characterized by the elements through which the components are pressed together}
- B01F 5/0688 . . . {-the components being pressed through orifices in elements, e.g. flat plates or cylinders, which obstruct the whole diameter of the tube}
- B01F 5/0689 {-the elements being cylinders or cones which obstruct the whole diameter of the tube, the flow changing from axial in radial and again in axial}
- B01F 5/069 {-the elements comprising means for adjusting the orifices}
- B01F 5/0691 . . . {-the components being pressed through porous bodies, e.g. flat plates, blocks or cylinders, which obstruct the whole diameter of the tube ([B01F 5/0698](#) takes precedence)}
- B01F 5/0692 {-the porous bodies being cylinders or cones which obstruct the whole diameter of the tube, the flow changing from axial in radial and again in axial}
- B01F 5/0693 . . . {-the components being pressed through sieves, screens or meshes which obstruct the whole diameter of the tube}
- B01F 5/0694 {-the sieves, screens or meshes being cylinders or cones which obstruct the whole diameter of the tube, the flow changing from axial in radial and again in axial}
- B01F 5/0695 . . . {-the components being pressed through foam-like inserts or through a bed of loose bodies, e.g. balls}
- B01F 5/0696 {-through a bed of balls}
- B01F 5/0697 {-through a bed of fibres, steel wool or wood chips}
- B01F 5/0698 {-through a foam or expanded material body}
- U B01F 5/10 . . Circulation mixers, {e.g. at least part of the mixture being discharged from, and reintroduced into, a receptacle, e.g. with rotary stirrer ([B01F 5/02](#) takes precedence)}
- B01F 5/108 . . {-provided with an internal pump to recirculate the material inside the receptacle}
- U B01F 5/12 . . Pump mixers, {i.e. the mixing taking place in the pump itself}
- U B01F 5/14 . . . of the gear type
- B01F 5/145 . . . {-using a Wankel pump}

U B01F 7/00

Mixers with rotary stirring devices in fixed receptacles, {i.e. movement of the receptacle not being meant to effect the mixing (B01F 13/08 takes precedence)}; Kneaders (B01F 13/04 takes precedence; {devices especially adapted for mixing foundry sand B22C 5/04})

- B01F 7/00008 . {Stirrers, i.e. rotary stirring devices (B01F 3/04539, B01F 3/04588, B01F 3/0478, B01F 7/028, B01F 11/0091 take precedence)}
- B01F 7/00016 . {Nature of the rotating mixing element}
- B01F 7/00025 . . {Stirrers with replaceable wearing elements; Wearing elements therefor}
- B01F 7/00033 . . {Characterised by the materials the stirrers are made of}
- B01F 7/00041 . . . {with particular surface characteristics, e.g. coated, rough}
- B01F 7/0005 . . . {Deformable stirrers (B01F 7/00208 takes precedence)}
- B01F 7/00058 . . . {with mechanical means to alter the position of the stirring elements}
- B01F 7/00066 . . . {deformable by centrifugal force}
- B01F 7/00075 . . . {the position of the stirring elements depending on the direction of rotation of the stirrer}
- B01F 7/00083 . . {Stirrers made by deforming a plate}
- B01F 7/00091 . {Mounting of the stirring elements on the stirrer shaft (B01F 7/00208 takes precedence)}
- B01F 7/001 . . {Fixing of the stirrer to the shaft}
- B01F 7/00108 . . {Disposition with respect to the rotating axis}
- B01F 7/00116 . . . {parallel with respect to the rotating axis}
- B01F 7/00125 . . . {perpendicular with respect to the rotating axis}
- B01F 7/00133 . . . {oblique with respect to the rotating axis}
- B01F 7/00141 . . . {directly mounted on the rotating axis}
- B01F 7/0015 . . . {on the free end of the rotating axis}
- B01F 7/00158 . . . {having stirring elements connected to the stirrer shaft each by a single radial rod, other than open frameworks}
- B01F 7/00166 {of the anchor type, i.e. the stirring elements being connected to the rods by one end and extending parallel to the shaft axis}
- B01F 7/00175 {having stirring elements connected to the stirrer shaft each by two or more radial rods, e.g. the shaft being interrupted between the rods, or of crankshaft type (B01F 7/00566 takes precedence)}
- B01F 7/00183 . . {with stirring elements moving with respect to the stirrer shaft, e.g. floating or comprising contracting chambers}
- B01F 7/00191 . . {having two or more mixing elements being concentrically mounted on the same shaft}
- B01F 7/002 . . {Mounting of the rotating mixing element in respect to the receptacle}
- B01F 7/00208 . . {having elements for co operating with receptacle wall or bottom, e.g. for scraping (B01F 7/165 takes precedence)}
- B01F 7/00216 . . {occupying substantially the whole interior space of the receptacle}
- B01F 7/00225 . . {eccentrically arranged}
- B01F 7/00233 . {Configuration of the rotating mixing element}
- B01F 7/00241 . . {Centrifugal stirrers, i.e. having a radial outflow or turbine-type, e.g. with means to guide the flow}
- B01F 7/0025 . . . {with arms, paddles, vanes or blades}
- B01F 7/00258 . . . {pin shaped}
- B01F 7/00266 . . . {anchor shaped}

- B01F 7/00275 {sickle shaped, i.e. curved in at least one direction }
- B01F 7/00283 {rake shaped or grid shaped}
- B01F 7/00291 {having vanes or blades, e.g. provided with orifices, extending parallel or oblique to the stirrer axis ([B01F 7/00233](#) takes precedence)}
- B01F 7/003 {having holes in the surface}
- B01F 7/00308 {paddle wheels}
- B01F 7/00316 {the blades extending oblique to the stirrer axis}
- B01F 7/00325 {the stirrer being a bent rod supported at one end only}
- B01F 7/00333 {spoon-shaped}
- B01F 7/00341 . . . {Propellers, i.e. stirrers having an axial outflow, e.g. of the ship or aircraft propeller type or having means on the propeller to guide the flow}
- B01F 7/0035 {having holes in the surface}
- B01F 7/00358 {with guiding tubes or tubular segments fixed to and surrounding the tips of the propeller blades, e.g. with supplementary mixing elements on the outside of the tubes or the segments}
- B01F 7/00366 {the impeller being of airfoil, aerofoil type}
- B01F 7/00375 {the impeller being of hydrofoil type}
- B01F 7/00383 {the impeller being of Rushton type}
- B01F 7/00391 . . . {Helices, i.e. stirrers comprising a helically shaped band; Stirrers composed of helically shaped band sections}
- B01F 7/004 {having holes in the surface}
- B01F 7/00408 {of the corkscrew type composed of a helically shaped band, e.g. flexible spiral springs}
- B01F 7/00416 {screws; Worms; Stirrers composed of screw sections}
- B01F 7/00425 {blade shaped}
- B01F 7/00433 {ribbon shaped, i.e. with an open space between the helical ribbon flight and the rotating axis}
- B01F 7/00441 {forming open frameworks or cages}
- B01F 7/0045 . . . {with discs or disc like elements essentially perpendicular to the stirrer shaft axis, e.g. with stirring elements other than discs fixed thereon or with grooves on the sides of the discs}
- B01F 7/00458 {having holes in the surface}
- B01F 7/00466 {with separate elements other than discs fixed on the discs}
- B01F 7/00475 {the discs being made by deforming flat discs}
- B01F 7/00483 {cup shaped, e.g. semi sphere}
- B01F 7/00491 {with interconnected discs, forming open frameworks or cages}
- B01F 7/005 . . . {shaped as cylinders, balls or rollers}
- B01F 7/00508 {having holes in the surface}
- B01F 7/00516 {Balls}
- B01F 7/00525 {Rollers}
- B01F 7/00533 {comprising paddles fixed thereon, e.g. with a total a diameter close to that of the surrounding receptacle}
- B01F 7/00541 . . . {with cones, e.g. funnels}
- B01F 7/0055 {having holes in the surface}
- B01F 7/00558 . . . {provided with brushes, sieves, grids, chains or springs ([B01F 7/00408](#) takes precedence)}
- B01F 7/00566 . . . {with rigid wires or flexible rods}

- B01F 7/00575 . . . {with a bent rod of non helical configuration supported at one end }
- B01F 7/00583 . . . {-Openwork frame or cage stirrers not provided for elsewhere}
- B01F 7/00591 . . . {-provided with tubes for guiding the material}
- B01F 7/006 . . . {-having additional elements on the stirrer, other than for mixing}
- B01F 7/00608 . . . {-having elements for disintegrating, e.g. for milling ([B01F 7/1625](#), [B01F 7/00358](#) take precedence)}
- B01F 7/00616 . . . {-having elements for cutting, e.g. knives}
- B01F 7/00625 . . . {-Multistage systems, i.e. with a plurality of mixing elements mounted in sequence on the same axis}
- B01F 7/00633 . . . {-provided with a plurality of similar elements}
- B01F 7/00641 . . . {-provided with a plurality of dissimilar elements}
- B01F 7/0065 . . . {-comprising helical elements and paddles}
- B01F 7/00658 . {-Configuration of the rotating axis}
- B01F 7/00666 . {-Nature of the axis}
- B01F 7/00675 . . . {-The axis being a flexible shaft}
- B01F 7/00683 . {-Construction of the axis}
- B01F 7/00691 . . . {-The axis being composed of interconnected parts [M1106]}
- B01F 7/007 . . . {-The axis being a hollow cylinder, e.g. for feeding a component ([B01F 7/024](#) takes precedence)}
- B01F 7/00708 . . . {-The axis comprising stirring means and feeding or discharging means fixed on the same axis}
- B01F 7/00716 . . . {-the axis being adjustable in length, e.g. telescopic}
- B01F 7/00725 . {-Connection of the rotating axis with the drive}
- U B01F 7/0075 . {-the mixer being composed of a stator-rotor system with movable slits between surfaces facing each other, e.g. having intermeshing teeth or cylinders or having orifices (with axial inflow and radial outflow for batch mixing [B01F 7/1625](#); for mixtures of cement with other substances [B28C 5/0881](#); for plastics [B29B 7/402](#))}
- B01F 7/00758 . {-the stator rotor system being formed by substantial flat surfaces}
- B01F 7/00766 . . . {-provided with intermeshing elements}
- B01F 7/00775 . . . {-provided with ribs, ridges or grooves on one surface}
- B01F 7/00783 . . . {-the surfaces having a conical shape}
- B01F 7/00791 . . . {-the relative position of the stator and the rotor, gap in between or gap with the walls being adjustable}
- B01F 7/008 . . . {-the stator rotor system being formed by conical or cylindrical surfaces, e.g. curved surfaces}
- B01F 7/00808 . . . {-provided with intermeshing elements}
- B01F 7/00816 . . . {-provided with ribs, ridges or grooves on one surface}
- B01F 7/00825 . . . {-the surfaces having a conical shape}
- B01F 7/00833 . . . {-the relative position of the stator and the rotor, gap in between or gap with the walls being adjustable}
- B01F 7/00841 . {-the mixer being composed of a stator-rotor system being formed by bearing elements, e.g. roller bearings}
- U B01F 7/0085 . {-the stirring devices being composed of two independently driven coaxial rotors facing each other, e.g. having intermeshing teeth}
- B01F 7/00858 . {-with rotating surfaces facing each other}
- B01F 7/00866 . . . {-provided with intermeshing elements}

	B01F 7/00875	• • • {provided with ribs, ridges or grooves on one surface}
	B01F 7/00883	• • {with rotating surfaces next to one another, e.g. on parallel axis}
	B01F 7/00891	• • • {provided with intermeshing elements}
	B01F 7/009	• • • {provided with ribs, ridges or grooves on one surface}
U	B01F 7/00925	• {characterised by the orientation or disposition of the rotor axis, e.g. a plurality of mixing shafts with different or random orientation}
	B01F 7/00933	• • {Variable, e.g. tiltable during the operation}
	B01F 7/00941	• • • {the orientation of the rotating shaft being adjustable in the interior of the receptacle, e.g. by tilting the stirrer shaft during the mixing}
	B01F 7/0095	• • • {the position of the rotating shaft being adjustable in the interior of the receptacle, e.g. to locate the stirrer in different locations during the mixing}
	B01F 7/00958	• • {with a plurality of rotation axis}
	B01F 7/00966	• • • {having different inclinations, e.g. non parallel}
	B01F 7/00975	• • • {parallel}
	B01F 7/00983	• • • {perpendicular}
	B01F 7/00991	• • • {planetary (B01F 7/14 and B01F 7/30 take precedence)}

- B01F 15/00558 . . . {-Driven by solar energy}
- B01F 15/00564 . . . {-Driven by the rotation of the wheels during movement}
- B01F 15/00571 . . . {-Wind driven}
- B01F 15/00662 . {-Mounting or supporting mixing devices, e.g. independent stirrer units on receptacles; Mounting or supporting receptacles on frames or stands; Clamping or holding arrangements therefor}
- B01F 15/00668 . . {-Mounting or supporting stirrer shafts on receptacles}
- B01F 15/00675 . . . {-by supporting only one extremity of the shaft}
- B01F 15/00681 {-at the top of the receptacle}

- B01F 15/00688 . . . {at the bottom of the receptacle, e.g. by studs}
- B01F 15/00694 . . . {at a side wall of the receptacle}
- B01F 15/00701 . . . {by supporting both extremities of the shaft}
- B01F 15/00707 . . . {at the top and at the bottom of the receptacle, e.g. for performing a conical orbital movement about a vertical axis}
- B01F 15/00714 . . . {at the side walls of the receptacle}
- B01F 15/0072 . . . {by means of clamps, clamping arrangements for fixing attached stirrers or independent stirrer units}
- B01F 15/00727 . . . {using inflatable arrangements for supporting a stirring element}
- B01F 15/00733 . . . {Clamping or holding arrangements for mounting receptacles on mixing devices, e.g. for shaking, vibrating or rotating the receptacle}
- B01F 15/0074 . . . {having a cup-shaped or cage-type form}
- B01F 15/00746 . . . {having a jaw-type or finger-type shape}
- B01F 15/00753 . . . {of the vertically movable, two-plates type}
- B01F 15/00766 . . . {Holding arrangements for retaining loose elements of the mixing receptacle, e.g. for holding the handle of a can while it is being shaken}
- B01F 15/00772 . . . {Supporting receptacles on frames or stands ([B01F 15/00733](#) takes precedence; frames of machines, stands as support for apparatus, in general [F16M](#))}
- U B01F 15/00824 . {Receptacles ([B01F 9/0032](#), [B01F 15/00779](#) take precedence)}
- B01F 15/00831 . . {Nature of the receptacle}
- B01F 15/00837 . . . {provided with liners, e.g. wear resistant or flexible liners}
- B01F 15/00844 . . . {Surface characteristics, e.g. coated, rough}
- B01F 15/0085 . . . {the mixing receptacle being flexible, e.g. flexible bags supported by rigid containers}
- B01F 15/00857 . . . {the mixing receptacle or conduit being transparent or comprising transparent parts}
- B01F 15/00863 . . {Multi compartment receptacles}
- B01F 15/0087 . . . {comprising compartments keeping the materials to be mixed separated until the mixing is initiated ([B65D 81/32](#) takes precedence)}
- B01F 15/00876 . . {Configuration of the interior}
- B01F 15/00883 . . . {provided with baffles, plates or bars on the wall or the bottom}
- B01F 15/00889 {with horizontal baffles mounted on the walls}
- B01F 15/00896 {with vertical baffles mounted on the walls}
- B01F 15/00902 . . . {provided with guide tubes on the wall or the bottom}
- B01F 15/00909 . . {Closely surrounding the rotating element}
- U B01F 15/00928 . {General build-up of the mixers}
- B01F 15/00935 . . {the mixer being built-up from a plurality of modules or stacked plates comprising complete or partial elements of the mixer}
- B01F 15/00941 . . {the mixer or mixing elements being collapsible, i.e. when discharging the products}
- B01F 15/00948 . . . {the complete mixer being collapsible, i.e. the housing can be collapsed}
- B01F 15/00954 . {Preventing generation of dust or dirt; Sieves; Filters ([B01F 15/00019](#), [B01F 15/00779](#) take precedence)}
- B01F 15/00961 . . {Preventing generation of dust}
- B01F 15/00967 . . {using splash guards in mixers for avoiding dirt or projection of material}
- B01F 15/00974 . . {using filters in mixers, e.g. during venting}

	B01F 15/0098	• • • {-Filters for micro-living organisms, i.e. filtering of the mixture}
	B01F 15/00987	• • {-using sieves in mixers for purposes other than mixing, e.g. eliminating dust during venting}
	B01F 15/00993	• • {-Venting, degassing, ventilating of gases, fumes or toxic vapours during mixing}
U	B01F 15/02	• Feed or discharge mechanisms
U	B01F 15/0201	• • {-Feed mechanisms (with proportioning B01F 15/04)}
U	B01F 15/0205	• • • {-comprising breaking packages or parts thereof, e.g. piercing or opening sealing elements between compartments or cartridges (B65D 25/08 , B65D 81/32 take precedence)}
	B01F 15/0206	• • • • {-Breaking or perforating packages, containers, vials}
	B01F 15/0207	• • • • {-the package containing one of the components dissolves when in contact with the other component of the mixture (B65D 65/46 takes precedence)}
	B01F 15/0208	• • • • {-Opening clips which seal openings between the compartments}
	B01F 15/0209	• • • • {-Dissolving the seal when in contact with one of the products to be mixed, thereby bringing the compartments in communication}
	B01F 15/021	• • • • {-Opening the seal between the compartments by application of heat}
	B01F 15/0211	• • • • {-Opening hooks which lock, close-off openings between compartments}
	B01F 15/0212	• • • • {-Piercing, perforating, melting membranes, closures which seal the compartments}
	B01F 15/0213	• • • • {-Opening valves which close-off openings between compartments}
	B01F 15/0215	• • • • {-Removing separation walls, plugs which close off the different compartments, e.g. by rotation, axially sliding}
	B01F 15/0222	• • • {-characterized by the relative arrangement of the containers for feeding or mixing the components}
	B01F 15/0223	• • • • {-the containers being connected coaxially before contacting the contents}
	B01F 15/0224	• • • • {-A container being placed inside the other before contacting the contents}
	B01F 15/0225	• • • • {-the containers being connected in a mouth-to-mouth, end-to-end disposition, i.e. the openings are juxtaposed before contacting the contents}
	B01F 15/0226	• • • • {-the containers being placed in parallel before contacting the contents}
	B01F 15/0227	• • • {-characterized by the means for feeding the components to the mixer}
	B01F 15/0229	• • • • {-using belts}
	B01F 15/023	• • • • {-using boxes, closable containers, sacks, carts}
	B01F 15/0231	• • • • {-using buckets, cups, open containers}
	B01F 15/0232	• • • • {-using capillary forces}
	B01F 15/0233	• • • • {-using centrifugal forces}
	B01F 15/0234	• • • • {-using gravity, e.g. from a hopper}
	B01F 15/0235	• • • • • {-using a hopper}
	B01F 15/0236	• • • • {-using grippers}
	B01F 15/0237	• • • • {-using pistons, plungers, syringes}
	B01F 15/0238	• • • • {-using pneumatic pressure, overpressure, gas or air pressure in a closed receptacle or circuit system}
	B01F 15/0239	• • • • {-using propellers}
	B01F 15/024	• • • • {-using means for feeding components in a pulsating or intermittent manner}

	B01F 15/0241 {-using electrical pulses}
	B01F 15/0243 {-using pumps}
	B01F 15/0244 {-membrane pumps}
	B01F 15/0245 {-peristaltic pumps}
	B01F 15/0246 {-piezoelectric pumps}
	B01F 15/0247 {-piston pumps}
	B01F 15/0248 {-venturi pumps}
	B01F 15/0249 {-using rakes, plain plates with raking movement}
	B01F 15/025 {-using rollers}
	B01F 15/0251 {-using helical screws}
	B01F 15/0252 {-using shovels, scoops}
	B01F 15/0253 {-using slides, vibrating tables}
	B01F 15/0254 {-using sprayers, nozzles, jets}
	B01F 15/0255 {-using ink jet heads or cartridges, e.g. of the thermal bubble jet or piezoelectric type}
	B01F 15/0256 {-Squeezing a flexible container}
	B01F 15/0258 {-using vacuum, underpressure in a closed receptacle or circuit system}
	B01F 15/0259 {-using a syphon to create a suction of a component}
	B01F 15/026 {-using valves, gates, orifices, openings}
	B01F 15/0261 {-being adjustable}
	B01F 15/0262 {-using fans, turbines}
	B01F 15/0263 {-using vibrations, e.g. standing waves, ultrasonic vibrations}
	B01F 15/0264 {-With means for feeding the material with a fractal or tree-type distribution in a surface}
	B01F 15/0265 {-using means for feeding one phase surrounded by another phase without mixing during the feeding}
U	B01F 15/0266	. . {-Discharge mechanism}
	B01F 15/0274	. . . {-characterized by the means for discharging the components from the mixer}
	B01F 15/0275 {-using belts}
	B01F 15/0276 {-using gravity}
	B01F 15/0277 {-Discharging the components by overflow}
	B01F 15/0278 {-using pistons or plungers}
	B01F 15/0279 {-reciprocating in the mixing receptacle}
	B01F 15/028 {-using pneumatic pressure, overpressure, gas pressure in a closed receptacle or circuit system}
	B01F 15/0281 {-using means for discharging the mixture in a pulsating or intermittent manner}
	B01F 15/0282 {-using electrical pulses}
	B01F 15/0283 {-using pumps}
	B01F 15/0284 {-using venturi pumps}
	B01F 15/0286 {-using pushers}
	B01F 15/0287 {-using slides}
	B01F 15/0288 {-using a rotary discharge means, e.g. a screw beneath the receptacle (B01F 15/0267 takes precedence)}
	B01F 15/0289 {-using helical screws}

- B01F 15/029 {using squeezing means on a deformable container}
- B01F 15/0291 {using suction, vacuum, e.g. with a pipette}
- B01F 15/0292 {using valves, gates, orifices, openings}
- B01F 15/0293 {being adjustable}
- B01F 15/0294 {using fans or ventilators}
- B01F 15/0295 {using tilting or pivoting means for emptying the mixing receptacle}
- B01F 15/0296 {the mixing receptacle rotating in opposite directions for mixing and for discharging}
- B01F 15/0297 {using distributing means, e.g. manifold valves, multiple fittings for supplying the discharge components to a plurality of dispensing places}
- U B01F 15/04 . Forming a predetermined ratio of the substances to be mixed (controlling ratio of two or more flows of fluid or fluent material [G05D 11/02](#)){([G05D 11/00](#) takes precedence)}
- U B01F 15/0412 . . {Forming a predetermined ratio of two or more flows, e.g. using flow-sensing or flow controlling devices ([B01F 15/0408](#) takes precedence)}
- U B01F 15/0429 . . . {Flow control by valves, e.g. opening intermittently}
- B01F 15/0433 {the flow of one component operating the actuator of the valve, e.g. by deforming a membrane which operates de valve actuator}
- B01F 15/0437 . . . {the flow of substances to be mixed circulating in a closed circuit, e.g. from a container through valve, driving means, metering means, dispensing means, e.g. 3-way valve, and back to the container}
- U B01F 15/0441 . . {by feeding the components in predetermined amounts}
- B01F 15/0479 . . . {using flow rate controls for feeding the substances}

CHEMICAL OR PHYSICAL PROCESSES, e.g. CATALYSIS, COLLOID CHEMISTRY; THEIR RELEVANT APPARATUS (~~processes or apparatus for specific applications, see the relevant places for these processes or apparatus, e.g. [F26B 3/08](#)~~)

NOTES

In this subclass, the following terms or expressions are used with the meanings indicated :

- "solid particles" includes such particles whether catalysts, reactants or inert in solid, semi-solid or pasty state;
- "fluidised particles" means finely divided solid particles lifted and agitated by a stream of fluid;
- "fluidised bed-technique" means fluid-solid contacting technique in which finely divided particles are lifted and agitated by a rising stream of fluid, said stream having such a speed as to form a lower dense phase (the "bed") and an upper dilute fluidised phase of "fluidised particles";
- "processes conducted in the presence of solid particles" does not include processes wherein the only solid particles present are formed during the reaction.

In this subclass, tradenames that are often found in scientific and patent literature have been used in order to define precisely the scope of the groups

WARNING

>

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[B01J 37/025](#) covered by [B01J 37/02](#)

B01J 2/00	Processes or devices for granulating materials,{e.g. fertilisers}in general (-granulating metals B22F 9/00 , { granulating slag C21B 3/06 } , ores or scrap C22B 1/14 ; mechanical aspects of working of plastics or substances in a plastic state to make granules B29B 9/00 ; processes for granulating fertilisers characterised by their chemical constitution, see the relevant groups in C05B to C05G ; chemical aspects of powdering or granulating of macromolecular substances C08J 3/12); Rendering particulate materials free flowing in general, e.g. making them hydrophobic
B01J 2/003	<ul style="list-style-type: none">• {followed by coating of the granules (-to prevent the granules sticking together B01J 2/30-)}
B01J 2/006	<ul style="list-style-type: none">• {Coating of the granules without description of the process or the device by which the granules are obtained (-to prevent the granules sticking together B01J 2/30-)}
B01J 2/02	<ul style="list-style-type: none">• by dividing the liquid material into drops, e.g. by spraying, and solidifying the drops (-evaporating by spraying B01D 1/16-)
B01J 2/04	<ul style="list-style-type: none">• • in a gaseous medium{(-if combined with suspending the material in a gas, e.g. fluidised beds B01J 2/16-)}
B01J 3/00	Processes of utilising sub-atmospheric or super-atmospheric pressure to effect chemical or physical change of matter; Apparatus therefor (-apparatus for compacting or sintering of metal powders B22F 3/00 ; pressure vessels in general F16J 12/00 ; pressure vessels for containing or storing compressed, liquefied or solidified gases F17C ; pressure vessels for nuclear reactors G21C -)
B01J 3/002	<ul style="list-style-type: none">• {-Component parts of these vessels not mentioned in B01J 3/004 , B01J 3/006 , B01J 3/02 to B01J 3/08 ; Measures taken in conjunction with the process to be carried out, e.g. safety measures-}
B01J 3/004	<ul style="list-style-type: none">• {Sight-glasses therefor (-see also G02B-)}
U B01J 3/04	<ul style="list-style-type: none">• Pressure vessels, e.g. autoclaves
B01J 3/048	<ul style="list-style-type: none">• • {Multiwall, strip or filament wound vessels (-for pressurised gas vessels F17C 1/06 ; for making them B29-)}
B01J 3/06	<ul style="list-style-type: none">• Processes using ultra high pressure, e.g. for the formation of diamonds; Apparatus therefor, e.g. moulds, dies (-B01J 3/04 takes precedence; presses in general B30B-)
B01J 3/08	<ul style="list-style-type: none">• • Application of shock-waves for chemical reactions or for modifying the crystal structure of substances,{e.g. reactions carried out by explosions or in a combustion engine-type reactor} (-blasting F42D-)
B01J 4/00	Feed {or outlet}devices; Feed or outlet regulating devices (-feed or outlet devices for pressure vessels B01J 3/02 ; { feeding of particles into and evacuation of particles out of the reactor B01J 8/0015 })
U B01J 4/001	<ul style="list-style-type: none">• {Feed or outlet devices as such, e.g. feeding tubes}
B01J 4/002	<ul style="list-style-type: none">• • {Nozzle-type elements (-nozzle-type reactors B01J 19/26-)}
B01J 4/04	<ul style="list-style-type: none">• using osmotic pressure {using membranes, porous plates}
B01J 6/00	{Heat treatments such as}Calcining; Fusing {Pyrolysis (-furnaces F27D -)}
B01J 6/008	<ul style="list-style-type: none">• {Pyrolysis reactions (-of hydrocarbons C10G 9/00-)}
B01J 7/00	Apparatus for generating gases (-production of inert gas mixtures B01J 19/14 ; for generating specific gases, see the relevant subclasses, e.g. C01B , C10J ; { in "air bags" on vehicles B60R 21/26 ; for starter gas F02C 7/26 ; blasting cartridges for producing gas under pressure F42B 3/04 })

B01J 8/00	Chemical or physical processes in general, conducted in the presence of fluids and solid particles; Apparatus for such processes (-processes or devices for granulating material B01J 2/00 ; furnaces F27B ; { heat exchange apparatus F28C 3/10 ; F28D 13/00 , F28D 17/00 , F28D 19/00 })
B01J 8/0005	• {Catalytic processes under superatmospheric pressure (-non-catalytic processes B01J 3/00 -)}
B01J 8/001	• {Controlling catalytic processes (- B01J 8/1809 takes precedence-)}
B01J 8/005	• {Separating solid material from the gas/liquid stream (-separation processes per se B01D -)}
B01J 8/008	• {Details of the reactor or of the particulate material; Processes to increase or to retard the rate of reaction (- B01J 8/0285 , B01J 8/067 , B01J 8/087 , B01J 8/1836 take precedence-)}
U B01J 8/02	• with stationary particles, e.g. in fixed beds
U B01J 8/0207	• • {the fluid flow within the bed being predominantly horizontal}
B01J 8/0221	• • • {in a cylindrical shaped bed (- B01J 8/0214 takes precedence-)}
B01J 8/0278	• • {Feeding reactive fluids (-for solid material B01J 8/0015 -)}
B01J 8/0285	• • {Heating or cooling the reactor (-for tubular reactors in furnaces B01J 8/062 -)}
U B01J 8/04	• • the fluid passing successively through two or more beds
U B01J 8/0403	• • • {the fluid flow within the beds being predominantly horizontal}
U B01J 8/0407	• • • • {through two or more cylindrical annular shaped beds}
B01J 8/0415	• • • • {the beds being superimposed one above the other (- B01J 8/0434 takes precedence-)}
B01J 8/0492	• • • {Feeding reactive fluids (-for solid material, see B01J 8/0015 -)}
U B01J 8/06	• • in tube reactors; the solid particles being arranged in tubes
B01J 8/067	• • • {Heating or cooling the reactor (- B01J 8/062 takes precedence-)}
B01J 8/08	• with moving particles (-with fluidised particles B01J 8/18 -)
B01J 8/085	• • {Feeding reactive fluids (-for solid material, see B01J 8/0015 -)}
B01J 8/10	• • moved by stirrers or by rotary drums or rotary receptacles {or endless belts}
B01J 8/14	• • moving in free vortex flow apparatus (-free vortex flow apparatus in general B04C -)
B01J 8/16	• with particles being subjected to vibrations or pulsations (- B01J 8/40 takes precedence-)
B01J 8/18	• with fluidised particles (-combustion apparatus with fluidised bed in general F23C 10/00 ; furnaces with fluidised bed F27B 15/00 -)}
B01J 8/1818	• • {Feeding of the fluidising gas (- B01J 8/44 takes precedence-)}
B01J 8/1836	• • {Heating and cooling the reactor (- B01J 8/42 takes precedence-)}
B01J 8/1872	• • {Details of the fluidised bed reactor (- B01J 8/1836 takes precedence-)}
U B01J 8/20	• • with liquid as a fluidising medium
U B01J 8/22	• • • gas being introduced into the liquid
B01J 8/224	• • • • {the particles being subject to a circulatory movement (- B01J 8/222 takes precedence-)}
B01J 8/24	• • according to "fluidised-bed" technique (- B01J 8/20 takes precedence; combustion apparatus in which combustion takes place in a fluidised bed of fuel or other particles F23C 10/00 -)
B01J 8/38	• • • with fluidised bed containing a rotatable device or being subject to rotation {or to a circulatory movement, i.e. leaving a vessel and subsequently re-entering it}

B01J 8/384	<ul style="list-style-type: none"> • • • {being subject to a circulatory movement only} (B01J 8/382 takes precedence-)
B01J 8/42	<ul style="list-style-type: none"> • • • with fluidised bed subjected to electric current or to radiations {this sub-group includes the fluidised bed subjected to electric or magnetic fields}
B01J 10/00	Chemical processes in general for reacting liquid with gaseous media other than in the presence of solid particles, or apparatus specially adapted therefor (B01J 19/08 takes precedence; separation, e.g. distillation, also combined with chemical reactions B01D , { e.g. B01D 3/009 })
B01J 12/00	Chemical processes in general for reacting gaseous media with gaseous media; Apparatus specially adapted therefor (B01J 3/08 , B01J 8/00 , B01J 19/08 take precedence-)
B01J 12/002	<ul style="list-style-type: none"> • {carried out in the plasma state} (generating or handling plasma H05H 1/00-)
B01J 13/00	Colloid chemistry, e.g. the production of colloidal materials or their solutions, not otherwise provided for; Making micro-capsules or micro-balloons (use of substances as emulsifying, wetting, dispersing or foam producing agents B01F 17/00)
B01J 13/0004	<ul style="list-style-type: none"> • {Preparation of sols } (by physical processes B01J 13/0086 , aerosols B01J 13/0095-)
B01J 13/0043	<ul style="list-style-type: none"> • • {containing elemental metal} (for medical or diagnostical purposes A61K , G01N-)
B01J 13/0086	<ul style="list-style-type: none"> • {Preparation of sols by physical processes } (colloid mills B02C-)
B01J 13/02	<ul style="list-style-type: none"> • Making micro-capsules or micro-balloons { for medical preparations A61K 9/50-}
U B01J 13/06	<ul style="list-style-type: none"> • • by phase separation
B01J 13/08	<ul style="list-style-type: none"> • • • Simple coacervation, i.e. addition of highly hydrophilic material {(combined with spraying B01J 13/043 ; combined with mechanical division B01J 13/04-)}
U B01J 13/12	<ul style="list-style-type: none"> • • • removing solvent from the wall-forming material solution
B01J 13/125	<ul style="list-style-type: none"> • • • • {by evaporation of the solvent } (apparatus therefor B01J 13/043-)
B01J 14/00	Chemical processes in general for reacting liquids with liquids; Apparatus specially adapted therefor (B01J 8/00 , B01J 19/08 take precedence-)
B01J 15/00	Chemical processes in general for reacting gaseous media with non-particulate solids, e.g. sheet material; Apparatus specially adapted therefor (B01J 19/08 takes precedence-)
B01J 16/00	Chemical processes in general for reacting liquids with non-particulate solids, e.g. sheet material; Apparatus specially adapted therefor (B01J 19/08 takes precedence-)
B01J 19/00	Chemical, physical, or physico-chemical processes in general (physical treatment of fibres, threads, yarns, fabrics, feathers or fibrous goods made from such materials, see the relevant places for such treatment, e.g. D06M 10/00); Their relevant apparatus (packings, fillings or grids specially adapted for biological treatment of water, waste water or sewage C02F 3/10 ; splashing boards or grids specially adapted for trickle coolers F28F 25/08)
B01J 19/0006	<ul style="list-style-type: none"> • {Controlling or regulating processes } (controlling or regulating in general G05-)
U B01J 19/002	<ul style="list-style-type: none"> • • {Avoiding undesirable reactions or side-effects, e.g. avoiding explosions, or improving the yield by suppressing side-reactions}
B01J 19/0026	<ul style="list-style-type: none"> • • • {Avoiding carbon deposits } (inhibiting incrustation in general, C23F 14/00 , C23F 15/00-)

- B01J 19/0033
 - • {Optimalisation processes, i.e. processes with adaptive control systems (-adaptive control systems per se [G05B 13/00](#)-)}
- B01J 19/004
 - • {Multifunctional apparatus for automatic manufacturing of various chemical products (-sequential reactions [B01J 19/0046](#)-)}
- B01J 19/0046
 - {Sequential or parallel reactions, e.g. for the synthesis of polypeptides or polynucleotides; Apparatus and devices for combinatorial chemistry or for making molecular arrays (-synthesis methods per se [C40B 50/00](#)-)}
- U B01J 19/0053

U	B01J 29/00	Catalysts comprising molecular sieves {(molecular sieves per se C01B)}

NOTES

In this group, the following term is used with the meaning indicated:

- "zeolites" means:

(i) crystalline aluminosilicates with base-exchange and molecular sieve properties, having three dimensional, microporous lattice framework structure of tetrahedral oxide units;

(ii) compounds isomorphous to those of the former category, wherein the aluminium or silicon atoms in the framework are partly or wholly replaced by atoms of other elements, e.g. by

gallium, germanium, phosphorus or boron.

If metals are introduced into the framework of the molecular sieve already in the synthesis stage, [B01J 29/86](#) to [B01J 29/89](#) take precedence.

Mixtures of molecular sieves are classified in [B01J 29/005](#) or [B01J 29/80](#) and receive indexing codes chosen from groups [B01J 29/03](#) to [B01J 29/89](#) to identify the individual constituents of these mixtures

- B01J 29/005 • {-Mixtures of molecular sieves comprising at least one molecular sieve which is not an aluminosilicate zeolite, e.g. from groups [B01J 29/03](#) to [B01J 29/049](#) or [B01J 29/82](#) to [B01J 29/89](#)-}
- B01J 29/03 • not having base-exchange properties{(-[B01J 29/005](#) takes precedence-)}
- B01J 29/04 • having base-exchange properties, e.g. crystalline zeolites{(-[B01J 29/005](#) takes precedence-)}

B01J 31/00 Catalysts comprising hydrides, coordination complexes or organic compounds (catalyst compositions used only in polymerisation reactions [C08](#);{(-catalytic antibodies [C12N 9/0002](#)-)};{(catalytic antibodies [C12N 9/0002](#))})

NOTES

1. Group [B01J 31/003](#) takes precedence over groups [B01J 31/02](#) to [B01J 31/24](#) (catalytic antibodies [C12N 9/0002](#))

2. In this group, the following terms or expressions are used with the meanings indicated:

-"Organic compound" a compound in which carbon is bonded to (1)a second carbon; (2)at least one atom of hydrogen or halogen; or (3)nitrogen by a single or double bond; except cyanic acid (HOCN), cyanogen (NCCN), cyanamide (H2NCN), cyanogen halide (HalCN), hydrocyanic acid (HCN) isocyanic acid (HNCO) fulminic acid (HCNO)and metal carbides (MCCM) (catalysts comprising any of these exceptions or their salts [B01J 27/20](#) to [B01J 27/26](#) .

-"Organometallic compounds" includes all organic compounds wherein a metal or metalloid atom is bonded directly to a carbon fragment, the latter being formally anionic, no further neutral ligands being coordinated to the metal and the compound requiring no further cations for charge balance; e.g. M(1-CR3)n with M= main group metal, n= valency of metal and R= H or hydrocarbyl. (Compounds comprising anionic organonitrogen, organooxygen and organosulfur fragments, excluding carboxylates, with a metal bonded to these heteroatoms [B01J 31/02](#) to [B01J 31/0254](#) ; unsaturated carbon fragments in combination with transition metals [B01J 31/2282](#) .

-"Coordination complexes" includes any donor-acceptor compounds or complex ions comprising organic or inorganic, anionic or neutral

Lewis basic ligands, attached to a Lewis acid central metal or metal ion through one or several complexing donor atoms with at least one lone-pair of electrons, e.g. N, O, S, P, to provide at least a Sigma-bond. Typically the maximum number of same or different ligands according to the coordination number, spatial requirements of the ligand and electronic configuration of the metal is bound in a predictable geometry. Complexes of neutral, cationic or anionic hydrocarbon ligands with delocalised charge and/or bonding site, e.g. Pd-olefin complexes or metallocenes, are also included (the following groups take precedence: simple hydrocarbyl metal compounds, e.g. of main group metal(oids) [B01J 31/12](#) ; oxoacid salts [B01J 31/04](#) to [B01J 31/10](#) ; other compounds comprising anionic organonitrogen, organooxygen and organosulfur fragments with a metal bonded to these heteroatoms [B01J 31/02](#) to [B01J 31/0254](#) . -"Organometallic complexes" includes all coordination complexes comprising a M-C bond, e.g. metal carbonyls (complex cyanides such as $M_4[Fe(CN)_6]$ [B01J 27/26](#)). Included are furthermore complexes which are not strictly organometallic per se, e.g. comprising only N, O, S and/or P coordinated ligands, but are described as involving, or known to involve, organometallic intermediates and/or transition states during use, e.g. Group 8-10 metal complexes for a variety of catalytic reactions or steps thereof, such as oxidative addition, e.g. of ArX , hydrogenation, carbonylation, epoxidation, etc. -"Organic complexes" includes all coordination complexes comprising organic ligands (groups [B01J 31/1608](#) to [B01J 31/1895](#) take precedence). -"Polymer" includes any macromolecular substance (typically $M > 10000$ g/mol), which comprises repeating units made up of one or several kinds of atoms or groups of atoms, which are identically connected to one another. Oligomers, i.e. more than two identical repeating units connected to one another and typically $500 < M < 10000$ g/mol, are grouped with the respective polymers (polymers per se [C08](#)).

3. In this group, if two or more aspects are of equal importance, these are each classified, e.g. two components in a catalyst system such as:

- support and pendant or otherwise immobilised coordination complex; or
- coordination complex and essential additive.

However, if two components, even if separately added, are described as forming, or known to form, a coordination complex, only the latter is classified, e.g. phosphine and Group 8-10 metal such as rhodium. The groups [B01J 31/26](#) to [B01J 31/38](#) are not to be used for the central metals in coordination complexes but rather for separately added further inorganic ingredients.

Each specifically disclosed alternative is separately classified, i.e. specifically disclosed by ways of worked examples, specific claims and/or explicit alternatives therein.

4. When classifying in [B01J 31/00](#) , additional information for the catalysts is provided as follows:

- (4-1) the specifically disclosed intended uses are indexed in [B01J 2231/00](#) ;
- (4-2) general aspects of the complexes of group [B01J 31/16](#) and the specifically disclosed central metal(s) therein, as well as additional information regarding any special solvents used for any catalyst system of this group are indexed in [B01J 2531/00](#) .
- (4-3) conceptual articles, e.g. reviews, are separately indexed in [B01J 2231/005](#) and [B01J 2531/001](#) ;
- (4-4) additional information regarding the complexes or ligands classified in [B01J 31/16](#) to [B01J 31/24](#) and indexed in [B01J 2531/00](#) is indexed in [B01J 2540/00](#) , e.g. non-coordinating substituents on the ligand periphery]

**B01J 39/00 -
B01J 49/00**

Ion-exchange ~~(-treatment of milk [A23C 9/14](#) ; separation by liquid ion-exchangers [B01D](#) , e.g. [B01D 11/00](#) ; separation of isotopes [B01D 59/00](#) ; compounds *er se*, see the relevant classes, e.g. [C01](#) , [C07](#) , [C08](#) ; treatment of water [C02F 1/42](#) ; refining of hydrocarbon oils, in the absence of hydrogen, with solid sorbents [C10G 25/00](#) ; purification of sugar juices [C13B 20/14](#) ; extraction of sugar from molasses [C13B 35/06](#) ; extraction of metal compounds from ores or concentrates by wet processes [C22B 3/00](#) ; using ion-exchange for investigating or analysing materials [G01N 30/96](#) ; treating radioactively contaminated material [G21F 9/12](#)-)~~

NOTES

In groups [B01J 39/00](#) to [B01J 49/00](#) :

- Ion-exchange covers all processes whereby ions are exchanged between the solid exchanger and the liquid to be treated and wherein the exchanger is not soluble in the liquid to be treated
- Ion-exchange processes cover also ion-exchange in combination with complex or chelate forming reactions

In groups [B01J 39/00](#) to [B01J 49/00](#) , in the absence of an indication to the contrary, classification is made in the last appropriate place

After the notation of [B01J 39/00](#) to [B01J 49/00](#) , and separated there from by a + sign, notations concerning other constituents may be added. These notations are selected from groups [B01J 39/00](#) and [B01J 41/00](#)

B01J 39/00

Cation exchange; Use of material as cation exchangers; Treatment of material for improving the cation exchange properties ~~(-cation exchange chromatography processes [B01D 15/362](#)-)~~

- U [B01J 39/08](#) • Use of material as cation exchangers; Treatment of material for improving the cation exchange properties

- Catalytic reactions performed with catalysts classified in [B01J 31/00](#)**

NOTE

In this group indexing is done according to the specific catalytic reaction. In case of multiple catalytic activities only those are indexed which are specifically exemplified, i.e. by ways of worked examples, specific claims or explicit alternatives therein.

- U B01J 2231/10 • Polymerisation reactions involving at least dual use catalysts, e.g. for both oligomerisation and polymerisation
- B01J 2231/14 • • Other (co) polymerisation, e.g. of lactides, epoxides (-"ROMP", i.e. ring-opening metathesis polymerisation [B01J 2231/54](#)-)
- U B01J 2231/70 • Oxidation reactions, e.g. epoxidation, (di)hydroxylation, dehydrogenation and analogues
- B01J 2231/76 • • Dehydrogenation (-transfer-dehydrogenation of CH-XH [B01J 2231/641](#) ; transfer-dehydrogenation of -CH₂CHR- via C-H activation [B01J 2231/46](#)-)

B01J 2531/00**Additional information regarding catalytic systems classified in [B01J 31/00](#)**NOTE

In this group the term "Metals" refers to the central metal in the coordination complexes ([B01J 31/16](#) to [B01J 31/24](#)), as used for the respective catalytic reaction, excluding carboxylates (see [B01J 31/04](#)) and other simple salts or organometallic compounds (see [B01J 31/12](#)). As to components, only those metals or solvents are indexed which are explicitly mentioned in the claims or the worked examples. As to compositional aspects, only those are provided for in the scheme below and are intended to be indexed, which provide additional information regarding the complexes and/or ligands classified in [B01J 31/16](#) to [B01J 31/24](#); indexing codes [B01J 2531/0286](#) to [B01J 2531/0297](#) are only used if these aspects are described as essential. Indexing codes [B01J 2531/0213](#) to [B01J 2531/0277](#) characterise the complexes on the basis of bond-type (linkage-type) thereby specifying the structural geometry of the complexes, while classification entries [B01J 31/16](#) to [B01J 31/24](#) are purely compositional subdivisions. The individual metals, the compositional aspects of complexes used and the solvents are indexed for each explicit alternative, according to the guideline above

- B01J 2531/001 • General concepts, e.g. reviews, relating to catalyst systems and methods of making them, the concept being defined by a common material or method/theory

NOTE

When indexing in this group, only the focus is indexed in [B01J 2531/004](#) to [B01J 2531/007](#) and only if groups with closely related members are concerned, e.g. N-heterocyclic carbenes ([B01J 2531/004](#)), Pd-complexes ([B01J 2531/005](#)), added halide ([B01J 2531/007](#)). Otherwise the main code [B01J 2531/002](#) is used.

- U B01J 2531/02 • Compositional aspects of complexes used, e.g. polynuclearity
- U B01J 2531/0269 • • Complexes comprising ligands derived from the natural chiral pool or otherwise having a characteristic structure or geometry
- B01J 2531/028 • • • comprising affinity tags, e.g. for recovery (-self-associating or modular catalysts [B01J 2531/0291](#)-)

Project: N/A (B01L)

- U B01L 1/00 **Enclosures; Chambers (fume cupboards [B08B](#); provided with manipulation devices, glove boxes [B25J](#); cooling chambers [F25D](#))**
- U B01L 1/02 • Air-pressure chambers; Air-locks therefor
- B01L 1/025 • • {-Environmental chambers (incubators for culturing cells [C12M 41/14](#), Test chambers to test weather resistance [G01N 17/002](#))}
- B01L 1/50 • {-for storing hazardous materials in the laboratory, e.g. cupboards, waste containers}

U	B01L 3/00	Containers or dishes for laboratory use, e.g. laboratory glassware (bottles B65D ; apparatus for enzymology or microbiology { specially adapted for culturing} C12M 1/00); Droppers (receptacles for volumetric purposes G01F)
U	B01L 3/02	• Burettes; Pipettes
U	B01L 3/021	• {Pipettes, i.e. with only one conduit for withdrawing and redistributing liquids}
	B01L 3/0213	• • {-Accessories for glass pipettes; Gun-type pipettes, e.g. safety devices, pumps}
U	B01L 3/0217	• • • {of the plunger pump type (medical syringes A61M)}
	B01L 3/0237	• • • • {-Details of electronic control, e.g. relating to user interface}
	B01L 3/0241	• • {Drop counters; Drop formers (making arrays for combinatorial libraries B01J 19/0046 ; automation of dispensing for analysis G01N 35/10)}
U	B01L 3/0244	• • • {using pins}
	B01L 3/0248	• • • • {-Prongs, quill pen type dispenser}
	B01L 3/0251	• • • • {-Pin and ring type or pin in tube type dispenser}
	B01L 3/0255	• • • • {-characterized by the form or material of the pin tip}
	B01L 3/0258	• • • {-using stamps}
	B01L 3/0262	• • • {-using touch-off at substrate or container}
	B01L 3/0265	• • • {-using valves to interrupt or meter fluid flow, e.g. using solenoids or metering valves}
	B01L 3/0268	• • • {-using pulse dispensing or spraying, eg. inkjet type, piezo actuated ejection of droplets from capillaries}
	B01L 3/0272	• • • {-Dropper bottles}
	B01L 3/0286	• • {-Ergonomic aspects, e.g. form or arrangement of controls}
	B01L 3/0289	• • {-Apparatus for withdrawing or distributing predetermined quantities of fluid (B01L 3/02 takes precedence; sample taking G01N 1/00 ; sample taking within automatic analysers G01N 35/00 ; volume measuring in general G01F)}
	B01L 3/0293	• • • {-for liquids}
	B01L 3/0296	• • • • {-from piercable tubing, e.g. in extracorporeal blood sampling}
	B01L 3/50	• {-Containers for the purpose of retaining a material to be analysed, e.g. test tubes (devices for taking samples of blood A61B 5/14)}
	B01L 3/502	• • {-with fluid transport, e.g. in multi-compartment structures (centrifugal-type cuvettes G01N 21/07 ; analysis by separation into components G01N 30/00 ; automatic analysers G01N 35/00)}
	B01L 3/5021	• • • {-Test tubes specially adapted for centrifugation purposes (centrifuges B04B 5/04)}
	B01L 3/50215	• • • • {-using a float to separate phases}
	B01L 3/5023	• • • {-with a sample being transported to, and subsequently stored in an absorbent for analysis}
	B01L 3/5025	• • • {-for parallel transport of multiple samples}
	B01L 3/50255	• • • • {-Multi-well filtration}
	B01L 3/5027	• • • {-by integrated micro-fluidic structures, i.e. dimensions of channels and chambers are such that surface tension forces are important, e.g. lab-on-a-chip (B01L 3/5023 takes precedence; micromixers B01F 13/0059 ; microreactors for synthesis B01J 19/0093 ; micro-capillary devices in general B81B 1/00)}
	B01L 3/502707	• • • • {-characterised by the manufacture of the container or its components (manufacture of micro-structural devices in general B81C ; by shaping or joining plastic parts B29C 59/00 B29C 65/00 , by laminating B32B 37/00)}

- B01L 3/502715 . . . {characterised by interfacing components, e.g. fluidic, electrical, optical or mechanical interfaces}
- B01L 3/502723 . . . {characterised by venting arrangements}
- B01L 3/50273 . . . {characterised by the means or forces applied to move the fluids (micro pumps [F04B 19/006](#), of the membrane type [F04B 43/043](#))}
- B01L 3/502738 . . . {characterised by integrated valves (microvalves [F16K 99/0001](#))}
- B01L 3/502746 . . . {characterised by the means for controlling flow resistance, e.g. flow controllers, baffles ([B01L 3/502738](#) takes precedence)}
- B01L 3/502753 . . . {characterised by bulk separation arrangements on lab-on-a-chip devices, e.g. for filtration or centrifugation (separation in general [B01D](#); micro-apparatus for analysis using electrophoresis [G01N 27/44791](#); sample preparation [G01N 1/28](#))}
- B01L 3/502761 . . . {specially adapted for handling suspended solids or molecules independently from the bulk fluid flow, e.g. for trapping or sorting beads, for physically stretching molecules (investigating characteristics of particles [G01N 15/00](#))}
- B01L 3/502769 . . . {characterised by multiphase flow arrangements}
- B01L 3/502776 . . . {specially adapted for focusing or laminating flows}
- B01L 3/502784 . . . {specially adapted for droplet or plug flow, e.g. digital micro-fluidics (automatic analysis using a stream of discrete samples in a tube system [G01N 35/08](#))}
- B01L 3/502792 . . . {for moving individual droplets on a plate, e.g. by locally altering surface tension}
- B01L 3/5029 . . {using swabs}
- B01L 3/505 . {flexible containers not provided for above}
- B01L 3/5055 . . {Hinged, e.g. opposable surfaces}
- B01L 3/508 . {rigid containers not provided for above}
- B01L 3/5082 . . {Test tubes per se}
- B01L 3/50825 . . . {Closing or opening means, corks, bungs (closures for containers [B65D](#); means for removing stoppers [B67B 7/02](#))}
- B01L 3/5085 . . {for multiple samples, e.g. micro-titration plates}
- B01L 3/50851 . . . {specially adapted for heating or cooling samples (laboratory heating apparatus [B01L 7/00](#); incubators [C12M](#))}
- B01L 3/50853 . . . {with covers or lids}
- B01L 3/50855 . . . {using modular assemblies of strips or of individual wells}
- B01L 3/50857 . . . {using arrays or bundles of open capillaries for holding samples}
- B01L 3/5088 . . {confining liquids at a location by surface tension, e.g. virtual wells on plates, wires ([B01L 3/50857](#) takes precedence)}
- B01L 3/52 . {Containers specially adapted for storing or dispensing a reagent ([B01L 3/02](#) takes precedence; containers for medical or pharmaceutical purposes [A61J 1/00](#); containers in general [B65D](#); storing or dispensing test elements [G01N 33/4875](#); automated reagent dispensing [G01N 35/1002](#))}
- B01L 3/523 . {with means for closing or opening}
- B01L 3/527 . {for a plurality of reagents}
- B01L 3/54 . {Labware with identification means (identification of carriers, materials or components in automatic analysers [G01N 35/00732](#))}
- B01L 3/545 . {for laboratory containers}
- B01L 3/5453 . . {for test tubes}
- B01L 3/5457 . . {for container closures}

B01L 3/56	• {-Labware specially adapted for transferring fluids}
B01L 3/561	• • {-Tubes; Conduits (in general F16L)}
B01L 3/563	• • {-Joints or fittings (in general F16L); Separable fluid transfer means to transfer fluids between at least two containers, e.g. connectors}
B01L 3/5635	• • • {-connecting two containers face to face, e.g. comprising a filter}
B01L 3/565	• • {-Seals (in general F16L)}
B01L 3/567	• • {-Valves, taps or stop-cocks (in combination with burettes B01L 3/0203 ; in general F16K)}
B01L 3/569	• • {-Glassware}
U B01L 7/00	Heating or cooling apparatus (evaporators B01D 1/00; drying gases or vapours, e.g. desiccators, B01D 53/26; autoclaves B01J 3/04; drying ovens F26B; furnaces, ovens F27); Heat insulating devices
B01L 7/50	• {-Cryostats}
B01L 7/52	• {-with provision for submitting samples to a predetermined sequence of different temperatures, e.g. for treating nucleic acid samples (amplification or hybridisation processes per se C12Q 1/68 ; controlling sequential reactions for synthesis B01J 19/0046)}
B01L 7/525	• • {-with physical movement of samples between temperature zones}
B01L 7/5255	• • • {-by moving sample containers}

Project: N/A (B03B)

B03B	SEPARATING SOLID MATERIALS USING LIQUIDS OR USING PNEUMATIC TABLES OR JIGS (removing fluids from solids B01D; magnetic or electrostatic separation of solid materials from solid materials or fluids, separation by high voltage electric fields B03C; flotation differential sedimentation B03D; separating by dry methods B07; screening or sifting B07B; by picking B07C; separating peculiar to particular materials and provided for in other single classes, see the relevant classes)
B03B 1/00	Conditioning for facilitating separation by altering physical properties of the matter to be treated (-pre-treatment of ores in general C22B) { Pretreatment prior to magnetic separation B03C 1/00 }
B03B 4/00	Separating by pneumatic tables or by pneumatic jigs (-sink-float separation using dry heavy media B03B 5/46)

NOTE

Group [B03B 4/005](#) takes precedence over groups [B03B 4/02](#) to [B03B 4/065](#)

B03B 4/04	• using rotary tables or tables formed by travelling belts (-separating solids from solids using gas currents and revolving drums B07B 4/06-)
B03B 5/00	Washing granular, powdered or lumpy materials; Wet separating (-separating by pneumatic tables or by pneumatic jigs B03B 4/00-)
B03B 5/02	• using shaken, pulsated or stirred beds as the principal means of separation (- B03B 5/28 , B03B 5/48 take precedence-)
B03B 5/04	• • on shaking tables (-on vanners B03B 5/08-)
U B03B 5/28	• by sink-float separation
U B03B 5/30	• • using heavy liquids or suspensions
B03B 5/32	• • • using centrifugal force (-centrifuges B04B ; cyclones B04C-)
B03B 5/36	• • • Devices therefor, other than using centrifugal force (-jigs B03B 5/10-)
B03B 5/48	• by mechanical classifiers (-sink-float separation aspects B03B 5/28-)
B03B 5/60	• by non-mechanical classifiers, e.g. slime tanks (-using shaken, pulsated or stirred beds as the principal means of separation B03B 5/02 ; hydraulic classifiers B03B 5/62 ; water impulse classifiers B03B 5/68-)
B03B 5/68	• by water impulse (-shaking tables B03B 5/04 ; jigs B03B 5/10 ; hydraulic classifiers B03B 5/62-)
B03B 11/00	Feed or discharge devices integral with washing or wet-separating equipment (-filling or emptying devices per se B65G 65/30-)
B03B 13/00	Control arrangements specially adapted for wet-separating apparatus or for dressing plant, using physical effects (-detecting, measuring, or analysing devices G01 ; control devices in general G05-)
B03B 13/005	• {Methods or arrangements for controlling the physical properties of heavy media (-in relation with groups B03B 5/30 to B03B 5/46-), e.g. density, concentration, viscosity}

Project: N/A (B03D)

B03D	FLOTATION; DIFFERENTIAL SEDIMENTATION (-sedimentation in general B01D 21/00 ; in combination with other separation of solids B03B ; sink-float separation B03B 5/28 ; detergents, soaps C11D-)
	<u>WARNING</u> The following groups are not complete: B03D 1/023 , see also B03D 1/02 B03D 1/025 , see also B03D 1/02 B03D 1/026 , see also B03D 1/02 B03D 1/028 , see also B03D 1/02 B03D 1/082 , see also B03D 1/08 B03D 1/085 , see also B03D 1/08 B03D 1/087 , see also B03D 1/08 B03D 1/1406 , see also B03D 1/14 B03D 1/1443 , see also B03D 1/14 B03D 1/145 , see also B03D 1/14 B03D 1/1456 , see also B03D 1/14 B03D 1/1462 , see also B03D 1/14 B03D 1/1468 , see also B03D 1/14 B03D 1/1475 , see also B03D 1/14 B03D 1/1487 , see also B03D 1/14 B03D 1/1493 , see also B03D 1/14 B03D 1/242 , see also B03D 1/24 B03D 1/247 , see also B03D 1/24]
B03D 1/00	Flotation (-conditioning for flotation, general arrangement of plan B03B-)
	<u>NOTE</u> In groups B03D 1/001 to B03D 1/018 , in the absence of an indication to the contrary, classification is made in the last appropriate place.
B03D 1/001	• Flotation agents (-conditioners B03B 1/00-)
B03D 1/08	• Subsequent treatment of concentrated product (-froth dispersion B01D 19/02-)

SPRAYING APPARATUS; ATOMISING APPARATUS; NOZZLES ({ sprayers or atomisers specially adapted for therapeutic purposes [A61M 11/00](#) } ; spray-mixers with nozzles [B01F 5/20](#) ; processes for applying liquids or other fluent materials to surfaces by spraying [B05D](#); { nozzles specially adapted for injection moulding of plastics or substances in a plastic state [B29C 45/1603](#) , [B29C 45/20](#) ; nozzles specially adapted for windscreen washers [B60S 1/52](#) } ; means for pumping fluids [F04](#); valves, e.g. water-taps, [F16K](#))

NOTES

This subclass covers particularly apparatus for the release or projection of drops or droplets into the atmosphere or into a chamber to form a mist or the like. For this purpose, the materials to be projected may be suspended in a stream of gas or vapour.

Attention is drawn to the Note following the title of class [B05](#).

In this subclass, "means for controlling volume of flow" is used in the most general meaning and includes also means allowing only starting and stopping the flow

In this subclass, the meaning of the expression "apparatus carried on or by a person" includes all apparatus comprising at least one container for the material to be sprayed carried on or by a person during use

In this subclass, the word "container" is to be understood as the innermost enclosure containing the material to be sprayed

WARNING

Groups [B05B 11/30](#) to [B05B 11/3098](#) do not correspond to former or current IPC groups. The concordance CPC : IPC for these groups is as follows: - [B05B 11/30](#) - [B05B 11/3098](#) : [B05B 11/00](#)

B05B 1/00

Nozzles, spray heads or other outlets, with or without auxiliary devices such as valves, heating means (-[B05B 3/00](#) , [B05B 5/00](#) , [B05B 7/00](#) take precedence; { nozzles for baths with water or gas jets [A61H 33/00](#) , e.g. [A61H 33/6063](#) , [A61H 33/6021](#) , [A61H 33/026](#) or [A61H 33/027](#) ; Nozzles specially adapted for fire-extinguishing [A62C 31/02](#) ; Nozzles for generating high velocity abrasive fluid jets [B24C 5/04](#) } ; nozzles for jet-ink printing mechanisms [B41J 2/135](#) ; { Nozzles for filling containers [B65B 39/00](#) ; } nozzles for liquid-dispensing, e.g. in vehicle service stations [B67D 7/42](#) -)

B05B 1/02

- designed to produce a jet, spray, or other discharge of particular shape or nature, e.g. in single drops, {or having an outlet of particular shape} (- [B05B 1/26](#) , [B05B 1/28](#) , [B05B 1/34](#) take precedence-)

U B05B 1/04

- in flat form, e.g. fan-like, sheet-like

B05B 1/042

- • {Outlets having two planes of symmetry perpendicular to each other, one of them defining the plane of the jet (-[B05B 1/044](#) , [B05B 1/046](#) take precedence-)}

B05B 1/044

- • {Slits, i.e. narrow openings defined by two straight and parallel lips; Elongated outlets for producing very wide discharges, e.g. fluid curtains (-[B05B 1/046](#) takes precedence-)}

U B05B 1/08

- of pulsating nature, e.g. delivering liquid in successive separate quantities; {Fluidic oscillators}

B05B 1/083

- • {the pulsating mechanism comprising movable parts (-liquid driven rotating elements, e.g. turbines, arranged upstream the outlet [B05B 3/04](#)-)}

B05B 1/12

- capable of producing different kinds of discharge, e.g. either jet or spray (-[B05B 1/16](#) takes precedence-)

- B05B 1/14
 - with multiple outlet openings (~~B05B 1/02~~ , ~~B05B 1/26~~ take precedence-); with strainers in or outside the outlet opening
- U B05B 1/16
 - • having selectively- effective outlets
- B05B 1/1609
 - • • {with a selecting mechanism comprising a lift valve (~~B05B 1/1681~~ takes precedence; lift valves in general ~~F16K 1/00~~-)}
- B05B 1/1627
 - • • {with a selecting mechanism comprising a gate valve, a sliding valve or a cock (~~B05B 1/1681~~ takes precedence; gate valves or sliding valves in general ~~F16K 3/00~~ ; cocks in general ~~F16K 5/00~~-)}
- B05B 1/1636
 - • • • {by relative rotative movement of the valve elements (~~B05B 1/1672~~ takes precedence-)}
- B05B 1/1663
 - • • • {by relative translatory movement of the valve elements (~~B05B 1/1672~~ takes precedence-)}
- B05B 1/18
 - • Roses; Shower heads{(-with means for adding soap or the like ~~E03C 1/046~~ ; jet regulators ~~E03C 1/08~~-)}
- B05B 1/20
 - • {Arrangements of several outlets along elongated bodies, e.g.}perforated pipes or troughs, e.g. spray booms{(-spray booms for agricultural uses ~~A01M 7/0071~~ ; spray bars for treating roads ~~E01C 19/176~~-)}; Outlet elements therefor
- B05B 1/202
 - • • {comprising inserted outlet elements (~~B05B 1/205~~ takes precedence-)}
- B05B 1/22
 - Spouts (~~-anti-splash devices for water-taps ~~E03C 1/08~~~~-)
- B05B 1/28
 - with integral means for shielding the discharged liquid or other fluent material, e.g. to limit area of spray; with integral means for catching drips or collecting surplus liquid or other fluent material (~~-means for any of these purposes, per se, ~~B05B 15/04~~~~-)
- U B05B 1/30
 - designed to control volume of flow, e.g. with adjustable passages
- B05B 1/3006
 - • {the controlling element being actuated by the pressure of the fluid to be sprayed (~~B05B 11/0062~~ takes precedence-)}
- B05B 1/3013
 - • {the controlling element being a lift valve (~~B05B 1/3006~~ , ~~B05B 1/3033~~ take precedence; lift valves in general ~~F16K 1/00~~-)}
- B05B 1/302
 - • • {with a ball-shaped valve member (~~-ball valves in general ~~F16K 1/14~~~~-)}
- B05B 1/3026
 - • {the controlling element being a gate valve, a sliding valve or a cock (~~B05B 1/3006~~ , ~~B05B 1/326~~ take precedence; gate valves or sliding valves in general ~~F16K 3/00~~ ; cocks in general ~~F16K 5/00~~-)}
- B05B 1/3033
 - • {the control being effected by relative coaxial longitudinal movement of the controlling element and the spray head (~~B05B 1/3026~~ takes precedence-)}
- U B05B 1/304
 - • • {the controlling element being a lift valve}
- B05B 1/3046
 - • • • {the valve element, e.g. a needle, co-operating with a valve seat located downstream of the valve element and its actuating means, generally in the proximity of the outlet orifice (~~B05B 1/308~~ takes precedence-)}
- B05B 1/3073
 - • • {the controlling element being a deflector acting as a valve in co-operation with the outlet orifice (~~B05B 1/308~~ takes precedence; deflectors per se ~~B05B 1/262~~-)}
- B05B 1/32
 - • in which a valve member forms part of the outlet opening{(-~~B05B 1/3033~~ takes precedence-)}
- B05B 1/323
 - • • {the valve member being actuated by the pressure of the fluid to be sprayed (~~B05B 11/0062~~ takes precedence-)}
- B05B 1/34
 - designed to influence the nature of flow of the liquid or other fluent material, e.g. to produce swirl (~~B05B 1/30~~ takes precedence-)
- U B05B 1/3405
 - • {to produce swirl}
- U B05B 1/341
 - • • {before discharging the liquid or other fluent material, e.g. in a swirl chamber upstream the spray outlet}

- U B05B 1/3421 {with channels emerging substantially tangentially in the swirl chamber}
- B05B 1/3426 {the channels emerging in the swirl chamber perpendicularly to the outlet axis (-B05B 1/3436 takes precedence-)}
- B05B 1/3468 {with means for controlling the flow of liquid entering or leaving the swirl chamber (-B05B 1/3452 takes precedence-)}
- U **B05B 3/00** **Spraying or sprinkling apparatus with moving outlet elements or moving deflecting elements; {Spraying or sprinkling heads with rotating elements located upstream the outlet}**
- B05B 3/008 . {comprising a wobbling or nutating element, i.e. rotating about an axis describing a cone during spraying (-B05B 3/0463 takes precedence-)}
- U B05B 3/02 . with rotating elements
- B05B 3/021 . . {with means for regulating the jet relative to the horizontal angular position of the nozzle, e.g. for spraying non circular areas by changing the elevation of the nozzle or by varying the nozzle flow-rate (-B05B 3/0454 takes precedence-)}
- B05B 3/022 . . {the rotating deflecting element being a ventilator or a fan (-B05B 3/105 takes precedence; agricultural atomisers or mist blowers A01M 7/0003-)}
- B05B 3/028 . . {the rotation being orbital (-B05B 3/0445 and B05B 3/066 take precedence-)}
- B05B 3/04 . . driven by the liquid or other fluent material discharged, e.g. the liquid actuating a motor before passing to the outlet (-B05B 3/023 takes precedence-)}
- B05B 3/0409 . . . {with moving, e.g. rotating, outlet elements (-B05B 3/0486 , B05B 3/06 take precedence-)}
- B05B 3/0418 {comprising a liquid driven rotor, e.g. a turbine (-B05B 3/0463 , B05B 3/0468 take precedence-)}
- U B05B 3/0422 {with rotating outlet elements}
- B05B 3/0431 {the rotative movement of the outlet elements being reversible (-B05B 3/0445 takes precedence-)}
- B05B 3/045 {with automatic means for regulating the jet (-B05B 3/0445 takes precedence-)}
- B05B 3/0468 {the liquid actuating a motor after passing the spray outlet (-B05B 3/0472 takes precedence-)}
- B05B 3/10 . . discharging over substantially the whole periphery of the rotating member, {i.e. the spraying being effected by centrifugal forces (-B05B 3/082 takes precedence-)}
- B05B 3/1007 . . . {characterised by the rotating member (-B05B 3/105 takes precedence-)}
- U B05B 3/14 . with oscillating elements; with intermittent operation
- B05B 3/16 . . driven or controlled by the liquid or other fluent material discharged, e.g. the liquid actuating a motor before passing to the outlet (-B05B 3/0431 , B05B 3/0468 , B05B 3/0472 take precedence-)}
- B05B 3/18 . with elements moving in a straight line, e.g. along a track; Mobile sprinklers (-watering arrangements making use of movable installations A01G 25/09-)}
- U **B05B 5/00** **Electrostatic spraying apparatus; Spraying apparatus with means for charging the spray electrically; Apparatus for spraying liquids or other fluent materials by other electric means**
- U B05B 5/025 . Discharge apparatus, e.g. electrostatic spray guns
- B05B 5/03 . . characterised by the use of gas, {e.g. electrostatically assisted pneumatic spraying (-B05B 5/04 , B05B 5/043 , B05B 5/047 take precedence-)}

- B05B 5/035
 - • characterised by gasless spraying,{e.g. electrostatically assisted airless spraying(-[B05B 5/04](#) , [B05B 5/043](#) , [B05B 5/047](#) take precedence-)}
- U B05B 5/08
 - Plant for applying liquids or other fluent materials to objects
- B05B 5/087
 - • {Arrangements of electrodes, e.g. of charging, shielding, collecting electrodes (-[B05B 5/12](#) , [B05B 5/14](#) take precedence; Arrangements of electrodes on the discharge apparatus [B05B 5/0533](#)-)}
- B05B 5/10
 - • Arrangements for supplying power, e.g. charging power (-[B05B 5/053](#) takes precedence-)
- B05B 7/00**

Spraying apparatus for discharge of liquids or other fluent materials from two or more sources, e.g. of liquid and air, of powder and gas (-[B05B 3/00](#) , [B05B 5/00](#) { [B05B 11/06](#) } take precedence; outlets not specially modified for two media [B05B 1/00](#)-)
- B05B 7/02
 - Spray pistols; Apparatus for discharge (-[B05B 7/14](#) , [B05B 7/16](#) , [B05B 7/24](#) take precedence-)
- B05B 7/04
 - • with arrangements for mixing liquids or other fluent materials before discharge (-mixing in general [B01F](#) , e.g. [B01F 5/00](#) ; mixing valves [F16K 11/00](#)-)
- U B05B 7/0416
 - • • {with arrangements for mixing one gas and one liquid}
- U B05B 7/0441
 - • • • {with one inner conduit of liquid surrounded by an external conduit of gas upstream the mixing chamber}
- B05B 7/045
 - • • • • {the gas and liquid flows being parallel just upstream the mixing chamber (-[B05B 7/0458](#) , [B05B 7/0466](#) take precedence-)}
- B05B 7/0475
 - • • • • {with means for deflecting the peripheral gas flow towards the central liquid flow (-[B05B 7/0458](#) takes precedence-)}
- B05B 7/06
 - • with {at least}one outlet orifice surrounding another approximately in the same plane
- U B05B 7/08
 - • with separate outlet orifices, e.g. to form parallel jets,{i.e. the axis of the jets being parallel}, to form intersecting jets,{i.e. the axis of the jets converging but not necessarily intersecting at a point}
- U B05B 7/0807
 - • • {to form intersecting jets}
- B05B 7/0853
 - • • • {with one single gas jet and several jets constituted by a liquid or a mixture containing a liquid (-[B05B 7/0815](#) takes precedence-)}
- B05B 7/0861
 - • • • {with one single jet constituted by a liquid or a mixture containing a liquid and several gas jets (-[B05B 7/0815](#) takes precedence-)}
- B05B 7/0876
 - • • {to form parallel jets constituted by a liquid or a mixture containing a liquid (-[B05B 7/0884](#) , [B05B 7/0892](#) take precedence-)}
- U B05B 7/12
 - • designed to control volume of flow, e.g. with adjustable passages
- B05B 7/129
 - • • {Hand guns comprising a gas valve located at the bottom of the handle (-[B05B 7/0087](#) takes precedence-)}
- B05B 7/14

Project: N/A (B05D)**B05D**

PROCESSES FOR APPLYING LIQUIDS OR OTHER FLUENT MATERIALS TO SURFACES, IN GENERAL (apparatus for applying liquids or other fluent materials to surfaces [B05B](#), [B05C](#); { coating of foodstuffs [A23P 1/084](#), [A23P 1/085](#) })

NOTE

This subclass covers:

- processes for applying liquids or other fluent materials to a surface or part of a surface, in general, by any mechanical or physical method and particularly processes producing a uniform distribution of liquids or other fluent materials on a surface;
- pretreatment of surfaces to which liquids or other fluent materials are to be applied;
- after-treatment of applied coatings. Attention is drawn to the Note following the title of class [B05](#).

B05D 1/00

Processes for applying liquids or other fluent materials (~~-[B05D 5/00](#), [B05D 7/00](#) take precedence-~~)

WARNING

Groups [B05D 1/60](#) to [B05D 1/62](#) do not correspond to former or current IPC groups. Concordance CPC : IPC for those groups is as follows - [B05D 1/60](#) to [B05D 1/62](#) : [B05D 1/00](#), [B05D 7/00](#)

- B05D 1/007 . {using an electrostatic field (~~-[B05D 1/02](#) to [B05D 1/16](#) take precedence-~~)}
- U B05D 1/02 . performed by spraying
- B05D 1/04 . . involving the use of an electrostatic field ({~~-[B05D 1/025](#) and [B05D 1/14](#) take precedence-~~)}
- B05D 1/12 . . Applying particulate materials (~~-[B05D 1/06](#), [B05D 1/10](#) take precedence-~~)
- U B05D 1/18 . performed by dipping
- B05D 1/185 . . {applying monomolecular layers (~~-[B05D 1/204](#) takes precedence-~~)}
- B05D 1/22 . . using fluidised-bed technique (~~-fluidised-bed technique in general [B01J 8/24](#)-~~)
- U B05D 1/36 . Successively applying liquids or other fluent materials, e.g. without intermediate treatment
- B05D 1/38 . . with intermediate treatment (~~-intermediate treatment per se [B05D 3/00](#)-~~)
- B05D 1/60 . {Deposition of organic layers from vapour phase (~~-vapour phase deposition in general [C23C 14/00](#), [C23C 16/00](#)-~~)}
- B05D 1/62 . {Plasma-deposition of organic layers (~~-plasma deposition in general [C23C 14/00](#), [C23C 16/00](#)-~~)}

B05D 3/00

Pretreatment of surfaces to which liquids or other fluent materials are to be applied; After-treatment of applied coatings, e.g. intermediate treating of an applied coating preparatory to subsequent applications of liquids or other fluent materials ~~(-successively applying liquids or other fluent materials [B05D 1/36](#) ; drying ovens [F26B](#)-)~~

WARNING

 - to obtain multicolour or other optical effects ~~(-[B05D 5/02](#) takes precedence-)~~
- U B05D 5/061
 - • {Special surface effect}
- B05D 5/063
 - • • {Reflective effect ~~(-[B05D 5/067](#) takes precedence-)~~}
- U B05D 5/067
 - • {Metallic effect}
- B05D 5/068
 - • • {achieved by multilayers ~~(-[B05D 5/066](#) takes precedence-)~~}
- B05D 5/08
 - to obtain an anti-friction or anti-adhesive surface ~~(-rendering particulate materials free-flowing in general, e.g. making them hydrophobic [B01J 2/30](#)-)~~

B05D 7/00

Processes, other than flocking, specially adapted for applying liquids or other fluent materials to particular surfaces or for applying particular liquids or other fluent materials~~(-coating of foodstuffs [A23P 1/084](#) , [A23P 1/085](#)-)~~

WARNING

Groups [B05D 7/50](#) to [B05D 7/5885](#) do not correspond to former or current IPC groups. Concordance CPC : IPC for those groups is as follows - [B05D 7/50](#) to [B05D 7/5885](#) : [B05D 7/00](#)

- B05D 7/02
 - to macromolecular substances, e.g. rubber ~~(-treatment or coating of shaped articles made of macromolecular substances [C08J 7/00](#)-)~~
- B05D 7/04
 - • to surfaces of films or sheets ~~(-producing layered products by applying coatings of pasty or pulverulent plastics [B29C 41/00](#)-)~~
- B05D 7/12
 - to leather ~~(-chemical treatment of leather [C14C](#) ; dyeing leather [D06P](#)-)~~

	B05D 7/14	• to metal, e.g. car bodies (-involving a chemical reaction between the metal and the coating C23-)
	B05D 7/146	• • {to metallic pipes or tubes (-processes for coating the interior of pipes B05D 7/222-)}
	B05D 7/20	• to wires (-for insulating electric cables H01B 13/16-)
U	B05D 7/24	• for applying particular liquids or other fluent materials
	B05D 7/26	• • synthetic lacquers or varnishes (- B05D 7/08 , B05D 7/16 take precedence-)
U	B05D 7/50	• {Multilayers}
	NOTE A possible inorganic pretreatment or coating on the substrate such as chromatation, phosphatation, plating, is not counted as a layer. This group covers mostly multilayers characterised by each layer and the succession of them (laminates in general B32B)	
	B05D 7/51	• • {One specific pretreatment, e.g. phosphatation, chromatation, in combination with one specific coating (-pretreatment of metallic substrates C23C ; pretreatment before coating in general B05D 3/00-)}
U	B05D 7/52	• • {Two layers}
U	B05D 7/53	• • • {Base coat plus clear coat type}
	B05D 7/534	• • • • {the first layer being let to dry at least partially before applying the second layer (- B05D 7/538 takes precedence-)}
U	B05D 7/56	• • {Three layers or more}
U	B05D 7/57	• • • {the last layer being a clear coat}
	B05D 7/574	• • • • {at least some layers being let to dry at least partially before applying the next layer (- B05D 7/577 takes precedence-)}
U	B05D 7/58	• • • {No clear coat specified}
	B05D 7/584	• • • • {at least some layers being let to dry, at least partially, before applying the next layer (- B05D 7/587 takes precedence-)}
U	B05D 2202/00	Metallic substrate
	B05D 2202/30	• based on refractory metals (Ti, V, Cr, Zr, Nb, Mo, Hf, Ta, W)(Ti, V, Cr, Zr, Nb, Mo, Hf, Ta, W)
	B05D 2210/00	Applying material to more than three types of substrate materials
	B05D 2259/00	Applying the material to the internal surface of hollow articles other than tubes
U	B05D 2320/00	Organic additives
	B05D 2320/10	• Detergents
U	B05D 2350/00	Pretreatment of the substrate
U	B05D 2350/60	• Adding a layer before coating
	B05D 2350/65	• • metal layer
U	B05D 2401/00	Form of the coating product, e.g. solution, water dispersion, powders or the like
	B05D 2401/10	• Organic solvent (- B05D 2401/21 takes precedence-)
	B05D 2401/60	• non aqueous inorganic solvent (- B05D 2401/90 takes precedence-)
U	B05D 2506/00	Halogenated polymers
U	B05D 2506/20	• Chlorinated polymers
	B05D 2506/25	• • PVC (- B05D 2520/10 takes precedence-)

U	B05D 2518/00	Other type of polymers
U	B05D 2518/10	• Silicon-containing polymers
	B05D 2518/12	• • Ceramic precursors (<i>polysiloxanes, polysilazanes</i>)(polysiloxanes, polysilazanes)

B05D 2602/00 **Organic fillers**

Project: N/A (B07B)

U	B07B 1/00	Sieving, screening, sifting, or sorting solid materials using networks, gratings, grids, or the like {{ash-sifters for domestic stoves or ranges F24B 15/007}}
U	B07B 1/12	• Apparatus having only parallel elements
U	B07B 1/14	• • Roller screens
	B07B 1/145	• • • {the material to be screened moving along the axis of the parallel elements}
U	B07B 1/15	• • • using corrugated, grooved or ribbed rollers
	B07B 1/155	• • • • {the rollers having a star shaped cross section}
U	B07B 1/18	• Drum screens
	B07B 1/185	• • {provided with exchangeable sieve panels}
U	B07B 1/28	• Moving screens not otherwise provided for, e.g. swinging, reciprocating, rocking, tilting or wobbling screens
	B07B 1/288	• • {Tumbling screens}
U	B07B 1/46	• Constructional details of screens in general; Cleaning or heating of screens
U	B07B 1/4609	• • {constructional details of screening surfaces or meshes}
	B07B 1/4618	• • • {Manufacturing of screening surfaces}
	B07B 1/4627	• • • {Repairing of screening surfaces}
	B07B 1/4636	• • • {Regulation of screen apertures}
	B07B 1/4645	• • • {Screening surfaces built up of modular elements}
	B07B 1/4654	• • • {Corrugated Screening surfaces}
	B07B 1/4663	• • • {Multi-layer screening surfaces}
	B07B 1/4672	• • • {Woven meshes}
	B07B 1/4681	• • • {Meshes of intersecting, non-woven, elements}
	B07B 1/469	• • • {Perforated sheet-like material}
U	B07B 1/50	• • Cleaning
U	B07B 1/52	• • • with brushes or scrapers
	B07B 1/522	• • • • {with brushes}
	B07B 1/524	• • • • • {the brushes being rotating}
	B07B 1/526	• • • • {with scrapers}
	B07B 1/528	• • • • • {the scrapers being rotating}
U	B07B 7/00	Selective separation of solid materials carried by, or dispersed in, gas currents (sieves or filters for separating dispersed particles from gases or vapours B01D)
U	B07B 7/08	• using centrifugal force (centrifuges B04B ; cyclones B04C)
U	B07B 7/086	• • generated by the winding course of the gas stream
	B07B 7/0865	• • • {using the coanda effect of the moving gas stream}

- U B07B 13/00** Grading or sorting solid materials by dry methods, not otherwise provided for; Sorting articles otherwise than by indirectly controlled devices (grading eggs [A01K 43/04](#))
- U B07B 13/04
- according to size
- U B07B 13/07
- • Apparatus in which aggregates or articles are moved along or past openings which increase in size in the direction of movement
- B07B 13/072
- • • {the openings being rollers with a divergent axis and the material moving substantially along the rollers axis}
- U B07B 13/10
- using momentum effects
- U B07B 13/11
- • involving travel of particles over surfaces which separate by centrifugal force or by relative friction between particles and such surfaces, e.g. helical sorters
- B07B 13/113
- • • {shaking tables (for wet separating [B03B 5/04](#); tables with water impulse [B03B 5/70](#); pneumatic tables [B03B 4/02](#); moving screens [B07B 1/28](#))}

Project: N/A (B07C)

- U B07C 1/00** Measures preceding sorting according to destination
- U B07C 1/02
- Forming articles into a stream; Arranging articles in a stream, e.g. spacing, orientating {(transport of sheets [B65H](#))}
- B07C 1/025
- • {Devices for the temporary stacking of objects provided with a stacking and destacking device ([interstack device](#)) (~~interstack device~~)}
- U B07C 5/00** Sorting according to a characteristic or feature of the articles of material being sorted, e.g. by control effected by devices which detect or measure such characteristic or feature; Sorting by manually actuated devices, e.g. switches (sorting by hand only [B07C 7/00](#); separating solids from solids by sieving, screening, or sifting or by using gas currents or other separating by dry methods applicable to bulk material [B07B](#))
- U B07C 5/04
- Sorting according to size {(sorting devices as a component of the automatic supply and removal of workpieces [B23Q 7/12](#))}
- U B07C 5/12
- • characterised by the application to particular articles, not otherwise provided for {([B07C 9/00](#) takes precedence); sorting eggs [A01K 43/00](#); {measuring and sorting devices for shoe components [A43D 119/00](#); sorting cartridges [F42B 35/02](#))}
- U B07C 5/122
- • • {for bottles, ampoules, jars and other glassware (sorting and transport of caps [B67B 3/06](#))}
- B07C 5/126
- • • • {by means of photo-electric sensors, e.g. according to colour (sorting according to optical properties [B07C 5/342](#); material testing with the aid of optical means [G01N 21/00](#))}
- U B07C 5/36
- Sorting apparatus characterised by the means used for distribution {(sorting according to destination [B07C 3/003](#), [B07C 3/02](#))}
- B07C 5/363
- • {by means of air}
- B07C 5/365
- • • {using a single separation means}
- B07C 5/366
- • • • {during free fall of the articles}
- B07C 5/367
- • • {using a plurality of separation means}
- B07C 5/368
- • • • {actuated independently}
- B07C 9/00** Sorting, with or without orientating, not otherwise provided for { e.g. sorting of table equipment (washing and rinsing machines for tableware [A47L 15/00](#), [A47L 15/02](#); machines for polishing table equipment [A47L 21/02](#))}

Project: N/A (B08B)**B08B**

CLEANING IN GENERAL; PREVENTION OF FOULING IN GENERAL (brushes [A46](#); devices for domestic or like cleaning [A47L](#); { cleaning golf-clubs or golf accessories [A63B 57/0087](#) ; cleaning grips of bats on rackets [A63B 59/0062](#) } ; separation of particles from liquids or gases [B01D](#); separation of solids [B03](#), [B07](#); spraying or applying liquids or other fluent materials to surfaces in general [B05](#); cleaning devices for conveyers [B65G 45/10](#) ; concurrent cleaning, filling and closing of bottles [B67C 7/00](#) ; inhibiting corrosion or incrustation in general [C23](#); cleaning streets, permanent ways, beaches or land [E01H](#); parts, details or accessories of swimming or splash baths or pools, specially adapted for cleaning [E04H 4/16](#) ; preventing or removing electrostatic charges [H05F](#))

NOTE

This subclass covers only inventions relating to cleaning which are usually classified according to one (or more) of the aspects mentioned below if they are not fully classifiable in a subclass a subclass providing for any of the following aspects: the articles cleaned, e.g. bed-pans, urinal or other sanitary devices for bed-ridden persons [A61G 9/02](#) , filters, semi-permeable membranes [B01D](#), castings and moulds [B22D 29/00](#) , vehicles [B60S](#), coke ovens [C10B 43/00](#) , building forms [E04G](#), boilers [F22](#), combustion apparatus [F23](#), furnaces [F27](#); the general nature of the cleaning, e.g. preparing for sugar manufacture [A23N](#), domestic cleaning [A47L](#), treatment of textiles [D06](#), laundry [D06F](#), air-conditioning [F24F](#); the particular operation performed, e.g. filtering [B01D](#), separating of solids [B03](#), [B07](#), sand-blasting [B24C](#); the particular apparatus or device, e.g. brushes [A46B](#), mops [A47L](#), centrifuges [B04](#), hand tools [B25](#) { devices for cleaning paint-applying hand tools after use [B44D 3/006](#) } ; the substance cleaned, e.g. metals [B21C](#), [C23](#), water [C02](#), glass [C03B](#), leather [C14B](#), textile fibres [D01](#); the substance removed (or prevented from depositing or forming) e.g. { removing paint [B44D 3/00](#) , e.g. } implements or apparatus for removing dry paint from surfaces [B44D 3/16](#) ; chemical paint-removers [C09D 9/00](#) ; preventing rust [C23F](#); the substance used, e.g. macromolecular compounds or compositions [C08](#), anti-icing materials [C09K](#), detergents [C11D](#); the operation in connection with which cleaning is done, e.g. metal rolling [B21B](#), metal boring [B23B](#), soldering [B23K](#), textile fabrication [D01G](#), [H01H](#), [D03J](#), [D04B](#); the surroundings of a surface to be cleaned or kept clean, e.g. water in a boiler [C02F](#), air in a room [F24F](#).

B08B 1/00

Cleaning by methods involving the use of tools, brushes, or analogous members ([B08B 3/12](#) , [B08B 6/00](#) , { [B08B 7/02](#) } , [B08B 9/00](#) take precedence)

B08B 1/04

• using rotary operative members ([B08B 1/02](#) takes precedence)

B08B 3/00

Cleaning by methods involving the use or presence of liquid or steam ([B08B 9/00](#) takes precedence)

U B08B 3/02

• Cleaning by the force of jets or sprays

B08B 3/022

• { Cleaning travelling work ([B08B 3/042](#) takes precedence) }

U B08B 3/04

• Cleaning involving contact with liquid

B08B 3/044

• { (using agitated containers in which the liquid and articles or material are placed (by means of ultrasonic vibrations [B08B 3/12](#) ; cleaning casks or barrels by agitating [B08B 9/0817](#) ; mixers with shaking, oscillating or vibrating mechanisms [B01F 11/00](#)) }

B08B 3/045

• { (using perforated containers, e.g. baskets, or racks immersed and agitated in a liquid bath (using perforated drums [B08B 3/06](#)) }

B08B 3/06

• using perforated drums in which the article or material is placed ([B08B 3/042](#) takes precedence)

- B08B 3/08
 - the liquid having chemical or dissolving effect (substances used, see the relevant classes)
- U B08B 3/10
 - with additional treatment of the liquid or of the object being cleaned, e.g. by heat, by electricity, by vibration
- B08B 3/102
 - {with means for agitating the liquid (-by agitating the container [B08B 3/042](#) , [B08B 3/044](#) , [B08B 3/045](#) , [B08B 3/06](#)-)}
- B08B 3/12
 - by sonic or ultrasonic vibrations (-washing or rinsing machines for crockery or tableware using sonic or ultrasonic waves [A47L 15/13](#) ; of natural teeth, of prostheses using ultrasonic techniques similar to those used for natural teeth [A61C 17/20](#) ; application of ultrasonic vibrations to chemical, physical, or physico-chemical processes in general [B01J 19/10](#)-)
- B08B 3/123
 - {Cleaning travelling work, e.g. webs, articles on a conveyer (-conveyers [B65G](#) ; handling webs [B65H](#)-)}
- B08B 3/14
 - Removing waste, e.g. labels, from cleaning liquid; {Regenerating cleaning liquids} (-treatment of water in general [C02F](#)-)
- B08B 5/00**

Cleaning by methods involving the use of air flow or gas flow (-[B08B 6/00](#) takes precedence-)
- B08B 5/02
 - Cleaning by the force of jets, e.g. blowing-out cavities{(-airguns or nozzles per se [B05B 1/005](#)-)}
- B08B 5/04
 - Cleaning by suction, with or without auxiliary action ({ [B08B 9/035](#) takes precedence; }(-[suction cleaners A47L](#)-);)(suction cleaners [A47L](#)))
- B08B 6/00**

Cleaning by electrostatic means (-domestic cleaning implements functioning electrostatically [A47L 13/40](#) ; cleaning of grooved record carriers [G11B 3/58](#)-)
- U **B08B 7/00**

Cleaning by methods not provided for in a single other subclass or a single group in this subclass
- U B08B 7/0064
 - {by temperature changes}
- B08B 7/0071
 - {by heating (-[B08B 7/0035](#) takes precedence-)}
- B08B 7/02
 - by distortion, beating, or vibration of the surface to be cleaned{(-[B08B 7/0007](#) takes precedence-)}
- B08B 9/00**

Cleaning hollow articles by methods or apparatus specially adapted thereto (-[B08B 3/12](#) , [B08B 6/00](#) take precedence-)
- B08B 9/02
 - Cleaning pipes or tubes or systems of pipes or tubes (-apparatus for cleaning metal pipes by chemical methods [C23G 3/04](#) ; { removing obstructions in waste pipes or sinks [E03C 1/30](#) ; cleaning sewer pipes [E03F 9/00](#); cleaning boreholes or wells [E21B 37/00](#) ; cleaning furnace tubes, flues, chimneys [F23J 3/02](#) ; cleaning heat-transfer conduits, e.g. water tubes of boilers [F28G](#) })
- B08B 9/021
 - {Cleaning pipe ends or pipe fittings, e.g. before soldering (-grinding tube ends [B24B 9/007](#)-)}
- B08B 9/023
 - Cleaning the external surface (-[B08B 9/021](#) takes precedence-)
- U B08B 9/027
 - Cleaning the internal surfaces; Removal of blockages
- B08B 9/032
 - by the mechanical action of a moving fluid, e.g. by flushing (-[B08B 9/04](#) takes precedence; { by fluid jets mounted on cleaning devices [B08B 9/0433](#) })
- B08B 9/0321
 - {using pressurised, pulsating or purging fluid (-[E04F 17/126](#) takes precedence-)}
- B08B 9/0322
 - {in combination with a plug, e.g. inflatable mole, to isolate a part of the tube (-plugging pigs for stopping flow in pipes [F16L 55/1283](#)-)}

- U B08B 9/04
 - • • using cleaning devices introduced into and moved along the pipes
 - WARNING
Group [B08B 9/04](#) and subgroups are not complete. See also [B08B 9/02](#) and subgroups
- U B08B 9/043
 - • • moved by externally powered mechanical linkage, e.g. pushed or drawn through the pipes
- B08B 9/0436
 - • • • {provided with mechanical cleaning tools, e.g. scrapers, with or without additional fluid jets (~~-B08B 9/045~~ , ~~B08B 9/047~~ take precedence-)}
- B08B 9/045
 - • • • the cleaning devices being rotated while moved{, e.g. flexible rotating shaft or "snake"} (~~-B08B 9/047~~ takes precedence-)
- B08B 9/047
 - • • • the cleaning devices having {internal}motors [e.g. turbines] for powering cleaning tools
- B08B 9/049
 - • • having self-contained propelling means for moving the cleaning devices along the pipes {i.e. self-propelled}
- B08B 9/0492
 - • • • {Heavy-type cleaning devices, e.g. crawlers with plural cleaning members (~~-B08B 9/051~~ takes precedence-)}
- B08B 9/051
 - • • • the cleaning devices having {internal}motors [e.g. turbines] for powering cleaning tools
- U B08B 9/053
 - • • moved along the pipes by a fluid, e.g. by fluid pressure or by suction
- B08B 9/055
 - • • • the cleaning devices conforming to, or being conformable to, substantially the same cross-section of the pipes,{e.g. pigs or moles} (~~-pigs or moles per se F16L 55/26~~ ; their launching and detection [F16L 55/46](#) ; separating pigs in pipelines [F17D 3/00-](#))
- U B08B 9/08
 - Cleaning containers, e.g. tanks
- B08B 9/0804
 - • {Cleaning containers having tubular shape, e.g. casks, barrels, drums (~~-B08B 9/20~~ take precedence-)}
- B08B 9/0821
 - • {Handling or manipulating containers, e.g. moving or rotating containers in cleaning devices, conveying to or from cleaning devices (~~-B08B 9/20~~ takes precedence-)}
- B08B 9/0839
 - • {Cleaning milk churns (~~-B08B 9/0804~~ , ~~B08B 9/20~~ take precedence-)}
- B08B 9/0852
 - • {Drainage racks (~~-see also A47J 47/20-~~)}
- B08B 9/0861
 - • {Cleaning crates, boxes or the like (~~-B08B 9/083~~ takes precedence-)}
- B08B 9/0865
 - • {by burning-out (~~-B08B 9/40~~ takes precedence-)}
- B08B 9/087
 - • by methods involving the use of tools, e.g. brushes, scrapers ({ [B08B 9/0808](#) } , [B08B 9/20](#) take precedence-)
- B08B 9/093
 - • by the force of jets or sprays ({ [B08B 9/0813](#) } , [B08B 9/20](#) take precedence-)
- B08B 9/20
 - • by using apparatus into or on to which containers e.g. bottles, jars, cans are brought{(-washing or rinsing crockery or tableware [A47L 15/00-](#))}
- B08B 9/38
 - • • the apparatus cleaning by using scrapers, chains, grains of shot, sand or other abrasive means (~~-abrasive blasting in general B24C-~~)
- B08B 11/00**

Cleaning flexible or delicate articles by methods or apparatus specially adapted thereto (~~-B08B 3/12~~ , ~~B08B 6/00~~ take precedence-)
- B08B 11/02
 - Devices for holding articles during cleaning{(~~-B08B 9/42~~ takes precedence-)}
- B08B 11/04
 - specially adapted for plate glass, e.g. prior to manufacture of windshields (~~-cleaning the gap between permanently secured panes E06B 3/677-~~)

- B08B 15/00** Preventing escape of dirt or fumes from the area where they are produced; Collecting or removing dirt or fumes from that area (~~parts, details or accessories of cooking-vessels for withdrawing or condensing cooking vapours from such vessels [A47J 36/38](#) ; refuse disposal [B65F](#) ; devices for conducting smoke or fumes, e.g. flues, [F23J 11/00](#) ; removing cooking fumes from domestic stoves or ranges [F24C 15/20](#) ; air conditioning, ventilation [F24F](#)~~)
- B08B 15/002** ~~{using a central suction system, e.g. for collecting exhaust gases in workshops (~~removing dust from textile machines [D01H 11/00](#) ; ventilation of mines, galleries or tunnels, e.g. traffic tunnels, [E21F 1/00](#)~~)}~~
- B08B 15/007** ~~{Fume suction nozzles arranged on a closed or semi-closed surface, e.g. on a circular, ring-shaped or rectangular surface adjacent the area where fumes are produced (~~B08B 15/04 takes precedence~~)}~~
- B08B 15/02** ~~{using chambers or hoods covering the area(~~B08B 15/002 takes precedence~~)}~~
- B08B 15/04** ~~{from a small area, e.g. a tool(~~removing chips [B23Q 11/0042](#)~~)}~~
- B08B 17/00** **Methods preventing fouling**(~~preventing accumulation of deposits in pneumatic conveyers [B65G 53/521](#)~~)

Project: N/A (B09B)

- U B09B 1/00** **Dumping solid waste**
- B09B 1/006** ~~{Shafts or wells in waste dumps}~~
- B09B 1/008** ~~{Subterranean disposal e.g. in boreholes or subsurface fractures}~~
- U B09B 3/00** **Destroying solid waste or transforming solid waste {or contaminated solids} into something useful or harmless**
- B09B 3/0008** ~~{comprising an adsorption step (separating processes involving the treatment of liquids with solid sorbents [B01D 15/00](#); separation of gases or vapors by adsorption [B01D 53/02](#))}~~
- B09B 3/0016** ~~{comprising an extraction step (separation by solvent extraction [B01D 11/00](#))}~~
- B09B 3/0083** ~~{by means of a thermal treatment, e.g. evaporation (treatment of waste by pyrolysis or by combustion [F23G 5/00](#))}~~
- B09B 3/0091** ~~{Steam treatment}~~

Project: N/A (B09C)

- B09C** **RECLAMATION OF CONTAMINATED SOIL** (~~gatherers for removing stone or the like from the soil [A01B 43/00](#) ; sterilising soil by steam [A01G 11/00](#) ; processes for making harmful chemical substances harmless or less harmful by effecting chemical change in the substance [A62D 3/00](#) ; separation in general [B01D](#); cleaning beaches [E01H 12/00](#) ; removing undesirable matter, e.g. rubbish, from the land [E01H 15/00](#)~~)

NOTE

In this subclass, the following term is used with the meaning indicated:

- "reclamation" means the partial or total elimination
or the fixing of contaminants in soil.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[B09C 1/04](#) covered by [B09C 1/02](#)]

B09C 1/06

B09C 1/08

Reclamation of contaminated soil

- thermally ~~(-incinerators for contaminated soil [F23G 7/14-](#))~~
- chemically ~~(-chemical means for combating harmful chemical agents [A62D 3/00-](#))~~

Project: N/A (B21B)**B21B**

ROLLING OF METAL ~~(-auxiliary operations used in connection with metal-working operations covered in [B21](#) , see [B21C](#) ; bending by rolling [B21D](#) ; manufacture of particular objects, e.g. screws, wheels, rings, barrels, balls, by rolling [B21H](#) ; pressure welding by means of a rolling mill [B23K 20/04-](#))~~

NOTE

In this subclass, the following terms or expressions are used with the meanings indicated:- "rolling" means rolling operations in which plastic deformations occur;- "continuous process" means a process employing a mill train designed to have the workpiece enter one pair of rolls before leaving the preceding pair.

B21B 1/00

Metal-rolling methods or mills for making semi-finished products of solid or profiled cross-section (~~[B21B 17/00](#) to [B21B 23/00](#) take precedence;~~ with respect to composition of material to be rolled [B21B 3/00](#) ; extending closed shapes of metal bands by simultaneous rolling at two or more zones [B21B 5/00](#) ; metal-rolling stands as units [B21B 13/00](#) ; continuous casting into moulds having walls formed by moving rolls [B22D 11/06-](#)); **Sequence of operations in milling trains; Layout of rolling-mill plant, e.g. grouping of stands; Succession of passes or of sectional pass alternations**

B21B 1/02

- for rolling heavy work, e.g. ingots, slabs, {blooms}billets, in which the cross-sectional form is unimportant {Rolling combined with forging or pressing}

B21B 1/024

- • {Forging or pressing} ~~(-forging or pressing devices as units [B21B 15/0035-](#))~~

B21B 1/08

- for rolling {structural sections, i.e.}work of special cross-section, e.g. angle steel ~~(-rolling metal of indefinite length in repetitive shapes specially designed for the manufacture of particular objects [B21H 8/00-](#))~~

B21B 1/10

- • in a single two-high or universal rolling mill {stand(~~[B21B 1/085](#) to [B21B 1/098](#) take precedence-~~)}

B21B 1/12

- • in a continuous process,{i.e. without reversing stands(~~[B21B 1/085](#) to [B21B 1/098](#) take precedence-~~)}

B21B 1/14

- • in a non-continuous process,{i.e. at least one reversing stand(~~[B21B 1/085](#) to [B21B 1/098](#) take precedence-~~ [B21B 1/085](#) to [B21B 1/098](#) take precedence)}

B21B 1/16

- for rolling {wire rods, bars, merchant bars, rounds}wire or material of like small cross-section

B21B 1/163

- • {Rolling or cold-forming of concrete reinforcement bars or wire} ~~(-reinforcement bars per se [E04C 5/03-](#); Rolls therefor)~~

B21B 1/20

- • in a non-continuous process, *(e.g. skew rolling, i.e. planetary cross rolling)* ~~(e.g. skew-rolling, i.e. planetary cross-rolling)~~

B21B 1/22

- for rolling {plates, strips,}bands or sheets of indefinite length (~~[B21B 1/42](#) takes precedence-~~)

B21B 1/24

- • in a continuous {or semi-continuous}process(~~[B21B 1/224](#) takes precedence-~~)

B21B 1/30

- • in a non-continuous process(~~[B21B 1/224](#) takes precedence-~~)

B21B 1/32

- • • in reversing {single stand}mills, e.g. with intermediate storage reels for accumulating work

B21B 1/38	<ul style="list-style-type: none"> for rolling sheets of limited length, e.g. folded sheets, superimposed sheets, {pack rolling} (-B21B 1/40 takes precedence; folding sheets before, or separating layers after, rolling B21B 47/00-)
B21B 1/42	<ul style="list-style-type: none"> for step-by-step or planetary rolling (-making tubes by pilgrim-step rolling B21B 21/00-)

 - Special arrangements with regard to simultaneous or subsequent treatment of the material
- B21C 47/267
 - {Scrap treatment}
- U B21C 47/34
 - Feeding or guiding devices not specially adapted to a particular type of apparatus
- B21C 47/3408
 - {for monitoring the lateral position of the material}
- B21C 47/3416
 - {with lateral edge contact}
- B21C 47/3425
 - {without lateral edge contact}
- B21C 47/3433
 - {for guiding the leading end of the material, e.g. from or to a coiler}
- B21C 47/3441
 - {Diverting the leading end, e.g. from main flow to a coiling device}
- B21C 47/345
 - {for monitoring the tension or advance of the material}
- B21C 47/3458
 - {Endlessly revolving chain systems (metal drawing [B21C 1/30](#))}
- B21C 47/3466
 - {by using specific means}
- B21C 47/3475
 - {Fluid pressure or vacuum}
- B21C 47/3483
 - {Magnetic field}
- B21C 47/3491
 - {Brushes}

Project: N/A (B21D)**B21D**

WORKING OR PROCESSING OF SHEET METAL OR METAL TUBES, RODS OR PROFILES WITHOUT ESSENTIALLY REMOVING MATERIAL; PUNCHING (operations of the kind involved in the manufacture of such products [B21B](#), [B21C](#); working or processing of wire [B21F](#); cutting or severing devices or machines in general [B26](#); presses in general [B30B](#))

NOTES

This subclass covers cutting or perforating of sheet metal or other stock material

This subclass does not cover the working of metal foils in a manner analogous to the working of paper, which is covered by classes [B26](#), [B31](#)

B21D 1/00

Straightening, restoring form or removing local distortions of sheet metal or specific articles made therefrom ([B21D 3/00](#) takes precedence-); **Stretching sheet metal combined with rolling** (-working sheet metal of limited length by stretching [B21D 25/00](#) ; by localised hammering [B21D 31/06](#)-)

B21D 1/02

- by rollers ([B21D 1/06](#) takes precedence-)

U B21D 1/06

- Removing local distortions

B21D 1/08

- of hollow bodies made from sheet metal (-of substantially open bodies [B21D 1/10](#) ; { flattening hollow objects for transport and reforming [B21D 51/14](#) })

B21D 1/12

- Straightening vehicle body parts or bodies ([B21D 1/14](#) takes precedence-)

B21D 3/00

Straightening or restoring form of metal rods, metal tubes, metal profiles, or specific articles made therefrom, whether or not in combination with sheet metal parts (straightening of well casings in situ [E21B](#); { straightening rails or rail joints [E01B 31/08](#) })

B21D 3/12

- by stretching with or without twisting (-by twisting only [B21D 11/14](#)-)

B21D 5/00

Bending sheet metal along straight lines, e.g. to form simple curves ([B21D 11/06](#) to [B21D 11/18](#) take precedence; corrugating sheet metal [B21D 13/00](#) ; as edge treatment [B21D 19/00](#)-)

U B21D 5/06

- by drawing procedure making use of dies or forming-rollers, e.g. making profiles

B21D 5/08

- making use of forming-rollers ([B21D 5/12](#) takes precedence-)

B21D 5/14

- by passing between rollers ([B21D 5/06](#) takes precedence-)

B21D 7/00

Bending rods, profiles, or tubes ([B21D 11/02](#) to [B21D 11/18](#) take precedence; using mandrels or the like [B21D 9/00](#)-)

B21D 7/04

- over a movably-arranged forming member ([B21D 7/02](#) takes precedence-)

B21D 9/00

Bending tubes using mandrels or the like ([B21D 11/02](#) to [B21D 11/18](#) take precedence-)

B21D 9/15

- using filling material of indefinite shape, e.g. sand, plastic material (-filling of tubes with such material [B21D 9/16](#)-)

B21D 11/00

Bending not restricted to forms of material mentioned in only one of groups [B21D 5/00](#) , [B21D 7/00](#) , [B21D 9/00](#) ; -Bending not provided for in groups [B21D 5/00](#) to [B21D 9/00](#) (-corrugating or bending into wave form [B21D 13/00](#) , [B21D 15/00](#) ; flanging [B21D 19/00](#)-); **Twisting**

B21D 11/02

- Bending by stretching or pulling over a die (-working sheet metal of limited length by stretching [B21D 25/00](#)-)

B21D 11/06

- Bending into helical or spiral form; Forming a succession of return bends, e.g. serpentine form (-making helically seamed tubing [B21C 37/12](#)-)

B21D 11/08	• Bending by altering the thickness of part of the cross-section of the work (B21D 11/06 takes precedence)
B21D 11/10	• Bending specially adapted to produce specific articles, e.g. leaf springs{ making or bending leaf springs B21D 53/886 }
B21D 13/00	Corrugating sheet metal, rods or profiles; Bending sheet metal, rods or profiles into wave form (tubes B21D 15/00)
B21D 15/00	Corrugating tubes (wrinkle-bending using mandrels or the like B21D 9/14)
U B21D 15/04	• transversely, e.g. helically
B21D 15/06	• • annularly{ with thinning B21C 37/205 }
U B21D 17/00	Forming single grooves in sheet metal or tubular or hollow articles
B21D 17/02	• by pressing (grooving or notching of bolts, studs, or the like B21K 1/54)
B21D 19/00	Flanging or other edge treatment, e.g. of tubes (connecting by making use of folds B21D 39/00 ; flaring-out tube ends B21D 41/02)
B21D 19/02	• by continuously-acting tools moving along the edge (edge-curling B21D 19/12)
B21D 21/00	Combined processes according to methods covered by groups B21D 1/00 to B21D 19/00
B21D 22/00	Shaping without cutting, by stamping, spinning, or deep-drawing (otherwise than using rigid devices or tools or yieldable or resilient pads B21D 26/00)
U B21D 22/02	• Stamping using rigid devices or tools
B21D 22/022	• • {by heating the blank or stamping associated with heat treatment (C21D takes precedence)}
B21D 22/04	• • for dimpling (combined with perforating B21D 28/24)
B21D 22/20	• Deep-drawing (special deep-drawing arrangements in, or in connection with, presses B21D 24/00)
B21D 22/208	• • {by heating the blank or deep-drawing associated with heat treatment (C21D takes precedence)}
B21D 22/22	• • with devices for holding the edge of the blanks (B21D 22/24 to B21D 22/30 take precedence; shaping over a die without external former B21D 11/02)
B21D 26/00	Shaping without cutting otherwise than using rigid devices or tools or yieldable or resilient pads, i.e. applying fluid pressure or magnetic forces (stamping using resilient pads B21D 22/10)
U B21D 26/02	• by applying fluid pressure
U B21D 26/021	• • Deforming sheet bodies
B21D 26/031	• • • Mould construction (B21D 26/025 - B21D 26/029 take precedence)
B21D 26/033	• • Deforming tubular bodies (corrugating tubes by applying fluid pressure B21D 15/03 , B21D 15/10)
B21D 26/047	• • • Mould construction (B21D 26/037 - B21D 26/045 take precedence)
U B21D 28/00	Shaping by press-cutting; Perforating
B21D 28/002	• {Drive of the tools (B21D 28/007 and B21D 28/20 take precedence)}
B21D 28/02	• Punching blanks or articles with or without obtaining scrap (cutting nails or pins from strips or sheet material B21G 3/26); Notching
B21D 28/14	• • Dies (ejecting or stripping-off devices arranged in punching machines or tools B21D 45/00)
B21D 28/20	• • Applications of drives {for reducing noise or wear}

B21D 31/00	Other methods for working sheet metal, metal tubes, metal profiles (deforming one surface of tubes helically by rolling B21H 3/00 ; upsetting B21J 5/08 ; working metal by removing material therefrom B23 ; embossing B44B)
B21D 31/005	• {Incremental shaping or bending, e.g. stepwise moving a shaping tool along the surface of the workpiece (–B21D 22/14 takes precedence–)}
B21D 31/02	• Stabbing or piercing, e.g. for making sieves (–dimpling B21D 22/04 ; perforating by punching B21D 28/24–)
B21D 31/04	• Expanding other than provided for in groups B21D 1/00 to B21D 28/00 , e.g. for making expanded metal (–B21D 47/00 takes precedence; enlarging tube ends B21D 41/02–)
B21D 31/06	• Deforming sheet metal, tubes or profiles by sequential impacts, e.g. hammering, beating, peen forming (–forging hammers B21J 7/00–)
B21D 33/00	Special measures in connection with working metal foils, e.g. gold foils (–cutting or perforating of metal foil analogous to paper B26–)
B21D 35/00	Combined processes according to { or processes combined with } methods covered by groups B21D 1/00 to B21D 31/00 (–B21D 21/00 takes precedence–)
B21D 35/002	• { Processes combined with methods covered by groups B21D 1/00 to B21D 31/00 }
B21D 35/003	• • {Simultaneous forming, e.g. making more than one part per stroke (–B21D 26/06 takes precedence–)}
B21D 35/005	• • {characterized by the material of the blank or the workpiece (–B21D 26/053 takes precedence–)}
B21D 35/007	• • • {Layered blanks (–B21D 22/203 takes precedence; joining superposed plates B21D 39/031 , B21D 39/034 , B21D 39/035–)}
B21D 37/00	Tools as parts of machines covered by this subclass { forms or constructions of tools uniquely adapted for particular operations, see the relevant groups for the operations }
B21D 37/02	• Die constructions enabling assembly of the die parts in different ways (–B21D 37/06 takes precedence–)
U B21D 37/04	• Movable or exchangeable mountings for tools
B21D 37/06	• • Pivotaly-arranged tools, e.g. disengageable (–die sets with dies pivoted to one another B21D 37/12–)
B21D 37/18	• Lubricating, {e.g. lubricating tool and workpiece simultaneously (–lubricating workpieces for deep-drawing B21D 22/201–)}
B21D 39/00	Application of procedures in order to connect objects or parts, e.g. coating with sheet metal otherwise than by plating ({ joining mitred profiles B21D 53/745 ; } riveting B21J ; uniting components by forging or pressing to form integral members B21K 25/00 ; welding B23K ; press-fitting, force-fitting, or shrinking in general B23P 11/00 , B21D 19/00 ; by adhesives F16B 11/00 ; {Connections as such F16L , F16B }); Tube expanders
B21D 39/04	• of tubes with tubes; of tubes with rods ({ –crimped pipe joints as such F16L 13/14–)}
B21D 39/042	• • {using explosives (–by explosive welding B23K 20/08–)}
B21D 41/00	Application of procedures in order to alter the diameter of tube ends (–B21D 39/00 takes precedence; { plastic tubes B29C 57/08 })

B21D 43/00	Feeding, positioning or storing devices combined with, or arranged in, or specially adapted for use in connection with, apparatus for working or processing sheet metal, metal tubes or metal profiles; Associations therewith of cutting devices (-cutting devices associated with the tool, see the relevant group for the tool-)
B21D 43/003	• {Positioning devices (-B21D 28/04 and B21D 28/265 take precedence; stops B21D 43/26 ; centering moving strips B21D 43/023-) }
U B21D 43/02	• Advancing work in relation to the stroke of the die or tool
B21D 43/026	• • {-Combination of two or more feeding devices provided for in B21D 43/04 to B21D 43/18-}
U B21D 43/04	• • by means in mechanical engagement with the work
B21D 43/05	• • • specially adapted for multi-stage presses{(-B21D 43/145 takes precedence-)}
B21D 43/08	• • • by rollers{(-B21D 43/145 takes precedence-)}
B21D 43/10	• • • by grippers{(-B21D 43/055 , B21D 43/057 , B21D 43/145 take precedence-)}
B21D 43/12	• • • by chains or belts{(-B21D 43/145 takes precedence-)}
B21D 43/20	• Storage arrangements; Piling or unpling (-in general B65G , { B65H })
U B21D 43/28	• Associations of cutting devices therewith
B21D 43/285	• • {Devices for handling elongated articles, e.g. bars, tubes or profiles (-B21D 43/282 , B21D 43/287 take precedence-) }
B21D 43/287	• • {Devices for handling sheet or strip material (-B21D 43/282 takes precedence-) }
B21D 47/00 - B21D 55/00	<u>Processing sheet metal or metal tubes, or processing metal profiles according to any of groups B21D 1/00 - B21D 45/00 , in the manufacture of finished or semi-finished articles</u>
B21D 49/00	Sheathing or stiffening objects (-by winding wire or tape thereon B65H 54/00 , B65H 81/00 ; specially adapted for manufacturing conductors or cables H01B 13/26-)
B21D 51/00	Making hollow objects (-from thick-walled or non uniform tubes B21K 21/00-)
B21D 51/02	• characterised by the structure of the objects{(-B21D 51/26 takes precedence-)}
	NOTE Making hollow objects characterised both by their structure and by their use is classified only in group B21D 51/16
B21D 51/14	• • Flattening hollow objects for transport or storage; Re-forming same (-making tubes from doubled flat material B21C 37/14-)
B21D 51/16	• characterised by the use of the objects (-making heat exchangers B21D 53/02-)
B21D 51/26	• • cans or tins; Closing same in a permanent manner (-making outlet arrangements B21D 51/38 ; welding or soldering B23K-)
B21D 51/2607	• • • {Locally embossing the walls of formed can bodies (-B44B 5/00 , B44C 1/24 , B44C 3/085 take precedence; bulging B21D 51/2646-) }
U B21D 51/38	• • Making inlet or outlet arrangements of cans, tins, baths, bottles, or other vessels; Making can ends; Making closures
B21D 51/44	• • • Making closures, e.g. caps (-folded of thin metal foils in the way of making paper caps B31D 5/00 ; making closures in conjunction with applying same B67B-)
B21D 51/46	• • • Placing sealings or sealing material{(-moulding plastic sealing material into closure members B29C 70/80-)}

B21D 53/00	Making other particular articles (making wire fabrics B21F; making chains or chain parts B21L)
B21D 53/02	• heat exchangers {or parts thereof}, e.g. radiators, condensers {fins, headers} (making finned or ribbed tubes by fixing strip material or the like to tubes B21C 37/22)
B21D 53/08	• of both metal tubes and sheet metal (connecting tubes in openings B21D 39/06)
U B21D 53/26	• wheels or the like
B21D 53/264	• {wheels out of a single piece (B21D 53/261 takes precedence)}
B21D 53/265	• {parts of wheels (B21D 53/28 , B21D 53/30 take precedence)}
U B21D 53/38	• locksmith's goods, e.g. handles
B21D 53/42	• keys (making keys by combined operations B23P 15/005)
U B21D 53/60	• cutlery wares; garden tools or the like
B21D 53/64	• knives; scissors; cutting blades (B21D 53/72 takes precedence; handle portions B21D 53/70)
B21D 53/66	• spades; shovels (handle portions B21D 53/70)
B21D 53/68	• rakes, garden forks, or the like (handle portions B21D 53/70)
B21D 53/70	• handle portions (B21D 53/72 takes precedence)
B21D 53/92	• other parts for aircraft
B21D 55/00	Safety devices protecting the machine or the operator, specially adapted for apparatus or machines dealt with in this subclass (for presses in general B30B ; safety devices in general F16P)

Project: N/A (B21F)

U B21F 1/00	Bending wire other than coiling; Straightening wire
B21F 1/004	• {by means of press-type tooling}
B21F 1/006	• {in 3D with means to rotate the tools about the wire axis}
B21F 1/008	• {in 3D with means to rotate the wire about its axis}
U B21F 1/02	• Straightening
B21F 1/023	• {in a device rotating about the wire axis}
U B21F 5/00	Upsetting wire { or pressing operations affecting the wire cross-section}(in the manufacture of nails or pins B21G 3/12)
B21F 5/005	• {Upsetting wire}
U B21F 9/00	Straining wire (straining pre-stressing wires for concrete E04G 21/12; connections or attachments adapted for straining F16G 11/00; {bundling machines or tools B65B 13/00})
B21F 9/002	• {to maintain tension in the wire, e.g. to pull the wire taut}
B21F 9/005	• {to affect the material properties of the wire}
B21F 9/007	• {to induce a plastic deformation of the wire}
U B21F 23/00	Feeding wire in wire-working machines or apparatus (applicable also to feeding rods or strips B21D 43/00)
U B21F 23/005	• {Feeding discrete lengths of wire or rod}
B21F 23/007	• {using pick-up means, e.g. for isolating a predefined number of wires from a bundle}
U B21F 35/00	Making springs from wire (by coiling wire B21F 3/00; making resilient rings B21F 37/02)

B21F 35/003 • {-Multi-filament springs, e.g. made of stranded, braided, cable or multi-filament material}

B21F 35/006 • {-Double twist coil springs}

U B21F 45/00 Wire-working in the manufacture of other particular articles (of pins, needles, nails, hairpins [B21G](#); of chains [B21L](#); { for semiconductor devices [H01L 24/42](#)})

B21F 45/006 • {-of concrete reinforcement fibres}

B21F 45/008 • {-of medical instruments, e.g. stents, corneal rings (medical science [A61](#))}

Project: N/A (B21H)

U B21H 5/00 Making gear wheels, {racks, spline shafts or worms}

B21H 5/02 • with cylindrical outline, {e.g. by means of die rolls- (worms [B21H 5/005](#))}

B21H 5/025 • • {-Internally geared wheels}

U B21H 7/00 Making articles not provided for in the preceding groups, e.g. agricultural tools, dinner forks, knives, spoons (nails, pins [B21G 3/30](#))

B21H 7/002 • {-Fasteners, rivets}

U B21H 7/18 • grooved pins; Rolling grooves, e.g. oil grooves, in articles {([B21H 5/00](#) takes precedence)}

U B21H 7/182 • • {-Rolling annular grooves}

B21H 7/185 • • • {-Filet rolling, e.g. of crankshafts}

U B21H 8/00 Rolling metal of indefinite length in repetitive shapes specially designed for the manufacture of particular objects {e.g. checkered sheets}

B21H 8/005 • {-Embossing sheets or rolls}

Project: N/A (B21J)

B21J 1/00 Preparing metal stock { or similar ancillary operations prior, during or post forging, e.g. heating or cooling-(pretreatment for rolling [B21B 1/02](#), [B21B 15/0035](#))}

B21J 1/003 • {-Selecting material}

B21J 1/006 • • {-Amorphous metal}

U B21J 1/02 • Preliminary treatment of metal stock without particular shaping, e.g. salvaging segregated zones, forging or pressing in the rough (modifying the physical properties by deformation [C21D 7/00](#), [C22F 1/00](#))

B21J 1/025 • • {-affecting grain orientation}

U B21J 5/00 Methods for forging, hammering, or pressing (for working sheet-metal or metal tubes, rods, or profiles [B21D](#); for working wire [B21F](#)); Special equipment or accessories therefor

B21J 5/002 • {-Hybrid process, e.g. forging following casting}

B21J 5/004 • {-Thixotropic process, i.e. forging at semi-solid state}

B21J 5/006 • {-using ultrasonic waves}

B21J 5/008 • {-Incremental forging}

U B21J 5/02 • Die forging; Trimming by making use of special dies; { Punching during forging}

B21J 5/022 • • {-Open die forging}

B21J 5/025 • • {-Closed die forging}

B21J 5/027 • • {-Trimming}

U B21J 5/06 • for performing particular operations

B21J 5/063	• • {-Friction heat forging (friction heat riveting B21J 15/027)}
B21J 5/066	• • • {-Flow drilling}
U B21J 9/00	Forging presses
U B21J 9/02	• Special design or construction
B21J 9/027	• • {-with punches moving along auxiliary lateral directions (B21J 13/025 takes precedence)}
U B21J 13/00	Details of machines for forging, pressing, or hammering
U B21J 13/02	• Dies or mountings therefor
B21J 13/025	• • {-Dies with parts moving along auxiliary lateral directions}
U B21J 15/00	Riveting
U B21J 15/02	• Riveting procedures
B21J 15/027	• • {-Setting rivets by friction heating}
U B21J 15/04	• • Riveting hollow rivets mechanically
B21J 15/041	• • • {-by pushing a drive-pin}
B21J 15/043	• • • {-by pulling a mandrel}
B21J 15/045	• • • • {-and swaging locking means, i.e. locking the broken off mandrel head to the hollow rivet}
B21J 15/048	• • • {-Setting self-drilling hollow rivets}
B21J 15/06	• • {-Riveting hollow rivets by means of hydraulic, liquid, or gas pressure (portable riveters B21J 15/105)}
U B21J 15/10	• Riveting machines (electric heating elements H05B)
B21J 15/105	• • {-Portable riveters (pliers for riveting B21J 15/386)}
U B21J 15/14	• • specially adapted for riveting specific articles, e.g. brake lining machines
B21J 15/142	• • • {-Aerospace structures}
B21J 15/145	• • • {-Turbines}
B21J 15/147	• • • {-Composite articles}
U B21J 15/28	• • Control devices specially adapted to riveting machines not restricted to one of the preceding sub-groups
B21J 15/285	• • • {-for controlling the rivet upset cycle}
U B21J 15/30	• • Particular elements, e.g. supports; Suspension equipment specially adapted for portable riveters
U B21J 15/32	• • • Devices for inserting or holding rivets in position with or without feeding arrangements
B21J 15/323	• • • • {-using a carrier strip}
B21J 15/326	• • • • {-Broken-off mandrel collection}
U B21J 15/38	• Accessories for use in connection with riveting, e.g. pliers for upsetting; Hand tools for riveting
B21J 15/383	• • {-Hand tools for riveting}
B21J 15/386	• • {-Pliers for riveting}

Project: N/A (B21K)

U B21K 1/00	Making machine elements
U B21K 1/06	• axles or shafts
B21K 1/063	• • {-hollow (hollow racks B21K 1/768)}
B21K 1/066	• • {-splined}

- U B21K 1/18
 - pistons or plungers
- B21K 1/185
 - • {-with cooling channels}
- U B21K 1/20
 - valve parts
- B21K 1/205
 - • {-rocker arms}
- U B21K 1/28
 - wheels; discs
- U B21K 1/30
 - • with gear-teeth
- B21K 1/305
 - • • {-helical}
- U B21K 1/76
 - elements not mentioned in one of the preceding groups
- U B21K 1/762
 - • {Coupling members for conveying mechanical motion, e.g. universal joints}
- B21K 1/763
 - • • {-Inner elements of coupling members}
- B21K 1/765
 - • • {-Outer elements of coupling members}
- U B21K 1/767
 - • {Toothed racks}
- B21K 1/768
 - • • {-hollow}
- U **B21K 25/00**

Uniting components to form integral members, e.g. turbine wheels and shafts, caulks with inserts, with or without shaping of the components (uniting by interference- or press-fitting [B23P 11/02](#), [B21K 19/02](#))
- B21K 25/005
 - {-by friction heat forging ([B21J 15/027](#) takes precedence; friction heat forging per se [B21J 5/063](#))}

Project: N/A (B21L)

- U **B21L 15/00**

Finishing or dressing chains or chain links, e.g. removing burr material, calibrating ([B21L 9/06](#) takes precedence)
- B21L 15/005
 - {-Pre-stretching chains}

Project: N/A (B22C)

Project: N/A (B23F)

U B23F 17/00 Special methods or machines for making gear teeth, not covered by the preceding groups

- B23F 17/003 • {-for dry cutting}

U B23F 21/00 Tools specially adapted for use in machines for manufacturing gear teeth

- B23F 21/005 • {-with plural tools on a common axis}

Project: N/A (B23G)

U B23G 1/00 Thread cutting; Automatic machines specially designed therefor

- U B23G 1/44 • Equipment or accessories specially designed for machines or devices for thread cutting

- U B23G 1/46 • • for holding the threading tools {[B23B 31/083](#) takes precedence}

- B23G 1/465 • • • {-comprising arrangements for reversing the rotation of the tool}

Project: N/A (B23K)

B23K SOLDERING OR UNSOLDERING; WELDING; CLADDING OR PLATING BY SOLDERING OR WELDING; CUTTING BY APPLYING HEAT LOCALLY, e.g. FLAME CUTTING; WORKING BY LASER BEAM (-making metal-coated products by extruding metal [B21C 23/22](#) ; building up linings or coverings by casting [B22D 19/08](#) ; casting by dipping [B22D 23/04](#) ; manufacture of composite layers by sintering metal powder [B22F 7/00](#) ; arrangements on machine tools for copying or controlling [B23Q](#); covering metals or covering materials with metals, not otherwise provided for [C23C](#); burners [F23D](#)-)

NOTE

This subclass covers also electric circuits specially adapted for the purposes covered by the title of the subclass.

In this subclass, the following term is used with the meaning indicated:

"soldering" means uniting metals using solder and applying heat without melting either of the parts to be united

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

B23K 35/04	-	B23K 35/20	covered by
B23K 35/0205	-	B23K 35/0294	B23K 35/363 "
B23K 35/3601	-	B23K 35/3618	

**B23K 1/00 -
B23K 3/00 Soldering, e.g. brazing, or unsoldering (essentially requiring the use of welding machines or welding equipment, see the relevant groups for the welding machines or welding equipment)**

B23K 1/00 Soldering, e.g. brazing, or unsoldering (-[B23K 3/00](#) takes precedence; characterised only by the use of special materials or media [B23K 35/00](#) ; dip or wave soldering in the manufacture of printed circuits [H05K 3/34](#)-)

- B23K 1/008 • Soldering within a furnace (-[B23K 1/012](#) takes precedence-)

	B23K 1/14	• specially adapted for soldering seams (-making tubes involving operations other than soldering B21C -)
	B23K 1/20	• Preliminary treatment of work or areas to be soldered, e.g. in respect of a galvanic coating (-preparation of surfaces in particular ways, see the relevant classes for the treatments or the materials treated, e.g. C04B , C23C -)
	B23K 3/00	Tools, devices, or special appurtenances for soldering, e.g. brazing, or unsoldering, not specially adapted for particular methods (-materials used for soldering B23K 35/00-)
U	B23K 3/02	• Soldering irons; Bits
	B23K 3/028	• • {Devices for cleaning soldering iron tips (- B23K 3/027 takes precedence-)}
U	B23K 3/03	• • electrically heated
	B23K 3/0315	• • • {Quick-heating soldering irons having the tip-material forming part of the electric circuit (- B23K 3/0323 takes precedence-)}
	B23K 3/0376	• • • {comprising carbon heating elements or electrodes (- B23K 3/0384 and B23K 3/0392 take precedence-)}
	B23K 3/04	• Heating appliances (-soldering lamps or blowpipes F23D ; electric heating in general H05B -)
U	B23K 3/06	• Solder feeding devices; Solder melting pans
U	B23K 3/0607	• • {Solder feeding devices}
	B23K 3/0638	• • • {for viscous material feeding, e.g. solder paste feeding (- B23K 3/0623 takes precedence-)}
	B23K 3/08	• Auxiliary devices therefor (-cleaning pipes or tubes or systems of pipes or tubes, e.g. before soldering, B08B 9/02 -)
U	B23K 5/00	Gas flame welding
	B23K 5/003	• {the welding zone being shielded against the influence of the surrounding atmosphere (-selection of media B23K 35/38 -)}
	B23K 5/02	• Seam welding (-making tubes involving operations other than welding B21C -)
U	B23K 5/12	• taking account of the properties of the material to be welded
	B23K 5/14	• • of non-ferrous metals (- B23K 5/16 takes precedence-)
U	B23K 5/22	• Auxiliary equipment, e.g. backings, guides
	B23K 5/24	• • Arrangements for supporting torches (-not restricted to flame welding B23K 37/02 -)
	B23K 7/00	Cutting, scarfing, or desurfacing by applying flames{(-thermal deburring B23D 79/005-)}
	B23K 7/10	• Auxiliary devices, e.g. for guiding or supporting the torch (-guiding means applicable to other metal-working machines B23Q -)
	B23K 9/00	Arc welding or cutting (-electro-slag welding B23K 25/00 ; welding transformers H01F ; welding generators H02K-)
U	B23K 9/0026	• {specially adapted for particular articles or work}
	B23K 9/0043	• • {Locally welding a thin plate to a thick piece (-spot arc welding B23K 9/007 -)}

MANIPULATORS; CHAMBERS PROVIDED WITH MANIPULATION DEVICES {{ manipulators specially adapted for use in surgery [A61B 19/22](#) ; manipulators used in cleaning hollow articles [B08B 9/04](#) } ; manipulators associated with rolling mills [B21B 39/20](#) ; manipulators associated with forging machines [B21J 13/10](#) ; { manipulators associated with picking-up and placing mechanisms [B23P 19/007](#) } ; means for holding wheels or parts thereof [B60B 30/00](#) ; { vehicles with ground-engaging propulsion means, e.g. walking members [B62D 57/02](#) , [B62D 57/032](#) ; devices for picking-up and depositing articles or materials between conveyers [B65G 47/90](#) , [B65G 47/91](#) ; manipulators with gripping or holding means for transferring packages [B65H 67/065](#) } ; cranes [B66C](#) ; { manipulators used in the protection or supervision of pipe-line installations [F17D 5/00](#) ; walking equipment adapted for nuclear steam-generators [F22B 37/006](#) } ; manipulators specially adapted for, or associated with, nuclear reactors [G21C](#) ; { apparatus used for handling wafers during manufacture or treatment of semiconductor [H01L 21/68](#) }}

NOTE

In this subclass, the following term is used with the meaning indicated :

- "manipulator" covers handling tools, devices, or machines having a gripping or work head capable of bodily movement in space and of change of orientation, such bodily movement and change of orientation being controlled, at will, by means remote from the head.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[B25J 9/18](#) covered by [B25J 9/16](#)
[B25J 9/22](#) " " [B25J 9/1656](#) ,
[G05B 19/42](#)

B25J 1/00 Manipulators positioned in space by hand (-of master-slave type [B25J 3/00](#) ; micromanipulators [B25J 7/00](#)-)

B25J 1/04 • rigid, e.g. shelf-reachers{(-without grippers [A47F 13/06](#)-)}

U B25J 3/00 Manipulators of master-slave type, i.e. both controlling unit and controlled unit perform corresponding spatial movements

B25J 3/02 • involving a parallelogram coupling of the master and slave units (-pantographic instruments [B43L 13/00](#)-)

B25J 3/04 • involving servo mechanisms (-servo-actuated heads [B25J 15/02](#)-)

B25J 5/00 Manipulators mounted on wheels or on carriages (-[B25J 1/00](#) takes precedence; programme-controlled manipulators [B25J 9/00](#) ; { vehicle aspects [B60](#) , [B62](#) , e.g. remote-controlled steering for motor vehicles [B62D 1/24](#) ; control of position of vehicles [G05D 1/00](#) })

B25J 7/00 Micromanipulators{(-specimen supports for investigating or analysing materials [G01N 23/2204](#) ; associated with microscopes [G02B 21/32](#) ; means for supporting or positioning the objects or the material in discharge tubes [H01J 37/20](#)-)}

U B25J 9/00 Programme-controlled manipulators

U B25J 9/0084 • {comprising a plurality of manipulators}

CUTTING; DETAILS COMMON TO MACHINES FOR PERFORATING, PUNCHING, CUTTING-OUT, STAMPING-OUT OR SEVERING (soil-working [A01B](#); for growing crops or plants [A01D](#), [G A01G](#); for fodder or straw [A01F](#); for bulk butter [A01J](#); for dough [A21C](#); slaughtering [A22B](#); for tobacco, cigars or cigarettes [A24](#); marking-out, perforating or making buttonholes [A41H 25/00](#); manufacturing footwear [A43D](#); brushmaking [A46D](#); surgery [A61B](#); disintegrating, mincing or shredding in general [B02C](#); cutting wire, making pins or nails [B21F](#), [G B21G](#); of the kind used for metal [B23](#); cutting by abrasive fluid jets [B24C 5/02](#); hand-held cutting tools [B26B](#); perforating, cutting-out, stamping-out or punching, or severing by means other than cutting [B26F](#); for wood [B27](#); for stone [B28D](#); working of plastics or substances in a plastic state [B29](#); making boxes, cartons, envelopes or bags, of paper or similarly worked materials, e.g. metal foil, [B31B](#); article or web delivery apparatus incorporating cutting or line-perforating devices [B65H 35/00](#); for leather or upholstery [B68](#); [C14B](#); for glass [C03B](#); making matches [C06F](#); for peat [C10F](#); for sugar [C13H](#); for textile materials [D06H](#); civil engineering, building, mining, see Section E; for light guides [G02B 6/25](#); cutting processed photographic material [G03D 15/04](#))

NOTES

This subclass covers:

cutting non-metallic sheet material and metal foil in general;
cutting other forms of non-metallic material not otherwise provided for;
features specific to machines for cutting, perforating, punching, cutting-out, stamping-out and severing by means other than cutting, which relate to a requirement or problem of a nature which is not peculiar to a machine for these purposes, that is, details of or arrangements for operating or controlling such machines, although the realisation of such features may differ according to the kind of machine concerned. This subclass covers such features in general even if the feature in any particular case is to some extent peculiar to, or is claimed only for, a machine designed for perforating, punching, cutting-out, stamping-out, or for severing other than by cutting.

If the details or arrangements have no essential features specific to cutting, perforating, punching, cutting-out, stamping-out or severing machines, the more general classes, e.g. [F16](#), take precedence.

In this subclass, in groups [B26D 5/00](#) and [B26D 7/00](#), the following term is used with the meaning indicated:

"cutting" includes cutting-out, stamping-out, punching, perforating, and severing by means other than cutting.

U B26D 3/00

Cutting work characterised by the nature of the cut made; Apparatus therefor

B26D 3/003 • {~~specially adapted for cutting rubber~~}

B26D 3/005 • • {~~for cutting used tyres~~}

B26D 3/006 • {~~specially adapted for cutting blocs of plastic material~~}

B26D 3/008 • • {~~by sliding~~}

U B26D 3/28

• Splitting layers from work; Mutually separating layers by cutting ([B26D 3/30](#) takes precedence; Recovery of plastics or other constituents of waste material containing plastics [B29B 17/00](#))

B26D 3/281 • • {~~the work being simultaneously deformed by the application of pressure to obtain profiled workpieces~~}

B26D 3/283 • • {~~Household devices therefor~~}

SHAPING CLAY OR OTHER CERAMIC COMPOSITIONS, SLAG, OR MIXTURES CONTAINING CEMENTITIOUS MATERIAL, e.g. PLASTER (foundry moulding [B22C](#); working stone or stone-like material [B28D](#); shaping of substances in a plastic state, in general [B29C](#); making layered products not composed wholly of these substances [B32B](#); shaping in situ, see the relevant classes of section E)

NOTE

In this subclass, the following term is used with the meaning indicated:

- "the material" means: a. clay or other ceramic compositions;
b. slag; c. mixtures with water-setting properties given by clay, cementitious material, or slag.

WARNING

The following IPC group(s) are not used in the CPC scheme. Subject matter covered by these groups is classified in the following groups:

[B28B 23/08](#) covered by [B28B 21/60](#) , [B28B 23/06](#)

B28B 1/00

Producing shaped {prefabricated}articles from the material (-using presses [B28B 3/00](#) ; shaping on moving conveyers [B28B 5/00](#) ; producing tubular articles [B28B 21/00](#) ; { producing articles with embedded elements [B28B 23/00](#) })

B28B 1/001

- {Rapid manufacturing of 3D objects by additive depositing, agglomerating or laminating of material}(-selective deposition modelling of metallic powder [B22F 3/008](#) ; rapid manufacturing of 3D objects in general and in particular of plastics [B29C 67/0051](#)-)}

B28B 1/004

- {Devices for shaping artificial aggregates from ceramic mixtures or from mixtures containing hydraulic binder}(-from slag [C04B 5/00](#) ; composition of artificial aggregates [C04B 18/02](#)-)}

B28B 1/005

- {Devices or processes for obtaining articles having a marble appearance}(-producing decorative effects [B44C](#) ; design of stone surfaces, e.g. marble, [B44F 9/04](#)-)}

B28B 1/008

- {made from two or more materials having different characteristics or properties}(-casting for producing layered articles [B28B 1/16](#) ; feeding several successive layers, optionally of different materials [B28B 13/022](#) ; coating [B28B 11/04](#) ; applying material to surfaces to form a permanent layer thereon [B28B 19/00](#)-)}

B28B 1/02

- by turning or jiggering {in moulds or moulding surfaces on rotatable supports}

B28B 1/04

- by tamping or ramming {(-followed by pressing [B28B 3/02](#)-)}

B28B 1/08

- by vibrating or jolting{(-of moulding sand [B22C 15/10](#) ; of concrete in general [E04G 21/063](#)-)}

B28B 1/082

- {combined with a vacuum, e.g. for moisture extraction}(-in general [E04G 21/061](#)-)}

B28B 1/093

- by means directly acting on the material, e.g. by cores wholly or partly immersed in the material {or elements acting on the upper surface of the material}{ [B28B 1/084](#) takes precedence; } internal vibrators for compacting concrete in situ [E04G 21/08](#)-)

- B28B 1/14
 - by simple casting, the material being neither forcibly fed nor positively compacted ~~(-for molten material [B28B 1/54](#)-)~~
- B28B 1/16
 - • for producing layered articles ~~(-coating [B28B 11/04](#)-)~~
- B28B 1/20
 - by centrifugal or rotational casting ~~(-slip-casting involving rotation of the mould [B28B 1/28](#) ; for molten material [B28B 1/54](#)-)~~
- B28B 1/24
 - by injection moulding~~{(-injection moulding of ceramic slips [B28B 1/265](#) ; of tubular articles [B28B 21/38](#)-)}~~
- B28B 1/26
 - by slip-casting, i.e. by casting a suspension or dispersion of the material in a liquid-absorbent or porous mould, the liquid being allowed to soak into or pass through the walls of the mould; Moulds therefor ~~(-[B28B 1/52](#) takes precedence-)~~; {specially for manufacturing articles starting from a ceramic slip; Moulds therefor ~~(-of tubular articles [B28B 21/08](#)-)}~~
- B28B 1/261
 - • {Moulds therefor ~~(-absorbent moulds in general [B28B 7/344](#)-)}~~
- B28B 1/268
 - • {by dipping moulding surfaces in the slip ~~(-in general [B28B 1/38](#)-)}~~
- B28B 1/269
 - • {by electrophoresis ~~(-electrophoresis in general [C25](#)-)}~~
- B28B 1/28
 - • involving rotation of the mould ~~{about a centrifugal axis}~~
- B28B 1/29
 - by profiling or strickling the material in open moulds or on moulding surfaces~~{(-in rotary moulds [B28B 1/02](#) ; by means of profiled rollers [B28B 3/12](#) , [B28B 3/123](#)-)}~~
- B28B 1/30
 - by applying the material on to a core or other moulding surface to form a layer thereon ~~(-to form a permanent layer [B28B 19/00](#)-)~~
- B28B 1/32
 - • by projecting, e.g. spraying ~~(-spraying in general [B05B](#) , ~~[B05D](#)~~)~~
- B28B 1/34
 - • • by centrifugal force~~{(-centrifugally acting implements for applying plaster or the like to walls [E04F 21/10](#)-)}~~
- B28B 1/38
 - • by dipping ~~(in general [B05C](#) , ~~[B05D](#)~~; { shaping from synthetic resin [B29C 41/14](#) })~~

U	B28B 13/02	• Feeding the unshaped material to moulds or apparatus for producing shaped articles
U	B28B 13/0215	• • {Feeding the moulding material in measured quantities from a container or silo}
U	B28B 13/023	• • • {by using a feed box transferring the moulding material from a hopper to the moulding cavities}
	B28B 13/0235	• • • • {the feed box being provided with agitating means, e.g. stirring vanes to avoid premature setting of the moulding material (agitation in general B01F)}
	B28B 13/04	• Discharging the shaped articles ({ discharging tubular articles after shaping B28B 21/90 ; } conveying systems for ceramic mouldings B65G 49/08-)
	B28B 13/06	• • Removing the shaped articles from moulds (-by means incorporated in, or carried by, the moulds B28B 7/10-)
	B28B 15/00	General arrangement or lay-out of plant {Industrial outlines, plant installations}
	B28B 15/005	• {Machines using pallets co-operating with a bottomless mould; Feeding or discharging means for pallets (-Feeding pallets for making a continuous moulding surface B28B 5/025, B28B 5/028-Feeding pallets for making a continuous moulding surface B28B 5/025, B28B 5/028)}
	B28B 17/00	Details of, or accessories for, apparatus for shaping the material; Auxiliary measures taken in connection with such shaping (-moulds B28B 7/00 ; after-treatment B28B 11/00 ; feeding or discharging B28B 13/00 ; arrangements for embedding elements in the material B28B 23/00 ; details, accessories, or auxiliary measures special to any one type of shaping, machine or method of shaping, see the relevant groups for such machines or methods-)
	B28B 17/0009	• {Shaping of preshaped articles} (-shaping the surface of articles B28B 11/08-)
	B28B 17/02	• Conditioning the material prior to shaping ({-for mixtures containing clay or cement B28C-})
	B28B 19/00	Machines or methods for applying the material to surfaces to form a permanent layer thereon (-making shaped articles on mandrels B28B 1/30 ; applying liquids or other fluent materials to surfaces in general B05C ; glazing or engobing C04B ; applying the material to walls or other fixed structures, see the relevant classes of section E-)
U	B28B 21/00	Methods or machines specially adapted for the production of tubular articles
U	B28B 21/02	• by casting into moulds
	B28B 21/06	• • into moulds having sliding parts (-B28B 21/26 takes precedence; forms, shutterings, or falsework for making rooms as a whole, whole stories, or whole buildings in situ E04G 11/02-)
U	B28B 21/10	• • using compacting means

- U B28B 21/18
 - • • using expansible or retractable mould or core elements
- B28B 21/20
 - • • using inflatable cores, e.g. having a frame inside the inflatable part of the core (-connection of valves to inflatable elastic bodies [B60C 29/00](#)-)
- B28B 21/36
 - • • applying fluid pressure or vacuum to the material (-combined with slip-casting [B28B 21/08](#)-)
- B28B 21/56
 - incorporating reinforcements {or inserts}
- U B28B 21/60
 - • prestressed reinforcements
- B28B 21/62
 - • • circumferential {laterally tensioned}
- U B28B 21/70
 - by building-up from preformed elements
- B28B 21/74
 - • Producing pipe bends, sockets, sleeves; Moulds therefor (-combined with extrusion presses [B28B 21/54](#)-)
- B28B 21/76
 - Moulds {-for slip-casting [B28B 21/08](#)-}
- B28B 21/86
 - Cores (-in general [B28B 7/00](#)-)
- B28B 21/88
 - • adjustable, collapsible or expansible (-using inflatable cores [B28B 21/20](#) { for compacting [B28B 21/18](#) })
- B28B 21/90
 - Methods or apparatus for {demoulding or}discharging after shaping
- B28B 23/00**

Arrangements specially adapted for the production of shaped articles with elements wholly or partly embedded in the moulding material; {Production of reinforced objects} (-[B28B 21/00](#) takes precedence; in units for prefabricated buildings [B28B 7/22](#)-)
- B28B 23/0043
 - {with gaskets or sealing elements, e.g. for tunnelings or man holes (-[B28B 21/563](#) takes precedence-)}
- B28B 23/0056
 - {Means for inserting the elements into the mould or supporting them in the mould (-[B28B 23/022](#) takes precedence-)}
- B28B 23/02
 - wherein the elements are reinforcing members{(-[B28B 23/0006](#) takes precedence-)}
- B28B 23/022
 - • {Means for inserting reinforcing members into the mould or for supporting them in the mould (-inserting during extrusion [B28B 3/2645](#)-)}
- B28B 23/18
 - • for the production of elongated articles (-[B28B 23/06](#) takes precedence-)
- B28B 23/20
 - • the shaping being effected by centrifugal or rotational moulding (-[B28B 23/10](#) takes precedence-)

Project: N/A (B28C)**B28C**

PREPARING CLAY; PRODUCING MIXTURES CONTAINING CLAY OR CEMENTITIOUS MATERIAL, e.g. PLASTER (-preparing material for foundry moulds [B22C 5/00](#)-)

NOTE

In this subclass, the following terms or expressions are used with the meanings indicated:

"cement" or "mixtures of cement with other substance" includes plaster;
 "clay" includes like ceramic compositions.

B28C 1/00

Apparatus or methods for obtaining or processing clay (-filtration in general [B01D](#) ; separation of solids from solids [B03](#) , [B07](#) ; chemical part [C04B](#) ; by mining or quarrying [E21C 41/16](#) , [E21C 41/26](#) , [E21C 47/10](#)-)

- B28C 1/02
 - for producing or proccessing clay suspensions,{e.g. slip} (-producing or processing suspensions in general [B01](#)-)
- B28C 1/04
 - • Producing suspensions, e.g. by blunging {or mixing; with means for removing stones}
- B28C 1/06
 - • Processing suspensions {i.e. after mixing}

- U B28C 1/08
 - • • Separating suspensions, e.g. for obtaining clay, for removing stones; {Cleaning clay slurries}
- B28C 1/082
 - • • • {Dewatering ([B28C 1/088](#) takes precedence-); Using sieves}
- B28C 1/10
 - for processing clay-containing substances in non-fluid condition (-clay slurries [B28C 1/02](#)-); {Plants}
- B28C 1/12
 - • Storing and conditioning in storage; Specially adapted storage spaces or devices for their filling or emptying; {Tower structures for the storage of clay} (-feeding clay to shaping apparatus [B28B 13/00](#)-)
- B28C 1/14
 - • specially adapted for homogenising, comminuting or conditioning clay in non-fluid condition or for separating undesired admixtures therefrom (-processes involving conversion to a slurry [B28C 1/02](#) ; conditioning in storage [B28C 1/12](#) ; comminuting in general [B02C](#) ; chemical features in eliminating iron or lime [C04B](#)-)
- B28C 1/18
 - • • for comminuting {clay lumps}
- B28C 3/00 -
B28C 9/00**

Mixing clay or cement with other material (-general arrangement or layout of plant [B28C 9/00](#) ; mixers in general [B01F](#) ; concrete paving mixers combined with distributing devices [E01C 19/00](#) ; machines for preparing mixtures of road-metal with bitumen [E01C 19/10](#)-)

NOTE

In groups [B28C 3/00](#) to [B28C 7/00](#) , the following term is used with the meaning indicated:

- "mixing" includes preliminary mixing, e.g. of some of the ingredients final mixing, and agitating the mixture to prevent segregation thereof
- B28C 3/00**

Apparatus or methods for mixing clay with other substances (-producing clay suspensions [B28C 1/02](#)-)
- B28C 5/00**

Apparatus or methods for producing mixtures of cement with other substances, e.g. slurries, mortars, porous or fibrous compositions (-controlling the mixing apparatus and supplying the ingredients [B28C 7/00](#) { separating cement from waste concrete [B03B 9/063](#) })
- B28C 5/003
 - {Methods for mixing (-[B28C 5/386](#) , [B28C 5/402](#) take precedence-)}
- B28C 5/02
 - without using driven mechanical means effecting the mixing (-[B28C 5/48](#) takes precedence-)
- B28C 5/026
 - • {Mixing guns or nozzles; Injector mixers (-applying plaster by gas pressure [E04F 21/12](#) ; both conveying and distributing concrete [E04G 21/04](#) ; conveying concrete [B65G 53/32](#) ; accelerating or decelerating material flow in troughs or tubes [B65G 53/58](#)-)}
- B28C 5/04
 - • Gravitational mixing; Mixing by intermingling streams of ingredients ({ [B28C 5/026](#) takes precedence } ; ingredients projected by fluid pressure [B28C 5/06](#)-)
- B28C 5/06
 - • the mixing being effected by the action of a fluid (-in combination with driven mechanical means, producing cellular concrete [B28C 5/38](#)-)
- B28C 5/08
 - using driven mechanical means affecting the mixing (-[B28C 5/40](#) , [B28C 5/42](#) , [B28C 5/48](#) take precedence; in combination with the action of a fluid [B28C 5/38](#)-)
- U B28C 5/0806
 - • {Details; Accessories}
- B28C 5/0831
 - • • {Drives or drive systems, e.g. toothed racks, winches (-[B28C 7/0876](#) takes precedence-)}

- B28C 5/0837
 - • • {Drives for mixers of the tilted-drum type (~~B28C 5/085~~ takes precedence-)}
- B28C 5/0843
 - • • {Drives for drums rotating about a horizontal axis and supported by rotating rollers (~~B28C 5/085~~ takes precedence-)}
- U B28C 5/10
 - Mixing in containers not actuated to effect the mixing
- U B28C 5/12
 - • with stirrers sweeping through the materials {e.g. with incorporated feeding or discharging means or with oscillating stirrers}
- B28C 5/1238
 - • • {for materials flowing continuously through the mixing device and with incorporated feeding or discharging devices (~~feeding or discharging devices per se B28C 5/0818-~~)}
- B28C 5/1246
 - • • • {with feeding devices (~~B28C 5/1276~~ , ~~B28C 5/1292~~ take precedence-)}
- B28C 5/1253
 - • • • {with discharging devices (~~B28C 5/1276~~ , ~~B28C 5/1292~~ take precedence-)}
- B28C 5/1261
 - • • • • {Applying pressure for discharging (~~applying pressure during mixing B28C 5/462-~~)}
- B28C 5/1269
 - • • • • {for making cellular concrete (~~in general B28C 5/381-~~)}
- B28C 5/14
 - • • the stirrers having motion about a horizontal or substantially horizontal axis (~~with feeding or discharging means B28C 5/12-~~)}
- B28C 5/146
 - • • • {with several stirrers with parallel shafts in one container (~~B28C 5/145~~ takes precedence-)}
- B28C 5/16
 - • • the stirrers having motion about a vertical or steeply inclined axis (~~with feeding or discharging means B28C 5/12-~~)}
- U B28C 5/18
 - Mixing in containers to which motion is imparted to effect the mixing
- B28C 5/1806
 - • {rotating about an inclined axis (~~about a steeply inclined axis B28C 5/26-~~)}
- B28C 5/1818
 - • • {Mobile or portable devices, e.g. on a wheelbarrow (~~B28C 5/1887~~ takes precedence-)}
- U B28C 5/1825
 - • {Mixers of the tilted-drum type, e.g. mixers pivotable about an axis perpendicular to the axis of rotation for emptying}
- B28C 5/1837
 - • • {provided with feeding means, e.g. hoisting skips (~~B28C 5/1831~~ , ~~B28C 5/185~~ , ~~B28C 5/1856~~ take precedence-)}
- B28C 5/1856
 - • • {Details or parts, e.g. drums (~~drives B28C 5/0831-~~)}
- U B28C 5/20
 - • rotating about a horizontal or substantially horizontal axis during mixing, e.g. without independent stirrers
- B28C 5/2036
 - • • {with the material travelling through the mixer, the discharge being opposite the feed inlet (~~B28C 5/2072~~ , ~~B28C 5/22~~ , ~~B28C 5/24~~ take precedence-)}
- B28C 5/2045
 - • • {Parts or components (~~drives B28C 5/0831-~~)}
- B28C 5/2054
 - • • • {Drums, e.g. provided with non-rotary mixing blades (~~B28C 5/2009~~ takes precedence-)}
- B28C 5/34
 - Mixing on or by conveyers {e.g. by belts or chains provided with mixing elements}
- B28C 5/36
 - • Endless-belt mixers {i.e. for mixing while transporting the material on an endless belt, e.g. with stationary mixing elements}
- U B28C 5/38
 - wherein the mixing is effected both by the action of a fluid and by directly-acting driven mechanical means, e.g. stirring means; {Producing cellular concrete}
- B28C 5/381
 - {Producing cellular concrete (~~B28C 5/1269~~ takes precedence; producing foam ~~B01F 3/04446~~ , ~~B01F 3/04992-~~)}

	B28C 5/42	<ul style="list-style-type: none"> Apparatus specially adapted for being mounted on vehicles with provision for mixing during transport ({ B28C 5/1893 takes precedence; mounted on a wheelbarrow B28C 5/1215 , B28C 5/1818 , B28C 5/2018 ; } vehicle aspect B60P 3/16)

- B29C 69/005
 - {cutting-off or cutting-out a part of a strip-like or sheet-like material, transferring that part and fixing it to an article (if labeling see [B65C](#) , in combination with box-making [B31B 1/90](#) ; labelling in general [B65C](#))}
- U B29C 69/02
 - of moulding techniques only
- B29C 69/025
 - • {Deforming articles in a simpler intermediate shape without internal stresses for packaging transporting or storage and reshaping and fixing the original configuration on the place of use (shaping by liberation of internal stresses [B29C 61/00](#))}
- B29C 70/00**

Shaping composites, i.e. plastics material comprising reinforcements, fillers or preformed parts, e.g. inserts (chemical aspects [C08](#) , e.g. [C08J 5/00](#))

NOTE

In this group, the following terms or expressions are used with the meanings indicated:

- "reinforcement" means a structure in the form of fibres, wires, rods, bars, sections, plates or blocks, which improves the strength of an article;
- "filler" means a relatively inert substance in the form of particles, powder, beads, flakes or spheres, which improves the physical properties or increases the bulk or weight of an article;
- "preformed part" means a part made of any material, being

completely shaped to have a determined form and which is not used as a reinforcement, e.g. wires or nets forced only into the surface of an article;
- "insert" means a preformed part incorporated in an article during moulding.

- U B29C 70/02
 - comprising combinations of reinforcements, {e.g. non-specified reinforcements, fibrous reinforcing inserts} and fillers, {e.g. particulate fillers}, incorporated in matrix material, forming one or more layers and with or without non-reinforced or non-filled layers {(combinations of fibrous reinforcement only [B29C 70/04](#); combinations of fillers only [B29C 70/58](#); combinations with non reinforcing inserts, e.g. foam blocks, [B29C 70/68](#))}
- B29C 70/026
 - {and with one or more layers of pure plastics material, e.g. foam layers} (-applying a non-preformed coating, e.g. a gel-coat [B29C 37/0025](#) ; with foam blocks [B29C 70/86](#)-)}
- U B29C 70/04
 - comprising reinforcements only, e.g. self-reinforcing plastics
- U B29C 70/06
 - • Fibrous reinforcements only
- U B29C 70/08
 - • • comprising combinations of different forms of fibrous reinforcements incorporated in matrix material, forming one or more layers, and with or without non-reinforced layers
- B29C 70/083
 - • • • {Combinations of continuous fibres or fibrous profiled structures oriented in one direction and reinforcements forming a two dimensional structure, e.g. mats (-[B29D 24/00](#) , [B29D 99/001](#) take precedence-)}
- B29C 70/085
 - • • • • {the structure being deformed in a three dimensional configuration (-[B29C 53/805](#) takes precedence-)}
- B29C 70/086
 - • • • • {and with one or more layers of pure plastics material, e.g. foam layers} (-applying a non-preformed coating, e.g. a gel-coat, [B29C 37/0025](#) ; with foam blocks [B29C 70/86](#)-)}
- U B29C 70/10
 - • • characterised by the structure of fibrous reinforcements, {e.g. hollow fibres}
- B29C 70/12
 - • • • using fibres of short length, e.g. in the form of a mat{(-non-woven fabrics per se [D04H 1/00](#)-)}
- B29C 70/14
 - • • • • oriented (-oriented filler material [B29C 70/62](#)-)
- B29C 70/16
 - • • • • using fibres of substantial or continuous length{(-non-woven fabrics per se [D04H 3/00](#)-)}
- B29C 70/20
 - • • • • oriented in a single direction, e.g. roofing or other parallel fibres{(-[B29C 70/083](#) , [B29C 70/226](#) take precedence-)}
- B29C 70/202
 - • • • • • {arranged in parallel planes or structures of fibres crossing at substantial angles, e.g. cross-moulding compound (XMC) (-[B29C 70/207](#) takes precedence-)}
- B29C 70/22
 - • • • • oriented in at least two directions forming a two dimensional structure{(-woven fabrics per se [D03D](#) ; knitted fabrics per se [D04D](#) ; braid per se [D04C](#)-)}
- B29C 70/224
 - • • • • • {the structure being a net (-[B29C 70/688](#) takes precedence-)}
- B29C 70/26
 - • Non-fibrous reinforcements only{(-[B29C 35/0272](#) , [B29C 61/0625](#) , [B29C 70/887](#) take precedence; combined with fibres [B29C 70/023](#)-)}
- U B29C 70/28
 - • Shaping operations therefor

NOTE

This group covers:

- the shaping of a coherent fibrous reinforcements which are

pre-impregnated or without binder; or of non-coherent reinforcements of fibres in a mould or on a support;
- the impregnation or introduction of a plastics matrix in reinforcements during shaping;
This group does not cover:
- the moulding by a single technique of plastics matrix material mixed with and containing reinforcing fibres of short length, which is covered by the appropriate place for that technique;
- the pretreatment, e.g. impregnation, of reinforcements per se, i.e. independently of their shaping, which is covered by group [B29B 15/08](#) .

- B29C 70/30
 - • Shaping by lay-up, i.e. applying fibres, tape or broadsheet on a mould, former or core; Shaping by spray-up, i.e. spraying of fibres on a mould, former or core{(-by winding and joining, e.g. filament winding [B29C 53/56](#) ; for building tyres [B29D 30/08](#)-)}
- B29C 70/305
 - • • {Spray-up of reinforcing fibres with or without matrix to form a non-coherent mat in or on a mould (-[B29C 41/365](#) , [B29C 70/32](#) , [B29C 70/34](#) , [B29C 70/502](#) , [B29C 70/508](#) take precedence; coating a former by spraying plastics [B29C 41/08](#)-)}
- B29C 70/38
 - • • Automated lay-up, e.g. using robots, laying filaments according to predetermined patterns{(-application heads for tyres [B29D 30/28](#)-)}
- B29C 70/40
 - • Shaping or impregnating by compression (-[B29C 70/34](#) takes precedence-){not applied}
- U B29C 70/42
 - • • for producing articles of definite length, i.e. discrete articles
- U B29C 70/46
 - • • • using matched moulds, e.g. for deforming sheet moulding compound (SMC), prepregs
- B29C 70/467
 - • • • • {and impregnating the reinforcements during mould closing (-[B29C 70/465](#) takes precedence-)}
- U B29C 70/50
 - • • for producing articles of indefinite length, e.g. prepregs, sheet moulding compounds (SMC), cross moulding compounds (XMC)
- B29C 70/504
 - • • • {using rollers or pressure bands (-for corrugating [B29C 53/22](#)-)}
- B29C 70/506
 - • • • • {and impregnating by melting a solid material, e.g. sheet, powder, fibres (-[B29C 70/508](#) takes precedence-)}
- U B29C 70/52
 - • • • • Pultrusion, i.e. forming and compressing by continuously pulling through a die
- U B29C 70/525
 - • • • • {Component parts, details or accessories; Auxiliary operations}
- B29C 70/526
 - • • • • {Pultrusion dies, e.g. dies with moving or rotating parts (-[B29C 70/523](#) takes precedence-)}
- B29C 70/54
 - • Component parts, details or accessories; Auxiliary operations,{e.g. feeding or storage of prepregs or SMC after impregnation or during ageing(-pretreatment, e.g. impregnation, of reinforcements [B29B 15/08](#)-)}
- B29C 70/541
 - • • {Positioning reinforcements in a mould, e.g. using clamping means for the reinforcement (-positioning inserts in moulds [B29C 33/12](#) ; lay-up on a mould [B29C 70/30](#)-)}
- B29C 70/543
 - • • {Fixing the position or configuration of fibrous reinforcements before or during moulding (-for non-woven fabrics [D04H 3/08](#)-)}

- B29C 70/58
- comprising fillers only, {e.g. particles, powder, beads, flakes, spheres (~~B29C 70/025~~ takes precedence, agglomerating hollow spheres to produce synthetic foam [B29C 70/66](#) ; compounding ingredients per se [C08K](#)-)}
- NOTE
Moulding of plastics matrix material mixed with fillers by a single technique is classified in the appropriate place for that technique.
- B29C 70/585
- {incorporation of light reflecting filler, e.g. lamellae to obtain pearlescent effect (~~B29D 11/00615~~-)}
- U B29C 70/60
- comprising a combination of distinct filler types incorporated in matrix material, forming one or more layers, and with or without non-filled layers
- B29C 70/603
- {and with one or more layers of pure plastics material, e.g. foam layers (~~B29C 37/0025~~ ; applying a non-preformed coating, e.g. a gel-coat [B29C 37/0025](#) ; with foam blocks [B29C 70/86](#)-)}
- B29C 70/62
- the filler being oriented during moulding (~~B29C 70/14~~-)
- B29C 70/68
- by incorporating or moulding on preformed parts, e.g. inserts, layers, {e.g. foam blocks (~~B29C 33/12~~ ; mould constructions therefor [B29C 33/12](#) ; joining preformed parts by moulding [B29C 65/70](#)-)}
- NOTE
This group does not cover:
- incorporating, or moulding on, preformed parts by a single technique, which is covered by the appropriate place for that technique;
 - pretreatment of preformed parts per se, i.e. independently of their shaping, which is covered by group [B29B 15/00](#).
- B29C 70/688
- {the inserts being meshes or lattices (~~B29C 70/82~~ , [B29C 70/683](#) take precedence-)}
- B29C 70/70
- Completely encapsulating inserts (~~B29C 70/86~~ takes precedence-)}
- B29C 70/72
- Encapsulating inserts having non-encapsulated projections, e.g. extremities, terminal portions of electrical components (~~B29C 70/742~~ takes precedence-)}
- B29C 70/74
- Moulding material on a relatively small portion of the preformed part, e.g. outsert moulding (~~B29C 70/845~~ takes precedence-)}
- B29C 70/745
- {Filling cavities in the preformed part (~~B29C 70/84~~-)}
- U B29C 70/78
- Moulding material on one side only of the preformed part
- B29C 70/80
- Moulding sealing material into closure members (~~B21D 51/46~~-)}
- B29C 70/82
- Forcing elongated elements, wires, nets or the like partially or completely in the surface of an article, e.g. by cutting and pressing (~~B29C 70/64~~-)}
- B29C 70/84
- by moulding material on preformed parts to be joined (~~B29C 65/70~~-)}
- U B29C 70/88
- characterised primarily by possessing specific properties, e.g. electrically conductive, locally reinforced
- B29C 70/882
- {partly or totally electrically conductive, e.g. for EMI shielding (~~B05F 3/025~~ ; EMI shielding in general [H05K 9/00](#)-)}
- B29C 70/885
- {with incorporated metallic wires, nets, films or plates (~~B29C 35/0272~~ , [B29C 61/0625](#)-)}

- B29C 70/887
- {locally reinforced, e.g. by fillers}(-filler concentrated near the surface [B29C 70/64](#)-)}
- B29C 71/00** **After-treatment of articles without altering their shape; Apparatus therefor**(-[B29C 73/00](#) takes precedence; surface shaping [B29C 59/00](#) ; { for joined or sealed parts [B29C 66/03](#) ; after-treatment specially adapted for vulcanising tyres [B29D 30/0633](#) } ; chemical aspects [C08J 7/00](#)-)
- B29C 71/0009
- {using liquids, e.g. solvents, swelling agents}(-spectacle cases, e.g. for cleaning contact lenses [A45C 11/04](#) ; disinfecting or sterilising contact lenses [A61L 12/00](#) , using liquid substances [A61L 2/20](#) ; cleaning involving the use of liquid in general [B08B 3/00](#) ; for hydrating contact lenses [B29D 11/00067](#)-)}
- B29C 2071/0027
- {Removing undesirable residual components, e.g. solvents, unreacted monomers}(-of material to be shaped [B29B 9/16](#) , [B29B 13/00](#)-)}
- B29C 71/0081
- {using an electric field, e. g. for electrostatic charging}(-electrostatic pinning of extruded material [B29C 47/887](#) ; fixing linings by electrostatic charges [B29C 63/0043](#)-)}
- B29C 71/009
- {using gases without chemical reaction}(-[C08J 7/12](#) takes precedence; in combination with blow-moulding [B29C 49/46](#) ; surface treatment using plasma [B29C 59/14](#) , ionised gas [B29C 59/16](#)-)}
- B29C 71/02
- Thermal after-treatment{(-[B29C 71/0063](#) and [B29C 71/0072](#) take precedence-)}
- B29C 71/04
- by wave energy or particle radiation,{e.g. for curing or vulcanising preformed articles(-during moulding, e.g. in a mould [B29C 35/08](#)-)}
- B29C 73/00** **Repairing of articles made from plastics or substances in a plastic state, e.g. of articles shaped or produced by using techniques covered by this subclass or subclass [B29D](#)**(-retreading tyres [B29D 30/54](#) ; { linings for tyres acting locally [B60C5/145](#) ; } devices for covering leaks in pipes or hoses [F16L 55/16](#)-)
- WARNING
- This group was introduced on 24 June, 1987
Documents from the backlog of [B60C21/00](#) - [B60C21/08B](#), [B60C 25/16](#) are in the process of being systematically transferred to [B29C 73/00](#)]
- B29C 73/02
- using liquid or paste-like material}(-[B29C 73/16](#) takes precedence-)
- U B29C 73/04
- using preformed elements
- B29C 73/10
- • using patches sealing on the surface of the article}(-[B29C 73/14](#) takes precedence-)
- B29C 73/12
- • • Apparatus therefor, e.g. for applying}(-[B29C 73/30](#) takes precedence-)

Project: N/A (B29K)**B29K****INDEXING SCHEME ASSOCIATED WITH SUBCLASSES [B29B](#), [B29C](#) OR [B29D](#), RELATING TO MOULDING MATERIALS**NOTE

1. This subclass constitutes an indexing scheme associated with subclasses [B29B](#), [B29C](#) or [B29D](#).
 2. In this subclass, the following term is used with the meaning indicated: "rubber" covers: natural or conjugated diene rubbers; rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for such macromolecular compounds
 3. Documents relating to compositions or properties of the materials to be shaped, said compositions having a particular influence on the shaping technique, should be classified in the shaping technique, e.g. [B29C 39/003](#) , [B29C 41/003](#) , [B29C 43/003](#) , [B29C 45/0001](#) , [B29C 47/0004](#) , [B29C 49/0005](#) , [B29C 51/002](#) , [B29C 53/005](#) , [B29C 55/005](#) , [B29C 61/003](#) , [B29C 63/0017](#) and **B2965/00S**
- Copolymers are indexed with the same indexing code as the majority polymers

WARNING

The following IPC indexing codes are not being used: [B29K 105/02](#) , [B29K 105/22](#) , [B29K 105/28](#) , [B29K 105/30](#) , [B29K 105/32](#) and [B29K 105/34](#)
 The aspect of [B29K 105/02](#) is covered by [B29K 2995/0064](#) The aspect

of [B29K 105/22](#) is covered by [B29K 705/00](#) The aspect of [B29K 105/28](#) is covered by [B29K 2995/0025](#) The aspect of [B29K 105/30](#) is covered by [B29K 2995/003](#) The aspect of [B29K 105/32](#) is covered by [B29K 2995/0026](#) The aspects of [B29K 105/34](#) are covered by [B29K 2995/002](#) , [B29K 2995/0007](#) and [B29K 2995/0015](#) Subclass indexes Compositions for moulding materials, condition, form or state of moulded material: **B29K1/00 - B29K105/00** Compositions for reinforcements: **B29K201/00 - B29K313/00** Compositions for fillers: **B29K401/00 - B29K511/00** Compositions for preformed parts: **B29K601/00 - B29K713/00** Compositions for moulds: **B29K801/00 - B29K913/00** Properties of moulding materials, reinforcements, fillers, preformed parts or moulds: **B29K995/00** Compositions for moulding materials; Condition, form or state of moulded material

From the date indicated below, the following groups have been deleted from the classification scheme. The documents of these groups have been transferred to the new groups as follows :

[B29K 105/28](#) transferred to [B29K 2995/0025](#)

[B29K 105/30](#) transferred to [B29K 2995/003](#)

[B29K 105/32](#) transferred to [B29K 2995/0026](#)

[B29K 105/34](#) transferred to [B29K 2995/002](#) , [B29K 2995/0007](#) , **B29K00D4**

B29K 2427/18	• • PTFE, i.e. polytetrafluorethene{(-as such C08L 27/18 -), e.g. ePTFE, i.e. expanded polytetrafluorethene, Gore Tex (R)}
B29K 2429/00	Use of polyvinylalcohols, polyvinylethers, polyvinylaldehydes, polyvinylketones or polyvinylketals {or derivatives thereof}, as filler{(-as such C08L 29/00-)}
B29K 2429/04	• {PVOH, i.e. polyvinyl alcohol (-as such C08L 29/04 ; B29K 2431/04 takes precedence-)}
B29K 2431/00	Use of polyvinylesters {or derivatives thereof} as filler{(-as such C08L 31/00-)}
B29K 2431/04	• {Polymers of vinyl acetate, e.g. PVAc, i.e. polyvinyl acetate (-as such C08L 31/04 -)}
B29K 2433/00	Use of polymers of unsaturated acids or derivatives thereof as filler{(-as such C08L 33/00-)} (-B29K 435/00 takes precedence-)
B29K 2433/04	• Polymers of esters{(-as such C08L 33/04 -)}
B29K 2433/08	• • {Polymers of acrylic acid esters, e.g. PMA, i.e. polymethylacrylate (-as such C08L 33/08 -)}

- B29K 2433/12 • {Polymers of methacrylic acid esters, e.g. PMMA, i.e. polymethylmethacrylate} (-as such [C08L 33/12](#)-)}
- B29K 2433/18 • Polymers of nitriles{(-as such [C08L 33/18](#)-)}
- B29K 2433/20 • • PAN, i.e. polyacrylonitrile{(-as such [C08L 33/20](#)-)}
- B29K 2435/00 Use of polymers of unsaturated polycarboxylic acids {or derivatives thereof}as filler{(-as such [C08L 35/00](#)-)}**
- B29K 2439/00 {Use of polymers with unsaturated aliphatic radicals and with a nitrogen or a heterocyclic ring containing nitrogen in a side chain or derivatives thereof, as filler} (-as such [C08L 39/00](#)-)}**
- B29K 2439/06 • {Polymers of N-vinyl-pyrrolidones} (-as such [C08L 39/06](#)-)}
- B29K 2439/08 • {Polymers of vinyl-pyridine} (-as such [C08L 39/08](#)-)}
- B29K 2445/00 Use of polymers of unsaturated cyclic compounds having no unsaturated aliphatic groups in a side-chain, e.g. coumarone-indene resins {or derivatives thereof}, as filler{(-as such [C08L 45/00](#)-)}**
- B29K 2449/00 {Use of polyacetylene or cyanic ester resins, i.e. polymers having one or more carbon-to carbon triple bonds or derivatives thereof, as filler} (-as such [C08L 49/00](#)-)}**
- B29K 2455/00 Use of specific polymers obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in a single one of main groups B29K23/00 to { B29K49/00 , e.g. having a vinyl group }, as filler{(-as such [C08L 55/00](#)-)}**
- B29K 2455/02 • ABS polymers, i.e. acrylonitrile-butadiene-styrene polymers{(-as such [C08L 55/02](#)-)}
- B29K 2459/00 Use of polyacetals {e.g. POM, i.e. polyoxymethylene; or derivatives thereof}, as filler{(-as such [C08L 59/00](#)-)}**
- B29K 2461/00 Use of condensation polymers of aldehydes or ketones {or derivatives thereof}, as filler{(-as such [C08L 61/00](#)-)}**
- B29K 2461/04 • Phenoplasts{(-as such [C08L 61/04](#)-)}
- B29K 2461/20 • Aminoplasts{(-as such [C08L 61/20](#)-)}
- B29K 2463/00 Use of {EP, i.e.}epoxy resins {or derivatives thereof}as filler{(-as such [C08L 63/00](#)-)}**
- B29K 2465/00 {Use of polyphenylenes} (-as such [C08L 65/02](#)-)or polyxylylenes {(-as such [C08L 65/04](#)-), as filler}**
- B29K 2467/00 Use of polyesters {or derivatives thereof}as filler{(-as such [C08L 67/00](#)-)}**
- B29K 2467/04 • {Polyesters derived from hydroxycarboxylic acids} (-as such [C08L 67/04](#)-)}
- B29K 2467/06 • {Unsaturated polyesters} (-as such [C08L 67/06](#)-)}
- B29K 2469/00 Use of {PC, i.e.}polycarbonates {or derivatives thereof}as filler{(-as such [C08L 69/00](#)-)}**
- B29K 2471/00 Use of polyethers,{e.g. PEEK, i.e. polyether-etherketone or PEK, i.e. polyetherketone or derivatives thereof}, as filler{(-as such [C08L 71/00](#)-)}**
- B29K 2471/02 • {Polyalkylene oxides, e.g. PEO, i.e. polyethylene oxide or derivatives thereof} (-as such [C08L 71/02](#)-)}
- B29K 2471/12 • {PPO, i.e. polyphenylene oxide} (-as such [C08L 71/12](#)-); PPE, i.e. polyphenylene ether}

- B29K 2473/00** Use of other polymers having oxygen as the only hetero atom in the main chain, as filler{(-as such [C08L 73/00](#)-)}
- B29K 2475/00** Use of {PU, i.e.}polyureas or polyurethanes {or derivatives thereof}, as filler{(-as such [C08L 75/00](#)-)}
- B29K 2475/02** • Polyureas{(-as such [C08L 75/02](#)-)}
- B29K 2477/00** Use of {PA, i.e.}polyamides, e.g. polyesteramides {or derivatives thereof}, as filler {(-as such [C08L 77/00](#)-)}
- B29K 2477/10** • {Aromatic polyamides (Polyaramides) or derivatives thereof (-as such [C08L 77/10](#)-)}
- B29K 2479/00** Use of polymers having nitrogen, with or without oxygen, or carbon only, in the main chain{ not provided for in groups **B29K461/00** to **B29K477/00** }, as filler{(-as such [C08L 79/00](#)-)}
- B29K 2479/08** • {PI, i.e. polyimides or derivatives thereof (-as such [C08L 79/08](#)-)}
- B29K 2481/00** Use of polymers having sulfur, with or without nitrogen, oxygen, or carbon only, in the main chain, as filler{(-as such [C08L 81/00](#)-)}
- B29K 2481/04** • {Polysulfides, e.g. PPS, i.e. polyphenylene sulfide or derivatives thereof (-as such [C08L 81/04](#)-)}
- B29K 2481/06** • {PSU, i.e. polysulfones; PES, i.e. polyethersulfones or derivatives thereof (-as such [C08L 81/06](#)-)}
- B29K 2483/00** Use of polymers having silicon, with or without sulfur, nitrogen, oxygen, or carbon only, in the main chain, as filler{(-as such [C08L 83/00](#)-)}
- B29K 2485/00** Use of polymers having other elements {than silicon, sulfur, nitrogen, oxygen, and carbon}in the main chain, as filler{(-as such [C08L 85/00](#)-)}
- B29K 2486/00** Use of specific polymers obtained by polycondensation or polyaddition, not provided for in a single one of main groups **B29K459/00** to **B29K485/00** , as filler
- B29K 2489/00** {Use of proteins, e.g. casein, gelatine or derivatives thereof, as filler (-as such [C08L 89/00](#)-)}
- B29K 2491/00** Use of waxes as filler{(-as such [C08L 91/06](#)-)}
- B29K 2493/00** {Use of natural resins (-as such [C08L 93/00](#)-), e.g. shellac (-as such [C08L 93/02](#)-)or derivatives thereof, as filler (-**B29K401/00** , [B29K 2403/00](#) , [B29K 2405/00](#) , **B29K407/00** and [B29K 2489/00](#) take precedence-)}
- B29K 2495/00** Use of bituminous materials, as filler{(-as such [C08L 95/00](#)-)}
- B29K 2496/00** Use of specified macromolecular materials not provided for in a single one of main groups **B29K401/00** - **B29K495/00** , as filler
- B29K 2496/02** • Graft polymers (-**B29K455/02** takes precedence-)
- B29K 2496/04** • Block polymers (-**B29K455/02** takes precedence-)
- B29K 2501/00** Use of unspecified macromolecular compounds as filler (-unspecified rubbers **B29K421/00**-){(-as such [C08L 101/00](#)-)}
- B29K 2509/00** Use of inorganic materials not provided for in groups **B29K503/00** - **B29K507/00** , as filler
- B29K 2511/00** Use of natural products or their composites, not provided for in groups **B29K401/00** - **B29K509/00** , as filler

- B29K 2601/00** Use of cellulose, modified cellulose or cellulose derivatives, e.g. viscose, for preformed parts, e.g. inserts{(-as such [C08L 1/00](#)-)}
- NOTE
Copolymers are indexed with the same indexing code as the majority polymers
- B29K 2601/08 • {Cellulose derivatives}(-as such [C08L 1/08](#)-)}
- B29K 2601/12 • {Cellulose acetate}(-as such [C08L 1/12](#)-)}
- B29K 2601/14 • {Cellulose acetate-butyrate}(-as such [C08L 1/14](#)-)}
- B29K 2601/18 • {Cellulose nitrate}(-as such [C08L 1/18](#)-)}
- B29K 2603/00** Use of {starch or derivatives for preformed parts, e.g. inserts}(-as such [C08L 3/00](#)-)}
- B29K 2605/00** {Polysaccharides or derivatives}(-as such [C08L 5/00](#)-)}
- B29K 2607/00** Use of natural rubber for preformed parts, e.g. inserts{(-as such [C08L 7/00](#)-)}
- B29K 2609/00** Use of rubber derived from conjugated dienes for preformed parts, e.g. inserts{(-as such [C08L 9/00](#)-)}
- B29K 2609/06 • {SBR}, i.e. butadiene-styrene{rubbers}(-as such [C08L 9/06](#)-)}
- B29K 2611/00** Use of {rubber derived from chloroprene for preformed parts, e.g. inserts}(-as such [C08L 11/00](#)-)}
- B29K 2619/00** Use of rubber not provided for in a single one of main groups **B29K607/00** to { [B29K 2611/00](#) }, for preformed parts, e.g. inserts
- B29K 2621/00** Use of {unspecified rubbers for preformed parts, e.g. inserts}(-as such [C08L 21/00](#)-)}
- B29K 2623/00** Use of polyalkenes {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 23/00](#)-)}
- B29K 2623/04 • {Polymers of ethylene}(-as such [C08L 23/04](#)-)}
- B29K 2623/06 • {PE, i.e. polyethylene}(-as such [C08L 23/06](#)-)}
- B29K 2623/08 • {Use of copolymers of ethylene for preformed parts, e.g. inserts}(-as such [C08L 23/08](#) ; [B29K 2623/16](#) takes precedence-)}
- B29K 2623/10 • {Polymers of propylene}(-as such [C08L 23/10](#)-)}
- B29K 2623/12 • {PP, i.e. polypropylene}(-as such [C08L 23/12](#)-)}
- B29K 2623/14 • {Copolymers of polypropylene}(-as such [C08L 23/14](#) ; [B29K 2623/16](#) takes precedence-)}
- B29K 2623/16 • {EPM, i.e. ethylene-propylene copolymers; EPDM, i.e. ethylene-propylene-diene copolymers; EPT, i.e. ethylene-propylene terpolymers}(-as such [C08L 23/16](#)-)}
- B29K 2623/18 • {Polymers of hydrocarbons having four or more carbon atoms, e.g. polymers of butylene (e.g. PB, i.e. polybutylene)(e.g. PB, i.e. polybutylene)}(-as such [C08L 23/18](#)-)}
- B29K 2623/22 • {Copolymers of isobutene, e.g. butyl rubber}(-as such [C08L 23/22](#)-)}
- B29K 2625/00** Use of polymers of vinyl-aromatic compounds {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 25/00](#)-)}
- B29K 2625/04 • {Polymers of styrene}(-as such [C08L 25/04](#)-)}
- B29K 2625/06 • {PS, i.e. polystyrene}(-as such [C08L 25/06](#)-)}
- B29K 2625/08 • {Copolymers of styrene, e.g. AS or SAN, i.e. acrylonitrile styrene}(-as such [C08L 25/08](#) ; **B29K655/02** takes precedence-)}

- B29K 2627/00** Use of polyvinylhalogenides {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 27/00](#)-)}
- B29K 2627/06 • {PVC, i.e. polyvinylchloride (-as such [C08L 27/06](#)-)}
- B29K 2627/08 • {PVDC, i.e. polyvinylidene chloride (-as such [C08L 27/08](#)-)}
- B29K 2627/12 • containing fluorine{(-as such [C08L 27/12](#)-)}
- B29K 2627/14 • • {PVF, i.e. polyvinyl fluoride (-as such [C08L 27/14](#)-)}
- B29K 2627/16 • • {PVDF, i.e. polyvinylidene fluoride (-as such [C08L 27/16](#)-)}
- B29K 2627/18 • • PTFE, i.e. polytetrafluorethene{(-as such [C08L 27/18](#)-), e.g. ePTFE, i.e. expanded polytetrafluorethene, Gore Tex (R)}
- B29K 2629/00** Use of polyvinylalcohols, polyvinylethers, polyvinylaldehydes, polyvinylketones or polyvinylketals {or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 29/00](#)-)}
- B29K 2629/04 • {PVOH, i.e. polyvinyl alcohol (-as such [C08L 29/04](#) ; [B29K 2631/04](#) takes precedence-)}
- B29K 2631/00** Use of polyvinylesters {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 31/00](#)-)}
- B29K 2631/04 • {Polymers of vinyl acetate, e.g. PVAc, i.e. polyvinyl acetate (-as such [C08L 31/04](#)-)}
- B29K 2633/00** Use of polymers of unsaturated acids or derivatives thereof for preformed parts, e.g. inserts{(-as such [C08L 33/00](#)-)} (-[B29K635/00](#) takes precedence-)
- B29K 2633/04 • Polymers of esters{(-as such [C08L 33/04](#)-)}
- B29K 2633/08 • • {Polymers of acrylic acid esters, e.g. PMA, i.e. polymethylacrylate (-as such [C08L 33/08](#)-)}
- B29K 2633/12 • • {Polymers of methacrylic acid esters, e.g. PMMA, i.e. polymethylmethacrylate (-as such [C08L 33/12](#)-)}
- B29K 2633/18 • Polymers of nitriles{(-as such [C08L 33/18](#)-)}
- B29K 2633/20 • • PAN, i.e. polyacrylonitrile{(-as such [C08L 33/20](#)-)}
- B29K 2633/26 • {Polymers of acrylamide or methacrylamide (-as such [C08L 33/26](#)-)}
- B29K 2635/00** Use of polymers of unsaturated polycarboxylic acids {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 35/00](#)-)}
- B29K 2639/00** {Use of polymers with unsaturated aliphatic radicals and with a nitrogen or a heterocyclic ring containing nitrogen in a side chain or derivatives thereof, for preformed parts, e.g. inserts (-as such [C08L 39/00](#)-)}
- B29K 2639/06 • {Polymers of N-vinyl-pyrrolidones (-as such [C08L 39/06](#)-)}
- B29K 2639/08 • {Polymers of vinyl-pyridine (-as such [C08L 39/08](#)-)}
- B29K 2645/00** Use of polymers of unsaturated cyclic compounds having no unsaturated aliphatic groups in a side-chain, e.g. coumarone-indene resins {or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 45/00](#)-)}
- B29K 2649/00** {Use of polyacetylene or cyanic ester resins, i.e. polymers having one or more carbon-to carbon triple bonds or derivatives thereof, for preformed parts, e.g. inserts (-as such [C08L 49/00](#)-)}
- B29K 2655/00** Use of specific polymers obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in a single one of main groups [B29K623/00](#) to { [B29K 2649/00](#) , e.g. having a vinyl group }, for preformed parts, e.g. inserts{(-as such [C08L 55/00](#)-)}

- B29K 2655/02 • ABS polymers, i.e. acrylonitrile-butadiene-styrene polymers{(-as such [C08L 55/02](#)-)}
- B29K 2659/00 Use of polyacetals {e.g. POM, i.e. polyoxymethylene; or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 59/00](#)-)}**
- B29K 2661/00 Use of condensation polymers of aldehydes or ketones {or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 61/00](#)-)}**
- B29K 2661/04 • Phenoplasts{(-as such [C08L 61/04](#)-)}
- B29K 2661/20 • Aminoplasts{(-as such [C08L 61/20](#)-)}
- B29K 2663/00 Use of {EP, i.e.}epoxy resins {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 63/00](#)-)}**
- B29K 2665/00 {Use of polyphenylenes (-as such [C08L 65/02](#)-)or polyxylylenes (-as such [C08L 65/04](#)-), for preformed parts, e.g. inserts}**
- B29K 2667/00 Use of polyesters {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 67/00](#)-)}**
- B29K 2667/04 • {Polyesters derived from hydroxycarboxylic acids (-as such [C08L 67/04](#)-)}
- B29K 2667/06 • {Unsaturated polyesters (-as such [C08L 67/06](#)-)}
- B29K 2669/00 Use of {PC, i.e.}polycarbonates {or derivatives thereof}for preformed parts, e.g. inserts{(-as such [C08L 69/00](#)-)}**
- B29K 2671/00 Use of polyethers,{e.g. PEEK, i.e. polyether-etherketone or PEK, i.e. polyetherketone or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 71/00](#)-)}**
- B29K 2671/02 • {Polyalkylene oxides, e.g. PEO, i.e. polyethylene oxide or derivatives thereof (-as such [C08L 71/02](#)-)}
- B29K 2671/12 • {PPO, i.e. polyphenylene oxide (-as such [C08L 71/12](#)-); PPE, i.e. polyphenylene ether}
- B29K 2673/00 Use of other polymers having oxygen as the only hetero atom in the main chain, for preformed parts, e.g. inserts{(-as such [C08L 73/00](#)-)}**
- B29K 2675/00 Use of {PU, i.e.}polyureas or polyurethanes {or derivatives thereof}, for preformed parts, e.g. inserts{(-as such [C08L 75/00](#)-)}**
- B29K 2675/02 • Polyureas{(-as such [C08L 75/02](#)-)}
- B29K 2677/00 Use of {PA, i.e.}polyamides, e.g. polyesteramides {or derivatives thereof}, for preformed parts, e.g. inserts {((-as such [C08L 77/00](#)-))}**
- B29K 2677/10 • {Aromatic polyamides (Polyaramides) or derivatives thereof (-as such [C08L 77/10](#)-)}
- B29K 2679/00 Use of polymers having nitrogen, with or without oxygen, or carbon only, in the main chain{ not provided for in groups **B29K661/00** to **B29K677/00** }, for preformed parts, e.g. inserts{(-as such [C08L 79/00](#)-)}**
- B29K 2679/08 • {PI, i.e. polyimides or derivatives thereof (-as such [C08L 79/08](#)-)}
- B29K 2681/00 Use of polymers having sulfur, with or without nitrogen, oxygen, or carbon only, in the main chain, for preformed parts, e.g. inserts{(-as such [C08L 81/00](#)-)}**
- B29K 2681/04 • {Polysulfides, e.g. PPS, i.e. polyphenylene sulfide or derivatives thereof (-as such [C08L 81/04](#)-)}
- B29K 2681/06 • {PSU, i.e. polysulfones; PES, i.e. polyethersulfones or derivatives thereof (-as such [C08L 81/06](#)-)}

B29K 2683/00	Use of polymers having silicon, with or without sulfur, nitrogen, oxygen, or carbon only, in the main chain, for preformed parts, e.g. inserts{(as such C08L 83/00 -)}
B29K 2685/00	Use of polymers having other elements{than silicon, sulfur, nitrogen, oxygen, and carbon}in the main chain, for preformed parts, e.g. inserts{(as such C08L 85/00 -)}
B29K 2686/00	Use of specific polymers obtained by polycondensation or polyaddition, not provided for in a single one of main groups B29K659/00 to B29K685/00 , for preformed parts, e.g. inserts
B29K 2689/00	{Use of proteins, e.g. casein, gelatine or derivatives thereof, for preformed parts, e.g. inserts (as such C08L 89/00 -)}
B29K 2691/00	Use of waxes for preformed parts, e.g. inserts{(as such C08L 91/06 -)}
B29K 2693/00	{Use of natural resins (as such C08L 93/00 -), e.g. shellac (as such C08L 93/02 -)or derivatives thereof, for preformed parts, e.g. inserts (- B29K601/00 , B29K 2603/00 , B29K 2605/00 , B29K607/00 and B29K 2689/00 take precedence-)}
B29K 2695/00	Use of bituminous materials, for preformed parts, e.g. inserts{(as such C08L 95/00 -)}
B29K 2696/00	Use of specified macromolecular materials not provided for in a single one of main groups B29K601/00 - B29K695/00 , for preformed parts, e.g. inserts
B29K 2696/02	• Graft polymers (- B29K655/02 takes precedence-)

PRESSES IN GENERAL (-producing ultra-high pressure or ultra-high pressure and high temperature to effect modifications of a substance, e.g. for making artificial diamonds [B01J 3/00](#)){(-compressing means for refuse receptacles [B65F 1/1405](#))}

NOTE

This subclass provides for presses in general and also for those presses, for particular purposes, which are not provided for elsewhere.

U B30B 1/00

Presses, using a press ram, characterised by the features of the drive therefor, pressure being transmitted directly, or through simple thrust or tension members only, to the press ram or platen

B30B 1/02

- by lever mechanism}{(-by toggle mechanism [B30B 1/10](#)-)}

B30B 1/18

- by screw means{(-[B30B 9/3064](#) takes precedence-)}

B30B 1/24

- by rack-and-pinion means{(-[B30B 9/3067](#) takes precedence-)}

B30B 1/30

- by the pull of chains or ropes{(-[B30B 9/3071](#) takes precedence-)}

U B30B 1/32

- by plungers under fluid pressure

B30B 1/34

- • involving a plurality of plungers acting on the platen}{(gas operated [B30B 1/38](#))}

B30B 1/36

- • having telescoping plungers}{(-gas operated [B30B 1/38](#)-)}

U B30B 9/00

Presses specially adapted for particular purposes

B30B 9/02

- for squeezing-out liquid from liquid-containing material, e.g. juice from fruits, oil from oil-containing material}{(kitchen equipment [A47J](#); filtering, e.g. straining solids from liquids, using presses in combination with filtering elements [B01D](#); expelling water from textile fabrics or laundry [D06C](#), [D06F](#); drying [F26](#)){ clothes presses [D06F 69/00](#) , [D06F 71/00](#)-}

B30B 9/28

- for forming shaped articles}{(-from material in powder, granular, or paste form, e.g. briquetting presses [B30B 11/00](#)-)}

B30B 9/30

- for baling; Compression boxes therefor}{(-baling hay, straw, or the like [A01F](#)-)}

B30B 11/00

Presses specially adapted for forming shaped articles from material in particulate or plastic state, e.g. briquetting presses, tableting presses}{(-for clay or mixtures containing cement [B28B](#) ; for plastics materials [B29](#)-)}

B30B 11/004

- {involving the use of very high pressures,(-for the formation of artificial diamonds or boronitrides [B01J 3/065](#)-)}

B30B 11/22

- Extrusion presses; Dies therefor}{(-extruding by the use of roller-and-ring machines [B30B 11/20](#)-)}

B30B 12/00

Presses not provided for in groups [B30B 1/00](#) to [B30B 11/00](#)

B30B 15/00

Details of, or accessories for, presses; Auxiliary measures in connection with pressing}{(-safety devices [F16P](#)-)}

B30B 15/0088

- {Lubricating means}{(-[B30B 15/0011](#) takes precedence-)}

B30B 15/0094

- {Press load monitoring means}{(-[B30B 15/281](#) takes precedence-)}

B30B 15/02

- Dies; Inserts therefor; Mounting thereof; Moulds}{(-extrusion dies [B30B 11/22](#)-)}

U B30B 15/04

- Frames; Guides

B30B 15/047

- • {C-shaped frames}{(-with means for preventing deflection [B30B 15/044](#)-)}

B30B 15/10

- Brakes specially adapted for presses}{(-brakes in general [F16D](#)-)}

B30B 15/12

- Clutches specially adapted for presses}{(-clutches in general [F16D](#)-)}

B30B 15/16

- Control arrangements for fluid-driven presses}{(-pumps per se [F04](#) ; hydraulic accumulators per se [F15B](#) ; valves per se [F16K](#) ; control devices in general [G05](#)-)}

- B30B 15/168
- U B30B 15/28
 - {for pneumatically driven presses (~~B30B 15/165~~ takes precedence)}
 - Arrangements for preventing distortion of, or damage to, presses or parts thereof
- B30B 15/281
 - {overload limiting devices (~~in general F16H 35/10~~)}

Project: N/A (B31B)

- U B31B 1/00

Box, carton, envelope or bag making machinery characterised by performing specific operations (machinery for performing operations of general application, see the appropriate subclasses)

NOTE

Envelope or bag making machinery characterised by performing specific operations is classified in the respective subgroups of group [B31B 19/00](#) (or of groups [B31B 23/00](#) to [B31B 29/00](#), [B31B 37/00](#) to [B31B 41/00](#))
- U B31B 1/14
 - Cutting, e.g. perforating, punching, slitting, trimming {(means for removing cut-out material or waste [B26D 7/18](#))}
- B31B 1/20
 - Cutting sheets or blanks {e.g. cutting corners, or involving scoring or printing or embossing (~~surface scoring per se [B31B 1/25](#); printing or embossing per se [B31B 1/88](#)~~)}
- U B31B 5/00

Machinery characterised by making boxes or cartons by folding single-piece sheets which can be set-up from a collapsed condition, including setting-up and recollapsing to break creases
- U B31B 5/74
 - and having means for effecting auxiliary operations
- U B31B 5/76
 - Opening or distending flattened articles {e.g. collapsed blanks, including arrangements therefor; Setting-up of boxes}
- B31B 5/80
 - pneumatically {i.e. with suction cups for totally or partially opening the collapsed blanks or by introducing a jet of gas into the collapsed blanks, e.g. with means for recollapsing or breaking creases}
- B31B 29/00

Machinery characterised by making envelopes or bags with structural provision at the base for thickness or contents (~~B31B31/00 to B31B 37/00~~ take precedence; {~~B31B31/00~~, ~~B31B33/00~~, ~~B31B35/00~~ takes precedence})

Project: N/A (B31D)

- U B31D 1/00

Multiple-step processes for making flat articles; {Making flat articles}
- B31D 1/0006
 - ~~{the articles being coffee filters}~~
- B31D 1/0018
 - ~~{the articles being pull-tap closure discs for bottles, jars or like containers}~~
- U B31D 1/0043
 - {the articles being box parts not otherwise provided for}
- B31D 1/005
 - ~~{making bottoms or caps}~~
- U B31D 1/02
 - the articles being labels or tags (means and processes for attaching threads [D05](#))

NOTE

Attaching threads to labels or tags is classified in group [B31D 1/02](#), e.g. [B31D 1/023](#)
- B31D 1/021
 - ~~{Making adhesive labels having a multilayered structure, e.g. provided on carrier webs}~~
- B31D 1/028
 - ~~{Applying RFID chips}~~

U B31D 5/00

Multiple-step processes for making three-dimensional articles; { Making three-dimensional articles}(assembly { or manufacture} of garlands [A41G 1/04](#); making receptacles or containers [B31B](#); making tubes [B31B](#), [B31C](#))

NOTE

Making drinking straws is classified in group [B31D 5/00](#), e.g. [B31D 5/0095](#)

- B31D 5/0004 . {for making inserts, e.g. partitions, for boxes}
- B31D 5/0008 . . {the inserts having recesses for holding ampoules}
- B31D 5/0013 . . {the inserts having interengaged slotted panels}
- B31D 5/0017 . . . {involving folding one of the panels into an U-shape}
- B31D 5/0021 . . {the inserts having the form of a tray}
- B31D 5/0026 . . {involving collapsing or stacking the inserts}
- B31D 5/003 . . {the inserts being egg carton fillers}
- B31D 5/0034 . {for making valve inserts for bags}
- B31D 5/0039 . {for making dunnage or cushion pads}
- B31D 5/0043 . . {including crumpling flat material}
- B31D 5/0047 . . . {involving toothed wheels}
- B31D 5/0052 . . . {involving rollers}
- B31D 5/0056 . . . {involving belts}
- B31D 5/006 . . {including controlled deformation of flat material, e.g. pleating, corrugating or embossing (including crumpling flat material [B31D 5/0043](#))}
- B31D 5/0065 . . {including slitting and expanding flat material}
- B31D 5/0069 . . {including forming or transforming three-dimensional material, e.g. corrugated webs or material of cellular structure (making articles of cellular structure [B31D 3/00](#), corrugating paper or cardboard [B31F 1/20](#))}
- B31D 5/0073 . . {including pillow forming}
- B31D 5/0078 . . . {and filling with a material other than air or gas}

Project: N/A (B31F)**U B31F 1/00**

Mechanical deformation of paper or cardboard without removing material including combined deformation and laminating (embossing combined with application of ink, type marking presses, selective embossing machines [B41F](#), [B41J](#), [B41K](#), [B41M](#); machines or apparatus for embossing decorations or marks [B44B 5/00](#); artists hand tools for embossing [B44B 11/04](#); producing decorative effects by processes for stamping ornamental designs on surfaces [B44C 1/24](#); mechanical deformation during paper or board making, kinds of paper or board [D21](#))

- U B31F 1/20 . Corrugating; Corrugating combined with laminating to other paper or cardboard layers ({corrugating sheet metal [B21D 13/00](#); corrugating plastics material [B29C 53/22](#);} corrugating veneer [B27D](#))
- U B31F 1/24 . . Making webs in which the channel of each corrugation is transverse to the web feed
- B31F 1/26 . . . by interengaging toothed cylinders {cylinder constructions-([B31F 1/242](#) takes precedence)}
- B31F 1/29 . . . by making use of rods, e.g. co-operating with a toothed cylinder {combined with uniting the corrugated web to flat webs-([B31F 1/30](#) takes precedence)}
- B31F 1/36 . Moistening and heating webs to facilitate mechanical deformation and drying deformed webs({-during corrugating [B31F 1/28](#))}

B31F 5/00

Attaching together paper or cardboard sheets, strips, or webs; {or other preformed paper articles joining by rim-rolling [B31F 1/0041](#), [B31F 1/009](#); closing tube ends by inserting an element [B31F 1/008](#), making boxes [B31B](#)} Reinforcing edges of paper or cardboard (means for applying adhesive or glue [B05C](#); stapling in box or like making [B31B](#); attaching the replacement web to the expiring web during web-roll changing [B65H 19/18](#); apparatus for splicing webs during handling [B65H 21/00](#))

Project: N/A (B32B)

B32B 3/00

Layered products comprising a layer with external or internal discontinuities or unevennesses, or a layer of non-planar form {(-fibrous or filamentary layers [B32B 5/02](#) ; particulate layers [B32B 5/16](#) ; foamed layers [B32B 5/18](#) -)} Layered products having particular features of form (-receptacles or tubular products [B32B 1/00](#) -)}

B32B 3/02

- characterised by features of form at particular places, e.g. in edge regions {(-non-uniform thickness [B32B 3/263](#) -)}

B32B 3/04

- • characterised by {at least one} layer folded at the edge, e.g. over another layer {; characterised by at least one layer enveloping or enclosing a material}

B32B 3/08

- • characterised by added members at particular parts {(-layer formed of separate pieces of material which are juxtaposed side-by-side [B32B 3/14](#) , [B32B 3/18](#) -)}

U B32B 3/10

- characterised by a discontinuous layer, i.e. formed of separate pieces of material

NOTE

In this group, a series of spaced separate elements forming in effect a broken surface should be regarded as a layer.

B32B 3/14

- • characterised by a face layer formed of separate pieces of material {which are juxtaposed side-by-side {(-[B32B 5/02](#) takes precedence -)}

B32B 3/18

- • characterised by an internal layer formed of separate pieces of material {which are juxtaposed side-by-side {(-[B32B 5/02](#) takes precedence -)}

B32B 3/26

- characterised by a particular shape of the outline of the cross-section of a continuous layer; characterised by a layer with cavities or internal voids {(-[B32B 27/205](#) takes precedence; foam layer [B32B 15/08](#) -)}; {characterised by an apertured layer}

B32B 3/266

- • {characterised by an apertured layer, the apertures going through the whole thickness of the layer, e.g. expanded metal, perforated layer, slit layer regular cells [B32B 3/12](#) }

B32B 3/28

- • characterised by a layer comprising a deformed thin sheet {, i.e. the layer having its entire thickness deformed out of the plane}, e.g. corrugated, crumpled {(-[B32B 29/08](#) takes precedence -)}

B32B 3/30

- • characterised by a layer formed with recesses or projections, e.g. {hollows, grooves, protuberances, ribs {(-apertured layer [B32B 3/266](#) ; layer with cavities or internal voids [B32B 3/26](#) -)}

U B32B 5/00

Layered products characterised by the non-homogeneity or physical structure {, i.e. comprising a fibrous, filamentary, particulate or foam layer; Layered products characterised by having a layer differing constitutionally or physically in different parts}

NOTE

In this group, fibres, filaments, granules, or powder forming or included in a layer may be impregnated, bonded together, or embedded in a substance such as synthetic resin. If the substance of the fibres, or the like, or the impregnating,

bonding, or embedding substance, is important it is classified in the relevant group for the substance.

- B32B 5/02
 - characterised by structural features of a {fibrous or filamentary layer (-B32B 15/02 , B32B 21/02 take precedence; layer formed of particles B32B 5/16 ; layers formed of natural mineral fibres B32B 19/00 ; coated or impregnated fibrous or filamentary layers B32B 2255/02 or B32B 2260/021-)}
- B32B 5/06
 - • characterised by a fibrous {or filamentary}layer {mechanically connected, e.g. by needling, sewing, stitching, hydroentangling, hook and loop-type fasteners}to another layer, e.g. of fibres, of paper
- B32B 5/10
 - • characterised by a fibrous {or filamentary}layer reinforced with filaments
- B32B 5/12
 - • characterised by the relative arrangement of fibres or filaments of {different layers, e.g. the fibres or filaments being parallel or perpendicular to each other}
- B32B 5/16
 - characterised by features of a layer formed of particles, e.g. chips, powder{, granules (-B32B 21/02 takes precedence; layers formed of natural mineral particles B32B 19/00 ; coated or impregnated particulate layers B32B 2255/04 or B32B 2260/025-)}
- B32B 5/18
 - characterised by features of a layer {of}foamed material
- B32B 5/22
 - characterised by the presence of two or more layers which {are next to each other and are fibrous, filamentary, formed of particles or foamed (-B32B 19/06 , B32B 19/048 B32B 19/047 , B32B 29/005 to B32B 29/04 take precedence-)}
- U B32B 5/24
 - • one layer being a fibrous or filamentary layer
- B32B 5/26
 - • • another layer {next to it also being fibrous or filamentary (-relative arrangement of fibres or filaments of different layers B32B 5/12 ; all layers being fibrous or filamentary B32B 2250/20 ; two or more impregnated fibrous or filamentary layers B32B 2260/023-)}
- B32B 5/30
 - • one layer {being formed of particles, e.g. chips,}granules, powder
- U **B32B 7/00**

Layered products characterised by the relation between layers, i.e. products comprising layers having different physical properties and products characterised by the interconnection of layers
- B32B 7/005
 - {in respect of orientation of features (-B32B 5/12 takes precedence-)}
- U B32B 7/04
 - characterised by the connection of layers
- B32B 7/045
 - • {the layers being not connected over the whole surface, e.g. discontinuous connection, patterned connection (-B32B 7/14 takes precedence-)}
- B32B 7/08
 - • by mechanical connection, e.g. stitching((-B32B 5/06 takes precedence-)}
- U B32B 7/12
 - • using an adhesive{, i.e. any interposed material having adhesive or bonding properties}
- B32B 7/14
 - • • applied in strips or other spaced arrangement
- B32B 9/00**

Layered products comprising a particular substance not covered by groups B32B 11/00 to B32B 29/00
- B32B 9/005
 - {comprising one layer of ceramic material, e.g. porcelain, ceramic tile (-layered products with at least two ceramic layers composed mainly of ceramic B32B 18/00-)}
- B32B 9/04
 - comprising such {particular substance as the main or only constituent of a layer, which is next to another layer of the same or of a different material (-B32B 17/06 takes precedence; layered products with at least two ceramic layers composed mainly of ceramic B32B 18/00-)}
- B32B 11/00**

Layered products comprising {a layer of}bituminous or tarry substances
- B32B 11/02
 - with fibres or particles {being present as additives in the layer}

B32B 11/04	<ul style="list-style-type: none"> comprising such {bituminous or tarry substance as the main or only constituent of a layer, which is next to another layer of the same or of a different material} (-B32B 17/06 takes precedence-)
B32B 13/00	Layered products comprising a {a layer of}water-setting substance, e.g. concrete, plaster, asbestos cement, or like builders` material
B32B 13/02	<ul style="list-style-type: none"> with fibres or particles {being present as additives in the layer}
B32B 13/04	<ul style="list-style-type: none"> comprising such {water setting substance as the main or only constituent of a layer, which is next to another layer of the same or of a different material} (-B32B 17/06 takes precedence-)
B32B 15/00	Layered products comprising {a layer of}metal
B32B 15/01	<ul style="list-style-type: none"> all layers being exclusively metallic{ making layered metal workpieces by pressure cladding B23K 20/22 ; making coatings with a metallic material characterised by its composition C23C 30/00-}
B32B 15/04	<ul style="list-style-type: none"> comprising metal as the main or only constituent of a layer,{which is next to another layer of the same or of a different material} (-B32B 17/061 and B32B 23/042 take precedence; next to a bituminous or tarry layer B32B 11/08 ; next to a water-setting substance layer B32B 13/06-)}
B32B 15/043	<ul style="list-style-type: none"> {of metal} (-B32B 15/01 takes precedence-)}
B32B 15/06	<ul style="list-style-type: none"> {of {natural rubber or synthetic}rubber
B32B 15/18	<ul style="list-style-type: none"> comprising iron or steel{(-B32B 15/011 , B32B 15/012 and B32B 15/013 take precedence-)}
B32B 15/20	<ul style="list-style-type: none"> comprising aluminium or copper{(-B32B 15/016 and B32B 15/017 take precedence-)}
U B32B 17/00	Layered products essentially comprising sheet glass, or glass, slag, or like fibres
B32B 17/06	<ul style="list-style-type: none"> comprising glass as the main or only constituent of a layer, next to another layer of a specific {material} (-coating on glass C03C 17/00 ; safety glazings B32B 17/08 or B32B 17/10 ; fire protective glazing with intumescent layers B32B 17/069-)}
B32B 17/064	<ul style="list-style-type: none"> {synthetic resin} (-B32B 17/10 takes precedence-)}
B32B 17/069	<ul style="list-style-type: none"> {intumescent layers} (-B32B 17/10311 takes precedence-)}
B32B 17/08	<ul style="list-style-type: none"> {of cellulosic plastic substance {or gelatin}}
B32B 17/10	<ul style="list-style-type: none"> {of synthetic resin}{(-producing optical elements from plastics B29D 11/00 ; constructional form of optical elements G02B-)}
NOTE	
<p>1. In this group a layer of organic glass is not considered as a glass layer but as a synthetic resin layer];</p> <p>2. [N: Inventions related to safety glazings (laminated glazings) are classified in all appropriate subgroups B32B 17/10009 to B32B 17/10807, whereby transparent polymeric layers other than the interlayer (B32B 17/1055) are classified using indexing codes</p>	
U B32B 17/10009	<ul style="list-style-type: none"> {characterized by the number, the constitution or treatment of glass sheets}
U B32B 17/10036	<ul style="list-style-type: none"> {comprising two outer glass sheet}

U B41F 7/20

- Details

U B41F 7/24

- • Damping devices

B41F 7/37

- • • with supercooling for condensation of air moisture (-cooling forme or impression cylinders [B41F 13/22](#) ; { cooling ink or ink rollers [B41F 31/002](#) })

B41F 7/40	<ul style="list-style-type: none"> • • • Devices for tripping or lifting damping rollers; Supporting, adjusting, or removing arrangements therefor (—such arrangements or devices for inking rollers B41F 31/30—)
U B41F 9/00	Rotary intaglio printing presses
B41F 9/002	• {Sheet printing presses (— B41F 9/021 takes precedence—)}
B41F 9/003	• {Web printing presses (— B41F 9/023 takes precedence—)}
B41F 9/009	• {Reversible printing presses (— B41F 9/02 takes precedence—)}
B41F 9/01	• for indirect printing (— B41F 9/02 takes precedence—)
U B41F 11/00	Rotary presses or machines having forme cylinder carrying a plurality of printing surfaces, or for performing letterpress, lithographic, or intaglio processes selectively or in combination
B41F 11/02	• for securities (—security printing B41M 3/14 —)
U B41F 13/00	Common details of rotary presses or machines
B41F 13/0008	• {Driving devices (— B41F 13/004 and B41F 13/008 take precedence—)}
U B41F 13/008	• Mechanical features of drives, e.g. gears, clutches
B41F 13/012	• • Taking-up backlash (—devices for taking-up backlash in general F16H 55/00 , e.g. F16H 55/18 —)}
B41F 13/02	• Conveying or guiding webs through presses or machines (—web handling in general B65H , e.g. step-by-step advancement B41F 21/00 , turning or reversing B65H 23/32 —)
U B41F 13/08	• Cylinders
U B41F 13/10	• • Forme cylinders
B41F 13/11	• • • Gravure cylinders (—attaching cylindrical formes B41F 27/105 —)}
B41F 13/193	• • Transfer cylinders; Offset cylinders (—attaching blankets B41F 30/04 —)}
B41F 13/48	• Arrangements to enable printing to be effected over selected areas of a single forme cylinder (—by inking selected areas B41F 31/18 —)
B41F 13/54	• Auxiliary folding, cutting, collecting, or depositing of sheets or webs (—in general B26D , B65H —)
B41F 13/64	• • Collecting (—gathering sheets or signatures in bookbinding B42C 1/00 —)
B41F 15/00	Screen printers (—for selective printing B41J 2/005—)
U B41F 15/14	• Details
B41F 15/44	• • squeegees or doctors (—doctors of rotary intaglio printing presses B41F 9/10 —) { for photographic purposes G03D 15/00 —}
B41F 16/00	Transfer printing apparatus (apparatus or machines for applying decalcomanias B65C)
B41F 17/00	Printing apparatus or machines of special types or for particular purposes, not otherwise provided for (—hand stamps, plier-like tools for printing or punching tickets or the like B41K; addressographs or other office printing equipment B41L; coding or marking of packaging material or of completed packages in packaging machines B65B 61/00; ticket printing and issuing apparatus G07B—)
B41F 17/003	• {Special types of machines for printing textiles (—using the screen printing process B41F 15/00 ; printing on knitted fabrics B41F 17/38 —)}
B41F 19/00	Apparatus or machines for carrying out printing operations combined with other operations (—auxiliary perforating apparatus associated with printing devices B41G 7/00; coding or marking in association with packaging B65B 61/00; label dispensers having printing equipment B65C—)

B41F 19/02	• with embossing (printing with a printer's forme combined with embossing B41M 1/24)
B41F 19/08	• simultaneous moulding and printing
B41F 21/00	Devices for conveying sheets through printing apparatus or machines (through platen presses B41F 1/28 ; feeding sheets to or from printing apparatus or machines B65H ; { through manifolding apparatus or the like B41L 21/00)}
B41F 21/02	• Pins (B41F 21/12 , B41F 21/14 take precedence)
B41F 21/04	• Grippers ({ B41F 21/08 , B41F 21/10 } B41F 21/12 , B41F 21/14 take precedence)
B41F 21/05	• • In-feed grippers (B41F 21/06 takes precedence)
U B41F 21/10	• Combinations of transfer drums and grippers
B41F 21/102	• • {with pneumatic means (B41F 21/108 takes precedence)}
B41F 21/104	• • {Gripper details (B41F 21/102 takes precedence)}
B41F 22/00	Means preventing smudging of machine parts or printed articles (B41F 23/00 takes precedence)
B41F 23/00	Devices for treating the surfaces of sheets, webs, or other articles in connection with printing (cleaning in general B08B ; as a final step in the manufacture of such articles, see appropriate subclasses, e.g. B29C 71/00 , D21H 23/00 or D21H 25/00 ; { in manifolding apparatus or the like B41L 23/00 } ; surface treatment in general B44D , of metal C23G)
B41F 23/02	• by dampening (in rotary lithographic machines B41F 7/24) (B41F 23/005 takes precedence)
B41F 23/04	• by heat drying, by cooling, by applying powders (B41F 23/005 takes precedence)
B41F 23/0403	• • {Drying webs (B41F 23/0486 takes precedence)}
B41F 23/0406	• • • {by radiation (B41F 23/0436 takes precedence)}
B41F 23/0416	• • • {by conduction (B41F 23/0436 takes precedence)}
B41F 23/0423	• • • {by convection (B41F 23/0436 takes precedence)}
B41F 23/044	• • {Drying sheets, e.g. between two printing stations (B41F 23/0486 takes precedence)}
B41F 23/0476	• • {Cooling (B41F 23/0483 takes precedence)}
B41F 23/08	• Print finishing devices, e.g. for glossing prints (B41F 23/005 takes precedence)
B41F 25/00	Devices for pressing sheets or webs against cylinders, e.g. for smoothing purposes (apparatus for taking-out curl from webs in general B65H 23/34)
B41F 27/00	Devices for attaching printing elements or formes to supports (attaching by chemical means B41N 6/00)
B41F 30/00	Devices for attaching coverings or make-ready devices; Guiding devices for coverings (make-ready devices B41N 6/00 ; blankets or like coverings B41N 10/00)
B41F 31/00	Inking arrangements or devices (inking units for platen presses B41F 1/40 ; for cylinder presses B41F 3/81 ; { for rotary intaglio printing presses B41F 9/061 } ; applying liquids or other fluent materials to surfaces in general B05 ; inking arrangements or devices for typewriters or selective printing mechanisms B41J)
B41F 31/02	• Ducts, containers, supply or metering devices (level control in general G05D 9/00)

- B41F 31/10
 - Applications of feed or duct rollers ~~(-messenger or moving transfer rollers [B41F 31/14](#)-)~~
- B41F 31/13
 - Means for driving fountain rollers ~~(-[B41F 13/12](#) takes precedence-)~~
- B41F 31/26
 - Construction of inking rollers ~~(-inking-rollers serving also to apply ink repellent in rotary lithographic machines [B41F 7/36](#)-)~~
- U B41F 31/30
 - Arrangements for tripping, lifting, adjusting, or removing inking rollers; Supports, bearings, or forks therefor
- B41F 31/304
 - {Arrangements for inking roller bearings, forks or supports ~~(-[B41F 31/301](#) takes precedence-)~~}
- B41F 31/32
 - Lifting or adjusting devices ~~(-for damping rollers [B41F 7/40](#)-)~~
- B41F 33/00**

Indicating, counting, warning, control, or safety devices ~~(-ink supply or metering devices [B41F 31/02](#) ; such devices in general, see the relevant subclasses, e.g. counting in general [G06M](#)-)~~
- B41F 33/02
 - Arrangements of indicating devices, e.g. counters ~~(-arrangements of counting devices in platen presses [B41F 1/00](#) , e.g. [B41F 1/58](#) ; in cylinder presses [B41F 3/84](#) ; in typewriters or selective printing mechanisms [B41J 29/20](#)-){ in manifolding apparatus or the like [B41L 39/00](#)-}~~
- B41F 33/04
 - Tripping devices or stop-motions ~~({ tripping devices for doctor blades [B41F 9/1027](#) } ; cylinder-tripping devices of rotary presses or machines [B41F 13/24](#) ; arrangements for tripping inking rollers [B41F 31/30](#)-)~~
- B41F 33/18
 - Web break detection ~~(-[B41F 33/04](#) takes precedence-)~~
- B41F 35/00**

Cleaning arrangements or devices{ in manifolding apparatus or the like [B41L 41/00](#)-}
- B41F 35/001
 - {Devices for cleaning parts removed from the printing machines ~~(-[B41F 35/003](#) takes precedence-)~~}

Project: N/A (B41J)

- U B41J 2/00

Typewriters or selective printing mechanisms characterised by the printing or marking process for which they are designed (mounting, arrangement, or disposition of types or dies [B41J 1/00](#); marking methods [B41M 5/00](#); structure or manufacture of heads, e.g. inductive, for recording by magnetisation or demagnetisation of a record carrier [G11B 5/127](#); heads for reproducing capacitive information [G11B 9/07](#))

NOTES

This group covers devices reproducing only a discrete number of tones, whereas group [H04N 1/00](#) covers devices used for the reproduction of documents or the like, which devices are capable of reproducing continuous tone value scales.

In this group, the following expressions are used with the meanings indicated:

 - "ink jet" involves the projection of ink on to the printing material, e.g. paper, through a nozzle as a stream of droplets or particles of colouring matter
 - "continuous ink jet" means a jet of ink transformed into a continuous stream of droplets or particles of colouring matter after having left the nozzle
 - "ink spray" means a spray of ink transported by a stream of charged particles or air on to the printing material
- U B41J 2/005
 - characterised by bringing liquid or particles selectively into contact with a printing material (printing by selective application of impact or pressure on a printing or impression-transfer material [B41J 2/22](#))
- U B41J 2/01
 - Ink jet

U	B41J 2/015	• • • characterised by the jet generation process (B41J 2/215 takes precedence)
U	B41J 2/04	• • • • generating single droplets or particles on demand
U	B41J 2/045	• • • • • by pressure, e.g. electromechanical transducers
	B41J 2/04501	• • • • • {-Control methods or devices therefor, e.g. driver circuits, control circuits}
	B41J 2/04503	• • • • • {-aiming at compensating carriage speed}
	B41J 2/04505	• • • • • {-aiming at correcting alignment}
	B41J 2/04506	• • • • • {-aiming at correcting manufacturing tolerances}
	B41J 2/04508	• • • • • {-aiming at correcting other parameters}
	B41J 2/0451	• • • • • {-for detecting failure, e.g. clogging, malfunctioning actuator}
	B41J 2/04511	• • • • • {-for electrostatic discharge protection}
	B41J 2/04513	• • • • • {-for increasing lifetime}
	B41J 2/04515	• • • • • {-preventing overheating}
	B41J 2/04516	• • • • • {-preventing formation of satellite drops}
	B41J 2/04518	• • • • • {-reducing costs}
	B41J 2/0452	• • • • • {-reducing demand in current or voltage}
	B41J 2/04521	• • • • • {-reducing number of signal lines needed}
	B41J 2/04523	• • • • • {-reducing size of the apparatus}
	B41J 2/04525	• • • • • {-reducing occurrence of cross talk}
	B41J 2/04526	• • • • • {-controlling trajectory}
	B41J 2/04528	• • • • • {-aiming at warming up the head}
	B41J 2/0453	• • • • • {-controlling a head having a dummy chamber}
	B41J 2/04531	• • • • • {-controlling a head having a heater in the manifold}
	B41J 2/04533	• • • • • {-controlling a head having several actuators per chamber}
	B41J 2/04535	• • • • • {-involving calculation of drop size, weight or volume}
	B41J 2/04536	• • • • • {-using history data}
	B41J 2/04538	• • • • • {-involving calculation of heater resistance}
	B41J 2/0454	• • • • • {-involving calculation of temperature}
	B41J 2/04541	• • • • • {-Specific driving circuit}
	B41J 2/04543	• • • • • {-Block driving}
	B41J 2/04545	• • • • • {-Dynamic block driving}
	B41J 2/04546	• • • • • {-Multiplexing}
	B41J 2/04548	• • • • • {-Details of power line section of control circuit}
	B41J 2/0455	• • • • • {-Details of switching sections of circuit, e.g. transistors}
	B41J 2/04551	• • • • • {-using several operating modes}
	B41J 2/04553	• • • • • {-detecting ambient temperature}
	B41J 2/04555	• • • • • {-detecting current}
	B41J 2/04556	• • • • • {-detecting distance to paper}
	B41J 2/04558	• • • • • {-detecting presence or properties of a dot on paper}
	B41J 2/0456	• • • • • {-detecting drop size, volume or weight}
	B41J 2/04561	• • • • • {-detecting presence or properties of a drop in flight}
	B41J 2/04563	• • • • • {-detecting head temperature; Ink temperature}
	B41J 2/04565	• • • • • {-detecting heater resistance}
	B41J 2/04566	• • • • • {-detecting humidity}

B41J 2/04568 {-Control according to number of actuators used simultaneously}
B41J 2/0457 {-Power supply level being detected or varied}
B41J 2/04571 {-detecting viscosity}
B41J 2/04573 {-Timing; Delays}
B41J 2/04575 {-controlling heads of acoustic type}
B41J 2/04576 {-controlling heads of electrostatic type}
B41J 2/04578 {-controlling heads based on electrostatically-actuated membranes}
B41J 2/0458 {-controlling heads based on heating elements forming bubbles}
B41J 2/04581 {-controlling heads based on piezoelectric elements}
B41J 2/04583 {-controlling heads based on discharge by lowering the surface tension of meniscus}
B41J 2/04585 {-controlling heads based on thermal bent actuators}
B41J 2/04586 {-controlling heads of a type not covered by groups B41J 2/04575 - B41J 2/04585 , or of an undefined type}
B41J 2/04588 {-using a specific waveform}
B41J 2/0459 {-Height of the driving signal being adjusted}
B41J 2/04591 {-Width of the driving signal being adjusted}
B41J 2/04593 {-Dot-size modulation by changing the size of the drop}
B41J 2/04595 {-Dot-size modulation by changing the number of drops per dot}
B41J 2/04596 {-Non-ejecting pulses}
B41J 2/04598 {-Pre-pulse}
U B41J 2/135	. . . Nozzles
U B41J 2/14 Structure thereof {only for on-demand ink jet heads}
B41J 2/14427 {-Structure of ink jet print heads with thermal bend detached actuators}
U B41J 2/16 Production of nozzles
B41J 2/1607 {Production of print heads with piezoelectric elements (B41J 2/1606 , B41J 2/162 take precedence)}
U B41J 2/1621 {manufacturing processes}
U B41J 2/164 {thin film formation}
B41J 2/1642 {thin film formation by CVD [<i>chemical vapor deposition</i>]} {chemical vapor-deposition}
B41J 2/1648 {-Production of print heads with thermal bend detached actuators}
U B41J 2/165 Preventing {or detecting} of nozzle clogging, e.g. cleaning, capping or moistening for nozzles
B41J 2/16517 {-Cleaning of print head nozzles (B41J 2/16505 , B41J 2/1707 , B41J 2/1714 take precedence)}
B41J 2/1652 {-by driving a fluid through the nozzles to the outside thereof, e.g. by applying pressure to the inside or vacuum at the outside of the print head}
U B41J 2/16535 {using wiping constructions (B41J 2/16552 takes precedence)}
B41J 2/16541 {-Means to remove deposits from wipers or scrapers}
B41J 2/16585 {-for paper-width or non-reciprocating print heads}- M1104
B41J 2/16588 {-Print heads movable towards the cleaning unit}
U B41J 2/17	. . . characterised by ink handling
U B41J 2/175 Ink supply systems; {Circuit parts therefor}
U B41J 2/17503 {Ink cartridges}

	B41J 2/17533 {-Storage or packaging of ink cartridges}- 0612
U	B41J 2/21	. . . for multi-colour printing
U	B41J 2/2107	. . . {-characterised by the ink properties}
U	B41J 2/2114 {-Ejecting transparent or white coloured liquids, e.g. processing liquids (B41J 2/211 takes precedence)}
	B41J 2/2117 {-Ejecting white liquids}
	B41J 2/2132 {-Print quality control characterised by dot disposition, e.g. for reducing white stripes or banding (methods for local corrections by dot omission, image edge enhancement, or multi-pass mask selection G06K 15/102 ; colour conversion H04N 1/40)}
	B41J 2/2135 {-Alignment of dots (adjustments by bodily moving print heads or carriages B41J 25/001)}
	B41J 2/2139 {-Compensation for malfunctioning nozzles creating dot place or dot size errors}
	B41J 2/2142 {-Detection of malfunctioning nozzles (for cleaning purposes B41J 2/16579 ; jet deflection sensors B41J 2/125)}
	B41J 2/2146 {-for line print heads}
U	B41J 2/315	. characterised by selective application of heat to a heat sensitive printing or impression-transfer material (B41J 2/385 , B41J 2/435 take precedence)
U	B41J 2/32	. . using thermal heads
U	B41J 2/335	. . . Structure of thermal heads
	B41J 2/33505 {-Constructional details}
	B41J 2/3351 {-Electrode layers}
	B41J 2/33515 {-Heater layers}
	B41J 2/3352 {-Integrated circuits}
	B41J 2/33525 {-Passivation layers}
	B41J 2/3353 {-Protective layers}
	B41J 2/33535 {-Substrates}
	B41J 2/3354 {-characterised by geometry}
	B41J 2/33545 {-characterised by dimensions}

VEHICLE TYRES (-manufacture [B29](#)); **TYRE INFLATION; TYRE CHANGING OR REPAIRING; REPAIRING, OR CONNECTING VALVES TO, INFLATABLE ELASTIC BODIES IN GENERAL; DEVICES OR ARRANGEMENTS RELATED TO TYRES** (-testing of tyres [G01M 17/02](#))

NOTES

In this subclass, the term "tyre" is to be understood as a separate ground-engaging, continuous element outside the periphery of the wheel rim and includes the tyre casing, cover, or jacket and any insert, e.g. inner tube. In the groups relating to repair or connection of valves, the term "tyre" is to be understood to include also inflatable elastic bodies other than tyres or inner tubes

Attention is drawn to the note following the title of class [B60](#).

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

B60C 11/113	covered by
B60C 11/0311	
B60C 11/117	covered by
B60C 11/032	

B60C 3/00

Tyres characterised by the transverse section (-characterised by rail-engaging elements [B60B 17/00](#))

B60C 3/04

- characterised by the relative dimensions of the section, e.g. low profile (-[B60C 3/06](#) takes precedence-)

B60C 3/06

- Asymmetric{-asymmetric bead seats [B60C 15/0236](#) ; asymmetric bead reinforcement [B60C 2015/0696](#)-}

B60C 3/08

- collapsible into storage or non-use condition, e.g. space-saving spare tyres (-run-flat tyres [B60C 17/08](#)-)

B60C 5/00

Inflatable pneumatic tyres or inner tubes (-[B60C 1/00](#) , [B60C 9/00](#) to [B60C 17/00](#) take precedence)

B60C 5/004

- {filled at least partially with liquid (-[B60C 19/12](#) takes precedence-)}

B60C 5/02

- having separate inflatable inserts, e.g. with inner tubes; Means for lubricating, venting, preventing relative movement between tyre and inner tube (-[B60C 5/20](#) takes precedence-)

B60C 5/025

- {separated by a part of the tyre (-inflatable inserts with several inflatable chambers [B60C 5/20](#)-)}

B60C 5/04

- • Shape or construction of inflatable inserts (-[B60C 5/10](#) takes precedence-)

B60C 5/12

- without separate inflatable inserts, e.g. tubeless tyres with transverse section open to the rim (-[B60C 5/20](#) takes precedence-)

B60C 5/14

- • with impervious liner or coating on the inner wall of the tyre (-[B60C21/04](#) , [B60C21/08](#) take precedence-)

B60C 5/20

- having multiple separate inflatable chambers (-with additional tubes which become load supporting in emergency [B60C 17/02](#)-)

B60C 7/00

Non-inflatable or solid tyres (-[B60C 1/00](#) takes precedence; tyres or rims characterised by rail engaging elements [B60B 17/00](#))

B60C 7/10

- characterised by means for increasing resiliency (-highly resilient wheels [B60B 9/00](#)-)

B60C 7/12

- • using enclosed chambers, e.g. gas-filled (-inflatable tyres [B60C 5/00](#)-)

 - • • {with additional seals on body side}
- B60J 10/085
 - • {arranged on door side}
- B60J 10/086
 - • • {with additional seals on door side}
- B60J 10/088
 - • • {mounted on, or integral with, the glass-run sealing}
- B60J 10/10
 - for non-fixed roofs, {e.g. foldable roofs, removable hard-tops and tarpaulins-(B60J 10/0002 to B60J 10/0091 take precedence)}
- U B60J 11/00

Removable external protective coverings specially adapted for vehicles or part of vehicles, e.g. parking covers (covering of load on vehicles B60P 7/00; guard strips for body finishing, identifying or decorating B60R 13/04; tents for use as garages E04H 15/00)
- U B60J 11/02
 - Covers wound on rollers
- B60J 11/025
 - • {specially adapted for covering vehicle parts, e.g. for doors, windows or windscreens}

Project: N/A (B60K)

- U B60K 7/00

Disposition of motor in, or adjacent to, traction wheel (roller-skate driving mechanisms A63C 17/12)
- B60K 7/0023
 - {the motor being pneumatic}
- U B60K 17/00

Arrangement or mounting of transmissions in vehicles (clutches per se, e.g. construction thereof, F16D; gearing per se, e.g. construction thereof, F16H)
- U B60K 17/04
 - characterised by arrangement, location, or kind of gearing (electric equipment or propulsion of electrically-propelled vehicles B60L)

- U B60K 17/16
 - • of differential gearing
- B60K 17/18
 - • • in which the differential movement is obtained by resilient means
- B60K 17/20
 - • • in which the differential movement is limited
- U B60K 17/34
 - for driving both front and rear wheels, e.g. four wheel drive vehicles (arrangement or mounting of control devices for changing number of driven wheels [B60K 23/08](#))
- U B60K 17/348
 - • having differential means for driving one set of wheels, e.g. the front, at one speed and the other set, e.g. the rear, at a different speed ([B60K 17/346](#) takes precedence)
- U B60K 17/35
 - • • including arrangements for suppressing or influencing the power transfer, e.g. viscous clutches (differential gearing with locking devices {[F16H1/44](#)})
- B60K 17/352
 - • • manually operated
- B60K 17/358
 - • all driven wheels being steerable
- U B60K 20/00**
Arrangement or mounting of change-speed gearing control devices in vehicles (movable cabs having special adaptations of vehicle control devices [B62D 33/06](#); such control devices per se [F16H](#))
- U B60K 20/02
 - of initiating means (control mechanisms in general [G05G](#))
- B60K 20/14
 - • fluid
- B60K 41/00**
Conjoint control of drive units; ~~Conjoint control of at least two sub-units thereof (arrangement of plural diverse prime-movers for mutual or common propulsion~~[B60K 6/00](#))

NOTES

The control of a single sub-unit is classified in the relevant class for the sub-unit. Where a single sub-unit is controlled by means of signals or commands from other sub-units the control of this single sub-unit is classified in the relevant class for this sub-unit. For instance, the control of variable-ratio gearing by means of signals from the engine or { from another sub-unit influenced by} the accelerator is classified in subclass [F16H](#)

Conjoint control of drive units, e.g. propulsion units, and variable-ratio gearing occurring only transiently during ratio shift and being also characterised by the control of the gearing is classified in subclass [F16H](#)

WARNING

This group and its subgroups are no longer used for the classification of new documents as from January 1st, 2006. The backlog of these groups is being continuously reclassified to the relevant groups of [B60W](#).

• • Attaching seats directly to vehicle chassis

U B60N 2/01508

• • • {using quick release attachments}

U B60N 2/01516

• • • • {with locking mechanisms}

U B60N 2/01525

• • • • • {with locking elements expanding inside or under the vehicle floor or rail}

B60N 2/01533

• • • • • {using balls interlocking with notches (interlocking balls in general [E05B 63/121](#))}

B60N 2/01541

• • • • • {using moving hooks ([B60N 2/01583](#) takes precedence)}

B60N 2/02

• the seat or part thereof being movable, e.g. adjustable ({ [B60N 2/427](#) takes precedence } ; adjustable arm-rests [B60N 2/46](#) ; adjustable head-rests [B60N 2/48](#))

B60N 2/0224

• • {Non-manual adjustment, e.g. with electrical operation ([B60N 2/0296](#) , [B60N 2/52](#) take precedence)}

B60N 2/0284

• • {Adjustable seat-cushion length ([B60N 2/0224](#) takes precedence)}

U B60N 2/04

• • the whole seat being movable

B60N 2/045

• • • {Longitudinal adjustment by means of articulated rods supporting the seat, e.g. parallelogram mechanisms ([B60N 2/38](#) takes precedence)}

B60N 2/06

• • • slidable ([B60N 2/12](#) { [B60N 2/2209](#) } takes precedence)

B60N 2/10

• • • tiltable ({ [B60N 2/2875](#) takes precedence })

B60N 2/14

• • • rotatable, e.g. to permit easy access ({ [B60N 2/2869](#) takes precedence })

U B60N 2/16

• • • height-adjustable

B60N 2/169

• • • • {Stepwise movement mechanisms, e.g. ratchets ([B60N 2/167](#) takes precedence; ratchets in general [G05G 7/06](#))}

U B60N 2/18

• • • • the front or the rear portion of the seat being adjustable, e.g. independently of each other

B60N 2/1896

• • • • • {Stepwise movement mechanisms, e.g. ratchets ([B60N 2/1882](#) takes precedence; ratchets in general [G05G 7/06](#))}

B60N 2/20

• • the back-rest being tiltable, e.g. to permit easy access ({ [B60N 2/0224](#) } , [B60N 2/04](#) , [B60N 2/22](#) , { [B60N 2/3002](#) } take precedence)

B60N 2/22

• • the back-rest being adjustable ({ [B60N 2/2878](#) takes precedence })

B60N 2/2213

• • • {Gear wheel driven mechanism ([B60N 2/2231](#) , [B60N 2/225](#) take precedence)}

- B60N 2/224
 - • • {Stepwise movement mechanisms, e.g. ratchets (~~(-ratchets in general G05G 7/06-)~~)}
- B60N 2/225
 - • • by cycloidal or planetary mechanisms{ transmissions with orbital motion in general F16H 1/28 , F16H 1/32 }
- B60N 2/2251
 - • • • {with gears having orbital motion, e.g. sun and planet gears (~~(in general F16H 1/28-)~~)}
- B60N 2/2252
 - • • • {in which the central axis of the gearing lies inside the periphery of an orbital gear, e.g. one gear without sun gear (~~(in general F16H 1/32-)~~)}
- B60N 2/23
 - • • by {linear actuators, e.g.}linear screw mechanisms
- U B60N 2/24
 - for particular purposes or particular vehicles
- B60N 2/245
 - • {for handicapped persons (~~(-facilitating access or loading of wheelchairs in ambulances A61G 3/00-)~~)}
- B60N 2/26
 - • for children (~~(-B60N 2/30 takes precedence-)~~)
- B60N 2/28
 - • • Seats readily mountable on, and dismountable from, existing seats {or other parts}of the vehicle
- B60N 2/2803
 - • • • {Adaptations for seat belts (~~(-seat belts for children in general B60R 22/105-)~~)}
- U B60N 2/2821
 - • • • {having a seat and a base part}
- B60N 2/2824
 - • • • • {part of the base being supported by the vehicle frame (~~(-B60N 2/289 takes precedence-)~~)}
- B60N 2/2827
 - • • • • {part of the base being supported by the seat sub-frame (~~(-B60N 2/2893 takes precedence-)~~)}
- U B60N 2/2842
 - • • • • {adapted to carry the child, when dismounted from the vehicle}
- B60N 2/2848
 - • • • • {being convertible or adaptable ro a preambulator, e.g. a baby-carriage or a push-chair (~~(-preambulators in general B62B 7/14-)~~)}
- B60N 2/2854
 - • • • • {Children`s cots; Hammocks (~~(-children`s chairs in general A47D 1/00-)~~)}
- B60N 2/2857
 - • • • • {characterised by the peculiar orientation of the child (~~(-B60N 2/2869 takes precedence-)~~)}
- B60N 2/286
 - • • • • {forward facing (~~(-B60N 2/2866 takes precedence-)~~)}
- B60N 2/30
 - • Non-dismountable {or dismountable}seats storable in a non-use position, e.g. foldable spare seats (~~(-convertible for other use B60N 2/32-)~~)
- U B60N 2/3072
 - • • {on a lower level of a multi-level vehicle floor}
- B60N 2/3075
 - • • • {stowed in recess (~~(-B60N 2/3079 takes precedence-)~~)}
- B60N 2/3097
 - • • {Dismountable seats storable in a non-use position (~~(-B60N 2/015 , B60N 2/28 take precedence-)~~)}
- U B60N 2/32
 - • convertible for other use
- B60N 2/34
 - • • into a bed (~~(-sleeping arrangements in caravans B60P 3/38-)~~)
- B60N 2/36
 - • • into a loading platform{ ski-bags in B60R 5/006 , B60N 2/065 takes precedence-}
- B60N 2/42
 - • the seat constructed to protect the occupant from the effect of abnormal g-forces, e.g. crash or safety seats (~~(-B60N 2/26 , B60N 2/46 , B60N 2/48 take precedence-)~~){(~~(-built-in air bags B60R 21/207-)~~)}
- U B60N 2/427
 - • • Seats or parts thereof displaced during a crash
- U B60N 2/42727
 - • • • {involving substantially rigid displacement}
- B60N 2/42745
 - • • • • {of the back-rest (~~(-B60N 2/433 takes precedence; higher part of the back-rest moving together with the headrest B60N 2/4885-)~~)}
- B60N 2/43
 - • • {Safety locks (~~(-for back-rests B60N 2/433-)~~)}
- B60N 2/44
 - Details or parts not otherwise provided for{(~~(-seats in general A47C 7/00 ; storage compartments mounted on or under a seat B60R 7/043-)~~)}

B60N 2/4415	• • {Hydro-pneumatic adjustments of the shape (-for coach-like constructions B60N 2/7082-)}
B60N 2/442	• • {Positioning and locking mechanisms (-B60N 2/16 , B60N 2/18 , B60N 2/22 , B60N 2/225 take precedence-)}
U B60N 2/4435	• • • {rotatable}
B60N 2/4445	• • • {Stepwise movement mechanisms, e.g. ratchets (-ratchets in general G05G 7/06-)}
B60N 2/448	• • {massaging systems (-massaging systems in general A61H 1/00-)}
B60N 2/449	• • {Side-rests (-B60N 2/2872 , B60N 2/4882 take precedence-)}
B60N 2/48	• • Head-rests{ B60N 2/2851 takes precedence-}
B60N 2/4802	• • • {fixed (-B60N 2/487 and B60N 2/4876 take precedence-)}
B60N 2/4805	• • • {movable or adjustable (-B60N 2/4876 takes precedence-)}
B60N 2/4808	• • • • {slidable (-B60N 2/4864 , B60N 2/4867 take precedence-)}
B60N 2/487	• • • {movable to an inoperative position (-B60N 2/4832 , B60N 2/4855 take precedence-)}
B60N 2/4873	• • • • {for rear seats (-B60N 2/4835 , B60N 2/4858 take precedence-)}
B60N 2/4876	• • • {with diverse use, e.g. loud-speakers, magnetic devices, heating or cooling devices (-roll-over protection B60R 21/13-)}
U B60N 2/50	• • Seat suspension devices
B60N 2/502	• • • {attached to the base of the seat (-B60N 2/504 takes precedence-)}
B60N 2/503	• • • {attached to the backrest (-B60N 2/504 takes precedence-)}
U B60N 2/54	• • • using mechanical springs{(springs in general F16F)}
B60N 2/544	• • • • {Compression or tension springs (-B60N 2/542 takes precedence-)}
B60N 2/56	• • Heating or ventilating devices{ heating, cooling, ventilating or other air-treating in vehicles in general B60H 1/00 ; control of temperature in general G05D 23/00 ; ventilation, heating or cooling of chairs in general A47C 7/74 -}
U B60N 2/58	• • Seat coverings
B60N 2/5891	• • • {Manufacturing methods specially adapted therefor (-manufacturing of seat covers in general A47C 3/00-)}
B60N 2/62	• • Thigh-rests{(-B60N 2/4415 takes precedence-)}
B60N 2/64	• • Back-rests {or cushions (-B60N 2/2222 takes precedence-)}
B60N 2/643	• • • {shape of the back-rests (-B60N 2/66 takes precedence-)}
B60N 2/66	• • • Lumbar supports{(-B60N 2/4415 takes precedence; lumbar supports for chairs or stools in general A47C 7/46-)}
U B60N 2/70	• • {Upholstery, e.g.}upholstery springs
B60N 2/7017	• • • {Manufacturing methods specially adapted therefor (-manufacturing of seat upholstery in general A47C 7/00 , shaping of substances in a plastic state in general B29C -)}
U B60N 2/7023	• • • {Coach-like constructions}
U B60N 2/7035	• • • • {Cushions}
U B60N 2/7047	• • • • • {Springs}
B60N 2/7082	• • • • • {with air or fluid cushions (-B60N 2/4415 takes precedence-)}
B60N 2/7088	• • • • • • {with valves (-B60N 2/4415 takes precedence-)}
B60N 3/00	Arrangements or adaptations of other passenger fittings, not otherwise provided for (of radio sets, television sets, telephones,{stowing or holding appliances} , safety belts or the like B60R-)

B60N 3/001	• {of tables or trays (-detachable tables in general with provisions for use in vehicles A47B 31/06 -)}
B60N 3/008	• {of beds (-travelling or camp beds adapted to be used in, or connected to, a vehicle A47C 17/80 -)}
U B60N 3/02	• of hand grips or straps
B60N 3/026	• • {characterised by the fixing means (- B60N 3/023 takes precedence-)}
B60N 3/04	• of floor mats {or carpets}
B60N 3/042	• • {of carpets (- B60N 3/046 , B60N 3/048 take precedence-)}
B60N 3/044	• • {of removable mats (- B60N 3/046 , B60N 3/048 take precedence-)}
B60N 3/06	• of footrests (floors of road vehicles{ B62D 25/20 })
B60N 3/08	• of receptacles for refuse, e.g. ash-trays (-ashtrays per se A24F -)
B60N 3/10	• of receptacles for food or beverages, e.g. refrigerated (-picnic sets A45F -){ cup holders in general A47G 23/02 -}
B60N 3/12	• of receptacles for cigarettes or the like ({ B60N 2/4686 takes precedence } ; receptacles for cigarettes or the like A24F -)
B60N 3/14	• of electrically-heated lighters{ arrangements of lighting devices for vehicle interiors for lighting passenger or driving compartment B60Q 3/02 , igniters using electrically-produced heat F23Q 7/00 -}
B60N 3/16	• of cooking or boiling devices (-cooking of boiling devices per se A47 , F24C -)
B60N 3/18	• of drinking-water {or other beverage}dispensing devices
B60N 5/00	Arrangements or devices on vehicles for entrance or exit control of passengers, e.g. turnstiles (-turnstiles in general E06B 11/08-)

Project: N/A (B60P)

U B60P 1/00	Vehicles predominantly for transporting loads and modified to facilitate loading, consolidating the load, or unloading (vehicles for carrying harvested crops with means for self-loading or self-unloading A01D 90/00; peculiar to refuse collecting-vehicles B65F; loading or unloading vehicles by means not incorporated therein B65G)
U B60P 1/64	• the load supporting or containing element being readily removable ({ B60P 1/48 takes precedence}); caravan, camping, or the like vehicles characterised by living accommodation in the form of a removable body supported by the vehicle unit { B60P 3/34 }
B60P 1/6418	• • {-the load-transporting element being a container or similar}
U B60P 7/00	Securing or covering of load on vehicles ({immobilising the load during lifting a loading platform B60P 1/4457}; for railway vehicles B61D 45/00)
U B60P 7/06	• Securing of load (vehicle retainers B60P 3/073)
U B60P 7/08	• • securing to the vehicle floor or sides ({ B60P 7/065 }, B60P 7/13 , B60P 7/135 take precedence)
U B60P 7/0823	• • • {Straps; Tighteners}
B60P 7/0846	• • • • {-winding up or storing of straps}
B60P 7/0861	• • • • {-Measuring or identifying the tension in the securing element}
B60P 7/0869	• • • • {-Protecting the strap or the load from wear}

Project: N/A (B60Q)**B60Q**

VEHICLE LIGHTING OR SIGNALLING (arrangement of signalling or lighting devices, the mounting or supporting thereof for rail vehicles [B61D](#), for cycles [B62J](#), for ships [B63B](#), for aircrafts [B64D](#); lighting in general, lighting devices per se [F21](#), [H05B](#); signalling in general [G08](#); electric switches per se [H01H](#))

NOTES

This subclass covers also:

- electric signalling of lighting circuits so far as specially arranged in vehicles;
- arrangements or adaptations of lighting switches or signal-initiating means

Attention is drawn to the Note following the title of class [B60](#)

Attention is drawn to the following places :

B60K 28/00	Safety devices, e.g. sleeping driver
B60R 25/00	Anti theft
B62D	Driving assistance
B62D 15/02	Steering aids
B60K 31/0008	Cruise control
F21S 48/00	Lighting devices or systems specially adapted for vehicles
G01S	Infra red night vision
G01S 13/931	Anti Collision
G05D 1/00	Automatic pilot
G06K 9/00	Pattern recognition
G06T 3/00	Image transformation
G06T 5/00	Image enhancement
G06T 7/00	Image analysis
G08B 21/00	Alarms in general
G08G	Traffic control
G08G 1/16	Anti-collision systems
H04N	Television systems

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

B60Q 1/128	covered by	B60Q 1/124
B60Q 1/132	covered by	B60Q 1/124
B60Q 1/136	covered by	B60Q 1/124

B60Q 1/00

Arrangements or adaptations of optical signalling or lighting devices (for lighting vehicle interior [B60Q 3/00](#) ; { circuit arrangements for electric light sources in general [H05B 37/00](#) })

B60Q 1/0005

- {Devices preventing the lights from becoming dirty or damaged (protecting lighting devices from damage in general [F21V 15/00](#)), e.g. protection grids (fastening of grids or protective cages in general [F21V 17/00](#)), cleaning by air flow (windshield wipers for cleaning optical devices of vehicles [B60S 1/04](#))}

B60Q 1/0011

- {with light guides for distributing the light between several lighting or signalling devices (using light guides inside a single device [F21S 8/00](#) , light guides per se [G02B 6/0001](#))}

- B60Q 1/0064
 - {with provision for maintenance, e.g. changing the light bulb (-swivel arrangements [B60Q 1/0425](#) ; fastening of covers [F21S 48/15](#) ; changing light sources in general [F21V 19/04](#) ; fastening of light sources or lamp holders [F21S 48/1104](#) , [F21S 48/211-](#))}
- B60Q 1/007
 - • {via a removable cap (-fastening of the light source by a cap holding the light source [F21S 48/1104](#) , [F21S 48/211-](#))}
- B60Q 1/0076
 - {Switches therefor (-[B60Q 1/1446](#) , [B60Q 1/343](#) , [B60Q 1/40](#) take precedence, arrangements or fitting of control knobs on dashboard [B60K 37/06-](#))}
- B60Q 1/0088
 - {Details of electrical connections (-[B60Q 1/305](#) takes precedence; electrical connectors in general [H01R](#); electrical connection of the light source itself [F21S 48/1109](#) , [F21S 48/212-](#))}
- B60Q 1/0094
 - • {Arrangement of electronic circuits separated from the light source (-e.g. mounting of housings for starter circuits for discharge lamps, circuits per se [H05B](#), arrangements being part of the light source holder [F21V 17/06](#) , [F21S 48/1109](#) , [F21S 48/212-](#))}
- U B60Q 1/02
 - the devices being primarily intended to illuminate the way ahead or to illuminate other areas of way or environments
- U B60Q 1/04
 - • the devices being headlights
- B60Q 1/0408
 - • • {built into the vehicle body, e.g. details concerning the mounting of the headlamps on the vehicle body (-[B60Q 1/0491](#) , [B60Q 1/05](#) take precedence, integrated front ends [B62D 25/00-](#))}
- B60Q 1/0433
 - • • • {the housing being fastened onto the vehicle body using screws (-adjustable headlamp by rotation of a screw [B60Q 1/0683-](#))}
- B60Q 1/045
 - • • • {with provision for adjusting the alignment of the headlamp housing with respect to the vehicle body (-adjusting the light beam [B60Q 1/06-](#))}
- B60Q 1/0458
 - • • • {the front cover being directly mounted onto the vehicle body (-mounting the cover on the housing [F21S 48/15-](#))}
- B60Q 1/0491
 - • • {Shock absorbing devices therefor (-resilient mounting of lighting devices in general [F21V 15/04](#) ; shock absorbing devices in general [F16F 15/04-](#))}
- B60Q 1/06
 - • • adjustable, e.g. remotely controlled from inside vehicle (-[B60Q 1/05](#) takes precedence; { changing the characteristics or distribution of the light by adjustment of parts, e.g. reflectors, light sources, lenses, screens [F21V 14/00](#) })
- B60Q 1/076
 - • • • by electrical means {including means to transmit the movements, e.g. shafts or joints}
- U B60Q 1/08
 - • • • automatically
- B60Q 1/085
 - • • • • [due to special conditions, e.g. adverse weather, type of road, badly illuminated road signs or potential dangers (-[B60Q 1/10](#) , [B60Q 1/12](#) , [B60Q 1/1423](#) take precedence-)]
- U B60Q 1/10
 - • • • • due to vehicle inclination, e.g. due to load distribution
- B60Q 1/115
 - • • • • • by electric means {(-details of the electric drive components, e.g. motors, shafts, ball joints [B60Q 1/076-](#))}
- U B60Q 1/12
 - • • • • due to steering position
- B60Q 1/122
 - • • • • • {with electrical actuating means (-details of the electric drive components, e.g. motors, shafts, ball joints [B60Q 1/076-](#))}
- B60Q 1/14
 - • • having dimming means {(-lighting power supply circuits in general [H05B-](#))}
- B60Q 1/1407
 - • • • {General lighting circuits comprising dimming circuits (-dimming circuits per se [B60Q 1/1415-](#))}
- B60Q 1/1438
 - • • • {Actuating means for dimming masks or screens (-adjustable screens per se [F21V 11/04-](#))}
- B60Q 1/18
 - • • being additional front lights {(-bracket mounted headlights [B60Q 1/0483-](#))}

- B60Q 1/20
 - • • Fog lights{(-single shaped beam lighting devices specially adapted for vehicles for penetrating fog or preventing glare [F21S 8/12](#)-)}
- U B60Q 1/24
 - • for lighting other areas than only the way ahead
- B60Q 1/245
 - • • {using spotlights adjustable from within the vehicle}(-adjustable headlights [B60Q 1/06](#)-)}
- B60Q 1/26
 - the devices being primarily intended to indicate the vehicle, or parts thereof, or to give signals, to other traffic{(-such devices mounted on the vehicle rear part [F21S 48/20](#) ; means for the lighting or illuminating of aerials, e.g. for purpose of warning [H01Q 1/06](#)-)}
- B60Q 1/2611
 - • {Indicating devices mounted on the roof of the vehicle}(-flashing light sources in general [F21S 10/06](#)-)}
- B60Q 1/2657
 - • {mounted on a shaft, e.g. telescopic}(-lamps on antennas or powerlines [F21S 8/085](#)-)}
- B60Q 1/2661
 - • {mounted on parts having other functions}(-on wheels [B60Q 1/323](#)-)}
- B60Q 1/2665
 - • • {on rear-view mirrors}(-lighting devices for vehicle interior on or for rear-view mirrors [B60Q 3/023](#) ; adaptations or arrangements of mirrors for use on cycles [B62J 29/00](#) ; rear-view mirror arrangements [B60R 1/02](#) ; mirror assemblies combined with lamps [B60R 1/1207](#)-)}
- B60Q 1/2669
 - • • {on door or boot handles}(-lighting devices for vehicle interior on door handles [B60Q 3/0233](#) ; vehicle doors [B60J 5/00](#) illuminating devices on or for locks or keys [E05B 17/10](#) ; Keyhole finders [E05B 15/08](#)-)}
- B60Q 1/2673
 - • • {on parts worn by the driver, e.g. clothes}(-professional or sporting clothes with reflecting or luminous means [A41D 13/01](#)-), gloves}(-protective gloves with reflecting or luminous means [A41D 19/0157](#)-), or bags, specially adapted to provide auxiliary vehicle signalling}
- B60Q 1/2676
 - • • • {Helmets}(-helmets in general [A42B 3/00](#) ; helmets with signalling or lighting devices [A42B 3/0433](#)-)}
- B60Q 1/268
 - • • {on windscreens or windows}(-[B60Q 1/302](#) takes precedence; windows or windscreens in general [B60J 1/00](#) ; lighting devices for vehicle interior on or for windows [B60Q 3/0213](#)-)}
- B60Q 1/2684
 - • • {on wipers or windscreen washers}(-vehicle wipers [B60S 1/04](#) ; windscreen washers [B60S 1/46](#)-)}
- B60Q 1/2688
 - • • {on exhaust pipes}(exhaust or silencing apparatuses in general [F01N](#))}
- B60Q 1/2692
 - • {retractable lights}(-retractable headlights [B60Q 1/05](#)-)}
- B60Q 1/2696
 - • {Mounting of devices using LEDs}(-fastening of LEDs on printed circuits [F21V 19/001](#)-)}
- U B60Q 1/30
 - • for indicating rear of vehicle, e.g. by means of reflecting surfaces
- B60Q 1/307
 - • • {mounted on loading platforms}(-warning signals on loading platforms [B60P 1/4464](#)-)}
- U B60Q 1/32
 - • for indicating vehicle sides,{e.g. clearance lights}
- B60Q 1/323
 - • • {on or for doors or running boards, e.g. to facilitate acces to the vehicle}(-illumination of door locks [E05B 17/10](#)-)}
- B60Q 1/34
 - • for indicating change of drive direction}(-[B60Q 1/22](#) takes precedence-)
- B60Q 1/343

B60S 1/3851 {-Mounting of connector to blade assembly}
B60S 1/3853 {-Snap-fit, e.g. elastic connection}
B60S 1/3855 {-by welding, gluing or the like}
B60S 1/3856 {-Gripping the blade}
B60S 1/3858 {-with protrusions cooperating with holes}
B60S 1/386 {-made in two halves}
B60S 1/3862 {-Transport of liquid there through}
B60S 1/3863 {-Connectors having a spoiler}

B60S 1/3865 {-Connectors having an integral pivot pin for connection with the wiper arm}
B60S 1/3867 {-pin formed on the interior of side walls}
B60S 1/3868 {-pin formed on the exterior of side walls}
B60S 1/387 {-the connector being suitable for receiving different types of adapter}
B60S 1/3872 {-without connector, e.g. connection to wiper arm via squeegee or vertebra}
B60S 1/3874 {-with a reinforcing vertebra}
B60S 1/3875 {-rectangular section}
B60S 1/3877 {-embedded in the squeegee}
B60S 1/3879 {-placed in side grooves in the squeegee}
B60S 1/3881 {-in additional element, e.g. spoiler}
B60S 1/3882 {-C-shape section}
B60S 1/3884 {-Wire-shaped section}
B60S 1/3886 {-End caps}
B60S 1/3887 {-Mounting of end caps}
B60S 1/3889 {-cooperating with holes in the vertebra}
B60S 1/3891 {-with locking device}
B60S 1/3893 {-cooperating with holes in the squeegee}
B60S 1/3894 {-having a particular shape}
B60S 1/3896 {-with openings at the longitudinal extremities}
U B60S 1/40 Connections between blades and arms
B60S 1/4003 {-Multi-purpose connections for two or more kinds of arm ends}

NOTE

Multi-aspect classification is applied for technical subjects relating to the arms and covered by subgroups [B60S 1/4006](#) to [B60S 1/4083](#)

B60S 1/4006 {-for arms provided with a hook-shaped end}
B60S 1/4009 {-comprising a detachable intermediate element mounted on the hook-shaped end}
B60S 1/4016 {-the element being provided with retention means co-operating with the hook-shaped end of the arm}
B60S 1/4019 {-the retention means being protrusions or holes}
B60S 1/4038 {-for arms provided with a channel-shaped end}
B60S 1/4041 {-the channel-shaped end comprising a pivot pin mounted between the side walls}
B60S 1/4045 {-comprising a detachable intermediate element mounted on the channel-shaped end}
B60S 1/4048 {-the element being provided with retention means co-operating with the channel-shaped end of the arm}
B60S 1/4064 {-the channel-shaped end being provided with protrusions on, or holes in, the side walls to create a pivot}
B60S 1/4067 {-for arms provided with a side pin}
B60S 1/407 {-with means provided on the arm for locking the side pin}
B60S 1/4074 {-with means provided on the blade for locking the side pin}

- B60S 1/4077 {characterised by the connecting part of, or an intermediate element mounted on, the wiper blade (means for locking the side pin [B60S 1/4074](#))}
- B60S 1/4083 {for arms provided with a flat end}
- B60S 1/4087 {the end being provided with protrusions or holes}

Project: N/A (B60T)**B60T**

VEHICLE BRAKE CONTROL SYSTEMS OR PARTS THEREOF; BRAKE CONTROL SYSTEMS OR PARTS THEREOF, IN GENERAL (electrodynamic brake systems for vehicle, in general [B60L](#); brakes per se, i.e. devices where braking effect occurs, including ultimate brake actuators, [F16D](#)); ARRANGEMENT OF BRAKING ELEMENTS ON VEHICLES IN GENERAL; PORTABLE DEVICES FOR PREVENTING UNWANTED MOVEMENT OF VEHICLES; VEHICLE MODIFICATIONS TO FACILITATE COOLING OF BRAKES

NOTE

In this subclass, the term "brake control systems" includes brake control systems for vehicles or of general applicability

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

B60T 1/00

Arrangements of braking elements, i.e. of those parts where braking effect occurs {specially for vehicles}

- U B60T 1/02 . acting by retarding wheels
- B60T 1/06 . . acting otherwise than on tread, e.g. employing rim, drum, disc, or transmission {or on double wheels}
- B60T 1/065 . . . {employing disc (~~-[B60T 1/062](#) takes precedence-~~)}
- B60T 1/067 . . . {employing drum (~~-[B60T 1/062](#) takes precedence-~~)}
- B60T 1/10 . . by utilising wheel movement for accumulating energy, e.g. driving air compressors (using propulsion unit as braking means, see the relevant class)
- U B60T 1/12 . acting otherwise than by retarding wheels, e.g. jet action
- B60T 1/14 . . directly on road {portable devices, e.g. chocks [B60T 3/00](#)}

B60T 5/00

Vehicle modifications to facilitate cooling of brakes

U B60T 7/00

Brake-action initiating means

- U B60T 7/02 . for personal initiation

U B60T 7/04	• • foot actuated
U B60T 7/06	• • • Disposition of pedal
B60T 7/065	• • • • {with means to prevent injuries in case of collision}(-for vehicle pedals in general by moving them from an operative to an out-of-the way position B60R 21/09 -)}
B60T 7/12	• for automatic initiation; for initiation not subject to will of driver or passenger{(-limiting speed of vehicles other than rail vehicles B60K 31/00 -)}
B60T 7/124	• • {Brakes for railway vehicles coming into operation in case of accident, derailment or damage of rolling stock or superstructure}(-self-acting brakes in general F16D 59/00 -)}
B60T 7/126	• • {Brakes for railway vehicles coming into operation in case of exceeding a predetermined speed}(-self-acting brakes in general F16D 59/00 -)}
B60T 7/128	• • {Self-acting brakes of different types for railway vehicles}(- B60T 7/12 takes precedence; self-acting brakes in general F16D 59/00 -)}
B60T 7/14	• • operated upon collapse of driver}(-deadman`s devices for electrically propelled vehicles B60L 3/02 -)}
B60T 7/20	• • specially for trailers, e.g. in case of uncoupling of {or overrunning by}trailer}(-inertia-actuated over-run brakes B60T 13/08 -)}
B60T 8/00	Arrangements for adjusting wheel-braking force to meet varying vehicular or ground-surface conditions, e.g. limiting or varying distribution of braking force}(-by changing number of effective brake cylinders in power brake systems B60T 17/10-)
B60T 8/17	• Using electrical or electronic regulation means to control braking{(-detecting or indicating faulty operation B60T 8/885 -)}
B60T 8/1701	• • {Braking or traction control means specially adapted for particular types of vehicles}(-for vehicles having more than one drive axle B60T 8/1769 -)}
B60T 8/172	• • Determining control parameters used in the regulation, e.g. by calculations involving measured or detected parameters{(- B60T 8/17551 takes precedence-)}
B60T 8/1725	• • • {Using tyre sensors, e.g. Sidewall Torsion sensors (SWT)}(-for tyre pressure and temperature detection B60C 23/00 -)}
B60T 8/175	• • Brake regulation specially adapted to prevent excessive wheel spin during vehicle acceleration, e.g. for traction control}(-safety devices for propulsion unit control responsive to, or preventing, skidding of wheels B60K 28/16 -)}
B60T 8/1755	• • Brake regulation specially adapted to control the stability of the vehicle, e.g. taking into account yaw rate or transverse acceleration in a curve}(-road vehicle drive control systems for control of driving stability otherwise than by controlling a particular sub-unit B60W 30/02 -)}
B60T 8/17554	• • • {specially adapted for enhancing stability around the vehicles longitudinal axle, i.e. roll-over prevention}(-road vehicle drive control systems for roll-over prevention otherwise than by controlling a particular sub-unit B60W 30/04 -)}
B60T 8/17557	• • • {specially adapted for lane departure prevention}(-road vehicle drive control systems for lane keeping otherwise than by controlling a particular sub-unit B60W 30/12 -)}
B60T 8/17558	• • • {specially adapted for collision avoidance or collision mitigation}(-road vehicle drive control systems for collision avoidance otherwise than by controlling a particular sub-unit B60W 30/09 -)}
B60T 8/176	• • Brake regulation specially adapted to prevent excessive wheel slip during vehicle deceleration, e.g. ABS}(- B60T 8/1755 takes precedence-)}
B60T 8/1763	• • • responsive to the coefficient of friction between the wheels and the ground surface}(- B60T 8/1764 takes precedence-)}

- B60T 8/1764
 - • • Regulation during travel on surface with different coefficients of friction, e.g. between left and right sides, mu-split {or between front and rear}
- B60T 8/18
 - responsive to vehicle weight or load, e.g. load distribution ({ using electrical circuitry on regulation means [B60T 8/17](#) ; } [B60T 8/30](#) takes precedence; responsive to weight and speed condition [B60T 8/58](#))
- NOTE
[B60T 8/1887](#) and [B60T 8/1893](#) take precedence over [B60T 8/1806](#) to [B60T 8/1881](#)
- U B60T 8/1837
 - • {characterised by the load-detecting arrangements}
- B60T 8/1856
 - • • {Arrangements for detecting suspension spring load ([B60T 8/1843](#) takes precedence-)}
- B60T 8/24
 - responsive to vehicle inclination or change of direction, e.g. negotiating bends ([B60T 8/17](#))
- B60T 8/26
 - characterised by producing differential braking between front and rear wheels ([B60T 8/17](#))
- B60T 8/262
 - • {using valves with stepped characteristics ([B60T 8/261](#) , [B60T 8/266](#) take precedence-)}
- B60T 8/266
 - • {using valves or actuators with external control means ([B60T 8/261](#) takes precedence-)}
- B60T 8/28
 - • responsive to deceleration ([B60T 8/261](#) , [B60T 8/262](#) , [B60T 8/266](#) take precedence-)}
- B60T 8/30
 - • responsive to load ([B60T 8/261](#) , [B60T 8/262](#) , [B60T 8/266](#) take precedence-)}
- B60T 8/32
 - responsive to a speed condition, e.g. acceleration or deceleration ({ using electrical circuitry or regulation means [B60T 8/17](#) ; } [B60T 8/28](#) takes precedence; electric devices on electrically propelled vehicles indicating the wheel slip [B60L 3/10](#) ; measuring linear or angular speed per se [G01P 3/00](#))
- B60T 8/3205
 - • {acceleration ([B60T 8/34](#) , [B60T 8/52](#) , [B60T 8/54](#) , [B60T 8/56](#) , [B60T 8/58](#) , [B60T 8/72](#) , [B60T 8/86](#) , [B60T 8/88](#) take precedence-)}
- B60T 8/321
 - • {deceleration ([B60T 8/34](#) , [B60T 8/52](#) , [B60T 8/54](#) , [B60T 8/56](#) , [B60T 8/58](#) , [B60T 8/72](#) , [B60T 8/86](#) , [B60T 8/88](#) take precedence-)}
- B60T 8/3215
 - • • {Systems characterised by having means acting on components of the drive line, e.g. retarder, clutch or differential gear ([B60T 8/322](#) takes precedence-)}
- B60T 8/3225
 - • • {Systems specially adapted for single-track vehicles, e.g. motorcycles ([B60T 8/3235](#) takes precedence-)}
- U B60T 8/3255
 - • • {Systems in which the braking action is dependent on brake pedal data}
- U B60T 8/326
 - • • • {Hydraulic systems}
- B60T 8/3265
 - • • • {with control of the booster ([B60T 8/3275](#) takes precedence-)}
- U B60T 8/34
 - • having a fluid pressure regulator responsive to a speed condition
- B60T 8/341
 - • • {Systems characterised by their valves ([B60T 8/36](#) , [B60T 8/38](#) take precedence-)}
- B60T 8/343
 - • • {Systems characterised by their lay-out ([B60T 8/349](#) takes precedence-)}
- U B60T 8/344
 - • • • {Hydraulic systems}
- B60T 8/346
 - • • • • {2 Channel systems ([B60T 8/345](#) takes precedence-)}
- B60T 8/347
 - • • • • {3 Channel systems ([B60T 8/345](#) takes precedence-)}
- B60T 8/348
 - • • • • {4 Channel systems ([B60T 8/345](#) takes precedence-)}
- U B60T 8/36
 - • • including a pilot valve responding to an electromagnetic force

- B60T 8/3615
 - • • {Electromagnetic valves specially adapted for anti-lock brake and traction control systems} (-electromagnetic valves in general [F16K 31/06](#)-)}
- B60T 8/362
 - • • • {in pneumatic systems} (-[B60T 8/3655](#) , [B60T 8/3675](#) and [B60T 8/369](#) take precedence-)}
- B60T 8/363
 - • • • {in hydraulic systems} (-[B60T 8/3655](#) , [B60T 8/3675](#) and [B60T 8/369](#) take precedence-)}
- B60T 8/3635
 - • • • • {switching between more than two connections, e.g. 3/2-valves} (-[B60T 8/364](#) , [B60T 8/3645](#) and [B60T 8/365](#) take precedence-)}
- B60T 8/364
 - • • • • {switching between a number of discrete positions as a function of the applied signal, e.g. 3/3-valves} (-[B60T 8/3645](#) takes precedence-)}
- B60T 8/369
 - • • • • {Valves using piezo-electric elements} (-in general [F16K 31/004](#)-)}
- B60T 8/3695
 - • • • {wherein the pilot valve is mounted separately from its power section} (-[B60T 8/3605](#) , [B60T 8/361](#) and [B60T 8/3615](#) take precedence-)}
- U B60T 8/40
 - • • comprising an additional fluid circuit including fluid pressurising means for modifying the pressure of the braking fluid, e.g. including wheel driven pumps for detecting a speed condition, or pumps which are controlled by means independent of the braking system
- B60T 8/4018
 - • • • {Pump units characterised by their drive mechanisms} (-[B60T 8/4095](#) takes precedence-)}
- B60T 8/4022
 - • • • • {Pump units driven by an individual electric motor} (-[B60T 8/4027](#) takes precedence-)}
- B60T 8/4031
 - • • • {Pump units characterised by their construction or mounting} (-pump units in combination with valve blocks [B60T 8/36](#)-)}
- B60T 8/4036
 - • • • {Pump units characterised by their failure-responsive means} (-[B60T 8/88](#) takes precedence-)}
- U B60T 8/404
 - • • • {Control of the pump unit}
- B60T 8/4054
 - • • • • {involving the delivery pressure control} (-[B60T 8/4072](#) takes precedence-)}
- U B60T 8/4072
 - • • • {Systems in which a driver input signal is used as a control signal for the additional fluid circuit which is normally used for braking}
- B60T 8/4081
 - • • • • {Systems with stroke simulating devices for driver input} (-[B60T 8/4077](#) takes precedence-)}
- B60T 8/42
 - • • having expanding chambers for controlling pressure} {i.e. closed systems}
- U B60T 8/4208
 - • • • {Debooster systems}
- B60T 8/4216
 - • • • • {having a mechanically actuated expansion unit} (-[B60T 8/4225](#) and [B60T 8/4266](#) take precedence-)}
- U B60T 8/4225
 - • • • • {having a fluid actuated expansion unit}
- B60T 8/4233
 - • • • • • {with brake pressure relief by introducing fluid pressure into the expansion unit} (-[B60T 8/4241](#) takes precedence-)}
- B60T 8/44
 - • • co-operating with a power-assist booster means associated with a master cylinder for controlling the release and reapplication of brake pressure through an interaction with the power assist device {i.e. open systems}
- B60T 8/441
 - • • • {using hydraulic boosters} (-[B60T 8/445](#) , [B60T 8/446](#) , [B60T 8/447](#) take precedence-)}
- B60T 8/443
 - • • • {using compressed air} (-[B60T 8/445](#) , [B60T 8/446](#) , [B60T 8/448](#) take precedence-)}
- B60T 8/444
 - • • • {using vacuum} (-[B60T 8/445](#) , [B60T 8/446](#) , [B60T 8/448](#) take precedence-)}

	B60T 8/48	<ul style="list-style-type: none"> • • • connecting the brake actuator to an alternative or additional source of fluid pressure {e.g. traction control systems}
U	B60T 8/4809	<ul style="list-style-type: none"> • • • • {Traction control, stability control, using both the wheel brakes and other automatic braking systems}
U	B60T 8/4827	<ul style="list-style-type: none"> • • • • • {in hydraulic brake systems}
	B60T 8/4836	<ul style="list-style-type: none"> • • • • • {wherein a booster output pressure is used for normal or anti lock braking (-B60T 8/4845 , B60T 8/4863 , B60T 8/489 take precedence-)}

MOTOR VEHICLES; TRAILERS}{(-steering, or guiding on a desired track, of agricultural machines or implements [A01B 69/00](#) ; wheels, castors, axles, increasing wheel adhesion [B60B](#); vehicle tyres, tyre inflation or tyre changing [B60C](#); connections between vehicles of a train or the like [B60D](#); vehicles for use on rail and road, amphibious or convertible vehicles [B60F](#); suspension arrangements [B60G](#); heating, cooling, ventilating or other air treating devices [B60H](#); windows, windscreens, non-fixed roofs, doors or similar devices, protective coverings for vehicles not in use [B60J](#); propulsion plant arrangements, auxiliary drives, transmissions, controls, instrumentation or dashboards [B60K](#); electric equipment or propulsion of electrically-propelled vehicles [B60L](#); power supply for electrically-propelled vehicles [B60M](#); passenger accommodation not otherwise provided for [B60N](#); adaptations for load transportation or to carry special loads or objects [B60P](#); arrangement of signalling or lighting devices, the mounting or supporting thereof or circuits therefor, for vehicles in general [B60Q](#); vehicles, vehicle fittings or vehicle parts not otherwise provided for [B60R](#); servicing, cleaning, repairing, supporting, lifting, or manoeuvring, not otherwise provided for, [B60S](#); brake arrangements, brake control systems or parts thereof [B60T](#); air-cushion vehicles [B60V](#); motor-cycles, accessories therefor [B62J](#), [B62K](#); testing of vehicles [G01M](#)-)}

NOTE

In this subclass, the following terms are used with the meanings indicated:

- "vehicles" include motor vehicles and trailers;
- "trailers" include forecars or sidecars.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

B62D 25/13	covered by	B60J 1/20	,	B60R 13/07
B62D 25/22	covered by	B60R 3/00		B62D 65/08
covered by		B60J 10/0088		

U	B62D 1/00	Steering controls, i.e. means for initiating a change of direction of the vehicle
U	B62D 1/02	• vehicle-mounted
U	B62D 1/04	• • Hand wheels
	B62D 1/06	• • • Rims, e.g. with heating means; Rim covers (-B62D 1/11 takes precedence-)
	B62D 1/065	• • • {Steering wheels with heating and ventilating means (heating and ventilating arrangements for spaces of vehicles B60H)}
	B62D 1/08	• • • Spokes, e.g. resilient (-B62D 1/11 takes precedence-)
	B62D 1/10	• • • Hubs; Connecting hubs to steering columns, e.g. adjustable (-B62D 1/11 takes precedence-)
	B62D 1/105	• • • {Non-rotatable hubs, e.g. the central part of the steering wheel not rotating (-for storing airbags B60R 21/2032-)}
	B62D 1/11	• • • incorporating energy-absorbing arrangements, e.g. by being yieldable or collapsible (-padded linings associated with the steering wheel B60R 21/05 ; shock absorbers using plastic deformation of members in general F16F 7/12-))
U	B62D 1/16	• • Steering columns
	B62D 1/166	• • • {Means changing the transfer ratio between steering wheel and steering gear (-by continuous supply of energy, e.g. from electric motor B62D 5/008 ; controlling steering depending on driving conditions sensed and responded to B62D 6/00-)})
	B62D 1/18	• • • yieldable or adjustable, e.g. tiltable (-padded linings associated with the steering column B60R 21/05-))
		NOTE Group B62D 1/181 takes precedence over groups B62D 1/183 - B62D 1/187 .
	B62D 1/184	• • • • Mechanisms for locking columns at selected positions(-locking of telescopic systems in general F16B 7/10-)})
	B62D 1/185	• • • • adjustable by axial displacement, e.g. telescopically (-B62D 1/183 , B62D 1/187 , B62D 1/19 take precedence-))
	B62D 1/187	• • • • with tilt adjustment; with tilt and axial adjustment (-B62D 1/183 , B62D 1/19 takes precedence-))
	B62D 1/19	• • • • incorporating energy-absorbing arrangements, e.g. by being yieldable or collapsible (-shock absorbers using plastic deformation of members in general F16F 7/12-))
	B62D 1/24	• not vehicle-mounted(-special adaptations of automatic tractor steering A01B69/04 ; devices for lifting, movable on wheels, automatically guided B66F 9/063-)})
	B62D 1/26	• • mechanical, e.g. by a non-load-bearing guide (-railways B61-))
	B62D 1/28	• • non-mechanical {e.g. following a line or other known markers (-steering position indicators B62D 15/02 ; steering aids B62D 15/025 ; parking aids B62D 15/027 ; steering assistants B62D 15/029 ; determination or calculation of trajectory of land vehicles G05D 1/021-)})
	B62D 3/00	Steering gears (-power assisted or power driven B62D 5/00 ; steering linkages B62D 7/00 ; for non-deflectable wheels B62D 11/00 ; gearing in general F16H-)
	B62D 5/00	Power-assisted or power-driven steering ({ controlling steering depending on driving conditions sensed and responded to B62D 6/00 ; } for non-deflectable wheels B62D 11/00 ; fluid pressure servomotors in general F15B-

B62D 5/001	• {-Mechanical aspects of steer-by-wire systems, not otherwise provided in B62D 5/00 (-hydraulic steer-by-wire systems B62D 5/091 -)}
B62D 5/003	• • {-Backup systems, e.g. for manual steering (- B62D 5/30 takes precedence-)}
U B62D 5/005	• • {-means for generating torque on steering wheel, e.g. feedback}
B62D 5/006	• • • {-power actuated (-control thereof B62D 6/008 -)}
U B62D 5/04	• electrical, e.g. using an electric servo-motor connected to, or forming part of, the steering gear
U B62D 5/043	• • {-characterised by clutch means between driving element, e.g. motor, and driven element, e.g. steering column or steering gear}
B62D 5/0439	• • • {-Controllable friction clutches (- B62D 5/0436 takes precedence-)}
U B62D 5/0442	• • {-Conversion of rotational into longitudinal movement}
B62D 5/0445	• • • {-Screw drives (-Screw mechanisms in general F16H 25/20 -)}
B62D 5/0457	• • {-characterised by control features of the drive means as such (-controlling steering depending on driving conditions sensed and responded to B62D 6/00 ; determination of steering angle B62D 15/021 ; measuring torque applied to steering wheels G01L 5/221 ; control of electric motor as such H02P -)}
U B62D 5/0481	• • • {-monitoring the steering system, e.g. failures}
B62D 5/0487	• • • • {-detecting motor faults (- B62D 5/0496 takes precedence-)}
U B62D 5/06	• fluid, i.e. using a pressurised fluid for most or all the force required for steering a vehicle
U B62D 5/062	• • {-Details, component parts}
B62D 5/063	• • • {-Pump driven by vehicle engine (- B62D 5/065 takes precedence-)}
B62D 5/064	• • • {-Pump driven independently from vehicle engine, e.g. electric driven pump (- B62D 5/065 takes precedence-)}
U B62D 5/07	• • Supply of pressurised fluid for steering also supplying other consumers; {control thereof}
B62D 5/075	• • • {-using priority valves (-priority valves in general F15B 13/022 -)}
B62D 5/08	• • characterised by type of {steering}valve used (-valves in general F16K -)
U B62D 5/083	• • • Rotary valves
B62D 5/0835	• • • • {-characterised by means for actively limiting the deflection angle, e.g. depending on driving parameters (-controlling steering depending on driving conditions sensed and responded to B62D 6/00 -)}
U B62D 5/09	• • characterised by means for actuating valves
B62D 5/093	• • • Telemotor driven by steering wheel movement (-hydraulic steering gear B62D 3/14 -)
B62D 5/20	• • specially adapted for particular type of steering gear or particular application (-steering gears per se B62D 3/00 ; steering linkages not characterised by being power-assisted or power-driven B62D 7/00 -)
B62D 5/22	• • • for rack-and-pinion type{-pressure yokes B62D 3/123 -)}
B62D 6/00	Arrangements for automatically controlling steering depending on driving conditions sensed and responded to, e.g. control circuits (-means for initiating a change in direction B62D 1/00 ; steering valves B62D 5/06 ; combined with means for inclining the vehicle body or wheels on bends B62D 9/00-)

NOTE

When classifying in this group, classification is also made in the appropriate one of groups [B62D 1/00](#) to [B62D 5/00](#) or [B62D 7/00](#) to [B62D 19/00](#) if other aspects of the steering system are of interest

B62D 6/002	• {computing target steering angles for front or rear wheels (-B62D 7/159 takes precedence-)}
B62D 6/003	• • {in order to control vehicle yaw movement, i.e. around a vertical axis (-B62D 6/007 take precedence; stability systems acting on the brakes B60T 8/1755-)}
B62D 6/06	• responsive only to vehicle vibration dampening arrangements (-steering dampers for cycles B62K 21/08-)
B62D 6/08	• responsive only to {driver}input torque <u>WARNING</u> Group B62D 6/08 is not complete. See also B62D 5/04
B62D 6/10	• • characterised by means for sensing {or determining}torque <u>WARNING</u> Group B62D 6/10 is not complete. See also G01L 5/22
B62D 7/00	Steering linkage; Stub axles or their mountings (-B62D 13/00 takes precedence; power-assisted or power-driven steering B62D 5/00-)
U B62D 7/06	• for individually-pivoted wheels, e.g. on king-pins
U B62D 7/08	• • the pivotal axes being situated in a single plane transverse to the longitudinal centre line of the vehicle
B62D 7/09	• • • characterised by means varying the ratio between the steering angles of the steered wheels (-varying the ratio automatically depending on driving conditions B62D 6/00-)
U B62D 7/14	• • the pivotal axes being situated in more than one plane transverse to the longitudinal centre line of the vehicle, e.g. all-wheel steering
B62D 7/146	• • • {characterised by comprising means for steering by acting on the suspension system, e.g. on the mountings of the suspension arms (-means on vehicle for adjusting camber, castor or toe-in B62D 17/00-)}
B62D 7/15	• • • characterised by means varying the ratio between the steering angles of the steered wheels{ B62D 7/148 takes precedence-}
U B62D 7/1518	• • • • {comprising a mechanical interconnecting system between the steering control means of the different axles}
B62D 7/1536	• • • • • {provided with hydraulic assistance; (-power-assisted fluid steering per se B62D 5/06-)}
B62D 7/1545	• • • • • {provided with electrical assistance; (-power-assisted electrical steering per se B62D 5/04-)}
B62D 7/1554	• • • • • {comprising a fluid interconnecting system between the steering control means of the different axles; (-power-assisted fluid steering per se B62D 5/06-)}
B62D 7/1563	• • • • • {provided with fluid control means; (-B62D 7/1572 takes precedence-)}
B62D 7/1581	• • • • • {characterised by comprising an electrical interconnecting system between the steering control means of the different axles; (-power-assisted electrical steering per se B62D 5/04-)}
B62D 7/16	• Arrangement of linkage connections {(-pivots per se F16C ; { e.g. ball joints F16C 11/06 })}
B62D 7/166	• • {substantially perpendicular, e.g. between tie-rod and steering knuckle (-steering knuckles in general B62D 7/18-)}
B62D 7/20	• Links, e.g. track rods (-means for adjusting camber, castor, or toe-in B62D 17/00-)
B62D 7/22	• Arrangements for reducing or eliminating reaction, e.g. vibration, from parts, e.g. wheels, of the steering system{(-dampers in general F16F-)}

B62D 9/00	Steering deflectable wheels not otherwise provided for (-steering position indicators B62D 15/02)
B62D 9/04	<ul style="list-style-type: none"> combined with means for {inwardly}inclining wheels on bends (-B62D 9/02 takes precedence-) <p><u>WARNING</u></p> <p>Group B62D 9/04 is not complete. See also B62D 9/02</p>
U B62D 11/00	Steering non-deflectable wheels; Steering endless tracks or the like <u>NOTE</u> Gearings of interest apart from this application are also classified in the relevant group of subclass F16H covering gearings per se
B62D 11/001	<ul style="list-style-type: none"> {control systems (-B62D 11/183 takes precedence-)} <p><u>NOTE</u></p> <p>When classifying in this group, classification is also made in the appropriate one of groups B62D 11/02 to B62D 11/24 if other aspects of the steering system are of interest</p>
U B62D 11/02	<ul style="list-style-type: none"> by differentially driving ground-engaging elements on opposite vehicle sides

AEROPLANES; HELICOPTERS (air-cushion vehicles [B60V](#))

NOTE

As far as possible, classification is made according to constructional features; classification according to particular kinds of aircraft is normally regarded as being of secondary importance, except in cases where this is considered to be the characteristic feature.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

- [B64C 35/02](#) covered by [B64C 35/00](#)

B64C 1/00 -
B64C 19/00

Aircraft structures or fairings (-boundary-layer controls [B64C 21/00](#)-)

B64C 1/00

Fuselages; Constructional features common to fuselages, wings, stabilising surfaces and the like (-aerodynamical features common to fuselages, wings, stabilising surfaces, and the like [B64C 23/00](#) ; flight-deck installations [B64D](#)-)

U B64C 1/06

B65D

CONTAINERS FOR STORAGE OR TRANSPORT OF ARTICLES OR MATERIALS, e.g. BAGS, BARRELS, BOTTLES, BOXES, CANS, CARTONS, CRATES, DRUMS, JARS, TANKS, HOPPERS, FORWARDING CONTAINERS; ACCESSORIES, CLOSURES, OR FITTINGS THEREFOR; PACKAGING ELEMENTS; PACKAGES (containers specially adapted for storing agricultural or horticultural products [A01F 25/14](#) ; containers specially adapted for use in dairies [A01J](#); travelling bags or baskets, suitcases [A45C](#); travelling or camp equipment [A45F](#); {linkable display containers [A47B87/00C](#) } ; household or table equipment [A47G](#); letter-boxes for home use [A47G 29/12](#) ; kitchen equipment [A47J](#); associated with vehicles, see the appropriate subclass of [B60](#) to [B64](#); machines, apparatus, or devices for, or methods of, packaging articles or materials [B65B](#); sack holders [B65B 67/00](#) ; refuse receptacles [B65F 1/00](#) ; handling sheets, webs or filamentary material [B65H](#); load-engaging elements or devices attached to lifting or lowering gear of cranes or adapted for connection therewith for transmitting lifting forces [B66C](#); liquid handling [B67](#); storing gases [F17](#); { packaging for photosensitive or like materials [G03](#), e.g. [G03C 3/00](#) } ; making containers, see subclasses dealing with the working of the material concerned)

NOTES

In this subclass, the indexing codes of [B65D 2519/00004](#) - [B65D 2519/00995](#) should be added, if applicable

This subclass covers:

- containers, packaging elements or packages with auxilliary means or provisions for displaying articles or materials;

- methods of packaging which are wholly characterised by the form of the package produced or the form of the container or packaging element used, as distinct from the operations performed or the apparatus employed, which are covered by subclass [B65B](#)

This subclass, which is intended to be as comprehensive as possible, only excludes containers or packages of a nature clearly confined to a single other subclass, which are classified in that subclass

In this subclass, groups [B65D 5/00](#) , [B65D 27/00](#) , [B65D30/00](#) or [B65D 65/00](#) include constructional features of foldable or erectable container or wrapper blanks as well as the containers or wrappers formed by folding or erecting such blanks

Containers, packaging elements or packages classified in group [B65D 85/00](#) , are also classified according to the constructional or functional features, if such features are of interest [6]

In this subclass, the following terms or expressions are used with the meanings indicated:

- "rigid or semi-rigid containers" includes:
 - a. containers not deformed by, or not taking-up the shape of, their contents;
 - b. containers adapted to be temporarily deformed to expel their contents;
 - c. pallets;
 - d. trays;
- "flexible containers" includes:
 - a. containers deformed by, or taking-up the shape of, their contents;
 - b. containers adapted to be permanently deformed to expel their contents;
- "packaging elements" includes:
 - a. elements, other than containers, for covering, protecting, stiffening, or holding together articles or materials to be stored or transported;
 - b. packaging materials of special type or form not provided for in other subclasses;
- "packages" includes:
 - a. combination of containers or packaging elements with articles or materials to be stored or transported;
 - b. articles joined together for convenience of storage or transport;
- "paper" includes materials, e.g. cardboard, plastic sheet materials, laminated materials, or metal foils, worked in a manner analogous to paper;
- "large containers", in groups [B65D 88/00](#) or [B65D 90/00](#) , means containers having about the size of containers used in container traffic, sometimes referred to as freight, forwarding or "ISO" (International Standardization) containers, or larger

containers [3]

Tamper-indicating means for containers or closures are classified in the group appropriate to the type of container or closure, e.g. [B65D5/43](#), [B65D 5/54](#), [B65D 17/00](#), [B65D 27/30](#), [B65D 27/30](#), [B65D 27/34](#), [B65D 33/34](#), [B65D 41/32](#), [B65D 47/36](#), [B65D 49/12](#), [B65D 51/20](#), [B65D 55/06](#) [5]

**B65D 1/00 -
B65D 21/00
B65D 1/00**

**General kinds of rigid or semi-rigid containers (large containers
B65D 88/00-)**

Containers having bodies formed in one piece, e.g. by casting metallic material, by moulding plastics, by blowing vitreous material, by throwing ceramic material, by moulding pulped fibrous material, by deep-drawing operations performed on sheet material (-by winding, bending, or folding paper [B65D 3/00](#) , [B65D 5/00](#) ; specially constructed to be opened by cutting, piercing, or tearing of wall portions [B65D 17/00](#) ; pallets [B65D 19/00](#) ; details of bottles or of jars [B65D 23/00](#) ; bundles of articles held together by packaging elements for convenience of storage or transport, e. g. portable segregating carriers for plural receptacles such as beer cans, pop bottles, [B65D 71/00](#))

	B65D 1/02	• Bottles or similar containers with necks or like restricted apertures, designed for pouring contents (-thermally-insulated containers B65D 81/38 , A47J 41/00 ; { feeding-bottles A61J 9/00 })
U	B65D 1/0207	• • {characterised by material, e.g. composition, physical features}
	B65D 1/0215	• • • {multilayered (- B65D 81/3837 takes precedence-)}
U	B65D 1/0223	• • {characterised by shape}
	B65D 1/0261	• • • {Bottom construction (- B65D 1/06 takes precedence-)}
	B65D 1/08	• • adapted to discharge drops (-droppers B65D 47/18 -)
	B65D 1/09	• Ampoules (-specially adapted for medical or pharmaceutical purposes A61J 1/06 -)

B65D 1/10	• Jars, e.g. for preserving foodstuffs{(- B65D 81/3837 takes precedence-)}
B65D 1/22	• Boxes or like containers with side walls of substantial depth for enclosing contents{(- B65D 43/162 , B65D 81/02 , B65D 81/3813 take precedence-)}
B65D 1/26	• • Thin-walled containers, e.g. formed by deep-drawing operations{(- B65D 1/165 takes precedence-)}
B65D 1/265	• • • {Drinking cups (- B65D 81/3865 takes precedence, holders for plastic cups A47G 23/0208 -)}
B65D 1/32	• Containers adapted to be temporarily deformed by external pressure to expel contents ({ B65D 47/2018 , B65D 83/0055 take precedence } ; containers for pharmaceutical purposes A61J 1/20 , A61M 5/19 ; containers with disinfecting linings A61L 2/00 ; liquid sprayers B05B ; oil cans F16N 3/00 -)
B65D 1/326	• • {the container comprising an, externally located, integrally formed tube through which the contents pass (-integrally formed suction tubes B65D 77/286 -)}
B65D 1/34	• Trays or like shallow containers{ B65D 81/3813 takes precedence-}
B65D 1/38	• Baskets or like containers of skeleton or apertured construction,{(-crates for bottles or like containers B65D 1/243 -)}
B65D 1/40	• Details of walls (-other container details B65D 23/00 , B65D 25/00 -)
B65D 3/00	Containers having bodies or peripheral walls of curved or partially curved cross-section made by winding or bending paper without folding along defined lines (-with end walls of different materials B65D 15/00-)
B65D 3/22	• with double walls; with walls incorporating air-chambers; with walls made of laminated material{(-for thermal insulating purposes B65D 81/3818 -)}
B65D 5/00	Containers of polygonal cross-section, e.g. boxes, cartons, trays, formed by folding or erecting one or more blanks made of paper (-pallets B65D 19/00 ; bundles of articles held together by packaging elements for convenience of storage or transport, e.g. portable segregating carriers for plural receptacles such as beer cans, pop bottles, B65D 71/00 ; forming foldable or erectable blanks B31B-)
B65D 5/0005	• {of variable capacity (-in general B65D 21/08 -)}
B65D 5/001	• {stackable (-in general B65D 21/02 -)}
U B65D 5/0015	• • {the container being formed by folding up portions connected to a central panel}
B65D 5/002	• • • {having integral corner posts (- B65D 5/0045 and B65D 5/0065 take precedence-)}
B65D 5/003	• • • {having ledges formed by extensions of the side walls (- B65D 5/0045 and B65D 5/0065 take precedence-)}
B65D 5/0035	• • • • {the ledges being located between side walls and doubled-over extensions (- B65D 5/0025 takes precedence-)}
U B65D 5/005	• • {Separate or attached stacking elements}
B65D 5/0055	• • • {saddling the side walls of the container (- B65D 5/006 takes precedence-)}
B65D 5/006	• • • {Separate corner posts and like elements (- B65D 5/0065 takes precedence-)}
B65D 5/0085	• {the container body comprising two mating compartments hinged together (- B65D 77/006 takes precedence-)}
B65D 5/02	• by folding or erecting a single blank to form a tubular body with or without subsequent folding operations, or the addition of separate elements, to close the ends of the body (- B65D 5/36 takes precedence-)

- B65D 5/0227
 - {with end closures formed by inward folding of flaps and securing them by heat-sealing, adhesive applied to the flaps or staples (~~by adhesive tapes [B65D 5/0236](#)~~)}
- B65D 5/0236
 - {with end closures formed by inward folding of flaps and securing them by adhesive tapes, labels or the like; for decoration purposes (~~B65D 5/4245~~ , ~~B65D 5/4262~~ take precedence)}
- B65D 5/0245
 - {with end closures formed by inward folding of flaps, to form a sunken or hollow end wall, e.g. for the packaging of books (~~internal supporting elements [B65D 5/50](#)~~)}
- B65D 5/0281
 - {the tubular body presenting double or multiple walls (~~for thermal insulating purposes [B65D 81/3853](#)~~)}
- B65D 5/029
 - {the tubular body presenting a special shape (~~pyramidal [B65D 5/008](#)~~)}
- B65D 5/04
 - the tubular body having no end closures (~~shells of drawer-and-shell type containers [B65D 5/38](#)~~)
- B65D 5/08
 - with end closures formed by inward-folding of portions of body, e.g. flaps, interconnected by, or incorporating, gusset folds (~~by inward-folding of a wall extending continuously around an end of the body and incorporating gusset folds [B65D 5/06](#)~~)
- B65D 5/16
 - the tubular body being formed with an aperture or removable portion arranged to allow removal or insertion of contents through one or more sides (~~contents-dispensing means [B65D 5/72](#)~~)
- B65D 5/18
 - by folding a single blank to U-shape to form the base of the container and opposite sides of the body portion, the remaining sides being formed primarily by extensions of one or more of these opposite sides, e.g. flaps hinged thereto (~~B65D 5/36 takes precedence~~)
- B65D 5/20
 - by folding-up portions connected to a central panel from all sides to form a container body, e.g. of tray-like form (~~B65D 5/36 takes precedence~~)
- U B65D 5/2038
 - {at least two opposed folded-up portions having a non-rectangular shape}
- B65D 5/2047
 - {trapezoidal, e.g. to form a body with diverging side walls (~~B65D 5/2033 takes precedence~~)}
- U B65D 5/2052
 - {characterised by integral closure-flaps}
- B65D 5/2057
 - {Inter-engaging self-locking flaps (~~B65D 5/4254 takes precedence~~)}
- U B65D 5/24
 - with adjacent sides interconnected by gusset folds
- B65D 5/241
 - {and the gussets folds connected to the inside of the container body (~~B65D 5/247 and [B65D 5/248](#) take precedence~~)}
- B65D 5/244
 - {and the gussets folds connected to the outside of the container body (~~B65D 5/247 , [B65D 5/248](#) take precedence~~)}
- B65D 5/247
 - {and being maintained in erected condition by integral mechanical locking means formed on, or coacting with, the gusset folds, e.g. locking tabs, tongue and slit (~~B65D248/00 takes precedence~~)}
- B65D 5/32
 - having bodies formed by folding and interconnecting two or more blanks {each blank forming a body part, whereby each body part comprises at least one outside face of the box, carton or tray}
- U B65D 5/42
 - Details of containers or of foldable or erectable container blanks
- B65D 5/4208
 - {Means facilitating suspending, lifting, handling, or the like of containers (~~handles [B65D 5/46](#)~~)}
- B65D 5/4212
 - {Information or decoration elements, e.g. content indicators, or for mailing (~~B65D 5/522 takes precedence~~)}
- U B65D 5/4216
 - {Cards, coupons or the like formed integrally with, or printed directly on, the container or lid}

- B65D 5/422 . . . {as an extra panel or panels folded against or inside the container (~~B65D 5/4237~~ takes precedence)}
- B65D 5/4225 . . . {as an extra panel or panels projecting out of the plane of the container (~~B65D 5/4241~~ takes precedence)}
- U B65D 5/4233 . . {Cards, coupons, labels or the like formed separately from the container or lid}
- B65D 5/4245 . . . {Bands covering at least 3 adjacent faces of a container (~~B65D 5/4262~~ takes precedence)}
- B65D 5/427 . {Individual packages joined together, e.g. by means of integral tabs (~~B65D 5/5495~~ takes precedence)}
- B65D 5/4279 . {Joints, seams, leakproof joints or corners, special connections between panels (~~B65D 5/209~~ takes precedence)}
- B65D 5/4283 . . {Connections formed by separate elements, e.g. clips, bands, straps (~~B65D 5/0227~~, ~~B65D 5/0236~~ take precedence)}
- B65D 5/44 . . Integral, inserted or attached portions forming internal or external fittings {not used, see subgroups}
- B65D 5/441 . . {Reinforcements (~~linings B65D 5/56~~)}
- B65D 5/443 . . . {Integral reinforcements, e.g. folds, flaps (~~double walls B65D 5/02~~)}
- U B65D 5/46 . . Handles
- U B65D 5/46008 . . . {formed separately from the container body}
- B65D 5/46016 {Straps used as handles fixed to the container by glueing, stapling, heat-sealing (~~for packages in wrappers B65D 75/56~~)}
- B65D 5/46032 {Handles with anchoring elements, e.g. formed by folding a blank (~~B65D 5/46064~~ takes precedence; straps ~~B65D 5/46024~~)}
- U B65D 5/48 . . Partitions
- U B65D 5/48002 . . . {integral}
- U B65D 5/48004 {Squaring, i.e. at least four not aligned compartments}
- B65D 5/48008 {formed by folding extensions hinged to the upper or lower edges of a tubular body (~~B65D 5/48006~~ takes precedence)}
- B65D 5/48014 {formed by folding extensions hinged to the side edges of a tubular body (~~B65D 5/48004~~ takes precedence; partition separated by erecting the body ~~B65D 5/48048~~)}
- B65D 5/48016 {formed by folding extensions hinged to the upper or lower edges of a tubular body (~~B65D 5/48008~~ takes precedence)}
- B65D 5/48018 {formed by folding extensions of side panels of a "cross-like" body blank (~~B65D 5/4801~~ takes precedence)}
- B65D 5/4802 {formed by folding inwardly portions cut in the body (~~B65D 5/48006~~ takes precedence)}
- U B65D 5/48024 {inserted}
- B65D 5/48026 {Squaring or like elements, e.g. honeycomb element, i.e. at least four not aligned compartments (~~B65D 5/48012~~ takes precedence)}
- B65D 5/48028 {formed by folding a single blank (~~B65D 5/48034~~ takes precedence)}
- B65D 5/48044 {Blank provided with cut flaps folded perpendicular to the blank (~~B65D 5/48026~~ takes precedence)}
- B65D 5/48046 {Plain strips not fixed by gluing or other fastening elements (~~B65D 5/48048~~ takes precedence)}
- B65D 5/48048 {Single partition formed by folding one or more blanks and provided with flaps fixed to or maintained by parts of the container body (~~B65D 5/4804~~ takes precedence)}

- B65D 5/50
 - • • Internal supporting or protecting elements for contents (-elements formed by inward-folding of a wall extending from, and continuously around, an end of a tubular body [B65D 5/06](#) ; partitions [B65D 5/48](#)-)
- U B65D 5/5002
 - • • • {Integral elements for containers having tubular body walls}
- B65D 5/5004
 - • • • {formed as an extension of the end closures (-hollow or recessed end closures [B65D 5/0245](#)-)}
- U B65D 5/5011
 - • • • {formed by folding inwardly of extensions hinged to the upper or lower edges of the body}
- B65D 5/5014
 - • • • • {and with an integral end closure (-[B65D 5/5004](#) takes precedence-)}
- U B65D 5/5028
 - • • • {Elements formed separately from the container body}
- B65D 5/503
 - • • • • {Tray-like elements formed in one piece (-formed by folding a blank [B65D 5/5038](#)-)}
- B65D 5/5035
 - • • • • {Paper elements (-in combination with wooden elements [B65D 5/5095](#)-)}
- B65D 5/5038
 - • • • • {Tray-like elements formed by folding a blank and presenting openings or recesses (-without external box [B65D 71/72](#) ; external face of container provided with opening for receiving object in display position [B65D 5/5286](#)-)}
- U B65D 5/5047
 - • • • • {Blocks}
- U B65D 5/505
 - • • • • • {formed by folding up one or more blanks to form a hollow block}
- B65D 5/5052
 - • • • • • • {and provided with slits or recesses in which at least a part of the contents are located (-[B65D 5/504](#) takes precedence-)}
- B65D 5/5059
 - • • • • • {Paper panels presenting one or more openings or recesses in which at least a part of the contents are located (-[B65D 5/5038](#) , [B65D 5/5052](#) , [B65D 5/5057](#) and [B65D 5/5286](#) take precedence-)}
- B65D 5/5061
 - • • • • • • {the openings or recesses being located in different panels of a single blank (-[B65D 5/5066](#) takes precedence-)}
- B65D 5/5064
 - • • • • • {Inverted U- or V-shaped paper elements provided with slits or recesses in which at least a part of the contents are located (-[B65D 5/504](#) and [B65D 5/5052](#) takes precedence-)}
- B65D 5/5076
 - • • • • • {U-shaped elements supporting the articles along substantially their whole length, e.g. a cradle (-[B65D 5/508](#) takes precedence-)}
- B65D 5/5078
 - • • • • • {Pockets whereby the articles are inserted into the pockets, e.g. inverted U-shaped elements (-[B65D 5/508](#) takes precedence-)}
- B65D 5/5085
 - • • • • • {the elements forming grooves, ribs, or the like, situated on opposed walls and between which the articles are located (-for rigid containers [B65D 25/107](#)-)}
- B65D 5/5088
 - • • • • {Plastic elements (-trays [B65D 5/503](#)-)}
- B65D 5/52
 - • • External stands or display elements for contents{(-adjustable or foldable display stands made of cardboard, paper or the like, without packaging function [A47F 5/11](#)-)}
- U B65D 5/522
 - • • • {Containers provided with decoration or information elements which are displaced to display the contents}
- B65D 5/5226
 - • • • • {formed integrally with the container or lid (-[B65D 5/526](#) takes precedence-)}
- U B65D 5/526
 - • • • {Containers with means for displaying items at different heights}
- B65D 5/5266
 - • • • • {in tiered or stepped relationship (-[B65D 5/5206](#) takes precedence-)}
- B65D 5/5273
 - • • • • {Containers provided with an inclined surface on which the contents are located (-[B65D 5/5213](#) , [B65D 5/5266](#) take precedence-)}

- B65D 5/54
- Lines of weakness to facilitate opening of container or dividing it into separate parts by cutting or tearing ({ [B65D 5/06](#) , [B65D 5/5233](#) , [B65D 5/5253](#) take precedence } ; break-in flaps, or members adapted to be torn-off, to provide pouring openings [B65D 5/70](#)-)
- B65D 5/56
- Linings or internal coatings,{e.g. pre-formed trays provided with a blow- or thermoformed layer} (-to protect the articles from mechanical damage [B65D 81/127](#)-)
- B65D 5/566
- {Linings made of relatively rigid sheet material, e.g. carton}(-[B65D 5/0281](#) and [B65D 5/58](#) takes precedence; combined with a flexible lining [B65D 5/56](#) , [B65D 5/60](#) ; for thermal insulating purposes [B65D 81/3858](#) ; for shock absorbing purposes [B65D 81/1275](#)-)}
- B65D 5/58
- Linings spaced appreciably from container wall{(-for thermal insulating purposes [B65D 81/3853](#)-)}
- B65D 5/60
- Loose,{or loosely attached}, linings{(-made only of relatively rigid sheet material [B65D 5/566](#)-)}
- B65D 5/603
- {Flexible linings loosely glued to the wall of the container}(-[B65D 5/0272](#) takes precedence-)}
- B65D 5/62
- External coverings or coatings{(-[B65D 5/4245](#) , [B65D 5/4262](#) take precedence-)}
- U B65D 5/64
- Lids
- B65D 5/643
- {held in closed position by application of separate elements, e.g. clips, straps}(-[B65D 5/6611](#) , [B65D 5/6673](#) take precedence-)}
- B65D 5/646
- {comprising a slidable panel or wall}(-[B65D 5/723](#) takes precedence-)}
- B65D 5/66
- Hinged lids ({ [B65D 5/325](#) }takes precedence)
- U B65D 5/6602
- {formed by folding one or more extensions hinged to the upper edge of a tubular container body}
- B65D 5/6617
- {the container body sliding in an outer sleeve}(-[B65D 85/1054](#) takes precedence-)}
- U B65D 5/6626
- {formed by folding extensions of a side panel of a container body formed by erecting a "cross-like" blank}
- U B65D 5/6629
- {the lid being formed by two mating halves joined to opposite edges of the container body}
- B65D 5/6632
- {the lid-halves being held in closed position by flaps or tabs provided at their side edges only}(-[B65D 5/6644](#) , [B65D 5/6647](#) take precedence-)}
- B65D 5/6635
- {the lid-halves being held in closed position by flaps or tabs provided at their edge opposite to their hinge}(-[B65D 5/6644](#) , [B65D 5/6647](#) take precedence-)}
- U B65D 5/665
- {the lid being held in closed position by self-locking integral flaps or tabs}
- U B65D 5/6661
- {Flaps provided over the total length of the lid edge opposite to the hinge}
- U B65D 5/6664
- {combined with flaps or tabs provided at the side edges of the lid}
- B65D 5/6667
- {and connected to one another in order to form an uninterrupted telescoping flange}(-[B65D 5/667](#) takes precedence-)}
- B65D 5/6673
- {the lid being held in closed position by application of separate elements, e.g. clips, hooks, cords}(-[B65D 5/6647](#) takes precedence-)}
- U B65D 5/6685
- {formed by extensions hinged to the upper edge of a container body formed by erecting a blank to U-shape}
- B65D 5/6688
- {the container body sliding in an outer sleeve}(-[B65D 85/1054](#) takes precedence-)}

	B65D 5/70	<ul style="list-style-type: none"> • Break-in flaps, or members adapted to be torn-off, to provide pouring openings (B65D 5/74 takes precedence-)
U	B65D 5/72	<ul style="list-style-type: none"> • Contents-dispensing means
U	B65D 5/74	<ul style="list-style-type: none"> • Spouts
	B65D 5/741	<ul style="list-style-type: none"> • {for containers having a tubular body (B65D 5/746 takes precedence-)}
	B65D 5/742	<ul style="list-style-type: none"> • {Spouts formed by deforming or tearing the closure flaps or severed or incised parts of the closure flaps (B65D 5/06 takes precedence-)}
	B65D 7/00	Containers having bodies formed by interconnecting or uniting two or more rigid, or substantially rigid, components made wholly or mainly of metal (specially constructed to be opened by cutting, piercing, or tearing of wall portions B65D 17/00 ; pallets B65D 19/00 ; tanks for domestic water storage heaters F24H 1/181-)
U	B65D 7/02	<ul style="list-style-type: none"> • characterised by shape
	B65D 7/04	<ul style="list-style-type: none"> • of curved cross-section, e.g. cans of circular or elliptical cross-section(thermally insulated B65D 81/3813 , B65D 81/3837-)
	B65D 7/045	<ul style="list-style-type: none"> • {Casks, barrels, or drums in their entirety, e.g. beer barrels, i.e. presenting most of the following features like rolling beads, double walls, reinforcing and supporting beads for end walls (thermally insulated barrels, B65D 81/3802-)}
U	B65D 7/12	<ul style="list-style-type: none"> • characterised by wall construction or by connections between walls
	B65D 7/22	<ul style="list-style-type: none"> • with double walls, e.g. double end walls(for thermal insulating purposes B65D 81/3806 , B65D 81/3818 , B65D 81/383-)
	B65D 7/34	<ul style="list-style-type: none"> • with permanent connections between walls (permanent connections between walls for closing containers after filling B65D 17/06-)

	B65D 57/00	Internal frames or supports for flexible articles, e.g. stiffeners; Separators for articles packaged in stacks or groups, e.g. for preventing adhesion of sticky articles (B65D 71/70 takes precedence)}
	B65D 59/00	Plugs, sleeves, caps, or like rigid or semi-rigid elements for protecting parts of articles or for bundling articles, e.g. protectors for screw-threads, end caps for tubes or for bundling rod-shaped articles (stopping flow from or in pipes or hoses by means of plugs F16L 55/11 , by means of caps F16L 55/115 ; protection of pipes or objects of similar shape against external or internal damage or wear F16L 57/00)}
	B65D 61/00	External frames or supports adapted to be assembled around, or applied to, articles (collapsible containers B65D 5/00 , B65D 7/24 , B65D 9/12 , B65D 11/18)}
	B65D 63/00	Flexible elongated elements, e.g. straps, for bundling or supporting articles (attached to or integral with bags or sacks B65D 33/165 ; for securing load B60P 7/0823 ; for supporting pipes, cables or protective tubing F16L 3/137 ; { for bundling pipes F16L 3/233 })
U	B65D 63/10	<ul style="list-style-type: none"> • Non-metallic straps, tapes, or bands; Filamentary elements, e.g. strings, threads, wires; Joints between ends thereof
	B65D 63/1009	<ul style="list-style-type: none"> • • {Adhesive tapes (composition of the tapes C09J 7/00)}
	B65D 65/00	Wrappers or flexible covers; Packaging materials of special type or form (wrappers or envelopes with shock-absorbing properties B65D 81/03 ; layered products per se B32B ; materials per se, see the relevant classes)
		<u>NOTE</u> Attention is drawn to the definition of "packaging element" in Note (5) following the title of this subclass
U	B65D 65/38	<ul style="list-style-type: none"> • Packaging materials of special type or form
	B65D 65/40	<ul style="list-style-type: none"> • • Applications of laminates for particular packaging purposes(B65D 1/0215 , B65D 1/28 , B65D 3/22 , B65D 5/0281 , B65D 5/563 , B65D 9/30 , B65D 29/02 , B65D 31/02 , B65D 75/26 , B65D 77/2024 , B65D 81/1275 , B65D 81/3811 , B65D 81/3823 , B65D 81/3834 , B65D 81/3846 , B65D 81/3858 , B65D 81/3874 , B65D 81/3886 , B65D 81/3897 take precedence; laminates per se or laminated packages characterised by the composition or-)
		<u>NOTE</u> A packaging purpose covered by another group of B65D should be classified in that group of B65D and in B32B)]
	B65D 67/00	Kinds or types of packaging elements not otherwise provided for (B65D 5/425 takes precedence)}
	B65D 67/02	<ul style="list-style-type: none"> • Clips or clamps for holding articles together for convenience of storage or transport

B65D 69/00	Articles joined together for convenience of storage or transport without the use of packaging elements ({ packages joined together B65D 5/427 , B65D 21/02 } ; joining articles for convenience of packaging B65B 17/02 -)
B65D 71/00	Bundles of articles held together by packaging elements for convenience of storage or transport, e.g. portable segregating carrier for plural receptacles such as beer cans, pop bottles; Bales of material (-binding of hay or straw A01D , A01F 1/00 ; bundling or baling B65B , e.g. B65D 13/00 , B65D 27/00 -)
B65D 71/0085	• {Packaging elements adhered to the articles, e.g. a carton sheet (-adhesive tapes B65D 63/1009 -)}
U B65D 71/06	• Packaging elements holding or encircling completely or almost completely the bundle of articles, e.g. wrappers
B65D 71/063	• • {Wrappers formed by one or more films or the like, e.g. nets (- B65D 71/08 takes precedence; wrappers formed by folding a single blank B65D 71/12 ; wrappers formed by folding two or more blanks B65D 71/38 -)}
B65D 71/066	• • • {and provided with inserts (- B65D 7/10 takes precedence -)}
B65D 71/08	• • Wrappers shrunk by heat {or under tension, e.g. stretch films, films tensioned by compressed articles (-wrappers formed by folding a single blank B65D 71/12 ; wrappers formed by folding two or more blanks B65D 71/38 -)}
B65D 71/12	• • the packaging elements {e.g. wrappers}being formed by folding a single blank
B65D 71/14	• • • having a tubular shape {e.g. tubular wrappers}without end walls (-sleeves B65D 59/04 -)
U B65D 71/28	• • • • characterised by the handles
B65D 71/30	• • • • unitary {i.e. integral}with the tubular packaging elements
B65D 71/34	• • • • characterised by {weakened lines or other opening devices}
B65D 71/38	• • the packaging elements {e.g. wrappers}being formed by folding and interconnecting two or more blanks
B65D 71/40	• comprising a plurality of articles held together only partially by packaging elements formed by folding a blank {or several blanks}
U B65D 71/70	• Trays provided with projections or recesses in order to assemble multiple articles, e.g. intermediate elements for stacking
B65D 71/72	• • formed by folding one or more blanks, the articles being inserted in openings in a wall (-trays with apertures located within an external paper container B65D 5/5038 -)}
B65D 73/00	Packages comprising articles attached to cards, sheets, or webs ({ B65D 85/18 takes precedence } ; cards for buttons, collar-studs, or sleeve-links A44B 7/00 ; attaching articles to cards, sheets, or webs B65B 15/00 -)
B65D 73/0007	• {the articles being attached to the plane surface of a single card (- B65D 75/30 takes precedence -)}
B65D 73/0035	• {the articles being retained within a recess or a series of recesses provided in a single card (- B65D 75/32 takes precedence -)}
B65D 73/0064	• {the articles being supported by or suspended from a tag-like element (-hangers for wearing apparel A47G 25/00 -)}
B65D 73/0078	• {the articles being retained or enclosed in a folded-over or doubled card (- B65D 75/20 takes precedence -)}
B65D 75/00	Packages comprising articles or materials partially or wholly enclosed in strips, sheets, blanks, tubes, or webs of flexible sheet material, e.g. in folded wrappers (- B65D 71/00 takes precedence; wrapping B65B 11/00 -)
B65D 75/002	• {in shrink films (- B65D 71/08 takes precedence -)}
U B65D 75/04	• Articles or materials wholly enclosed in single sheets or wrapper blanks

- U B65D 75/20
 - in sheets or blanks doubled around contents and having their opposed free margins united, e.g. by pressure-sensitive adhesive, crimping, heat-sealing, or welding
- B65D 75/22
 - the sheet or blank being recessed to accommodate contents{(-containers simulating a book [B65D 77/006](#)-)}
- B65D 75/225
 - {the sheet or blank comprising more than one fold line{(-[B65D 75/245](#) takes precedence-)}
- U B65D 75/28
 - Articles or materials wholly enclosed in composite wrappers, i.e. wrappers formed by associating or interconnecting two or more sheets or blanks
- U B65D 75/30
 - Articles or materials enclosed between two opposed sheets or blanks having their margins united, e.g. by pressure-sensitive adhesive, crimping, heat-sealing, or welding
- U B65D 75/32
 - one or both sheets or blanks being recessed to accommodate contents
- B65D 75/36
 - one sheet or blank being recessed and the other formed of relatively stiff flat sheet material, e.g. blister packages,{the recess or recesses being preformed(-[B65D 73/0057](#) , [B65D 73/0092](#) take precedence-)}
- B65D 75/38
 - Articles or materials enclosed in two or more wrappers disposed one inside the other{(-for shock absorbing purposes [B65D 81/03](#) ; for thermal insulating purposes [B65D 81/3893](#)-)}
- U B65D 75/52
 - Details
- B65D 75/527
 - {Tear-lines for separating a package into individual packages{(-[B65D 1/30](#) , [B65D 21/0206](#) , [B65D 75/34](#) take precedence-)}
- B65D 75/54
 - Cards, coupons, or other inserts or accessories{(-opening devices [B65D 75/70](#)-)}
- B65D 75/545
 - {the inserts or accessories being located within a pouch or envelope attached to the exterior of the packages, e.g. shipping mailers{(-envelope construction [B65D 27/00](#)-)}
- U B65D 75/56
 - Handles or other suspension means
- B65D 75/563
 - {Integral handles or suspension means{(-[B65D 75/566](#) takes precedence-)}
- B65D 75/58
 - Opening or contents-removing devices added or incorporated during package manufacture{(-[B65D 75/36](#) , [B65D 85/1027](#) take precedence-)}
- B65D 75/5827
 - {Tear-lines provided in a wall portion{(-[B65D 75/5805](#) , [B65D 75/5816](#) take precedence-)}
- U B65D 75/5833
 - {for tearing out a portion of the wall}
- B65D 75/5844
 - {the portion of the wall being a narrow strip, e.g. between lines of weakness{(-[B65D 75/5838](#) takes precedence-)}
- B65D 75/5861
 - {Spouts{(-[B65D 75/5811](#) , [B65D 75/5822](#) take precedence-)}
- B65D 75/5888
 - {Tear-lines for removing successive sections of a package{(-for separating package into individual packages [B65D 75/527](#)-)}
- U **B65D 77/00**

Packages formed by enclosing articles or materials in preformed containers, e.g. boxes, cartons, sacks, bags
- B65D 77/006
 - {Containers simulating a book{(-pencil cases [A45C 11/34](#) ; books, book covers [B42D](#) ; albums, filing appliances, e.g. boxes, [B42F](#) ; for videos [G11B](#)-)}
- U B65D 77/04
 - Articles or materials enclosed in two or more containers disposed one within another
- U B65D 77/0413
 - {the inner and outer containers being rigid or semi-rigid and the outer container being of polygonal cross-section formed by folding or erecting one or more blanks, e.g. carton}

Groups [B65D 83/75](#) to [B65D 83/759](#) do not correspond to former or current IPC groups. Concordance CPC : IPC for these groups is as follows: - [B65D 83/75](#) to [B65D 83/759](#) : [B65D 83/14](#)

- B65D 83/0005 • {Containers or packages provided with a piston or with a movable bottom or partition having approximately the same section as the container {[B65D 83/0072](#) takes precedence-}}
- B65D 83/0038 • • {moved by a spring-like mechanism {[B65D 83/005](#) , [B65D 83/0817](#) , [B65D 83/0858](#) take precedence-}}
- B65D 83/0044 • • {the piston having a dispensing opening formed in the piston {[B65D 83/0016](#) takes precedence-}}
- B65D 83/0094 • {Containers having an external wall formed as, or with, a diaphragm or the like which is deformed to expel the contents {[B65D 1/32](#) takes precedence-}}
- B65D 83/02 • for dispensing rod-shaped articles, e.g. needles { { packages for cigarettes provided with dispensing means [B65D 85/1009](#) } ; cigar or cigarette receptacles or boxes [A24F 15/00](#) ; { dispensers for drinking straws [A47G 21/184](#))}
- U B65D 83/04 • for dispensing annular, disc-shaped, spherical, or like small articles, e.g. tablets, pills
- B65D 83/0409 • • {the dispensing means being adapted for delivering one article, or a single dose, upon each actuation {[B65D 83/0445](#) takes precedence-}}
- U B65D 83/0445 • • {all the articles being stored in individual compartments}
- B65D 83/0454 • • • {the whole forming a circular container with rotating parts {[B65D 83/0463](#) takes precedence-}}
- B65D 83/06 • for dispensing powdered or granular material { { [B65D 83/04](#) takes precedence } ; spraying or atomising apparatus in general [B05B](#)-}
- B65D 83/08 • for dispensing thin flat articles in succession { {[B65D 83/0805](#) to [B65D 83/0894](#) intended for re-use [A47K 10/24](#)-}}

NOTE

[B65D 83/10](#) and [B65D 83/12](#) take precedence over [B65D 83/0805](#) to [B65D 83/0894](#)

- U B65D 83/0805 • • {through an aperture in a wall}
- U B65D 83/0811 • • • {with means for assisting dispensing}
- B65D 83/0817 • • • • {the articles being automatically urged towards the dispensing aperture, e.g. spring-loaded {[B65D 83/0823](#) takes precedence-}}
- B65D 83/0841 • • • • {and for cutting interconnected articles {[B65H 35/008](#)-}}

- U B65D 83/0847
 - {through an aperture at the junction of two walls}
- U B65D 83/0852
 - • {with means for assisting dispensing}
- B65D 83/0858
 - • • {the articles being automatically urged towards the dispensing aperture, e.g. spring-loaded (~~B65D 83/0864~~ takes precedence)}
- B65D 83/0882
 - • • {and for cutting interconnected articles (~~cutting devices for dispensers intended for re-use B65H 35/008~~)}
- B65D 83/14
 - for delivery of liquid or semi-liquid contents by internal gaseous pressure, i.e. aerosol containers {for a product delivered by a propellant (~~spraying devices for the destruction of noxious animals or plants A01M 7/00~~, for therapeutic purposes A61M 11/00; spraying or atomizing apparatus in general B05B; aerosol compositions, e.g. propellants C09K 3/30; pumping of fluid by direct contact of another fluid, e.g. siphons F04F; fluid-delivery valves in general F16K 21/00; discharge nozzles in general F16K 31/58; vessels for containing or storing compressed, liquefied, or solidified gases F17C)}
- B65D 83/16
 - • characterised by the actuating means (~~actuation occurring by moving the aerosol container relative to an outer shell B65D 83/386~~; involved in metering valve assemblies B65D 83/546)}
- B65D 83/20
 - • {operated by manual action, e.g. button-type actuator or} actuator cap (~~actuators formed as a rigid elongate spout B65D 83/306~~)
- B65D 83/201
 - • • {Lever-operated actuators (~~B65D 83/206~~ takes precedence)}
- B65D 83/202
 - • • • {combined with a hand grip (~~Hand-held or body-worn self-defense devices using aerosol containers F41H 9/10~~ ~~Hand-held or body-worn self-defense devices using aerosol containers F41H 9/10~~)}
- B65D 83/203
 - • • • {comprising an extension rod located between the aerosol container and the hand grip (~~setting-out line markings on playing courts A63C 19/065~~; marking-out on finished paving by spraying from aerosol containers E01C 23/227)}
- B65D 83/207
 - • • {Actuators comprising a manually operated valve and being attachable to the aerosol container, e.g. downstream a valve fitted to the container; Actuators associated to container valves with valve seats located outside the aerosol container (~~portable spraying apparatus comprising pressurised supply containers B05B 7/2402~~, B05B 9/0805; manually actuated controlling means for spraying apparatus B05B 12/002; actuators connected to the aerosol container by a flexible tube B65D 83/756)}
- B65D 83/22
 - • with means to disable actuation, {e.g. with actuator locking means that can be manually put in place again after use to prevent, e.g. unintended, actuation until next use} (~~B65D 50/00~~ takes precedence; { preventing delivery when the container is incorrectly oriented B65D 83/65 })
- B65D 83/224
 - • • {Tamper indicating means obstructing initial actuation, e.g. removable (~~container closure having to be perforated B65D 83/382~~; tamper indicating means located in front of outlets B65D 83/7538)}
- U B65D 83/28
 - • Nozzles, nozzle fittings or accessories specially adapted therefor
- B65D 83/285
 - • {for applying the contents, e.g. brushes, rollers, pads, spoons, razors, scrapers (~~closures with pads or like contents-applying means B65D 47/42~~; brushes with integral pre-pressurised reservoirs A46B 11/0017; domestic cleaning implements with liquid-feeding devices A47L 13/00)}
- B65D 83/38
 - • Details of container body (~~pressure relief devices B65D 83/70~~)
- B65D 83/40
 - • Closure caps {actuator caps (B65D 83/205)}
- B65D 83/42
 - • Filling or charging means (~~Filling liquids into containers B65B 3/12~~; ~~Filling liquids into containers B65B 3/12~~; Adding propellants to aerosol containers B65B 31/003)}

B65D 83/44	<ul style="list-style-type: none"> • Valves specially adapted therefor; Regulating devices (filling or charging means B65D 83/42 ; { pressure regulators releasing propellant inside the container B65D 83/663 } ; pressure relief devices B65D 83/70-)
B65D 83/46	<ul style="list-style-type: none"> • • Tilt valves (B65D 83/50 takes precedence-)
B65D 83/48	<ul style="list-style-type: none"> • • Lift valves, e.g. operated by push action (B65D 83/50 takes precedence; { adapted for metering and for continuous delivery B65D 83/543 })
B65D 83/56	<ul style="list-style-type: none"> • {with means for preventing delivery when the container is incorrectly oriented, e.g.}shut-off when inverted({-for disabling actuation B65D 83/22-})
B65D 83/60	<ul style="list-style-type: none"> • Product and propellant separated({-portable fire extinguishers wherein extinguishing material and pressure gas are stored in separate containers A62C 13/66-})
B65D 83/62	<ul style="list-style-type: none"> • • by membrane, bag, or the like({-containers in which the content is delivered by the contracting forces inherent in the bag B65D 83/0061-})
B65D 83/625	<ul style="list-style-type: none"> • • • {the propellant being generated by a chemical or electrochemical reaction (-for pressure gas in portable fire extinguishers A62C 13/02-)}
U B65D 83/64	<ul style="list-style-type: none"> • • • by piston
B65D 83/643	<ul style="list-style-type: none"> • • • {the propellant being generated by a chemical or electrochemical reaction (-for pressure gas in portable fire extinguishers A62C 13/02-)}
B65D 83/646	<ul style="list-style-type: none"> • • • {the piston being provided with a dispensing opening through which the contents are dispensed (-containers with such a dispensing piston, adapted for hand-held, manually operated spray apparatus B05B 11/0051 , in general B65D 83/0044-)}
U B65D 83/66	<ul style="list-style-type: none"> • • • first separated, but finally mixed,{e.g. in a dispensing head(mixing in general B01F)}
B65D 83/666	<ul style="list-style-type: none"> • • • {product and propellant being totally mixed on, or prior to, first use, e.g. by braking an ampoule containing one of those components (B65D 83/687 takes precedence; portable spraying apparatus comprising a container pressurized by a gas cartridge B05B 9/0833-)}
U B65D 83/68	<ul style="list-style-type: none"> • Dispensing two or more products,{e.g. sequential dispensing or simultaneous dispensing of two or more products without mixing them}
B65D 83/682	<ul style="list-style-type: none"> • • {the products being first separated, but finally mixed, e.g. in a dispensing head (mixing in general B01F)}
B65D 83/75	<ul style="list-style-type: none"> • {-Aerosol containers not provided for in groups B65D 83/16 to B65D 83/74-}
U B65D 83/753	<ul style="list-style-type: none"> • • {characterised by details or accessories associated with outlets}
B65D 83/7535	<ul style="list-style-type: none"> • • • {Outlet valves opened by the product to be delivered (-adapted for hand-held, manually operated spray apparatus B05B 11/0062-)}
B65D 83/7538	<ul style="list-style-type: none"> • • • {Tamper indicating means located in front of outlets (-tamper indicating means obstructing initial actuation B65D 83/224-)}
B65D 83/754	<ul style="list-style-type: none"> • • {comprising filters in the fluid flow path (-filters specially adapted for spraying plants or apparatus B05B 15/008-)}
B65D 83/756	<ul style="list-style-type: none"> • • {comprising connectors, e.g. for tyre valves, or actuators connected to the aerosol container by a flexible tube (-auto-repairing or self-sealing arrangement for repairing plastic articles B29C 73/16-)}
B65D 83/757	<ul style="list-style-type: none"> • • {Tamper-indicating means (-actuators with tamper-indicating means B65D 83/224 ; tamper indicating means located in front of outlets B65D 83/7538-)}

B65D 85/00

Containers, packaging elements or packages specially adapted for particular articles or materials (~~-B65D 71/00 , B65D 83/00 take precedence; hand implements, travelling equipment A45C ; cosmetic or toilet equipment A45D ; { for surgical instruments or appliances A61B 19/026 } ; containers specially adapted for medical or pharmaceutical purposes A61J 1/00 ; paint cans B44D 3/12 ; oil cans F16N 3/04 ; containers for carrying smallarms F41C 33/06 ; packaging of ammunition or explosive charges F42B 39/00 ; containers for record carriers, specially adapted for co-operation with the recording or reproducing apparatus G11B 23/00-~~)

NOTE

Attention is drawn to Note (4) following the title of this subclass

- B65D 85/02
 - for annular articles (~~-for web or tape-like material wound in flat spiral form B65D 85/671-~~)
- B65D 85/08
 - for compressible or flexible rod-shaped or tubular articles (~~-collapsible tubes per se B65D 35/00-~~)
- U B65D 85/10
 - • for cigarettes
- B65D 85/1009
 - • • {provided with proffering means (~~-B65D 85/1054 takes precedence-~~)}
- B65D 85/1081
 - • • {Inserts or accessories added or joined to the container, e.g. coins, pens, cards, spacers (~~-B65D 85/1009 takes precedence-~~)}
- B65D 85/14
 - • for collapsible {empty}tubes, {i.e. pliable tubular containers adapted to be permanently or temporarily deformed to expel contents}
- B65D 85/16
 - for compressible or flexible articles of other shapes (~~-for wearing apparel B65D 85/18-~~)
- U B65D 85/18
 - for wearing apparel, i.e. clothes, headgear, shoes
- B65D 85/185
 - • {Containers for shipping garments on hangers (~~-travelling or trunk wardrobes A47B 61/06-~~)}
- U B65D 85/20
 - for incompressible or rigid rod-shaped or tubular articles
- B65D 85/28
 - • for pencils or pens (~~-pencil boxes A45C 11/34-~~)
- U B65D 85/30
 - for articles particularly sensitive to damage by shock or pressure
- B65D 85/305
 - • {Bottle-crates (~~-formed in one piece B65D 1/243-~~)}
- B65D 85/50
 - for living organisms, articles, or materials sensitive to changes of environment or atmospheric conditions, e.g. land animals, birds, fish, water plants, non-aquatic plants, flower bulbs, cut flowers, foliage (~~-devices for transporting live fish A01K 63/02-~~)
- B65D 85/58
 - for ball bearings, washers, buttons, or like spherical or disc-shaped articles (~~-cards for buttons, collar-studs, sleeve-links A44B 7/00-~~)
- B65D 85/67
 - for other web or tape-like material (~~-with means for dispensing B65D 83/08-~~)
- U B65D 85/70
 - for materials not otherwise provided for
- B65D 85/804
 - • Disposable containers or packages with contents which are {mixed,}infused or dissolved in situ {i.e. without having been previously removed from the package (~~-B65D 65/46 takes precedence; tea infusers A47G 19/16 ; spoons or stirrers comprising beverage additives A47G 21/04-~~)}
- B65D 85/8043
 - • • {Packages adapted to allow liquid to pass through the contents (~~-B65D 85/808 takes precedence; coffee filters not used as packages A47J 31/00-~~)}
- B65D 85/808
 - • • for immersion in the liquid {to release part or all of their contents}, e.g. tea bags
- B65D 85/812
 - • • with features facilitating their {manipulation or}suspension (~~-B65D 85/8085 takes precedence-~~)

	B65D 85/816	<ul style="list-style-type: none"> • • into which liquid is added {and the resulting preparation is retained}, e.g. cups preloaded with powder or dehydrated food
	B65D 88/00	Large containers (-component parts, details or accessories B65D 90/00 ; construction or assembling of bulk storage containers employing civil engineering techniques in situ or off the site E04H 7/00 ; gas holders of variable capacity F17B ; vessels for containing or storing compressed, liquefied or solidified gases F17C -)
	B65D 88/02	<ul style="list-style-type: none"> • rigid (-B65D 88/34 to B65D 88/78 take precedence; hoppers B65D 88/26 ; { special vessels for collecting or storing rain-water for use in the household E03B 3/03 ; cesspools E03F 11/00 })
U	B65D 88/022	<ul style="list-style-type: none"> • • {in multiple arrangement, e.g. stackable, nestable, connected or joined together side-by-side}
	B65D 88/027	<ul style="list-style-type: none"> • • {single containers connected to each other by additional means so as to form a cluster of containers, e.g. a battery of containers} (-B65D 88/005 takes precedence-)

- B65G 53/528
 - • • {Flux combining or dividing arrangements (~~B65G 53/56~~ takes precedence)}
- B65G 53/58
 - • Devices for accelerating or decelerating flow of the materials; Use of pressure generators (~~controlling pressure of propelling gas [B65G 53/66](#)~~)
- B65G 53/66
 - • use of indicator or control devices, e.g. for controlling gas pressure, for controlling proportions of material and gas, for indicating or preventing jamming of material(~~controlling the flow of coal firing systems [C21B 5/003](#)~~)

B65G 57/00 - B65G 69/00 **Stacking or de-stacking; Loading or unloading** (~~by means incorporated in, or operatively associated with, conveyers [B65G 47/00](#) ; lift trucks [B60P](#) ; [B66F](#) ; handling sheet material or flat articles made therefrom [B65H](#) ; cranes [B66C](#) ; loading or unloading by soil-shifting or like equipment [E02F](#) ; stacking or de-stacking data record cards in association with machines for marking or sensing data [G06K](#)~~)

NOTE

In groups [B65G 57/00](#) to [B65G 61/00](#) , the following term is used with the meaning indicated:- "stacking" means disposing articles individually or in layers one above each other

B65G 57/00 **Stacking of articles** (~~[B65G 60/00](#) takes precedence; stacking of jumbo rolls [B41F](#) ; stackable containers [B65D](#) ; feeding, piling, or stacking sheets [B65H](#) ; stacked delivery of machined products, see the relevant classes for the machines~~)

- U [B65G 57/02](#) • by adding to the top of the stack
- U [B65G 57/11](#) • • the articles being stacked by direct action of the feeding conveyer
- [B65G 57/14](#) • • • the articles being transferred from carriers moving in an endless path adjacent to the stacks (~~conveyer constructions [B65G 15/00](#) to [B65G 35/00](#) ; combinations of conveyers [B65G 37/00](#)~~)

B65G 59/00 **De-stacking of articles** (~~[B65G 60/00](#) takes precedence~~)

B65G 61/00 **Use of pick-up or transfer devices or of manipulators for stacking or de-stacking articles not otherwise provided for** (~~manipulators [B25J](#)~~)

B65G 63/00 **Transferring or trans-shipping at storage areas, railway yards, harbours, {or in opening mining cuts}; Marshalling yard installations** (~~transferring refuse between vehicles or containers [B65F 9/00](#) ; dredging, soil shifting [E02F](#) ; conveyers used in co-operation with coal or like winning apparatus [E21C 47/00](#)~~)

- [B65G 63/04](#) • with essentially horizontal transit by bridges equipped with conveyers(~~cranes [B66C](#)~~)
- [B65G 63/06](#) • with essentially vertical transit (~~hoppers [B65D 88/26](#)~~)

B65G 65/00 **Loading or unloading** (~~of vehicles [B65G 67/00](#)~~)

- U [B65G 65/02](#) • Loading or unloading machines comprising essentially a conveyer for moving the loads associated with a device for picking-up the loads
- [B65G 65/04](#) • • with pick-up shovels (~~constructions of shovels [E02F](#)~~)
- [B65G 65/28](#) • Piling or unpling loose materials in bulk, e.g. coal, manure, timber, not otherwise provided for (~~by soil-shifting or like equipment [E02F](#)~~)
- [B65G 65/30](#) • Methods or devices for filling or emptying bunkers, hoppers, tanks, or like containers, of interest apart from their use in particular chemical or physical processes or their application in particular machines, e.g. not covered by a single other subclass (~~devices for tilting and emptying containers [B65G 65/23](#) ; such containers having means facilitating filling or emptying [B65D 88/54](#)~~)

NOTE

Methods or devices for filling bunkers, hoppers, or containers are only classified in group [B65G 65/30](#) if they are of general application apart from their use in particular processes or their application in particular machines or if they are not covered by a single other subclass

- [B65G 65/32](#) • • Filling devices (~~pneumatic conveyers [B65G 51/00](#) , [B65G 53/00](#)~~)
- [B65G 65/34](#) • • Emptying devices (~~conveyer constructions [B65G 15/00](#) to [B65G 35/00](#) ; devices similar to vehicle tipplers [B65G 67/48](#)~~)

- U B65G 65/40 . . . Devices for emptying otherwise than from the top
- U B65G 65/46 using screw conveyers
- B65G 65/463 {arranged vertically or substantially vertically within the container} (~~B65G 65/466~~ takes precedence-)
- B65G 65/48 using other rotating means, e.g. rotating pressure sluices in pneumatic systems{(~~B65G 53/46~~ takes precedence-)}

- B65G 67/00 Loading or unloading vehicles** (~~by means incorporated in the vehicles B60 to B64; ground or aircraft-carrier-deck installations B64F; transferring refuse between vehicles or containers B65F 9/00-~~)
- U B65G 67/02 . Loading or unloading land vehicles
- B65G 67/04 . . Loading land vehicles{(~~loading or unloading boats to or from land vehicles B60P 3/10-~~)}
- B65G 67/16 . . . Loading coke-oven products (~~discharging coke-ovens C10B 33/00-~~)
- B65G 67/18 . . . Refuelling locomotives with solid fuels (~~servicing locomotives B61K 11/02-~~)
- U B65G 67/24 . . Unloading land vehicles
- U B65G 67/32 . . . using fixed tipping installations
- B65G 67/34 Apparatus for tipping wagons or mine cars (~~inverting wagons B65G 67/48; platform-lifts with tiltable platforms B66F 7/22-~~)
- B65G 67/48 Vehicle tipplers (~~devices for washing or cleaning railroad vehicles B60S-~~)
- B65G 67/60 . Loading or unloading ships (~~B65G 67/02~~ takes precedence; arrangement of ship-based loading or unloading equipment for cargo or passengers ~~B63B 27/00-~~)
- B65G 67/62 . . using devices influenced by the tide or by the movement of the ship, e.g. devices on pontoons (~~horizontal loading or unloading platforms B65G 69/22; loading ramps B65G 69/28-~~)

- B65G 69/00 Auxiliary measures taken, or devices used, in connection with loading or unloading** (~~in vehicles, see the relevant subclasses; preventing, minimising, or fighting fire A62C~~)
- U B65G 69/04 . Spreading out the materials conveyed over the whole surface to be loaded; Trimming heaps of loose materials
- B65G 69/0408 . . {by relatively moving an endless feeding means} (~~B65G 69/0458~~ takes precedence-)
- B65G 69/0441 . . {with chutes, deflector means or channels} (~~B65G 69/0458~~ takes precedence-)
- B65G 69/045 . . {with scraping devices} (~~B65G 69/0416~~ takes precedence-)
- B65G 69/08 . Devices for emptying storage spaces as completely as possible (~~devices preventing the formation of bridges B65D 88/64-~~)
- B65G 69/10 . Obtaining an average product from stored bulk material (~~for measuring or testing G01-~~)
- B65G 69/22 . Horizontal loading or unloading platforms (~~pile tables B65H; as road or railway equipment E01F 1/00-~~)
- B65G 69/28 . Loading ramps (~~as road or railway equipment E01F 1/00-~~)

Project: N/A (B65H)

B65H 1/00 -
B65H 15/00

B65H 1/00

Feeding articles to machines; Separating articles from piles; Pile supports (manipulators ~~B25J~~)

Supports or magazines for piles from which articles are to be separated (~~carriers used for associating, collating, or gathering articles B65H 39/00-~~)

B65H 1/08	• with means for advancing the articles to present the articles to the separating device{(-B65H 1/02 takes precedence-)}
B65H 1/10	• • comprising weights{(-B65H 1/022 takes precedence-)}
B65H 1/12	• • comprising spring{(-B65H 1/022 takes precedence-)}
B65H 1/14	• • comprising positively-acting mechanical devices{(-B65H 1/025 takes precedence-)}
B65H 1/16	• • comprising pneumatic or hydraulic means{(-B65H 1/18 , B65H 1/20 take precedence-)}
U B65H 1/26	• with auxiliary supports to facilitate introduction or renewal of the pile
B65H 1/266	• • {Support fully or partially removable from the handling machine, e.g. cassette, drawer (-B65H 1/027 takes precedence-)}
B65H 1/30	• with means for replenishing the pile during continuous separation of articles therefrom{(-B65H 1/22 takes precedence-)}
B65H 3/00	Separating articles from piles (-associating, collating, or gathering articles B65H 39/00 ; machines for separating superposed webs B65H 41/00 ; unpling thin material combined with folding B65H 45/26 ; combinations of piling and depiling operations, of interest apart from the single operation of piling or depiling B65H 83/00 , { B07C 1/02 , G07D 11/0084 })
U B65H 3/02	• using friction forces between articles and separator
B65H 3/06	• • Rollers or like rotary separators{(-B65H 3/42 takes precedence-)}
B65H 3/063	• • • {separating from the bottom of pile (-B65H 3/0615 , B65H 3/0623 take precedence-)}
B65H 3/0638	• • • {Construction of the rollers or like rotary separators (-B65H 3/0615 takes precedence; construction of feed or guide rollers B65H 27/00-)}
B65H 3/08	• using pneumatic force{(-B65H 3/40 , B65H 3/42 take precedence-)}
U B65H 3/0808	• • {Suction grippers}
U B65H 3/085	• • • {separating from the bottom of pile}
B65H 3/0858	• • • • {this action resulting merely in a curvature of each article being separated (-in combination with the use of screw or like separators B65H 3/28-)}
B65H 3/0891	• • • {Generating or controlling the depression (-B65H 3/0883 , B65H 3/14 take precedence; in response to abnormal circumstances B65H 7/16-)}
B65H 3/30	• by escapement devices (-screw and like separators B65H 3/28-); from staggered piles; from piles of articles having staggered formations, e.g. cuts or perforations
B65H 3/32	• by elements, e.g. fingers, plates, rollers, inserted or traversed between articles to be separated and remainder of the pile (-such elements acting only as supplementary devices to assist separation or prevent double feed B65H 3/50-)
B65H 3/40	• by two or more separators acting alternately on the same pile (-rotary or oscillating bodies carrying two or more separators B65H 3/42-)
B65H 3/46	• Supplementary devices or measures to assist separation or prevent double feed (-control means comprising detectors responsive to double feed B65H 7/12-)
B65H 3/56	• • Elements, e.g. scrapers, fingers, needles, brushes, acting on separated article or on edge of the pile{(-B65H 3/52 takes precedence-)}
B65H 5/00	Feeding articles separated from piles; Feeding articles to machines (identical mechanisms or parts for delivering or advancing articles from machined ({ B65H 9/00 takes precedence; } identical mechanisms or parts for delivering or advancing articles from machines B65H 29/00 ; recirculating articles B65H 85/00 , { G03B 27/6257 })))

	B65H 5/002	• {Adaptations of counting devices}(-delivery of articles from machines B65H 29/001 -)}
	B65H 5/02	• by belts or chains,{e.g. between belts or chains}(-by combinations of endless conveyers and grippers B65H 5/085 ; by suction belts B65H 5/224 -)}
	B65H 5/04	• by movable tables or carriages}{-rotary tables B65H 5/18 ; { suction gripper or gripper tables B65H 5/10)}
	B65H 5/06	• by rollers}{or balls e.g. between rollers}(-transport by suction rollers B65H 5/226 -)}
U	B65H 5/08	• by grippers, e.g. suction grippers
	B65H 5/085	• • {by combinations of endless conveyers and grippers}{-suction belts B65H 5/224 -)}
	B65H 5/10	• • Reciprocating or oscillating grippers}{e.g. suction or gripper tables}
	B65H 5/22	• by air-blast or suction device}{-suction grippers B65H 5/08 -)}
U	B65H 5/222	• • {by suction devices}
	B65H 5/224	• • • {by suction belts}{- B65H 11/005 takes precedence-)}
U	B65H 5/30	• Opening devices for folded sheets or signatures
	B65H 5/303	• • {comprising movable endless means for opening the folded sheets}{- B65H 5/308 takes precedence-)}
	B65H 5/305	• • {comprising rotary means for opening the folded sheets}{- B65H 5/308 takes precedence-)}
U	B65H 7/00	Controlling article feeding, separating, pile-advancing, or associated apparatus, to take account of incorrect feeding, absence of articles, or presence of faulty articles
U	B65H 7/02	• by feelers or detectors
	B65H 7/04	• • responsive to absence of articles, e.g. exhaustion of pile}{- B65H 7/14 takes precedence-}
	B65H 7/06	• • responsive to presence of faulty articles or incorrect separation or feed}{- B65H 7/14 takes precedence-}
	B65H 7/10	• • • responsive to incorrect side register}{-controlling transverse register of webs B65H 23/032 -)}
U	B65H 9/00	Registering, e.g. orientating, articles; Devices therefor
	B65H 9/04	• Fixed or adjustable stops or gauges}{-gauge pins B65H 9/02 -)}
U	B65H 9/10	• Pusher and like movable registers; Pusher or gripper devices which move articles into registered position
	<p><u>NOTE</u></p> <p>After the notation of the groups B65H 9/10 to B65H 9/108 and separated therefrom by a + sign, the notation L may be added to indicate that the device moves articles, already positioned in registered position according to a first direction, into registered position along a second direction perpendicular to the first one, e.g. for lateral registering</p>	
U	B65H 9/103	• • {acting by friction or suction on the article for pushing or pulling it into registered position, e.g. against a stop}
	B65H 9/106	• • • {using rotary driven elements as part acting on the article}{- B65H 9/105 takes precedence; registering laterally while article is forwarded in principal direction B65H 9/16 -)}
U	B65H 15/00	Overturning articles
	B65H 15/02	• Overturning piles

B65H 16/00 - B65H 27/00	Feeding webs to or from machines; Winding or unwinding webs; Splicing webs (web-delivering apparatus incorporating devices for performing auxiliary operations B65H 35/00 , B65H 37/00 ; associating two or more webs B65H 39/16 ; winding or unwinding metal band or like flexible metallic material during manufacture B21C ; { cutting machines or devices in general B26D } ; inselective printers, e.g. typewriters, ink-ribbon mechanisms B41J ; in cinematographic or photographic apparatus G03B ; winding, unwinding, or feeding tape to, in, or from, information processing apparatus G06 , G11B)
B65H 16/00	Unwinding, paying-out webs (reel-to-reel type web winding and unwinding mechanisms B65H 18/103 , B65H 18/145)
U B65H 16/02 B65H 16/028	<ul style="list-style-type: none"> • Supporting web roll • {on its outer circumference (B65H 16/08 takes precedence)}
