NOTES

This group covers :

- systems for detecting the presence of an object, e.g. by reflection or reradiation from the object itself, or from a transponder associated with the object, for determining the distance or relative velocity of an object, for providing a co-ordinated display of the distance and direction of an object or for obtaining an image thereof;
- systems arranged for mounting on a moving craft or vehicle and using the reflection of waves from an extended surface external to the craft, e.g. the surface of the earth, to determine the velocity and direction of motion of the craft

relative to the surface.

This group does not cover :

- systems for determining the direction of an object by means not employing reflection or reradiation, which are covered by groups [G01S 1/00](#) or [G01S 3/00](#) ;
- systems for determining distance or velocity of an object by means not employing reflection or reradiation, which are covered by group [G01S 11/00](#) .

U G01S 15/00 Systems using the reflection or reradiation of acoustic waves, e.g. sonar systems

NOTES

This group covers :

- systems for detecting the presence of an object, e.g. by reflection or reradiation from the object itself, or from a transponder associated with the object, for determining

the distance or relative velocity of an object,
for
providing a co-ordinated display of the distance
and
direction of an object or for obtaining an image
thereof;
- systems arranged for mounting on a moving craft or
vehicle
and using the reflection of waves from an extended
surface
external to the craft, e.g. the surface of the earth,
to
determine the velocity and direction of motion of the
craft
relative to the surface.

This group does not cover :

- systems for determining the direction of an object by
means
not employing reflection or reradiation, which are
covered
by groups [G01S 1/00](#) or [G01S 3/00](#)
;
- systems for determining distance or velocity of an
object
by means not employing reflection or reradiation, which
are
covered by group [G01S 11/00](#) .

- | | |
|--------------|--|
| G01S 15/02 | • using reflection of acoustic waves (G01S 15/66 takes precedence-) |
| U G01S 15/06 | • • Systems determining the position data of a target |

- G01S 15/876
 - • {Combination of several spaced transmitters or receivers of known location for determining the position of a transponder or a reflector (~~G01S 15/872~~ takes precedence)}
- G01S 15/88
 - Sonar systems specially adapted for specific applications (~~seismic or acoustic prospecting or detecting G01V 1/00~~)
- U G01S 15/89
 - • for mapping or imaging
- U G01S 15/8906
 - • • {Short-range imaging systems; Acoustic microscope systems using pulse-echo techniques}
- G01S 15/8909
 - • • • {using a static transducer configuration (~~sound-focusing or directing per se G10K 11/26~~)}
- G01S 15/8934
 - • • • {using a dynamic transducer configuration (~~mounting transducers, e.g. provided with mechanical moving or orienting device per se G10K 11/004~~)}
- U G01S 15/8965
 - • • • {using acousto-optical or acousto-electronic conversion techniques}
- G01S 15/8968
 - • • • • {using acoustical modulation of a light beam (~~acousto-optical light control devices G02F 1/11 , G02F 1/33~~)}
- G01S 15/897
 - • • • • {using application of holographic techniques (holography per se G03H)}
- G01S 15/8975
 - • • • • {using acoustical image/electron beam converter tubes (~~tubes therefor H01J 31/495~~)}
- G01S 15/8977
 - • • • {using special techniques for image reconstruction, e.g. FFT, geometrical transformations, spatial deconvolution, time deconvolution (~~digital image processing per se G06T 1/00~~)}
- U G01S 15/93
 - • for anti-collision purposes
- U G01S 15/931
 - • • {between land vehicles; between land vehicles and fixed obstacles}
- G01S 2015/937
 - • • • {sensor installation details (~~constructional features of transducers G01S 7/521 and B06B~~; casing of transducers, e.g. housing, cover or filler details, ~~G10K 9/22~~ ; mounting of transducers, i.e. fixture, fitting or holder details, ~~G10K 11/004~~)}
- G01S 2015/938
 - • • • • {in the bumper area (~~radar in bumper area G01S 2013/9389~~ ; bumper with obstacle sensor of electric or electronic type ~~B60R 19/483~~)}
- G01S 17/00**

Systems using the reflection or reradiation of electromagnetic waves other than radio waves, e.g. lidar systems (~~photogrammetry or videogrammetry G01C 11/00~~)

NOTE

The note after group [G01S 13/00](#) also applies to this group.
- G01S 17/02
 - Systems using the reflection of electromagnetic waves other than radio waves (~~G01S 17/66~~ takes precedence)
- U G01S 17/06
 - • Systems determining position data of a target
- G01S 17/08
 - • • for measuring distance only (~~indirect measurement G01S 17/46~~ ; active triangulation systems ~~G01S 17/48~~ ; passive systems using a parallax triangle ~~G01C 3/10 , G01C 3/22 , G01C 3/24 , G01C 3/26~~)
- G01S 17/10
 - • • • using transmission of interrupted pulse-modulated waves (~~determination of distance by phase measurements G01S 17/32~~)
- G01S 17/42
 - • • Simultaneous measurement of distance and other co-ordinates (~~indirect measurement G01S 17/46~~)
- U G01S 17/46
 - • • Indirect determination of position data
- G01S 17/48
 - • • • Active triangulation systems, i.e. using the transmission and reflection of electromagnetic waves other than radio waves (~~passive systems using a parallax triangle G01C 3/10 , G01C 3/22 , G01C 3/24 , G01C 3/26~~ ; active systems for automatic generation of focusing signals ~~G02B 7/32~~)

- G01S 17/74
- Systems using reradiation of electromagnetic waves other than radio waves, e.g. IFF, i.e. identification of friend or foe{(teaching or practice apparatus for gun-arming or gun-laying using reflecting targets or active targets [F41G 3/26](#))}
- U G01S 19/00** **Satellite radio beacon positioning systems; Determining position, velocity or attitude using signals transmitted by such systems**
- NOTE**
- In this group, or in the patent documents classified in this group, the following abbreviations are often used:
- PDOP = Position Dilution of Precision - RAIM = Receiver Autonomous Integrity Monitoring
- U G01S 19/01**
- Satellite radio beacon positioning systems transmitting time-stamped messages, e.g. GPS [Global Positioning System], GLONASS [Global Orbiting Navigation Satellite System] or GALILEO
- U G01S 19/13**
- • Receivers
- G01S 19/21**
- • • interference related issues; {Issues related to cross-correlation, spoofing or other methods of denial of service}{(-interference-related aspects in spread spectrum receivers per se [H04B 1/7097](#)-)}
- G01S 19/24**
- • • Acquisition or tracking {or demodulation}of signals transmitted by the system{(-synchronisation aspects of direct sequence spread spectrum modulation [H04B 1/7073](#)-)}
- G01S 19/29**
- • • • carrier,{including Doppler,}related{(-[G01S 19/246](#) takes precedence-)}
- G01S 19/30**
- • • • code related{(-[G01S 19/246](#) takes precedence-)}
- G01S 2205/00** **Position-fixing by co-ordinating two or more direction or position line determinations; Position-fixing by co-ordinating two or more distance determinations (not used)**
- G01S 2205/001**
- Transmission of position information to remote stations{(not used)}

Project: N/A (G01T)

- G01T** **MEASUREMENT OF NUCLEAR OR X-RADIATION** {(-radiation analysis of materials, mass spectrometry [G01N](#); counters per se [G06M](#), [H03K](#); electric discharge tubes for analysing radiation or particles [H01J 40/00](#) , [H01J 47/00](#) , [H01J 49/00](#)-)}
- NOTES**
- This subclass covers the measurement of X-radiation, gamma radiation, corpuscular radiation, cosmic radiation or neutron radiation.
- Attention is drawn to the Notes following the title of class [G01](#).
- G01T 1/00** **Measuring X-radiation, gamma radiation, corpuscular radiation, or cosmic radiation** {(-[G01T 3/00](#) , [G01T 5/00](#) take precedence-)}
- G01T 1/02**
- Dosimeters {(-[G01T 1/15](#) takes precedence, measuring exposure time to X-rays [H05G 1/28](#)-)}
- G01T 1/04**
- • Chemical dosimeters{(-[G01T 1/06](#) , [G01T 1/08](#) take precedence-)}
- G01T 1/06**
- • Glass dosimeters {using colour change; including plastic dosimeters}
- G01T 1/08**
- • Photographic dosimeters {(-sensitive materials, processing thereof [G03C](#) ; { photometry [G01J 1/52](#))}
- U G01T 1/10**
- • Luminescent dosimeters
- G01T 1/105**
- • • Read-out devices {(-[G01T 1/115](#) takes precedence-)}
- G01T 1/11**
- • • Thermo-luminescent dosimeters{(-thermo-luminescent compositions [C09K 11/00](#)-)}

- G01T 1/14
 - • Electrostatic dosimeters (-construction of ionisation chambers [H01J 47/02](#) ; { electrometers [G01R 5/28](#) })
- G01T 1/15
 - Instruments in which pulses generated by a radiation detector are integrated, e.g. by a diode pump circuit (-pulse rate meters in general [G01R 23/02](#)-)
- G01T 1/16
 - Measuring radiation intensity (-[G01T 1/29](#) takes precedence; { self-powered detectors [G01T 3/006](#) ; using an ionisation chamber filled with a liquid or solid, e.g. frozen liquid, dielectric [G01T 3/008](#) })
- G01T 1/1603
 - • {with a combination of at least two different types of detector (-see provisionally also [G01T 1/16](#)-)}
- G01T 1/1606
 - • {-with other specified detectors not provided for in the other sub-groups of [G01T 1/16](#)-(-see provisionally also [G01T 1/16](#)-)}
- G01T 1/161
 - • Application in the field of nuclear medicine, e.g. in vivo counting{(-apparatus for radiation diagnosis [A61B 6/00](#)-)}
- G01T 1/1611
 - • • {using both transmission and emission sources sequentially (-SPECT imaging [G01T 1/1642](#) ; PET imaging [G01T 1/2985](#) ; detecting hidden objects, e.g. weapons, explosives [G01V 5/0008](#))}
- G01T 1/1612
 - • • • {with scintillation detectors (-[G01T 1/20](#) takes precedence-)}
- G01T 1/1614
 - • • • {with semiconductor detectors (-[G01T 1/24](#) takes precedence-)}
- G01T 1/1615
 - • • {using both transmission and emission sources simultaneously (-SPECT imaging [G01T 1/1642](#) ; PET imaging [G01T 1/2985](#) ; detecting hidden objects, e.g. weapons, explosives [G01V 5/0008](#))}
- G01T 1/1617
 - • • • {with scintillation detectors (-[G01T 1/20](#) takes precedence-)}
- G01T 1/1618
 - • • • {with semiconductor detectors (-[G01T 1/24](#) takes precedence-)}
- G01T 1/163
 - • • Whole body counters{ hand or feet contamination measurement [G01T 1/167](#) ; lung, brain, thyroid, kidney or the like counting [G01T 1/16](#)-}
- G01T 1/1635
 - • • • {involving relative movement between detector and subject; scanning beds (-profile scanning [G01T 1/166](#) ; positioning patients, tiltable tables for radiation diagnosis [A61B 6/04](#)-)}
- G01T 1/164
 - • • Scintigraphy (-radioisotopes [G21G 4/00](#) ; tracers [G21H 5/00](#) ; { measurement of spatial distribution [G01T 1/2914](#) ; apparatus for radiation diagnosis in different planes [A61B 6/02](#) })
- U G01T 1/1641
 - • • • {Static instruments for imaging the distribution of radioactivity in one or two dimensions using one or several scintillating elements; Radio-isotope cameras}
- G01T 1/1644
 - • • • • {using an array of optically separate scintillation elements permitting direct location of scintillations (-[G01T 1/1645](#) takes precedence-)}
- G01T 1/1647
 - • • • • {Processing of scintigraphic data (-not related to a particular imaging system [G01T 1/2992](#)-)}
- G01T 1/1648
 - • • • • {Ancillary equipment for scintillation cameras e.g. reference markers, devices for removing motion artifacts, calibration devices (-adapted for flow studies [G01T 1/1647](#)-)}
- G01T 1/166
 - • • • • involving relative movement between detector and subject ({ scanners in general without using scintigraphy [G01T 1/2964](#) })
- G01T 1/1663
 - • • • • {Processing methods of scan data, e.g. involving contrast enhancement, background reduction, smoothing, motion correction, dual radio-isotope scanning, computer processing (-for measuring spatial distribution of radiation [G01T 1/2992](#) ; general purpose image data processing [G06T 1/00](#) ; computerized tomography [G06T 11/003](#)-); Ancillary equipment(-colour printers [G01T 1/1666](#)-)}
- G01T 1/1666
 - • • • • • {adapted for printing different symbols or colours according to the intensity or energy level of the detected radioactivity (-depth discrimination in colour [G01T 1/2985](#)-)}

- G01T 1/167
 - • Measuring radioactive content of objects, e.g. contamination (whole body counters [G01T 1/163](#))
- G01T 1/169
 - • Exploration, location of contaminated surface areas (prospecting by the use of nuclear radiation e.g. of natural or induced radioactivity [G01V 5/00](#)) {in situ measurement, e.g. floor contamination monitor (directional detectors [G01T 1/2907](#))}
- G01T 1/17
 - • Circuit arrangements not adapted to a particular type of detector (pulse-selection circuits [H03K](#) , [G01R](#))
- G01T 1/171
 - • • {Compensation of dead-time counting losses (see provisionally also [G01T 1/17](#))}
- G01T 1/172
 - • • with coincidence circuit arrangements ([G01T 1/178](#) takes precedence; { combination of detectors, see [G01T 1/1603](#) , [G01T 1/30](#) , [G01T 1/361](#) })
- G01T 1/175
 - • • Power supply circuits (power supply circuits per se [H02J](#) ; converters [H02M](#))
- G01T 1/18
 - • with counting-tube arrangements, e.g. with Geiger counters (tubes [H01J 47/08](#) ; { with alarm provision [G01T 7/125](#) })
- G01T 1/185
 - • with ionisation chamber arrangements (construction of ionisation chambers [H01J 47/02](#) ; { gas analysis by ionisation [G01N 27/66](#) ; measuring pressure [G01L 9/00](#) ; leak detection [G01M 3/00](#) ; tele-measurements [G08C](#) })
- U G01T 1/20
 - • with scintillation detectors
- G01T 1/2004
 - • • {Scintilloscopes (fluoroscopes [G21K 4/00](#) ; radiation diagnosis [A61B 6/00](#))}
- U G01T 1/202
 - • • the detector being a crystal
- G01T 1/2023
 - • • • {Selection of materials (see provisionally also [G01T 1/202](#))}
- G01T 1/2026
 - • • • {Well-type detectors (see provisionally also [G01T 1/202](#))}
- U G01T 1/203
 - • • the detector being made of plastics
- G01T 1/2033
 - • • • {Selection of materials (see provisionally also [G01T 1/203](#))}
- G01T 1/2036
 - • • • {Well-type detectors (see provisionally also [G01T 1/203](#))}
- G01T 1/24
 - • with semiconductor detectors (semiconductor devices per se [H01L 31/00](#))
- G01T 1/241
 - • • {Electrode arrangements, e.g. continuous or parallel strips or the like (constructional or manufacturing details [H01L 31/00](#))}
- G01T 1/242
 - • • {Stacked detectors, e.g. for depth information} (constructional or manufacturing details [H01L 25/00](#))}
- G01T 1/243
 - • • {Modular detectors, e.g. arrays formed from self contained units (constructional or manufacturing details [H01L 25/00](#))}
- G01T 1/247
 - • • {Detector read-out circuitry (for processing gain or off-set correction [H04N](#))}
- G01T 1/249
 - • • {specially adapted for use in SPECT or PET (SPECT imaging [G01T 1/1642](#) ; PET imaging [G01T 1/2985](#) ; detecting hidden objects, e.g. weapons, explosives [G01V 5/0008](#))}
- G01T 1/26
 - • with resistance detectors (photoresistors [H01L 31/00](#))
- G01T 1/28
 - • with secondary-emission detectors (secondary-electron-emitting electrodes in general [H01J 1/32](#)) {optionally combined with scintillation counters (secondary emission tubes [H01J 43/00](#))}
- G01T 1/29
 - Measurement performed on radiation beams, e.g. position or section of the beam; Measurement of spatial distribution of radiation (scintigraphy [G01T 1/164](#) ; mass-spectrometers [H01J 49/025](#))
- G01T 1/2907
 - • {Angle determination; Directional detectors; Telescopes (prospecting by the use of nuclear radiation, e.g. of natural or induced radioactivity [G01V 5/00](#))}
- U G01T 1/2914
 - • {Measurement of spatial distribution of radiation}

- G01T 1/2921
 - • • {Static instruments for imaging the distribution of radioactivity in one or two dimensions; Radio-isotope cameras ~~(-using scintigraphy [G01T 1/1641-](#))~~}
 - G01T 1/295
 - • • {using coded aperture devices e.g. Fresnel zone plates ~~(-handling of radiation of particles e.g. using diaphragms, collimators, diffraction [G21K 1/00-](#))~~}
 - G01T 1/2957
 - • • {using channel multiplier arrays ~~(-channel multipliers [H01J 43/18](#) ; [G01T 1/1645](#) takes precedence-)~~}
 - G01T 1/2964
 - • • {Scanners ~~(-using scintigraphy [G01T 1/166-](#))~~}

Project: N/A (G02B)**G02B**

OPTICAL ELEMENTS, SYSTEMS, OR APPARATUS (-[G02F](#) takes precedence; measuring-instruments, see the relevant subclass of [G01](#), e.g. optical rangefinders [G01C](#); testing of optical elements, systems, or apparatus [G01M 11/00](#) ; spectacles [G02C](#); sound lenses [G10K 11/30](#) ; electron and ion "optics" [H01J](#); X-ray "optics" [H01J](#), [H05G 1/00](#) ; optical elements structurally combined with electric discharge tubes [H01J 5/16](#) , [H01J 29/89](#) , [H01J 37/22](#) ; microwave "optics" [H01Q](#); combination of optical elements with television receivers [H04N 5/72](#) ; heating arrangements specially adapted for transparent or reflecting areas [H05B 3/84](#) ; {optical apparatus [42H](#)})

NOTE

In this subclass, the following terms are used with the meanings indicated :

- "simple lens or prism" means a single lens or prism;
- "compound lens or prism" means an optical member, the constituents of which either are close together without air-space or (except in group [G02B 11/00](#)) are "in broken contact", i.e. with the air-space between the constituents having no essential optical influence;
- "objective" means a lens or an optical system designed to produce a real image of a real object;
- "eyepiece" means a lens or an optical system designed to produce a virtual image for viewing by the eye or by another optical system;
- "front" or "rear" is determined by looking from the more distant conjugate.

WARNING

The following IPC groups are not used in the CPC classification system. Subject matter covered by these groups is classified in the CPC groups:

[G02B 11/00](#) - [G02B 11/34](#) covered by [G02B 9/00](#) and subgroups and [G02B 13/00](#) and subgroups

G02B 1/00

Optical elements characterised by the material of which they are made (-compositions of optical glasses [C03C 3/00](#) ; cements for glass [C03C 27/00-](#))

- U G02B 1/002 • {made of materials engineered to provide properties not available in nature, e.g. metamaterials}

- G02B 1/005
- {made of photonic crystals or photonic band gap materials (~~photonic band-gap structures or photonic lattices in integrated optics G02B 6/1225 ; photonic band-gap structures or photonic lattices in optical fibres G02B 6/02295~~)}
- G02B 1/02
- made of crystals, e.g. rock-salt, semi-conductors (~~G02B 1/08 takes precedence~~)
- G02B 1/04
- made of organic materials, e.g. plastics (~~G02B 1/08 takes precedence~~)
- NOTE**
- In this group the use of specific polymers is indicated using the relevant subdivision of [C08L](#) preceded by a plus sign
- G02B 1/10
- {~~Coatings~~ **Optical coatings** produced by application to, or surface treatment of, optical elements, ~~e.g. anti-reflection-coatings~~ (~~G02B 1/08 takes precedence; reflecting-coatings G02B 5/08 ; coating of glass in general C03C 17/00~~)}

 - {with optical elements between opposed fibre ends which perform a function other than beam splitting (-having lens focusing means [G02B 6/32](#) ; utilising prism or grating [G02B 6/34](#)-)}

- G02B 6/268
 - • • {for modal dispersion control, e.g. concatenation of light guides having different modal dispersion properties (-graded index multimode fibres [G02B 6/0288](#) ; multimodal transmission systems [H04B10/13](#)-)}
- G02B 6/27
 - • • with polarisation selective and adjusting means ({ for wavelength selection [G02B 6/29302](#) ; of the integrated waveguide kind [G02B 6/126](#) } ; polarisation; polarisation systems in general [G02B 27/28](#) ; optical polarisation multiplex systems [H04J 14/06](#)-)
- U G02B 6/2726
 - • • • {in or on light guides, e.g. polarisation means assembled in a light guide}
- G02B 6/274
 - • • • {based on light guide birefringence, e.g. due to coupling between light guides (-[G02B 6/105](#) , [G02B 6/024](#) take precedence; mechanically induced birefringence [G02F 1/0134](#)-)}
- G02B 6/2746
 - • • • {comprising non-reciprocal devices, e.g. isolators, FRM, circulators, quasi-isolators (-magneto-optic non-reciprocal devices [G02F 1/093](#)-)}
- U G02B 6/2753
 - • • • {characterised by their function or use, i.e. of the complete device}
- G02B 6/278
 - • • • {Controlling polarisation mode dispersion [PMD]}, e.g. PMD compensation or emulation (-PMD minimised transmission systems [H04B 10/2569](#)-)}
- U G02B 6/28
 - • • having data bus means, i.e. plural waveguides interconnected and providing an inherently bidirectional system by mixing and splitting signals
- U G02B 6/2804
 - • • • {forming multipart couplers without wavelength selective elements, e.g. "T" couplers, star couplers}
- U G02B 6/2821
 - • • • • {using lateral coupling between contiguous fibres to split or combine optical signals}
- G02B 6/2826
 - • • • • {using mechanical machining means for shaping of the couplers, e.g. grinding or polishing (-grinding , polishing in general [B24](#)-)}
- G02B 6/2843
 - • • • • {the couplers having polarisation maintaining or holding properties (-polarisation preserving light guides [G02B 6/105](#)-)}
- G02B 6/2852
 - • • • • {using tapping light guides arranged sidewardly, e.g. in a non-parallel relationship with respect to the bus light guides (*light extraction or launching through cladding, with or without surface discontinuities, bent structures*)} (~~light extraction or launching through cladding, with or without surface discontinuities, bent structures~~)}
- G02B 6/2861
 - • • • • {using fibre optic delay lines and optical elements associated with them, e.g. for use in signal processing, e.g. filtering (-delay lines in general [H03H](#) , [H01P 9/00](#) ; optical computing devices [G06E](#)-)}
- G02B 2006/2865
 - • • • • {couplers of the 3x3 type }
- G02B 6/287
 - • • • Structuring of light guides to shape optical elements with heat application (-[G02B 6/255](#) takes precedence-)
- G02B 6/293
 - • • • with wavelength selective means ({ [G02B 6/02052](#) , [G02B 6/02057](#) take precedence } ; for optical elements in use, see the relevant subgroups of this subclass; optical wavelength-division multiplexing systems [H04J 14/02](#) ; { in or associated with an integrated waveguide arrangement [G02B 6/12007](#) ; mode multiplexing [G02B 6/14](#) })
- G02B 6/29301
 - • • • • {based on a phased array of light guides (-integrated arrayed waveguide gratings [G02B 6/12009](#)-)}
- G02B 6/29304
 - • • • • {operating by diffraction, e.g. grating (-[G02B 6/29301](#) takes precedence; spectrometers using gratings [G01J 3/18](#)-)}
- U G02B 6/29305
 - • • • • • {as bulk element, i.e. free space arrangement external to a light guide}
- G02B 6/29308
 - • • • • • {Diffraction element having focusing properties, e.g. curved gratings (-Rowland circle spectrometers [G01J 3/20](#)-)}

- G02B 6/29313 {characterised by means for controlling the position or direction of light incident to or leaving the diffractive element, e.g. for varying the wavelength response (~~switching~~ [G02B 6/35](#)-)}
- G02B 6/29316 {Light guides comprising a diffractive element, e.g. grating in or on the light guide such that diffracted light is confined in the light guide (~~G02B 6/02057~~ , [G02B 6/29332](#) , [G02B 6/29356](#) take precedence-)}
- U G02B 6/29317 {Light guides of the optical fibre type}
- G02B 6/29319 {With a cascade of diffractive elements or of diffraction operations (~~forming interferometer by splitting and recombining~~ [G02B 6/29347](#) - [G02B 6/29358](#)-)}
- G02B 6/29322 {Diffractive elements of the tunable type (~~G02B 6/02195~~ takes precedence; optical modulation devices based on a change of the optical properties of the medium [G02F 1/00](#)-)}
- G02B 6/29323 {Coupling to or out of the diffractive element through the lateral surface of the light guide (~~evanescent grating couplers~~ [G02B 6/29332](#)-)}
- G02B 6/29325 {of the slab or planar or plate like form, i.e. confinement in a single transverse dimension only (~~integrated circuit planar waveguide arrangements~~ [G02B 6/12007](#) ; specially adapted for lighting [G02B 6/0011](#)-)}
- G02B 6/29326 {Diffractive elements having focusing properties, e.g. curved gratings (~~Rowland circle spectrometers~~ [G01J 3/20](#)-)}
- U G02B 6/29331 {operating by evanescent wave coupling}
- G02B 6/29332 {Wavelength selective couplers, i.e. based on evanescent coupling between light guides, e.g. fused fibre couplers with transverse coupling between fibres having different propagation constant wavelength dependency (~~non wavelength-selective light guide couplers~~ [G02B 6/28](#)-)}
- G02B 6/29335 {Evanescent coupling to a resonator cavity, i.e. between a waveguide mode and a resonant mode of the cavity (~~wavelength selective means based on resonator cavity coupled non-evanescently~~ [G02B 6/29356](#) , [G02B 6/29358](#)-)}
- U G02B 6/29338 {Loop resonators}
- G02B 6/29341 {Loop resonators operating in a whispering gallery mode evanescently coupled to a light guide, e.g. sphere or disk or cylinder (~~evanescent coupling for sensing fluorescence~~ [G01N 21/648](#)-)}
- G02B 6/29346 {operating by wave or beam interference (~~interferometers for measuring~~ [G01B 9/02](#)-)}
- G02B 6/29356 {Interference cavity within a single light guide, e.g. between two fibre gratings (~~G02B 6/29347~~ - [G02B 6/2935](#) take precedence; evanescent coupling to a resonator cavity [G02B 6/29335](#)-)}
- G02B 6/29358 {Multiple beam interferometer external to a light guide, e.g. Fabry-Pérot, etalon, VIPA plate, OTDL plate, continuous interferometer, parallel plate resonator (~~G02B 6/29347~~ , [G02B 6/29349](#) , [G02B 6/2935](#) , [G02B 6/29361](#) take precedence; resonator evanescently coupled to light guide [G02B 6/29335](#)-)}
- U G02B 6/29361 {Interference filters, e.g. multilayer coatings, thin film filters, dichroic splitters or mirrors based on multilayers, WDM filters}
- G02B 6/29368 {Light guide comprising the filter, e.g. filter deposited on a fibre end (~~G02B 6/29359~~ takes precedence-)}
- U G02B 6/29371 {operating principle based on material dispersion}

- G02B 6/29374 {in an optical light guide (~~G02B 6/02214~~ takes precedence)}
- G02B 6/29376 {coupling light guides for controlling wavelength dispersion, e.g. by concatenation of two light guides having different dispersion properties (~~dispersion managed optical transmission systems H04B 10/25253~~)}
- U G02B 6/29379 {characterised by the function or use of the complete device}
- U G02B 6/2938 {for multiplexing or demultiplexing, i.e. combining or separating wavelengths, e.g. 1xN, NxM}
- U G02B 6/29382 {including at least adding or dropping a signal, i.e. passing the majority of signals}
- G02B 6/29385 {Channel monitoring, e.g. by tapping (~~channel monitoring in optical transmission systems H04B10/08~~)}
- G02B 6/29389 {Bandpass filtering, e.g. 1x1 device rejecting or passing certain wavelengths (~~G02B 6/2938~~ takes precedence)}
- G02B 6/29392 {Controlling dispersion (~~G02B 6/02214~~ takes precedence; modal dispersion control ~~G02B 6/268~~)}
- G02B 6/29394 {Compensating wavelength dispersion (~~G02B 6/29376~~ takes precedence; dispersion compensated optical transmission systems ~~H04B10/18~~)}
- G02B 6/29395 {configurable, e.g. tunable or reconfigurable (~~switching G02B 6/35~~)}
- G02B 6/32 having lens focusing means {positioned between opposed fibre ends (~~with lens being an integral part of the single fibre end G02B 6/262~~)}
- G02B 6/34 utilising prism or grating (~~G02B 6/293~~ takes precedence)}
- G02B 6/35 having switching means (~~optical switching in general G02B 26/08~~ ; by changing the optical properties of the medium ~~G02F 1/00~~)}
- U G02B 6/3502 {involving direct waveguide displacement, e.g. cantilever type waveguide displacement involving waveguide bending, or displacing an interposed waveguide between stationary waveguides}
- G02B 6/3504 {Rotating, tilting or pivoting the waveguides, or with the waveguides describing a curved path (~~rotary joint G02B 6/3628~~)}
- G02B 6/351 {involving stationary waveguides with moving interposed optical elements (~~G02B 6/3538~~ takes precedence; interposed waveguides ~~G02B 6/3502~~)}
- U G02B 6/3512 {the optical element being reflective, e.g. mirror}
- G02B 6/3518 {the reflective optical element being an intrinsic part of a MEMS device, i.e. fabricated together with the MEMS device (~~MEMS devices in general B81B~~; manufacture of MEM devices in general ~~B81C~~; micromechanical devices controlling the direction of light ~~G02B 26/0833~~)}
- G02B 6/3522 {the optical element enabling or impairing total internal reflection (~~using evanescent coupling G02B 6/3536~~)}
- G02B 6/353 {the optical element being a shutter, baffle, beam dump or opaque element (~~absorbers on light guide termination G02B 6/243~~)}
- G02B 6/3536 {involving evanescent coupling variation, e.g. by a moving element such as a membrane which changes the effective refractive index (~~mode converters G02B 6/14~~ ; adjustable lateral coupling between waveguides ~~G02B 6/283~~ ; electro- optical refractive index variations ~~G02F 1/0118~~)}
- G02B 6/3538 {based on displacement or deformation of a liquid (~~controlling the intensity of light by displacement or deformation of a fluid in general G02B 26/004~~ ; fluid-filled lens of variable focal length ~~G02B 3/14~~)}

- U G02B 6/354 . . . {Switching arrangements, i.e. number of input/output ports and interconnection types}
 - G02B 6/356 . . . {in an optical cross-connect device, e.g. routing and switching aspects of interconnecting different paths propagating different wavelengths to (re)configure the various input and output links (-switching polarized beams [G02B 6/3594](#) ; power equalizers [G02B 6/356](#) and [G02B 6/3594](#) ; path selecting means [H04Q 11/0001](#)-)}
 - U G02B 6/3564 . . . {Mechanical details of the actuation mechanism associated with the moving element or mounting mechanism details}
 - U G02B 6/3568 . . . {characterised by the actuating force}
 - G02B 6/357 . . . {Electrostatic force (-electrostatic forces controlling reflecting elements in general [G02B 26/0841](#)-)}
 - G02B 6/3572 . . . {Magnetic force (-magnetic forces controlling reflecting elements in general [G02B 26/085](#) ; magneto-optic devices [G02F 1/09](#)-)}
 - G02B 6/3576 . . . {Temperature or heat actuation (-thermal forces controlling reflecting elements in general [G02B 26/0866](#) ; thermo-optic devices [G02F 1/0147](#)-)}
 - G02B 6/3578 . . . {Piezoelectric force (-piezoelectric forces controlling reflecting elements in general [G02B 26/0858](#) ; piezo-optic devices [G02F 1/0131](#)-)}
 - G02B 6/3584 . . . {constructional details of an associated actuator having a MEMS construction; i.e. constructed using semiconductor technology such as etching (MEMS per se [B81B](#), [B81C](#))}
 - G02B 6/3586 . . . {Control or adjustment details, e.g. calibrating (-testing optical equipment [G01M 11/00](#)-)}
- WARNING**
The scope of this group has been changed: for rotating, tilting or pivoting the waveguides, or with the waveguides describing a curved path see [G02B 6/3504](#)
- G02B 6/3592 . . . {Means for removing polarization dependence of the switching means, i.e. polarization insensitive switching (-light guides coupling with polarization selective and adjusting means [G02B 6/27](#)-)}
 - G02B 6/3598 . . . {Switching means directly located between an optoelectronic element and waveguides, including direct displacement of either the element or the waveguide, e.g. optical pulse generation (-based on changing the optical properties of the medium [G02F 1/00](#) ; optical pulse generation in optical transmitters [H04B10/155](#) ; optical pulse generation by controlling laser operation [H01S 3/00](#)-)}
 - G02B 6/36 . . . Mechanical coupling means ({ [G02B 6/06](#) , [G02B 6/30](#) , [G02B 6/35](#) , [G02B 6/38](#) } , [G02B 6/255](#) , [G02B 6/42](#) take precedence-)
 - G02B 6/3608 . . . {Fibre wiring boards, i.e. where fibres are embedded or attached in a pattern on or to a substrate, e.g. flexible sheets (-optical ribbon cables in support members [G02B 6/4401](#)-)}
 - G02B 6/3616 . . . {Holders, macro size fixtures for mechanically holding or positioning fibres, e.g. on an optical bench (-supporting carriers of a micro-bench type [G02B 6/3648](#) ; micromanipulators [B25J 7/00](#) ; cassettes, bobbins [G02B 6/4439](#)-)}
 - G02B 6/3624 . . . {Fibre head, e.g. fibre probe termination (-optical details of light guide terminations [G02B 6/241](#) ; reshaping of light guides [G02B 6/2552](#) ; optical details of coupling light into or out of fibre end [G02B 6/262](#)-)}
 - G02B 6/3628 . . . {for mounting fibres to supporting carriers (-[G02B 6/3608](#) , [G02B 6/3616](#) take precedence-)}

- U G02B 6/3632 {characterised by the cross-sectional shape of the mechanical coupling means}
- G02B 6/3636 {the mechanical coupling means being grooves (~~-G02B 6/3652 takes precedence-~~)}
- G02B 6/3648 {Supporting carriers of a micro-bench type, i.e. with micro-machined additional mechanical structures (micro-structured devices per se [B81B](#))}
- G02B 6/3684 {characterised by the manufacturing process of surface profiling of the supporting carrier (~~-manufacturing micro-systems per se [B81C 1/00015](#)-~~)}
- G02B 6/3692 {with surface micro-machining involving etching, e.g. wet or dry etching steps (~~-surface micro-machining involving subtractive techniques [B81C 1/00055](#)-~~)}
- G02B 6/3696 {by moulding, e.g. injection moulding, casting, embossing, stamping, stenciling, printing, or with metallic mould insert manufacturing using LIGA or MIGA techniques (~~-shaping the mould surface by machining [B29C 33/38](#) ; moulding techniques [B29C 39/00](#) , [B29C 43/00](#) , [B29C 45/00](#) , [B29C 47/00](#) , [B29C 59/00](#) ; stamping, printing or embossing techniques [B81C 1/00444](#) ; surface micro-machining using LIGA [B81C 2201/032](#)-~~)}
- U G02B 6/38 . . . having fibre to fibre mating means
- G02B 6/3801 {Permanent connections, i.e. wherein fibres are kept aligned by mechanical means (~~-splices by bonding [G02B 6/255](#) ; fusion splices [G02B 6/2551](#)-~~)}
- G02B 6/3802 {Assembly tools, e.g. crimping tool or pressing bench (~~-splicing machines [G02B 6/2553](#)-~~)}
- G02B 6/3806 {Semi-permanent connections, i.e. wherein the mechanical means keeping the fibres aligned allow for removal of the fibres (~~-dismountable connectors [G02B 6/3807](#)-~~)}
- U G02B 6/3807 {Dismountable connectors, i.e. comprising plugs}
- U G02B 6/381 {of the ferrule type, e.g. fibre ends embedded in ferrules, connecting a pair of fibres}
- G02B 6/3812 {having polarisation-maintaining light guides (~~-light guides having polarisation effects per se [G02B 6/105](#)-~~)}
- G02B 6/3813 {for transmission of high energy beam (~~-coupling high energy sources and light guides [G02B 6/4296](#)-~~)}
- G02B 6/3816 {for use under water, high pressure connectors (provisionally see [G02B 6/4428](#))}
- G02B 6/3817 {containing optical and electrical conductors (~~-cables including electrical and optical conductors [H01B 11/22](#) ; **G092B6/38D2H** takes precedence-~~)}
- G02B 6/3818 {of a low-reflection-loss type (~~-[G02B 6/3813](#) takes precedence-~~)}
- G02B 6/382 {with index-matching medium between light guides (~~-provisionally see [G02B 6/4212](#)-~~)}
- G02B 6/3821 {with axial spring biasing or loading means (~~-[G02B 6/3847](#) takes precedence-~~)}
- G02B 6/3823 {containing surplus lengths, internal fibre loops (~~-provisionally see also [G02B 6/444](#)-~~)}
- U G02B 6/3826 {characterised by form or shape}
- G02B 6/3829 {Bent or angled connectors (~~-[G02B 6/3827](#) takes precedence-~~)}

	G02B 6/383 {Hermaphroditic connectors, i.e. two identical plugs mating with one another, each plug having both male and female diametrically opposed engaging parts; electric hermaphroditic coupling H01R 24/84 , H01R 13/28 }
	G02B 6/3831 {comprising a keying element on the plug or adapter, e.g. to forbid wrong connection (keying element on the ferrule G02B 6/3851 ; keying element for electrical coupling H01R 13/64 -)}
U	G02B 6/3833 {Details of mounting fibres in ferrules; Assembly methods; Manufacture}
U	G02B 6/3834 {Means for centering or aligning the light guide within the ferrule}
	G02B 6/3843 {with auxiliary facilities for movably aligning or adjusting the fibre within its ferrule, e.g. measuring position or eccentricity (testing the alignment of axes, including eccentricity, G01B 11/27 -)}
U	G02B 6/3847 {with means preventing fibre end damage, e.g. recessed fibre surfaces}
	G02B 6/3849 {using mechanical protective elements, e.g. caps, hoods, sealing membranes (G02B 6/3816 takes precedence; provisionally see H01R 13/44 -)}
	G02B 6/385 {Accessories for testing or observation of connectors (means for centering or aligning the light guide within the ferrule with auxiliary facilities for movably aligning or adjusting the fibre within its ferrule, measuring position, eccentricity G02B 6/3843 ; mechanical features associated with the optical testing of optical fibres G01M 11/088 -)}
	G02B 6/3853 {Lens inside the ferrule (lensed connectors G02B 6/32 -)}
	G02B 6/3855 {characterised by the method of anchoring or fixing the fibre within the ferrule (G02B 6/3854 takes precedence)}
U	G02B 6/3858 {Clamping, i.e. with only elastic deformation}
	G02B 6/3859 {Ferrules characterised by use of shape memory material (SMM), e.g. heat recoverable polymers, Ti-Ni compounds (chemical aspects of SMM see the relevant places under C08 and C22 ; SMM used for shaping by moulding B29C 61/00 ; SMM for electrical coupling H01R 4/01 , H01R 4/72 , H01R 12/856 , H02G 15/1806 -)}
	G02B 6/3861 {Adhesive bonding (adhesives in general C09J)}
	G02B 6/3863 {fabricated by using polishing techniques (grinding of the fibre ends B24B 19/226 -)}
	G02B 6/3865 {fabricated by using moulding techniques (shaping techniques of plastic materials in general B29C ; producing plastic optical fiber connectors B29D 11/0075 -)}
	G02B 6/3866 {Devices, tools or methods for cleaning connectors (cleaning in general B08B)}
U	G02B 6/3869 {Mounting ferrules to connector body, i.e. plugs}
	G02B 6/3871 {Ferrule rotatable with respect to plug body, e.g. for setting rotational position} (-adjusting fibre within the ferrule, G02B 6/3843 -); Fixation of ferrules after rotation
U	G02B 6/3873 {Connectors using guide surfaces for aligning ferrule ends, e.g. tubes, sleeves, V-grooves, rods, pins, balls}
	G02B 6/3885 {Multicore or multichannel optical connectors, i.e. one single ferrule containing more than one fibre, e.g. ribbon type (optical ribbon cable G02B 6/4403 , G02B 6/448 -)}

- G02B 6/3895
 - {identification of connection, e.g. right plug to the right socket or full engagement of the mating parts (-keying element on the plug or adapter [G02B 6/3831](#) ; keying element on the ferrule [G02B 6/3851](#) ; keying element for electrical connection [H01R 13/64](#)-)}
- G02B 6/3898
 - {Tools, e.g. handheld; Tuning wrenches; Jigs used with connectors, e.g. for extracting, removing or inserting in a panel, for engaging or coupling connectors, for assembling or disassembling components within the connector, for applying clips to hold two connectors together or for crimping (-tools for cleaning, [G02B 6/3866](#) ; tools in general [B25B](#)-)}
- U G02B 6/42
 - . . Coupling light guides with opto-electronic elements

NOTE
In this group, the following expression is used with the meaning indicated:

 - "opto-electronic elements" includes light emitting elements, e.g. lasers or LED's, as well as light receiving elements, e.g. photodiodes or phototransistors
- U G02B 6/4201
 - . . . {Packages, e.g. shape, construction, internal or external details}
- G02B 6/4204
 - {the coupling comprising intermediate optical elements, e.g. lenses, holograms (-encapsulated active devices [H01S 5/02208](#) , [H01L 33/52](#)-)}
- G02B 6/4206
 - {Optical features (-[G02B 6/4207](#) , [G02B 6/421](#) take precedence-)}
- G02B 6/4207
 - {with optical elements reducing the sensitivity to optical feedback (-anti-reflection devices specially adapted for lasers, see [H01S 3/0064](#)-)}
- G02B 6/4208
 - {using non-reciprocal elements or birefringent plates, i.e. quasi-isolators (-optical isolators per se [G02F 1/093](#) , [G02F 1/0955](#)-)}
- G02B 6/4213
 - {the intermediate optical elements being polarisation selective optical elements (-[G02B 6/27](#) takes precedence-)}
- G02B 6/4214
 - {the intermediate optical element having redirecting reflective means, e.g. mirrors, prisms for deflecting the radiation from horizontal to down- or upward direction toward a device (-[G02B 6/4246](#) takes precedence-)}
- G02B 6/4215
 - {the intermediate optical elements being wavelength selective optical elements, e.g. variable wavelength optical modules or wavelength lockers (-[G02B 6/4246](#) takes precedence-)}
- G02B 6/4216
 - {incorporating polarisation-maintaining fibres (-polarisation-maintaining fibres per se [G02B 6/105](#)-)}
- U G02B 6/4219
 - {Mechanical fixtures for holding or positioning the elements relative to each other in the couplings; Alignment methods for the elements, e.g. measuring or observing methods especially used therefor}
- G02B 6/422
 - {Active alignment, i.e. moving the elements in response to the detected degree of coupling or position of the elements (-[G02B 6/4233](#) , [G02B 6/4234](#) take precedence-)}
- G02B 6/4228
 - {Passive alignment, i.e. without a detection of the degree of coupling or the position of the elements (-[G02B 6/4234](#) takes precedence-)}
- G02B 6/4232
 - {using the surface tension of fluid solder to align the elements, e.g. solder bump techniques (-flip-chip mounting techniques in assembly of semiconductor devices [H01L 24/81](#)-)}
- U G02B 6/4236
 - {Fixing or mounting methods of the aligned elements}
- U G02B 6/424
 - {Mounting of the optical light guide}
- G02B 6/4243
 - {Mounting of the optical light guide into a groove (-mounting optical light guides into a groove in general [G02B 6/3636](#)-)}
- G02B 6/4248
 - {Feed-through connections for the hermetical passage of fibres through a package wall} (-see provisionally also [G02B 6/4428](#)-)}

- U G02B 6/4249 {comprising arrays of active devices and fibres}
- G02B 6/425 {Optical features (-semiconductor laser arrays [H01S 5/40](#) ; hybrid LED arrays [H01L 25/0753](#) ; monolithic LED arrays [H01L 27/153](#)-)}
- G02B 6/4251 {Sealed packages (-[G02B 6/4248](#) takes precedence-)}
- G02B 6/4253 {by embedding housing components in an adhesive or a polymer material (-[G02B 6/4212](#) takes precedence-)}
- G02B 6/4254 {with an inert gas, e.g. nitrogen or oxygen (-gas filled packages for semiconductor lasers [H01S 5/0222](#)-)}
- U G02B 6/4256 {Details of housings}
- G02B 6/4257 {having a supporting carrier or a mounting substrate or a mounting plate (-[G02B 6/3648](#) takes precedence-)}
- G02B 6/4262 {characterised by the shape of the housing (-for semiconductor lasers [H01S 5/02208](#)-)}
- G02B 6/4266 {Thermal aspects, temperature control or temperature monitoring (-thermal aspect of electrical circuits [H05K 7/20](#) , [H05K 5/0213](#) , temperature control in general [G05D 23/19](#)-)}
- G02B 6/4268 {Cooling (-of semiconductor devices [H01L 23/24](#) ; of electric apparatus [H05K 7/20](#) ; of instruments [G12B 15/00](#)-)}
- G02B 6/4274 {Electrical aspects (-[G02B 6/4263](#) and [G02B 6/4265](#) take precedence-)}

 - • arranged + - +
- G02B 9/18
 - • • only one component having a compound lens (~~G02B 9/30~~ takes precedence-)
- G02B 9/24
 - • • two of the components having compound lenses (~~G02B 9/30~~ takes precedence-)
- G02B 13/00**

Optical objectives specially designed for the purposes specified below (with variable magnification{in general} ~~G02B 15/00-~~)

NOTE

Unless specified in the title of the subgroups, this group and its subgroups do not cover objectives comprising reflecting surfaces, which are covered by [G02B 17/06](#) , [G02B 17/08](#) and their subgroups
- G02B 13/0005
 - {having F-Theta characteristic (~~scanning systems employing movable or deformable optical elements [G02B 26/10-](#)~~)}
- G02B 13/001
 - {Miniaturised objectives for electronic devices, e.g. portable telephones, webcams, PDAs, small digital cameras (~~G02B 23/243~~ takes precedence-)}

- U G02B 13/0015
G02B 13/002
- {characterised by the lens design}
 - • {having at least one aspherical surface (~~-aspherical lenses per se~~ [G02B 3/02-](#))}
- NOTE
When classifying in this group, a lens is deemed to be a simple lens or a compound lens
- G02B 13/0085
G02B 13/009
G02B 13/0095
- {employing wafer level optics (~~-lens arrays per se~~ [G02B 3/0006-](#))}
 - {having zoom function} (zoom lenses per se [G02B 15/00](#))
 - {Relay lenses or rod lenses (~~-in instruments for viewing the inside of hollow bodies~~ [G02B 23/2446-](#))}
- U G02B 13/08
G02B 13/10
G02B 13/14
G02B 13/18
G02B 13/20
- Anamorphic objectives
 - • involving prisms (~~-G02B 13/12 takes precedence-~~)
 - for use with infra-red or ultra-violet radiation ({ [G02B 13/008](#) , } [G02B 13/16](#) take precedence-)
 - with lenses having one or more non-spherical face, e.g. for reducing geometrical aberration ({~~-G02B 13/002 takes precedence-~~)}
 - Soft-focus objectives (~~-diffusing elements in general~~ [G02B 5/02-](#))
- G02B 15/00**
- Optical objectives with means for varying the magnification (~~-anamorphic objectives~~ [G02B 13/08-](#))**
- U G02B 15/02
U G02B 15/10
G02B 15/12
U G02B 15/14
G02B 15/16
G02B 15/163
- by changing, adding, or subtracting a part of the objective, e.g. convertible objective
 - • by adding a part, e.g. close-up attachment
 - • • by adding telescopic attachments (~~-G02B 15/14 takes precedence-~~)
 - by axial movement of one or more lenses or groups of lenses relative to the image plane for continuously varying the equivalent focal length of the objective
 - • with interdependent non-linearly related movements between one lens or lens group, and another lens or lens group (~~-G02B 15/22 takes precedence-~~)
 - • • having a first movable lens or lens group and a second movable lens or lens group, both in front of a fixed lens or lens group (~~-G02B 15/177 takes precedence-~~)
- G02B 17/00**
- Systems with reflecting surfaces, with or without refracting elements (~~-microscopes~~ [G02B 21/00](#) ; ~~-telescopes, periscopes~~ [G02B 23/00](#) ; ~~-for beam splitting or combining~~ [G02B 27/10](#) ; ~~-for optical projection~~ [G02B 27/18-](#))**
- G02B 17/004
G02B 17/006
- {Systems comprising a plurality of reflections between two or more surfaces, e.g. cells, resonators (~~-multipass arrangements for optical cuvettes~~ [G01N 21/031](#) ; laser resonators [H01S 3/05-](#))}
 - {Systems in which light is reflected on a plurality of parallel surfaces, e.g. louver mirrors, total internal reflection [TIR] lenses (~~-Fresnel mirrors~~ [G02B 5/09](#) , ~~Fresnel lenses~~ [G02B 3/08](#) ~~Fresnel mirrors~~ [G02B 5/09](#) , ~~Fresnel lenses~~ [G02B 3/08](#))}
- U G02B 17/02
G02B 17/026
- Catoptric systems, e.g. image erecting and reversing system
 - • {having static image erecting or reversing properties only (~~-G02B 17/045 takes precedence;~~ optical derotators [G02B 27/642](#) ; optical devices for controlling the direction of light using movable or deformable optical elements [G02B 26/08-](#))}
- U G02B 17/04
- • using prisms only

- G02B 17/045
 - • {having static image erecting or reversing properties only} (-optical derotators [G02B 27/642](#) ; optical devices for controlling the direction of light using movable or deformable optical elements [G02B 26/08](#)-)}
- G02B 17/06
 - • using mirrors only {i.e. having only one curved mirror} (-used in non-imaging applications [G02B 19/00](#)-)}
- G02B 17/0605
 - • {using two curved mirrors} (-[G02B 17/0668](#) , [G02B 17/0694](#) take precedence-)}
- G02B 17/0626
 - • {using three curved mirrors} (-[G02B 17/0668](#) , [G02B 17/0694](#) take precedence-)}
- G02B 17/0647
 - • {using more than three curved mirrors} (-[G02B 17/0668](#) , [G02B 17/0694](#) take precedence-)}
- U G02B 17/0668
 - • {having non-imaging properties}

Project: N/A (G02F)**G02F**

DEVICES OR ARRANGEMENTS, THE OPTICAL OPERATION OF WHICH IS MODIFIED BY CHANGING THE OPTICAL PROPERTIES OF THE MEDIUM OF THE DEVICES OR ARRANGEMENTS FOR THE CONTROL OF THE INTENSITY, COLOUR, PHASE, POLARISATION OR DIRECTION OF LIGHT, e.g. SWITCHING, GATING, MODULATING OR DEMODULATING; TECHNIQUES OR PROCEDURES FOR THE OPERATION THEREOF; FREQUENCY-CHANGING; NON-LINEAR OPTICS; OPTICAL LOGIC ELEMENTS; OPTICAL ANALOGUE/DIGITAL CONVERTERS (~~optical transfer means between sensing member and indicating or recording part in connection with measuring [G01D 5/26](#) ; devices in which mathematical operations are carried out with optical elements [G06E 3/00](#) , { [G06E 3/001](#) } ; electrical signal transmission systems using optical means to convert the input signal [G08C 19/36](#) ; information-recording by electric or magnetic means and reproducing by sensing optical properties [G11B 11/00](#) ; static stores using optical elements [G11C 13/04](#) ; transmission systems employing electromagnetic waves other than radio waves, e.g. light, infra-red radiation, [H04B 10/00](#) ; optical multiplex systems [H04J 14/00](#) ; pictorial communication, e.g. television [H04N](#))~~

WARNING

The following IPC group is not used in the CPC scheme.

Subject matter covered by these groups is classified in the following CPC groups:

- [G02F 1/13357](#) covered by [G02F 1/1336](#) and subgroups

G02F 1/00

Devices or arrangements for the control of the intensity, colour, phase, polarisation or direction of light arriving from an independent light source, e.g. switching, gating, or modulating; Non-linear optics (~~thermometers using change of colour or translucency [G01K 11/12](#) ; using changes in fluorescence [G01K 11/32](#) ; light guide devices [G02B 6/00](#) ; optical devices or arrangements using movable or deformable elements for controlling light independent of the light source [G02B 26/00](#) ; control of light in general [G05D 25/00](#) ; visible signalling systems [G08B 5/00](#) ; indicating arrangements for variable information by selection or combination of individual elements [G09F 9/00](#) ; control arrangements or circuits for visual indicators other than cathode-ray tubes [G09G 3/00](#) ; control of light sources [H01S 3/10](#) , [H05B 33/08](#) , [H05B 35/00](#) to [H05B 43/00](#) ; { photochromic filters [G02B 5/23](#) ; optical logic elements [G02F 3/00](#) })~~

NOTE

This group covers only :

- devices or arrangements, e.g. cells, the optical operation of which is modified by changing the optical properties of the

medium of the devices or arrangements by the influence or control of physical parameters, e.g. electric fields, electric current, magnetic fields, sound or mechanical vibrations, stress or thermal effects;
- devices or arrangements in which the electric or magnetic field component of the light beams influences the optical properties of the medium, i.e. non-linear optics;
- control of light by electromagnetic waves, e.g. radio waves, or by electrons or other elementary particles.

PHOTOSENSITIVE MATERIALS FOR PHOTOGRAPHIC PURPOSES (for photomechanical purposes [G03F](#)); **PHOTOGRAPHIC PROCESSES**, e.g. CINE, X-RAY, COLOUR, STEREO-PHOTOGRAPHIC PROCESSES; **AUXILIARY PROCESSES IN PHOTOGRAPHY** (photographic processes characterised by the use or manipulation of apparatus classifiable per se in subclass [G03B](#), see [G03B](#); photomechanical production of textured or patterned surfaces [G03F](#); electrophotography, magnetography [G03G](#))

NOTE

In this subclass, the following expressions are used with the meanings indicated :

- "photosensitive compositions" covers
photosensitive
substances, e.g. silverhalides, and, if applicable,
binders
or additives;

- "photosensitive materials" covers the photosensitive compositions, e.g. emulsions, the bases carrying them, and, if applicable, auxiliary layers.

WARNING

The following IPC group is not used in the CPC scheme.

Subject matter covered by this group is classified in the following CPC group:

- G03C 9/08 covered by [G03F 7/0037](#)

G03C 1/00

Photosensitive materials (~~photosensitive materials for multicolour processes [G03C 7/00](#) ; for diffusion transfer processes [G03C 8/00](#) ; photosensitive glass [G03C 4/04](#)~~)

- G03C 1/002
 - {containing microcapsules (~~with photopolymerisable compositions [G03F 7/002](#)~~)}
- G03C 1/005
 - Silver halide emulsions; Preparation thereof; Physical treatment thereof; Incorporation of additives therein (~~catalytic amounts of silver halide in dry silver systems{or thermographic systems using noble metal compounds} [G03C 1/494](#)~~)
- G03C 1/015
 - • Apparatus or processes for the preparation of emulsions (~~coating, drying [G03C 1/74](#)~~){(~~[G03C 1/07](#) takes precedence; special processes for tabular grains [G03C 1/0051](#)~~)}

ELECTROGRAPHY; ELECTROPHOTOGRAPHY; MAGNETOGRAPHY (~~-information storage based on relative movement between record carrier and transducer [G11B](#); static stores with means for writing-in or reading-out information [G11C](#); recording of television signals [H04N 5/76](#)~~)

NOTES

This subclass covers:

- the production of permanent directly-visible pictures in conformity with an original picture or document, using an intermediate imagewise distribution of an electric or magnetic quantity, such as a charge pattern, an electric conductivity pattern, or a magnetic pattern;
- the production of permanent directly-visible pictures using an intermediate imagewise distribution of an electric or magnetic quantity, when the origin and the way of generating said intermediate distribution are not relevant.

This subclass does not cover:

- use of electric signals for the transmission of the picture information from the original to the reproduction, i.e. pictorial communication, which is covered by subclass [H04N](#);
- production of pictures by heat patterns exclusively, not using an electrostatic or magnetic pattern, which is covered by group [B41M 5/00](#) ;
- production of prints by transferring ink from a printing form to a printing surface, without physical contact and using the force of an electrostatic field, which is covered by subclass [B41M](#);
- selective printing mechanisms characterised by the selective supply of electric current, or the selective application of magnetism or radiation, to a printing material or impression-transfer material, which are

covered by groups [B41J 2/385](#) , [B41J 2/435](#)
.

G03G 5/00

Project: N/A (G05D)

G05D

SYSTEMS FOR CONTROLLING OR REGULATING NON-ELECTRIC VARIABLES (for continuous casting of metals [B22D 11/16](#) ; valves per se [F16K](#); sensing non-electric variables, see the relevant subclasses of [G01](#); for regulating electric or magnetic variables [G05F](#))

NOTES

This subclass does not cover features of general applicability to regulating systems, e.g. anti-hunting arrangements, which are covered by subclass [G05B](#).

In this subclass, the following term is used with the meaning indicated:

- "systems" includes self-contained devices such as speed governors, pressure regulators.

Control systems specially adapted for particular apparatus, machines or processes are classified in the subclasses for the apparatus, machines or processes, provided that there is specific provision for control or regulation relevant to the special adaptation, either at a detailed level, (e.g. [A21B 1/40](#) : "for regulating temperature in bakers` ovens") or at a general level, (e.g. [B23K 9/095](#) : "for automatic control of welding parameters in arc welding"). Otherwise, classification is made in the most appropriate place in this subclass. The following are lists of places where there is specific provision of the kind referred to above. Where such provision is at a detailed level, the places have been grouped according to the main groups of this subclass. Where the provision is at a general level (e.g. of a kind appropriate to more than one of the main groups specified in the lists, or to main groups [G05D 27/00](#) or [G05D 29/00](#)), the places are listed under the title "General References". Control of position, course or altitude of land, water, air, or space vehicles, e.g. automatic pilot (-steering applicable only to other than landborne vehicles, e.g. three-dimensional steering applicable to both aircraft and submarines [B60K](#) ; construction or disposition of steering means on land vehicles [B62](#) , on waterborne vessels [B63](#) ; manual or automatic control of aircraft, e.g. using automatic pilot or radiated signal [B64C](#) ; radio navigation systems or analogous systems using other waves [G01S](#)-)

- U G05D 1/0011 • {associated with a remote control arrangement}
- G05D 1/0016 • • {characterised by the operator's input device (-input arrangements for computing systems in general [G06F 3/00](#)-)}
- G05D 1/0022 • • {characterised by the communication link (-data switching networks in general [H04L 12/00](#)-)}
- G05D 1/0027 • • {involving a plurality of vehicles, e.g. fleet or convoy travelling (-traffic control systems for road vehicles [G08G 1/00](#) ; for marine craft [G08G 3/00](#) ; for aircraft [G08G 5/00](#) ; fleet control of land vehicles from a control room [G05D 1/0297](#)-)}
- G05D 1/0038 • • {by providing the operator with simple or augmented images from one or more cameras located onboard the vehicle, e.g. tele-operation (-images analyzed by a computer and used for automatic navigation [G05D 1/0246](#)-)}
- G05D 1/0044 • • {by providing the operator with a computer generated representation of the environment of the vehicle, e.g. virtual reality, maps (-maps used for automatic navigation [G05D 1/0274](#) ; flight directors [G01C 23/005](#)-)}
- G05D 1/0088 • {characterized by the autonomous decision making process, e.g. artificial intelligence, predefined behaviours (-using knowledge based models [G06N 5/00](#)-)}
- U G05D 1/02 • Control of position or course in two dimensions
- U G05D 1/021 • • {specially adapted to land vehicles}

NOTE

This group covers control of position or course in two dimensions specially adapted for land vehicles, i.e. control systems to define a trajectory for a land vehicle, and to take suitable actions to make the vehicle follow said trajectory.

Relationships with other classification places.

Subclass [G01C](#) covers navigation in general, i.e. determining the position and course of land vehicles, ships, aircraft, and space vehicles.

Subclass [G01S](#) covers radio, sonar or lidar navigation systems, i.e. navigation by use of radio, acoustic or optical waves, or analogue arrangements using other electromagnetic waves.

Subclass [G08G](#) covers navigation systems for traffic control purposes, i.e. systems in which the navigation is not performed autonomously by or in the vehicle, but where the vehicles are guided by instructions transmitted to them.

Aspects of navigation systems that are important per se should also be classified in the relevant groups of [G01C](#) (see for example list under "Informative References" below).

Aspects of radio, sonar or lidar navigation systems that are important per se should also be classified in the relevant groups of [G01S](#) (see for example list under "Informative References" below).

Aspects of navigation systems for traffic purposes that are important per se should also be classified in the relevant groups of [G08G](#) (see for example list under "Informative References" below).

Informative References.

Attention is drawn to the following places, which could be of interest for search:

- navigation, i.e. determining the position and course of land vehicles, ships, aircraft, and space vehicles [G01C 21/00](#)
- measuring distance traversed on the ground by vehicles, e.g. using odometers [G01C 22/00](#)
- position-fixing by co-ordinating a plurality of determinations of direction or position lines [G01S 5/00](#)
- determining distance or velocity using waves and not using reflection or reradiation of waves [G01S 11/00](#)
- radar systems specially designed for traffic control [G01S 13/91](#)
- radar systems specially designed for for anti-collision purposes [G01S 13/93](#)
- sonar systems specially designed for for anti-collision purposes [G01S 15/93](#)
- lidar systems specially designed for for anti-collision purposes [G01S 17/93](#)
- traffic control systems for road vehicles [G08G 1/00](#)
- monitoring the location of fleet of vehicles in traffic control systems [G08G 1/127](#)
- anti-collision traffic control systems [G08G 1/16](#)

G05D 1/0251	• • • • {extracting 3D information from a plurality of images taken from different locations, e.g. stereo vision (-stereoscopic image analysis H04N 13/00 ; depth recovery from images G06T 7/0075-)}
G05D 1/0253	• • • • {extracting relative motion information from a plurality of images taken successively, e.g. visual odometry, optical flow (-determining position or orientation from images G06T 7/004-)}
G05D 1/0255	• • {using acoustic signals, e.g. ultra-sonic signals (-sonar systems designed for anti-collision purposes G01S 15/93-)}
G05D 1/0257	• • {using a radar (-radar systems designed for anti-collision purposes between land vehicles or between land vehicle and fixed obstacles G01S 13/931-)}
U G05D 1/0268	• • {using internal positioning means}
G05D 1/027	• • • {comprising inertial navigation means, e.g. azimuth detector (-inertial navigation G01C 21/16 ; inertial navigation combined with non-inertial navigation instruments G01C 21/165-)}
G05D 1/0272	• • • {comprising means for registering the travel distance, e.g. revolutions of wheels (-measuring distance traversed on the ground by vehicles, e.g. using odometers G01C 22/00-)}
G05D 1/0274	• • • {using mapping information stored in a memory device (-navigation using map-matching G01C 21/30-)}
G05D 1/0276	• • {using signals provided by a source external to the vehicle (-involving a plurality of vehicles G05D 1/0287 ; automatically controlling vehicle speed responsive to externally generated signals B60K 31/0058-)}
G05D 1/0287	• • {involving a plurality of land vehicles, e.g. fleet or convoy travelling (-traffic control systems for road vehicles G08G 1/00 , particularly anticollision systems G08G 1/16-)}
<p>NOTE</p> <p>In this group, the following terms or expressions are used with the meaning indicated:</p> <ul style="list-style-type: none"> - fleet means a plurality of vehicles controlled in a coordinated manner or under unified control; - convoy (or platooning) means a plurality of vehicles following an identical trajectory, said vehicles being separated by a predetermined distance maintained by a control system 	
G05D 1/0289	• • • {with means for avoiding collisions between vehicles (-vehicle fittings for automatically controlling speed including means for detecting potential obstacles B60K 31/0008 ; avoiding obstacles by action on the steering system B62D ; radar, sonar, lidar systems designed for anti-collision purposes G01S 13/93 , G01S 15/93 , G01S 17/93-)}
G05D 1/0291	• • • {Fleet control (-monitoring fleets in traffic control systems for road vehicles G08G 1/127 , G08G 1/127-)}
G05D 1/03	• • using near-field transmission systems, e.g. inductive-loop type((- G05D 1/021 and subgroups take precedence-))

	G05D 1/10	• Simultaneous control of position or course in three dimensions (-G05D 1/12 takes precedence-)
U	G05D 1/101	• • {specially adapted for aircraft}
	G05D 1/104	• • • {involving a plurality of aircrafts, e.g. formation flying (-traffic control systems for aircraft G08G 5/00-)}
	G05D 1/105	• • • {specially adapted for unpowered flight, e.g. glider, parachuting, forced landing (-parachutes per se B64D 17/00-)}
	G05D 3/00	Control of position or direction (-G05D 1/00 takes precedence-)
U	G05D 3/12	• using feedback
U	G05D 3/14	• • using an analogue comparing device
	G05D 3/16	• • • whose output amplitude can only take a number of discrete values (-G05D 3/18 takes precedence-)
U	G05D 5/00	Control of dimensions of material
	G05D 5/02	• of thickness, e.g. of rolled material (-of specific materials B21B , B29C , B32B , C03B , D21F-)
	G05D 7/00	Control of flow (-level control G05D 9/00 ; ratio control G05D 11/00 ; of media to the human body A61M 5/168 ; weighing apparatus G01G-)
	G05D 7/03	• with auxiliary non-electric power{(-G05D 7/005 takes precedence-)}
	G05D 7/06	• characterised by the use of electric means{(-G05D 7/005 takes precedence-)}
U	G05D 7/0617	• • {specially adapted for fluid materials}
U	G05D 7/0629	• • • {characterised by the type of regulator means}
	G05D 7/0635	• • • • {by action on throttling means (-G05D 7/0688 , G05D 7/0694 take precedence-)}
	G05D 7/0641	• • • • • {using a plurality of throttling means (-G05D 7/067 takes precedence-)}
	G05D 7/0658	• • • • • {the plurality of throttling means being arranged for the control of a single flow from a plurality of converging flows (-G05D 7/0652 takes precedence; ratio control G05D 11/13-)}
	G05D 7/0664	• • • • • {the plurality of throttling means being arranged for the control of a plurality of diverging flows from a single flow (-G05D 7/0652 takes precedence; ratio control G05D 11/13-)}
	G05D 7/067	• • • • • {characterised by free surface flow (-open channel water distribution systems E02B 13/00-)}
	G05D 7/0676	• • • • • {by action on flow sources (-G05D 7/0688 , G05D 7/0694 take precedence-)}
	G05D 7/0688	• • • • • {by combined action on throttling means and flow sources (-G05D 7/0694 takes precedence-)}
	G05D 7/0694	• • • • • {by action on throttling means or flow sources of very small size, e.g. microfluidics (-microvalves F16K 99/0001 ; micro-structural devices per se B81B-)}
	G05D 9/00	Level control, e.g. controlling quantity of material stored in vessel (-controlling level of liquid-pool electrode in electric discharge tubes and lamps H01J 1/10 , H01J 13/14-)
	G05D 11/00	Ratio control (-control of chemical or physico-chemical variables, e.g. pH-value G05D 21/00 ; humidity control G05D 22/00 ; control of viscosity G05D 24/00 ; proportioning the ingredients for mixing clay or cement with other substances B28C 7/00-)
U	G05D 11/02	• Controlling ratio of two or more flows of fluid or fluent material
U	G05D 11/13	• • characterised by the use of electric means

	G05D 11/131	<ul style="list-style-type: none"> • • • {by measuring the values related to the quantity of the individual components} (G05D 11/139 takes precedence-)
	G05D 11/132	<ul style="list-style-type: none"> • • • • {by controlling the flow of the individual components} (G05D 11/133 takes precedence-)
	G05D 11/135	<ul style="list-style-type: none"> • • • {by sensing at least one property of the mixture} (G05D 11/139 takes precedence-)
	G05D 13/00	Control of linear speed; Control of angular speed; Control of acceleration or deceleration, e.g. of a prime mover (synchronising telegraph receiver and transmitter H04L 7/00)
U	G05D 13/08	<ul style="list-style-type: none"> • without auxiliary power
	G05D 13/30	<ul style="list-style-type: none"> • • Governors characterised by fluid features in which the speed of a shaft is converted into fluid pressure (transducers converting variations of physical quantities into fluid pressure variations F15B 5/00)
	G05D 13/34	<ul style="list-style-type: none"> • with auxiliary non-electric power (fluid-pressure converters F15B 3/00)
	G05D 13/62	<ul style="list-style-type: none"> • characterised by the use of electric means, e.g. use of a tachometric dynamo, use of a transducer converting an electric value into a displacement{ electric motor control H02P-}
	G05D 13/64	<ul style="list-style-type: none"> • Compensating the speed difference between engines meshing by a differential gearing or the speed difference between a controlling shaft and a controlled shaft{ G05D 13/62 takes precedence-}
	G05D 16/00	Control of fluid pressure (control of pressure in electric discharge tubes or lamps H01J e.g. H01J 7/14 ; control of pressure in electric incandescent lamps H01K 1/52)
	G05D 16/02	<ul style="list-style-type: none"> • Modifications to reduce the effects of instability, e.g. due to vibrations, friction, abnormal temperature, overloading, unbalance (vibration dampers F16F 7/00)
U	G05D 16/20	<ul style="list-style-type: none"> • characterised by the use of electric means
	G05D 16/2006	<ul style="list-style-type: none"> • • {with direct action of electric energy on controlling means} (G05D 16/2093 takes precedence-)
U	G05D 16/2013	<ul style="list-style-type: none"> • • • {using throttling means}
U	G05D 16/2026	<ul style="list-style-type: none"> • • • • {with a plurality of throttling means}
	G05D 16/2046	<ul style="list-style-type: none"> • • • • • {the plurality of throttling means being arranged for the control of a single pressure from a plurality of converging pressures} (G05D 16/204 takes precedence-)
	G05D 16/206	<ul style="list-style-type: none"> • • • • • {the plurality of throttling means being arranged for the control of a plurality of diverging pressures from a single pressure} (G05D 16/204 takes precedence-)
	G05D 16/208	<ul style="list-style-type: none"> • • • {using a combination of controlling means as defined in G05D 16/2013 and G05D 16/2066 (G05D 16/2073 takes precedence-)}
	G05D 16/2086	<ul style="list-style-type: none"> • • {without direct action of electric energy on the controlling means} (G05D 16/2093 takes precedence-)
	G05D 19/00	Control of mechanical oscillations, e.g. of amplitude, of frequency, of phase (generating or transmitting mechanical vibrations B06B ; control of electric motors H02P)
	G05D 22/00	Control of humidity (of tobacco products A24B 9/00 ; air conditioning F24F)

G05D 23/00

Control of temperature ~~(-automatic switching arrangements for electric heating apparatus [H05B 1/02](#) ; controlling induction heating [H05B 6/06](#) ; regulating temperature of anode of X-ray tube [H05G 1/36](#) -)~~

NOTE

Within groups [G05D 23/01](#) to [G05D 23/32](#) , an invention is classified in the last appropriate place in the absence of an indication of the contrary

- U G05D 23/01
 - without auxiliary power
- G05D 23/015
 - ~~{-with mechanical sensing element not covered by groups [G05D 23/02](#) and [G05D 23/12](#) -}~~
- G05D 23/02
 - with sensing element expanding and contracting in response to changes of temperature ~~(-[G05D 23/13](#) takes precedence-)~~
- G05D 23/08
 - with bimetallic element ~~(-valve arrangements adapted for mixing [F16K 11/00](#) -)~~
- G05D 23/10
 - with snap-action elements ~~(-for valves [F16K 31/56](#) -)~~
- U G05D 23/13
 - by varying the mixing ratio of two fluids having different temperatures
- G05D 23/1306
 - {for liquids ~~(-[G05D 23/1393](#) takes precedence-)~~}
- G05D 23/138
 - {for gases ~~(-[G05D 23/1393](#) takes precedence-)~~}
- G05D 23/1386
 - {for steam and liquid ~~(-[G05D 23/1393](#) takes precedence-)~~}
- G05D 23/19
 - characterised by the use of electric means{ [G05D 23/1393](#) takes precedence-}
- G05D 23/1927
 - {using a plurality of sensors ~~(-[G05D 23/1902](#) , [G05D 23/1917](#) , and [G05D 23/1919](#) take precedence-)~~}
- G05D 23/20
 - with sensing elements having variation of electric or magnetic properties with change of temperature ~~(-[G05D 23/13](#) takes precedence-)~~
- G05D 23/2024
 - {using a plurality of sensors ~~(-[G05D 23/2002](#) , [G05D 23/2015](#) , [G05D 23/2017](#) take precedence-)~~}
- U G05D 23/22
 - the sensing element being a thermocouple
- G05D 23/2224
 - {using a plurality of sensors ~~(-[G05D 23/2202](#) , [G05D 23/2215](#) , [G05D 23/2217](#) take precedence-)~~}
- U G05D 23/24
 - the sensing element having a resistance varying with temperature, e.g. a thermistor
- G05D 23/2434
 - {using a plurality of sensors ~~(-[G05D 23/2403](#) , [G05D 23/2422](#) and [G05D 23/2424](#) take precedence-)~~}
- U G05D 23/26
 - the sensing element having a permeability varying with temperature
- G05D 23/2623
 - {using a plurality of sensors ~~(-[G05D 23/2602](#) , [G05D 23/2615](#) , [G05D 23/2616](#) take precedence-)~~}
- U G05D 23/275
 - with sensing element expanding, contracting, or fusing in response to changes of temperature
- G05D 23/27526
 - {using a plurality of sensors ~~(-[G05D 23/27502](#) , [G05D 23/27516](#) , [G05D 23/27518](#) take precedence-)~~}
- G05D 23/30
 - Automatic controllers with an auxiliary heating device affecting the sensing element, e.g. for anticipating change of temperature ~~(-automatic controllers in general and not restricted to control of temperature [G05B](#) -)~~

G05D 25/00

Control of light, e.g. intensity, colour, phase (~~mechanically~~ operable parts of lighting devices for the control of light [F21V](#) ; optical devices or arrangements using movable or deformable elements for controlling light independent of the light source [G02B 26/00](#) ; devices or arrangements, the optical operation of which is modified by changing the optical properties of the medium of the devices or arrangements for the control of light, circuit arrangements specially adapted therefor, control of light by electromagnetic waves, electrons or other elementary particles [G02F 1/00](#) ; circuit arrangements for controlling light sources [H01S 3/10](#) , [H05B 33/08](#) , [H05B 35/00](#) to [H05B 43/00](#))

Project: N/A (G05G)**U G05G 1/00**

Controlling members, e.g. knobs or handles; Assemblies or arrangements thereof; Indicating position of controlling members ({ means for preventing, limiting or returning the movements of parts of a control mechanism [G05G 5/00](#); providing feel, e.g. means to create a counterforce [G05G 5/03](#); specially adapted for programme control [G05G 21/00](#); vibration damping [G05G 25/02](#);} joysticks [G05G 9/04](#); steering wheels for motor vehicles [B62D](#))

NOTE

Within this main group the first place priority rule is applied, i.e. at each hierarchical level classification is made in the first appropriate place

U G05G 1/30

• Controlling members actuated by foot

G05G 1/305

• • {-Compound pedal co-operating with two or more controlled members}

U G05G 1/50

• • Manufacturing of pedals; Pedals characterised by the material used

G05G 1/503

• • • {-Controlling members for hand-actuation}

G05G 1/506

• • • {-Controlling members for foot-actuation}

G05G 1/54

• Controlling members specially adapted for actuation by auxiliary operating members or extensions; -Operating members or extensions therefor (*pedal extensions*)(~~pedal-extensions~~)

Project: N/A (G06E)**U G06E 3/00**

Devices not provided for in group [G06E 1/00](#), e.g. for processing analogue or hybrid data

WARNING

Not complete. For hybrid devices see also [G06J](#)

G06E 3/008

• {-Matrix or vector computation}

WARNING

Not complete. See also [G06E 3/001](#)

Project: N/A (G06F)**G06F**

ELECTRICAL DIGITAL DATA PROCESSING (computers in which a part of the computation is effected hydraulically or pneumatically [G06D](#); optically [G06E](#); self-contained input or output peripheral equipment [G06K](#); impedance networks using digital techniques [H03H](#))

NOTE

In this subclass, the following terms or expressions are used with the meaning indicated:

- "handling" includes processing or transporting of data;
- "data processing equipment" means an association of an electric digital data processor classifiable under group

[G06F 7/00](#) , with one or more arrangements classifiable under groups [G06F 1/00](#) to [G06F 5/00](#) and [G06F 9/00](#) to [G06F 13/00](#) .

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

[G06F 3/18](#) covered by [G06F 3/00](#) , [G06K 11/00](#)

[G06F 7/04](#) covered by [G06F 7/02](#)

[G06F 9/302](#) - [G06F 9/318](#) covered by [G06F 9/30](#)

- [G06F 9/40](#) covered by [G06F 9/4425](#) and subgroups - [G06F 9/42](#) covered by [G06F 9/4426](#) and subgroups - [G06F 9/45](#) covered by [G06F 8/41](#) and subgroups

G06F 1/00

Details of data-processing equipment not covered by groups [G06F 3/00](#) to [G06F 13/00](#) , {e.g. cooling, packaging or power supply specially adapted for computer application (-security arrangements for protecting computers or computer systems against unauthorised activity [G06F 21/00](#)-)}

- G06F 1/02
 - Digital function generators{(-evaluating functions by calculating only [G06F 7/544](#) , [G06F 7/60](#) ; generating sawtooth or staircase waveforms [H03K 4/00](#)-)}
- G06F 1/022
 - {Waveform generators, i.e. devices for generating periodical functions of time, e.g. direct digital synthesizers} (-[G06F 1/025](#) , [G06F 1/03](#) take precedence-)
- G06F 1/025
 - • for functions having two-valued amplitude, e.g. Walsh functions{(-generation of pulse trains in general [H03K 3/00](#)-)}
- G06F 1/03
 - • working, at least partly, by table look-up{(-[G06F 1/025](#) takes precedence-)}

NOTE

In order to be classified in this group, the table must contain function values of the desired or an intermediate function, not merely coefficients.

- G06F 1/0307
 - • {Logarithmic or exponential functions} (-[G06F 1/0314](#) , [G06F 1/035](#) take precedence-)
- G06F 1/0321
 - • {Waveform generators, i.e. devices for generating periodical functions of time, e.g. direct digital synthesizers} (-[G06F 1/0314](#) , [G06F 1/035](#) take precedence-)
- G06F 1/035
 - • Reduction of table size{(-[G06F 1/0314](#) takes precedence-)}
- U G06F 1/04
 - Generating or distributing clock signals or signals derived directly therefrom
- G06F 1/06
 - • Clock generators producing several clock signals{(-[G06F 1/08](#) to [G06F 1/14](#) take precedence-)}
- G06F 1/10
 - • Distribution of clock signals {e.g. skew}
- G06F 1/12
 - • Synchronisation of different clock signals {provided by a plurality of clock generators}
- G06F 1/16
 - Constructional details or arrangements {(-instrument details [G12B](#)-)}
- G06F 1/1601
 - • {Constructional details related to the housing of computer displays, e.g. of CRT monitors, of flat displays (-constructional details related to flat displays integrated in a portable computer, e.g. laptop, handheld computer [G06F 1/1637](#) ; constructional details related to television receivers [H04N 5/64](#)-)}
- G06F 1/1607
 - • {Arrangements to support accessories mechanically attached to the display housing} (-[G06F 1/1603](#) , [G06F 1/1605](#) take precedence-)
- G06F 1/1613
 - • {for portable computers} (-cooling arrangements therefor [G06F 1/203](#) ; constructional details or arrangements for pocket calculators, electronic agendas or books [G06F 15/0216](#) ; constructional details of portable telephone sets: with several bodies [H04M 1/0202](#)-)}

- G06F 1/1615
 - • • {with several enclosures having relative motions, each enclosure supporting at least one I/O or computing function} (-constructional details of portable telephones comprising a plurality of mechanically joined movable body parts [H04M 1/0206](#)-)}
- U G06F 1/1616
 - • • • {with folding flat displays, e.g. laptop computers or notebooks having a clamshell configuration, with body parts pivoting to an open position around an axis parallel to the plane they define in closed position}
- G06F 1/1618
 - • • • {the display being foldable up to the back of the other housing with a single degree of freedom, e.g. by 360° rotation over the axis defined by the rear edge of the base enclosure}~~[1012]~~
- G06F 1/1626
 - • • {with a single-body enclosure integrating a flat display, e.g. Personal Digital Assistants [PDAs]}~~]~~
- G06F 1/1633
 - • • {-Constructional details or arrangements of portable computers not specific to the type of enclosures covered by groups [G06F 1/1615](#) to [G06F 1/1626](#)-}
- G06F 1/1635
 - • • • {Details related to the integration of battery packs and other power supplies such as fuel cells or integrated AC adapter} (-details of mounting batteries in general [H01M 2/1022](#)-)}
- G06F 1/1637
 - • • • {Details related to the display arrangement, including those related to the mounting of the display in the housing} (-constructional details related to the housing of computer displays in general [G06F 1/1601](#)-)}
- G06F 1/1641
 - • • • • {the display being formed by a plurality of foldable display components} (-[G06F 1/1647](#) takes precedence-)}
- G06F 1/1643
 - • • • • {the display being associated to a digitizer, e.g. laptops that can be used as penpads} (-touchpads integrated in a laptop or similar computer [G06F 1/169](#) ; secondary touch screen [G06F 1/1692](#) ; details related to the relative motion of the display enclosure with respect to the body enclosure; e.g. to move between laptop and tablet PC configuration [G06F 1/1615](#)-)}
- G06F 1/1647
 - • • • • {including at least an additional display} (-[G06F 1/1692](#) takes precedence-)}
- G06F 1/1656
 - • • • {Details related to functional adaptations of the enclosure, e.g. to provide protection against EMI, shock, water, or to host detachable peripherals like a mouse or removable expansions units like PCMCIA cards, or to provide access to internal components for maintenance or to removable storage supports like CDs or DVDs, or to mechanically mount accessories} (-mounting of accessories to a computer display [G06F 1/1607](#) ; display hoods [G06F 1/1603](#) ; cooling arrangements for portable computers [G06F 1/203](#)-)}
- U G06F 1/1662
 - • • • {Details related to the integrated keyboard}
- G06F 1/1666
 - • • • • {Arrangements for reducing the size of the integrated keyboard for transport, e.g. foldable keyboards, keyboards with collapsible keys} (-[G06F 1/1664](#) takes precedence-)}
- G06F 1/1667
 - • • • • {Arrangements for adjusting the tilt angle of the integrated keyboard independently from the main body} (-adjusting the tilt angle integrally with the main body [G06F 1/166](#)-)}
- G06F 1/1671
 - • • • • {Special purpose buttons or auxiliary keyboards, e.g. retractable mini keypads, keypads or buttons that remain accessible at closed laptop} (-[G06F 1/1666](#) takes precedence-)}
- G06F 1/1675
 - • • • {-Miscellaneous details related to the relative movement between the different enclosures or enclosure parts which could be adopted independently from the movement typologies specified in [G06F 1/1615](#) and subgroups-}

- G06F 1/1679
 - • • • {for locking or maintaining the movable parts of the enclosure in a fixed position, e.g. latching mechanism at the edge of the display in a laptop or for the screen protective cover of a PDA (~~G06F 1/1681~~ takes precedence-)}
- G06F 1/1681
 - • • • {Details related solely to hinges (~~-hinge details related to the transmission of signals or power are classified in G06F 1/1683-~~)}
- G06F 1/1684
 - • • • {Constructional details or arrangements related to integrated I/O peripherals not covered by groups [G06F 1/1635](#) to [G06F 1/1675](#)-}
- G06F 1/169
 - • • • {the I/O peripheral being an integrated pointing device, e.g. trackball in the palm rest area, mini-joystick integrated between keyboard keys, touch pads or touch stripes (~~G06F 1/1643~~ takes precedence; constructional details of pointing devices [G06F 3/033](#) ; joysticks in general [G05G 9/047](#)-)}
- G06F 1/1698
 - • • • {the I/O peripheral being a sending/receiving arrangement to establish a cordless communication link, e.g. radio or infrared link, integrated cellular phone (~~-details of antennas disposed inside a computer H01Q 1/2266-~~)}
- G06F 1/18
 - • Packaging or power distribution{(~~-for electrical apparatus in general H05K , H02J-~~)}
- G06F 1/181
 - • {Enclosures (~~-for electric apparatus in general H05K 5/00 ; for portable computers G06F 1/1613-~~)}
- G06F 1/182
 - • • • {with special features, e.g. for use in industrial environments; grounding or shielding against radio frequency interference [RFI] or electromagnetic interference (EMI)(~~-in general H05K 9/00-~~)}

- G06F 3/0428
- • • • • {by sensing at the edges of the touch surface the interruption of optical paths, e.g. an illumination plane, parallel to the touch surface which may be virtual}(-sensing beam interruptions in a planar beam grid of an optical touch-screen [G06F 3/0421](#)-)}
- U G06F 3/048
- • Interaction techniques based on graphical user interfaces [GUI]

NOTE

This group covers subject matter where the focus is placed on the way the user can interact with the displayed data. The mere presence of a standard GUI in the context of the disclosure of a specific software application or a specific device capable of processing data related to its specific function, should be in general classified in the appropriate subclasses related to those software applications or specific devices.

In this group, multi-aspect classification is applied, so that subject matter characterised by aspects covered by more than one of its groups, which is considered to represent information of interest for search, should be classified in each of those groups.

- U G06F 3/0481
 - • based on specific properties of the displayed interaction object or a metaphor-based environment, e.g. interaction with desktop elements like windows or icons, or assisted by a cursor's changing behaviour or appearance
- G06F 3/04812
 - • • {interaction techniques based on cursor appearance or behaviour being affected by the presence of displayed objects, e.g. visual feedback during interaction with elements of a graphical user interface through change in cursor appearance, constraint movement or attraction/repulsion with respect to a displayed object (-interaction techniques based on cursor behaviour involving tactile or force feedback [G06F 3/016](#)-)}
- G06F 3/04817
 - • • {using icons (-graphical programming languages using iconic symbols [G06F 8/34](#)-)}
- U G06F 3/0484
 - • for the control of specific functions or operations, e.g. selecting or manipulating an object or an image, setting a parameter value or selecting a range
- G06F 3/04842
 - • • {Selection of a displayed object (-[G06F 3/0482](#) takes precedence-)}
- U G06F 3/0487
 - • using specific features provided by the input device, e.g. functions controlled by the rotation of a mouse with dual sensing arrangements, or of the nature of the input device, e.g. tap gestures based on pressure sensed by a digitiser
- U G06F 3/0488
 - • • using a touch-screen or digitiser, e.g. input of commands through traced gestures
- G06F 3/04886
 - • • • {by partitioning the screen or tablet into independently controllable areas, e.g. virtual keyboards, menus (-[G06F 3/04883](#) takes precedence-)}
- U G06F 3/0489
 - • • using dedicated keyboard keys or combinations thereof
- G06F 3/04892
 - • • • {Arrangements for controlling cursor position based on codes indicative of cursor displacements from one discrete location to another, e.g. using cursor control keys associated to different directions or using the tab key (-arrangements for controlling cursor position based on coordinate signals [G06F 3/038](#)-)}
- G06F 3/04895
 - • • • {Guidance during keyboard input operation, e.g. prompting (-help systems [G06F 9/4446](#)-)}
- G06F 3/05
 - Digital input using the sampling of an analogue quantity at regular intervals of time, {input from a/d converter or output to d/a converter} (-analogue- digital conversion per se [H03M 1/00](#) ; sampling per se [H03K 17/00](#) ; sample- and- hold arrangements per se [G11C 27/02](#)-)
- G06F 3/06
 - Digital input from or digital output to record carriers, {e.g. RAID, emulated record carriers, networked record carriers} (-recording or reproducing devices per se [G11B](#); error detection, error correction, monitoring per se regarding storage systems [G06F 11/00](#); accessing or addressing within memory systems or architectures [G06F 12/00](#); information retrieval [G06F 17/30](#)-)}
- U G06F 3/0601
 - {Dedicated interfaces to storage systems}

- U G06F 3/0668
 - . . {adopting a particular infrastructure}
- G06F 3/067
 - . . . {Distributed or networked storage systems, e.g. storage area networks [SAN], network attached storage [NAS]}
- U G06F 3/0671
 - . . . {In-line storage system}
- U G06F 3/0673
 - {Single storage device}
- G06F 3/0679
 - {Non-volatile semiconductor memory device, e.g. flash memory, one time programmable memory [OTP]}
- G06F 3/08
 - . from or to individual record carriers, e.g. punched card, {memory card, integrated circuit [IC] card, smart card (-record carriers for use with machines and with at least a part designed to carry digital markings [G06K 19/00](#) ; coded identity card or credit card with a coded signal [G07F 7/10](#)-)}
- G06F 3/12
 - Digital output to print unit, {e.g. line printer, chain printer} (-digital output to typewriter [G06F 3/09](#) ; printing of alphanumeric characters [G06K 15/02](#)-)
- U G06F 3/1201
 - . {Dedicated interfaces to print systems}
- U G06F 3/1223
 - . . {specifically adapted to use a particular technique}
- U G06F 3/1229
 - . . . {Printer resources management or printer maintenance, e.g. device status, power levels}
- G06F 3/1234
 - {Errors handling and recovery, e.g. reprinting (-[G06F 3/1261](#) takes precedence-)}
- U G06F 3/1237
 - . . . {Print job management}
- U G06F 3/1268
 - {Job submission, e.g. submitting print job order or request not the print data itself}
- G06F 3/1271
 - {Job submission at the printing node, e.g. creating a job from a data stored locally or remotely (-[G06F 3/1238](#) takes precedence-)}
- G06F 3/14
 - Digital output to display device; {Cooperation and interconnection of the display device with other functional units} (-control of display in general [G09G](#); arrangements for producing a permanent visual presentation of the output data [G06K 15/00](#)-)
- G06F 3/16
 - Sound input; Sound output (conversion of speech into digital information or vice versa [G10L](#))
- G06F 5/00**
Methods or arrangements for data conversion without changing the order or content of the data handled (-by coding or decoding [H03M](#)-)
- G06F 5/01
 - for shifting, e.g. justifying, scaling, normalising((-digital stores in which the information is moved stepwise, e.g. shift-registers [G11C 19/00](#) ; digital stores in which the information circulates [G11C 21/00](#)-)}
- G06F 5/015
 - . {having at least two separately controlled shifting levels, e.g. using shifting matrices (-[G06F 5/012](#) takes precedence-)}
- G06F 5/06
 - for changing the speed of data flow, i.e. speed regularising {or timing, e.g. delay lines, FIFO buffers; over- or underrun control therefor; (-[G06F 7/78](#) takes precedence-)}
- G06F 5/08
 - . having a sequence of storage locations, the intermediate ones not being accessible for either enqueue or dequeue operations, e.g. using a shift register((-[G06F 5/065](#) takes precedence; shift registers per se [G11C 19/00](#)-)}
- G06F 5/10
 - . having a sequence of storage locations each being individually accessible for both enqueue and dequeue operations, e.g. using random access memory((-[G06F 5/065](#) takes precedence-)}
- G06F 7/00**
Methods or arrangements for processing data by operating upon the order or content of the data handled (-logic circuits [H03K 19/00](#)-)
- G06F 7/02
 - Comparing digital values (-[G06F 7/06](#) , { [G06F 7/22](#) , } [G06F 7/38](#) take precedence; information retrieval [G06F 17/30](#) ; comparing pulses [H03K 5/22](#)-)

- G06F 7/06
 - Arrangements for sorting, selecting, merging or comparing data on individual record carriers (sorting of postal letters [B07C](#) ; conveying record carriers from one station to another [G06K 13/02](#) -)
- G06F 7/08
 - • Sorting, i.e. grouping record carriers in numerical or other ordered sequence according to the classification of at least some of the information they carry (by merging two or more sets of carriers in ordered sequence [G06F 7/16](#) -)
- U G06F 7/22
 - Arrangements for sorting or merging computer data on continuous record carriers, e.g. tape, drum, disc
- G06F 7/24
 - • Sorting, i.e. extracting data from one or more carriers, rearranging the data in numerical or other ordered sequence, and rerecording the sorted data on the original carrier or on a different carrier or set of carriers {sorting methods in general} (-[G06F 7/36](#) takes precedence -)
- G06F 7/26
 - • • the sorted data being recorded on the original record carrier within the same space in which the data had been recorded prior to their sorting, without using intermediate storage {contains no documents, see [G06F 7/24](#) -}
- G06F 7/32
 - • Merging, i.e. combining data contained in ordered sequence on at least two record carriers to produce a single carrier or set of carriers having all the original data in the ordered sequence {merging methods in general} (-[G06F 7/36](#) takes precedence -)
- U G06F 7/38
 - Methods or arrangements for performing computations using exclusively denominational number representation, e.g. using binary, ternary, decimal representation
- G06F 7/383
 - • {using magnetic or similar elements} (-parametric and other resonant circuits [G06F 7/388](#) -)}
- G06F 7/386
 - • • {decimal, radix 20 or 12} (-[G06F 7/385](#) takes precedence -)}
- G06F 7/40
 - • using contact-making devices, e.g. electro-magnetic relay (-[G06F 7/46](#) takes precedence -)
- G06F 7/42
 - • • Adding; Subtracting { [G06F 7/405](#) takes precedence }
- G06F 7/44
 - • • Multiplying; Dividing { [G06F 7/405](#) takes precedence }
- G06F 7/446
 - • • • {by partial product forming (*with electric multiplication table*)} {~~with electric multiplication table~~}
- U G06F 7/46
 - • using electromechanical counter-type accumulators
- U G06F 7/462
 - • • {Multiplying; dividing}
- G06F 7/465
 - • • • {by partial product forming (*with electric multiplication table*)} {~~with electric multiplication table~~}
- U G06F 7/48
 - • using non-contact-making devices, e.g. tube, solid state device; using unspecified devices
- G06F 7/483
 - • • Computations with numbers represented by a non-linear combination of denominational numbers, e.g. rational numbers, logarithmic number system, floating-point numbers (-conversion to or from floating-point codes [H03M 7/24](#) -) {(-[G06F 7/4806](#) , [G06F 7/4824](#) , [G06F 7/49](#) , [G06F 7/491](#) , [G06F 7/544](#) take precedence -)}
- G06F 7/485
 - • • • Adding; Subtracting {(-[G06F 7/4833](#) , [G06F 7/4836](#) take precedence -)}
- G06F 7/487
 - • • • Multiplying; Dividing {(-[G06F 7/4833](#) , [G06F 7/4836](#) take precedence -)}

- G06F 7/49
- • • Computations with a radix, other than binary, 8, 16 or decimal, e.g. ternary, negative or imaginary radices, mixed radix {non-linear PCM (-G06F 7/4824 takes precedence-)}
- WARNINGS
- Not complete. For radix 12 or 20 see provisionally also [G06F 7/491](#) and subgroups
- G06F 7/491
- • • Computations with decimal numbers {radix 12 or 20. (-G06F 7/4824 takes precedence-)}
- G06F 7/4912
- • • {Adding; Subtracting (-G06F 7/492 , G06F 7/498 take precedence-)}

 - • • • {Query by example, e.g. a complete video frame or video sequence (-graphical querying [G06F 17/30831](#)-)}
- G06F 17/30831
 - • • • {Graphical querying, e.g. query-by-region, query-by-sketch, query-by-trajectory, GUIs for designating a person/face/object as a query predicate (-end-user interface involving hot spots associated with the video [H04N 21/4725](#) ; end-user interface for selecting a Region of Interest [H04N 21/4728](#)-)}
- G06F 17/30837
 - • • {Query results presentation or summarisation specifically adapted for the retrieval of video data (-end-user interface for requesting or interacting with video content, e.g. video on demand interface or electronic program guide [H04N 21/472](#)-)}
- G06F 17/3084
 - • • • {Presentation of query results (-[G06F 17/30843](#) takes precedence; browsing a video collection [G06F 17/30849](#)-)}
- G06F 17/30846
 - • • {Browsing of video data (-end-user interface for requesting or interacting with video content, e.g. video on demand interface or electronic program guide [H04N 21/472](#) ; indicating arrangements in the context of indexing and addressing recorded information [G11B 27/34](#)-)}
- G06F 17/30855
 - • • • {Hypervideo (-linking data to content, e.g. by linking an URL to a video object in the context of video distribution systems [H04N 21/858](#)-)}
- G06F 17/30858
 - • • {Video database index structures or management thereof (-table of contents on a record carrier [G11B 27/327](#)-)}
- G06F 17/30861
 - • {Retrieval from the Internet, e.g. browsers (-internet protocol [H04L 29/06095](#)-)}
- U G06F 17/30876
 - • • {by using information identifiers, e.g. encoding URL in specific indicia, browsing history}
- G06F 17/30887
 - • • • {URL specific, e.g. using aliases, detecting broken or misspelled links (-address allocation to terminals or nodes connected to a network [H04L 29/12009](#)-)}
- U G06F 17/30899
 - • • {Browsing optimisation}
- G06F 17/30902
 - • • • {of access to content, e.g. by caching (-accessing, addressing or allocating within memory systems and caches [G06F 12/08](#)-)}
- U G06F 17/30908
 - • {of semistructured data, the undelying structure being taken into account, e.g. mark-up language structure data}
- U G06F 17/30914
 - • • {Mapping or conversion}
- G06F 17/3092
 - • • • {Mark-up to mark-up conversion (-conversion for visualization in web browsing [G06F 17/30905](#)-)}
- U G06F 17/30943
 - • {details of database functions independent of the retrieved data type}

- G06F 17/30946
 - . . {indexing structures}(-indexing structures for specific data types [G06F 17/30067](#) , [G06F 17/30619](#) , [G06F 17/30321](#)-)}
- G06F 17/30949
 - . . . {hash tables}(-hashing functions for network address lookup or routing in networks [H04L 12/5689](#)-)}
- G06F 17/30952
 - . . . {using directory or table look-up}(-use of a directory or look-up table in file systems [G06F 17/30067](#)-)}
- G06F 17/30958
 - . . . {Graphs; Linked lists}(-[G06F 17/30961](#) takes precedence-)}
- U G06F 17/30964
 - . . {Querying}
- U G06F 17/30979
 - . . . {Query processing}
- G06F 17/30985
 - {by using string matching techniques}(-sequence comparison in bioinformatics [G06F 19/22](#) ; string matching used for packet routing in packet switching systems [H04L 12/5689](#)-)}
- G06F 17/30988
 - {by searching ordered data, e.g. alpha-numerically ordered data}(-sequence comparison in bioinformatics [G06F 19/22](#)-)}
- G06F 17/40
 - Data acquisition and logging}(-for input to computer [G06F 3/00](#) ; { displays as computer output [G06F 3/14](#) ; for image data processing [G06T 9/00](#) ; compression in general [H03M 7/30](#) ; for transmission [H04B 1/66](#) ; for pictorial communication [H04N](#); arrangements in telecontrol or telemetry systems for selectively calling a substation from a main station [H04Q 9/00](#) })

WARNING

This group is no longer used for the classification of new documents. The documents are classified in the application fields according to the references above
- U G06F 17/50
 - Computer-aided design
- U G06F 17/5009
 - . {using simulation}
- G06F 17/5018
 - . . {using finite difference methods or finite element methods}(-picture mesh generation [G06T 17/20](#)-)}
- G06F 17/5022
 - . . {Logic simulation, e.g. for logic circuit operation}(-fault-simulation [G06F 11/261](#) ; test pattern synthesising [G06F 11/263](#)-)}
- G06F 17/5045
 - . {Circuit design}(-[G06F 17/5068](#) takes precedence; logic circuits [H03K 19/00](#)-)}
- G06F 17/509
 - . {Network design, e.g. positioning, routing, graphs}(-circuit design [G06F 17/5068](#)-)}
- G06F 17/60
 - Administrative, commercial, managerial, supervisory or forecasting purposes}(-electronic cash registers other than digital data processing aspects thereof [G07G 1/12](#)-)

WARNING

This group is no longer used for the classification of new documents as from January 1, 2006. The backlog of this group is being continuously reclassified to the relevant groups of [G06Q](#)
- G06F 17/602
 - . {Data processing in buying-selling transactions}(-for trading of electric energy [H02J 3/008](#)-)(not used)}
- G06F 17/604
 - . . {for exchange business, e.g. quotations or sales transactions of stock or other commodities}(-stock quotation systems [H04L 12/1804](#)-)}
- G06F 17/606
 - . . {Centrally controlled vending systems}(-mechanisms actuated by objects other than coins to free or to actuate vending, hiring or the like apparatus [G07F 7/00](#)-)}

G06F 19/00

Digital computing or data processing equipment or methods, specially adapted for specific applications (G06F 17/00 takes precedence; data processing systems or methods specially adapted for administrative, commercial, financial, managerial, supervisory or forecasting purposes G06Q)

WARNING

This group only covers specific applications related to the fields of healthcare or life sciences, e.g. bioinformatics (G09F 19/10), medical informatics (G06F 19/30), or chemoinformatics (G06F 19/70). Groups G06F 19/30 - G06F 19/709 do not correspond to former or future IPC groups.

Concordance CPC : IPC for said groups is as follows: - G06F 19/30 - G06F 19/366 : G06F 19/00
- G06F 19/70 - G06F 19/709 : G06F 19/00

	G06F 2203/01	• Indexing scheme relating to G06F 3/01
	G06F 2203/033	• Indexing scheme relating to G06F 3/033
	G06F 2203/038	• Indexing scheme relating to G06F 3/038
	G06F 2203/041	• Indexing scheme relating to G06F 3/041 - G06F3-045
	G06F 2203/048	• Indexing scheme relating to G06F 3/048
G06F 2205/00		Indexing scheme relating to group G06F 5/00 ; Methods or arrangements for data conversion without changing the order or content of the data handled
	G06F 2205/06	• Indexing scheme relating to groups G06F 5/06 - G06F 5/16
	G06F 2205/10	• Indexing scheme relating to groups G06F 5/10 - G06F 5/14
	G06F 2205/12	• Indexing scheme relating to groups G06F 5/12 - G06F 5/14
U	G06F 2206/00	Indexing scheme related to dedicated interfaces for computers
	G06F 2206/10	• Indexing scheme related to storage interfaces for computers, indexing schema related to group G06F 3/06

G06F 2206/15	• Indexing scheme related to printer interfaces for computers, indexing schema related to group G06F 3/12
G06F 2206/20	• Indexing scheme related to audio interfaces for computers, indexing schema related to group G06F 3/16
U G06F 2207/00	Indexing scheme relating to methods or arrangements for processing data by operating upon the order or content of the data handled
G06F 2207/02	• Indexing scheme relating to groups G06F 7/02 - G06F 7/026
G06F 2207/22	• Indexing scheme relating to groups G06F 7/22 - G06F 7/36
G06F 2207/38	• Indexing scheme relating to groups G06F 7/38 - G06F 7/575
G06F 2207/3804	• • Details (not used)
U G06F 2207/3808	• • • concerning the type of numbers or the way they are handled
U G06F 2207/3812	• • • • Devices capable of handling different types of numbers
G06F 2207/382	• • • • Reconfigurable for different fixed word lengths (multigauge devices G06F 2207/3828 -)
U G06F 2207/386	• • • Special constructional features
G06F 2207/3864	• • • • Clockless, i.e. asynchronous operation used as a design principle (G06F 2207/3888 takes precedence-)
G06F 2207/48	• • Indexing scheme relating to groups G06F 7/48 - G06F 7/575
G06F 2207/483	• Indexing scheme relating to group G06F 7/483
G06F 2207/491	• Indexing scheme relating to groups G06F 7/491 - G06F 7/4917
G06F 2207/492	• Indexing scheme relating to groups G06F 7/492 - G06F 7/496
G06F 2207/506	• Indexing scheme relating to groups G06F 7/506 - G06F 7/508
G06F 2207/535	• Indexing scheme relating to groups G06F 7/535 - G06F 7/5375
G06F 2207/5352	• • Non-restoring division not covered by G06F 7/5375
G06F 2207/544	• Indexing scheme relating to group G06F 7/544
G06F 2207/552	• Indexing scheme relating to groups G06F 7/552 - G06F 7/5525
G06F 2207/5526	• • Roots or inverse roots of single operands (not used)
G06F 2207/556	• Indexing scheme relating to group G06F 7/556
G06F 2207/58	• Indexing scheme relating to groups G06F 7/58 - G06F 7/588
G06F 2207/72	• Indexing scheme relating to groups G06F 7/72 - G06F 7/729
G06F 2207/7276	• • Additional details of aspects covered by group G06F 7/723
G06F 2209/00	Indexing scheme relating to G06F 9/00
G06F 2209/46	• Indexing scheme relating to G06F 9/46
G06F 2209/48	• Indexing scheme relating to G06F 9/48
G06F 2209/50	• Indexing scheme relating to G06F 9/50
G06F 2209/52	• Indexing scheme relating to G06F 9/52
G06F 2209/54	• Indexing scheme relating to G06F 9/54
U G06F 2211/00	Indexing scheme relating to details of data-processing equipment not covered by groups G06F 3/00 to G06F 13/00
G06F 2211/10	• Indexing scheme relating to G06F 11/10
G06F 2211/1002	• • Indexing scheme relating to G06F 11/1076
G06F 2216/00	Indexing scheme relating to additional aspects of information retrieval not explicitly covered by G06F 17/30 and subgroups

G06F 2221/00	Indexing scheme relating to security arrangements for protecting computers, components thereof, programs or data against unauthorised activity (not used)
G06F 2221/03	• Indexing scheme relating to G06F 21/50 , monitoring users, programs or devices to maintain the integrity of platforms
G06F 2221/07	• Indexing scheme relating to G06F 21/10 , protecting distributed programs or content
G06F 2221/0702	• • Binding (not used)
G06F 2221/0722	• • Content (not used)
G06F 2221/0726	• • • Personalisation (not used)
G06F 2221/0744	• • • Unique instance (- G06F 2221/0702 takes precedence-)
G06F 2221/0751	• • Key (not used)
G06F 2221/0757	• • Licence (not used)
G06F 2221/0762	• • • Definition (not used)
G06F 2221/0779	• • Transfer (not used)
G06F 2221/0795	• • • Transaction with ACID [<i>Atomicity, Consistency, Isolation and Durability</i> properties] (Atomicity, Consistency, Isolation and Durability) properties
G06F 2221/21	• Indexing scheme relating to G06F 21/00 and subgroups addressing additional information or applications relating to security arrangements for protecting computers, components thereof, programs or data against unauthorised activity

Project: N/A (G06K)

G06K 1/00	Methods or arrangements for marking the record carrier in digital fashion (-interpreting G06K 3/02-)
G06K 1/02	• by punching (-punching in general B26F -)
G06K 1/04	• • controlled by sensing markings on the record carrier being punched (-sensing of record carriers G06K 7/00 -)
U G06K 1/06	• • Manually-controlled device
G06K 1/10	• • • Tape punches (-specially adapted for a particular purpose, see the relevant subclass, e.g. for telegraphy H04L -)
G06K 1/12	• otherwise than by punching (-printing in general B41 , e.g. B41J -)
G06K 1/121	• • {by printing code marks (-applying code marks to labels B65C 9/46 ; marking or coding completed packages B65B 61/26 -)}
G06K 1/126	• • {by photographic or thermographic registration (-recording apparatus for measuring instruments G01D 15/00 -)}
G06K 1/128	• • {by electric registration, e.g. electrolytic, spark erosion (-recording apparatus for measuring instruments G01D 15/06 ; information storage in general G11 -)}
G06K 7/00	Methods or arrangements for sensing record carriers,{e.g. for reading patterns} (-G06K 9/00 takes precedence-)
G06K 7/0095	• {Testing the sensing arrangement, e.g. testing if a magnetic card reader, bar code reader, RFID interrogator or smart card reader functions properly (-testing of electrical circuits G01R 31/28 -)}
U G06K 7/01	• Details
G06K 7/015	• • Aligning or centering of the sensing device with respect to the record carrier (-in general G11B -)
G06K 7/016	• • Synchronisation of sensing process (-in general G11B -)
U G06K 7/08	• by means detecting the change of an electrostatic or magnetic field, e.g. by detecting change of capacitance between electrodes

- U G06K 7/082 • • {using inductive or magnetic sensors}
- G06K 7/083 • • • {inductive (G06K 7/10336 takes precedence)}
- G06K 7/087 • • • {flux-sensitive, e.g. magnetic, detectors (G06K 7/10336 takes precedence)}
- U G06K 7/10 • by electromagnetic radiation, e.g. optical sensing; by corpuscular radiation
- U G06K 7/10009 • • {sensing by radiation using wavelengths larger than 0.1 mm, e.g. radio-waves or microwaves}

NOTE

This group covers electromagnetic interrogation as radiated by the antenna of an interrogation device while interrogating a plurality of wireless electronic memory record carriers, e.g. non-contact smart cards, RFID tags or labels, or transponders

- G06K 7/10019 • • • {resolving collision on the communication channels between simultaneously or concurrently interrogated record carriers. (collision between the communication channels used by wireless communication devices, where the solution is not particularly adapted for RFIDs or the like, H04W 74/08)}
- G06K 7/10069 • • • • {the collision being resolved in the frequency domain, e.g. by hopping from one frequency to the other (frequency hopping or spread spectrum techniques H04B 7/00)}
- U G06K 7/10079 • • • • {the collision being resolved in the spatial domain, e.g. temporary shields for blindfolding the interrogator in specific directions}
- G06K 7/10089 • • • • • {the interrogation device using at least one directional antenna or directional interrogation field to resolve the collision (direction or location finding, such as triangulation techniques, G01S 13/00)}
- U G06K 7/10118 • • • {the sensing being preceded by at least one preliminary step}
- G06K 7/10148 • • • • {the step consisting of dynamically tuning the resonant circuit of the interrogation device that is emitting the interrogation signal, e.g. for impedance matching inside of the interrogation device (for tuning related to loop aerials in general H01Q 7/00)}
- U G06K 7/10158 • • • {methods and means used by the interrogation device for reliably powering the wireless record carriers using an electromagnetic interrogation field}
- G06K 7/10178 • • • • {including auxiliary means for focusing, repeating or boosting the electromagnetic interrogation field (comparable booster antennas integrated on the record carrier itself G06K 19/07794)}
- G06K 7/10237 • • • {the reader and the record carrier being capable of selectively switching between reader and record carrier appearance, e.g. in near field communication [NFC] devices where the NFC device may function as an RFID reader or as an RFID tag}
- G06K 7/10247 • • • • {issues specific to the use of single wire protocol [SWP] in NFC like devices}
- G06K 7/10257 • • • {arrangements for protecting the interrogation against piracy attacks (computer security in general G06F 21/00 ; jamming of communication, countermeasures H04K 3/00 ; secret communication H04K 1/00)}
- G06K 7/10297 • • • {arrangements for handling protocols designed for non-contact record carriers such as RFIDs NFCs, e.g. ISO/IEC 14443 and 18092 (Protocols for data communication in general, see H04L 29/06)}
- G06K 7/10316 • • • {using at least one antenna particularly designed for interrogating the wireless record carriers (antennas in general H01Q 1/22)}
- U G06K 7/10366 • • • {the interrogation device being adapted for miscellaneous applications}
- U G06K 7/10376 • • • • {the interrogation device being adapted for being moveable}

- G06K 7/10396 {the interrogation device being wearable, e.g. as a glove, bracelet, or ring (-wearable aerials in general [H01Q 1/27-](#))}
- G06K 7/10415 {the interrogation device being fixed in its position, such as an access control device for reading wireless access cards, or a wireless ATM (-banking machines in general [G07F 19/00-](#))}
- U G06K 7/10425 {the interrogation device being arranged for interrogation of record carriers passing by the interrogation device}
- G06K 7/10435 {the interrogation device being positioned close to a conveyor belt or the like on which moving record carriers are passing (-conveying in accordance with bodily destination marks, see [B65G 47/46](#) , sorting of objects carrying identity markings, see [B07C 5/34](#))}
- G06K 7/10465 {the interrogation device being capable of self-diagnosis, e.g. in addition to or as part of the actual interrogation process (-testing of electrical circuits in general [G01R 31/28-](#))}
- U G06K 7/10544 . . {by scanning of the records by radiation in the optical part of the electromagnetic spectrum}
- U G06K 7/10554 . . . {Moving beam scanning}
- U G06K 7/10594 {Beam path}
- U G06K 7/10683 {Arrangement of fixed elements}
- G06K 7/10702 {Particularities of propagating elements, e.g. lenses, mirrors (-[G06K 7/10831](#) takes precedence-)}
- U G06K 7/10821 . . . {further details of bar or optical code scanning devices}
- G06K 7/10831 {Arrangement of optical elements, e.g. lenses, mirrors, prisms (optical elements per se [G02B](#))}
- G06K 7/10841 {Particularities of the light-sensitive elements (semiconductor devices [H01L](#))}
- G06K 7/10851 {Circuits for pulse shaping, amplifying, eliminating noise signals, checking the function of the sensing device (basic electronic circuitry [H03](#))}
- G06K 7/10861 {sensing of data fields affixed to objects or articles, e.g. coded labels (-postal sorting [B07C 3/14](#) , conveying articles [B65G 47/48-](#))}
- G06K 7/14 . . using light without selection of wavelength, e.g. sensing reflected white light((-[G06K 7/10831](#) to [G06K 7/1097](#) take precedence-))

G06K 9/00

Methods or arrangements for reading or recognising printed or written characters or for recognising patterns, e.g. fingerprints (-processing or analysis of tracks of nuclear particles [G01T 5/02](#) ; { information retrieval [G06F 17/30](#) ; medical diagnosis [G06F 19/34](#) ; recognition of molecular sequences [G06F 19/70](#) ; radio frequency identification [G06K 7/00](#) ; recognition of barcodes and similar code images [G06K 7/10](#) ; computer systems based on specific computational models [G06N](#); image analysis, inspection, positioning or tracking [G06T 7/00](#) ; recognition of acoustic speech signals [G10L 15/00](#) ; acoustic speaker identification [G10L 17/00](#) })

NOTE

1. In this group, the following term is used with the meaning indicated:
- "recognising" includes several functions such as extracting features, clustering, classifying or matching.
2. IPC subgroups [G06K 9/20](#) , [G06K 9/36](#) , [G06K 9/62](#) and [G06K 9/74](#) refer to methods or arrangements that can be applied to a pattern independently of its nature or to that are applied to specific patterns not included in the subgroups in the range [G06K 9/00006](#) to [G06K 9/00852](#) . The CPC subgroups in the range [G06K 9/00006](#) to [G06K 9/00852](#) refer to the same methods or arrangements when applied or specially adapted to the specific patterns to which these subgroups relate.

3. The present group does not cover the use of recognised patterns in specific applications, e.g. the use of traced gestures recognised as commands to be input to a computer is covered by the groups under [G06F 3/00](#)

- G06K 9/00006
 - {Acquiring or recognising fingerprints or palmprints (~~non-computerised biometric identification [A61B 5/00](#) ; means for preventing unauthorised use of vehicles [B60R 25/00](#) ; security in computer systems [G06F 21/00](#) ; secure access to buildings [G07C 9/00](#) ; secret or secure communication [H04L 9/00](#) ; means for preventing unauthorised telephone calls [H04M 1/667](#)~~)}
- G06K 9/00013
 - {Image acquisition (~~materials for developing fingerprints, means for visual identification [A61B 5/1172](#)~~)}
- G06K 9/00026
 - • {~~by combining adjacent partial images(e.g. slices)~~*{by combining adjacent partial images (e.g. slices)* to create a composite input or reference pattern; tracking a sweeping finger movement (~~for specific swipe sensing hardware the groups [G06K 9/0002](#) , [G06K 9/00033](#) , [G06K 9/0004](#) and [G06K 9/00046](#) take precedence~~)}
- G06K 9/00046
 - • {by using geometrical optics, e.g. using prisms (~~[G06K 9/00033](#) takes precedence~~)}
- G06K 9/00053
 - • {Protecting the fingerprint sensor against damage caused by the finger (~~protecting semiconductor devices against mechanical damage in general [H01L 23/562](#) ; encapsulations of semiconductor devices [H01L 23/28](#) ; protecting semiconductor devices against electrostatic discharges in general [H01L 23/60](#) , [H01L 27/0248](#)~~)}
- G06K 9/00107

- G06K 9/00577 • {Recognising objects characterised by unique random properties, i.e. objects having a physically unclonable function [PUF], e.g. authenticating objects based on their unclonable texture (-verifying genuineness of valuable papers [G07D 7/00](#)-)}
- G06K 9/00624 • {Recognising scenes, i.e. recognition of a whole field of perception; recognising scene-specific objects (-image retrieval [G06F 17/30244](#) ; video retrieval [G06F 17/30781](#) ; image analysis and image segmentation, e.g. pixel labelling [G06T 7/00](#) ; alarm systems [G08B](#); traffic control [G08G](#); pictorial communication [H04N](#)-)}
- G06K 9/0063 • • {Recognising patterns in remote scenes, e.g. aerial images, vegetation versus urban areas (-radar and similar technologies [G01S](#); segmentation for general image processing [G06T 7/0079](#)-)}
- G06K 9/00711 • • {Recognising video content, e.g. extracting audiovisual features from movies, extracting representative key-frames, discriminating news vs. sport content (-information retrieval in video databases [G06F 17/30781](#) ; recognition of movements or behaviour [G06K 9/00335](#) ; extracting overlay text [G06K 9/3266](#) ; fusion techniques [G06K 9/6288](#) ; speech recognition [G10L 15/00](#); indexing of audio and video or audiovisual data on record media using extracted features or characteristics [G11B 27/28](#)-)}
- G06K 9/00718 • • • {Higher-level, semantic clustering, classification or understanding of video scenes, e.g. detection, labelling or Markovian modelling of sport events or news items (-segmenting video sequences [G06K 9/00765](#) ; clustering techniques per se [G06K 9/6218](#) ; classification techniques per se [G06K 9/6267](#)-)}
- G06K 9/00724 • • • • {of sport video content (-determination of trajectories [G06T 7/20](#)-)}
- G06K 9/00744 • • • {Extracting features from the video content, e.g. video "fingerprints", or characteristics, e.g. by automatic extraction of representative shots or key frames (-segmentation for general image processing [G06T 7/0079](#) ; use of extracted content features in video information retrieval [G06F 17/30784](#) ; automated annotation of image based on image contents [G06K 9/00671](#) ; determination of region of interest for recognition [G06K 9/3233](#) ; extraction of image features or characteristics [G06K 9/46](#) , determining representative patterns [G06K 9/6255](#)-)}
- G06K 9/00751 • • • • {Detecting suitable features for summarising video content (-presentation in the form of a video summary [G06F 17/30843](#) ; editing video summary [G11B 27/034](#) ; programmed access to video content [G11B 27/105](#)-)}
- G06K 9/00758 • • • {Matching video sequences (-aligning the image field [G06K 9/32](#) ; image matching techniques [G06K 9/00201](#) , [G06K 9/62](#) ; registration of image sequences [G06T 7/0038](#)-)}
- G06K 9/00765 • • • {Segmenting video sequences, i.e. computational techniques such as parsing or cutting the sequence, low-level clustering or determining units such as shots and scenes (-segmentation of touching or overlapping patterns in the image field [G06K 9/34](#) ; segmentation for general image processing [G06T 7/0079](#) ; segmentation of an image based on motion information [G06T 7/2006](#) ; picture signal circuitry for scene change detection [H04N 5/147](#)-)}
- G06K 9/00771 • • {Recognising scenes under surveillance, e.g. with Markovian modelling of scene activity (-[G06K 9/00785](#) takes precedence; recognition of movements or behaviour [G06K 9/00335](#) ; motion analysis using general image processing [G06T 7/20](#) ; intruder alarms using image scanning and comparing systems [G08B 13/194](#) ; circuitry for movement detection and estimation for pictorial communication [H04N 5/144](#) ; closed circuit television systems [H04N 7/18](#)-)}

- G06K 9/00778
 - • • {Recognition or static or dynamic crowd images, e.g. recognition of crowd congestion} (-recognition of individual pedestrians [G06K 9/00369](#), recognition of whole body movements [G06K 9/00342](#); counting mechanisms [G06M](#); analysis of motion [G06T 7/20](#); individual entry or exit registers [G07C 9/00](#)-)}
- G06K 9/00785
 - • {Recognising traffic patterns acquired by static cameras} (-measuring or analysing of parameters relative to traffic conditions [G08G 1/0104](#); analysing traffic situation by means of optical sensors [G08G 1/04](#)-)}
- G06K 9/00791
 - • {Recognising scenes perceived from the perspective of a land vehicle, e.g. recognising lanes, obstacles or traffic signs on road scenes} (-vehicle signalling devices [B60Q 9/005](#), [B60Q 1/525](#); viewing systems for vehicles being directed to the improvement of the driver's vision [B60R 1/00](#); means for informing the driver [B60W 50/14](#); steering aid displays [B62D 15/02](#); control of position of land vehicles using camera and image processing [G05D 1/0246](#); traffic control for road vehicles, e.g. involving several vehicles or traffic rules [G08G 1/00](#)-)}
- G06K 9/00798
 - • • {Recognition of lanes or road borders, e.g. of lane markings, or recognition of driver's driving pattern in relation to lanes perceived from the vehicle; Analysis of car trajectory relative to detected road} (-determination of trajectories [G06T 7/20](#)-)}
- G06K 9/00805
 - • • {Detecting potential obstacles} (-recognising people [G06K 9/00362](#)-)}
- U G06K 9/00832
 - • {Recognising scenes inside a vehicle, e.g. related to occupancy, driver state, inner lighting conditions}
- G06K 9/00845
 - • • {Recognising the driver's state or behaviour, e.g. attention, drowsiness} (-anti-dozing alarms [G08B 21/06](#); safety device responsive to condition of driver [B60K 28/02](#); psychotechnic devices for vehicle drivers [A61B 5/18](#)-)}
- G06K 9/00885
 - {-Biometric patterns not provided for under [G06K 9/00006](#), [G06K 9/00154](#), [G06K 9/00335](#), [G06K 9/00362](#), [G06K 9/00597](#); Biometric specific functions not specific to the kind of biometric-}
- G06K 9/00892
 - • {Use of multiple biometrics} (-sensor fusion [G06K 9/6289](#)-)}
- G06K 9/00899
 - • {Spoof detection} (-[G06K 9/00107](#) takes precedence-)}
- G06K 9/03
 - Detection or correction of errors, e.g. by rescanning the pattern} (-validation or performance evaluation [G06K 9/6261](#)-)}
- U G06K 9/18
 - using printed characters having additional code marks or containing code marks, e.g. the character being composed of individual strokes of different shape, each representing a different code value
- G06K 9/183
 - • {Characters composed of bars, e.g. CMC-7} (-bar code forming unreadable characters, e.g. UPC, [G06K 7/00](#)-)}
- G06K 9/186
 - • {Recognition of characters printed with magnetic ink} (-[G06K 9/183](#) takes precedence-)}
- U G06K 9/20
 - Image acquisition
- G06K 9/2054
 - • {Selective acquisition/locating/processing of specific regions, e.g. highlighted text, fiducial marks, predetermined fields, document type identification} (-[G06K 9/2018](#), [G06K 9/209](#) take precedence; recognising the document type with the paragraph layout [G06K 9/00442](#); recognising the document type with the layout of printed lines or input boxes [G06K 9/00449](#)-)}
- G06K 9/2063
 - • • {based on a marking or identifier characterising the document or the area} (-markings for centering the field of view on the document [G06K 9/3216](#)-)}
- G06K 9/2072
 - • • {based on positionally close symbols, e.g. amount sign or URL-specific characters} (-recognition with lexical or semantic context [G06K 9/72](#)-)}

- G06K 9/209
 - {Sensor details, e.g. position, configuration, special lenses (~~G06K 9/2018~~ takes precedence)}
 - U G06K 9/22
 - using hand-held instruments
 - G06K 9/222
 - {the instrument generating sequences of position coordinates corresponding to handwriting; preprocessing or recognising digital ink (~~pen or stylus type devices inputting position G06F 3/03545~~, light pens ~~G06F 3/03542~~; interaction arrangements using gestures traced on a digitiser ~~G06F 3/04883~~)}
 - U G06K 9/32
 - Aligning or centering of the image pick-up or image-field
 - G06K 9/3216
 - {by locating a pattern (~~G06K 9/3208~~, ~~G06K 9/3275~~ take precedence; centering within a document with a marking ~~G06K 9/2063~~)}
 - G06K 9/3233
 - {Determination of region of interest (~~segmentation for general image processing G06T 7/0079~~)}
 - G06K 9/3275
 - {Inclination (skew) detection or correction of characters or of image to be recognised (~~determining orientation of objects in general G06T 7/004~~)}
 - G06K 9/34
 - Segmentation of touching or overlapping patterns in the image field (~~segmentation by quantisation, e.g. thresholding, G06K 9/38~~; edge detection for image feature extraction ~~G06K 9/4604~~; extraction of connected components or edge linking ~~G06K 9/4638~~; segmentation or edge detection for general image processing ~~G06T 7/0079~~)}
 - G06K 9/342
 - {Cutting or merging image elements, e.g. region growing, watershed, clustering-based techniques (~~smoothing or thinning of patterns G06K 9/44~~; clustering techniques ~~G06K 9/6218~~; region-based segmentation for general image processing ~~G06T 7/0081~~)}
 - G06K 9/344
 - {using recognition of characters or words (~~lexical postprocessing of segmented characters G06K 9/72~~)}
 - G06K 9/346
 - {Removing patterns interfering with the pattern to be recognised, such as ruled lines, underlines (~~extracting table structures G06K 9/00442~~; document recognition ~~G06K 9/2054~~)}
 - G06K 9/36
 - Image preprocessing, i.e. processing the image information without deciding about the identity of the image (~~image data processing or generation, in general G06T~~)
- NOTE**
Group [G06K 9/58](#) takes precedence over groups [G06K 9/38](#) to [G06K 9/54](#)
- G06K 9/38
 - Quantising the analogue image signal {e.g. histogram thresholding for discrimination between background and foreground patterns (~~region-based segmentation of touching or overlapping patterns G06K 9/342~~; image segmentation for general image processing ~~G06T 7/0081~~)}
 - G06K 9/40
 - Noise filtering (~~restoration for general image processing G06T 5/001~~; morphologic operations for general image enhancement ~~G06T 5/30~~)}
 - G06K 9/44
 - Smoothing or thinning of the pattern (~~restoration for general image processing G06T 5/001~~; morphologic operations for general image enhancement ~~G06T 5/30~~)}
 - G06K 9/46
 - Extraction of features or characteristics of the image (~~segmentation of touching or overlapping patterns G06K 9/34~~; edge detection for feature extraction ~~G06K 9/4604~~; segmentation or edge detection for general image processing ~~G06T 7/0079~~)}
 - G06K 9/4604
 - {Detecting partial patterns, e.g. edges or contours, or configurations, e.g. loops, corners, strokes, intersections (~~extracting features by contour coding G06K 9/48~~; edge-based segmentation for general image processing ~~G06T 7/0083~~; edge detection for general image processing ~~G06T 7/0085~~)}
 - U G06K 9/4609
 - {by matching or filtering}

- G06K 9/4614
 - • • • {filtering with Haar-like subimages, e.g. computation thereof with the integral image technique} (-biologically-inspired filters such as Gabor wavelets or local ICA kernels [G06K 9/4619](#) ; local approaches in face detection or representation [G06K 9/00248](#) , [G06K9/00F2L](#)-)}
- G06K 9/4638
 - • • • {by analysing connectivity relationships of elements of the pattern, e.g. by edge linking, by connected component or neighbouring slice analysis, by Markov Random Field [MRF]} /analysis} (-segmentation of touching or overlapping patterns involving probabilistic approaches [G06K 9/34](#) ; MRF and other Markovian models in general [G06K 9/6296](#) ; computing shortest geodesic path [G06K 9/6215](#) ; segmentation involving probabilistic approaches for general image processing [G06T 7/0087](#)-)}
- G06K 9/4642
 - • • {by performing operations within image blocks or by using histograms} (-[G06K 9/4652](#) and [G06K 9/4671](#) take precedence; matching image histograms [G06K 9/6212](#)-)}
- G06K 9/4647
 - • • • {summing image-intensity values; Projection and histogram analysis} (-intersections with "scanning" patterns [G06K 9/50](#) ; [G06K 9/4652](#) takes precedence-)}
- G06K 9/4652
 - • • {related to colour} (-[G06K 9/4671](#) takes precedence; colour-based face detection [G06K 9/00234](#) ; colour analysis in general [G06T 7/408](#) ; region-based segmentation for general image processing [G06T 7/0081](#) ; colour conversion and processing [H04N 1/46](#) ; coding colour pictures signals using a reduced set of representative colours [H04N 1/644](#)-)}
- G06K 9/4661
 - • • {related to illumination properties, e.g. according to a reflectance or lighting model} (-depth from shading [G06T 7/0053](#) ; image rendering with lighting effects [G06T 15/50](#)-)}
- G06K 9/4671
 - • • {Extracting features based on salient regional features, e.g. Scale Invariant Feature Transform [SIFT] keypoints} (-determination of region of interest for recognition [ROI] [G06K 9/3233](#) ; extraction of specific shape primitives, e.g. corner or loop, or of configurations thereof, [G06K 9/4604](#) ; biologically-inspired systems integrating saliency maps, e.g. for modelling visual attention [G06K 9/4628](#) ; global invariant features [G06K 9/52](#)-)}
- G06K 9/4676
 - • • • {Extracting features based on a plurality of salient regional features, e.g. "bag of words"} (-saliency map with interactions such as reinforcement or inhibition [G06K 9/4623](#)-)}
- U G06K 9/468
 - • • {related to a structural representation of the pattern}
- G06K 9/4685
 - • • • {Syntactic representation, e.g. using a grammatical approach} (-syntactic pattern recognition [G06K 9/6878](#)-)}
- G06K 9/469
 - • • • {Graphical representation, e.g. directed attributed graph} (-graph matching [G06K 9/6892](#)-)}
- G06K 9/48
 - • • by coding the contour of the pattern} {contour related features or features from contour like patterns, e.g. hand-drawn point-sequence}
- G06K 9/50
 - • • by analysing segments intersecting the pattern} {segments obtained by the intersection of the pattern with a scanning pattern, e.g. random scanning, circular scanning} (-[G06K 9/4638](#) takes precedence-)}
- U G06K 9/52
 - • • by deriving mathematical or geometrical properties from the whole image
- G06K 9/525
 - • • • {Computation of moments} (-moments not relevant for pattern recognition [G06T 7/606](#)-)}
- U G06K 9/54
 - • Combinations of preprocessing functions
- G06K 9/56
 - • • using a local operator, i.e. means to operate on an elementary image point in terms of the immediate surroundings of this point} (-local operators for general image enhancement [G06T 5/20](#)-)}
- U G06K 9/60
 - Combination of image acquisition and preprocessing functions

- G06K 9/605
 - {the combination being locally implemented within the sensing arrangement, e.g. artificial retina (-receptive fields [G06K 9/4619](#) ; enhancement in image sensors [H04N 3/15](#) , [H04N 5/217](#) , [H04N 5/232](#) , [H04N 5/235](#)-)}
- G06K 9/62
 - Methods or arrangements for recognition using electronic means (-learning machines [G06F 15/18](#) ; digital correlation [G06F 17/15](#) ; analogue correlation [G06G 7/19](#)-)
- U G06K 9/6201
 - {Matching; Proximity measures}
- G06K 9/6202
 - • {Comparing pixel values or logical combinations thereof, or feature values having positional relevance, e.g. template matching (-specially adapted for image alignment [G06T 7/0024](#) ; specially adapted for position determination [G06T 7/004](#) ; specially adapted for the calculation of depth from stereo images [G06T 7/0051](#) , specially adapted for image segmentation [G06T 7/0079](#) ; specially adapted for the analysis of motion [G06T 7/20](#)-)}
- U G06K 9/6203
 - • • {Shifting or otherwise transforming the patterns to accommodate for positional errors}
- G06K 9/6204
 - • • • {Matching of contours (-[G06K 9/6206](#) , [G06K 9/6211](#) take precedence-)}
- G06K 9/6205
 - • • • • {by mapping curve parameters onto an accumulator array, e.g. generalised Hough Transform (-detecting primitive shapes such as lines and circles by accumulating parameters of a known equation [G06K 9/4633](#)-)}
- G06K 9/6206
 - • • • • {involving a deformation of the sample or reference pattern; Elastic matching (-segmentation of touching or overlapping patterns involving deformable models [G06K 9/34](#) ; segmentation involving deformable models for general image processing [G06T 7/0089](#)-)}
- G06K 9/6211
 - • • • • {Matching configurations of points or features, e.g. constellation matching (-[G06K 9/00087](#) takes precedence-)}
- G06K 9/6217
 - • {Design or setup of recognition systems and techniques; Extraction of features in feature space; Clustering techniques; Blind source separation (-regression analysis [G06F 17/18](#)-)}
- U G06K 9/6218
 - • • {Clustering techniques}
- U G06K 9/622
 - • • • {Non-hierarchical partitioning techniques}
- G06K 9/6224
 - • • • • {based on graph theory, e.g. Minimum Spanning Trees [MST]}, graph cuts, spectral clustering techniques (-segmentation of touching or overlapping patterns involving graph-based approaches [G06K 9/342](#) ; graph embedding [G06K 9/6252](#) ; segmentation involving graph-based approaches for general image processing [G06T 7/0093](#)-)}
- G06K 9/6228
 - • • {Selecting the most significant subset of features (-[G06K 9/6232](#) takes precedence-)}
- G06K 9/6229
 - • • • {by using evolutionary computational techniques, e.g. genetic algorithms (-genetic algorithms per se [G06N 3/126](#)-)}
- G06K 9/6231
 - • • • • {by evaluating different subsets according to an optimisation criteria such as class separability, e.g. forward selection, backward elimination (-linear discriminant analysis [G06K 9/6234](#)-)}
- U G06K 9/6232
 - • • {Extracting features by transforming the feature space, e.g. multidimensional scaling; Mappings, e.g. subspace methods}
- G06K 9/6234
 - • • • {based on a discrimination criterion, e.g. discriminant analysis (-discriminant functions [G06K 9/6227](#)-)}
- G06K 9/6239
 - • • • • {based on a naturality criterion, e.g. with non-negative factorisation or negative correlation (-matrix computation [G06F 17/16](#)-)}
- U G06K 9/624
 - • • • • {based on a separation criterion, e.g. independent component analysis}

- G06K 9/6246
 - • • • {overcoming non-stationarity or permutations (-using non-stationarity for separation [G06K 9/6244](#)-)}
- U G06K 9/6247
 - • • • {based on an approximation criterion, e.g. principal component analysis}
- G06K 9/6248
 - • • • {nonlinearly, e.g. embedding a manifold in a Euclidean space (-principal curves [G06K 9/6251](#)-)}
- G06K 9/6253
 - • • {User interactive design (-[G06K 9/6263](#) takes precedence-); Environments; Tool boxes}
- U G06K 9/6256
 - • • {Obtaining sets of training patterns; Bootstrap methods, e.g. bagging, boosting}
- G06K 9/6257
 - • • • {characterised by the organisation or the structure of the process, e.g. boosting cascade (-feature selection by floating search [G06K 9/6231](#)-)}
- G06K 9/6259
 - • • • {characterised by the incorporation of unlabelled data, e.g. multiple instance learning [MIL], semi-supervised techniques using expectation-maximisation [EM] or na?ve labelling (-EM techniques [G06K 9/6226](#); EM techniques [G06K 9/6226](#); validation with "oracles" [G06K 9/6263](#)-)}
- U G06K 9/6262
 - • • {Validation, performance evaluation or active pattern learning techniques}
- G06K 9/6263
 - • • • {based on the feedback of a supervisor (-relevance feedback in information retrieval [G06F 17/30](#)-)}
- U G06K 9/6267
 - • {Classification techniques}
- U G06K 9/6268
 - • • {relating to the classification paradigm, e.g. parametric or non-parametric approaches}
- G06K 9/6277
 - • • • {~~based on a parametric(probabilistic)~~ *based on a parametric (probabilistic)* model, e.g. based on Neyman-Pearson lemma, likelihood ratio, Receiver Operating Characteristic (ROC) curve plotting a False Acceptance Rate (FAR) versus a False Reject Rate (FRR)(-segmentation of touching or overlapping patterns involving probabilistic approaches [G06K 9/34](#); image connectivity analysis involving probabilistic approaches, e.g. Markov Random Fields techniques, [G06K 9/4638](#); segmentation involving probabilistic approaches for general image processing [G06T 7/0087](#)-)}
- U G06K 9/6285
 - • • {relating to the decision surface}
- G06K 9/6287
 - • • • {Non-linear, e.g. polynomial classifier (-[G06K 9/6284](#) takes precedence; classifier with multiple radial basis functions [G06K 9/6273](#)-)}
- G06K 9/6288
 - • {Fusion techniques, i.e. combining data from various sources, e.g. sensor fusion (-bootstrap techniques, e.g. boosting [G06K 9/6256](#); data unmixing [G06K 9/624](#); image matching [G06K 9/64](#); fusion of acoustic speaker inputs [G10L 17/10](#)-)}
- G06K 9/6289
 - • • {of input or preprocessed data (-imaging spectrometers [G01J 3/2823](#); image fusion in general and biomedical image fusion [G06T 5/50](#); processing and conversion of colour signals [H04N 1/46](#)-)}
- G06K 9/6292
 - • • {of classification results, e.g. of classification results related to same input data (-[G06K 9/6256](#) takes precedence-)}
- G06K 9/6296
 - • {Graphical models, e.g. Bayesian networks (-probabilistic networks per se [G06N 7/005](#)-)}
- G06K 9/6297
 - • • {Markov models and related models, e.g. semi-Markov models; Markov random fields; networks embedding Markov models (-segmentation of touching or overlapping patterns involving probabilistic approaches [G06K 9/34](#); image connectivity analysis involving probabilistic approaches, e.g. Markov Random Fields, [G06K 9/4638](#); application of Markov models to acoustic speech recognition [G10L 15/00](#); segmentation involving probabilistic approaches for general image processing [G06T 7/0087](#)-)}

- G06K 9/68
 - • using sequential comparisons of the image signals with a plurality of references {in which the sequence of the image signals or the references is relevant}, e.g. addressable memory
- G06K 9/685
 - • • {Involving plural approaches, e.g. verification by template match; resolving confusion among similar patterns, e.g. O & Q (~~G06K 9/6807~~ takes precedence-)}
- U G06K 9/6878
 - • • {Syntactic or structural pattern recognition, e.g. symbolic string recognition}
- G06K 9/6885
 - • • • {Syntactic analysis, e.g. using a grammatical approach (-syntactic image representation [G06K 9/4685](#)-)}
- G06K 9/6892
 - • • • {Graph matching (-graphical image representation [G06K 9/469](#)-)}
- G06K 9/70
 - • • the selection of the next reference depending on the result of the preceding comparison {contains no documents}
- U G06K 9/72
 - • using context analysis based on the provisionally recognized identity of a number of successive patterns, e.g. a word
- G06K 9/723
 - • • {Lexical context (~~G06K 9/00872~~ takes precedence-)}
- G06K 9/74
 - Arrangements for recognition using optical reference masks (-optical analogue correlation [G06E 3/00](#) ; ~~{(-arrangements for optically extracting non-holistic features, e.g. optical wedge-ring detectors, G06K 9/58-)}; {(arrangements for optically extracting non-holistic features, e.g. optical wedge-ring detectors, G06K 9/58)}~~)
- G06K 9/741
 - • {using frequency domain filters, e.g. Fourier masks implemented on spatial light modulators (-spatial light modulators per se [G02B 26/00](#) , [G02F](#)-)}
- G06K 11/00**

Methods or arrangements for graph-reading or for converting the pattern of mechanical parameters, e.g. force or presence, into electrical signal (-combined with character or pattern recognition [G06K 9/00](#) ; feelers for copying devices on machine tools [B23Q 35/00](#) ; arrangements for measuring areas [G01B](#); measuring force [G01L](#); adapted as input devices to computers [G06F 3/00](#) ; systems for transmitting the position of an object with respect to a predetermined reference system, e.g. tele-autographic system, [G08C 21/00](#)-)

WARNING

This group and its subgroups are no longer used for the classification of new documents as from 1 January 2006. Documents relating to methods and arrangements for input to a computer are classified under [G06F 3/033](#) and [G06F 3/041](#)
- G06K 11/06
 - Devices for converting the position of a manually operated writing or tracing member into an electrical signal{(-not used, see [G06F 3/03](#)-)}
- G06K 13/00**

Conveying record carriers from one station to another, e.g. from stack to punching mechanism (-transport devices in general [B65G](#) ; handling thin or filamentary material in general [B65H](#)-)
- U G06K 13/02
 - the record carrier having longitudinal dimension comparable with transverse dimension, e.g. punched card
- U G06K 13/08
 - • Feeding or discharging cards
- G06K 13/0843
 - • • {from or back into the same magazine (-automatic card files [G06K 17/0003](#)-)}
- G06K 13/14
 - • • Card magazines, e.g. pocket, hopper (-card magazines in general [B42F](#)-)]
- G06K 13/18
 - the record carrier being longitudinally extended, e.g. punched tape (-features of interest apart from data processing [G11B](#) ; magnetic-tape drive [G11B 15/00](#)-)

G06K 15/00	Arrangements for producing a permanent visual presentation of the output data{, e.g. computer output printers} (-printing or plotting combined with another operation, e.g. with conveying, G06K 17/00){(-construction of printing heads B41J 2/00 ; special arrangements for scanning and reproduction of pictures involving their transmission, e.g. facsimile H04N 1/00 ; for photocomposing B41B 19/00)}
U G06K 15/002	• {Interacting with the operator}
G06K 15/007	• • {only remotely, e.g. at a host computer}{(-dedicated computer interfaces to print systems G06F 3/1201 -)}
U G06K 15/02	• using printers
G06K 15/025	• • {Simulating output on another printing arrangement, e.g. proof output}{(-matching two or more picture signal generators or two or more picture reproducers H04N 1/6052 -)}
G06K 15/027	• • {Test patterns and calibration}{(-arrangements for controlling or analysing printing mechanisms of typewriters or selective printing units B41J 29/393 takes precedence; colour correction using test pattern analysis in general H04N 1/6033 -)}
G06K 15/10	• • by matrix printers{(- G06K 15/028 takes precedence-)}
G06K 15/12	• • by photographic printing {e.g. by laser printers}
G06K 15/1204	• • • {involving the fast moving of an optical beam in the main scanning direction}{(- G06K 15/1233 to G06K 15/129 take precedence-)}
G06K 15/1209	• • • • {Intensity control of the optical beam}{(- G06K 15/1223 takes precedence-)}
G06K 15/1219	• • • • {Detection, control or error compensation of scanning velocity or position, e.g. synchronisation}{(- G06K 15/1223 takes precedence-)}
G06K 15/1228	• • • {involving the fast moving of a light beam in two directions}{(- G06K 15/1233 to G06K 15/129 take precedence-)}

IMAGE DATA PROCESSING OR GENERATION, IN GENERAL (specially adapted for particular applications, see the relevant subclasses, e.g. [G06K](#), [G09G](#), [H04N](#))

NOTES

This subclass covers:

- arrangements for geometrically modelling objects, whether the final model is used for display of an image of the object or for some other purpose, such as manufacture of a corresponding object;
- arrangements for analysing the geometric attributes of an image of an object.

This subclass does not cover:

- reading or recognising printed or written characters or recognising patterns, e.g. fingerprints, which is covered by subclass [G06K](#);
- modification of image data to allow display using multiple viewports, which is covered by subclass [G09G](#);
- circuits for generating functions for visual indicators, which are covered by subclass [G09G](#);
- scanning of documents or the like in pictorial communication, which is covered by subclass [H04N](#).

WARNING

G08G 5/00

Traffic control systems for aircraft, { e.g. air-traffic control [ATC] }

NOTES

1. This groups covers arrangements, located in the aircraft or on the ground, for controlling aircraft within a traffic environment.
2. This group does not cover arrangements for control of position, course, altitude or attitude of aircraft not specific to a traffic environment, e.g. automatic pilots, which are covered by group [G05D 1/00](#).
3. In this group the following term is used with the meaning indicated: - "traffic" includes traffic on the ground and in the air.
4. Attention is drawn to the following places which might be interesting for search:
 - mechanical aspects of equipment for fitting in or to aircraft [B64D](#)
 - combined instruments indicating more than one navigational value [G01C 23/00](#)

G08G 5/0004

- {Transmission of traffic-related information to or from an aircraft (airborne radio transmission systems in general [H04B 7/185](#); airborne wireless networks [H04W 84/06](#))}

	G08G 5/0008	• • {-with other aircraft}
	G08G 5/0013	• • {-with a ground station}
	G08G 5/0017	• {-Arrangements for implementing traffic-related aircraft activities, e.g. arrangements for generating, displaying, acquiring or managing traffic information (head-up displays G02B 27/01 ; ground or aircraft-carrier-deck-installations B64F)}
	G08G 5/0021	• • {-located in the aircraft}
	G08G 5/0026	• • {-located on the ground}
	G08G 5/003	• {-Flight plan management}
	G08G 5/0034	• • {-Assembly of a flight plan}
	G08G 5/0039	• • {-Modification of a flight plan}
	G08G 5/0043	• {-Traffic management of multiple aircrafts from the ground (G08G 5/003 takes precedence; data processing specially designed for resource management, e.g. scheduling or allocating time, human or machine resources G06Q 10/06)}
	G08G 5/0047	• {-Navigation or guidance aids for a single aircraft (details of equipment G08G 5/0017)}
	G08G 5/0052	• • {-for cruising (combined instruments indicating more than one navigational value G01C 23/00)}
	G08G 5/0056	• • {-in an emergency situation, e.g. hijacking}
	G08G 5/006	• • {-in accordance with predefined flight zones, e.g. to avoid prohibited zones}
	G08G 5/0065	• • {-for taking-off}
	G08G 5/0069	• • {-specially adapted for an unmanned aircraft}
	G08G 5/0073	• {-Surveillance aids (scene image recognition G06K 9/00624)}
	G08G 5/0078	• • {-for monitoring traffic from the aircraft (radar or analogous systems specially adapted for traffic control G01S 13/91)}
	G08G 5/0082	• • {-for monitoring traffic from a ground station (radar or analogous systems specially adapted for traffic control G01S 13/91)}
	G08G 5/0086	• • {-for monitoring terrain (radar or analogous systems specially adapted for terrain avoidance G01S 13/94)}
	G08G 5/0091	• • {-for monitoring atmospheric conditions (radar or analogous systems specially adapted for meteorological use G01S 13/95 ; meteorology G01W)}
	G08G 5/0095	• {-Aspects of air-traffic control not provided for in the other subgroups of this main group}
U	G08G 5/02	• Automatic { approach or} landing aids, i.e. systems in which flight data of incoming planes are processed to provide landing data (landing aids fitted in or to aircraft B64D 45/04 ; visual or acoustic landing aids B64F 1/18)
	G08G 5/025	• • {-Navigation or guidance aids (radar or analogous systems specially adapted for landing purposes G01S 13/913)}
U	G08G 5/04	• Anti-collision systems
	G08G 5/045	• • {-Navigation or guidance aids, e.g. determination of anti-collision maneuvers (radar or analogous systems specially adapted for anti-collision between aircraft G01S 13/9303)}
U	G08G 5/06	• for control when on the ground
	G08G 5/065	• • {-Navigation or guidance aids, e.g. for taxiing or rolling}

Project: N/A (G09B)

G10H 1/383

- • • {-Chord detection and/or recognition, e.g. for correction, or automatic bass generation}

U G10H 5/00

Instruments in which the tones are generated by means of electronic generators ([G10H 7/00](#) takes precedence)

G10H 5/007

- {-Real-time simulation of [G10B](#), [G10C](#), [G10D](#)-type instruments using recursive or non-linear techniques, e.g. waveguide networks, recursive algorithms- (establishing the harmonic content of tones by non-linear elements [G10H 1/16](#); synthesising waveforms using a recursive algorithm [G10H 7/12](#))}

U G10H 2220/00

Input/output interfacing specifically adapted for electrophonic musical tools or instruments

U G10H 2220/155

- User input interfaces for electrophonic musical instruments (graphical user interfaces specifically adapted for electrophonic musical instruments [G10H 2220/091](#); input means in general [G06F 3/00](#))

G10H 2220/185

- • Stick input, e.g. drumsticks with position or contact sensors (-stick for music conducting applications, e.g. conductor baton movement detection [G10H 2220/206](#))

Project: N/A (G10K)**G10K**

SOUND-PRODUCING DEVICES (-sound-producing toys [A63H 5/00](#) ; musical instruments or parts thereof, see the relevant subclass, e.g. [G10D](#)); **ACOUSTICS NOT OTHERWISE PROVIDED FOR** (-systems using the reflection or reradiation of acoustic waves [G01S 15/00](#) ; generating seismic energy [G01V 1/02](#) ; signalling or calling arrangements, alarm arrangements [G08B](#) ; piezo-electric electrostrictive or magnetostrictive elements in general [H01L 41/00](#) ; transmission systems using infrasonic, sonic, or ultrasonic waves [H04B 11/00](#) ; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers [H04R](#)-)

NOTES

This subclass covers arrangements for generating mechanical vibrations in fluids.

This subclass covers also the production of sounds which may not be audible to human beings but which are audible to animals.

In this subclass, the following terms are used with the meanings indicated:

- "acoustics" and "sound" cover the technical field dealing with mechanical vibrations at all infrasonic -, sonic - and ultrasonic frequencies. However, generation or transmission of mechanical waves, in general, is covered by subclass [B06B](#), subject to the exception specified in Note (1) above.

G10K 1/00

Devices in which sound is produced by striking a resonating body, e.g. bell, chimes, gong (-combinations with clocks or watches [G04B](#), [G04C](#); carillons [G10F 1/10](#); { for percussion instruments [G10D 13/00](#) })

- G10K 1/06
 - the resonating devices having the shape of a bell, plate, rod, or tube (-bells for towers [G10K 1/28](#)-)
- G10K 1/062
 - • electrically operated{ self-interrupting relays [H01H 51/34](#)-}
- U G10K 1/063

INFORMATION STORAGE BASED ON RELATIVE MOVEMENT BETWEEN RECORD CARRIER AND TRANSDUCER ({ producing carriers of sound records for needle playback [B29C 39/00](#) } ; recording measured values in a way that does not require playback through a transducer [G01D](#); photosensitive materials or processes for photographic purposes [G03C](#); electrography, electrophotography, magnetography [G03G](#); recording or playback apparatus using mechanically marked tape, e.g. punched paper tape, or using unit records, e.g. punched or magnetically marked cards, [G06K](#); transferring data from one type of record carrier to another [G06K 1/18](#) ; printing of data from record carriers [G06K 3/00](#) ; arrangements for producing a permanent visual presentation of the output data [G06K 15/00](#) ; arrangements or circuits for control of indicating devices using static means to present variable information [G09G](#); coding, decoding or code conversion, in general [H03M](#); circuits for coupling output of reproducer to radio receiver [H04B 1/20](#) ; circuits {or arrangements} specially adapted for {pictorial or} television signal recording{ [H04N 1/21](#) } , [H04N 5/76](#) , [H04N 9/79](#) ; loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers or circuits therefor [H04R](#)-)

NOTES

This subclass covers :

- recording or playback of information by relative movement between a record track and a transducer, the transducer directly producing, or being directly actuated by, modulation in the track being recorded or played-back, and the extent of modulation corresponding to the signal being recorded or played-back;
- apparatus and machines for recording or playback, and parts thereof such as heads;
- record carriers for use with such apparatus and machines;
- associated working of other apparatus with such apparatus and machines;
- { relative positioning or movement of transducers and record carriers before, during or after transducing operation, e.g. for accessing record carriers or parts thereof, or for track change, selection or acquisition or for track following or for accessing parts of tracks; }

- { driving or moving of heads or record carriers or both heads and record carriers for increasing, maintaining or decreasing the relative speed before, during or after transducing operation }

In this subclass, the following terms or expressions are used with the meanings indicated :

- "head" includes any means for converting sinusoidal or non-sinusoidal electric wave-forms into variations of the physical condition of at least the adjacent surface of the record carrier, or vice versa;
- "record carrier" means a body, such as a cylinder, disc, card, tape, or wire, capable of permanently holding information, which can be read-off by a sensing element movable relatively to the record carrier.

Documents concerning relative positioning or movement of transducers and record carriers are classified in groups [G11B 3/00](#) to [G11B 7/00](#) and [G11B 21/00](#) when only the transducer is controlled and in groups [G11B 15/00](#) , [G11B 17/00](#) and [G11B 19/00](#) when only the record carrier is controlled. When both record carrier and head are controlled, the documents are classified in [G11B 15/1808](#), [G11B 15/1816](#) , [G11B 19/00](#) and [G11B 27/002](#).

When a plurality of record carriers are controlled, the documents are classified in [G11B 15/68](#) , [G11B 17/08](#) , [G11B 17/22](#) and [G11B 27/002](#).

By "access" is meant an operation including a relative movement for positioning between record carrier and head before, during or after transducing; this operation including "seek", "select", "change", "acquire" and "follow" functions for at least a part of a track on at least one record carrier. By "programmed access" is meant a sequence of access operations the result of the sequence being to acquire a wanted sequence of parts of tracks or a wanted sequence of tracks. Relative movement between head and record carrier also covers the movement of a coupling beam such as a light beam between the head and a stationary record carrier.

"Movement of the head" also covers any virtual movement or any physical movement such as obtained by switching between successive transducing parts of the head or by moving the transducing zone of the head, i.e. by "scanning". If different transducing parts of the head are switchable, the number of transducing parts should be much smaller than the number of individual storage areas of the record carrier.

Attention is drawn to the notes of subclass [G11C](#).

- G11B 7/0055 . . Erasing (~~G11B 7/006 , G11B 7/0065~~ take precedence)
- G11B 7/006 . . Overwriting (~~G11B 7/0065~~ takes precedence)
- U G11B 7/007 . Arrangement of the information on the record carrier, e.g. form of tracks, {actual track shape, e.g. wobbled, or cross-section, e.g. v-shaped; Sequential information structures, e.g. sectoring or header formats within a track}
- G11B 7/00736 . . {Auxiliary data, e.g. lead-in, lead-out, Power Calibration Area [PCA], Burst Cutting Area (BCA), control information (~~sector headers or addresses in prepits G11B 7/00745; address data in track wobble G11B 7/007T~~)}
- WARNING
Not complete, see also [G11B 7/007](#) and [G11B 7/00745](#)
- G11B 7/00745 . . {Sectoring or header formats within a track (~~formats in general G11B 20/12-~~)}
- G11B 7/013 . . for discrete information, i.e. where each information unit is stored at a distinct discrete location {e.g. digital information formats within a data block or sector}

- U G11B 7/08
 - Disposition or mounting of heads or light sources relatively to record carriers
- G11B 7/085
 - • with provision for moving the light beam into, or out of, its operative position {or across tracks, otherwise than during the transducing operation, e.g. for adjustment or preliminary positioning or track change or selection} (~~modulating by information signals G11B 7/12 ; controlling the position or direction of light beams, i.e. deflection, G02F 1/29~~)
- U G11B 7/09
 - • with provision for moving the light beam or focus plane for the purpose of maintaining alignment of the light beam relative to the record carrier during transducing operation, e.g. to compensate for surface irregularities of the latter or for track following
- G11B 7/0901
 - • • {for track following only} (~~G11B 7/0925 , G11B 7/094 , G11B 7/0941 , G11B 7/0943 , G11B 7/0945 , G11B 7/0946 , G11B 7/0948 take precedence~~)
- G11B 7/0908
 - • • {for focusing only} (~~G11B 7/0925 , G11B 7/094 , G11B 7/0941 , G11B 7/0943 , G11B 7/0945 , G11B 7/0946 , G11B 7/0948 take precedence~~)
- G11B 7/0917
 - • • • ~~Focus-error methods other than those covered by G11B 7/0909 to G11B 7/0916~~
- G11B 7/0925
 - • • {Electromechanical actuators for lens positioning} (~~G11B 7/0857 takes precedence~~)
- G11B 7/0927
 - • • • {for focusing only} (~~G11B 7/0937 takes precedence~~)
- G11B 7/0929
 - • • • {for tracking only} (~~G11B 7/0937 takes precedence~~)
- G11B 7/093
 - • • • {for focusing and tracking} (~~G11B 7/0932 to G11B 7/0937 take precedence~~)
- G11B 7/0941
 - • • {Methods and circuits for servo gain or phase compensation during operation} (~~for initialising servos G11B 7/0945~~)
- G11B 7/0948
 - • • {specially adapted for detection and avoidance or compensation of imperfections on the carrier, e.g. dust, scratches, dropouts} (~~G11B 7/095 takes precedence~~)
- G11B 7/10
 - • Interchangeable mountings, e.g. for replacement of head without readjustment {including interchangeable electrical adjuster boards}
- G11B 7/12
 - Heads, e.g. forming of the optical beam spot or modulation of the optical beam {~~disposition or mounting of head elements within housing or with provision for moving of light source, optical beam or detector, irrelevant to the transducing method G11B 7/08 ; { modulating lasers H01S 3/10 ; controlling the intensity, colour, phase, polarisation or direction of light beams arriving from an independent light source, e.g. switching gating or modulating G02F 1/00 }~~}
- U G11B 7/1205
 - • {Integrated head arrangements, e.g. source and detectors mounted on the same substrate}
- U G11B 7/1206
 - • • {where the integrated structure includes a waveguide}
- G11B 7/1208
 - • • • {where the waveguide includes means for electro- or acousto-optical deflection} (~~electro- or acousto-optical deflection in general G02F 1/29 , G02F 1/33~~)
- U G11B 7/123
 - • Integrated head arrangements, e.g. with source and detectors mounted on the same substrate
- U G11B 7/124
 - • • the integrated head arrangements including waveguides
- G11B 7/1245
 - • • • the waveguides including means for electro-optical or acousto-optical deflection {~~electro- or acousto-optical deflection in general G02F 1/29 , G02F 1/33~~}

- G11B 7/125
- • Optical beam sources therefor, e.g. laser control circuitry specially adapted for optical storage devices; Modulators, e.g. means for controlling the size or intensity of optical spots or optical traces{(-electro-, magneto-, or acousto-optical modulators [G02F 1/00](#) ; optical diaphragms [G03B 9/02](#)-)}
- WARNING
For all subgroups of [G11B 7/125](#) , see also provisional [G11B 7/125](#)
- G11B 7/128
- G11B 7/13
- • Modulators (-[G11B 7/1245](#) takes precedence-)
 - • Optical detectors therefor{(-optical detectors per se [G01J](#); demodulating light, transferring the modulation of modulated light, frequency changing of light [G02F 2/00](#)-)}
- WARNING
For all subgroups of [G11B 7/13](#) , see provisional also [G11B 7/13](#)
- U G11B 7/135
- • Means for guiding the beam from the source to the record carrier or from the record carrier to the detector
- WARNING
For all subgroups of [G11B 7/135](#) , see provisional also [G11B 7/135](#)

STATIC STORES (-information storage based on relative movement between record carrier and transducer [G11B](#); semiconductor devices for storage [H01L](#), e.g. [H01L 27/108](#) to [H01L 27/115](#) ; pulse technique in general [H03K](#), e.g. electronic switches [H03K 17/00](#) ; { using a static store as a picture recording medium [H04N 5/907](#) })

NOTE

This subclass covers devices or arrangements for storage of digital or analogue information in which no relative movement takes place between an information storage element and a transducer; which incorporate a selecting-device for writing-in or reading-out the information into or from the store

This subclass does not cover elements not adapted for storage and not provided with such means as referred to in Note (3) below, which elements are classified in the appropriate subclass, e.g. of [H01](#), [H03K](#).

In this subclass, the following terms are used with the meaning indicated:

- "storage element" is an element which can hold at least one item of information and is provided with means for writing-in or reading-out this information;
- "memory" is a device, including storage elements, which can hold information to be extracted when desired.

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups:

ELECTRIC DISCHARGE TUBES OR DISCHARGE LAMPS (spark-gaps [H01T](#); arc lamps with consumable electrodes [H05B](#); particle accelerators [H05H](#))

NOTES

This subclass covers only devices for producing, influencing, or using a flow of electrons or ions, e.g. for controlling, indicating, or switching of electric current, counting electric pulses, producing light or other electromagnetic oscillations, such as X-rays, or for separating or analysing radiation or particles, and having a closed or substantially closed casing containing a chosen gas, vapour, or vacuum, upon the pressure and nature of which the characteristics of the

device depend. Light sources using a combination (other than covered by group [H01J 61/96](#) of this subclass) of discharge and other kinds of light generation are dealt with in [H05B 35/00](#).

In this subclass, groups [H01J 1/00](#) to [H01J 7/00](#) relate only to:

details of an unspecified kind of discharge tube or lamp, or
details mentioned in a specification as applicable to two or more kinds of tubes or lamps as defined by groups [H01J 11/00](#), [H01J 13/00](#), [H01J 15/00](#), [H01J 17/00](#), [H01J 21/00](#), [H01J 25/00](#), [H01J 27/00](#), [H01J 31/00](#), [H01J 33/00](#), [H01J 35/00](#), [H01J 37/00](#), [H01J 40/00](#), [H01J 41/00](#), [H01J 47/00](#), [H01J 49/00](#), [H01J 61/00](#), [H01J 63/00](#) or [H01J 65/00](#), hereinafter called basic kinds. A detail only described with reference to, or clearly only applicable to, tubes or lamps of a single basic kind is classified in the detail group appropriate to tubes or lamps of that basic kind, e.g. [H01J 17/04](#).

In this subclass, the following term is used with the meaning indicated:

- "lamp" includes tubes emitting ultra-violet or infra-red light.

Attention is drawn to the definition of the expression "spark gaps" given in the Note following the title of subclass [H01T](#).

Apparatus or processes specially adapted for the manufacture of electric discharge tubes, discharge lamps, or parts thereof are classified in group [H01J 9/00](#).

H01J 1/00

Details of electrodes, of magnetic control means, of screens, or of the mounting or spacing thereof, common to two or more basic types of discharge tubes or lamps ~~(-details of electron-optical arrangements or of ion traps [H01J 3/00](#)-)~~

- U H01J 1/02
 - Main electrodes
- U H01J 1/13
 - • Solid thermionic cathodes
- U H01J 1/20
 - • • Cathodes heated indirectly by an electric current; Cathodes heated by electron or ion bombardment
- H01J 1/22
 - • • Heaters ~~(-filaments for incandescent lamps [H01K 1/02](#)-)~~
- U H01J 1/30
 - • Cold cathodes, e.g. field-emissive cathode
- H01J 1/312
 - • • having an electric field perpendicular to the surface, e.g. tunnel-effect cathodes of Metal-Insulator-Metal [MIM] type ~~(-[H01J 1/304](#) to [H01J 1/308](#) take precedence [H01J 1/304](#) to [H01J 1/308](#) take precedence)~~
- H01J 1/32
 - • Secondary-electron-emitting electrodes ~~(-[H01J 1/35](#) takes precedence; luminescent screens [H01J 1/62](#); charge storage screens in general [H01J 1/78](#); charge storage screens using secondary emission for image tubes [H01J 29/41](#); dynodes for secondary emission tubes [H01J 43/10](#); secondary-emission detectors for measurement of nuclear or X-radiation [G01T 1/28](#)-)~~
- H01J 1/34
 - • Photo-emissive cathodes ~~(-[H01J 1/35](#) takes precedence; photoelectric screens [H01J 1/78](#)-)~~
- U H01J 1/36
 - • Solid anodes; Solid auxiliary anodes for maintaining a discharge
- H01J 1/42
 - • • Cooling of anodes ~~(-cooling rotary anodes [H01J 1/44](#)-)~~; Heating of anodes
- H01J 1/46
 - Control electrodes, e.g. grid ~~(-for igniting arrangements [H01J 7/30](#)-)~~; Auxiliary electrodes ~~(-auxiliary anodes for maintaining a discharge [H01J 1/36](#)-)~~
- H01J 1/52
 - Screens for shielding ~~(-screens acting as control electrodes [H01J 1/46](#)-)~~; Guides for influencing the discharge; Masks interposed in the electron stream

H01J 1/53	• Electrodes intimately associated with a screen on or from which an image or pattern is formed, picked up, converted, or stored{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/54	• Screens on or from which an image or pattern is formed, picked up, converted, or stored; Luminescent coatings on vessels{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/56	• • acting as light valves by shutter operation, e.g. for eidophor{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/58	• • acting by discolouration, e.g. halide screen{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/60	• • Incandescent screens{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/62	• • Luminescent screens; Selection of materials for luminescent coatings on vessels{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/63	• • • characterised by the luminescent material{(-luminescent materials or compositions C09K 11/00 -){ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/64	• • • characterised by the binder or adhesive for securing the luminescent material to its supports{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/66	• • • Supports for luminescent material{(-vessels H01J 5/02 -){ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/68	• • • with superimposed luminescent layers{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/70	• • • with protective, conductive, or reflective layers{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/72	• • • with luminescent material discontinuously arranged, e.g. in dots or lines{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/74	• • • • with adjacent dots or lines of different luminescent material{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/76	• • • provided with permanent marks or references{ see provisionally also H01J 29/08 to H01J 29/36 -}
H01J 1/78	• • Photoelectric screens; Charge-storage screens{ see provisionally also H01J 29/08 to H01J 29/36 -}
U H01J 1/88	• Mounting, supporting, spacing, or insulating of electrodes or of electrode assemblies
H01J 1/90	• • Insulation between electrodes or supports within the vacuum space{(-leading-in conductors H01J 5/46 -)}
H01J 1/94	• • Mountings for individual electrodes{(-for directly-heated cathodes H01J 1/15 -)}
U H01J 3/00	Details of electron-optical or ion-optical arrangements or of ion traps common to two or more basic types of discharge tubes or lamps
H01J 3/02	• Electron guns{(-electron guns for discharge tubes with provision for introducing objects or material to be exposed to the discharge H01J 37/06 ; for cathode ray tubes H01J 29/48 -)}
H01J 3/025	• • {Electron guns using a discharge in a gas or a vapour as electron source {(-gas-filled discharge tubes with gaseous cathodes H01J 15/00 -)}
H01J 3/026	• • {Eliminating deleterious effects due to thermal effects, electric or magnetic field {(- H01J 3/021 to H01J 3/025 take precedence-)}
H01J 3/027	• • {Construction of the gun or parts thereof {(- H01J 3/021 to H01J 3/025 , H01J 3/026 and H01J 3/028 take precedence-)}
H01J 3/028	• • {Replacing parts of the gun; Relative adjustment {(- H01J 3/021 to H01J 3/025 take precedence-)}

- H01J 3/04 • Ion guns{ see provisionally also [H01J 27/00](#)-}
- H01J 3/06 • two or more guns being arranged in a single vacuum space, e.g. for plural-ray tubes (-[H01J 3/07](#) takes precedence-){ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/07 • Arrangements for controlling convergence of a plurality of beams{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/08 • Arrangements for controlling intensity of ray or beam (-[H01J 3/02](#) , [H01J 3/04](#) take precedence-){ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/10 • Arrangements for centering ray or beam (-[H01J 3/02](#) , [H01J 3/04](#) take precedence-){ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/12 • Arrangements for controlling cross-section of ray or beam; Arrangements for correcting aberration of beam, e.g. due to lenses (-[H01J 3/02](#) , [H01J 3/04](#) take precedence-){ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/14 • Arrangements for focusing or reflecting ray or beam (-[H01J 3/02](#) , [H01J 3/04](#) take precedence-){ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/16 • • Mirrors{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/18 • • Electrostatic lenses{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/20 • • Magnetic lenses{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/22 • • • using electromagnetic means only{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/24 • • • using permanent magnets only{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/26 • Arrangements for deflecting ray or beam (-circuit arrangements for producing saw-tooth pulses or other deflecting voltages or currents [H03K](#) ; { [H01J 29/46](#) to [H01J 29/84](#) and [H01J 37/147](#) take precedence })
- H01J 3/28 • • along one straight line or along two perpendicular straight lines{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/30 • • • by electric fields only{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/32 • • • by magnetic fields only{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/34 • • along a circle, spiral, or rotating radial line{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/36 • Arrangements for controlling the ray or beam after passing the main deflection system, e.g. for post-acceleration or post-concentration{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- H01J 3/38 • Mounting, supporting, spacing, or insulating electron-optical or ion-optical arrangements{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- U H01J 3/381 • • {Dispersed generators}
- U H01J 3/383 • • • {the generators exploiting regenerative energy}
- H01J 3/385 • • • • {Solar energy (generation of electric power by conversion of light [H02S](#))}
- H01J 3/386 • • • • {Wind energy (wind motors [F03D](#))}
- H01J 3/388 • • • {using fuel cells (-fuel cells per se [H01M 8/00](#)-)}
- H01J 3/40 • Traps for removing or diverting unwanted particles, e.g. negative ions, fringing electrons; Arrangements for velocity or mass selection{ see provisionally also [H01J 29/46](#) to [H01J 29/84](#)-}
- U H01J 5/00 Details relating to vessels or to leading-in conductors common to two or more basic types of discharge tubes or lamps**
- U H01J 5/02 • Vessels; Containers; Shields associated therewith; Vacuum locks
- H01J 5/04 • • Vessels or containers characterised by the material thereof (-selection of the material of the coating [H01J 5/08](#)-)

- H01J 5/08
 - • provided with coatings on the walls thereof; Selection of materials for the coatings (~~luminescent coatings~~ [H01J 1/62](#))
- H01J 5/16
 - • Optical or photographic arrangements structurally combined with the vessel (~~luminescent coatings~~ [H01J 1/62](#)) { see provisionally [H01J 29/84](#)}
- U H01J 5/32
 - Seals for leading-in conductors
- H01J 5/34
 - • for an individual conductor (~~pinched-stem seals~~ [H01J 5/38](#) ; end-disc seals [H01J 5/40](#) ; annular seals [H01J 5/44](#))
- H01J 5/48
 - Means forming part of the tube or lamp for the purpose of supporting it (~~associated with electrical connecting means~~ [H01J 5/50](#))
- H01J 5/50
 - Means forming part of the tube or lamps for the purpose of providing electrical connection to it (~~construction of connectors~~ [H01R](#))
- U H01J 7/00**

Details not provided for in the preceding groups and common to two or more basic types of discharge tubes or lamps
- H01J 7/02
 - Selection of substances for gas fillings; Specified operating pressure or temperature (~~radioactive fillings~~ [H01J 7/40](#))
- H01J 7/24
 - Cooling arrangements (~~for main electrodes~~ [H01J 1/02](#)); Heating arrangements (~~for main electrodes~~ [H01J 1/02](#)); Means for circulating gas or vapour within the discharge space
- H01J 7/30
 - Igniting arrangements (~~circuit arrangements~~ [H02M 1/02](#) , [H05B](#))
- H01J 9/00**

Apparatus or processes specially adapted to the manufacture, {installation, removal, maintenance} of electric discharge tubes, discharge lamps, or parts thereof (~~manufacture of vessels or containers from metal~~ [B21](#), e.g. [B21D 51/00](#) , from glass [C03B](#)); Recovery of material from discharge tubes or lamps
- U H01J 9/02
 - Manufacture of electrodes or electrode systems
- U H01J 9/04
 - • of thermionic cathodes
- U H01J 9/042
 - • • {Manufacture, activation of the emissive part}
- H01J 9/045
 - • • • {Activation of assembled cathode (~~regeneration~~ [H01J 9/505](#))}
- H01J 9/047
 - • • • {Cathodes having impregnated bodies (~~H01J 9/045~~ takes precedence)}
- U H01J 9/14
 - • of non-emitting electrodes
- U H01J 9/142
 - • • {of shadow-masks for colour television tubes}
- H01J 9/146
 - • • • {Surface treatment, e.g. blackening, coating (~~H01J 9/144~~ takes precedence)}
- U H01J 9/20
 - Manufacture of screens on or from which an image or pattern is formed, picked up, converted or stored; Applying coatings to the vessel
- U H01J 9/22
 - • Applying luminescent coatings
- U H01J 9/227
 - • • with luminescent material discontinuously arranged, e.g. in dots or lines
- H01J 9/2271
 - • • • {by photographic processes (~~final treatment of shadow-mask prior to or after dot deposition~~ [H01J 9/144](#))}
- H01J 9/2276
 - • • • {Development of latent electrostatic images (~~per se~~ [G03G 15/06](#))}
- H01J 9/233
 - • Manufacture of photo-electric screens or charge-storage screens { no documents, see [H01J 29/36](#)}
- H01J 9/236
 - Manufacture of magnetic deflecting devices for cathode-ray tubes (~~manufacturing coils for transformers, inductances, reactors or choke coils~~ [H01F 41/04](#))
- U H01J 9/24
 - Manufacture or joining of vessels, leading-in conductors or bases
- H01J 9/241
 - • {the vessel being for a flat panel display (~~H01J 9/261~~ takes precedence; flat discharge lamps [H01J 9/248](#))}

- H01J 9/244
 - {specially adapted for cathode ray tubes (-[H01J 9/241](#) , [H01J 9/26](#) take precedence-)}
- H01J 9/245
 - {specially adapted for gas discharge tubes or lamps (-[H01J 9/241](#) , [H01J 9/26](#) take precedence-)}
- U H01J 9/26
 - Sealing together parts of vessels
- H01J 9/261
 - • {the vessel being for a flat panel display (-for flat discharge lamps [H01J 9/268](#)-)}
- H01J 9/263
 - • {specially adapted for cathode-ray tubes (-[H01J 9/261](#) takes precedence-)}
- H01J 9/265
 - • {specially adapted for gas-discharge tubes or lamps (-[H01J 9/261](#) takes precedence-)}
- U H01J 9/32
 - Sealing leading-in conductors
- H01J 9/323
 - • {Sealing leading-in conductors into a discharge lamp or a gas-filled discharge device (-for incandescent lamps [H01K 3/20](#) , joining glass to metal [C03C 27/00](#)-)}
- U H01J 9/44
 - Factory adjustment of completed discharge tubes or lamps to comply with desired tolerances
- H01J 9/445
 - {Aging of tubes or lamps, e.g. by "spot knocking"(-cathode activation [H01J 9/045](#)-)}
- U H01J 9/50
 - Repairing or regenerating used or defective discharge tubes or lamps
- H01J 9/505
 - {Regeneration of cathodes (-activation [H01J 9/045](#)-)}
- H01J 9/52
 - Recovery of material from discharge tubes or lamps (-[H01J 9/50](#) takes precedence-)

H01J 11/00

Gas-filled discharge tubes with alternating current induction of the discharge, e.g. AC-PDPs [Alternating Current Plasma Display Panels] (-circuits or methods for driving PDPs [G09G 3/28](#)); Gas-filled discharge tubes without any main electrode inside the vessel; Gas-filled discharge tubes with at least one main electrode outside the vessel (-discharge lamps [H01J 65/00](#) { [H01J 61/00](#) , [H01J 63/00](#) })

NOTE

(1) When classifying in this group, classification is made in all appropriate places.
 (2) In this group, the following term is used with the meaning indicated:
 - "main electrode" means any of a sustain electrode, scan electrode or address electrode.

H01J 13/00

Discharge tubes with liquid-pool cathodes, e.g. metal-vapour rectifying tubes (-lamps [H01J 61/00](#)-)

- U H01J 13/02
 - Details
- U H01J 13/04
 - Main electrodes; Auxiliary anodes
- H01J 13/16
 - • Anodes; Auxiliary anodes for maintaining the discharge (-screens [H01J 13/22](#)-)
- H01J 13/20
 - Control electrodes, e.g. grid (-for igniting arrangements [H01J 13/34](#)-)
- H01J 13/32
 - Cooling arrangements; Heating arrangements (-for cathodes [H01J 13/14](#) ; for anodes [H01J 13/18](#)-)
- H01J 13/34
 - Igniting arrangements (-circuits arrangements [H02M 1/02](#)-)
- H01J 13/44
 - Devices for preventing or eliminating arcing-back (-screens therefor [H01J 13/22](#)-)

H01J 15/00

Gas-filled discharge tubes with gaseous cathodes, e.g. plasma cathode (-lamps [H01J 61/62](#)-)

	H01J 17/00 Gas-filled discharge tubes with solid cathode (H01J 25/00 , H01J 27/00 , H01J 31/00 to H01J 41/00 { H01J 11/00 } take precedence; gas or vapour discharge lamps H01J 61/00 ; gas filled spark gaps H01T ; Marx converters H02M 7/26 ; tubes for generating potential differences by charges carried in a gas stream H02N -)
	H01J 17/005 • {specially adapted as noise generators (electronic circuits for generation of noise currents or voltages H03B 29/00 -)}
U	H01J 17/02 • Details
	H01J 17/20 • • Selection of substances for gas fillings; Specified operating pressure or temperature (radioactive fillings H01J 17/32 -)
	H01J 17/38 • Cold-cathode tubes (TR boxes H01J 17/64 -)
	H01J 17/40 • • with one cathode and one anode, e.g. glow tube, tuning-indicator glow tube, voltage-stabiliser tube, voltage-indicator tube, (cathode-glow lamps H01J 61/04 -)
U	H01J 17/48 • • with more than one cathode or anode, e.g. sequence-discharge tube, counting tube, dekatron
	H01J 17/485 • • • {Plasma addressed liquid crystal displays [PALC]}
	H01J 17/49 • • • Display panels, e.g. with crossed electrodes {e.g. making use of direct current} (gas discharge type indicating arrangements effected by the combination of a number of individual lamps G09F 9/313 {display panels making use of alternating current H01J 11/00 })
U	H01J 17/492 • • • • {with crossed electrodes}
	H01J 17/494 • • • • {using sequential transfer of the discharges, e.g. of the self-scan type} (addressing circuits therefor G09G 3/29 -)
	H01J 17/50 • Thermionic-cathode tubes (TR boxes H01J 17/64 -)
	H01J 19/00 Details of vacuum tubes of the types covered by group H01J 21/00
U	H01J 19/02 • Electron-emitting electrodes; Cathodes
U	H01J 19/04 • • Thermionic cathodes
U	H01J 19/14 • • • Cathodes heated indirectly by an electric current; Cathodes heated by electron or ion bombardment
	H01J 19/16 • • • • Heaters (filaments for incandescent lamps H01K 1/02 -)
U	H01J 19/28 • Non-electron-emitting electrodes; Screens
	H01J 19/40 • • Screens for shielding (screens acting as control electrodes H01J 19/38 -)
U	H01J 19/42 • Mounting, supporting, spacing, or insulating of electrodes or of electrode assemblies
	H01J 19/44 • • Insulation between electrodes or supports within the vacuum space (leading-in conductors H01J 19/62 -)
	H01J 19/48 • • Mountings for individual electrodes (for directly-heated cathodes H01J 19/12 -)
	H01J 19/64 • Means forming part of the tube for the purpose supporting it (associated with electrical connecting means H01J 19/66 -)
	H01J 19/66 • Means forming part of the tube for the purpose of providing electrical connection to it (construction of connectors H01R -){ no documents, see H01J 5/46 to H01J 5/62 -}
	H01J 19/74 • Cooling arrangements (cooling of anodes H01J 19/36 -)
	H01J 21/00 Vacuum tubes (H01J 25/00 , H01J 31/00 to H01J 37/00 , H01J 43/00 take precedence; details of vacuum tubes H01J 19/00 ; cathode ray or electron stream lamps H01J 63/00-)

	H01J 21/20	• Tubes with more than one discharge path; Multiple tubes, e.g. double diode, triode-hexode (-secondary-emission tubes, electron-multiplier tubes H01J 43/00-)
	H01J 21/34	• Tubes with electrode system arranged or dimensioned so as to eliminate transit-time effect (-with flat electrodes H01J 21/36-)
	H01J 23/00	Details of transit-time tubes of the types covered by group H01J 25/00
	H01J 23/005	• {Cooling methods or arrangements (- H01J 23/033 takes precedence-)}
	H01J 23/02	• Electrodes; Magnetic control means; Screens (-associated with resonator or delay system H01J 23/16-)
U	H01J 23/06	• • Electron or ion guns
	H01J 23/065	• • • producing a solid cylindrical beam (- H01J 23/075 takes precedence-)
	H01J 23/07	• • • producing a hollow cylindrical beam (- H01J 23/075 takes precedence-)
	H01J 23/09	• • Electric system for directing or deflecting the discharge along a desired path, e.g. E-type (-focusing arrangements H01J 23/08-)
	H01J 23/10	• • Magnet systems for directing or deflecting the discharge along a desired path, e.g. a spiral path (-magnetic focusing arrangements H01J 23/08-)
	H01J 23/11	• • Means for reducing noise (-in electron or ion gun H01J 23/06-)
	H01J 23/16	• Circuit elements, having distributed capacitance and inductance, structurally associated with the tube and interacting with the discharge (-circuit elements, having distributed capacitance and inductance, in general H01P-)
U	H01J 23/36	• Coupling devices having distributed capacitance and inductance, structurally associated with the tube, for introducing or removing wave energy
U	H01J 23/40	• • to or from the interaction circuit
	H01J 23/42	• • • the interaction circuit being a helix or a helix-derived slow-wave structure (- H01J 23/44 to H01J 23/48 take precedence-)
	H01J 23/44	• • • Rod-type coupling devices (- H01J 23/46 , H01J 23/48 , H01J 23/54 take precedence-)
	H01J 23/48	• • • for linking interaction circuit with coaxial lines; Devices of the coupled helices type (- H01J 23/46 takes precedence-)
	H01J 23/50	• • • • the interaction circuit being a helix or derived from a helix (- H01J 23/52 takes precedence-)
	H01J 25/00	Transit-time tubes, e.g. Klystrons, travelling-wave tubes, magnetrons (-details of transit-time tubes H01J 23/00 ; particle accelerators H05H-)
	H01J 25/02	• Tubes with electron stream modulated in velocity or density in a modulator zone and thereafter giving up energy in an inducing zone, the zones being associated with one or more resonators (-tubes in which a travelling-wave is simulated at spaced gaps H01J 25/34-)
U	H01J 25/34	• Travelling-wave tubes; Tubes in which a travelling wave is simulated at spaced gaps
	H01J 25/42	• • Tubes in which an electron stream interacts with a wave travelling along a delay line or equivalent sequence of impedance elements, and with a magnet system producing an H-field crossing the E-field (-with travelling wave moving completely around the electron space H01J 25/50-)
	H01J 25/50	• Magnetrons, i.e. tubes with a magnet system producing an H-field crossing the E-field (-with travelling wave not moving completely around the electron space H01J 25/42 ; functioning with plural reflection or with reversed cyclotron action H01J 25/62 , H01J 25/64-)
U	H01J 25/52	• • with an electron space having a shape that does not prevent any electron from moving completely around the cathode or guide electrode

- H01J 25/54
 - • • having only one cavity or other resonator, e.g. neutrode tube (having a composite resonator [H01J 25/58](#))
- H01J 25/68
 - Tubes specially designed to act as oscillator with positive grid and retarding field, e.g. for Barkhausen-Kurz oscillators (with secondary emission [H01J 25/76](#))
- H01J 25/72
 - • in which a standing wave or a considerable part thereof is produced along an electrode, e.g. Clavier tube (with resonator having distributed inductance and capacitance [H01J 25/70](#))
- H01J 25/74
 - Tubes specially designed to act as transit-time diode oscillators, e.g. monotron (with secondary emission [H01J 25/76](#))
- H01J 27/00**

Ion beam tubes ([H01J 25/00](#) , [H01J 33/00](#) , [H01J 37/00](#) take precedence; particle accelerators [H05H](#))
- H01J 27/02
 - Ion sources; Ion guns ({ for examination or processing discharge tubes [H01J 37/08](#) ; ion sources, ion guns for particle spectrometer or separator tubes [H01J 49/10](#) ; ion propulsion [F03H 1/00](#)); arrangements for handling particles, e.g. focusing, {charge exchanging, polarising} , [G21K 1/00](#) ; generating ions to be introduced into non-enclosed gases [H01T 23/00](#) ; generating plasma [H05H 1/24](#))
- H01J 27/04
 - • using reflex discharge, e.g. Penning ion sources { Electron bombardment ion sources [H01J 27/08](#) }
- U H01J 27/08
 - • using arc discharge
- H01J 27/10
 - • • Duoplasmatrons (for use in particle accelerators [H05H 7/00](#)) { [H05H 7/00](#) not used therefor; Duopigatrons }
- H01J 27/20
 - • using particle {beam} bombardment, e.g. ionisers
- H01J 27/26
 - • using surface ionisation, e.g. field effect ion sources, thermionic ion sources ([H01J 27/20](#) , [H01J 27/24](#) take precedence)
- H01J 29/00**

Details of cathode-ray tubes or of electron-beam tubes of the types covered by group [H01J 31/00](#)
- H01J 29/003
 - {Arrangements for eliminating unwanted electromagnetic effects, e.g. demagnetisation arrangements, shielding coils ([H01J 29/06](#) , [H01J 29/867](#) take precedence; demagnetisation in general [H01F 13/00](#) ; circuit arrangements therefor [H04N 9/29](#) ; screening of apparatus against electric or magnetic fields [H05K 9/00](#))}
- U H01J 29/02
 - Electrodes; Screens; Mounting, supporting, spacing or insulating thereof
- H01J 29/021
 - • {arrangements for eliminating interferences in the tube ([H01J 29/484](#) takes precedence)}
- H01J 29/023
 - • {secondary-electron emitting electrode arrangements (secondary-emission tubes [H01J 43/00](#))}
- H01J 29/025
 - • {Mounting or supporting arrangements for grids ([H01J 29/028](#) takes precedence)}
- H01J 29/04

- H01J 29/08
 - • Electrodes intimately associated with a screen on or from which an image or pattern is formed, picked up, converted, or stored, e.g. backing-plate for storage tube, for collecting secondary electrons (arrangements for colour switching [H01J 29/80](#))
- U H01J 29/10
 - • Screens on or from which an image or pattern is formed, picked up, converted or stored
- U H01J 29/18
 - • • Luminescent screens

- H01J 29/187 . . . {screens with more than one luminescent material (*as mixtures for the treatment of the screens*)~~(as mixtures for the treatment of the screens)~~(for several superimposed luminescent layers [H01J 29/26](#) ; for adjacent dots or lines of different luminescent material [H01J 29/32](#)-)}
- H01J 29/20 . . . characterised by the luminescent material{ for luminescent screens for X-ray purposes [G21K 4/00](#)-}
- U H01J 29/36 . . . Photoelectric screens; Charge-storage screens
- H01J 29/38 . . . not using charge storage, e.g. photo-emissive screen, extended cathode{(-electrodes using photo-emission in general [H01J 1/34](#)-)}
- H01J 29/385 . . . {Photocathodes comprising a layer which modified the wave length of impinging radiation~~(-luminescent layers sensitive to UV and X-rays [C09K 11/00](#) , [G21K 4/00](#)-)~~}
- H01J 29/39 . . . Charge-storage screens{(-[H01J 29/395](#) takes precedence-)}
- H01J 29/41 . . . using secondary emission, e.g. for supericonoscope{(-electrodes using secondary emission in general [H01J 1/32](#) ; secondary emission tubes [H01J 43/00](#)-)}
- H01J 29/44 . . . exhibiting internal electric effects caused by particle radiation, e.g. bombardment-induced conductivity{(-particle detectors exhibiting internal electric effects [G01T 1/26](#)-)}
- H01J 29/45 . . . exhibiting internal electric effects caused by electromagnetic radiation, e.g. photo-conductive screen, photo-dielectric screen, photovoltaic screen{ photoconductive layers for electrography [G03G 5/00](#)-}
- H01J 29/46 . Arrangements of electrodes and associated parts for generating or controlling the ray or beam, e.g. electron-optical arrangement{(-transit time tubes [H01J 23/00](#) , [H01J 25/00](#) ; X-ray tubes [H01J 35/00](#) ; beam tubes for examining ions, e.g. electron or ion microscopes, or processing of objects or materials e.g. electron or ion beam tubes [H01J 37/04](#) ; electron multipliers [H01J 43/04](#) ; handling of radiation or particles, e.g. focusing, deviating, not otherwise provided for [G21K 1/00](#)-)}
- H01J 29/467 . {-Control electrodes for flat display tubes, e.g. of the type covered by group [H01J 31/123](#)-}
- NOTE
[H01J 29/48](#) to [H01J 29/51](#) take precedence over groups [H01J 29/52](#) to [H01J 29/68](#) .
- U H01J 29/48 . . Electron guns
- H01J 29/484 . . {Eliminating deleterious effects due to thermal effects, electrical or magnetic fields; Preventing unwanted emission~~(-[H01J 29/481](#) and [H01J 29/482](#) take precedence-)~~}
- H01J 29/485 . . {Construction of the gun or of parts thereof~~(-[H01J 29/481](#) , [H01J 29/482](#) , [H01J 29/484](#) and [H01J 29/487](#) take precedence-)~~}
- H01J 29/487 . . {Replacing parts of the gun; Relative adjustment of the electrodes~~(-[H01J 29/481](#) and [H01J 29/482](#) take precedence; vacuum locks [H01J 29/865](#)-)~~}
- H01J 29/50 . . Two or more guns in a single vacuum space, e.g. for plural-ray tube~~(-[H01J 29/51](#) takes precedence-)~~
- H01J 29/51 . . Arrangements for controlling convergence of a plurality of beams{by means of electric field only}
- H01J 29/52 . . Arrangements for controlling intensity of ray or beam, e.g. for modulation{(-[H01J 29/467](#) takes precedence-)}
- H01J 29/54 . . Arrangements for centring ray or beam{(-[H01J 29/467](#) takes precedence-)}

- H01J 29/56
 - • Arrangements for controlling cross-section of ray or beam; Arrangements for correcting aberration of beam, e.g. due to lenses{(-H01J 29/467 takes precedence-)}
- H01J 29/58
 - • Arrangements for focusing or reflecting ray or beam{(-H01J 29/467 , H01J 29/585 take precedence-)}
- H01J 29/70
 - • Arrangements for deflecting ray or beam ({ H01J 29/467 , H01J 29/525 , H01J 29/701 , H01J 29/708 take precedence } ; circuit arrangements for producing saw-tooth pulses or other deflecting voltages or currents H03K-)
- U H01J 29/72
 - • • along one straight line or along two perpendicular straight lines
- U H01J 29/76
 - • • • Deflecting by magnetic fields only
- H01J 29/762
 - • • • {using saddle coils or printed windings (-coils per se H01F-)}
- H01J 29/768
 - • • • {using printed windings (-printed windings in general H01F 27/2804 ; manufacturing printed coils per se H01F 41/04 ; printed circuits and apparatus or processes for manufacturing printed circuits in general H05K 1/00 , e.g. H05K 1/16 , and H05K 3/00-)}
- H01J 29/80
 - • Arrangements for controlling the ray or beam after passing the main deflection system, e.g. for post-acceleration or post-concentration, for colour switching{(-H01J 29/701 takes precedence-)}
- H01J 29/81
 - • • using shadow masks (-shadow masks per se H01J 29/07-)
- H01J 29/84
 - Traps for removing or diverting unwanted particles, e.g. negative ions, fringing electrons; Arrangements for velocity or mass selection (-particle spectrometer or separator tubes H01J 49/00-)
- U H01J 29/86
 - Vessels; Containers; Vacuum locks
- H01J 29/865
 - • {Vacuum locks (-for tubes for examining or processing of objects or materials e.g. electron microscopes H01J 37/18-)}
- H01J 29/867
 - • {Means associated with the outside of the vessel for shielding, e.g. magnetic shields (-screens for shielding inside the vessel H01J 29/06 ; magnetic shielding in general H05K 9/00-)}
- H01J 29/88
 - • provided with coatings on the walls thereof; Selection of materials for the coatings ({ H01J 29/868 and H01J 29/89 take precedence } ; luminescent screens H01J 29/18-)
- H01J 29/89
 - • Optical or photographic arrangements structurally combined (or co-operating) with the vessel{(-H01J 29/866 and H01J 29/868 take precedence-)}
- H01J 29/894
 - • • {Arrangements combined with the vessel for the purpose of image projection on a screen (-projection arrangements for image reproduction, e.g. using eidophor H04N 5/74-)}
- H01J 29/92
 - Means forming part of the tube for the purpose of providing electrical connection to it (-construction of connectors H01R-)
- H01J 29/94
 - Selection of substances for gas fillings; Means for obtaining or maintaining the desired pressure within the tube e.g. by gettering{(-exhausting, degassing, gettering of electric discharge tubes in general H01J 9/38-)}
- H01J 31/00**
 - Cathode ray tubes; Electron beam tubes (-H01J 25/00 , H01J 35/00 , H01J 37/00 take precedence; cathode ray or electron stream lamps H01J 63/00 ; details of cathode ray tubes or of electron beam tubes H01J 29/00-)**
- H01J 31/02
 - having one or more output electrodes which may be impacted selectively by the ray or beam, and onto, from, or over which the ray or beam may be deflected or de-focused { pulse counting circuits therewith H03K 29/06- }
- H01J 31/04
 - • with only one or two output electrodes {with only two electrically independant groups or electrodes}
- U H01J 31/06
 - • with more than two output electrodes, e.g. for multiple switching or counting

	H01J 31/065	<ul style="list-style-type: none"> • • • {for electrography or electrophotography, for transferring a charge pattern through the faceplate (leading-in arrangements H01J 29/90 ; Lenard tubes H01J 33/00 ; electrography or electrophotography per se G03C)}
U	H01J 31/08	<ul style="list-style-type: none"> • having a screen on or from which an image or pattern is formed, picked up, converted, or stored

SEMICONDUCTOR DEVICES; ELECTRIC SOLID STATE DEVICES NOT OTHERWISE PROVIDED FOR (use of semiconductor devices for measuring [G01](#); resistors in general [H01C](#); magnets, inductors{in general} , transformers [H01F](#); capacitors in general [H01G](#); electrolytic devices [H01G 9/00](#) ; batteries, accumulators [H01M](#); waveguides, resonators or lines of the waveguide type [H01P](#); line connectors, current collectors [H01R](#); stimulated emission devices [H01S](#); electromechanical resonators [H03H](#); loudspeakers, microphones, gramophone pick-ups or like acoustic electromechanical transducers [H04R](#); electric light sources in general [H05B](#); printed circuits, hybrid circuits, casings or constructional details of electric apparatus, manufacture of assemblages of electrical components [H05K](#); use of semiconductor devices in circuits having a particular application, see the subclass for the application-)

NOTES

This subclass covers electric solid state devices which are not provided for in any other subclass and details thereof. This includes:

- semiconductor devices adapted for rectifying, amplifying, oscillating or switching;
- semiconductor devices sensitive to radiation;
- electric solid state devices using thermoelectric, superconductive, piezo-electric, electrostrictive, magnetostrictive, galvano-magnetic or bulk negative resistance effects and integrated circuit devices.

Also covered by this subclass are photo-resistors, magnetic field dependent resistors, field effect resistors, capacitors with potential-jump barrier, resistors with potential-jump barrier or surface barrier, incoherent light emitting diodes, electromechanical solid state transducers and thin-film or thick-film circuits.

Furthermore, it provides for processes and apparatus adapted for the manufacture or treatment of such devices, except where such processes relate to single step processes for which provision exists elsewhere.

In this subclass:

The expression "solid state body" refers to the body of material within which, or at the surface of which, the physical effects characteristic of the device occur. In thermoelectric devices it includes all materials in the current path.

Regions in or on the body of the device (other than the solid state body itself), which exert an influence on the solid state body electrically, are considered to be "electrodes" whether or not an external electrical connection is made thereto. {Electrodes are often referred to as "contacts" in the literature.} An electrode may include several portions and the term includes metallic regions which exert influence on the solid state body through an insulating region, (e.g. capacitive coupling) and inductive coupling arrangements to the body. The dielectric region in a capacitive arrangement is regarded as part of the electrode. In arrangements including several portions only those portions which exert an influence on the solid state body by virtue of their shape, size or disposition or the material of which they are formed are considered to be part of the electrode. The other portions are considered to be "arrangements for conducting electric current to or from the solid state body" or "interconnections between solid state components formed in or on a common substrate", i.e. leads.

The word "device" refers to an electric circuit element; where an electric circuit element is one of a plurality or elements formed in or on a common substrate it is referred to as a "component".

A "complete device" is a device in its fully assembled state which may or may not require further treatment, e.g. electro-forming, before it is ready for use but which does not require the addition of further structural units.

The word "parts" includes all structural units which are included in a complete device.

A "container" is an enclosure forming part of the complete device and is essentially a solid construction in which the body of the device is placed, or which is formed around the body without forming an intimate layer thereon. An enclosure which consists of one or more layers formed on the body and in intimate contact therewith is referred to as an "encapsulation".

"Integrated circuit" is a device where all components, e.g. diodes, resistors, are built up on a common substrate and form the device including interconnections between the components.

"Integration processes" are processes for the manufacture of at least two different components where the process is especially adapted to their integration, e.g. to take advantage of it or to reduce their manufacturing cost. Example: in a CMOS process, the same ion implant dopes the p-MOS gate and the n-MNOS source and drain.

Consequently, a process for the manufacture of a component per se is not considered as an integration process, even though that component will be part of an integrated circuit.

"Assembly" of a device is the building up of the device from its component constructional units and includes the provision of fillings in containers. When referring to the periodic table of the elements, either the new IUPAC notation, i.e. numbering system from 1 to 18, or the previous IUPAC form may be used to indicate an element group, e.g. group IV elements according to the previous IUPAC form correspond to group 14 elements according to the new notation

WARNINGS

The following IPC groups are not used in the CPC scheme. Subject matter covered by these groups is classified in the following CPC groups

[H01L 21/301](#) covered by [H01L 21/30](#)

- H01L 21/02255 {formation by thermal treatment (-[H01L 21/02252](#) takes precedence; after treatment of an insulating film [H01L 21/3105](#) and subgroups-)}
- H01L 21/0226 {formation by a deposition process (per se [C23C](#))}
- U H01L 21/02263 {deposition from the gas or vapour phase}
- NOTE
This group and subgroups also cover deposition methods in which the gas or vapour is produced by physical means, e.g. ablation from targets or heating of source material
- H01L 21/02269 {-deposition by thermal evaporation, [H01L 21/02293](#) takes precedence-}
- NOTE
Subject matter relating to molecular beam epitaxy is classified in this group
- H01L 21/02271 {deposition by decomposition or reaction of gaseous or vapour phase compounds, i.e. chemical vapour deposition (-[H01L 21/02266](#) takes precedence-)}

- U H01L 21/02282 {liquid deposition, e.g. spin-coating, sol-gel techniques, spray coating}
- H01L 21/02288 {printing, e.g. ink-jet printing (per se [B41J](#))}
- H01L 21/02293 {formation of epitaxial layers by a deposition process (epitaxial growth per se [C30B](#))}
- NOTE
Formation of non-epitaxial layers by MBE, ALE, etc. is not covered by this group; for MBE see [H01L 21/02269](#) ; for ALE see [H01L 21/0228](#)
- H01L 21/02296 {characterised by the treatment performed before or after the formation of the layer (-[H01L 21/02227](#) and subgroups take precedence-)}
- NOTE
This group and subgroups only cover processes which are directly linked to the layer formation; routine anneals, i.e. thermal treatment without further features like a special atmosphere, presence of a plasma, thermally induced chemical reactions, change of phase (crystal structure) etc. are not classified here; for cleaning see [H01L 21/02041](#) and subgroups; for etching processes see [H01L 21/311](#) and subgroups; for planarization processes see [H01L 21/31051](#) and subgroups; for processes to repair etch damage see [H01L 21/3105](#) and subgroups
- U H01L 21/02318 {post-treatment}
- NOTE
This group only covers processes that are part of the layer formation; treatments which are performed after completion of the insulating layer are covered by [H01L 21/3105](#) and subgroups
- H01L 21/02321 {-introduction of substances into an already existing insulating layer; [H01L 21/02227](#) and subgroups take precedence-}
- NOTE
processes like the introduction of phosphorus into silicon oxide by diffusion, or doping of an already existing insulating layer are covered by this group and subgroups; for the method of introduction, see [H01L 21/02337](#) , [H01L 21/02343](#) , [H01L 21/02345](#) and subgroups
- H01L 21/02334 {in-situ cleaning after layer formation, e.g. removing process residues (cleaning compositions per se **C30D**; cleaning in general [B08B](#))}
- NOTE
Subject matter relating to the cleaning processes for semiconductor devices in general is covered by [H01L 21/02041](#) and subgroups
- H01L 21/02365 . . . {Forming inorganic semiconducting materials on a substrate (-for light-sensitive devices [H01L 31/00-](#))}
- U H01L 21/02518 {Deposited layers}
- U H01L 21/02587 {Structure}
- U H01L 21/0259 {Microstructure}
- H01L 21/02601 {Nanoparticles (-fullerenes [H01L 51/0046-](#))}
- H01L 21/02606 {Nanotubes (-carbon nanotubes [H01L 51/0048-](#))}
- U H01L 21/02656 {Special treatments}
- H01L 21/02658 {Pretreatments (-cleaning in general [H01L 21/02041-](#))}
- H01L 21/02664 {Aftertreatments (-planarisation in general [H01L 21/304-](#))}

- H01L 21/027
- Making masks on semiconductor bodies for further photolithographic processing not provided for in group [H01L 21/18](#) or [H01L 21/34](#) (~~photographic masks or originals per se [G03F 1/00](#) ; registration or positioning of photographic masks or originals [G03F 9/00](#) ; photographic cameras [G03B](#); control of position [G05D 3/00](#)~~)
- U H01L 21/0271
- • {comprising organic layers}
- U H01L 21/0273
- • • {characterised by the treatment of photoresist layers}
- U H01L 21/0274
- • • • {Photolithographic processes}
- H01L 21/0276
- • • • • {using an anti-reflective coating (~~anti-reflective coating for lithography in general [G03F 7/09](#)~~)}
- H01L 21/04
- the devices having at least one potential-jump barrier or surface barrier, e.g. PN junction, depletion layer, carrier concentration layer(~~multistep processes specially adapted for the manufacture of said devices [H01L 29/66007](#) , [H01L 29/401](#) ; details of semiconductor bodies [H01L 29/02](#)~~)
- H01L 21/0405
- • {the devices having semiconductor bodies comprising semiconducting carbon, e.g. diamond, diamond-like carbon (~~multistep processes for the manufacture of said devices [H01L 29/66015](#)~~)}
- NOTE
This group covers passivation
- H01L 21/0445
- • {the devices having semiconductor bodies comprising crystalline silicon carbide (~~multistep processes for the manufacture of said devices [H01L 29/66053](#)~~)}
- H01L 21/0475
- • • {Changing the shape of the semiconductor body, e.g. forming recesses, (~~etching of the semiconductor body [H01L 21/302](#)~~)}
- U H01L 21/16
- • the devices having semiconductor bodies comprising cuprous oxide or cuprous iodide
- WARNING
This group is no longer used for the classification of new documents as from December 1, 2009. The backlog of this group is being continuously reclassified to [H01L 21/02365](#) and subgroups]
- U H01L 21/161
- • • {Preparation of the foundation plate, preliminary treatment oxidation of the foundation plate, reduction treatment}
- H01L 21/164
- • • • {Oxidation and subsequent heat treatment of the foundation plate (~~[H01L 21/165](#) takes precedence~~)}
- H01L 21/18
- • the devices having semiconductor bodies comprising elements of the fourth group of the Periodic System or AllIBV compounds with or without impurities, e.g. doping materials(~~[H01L 21/041](#) to [H01L 21/0425](#) , [H01L 21/045](#) to [H01L 21/048](#) take precedence~~)
- NOTE
This group covers also processes and apparatus which, by using the appropriate technology, are clearly suitable for manufacture or treatment of devices whose bodies comprise elements of the fourth group of the Periodic System or AllIBV compounds, even if the material used is not explicitly specified.
- H01L 21/20
- • • Deposition of semiconductor materials on a substrate, e.g. epitaxial growth {solid phase epitaxy}
- WARNING
This group is no longer used for the classification of new documents as from December 1, 2009. The backlog of this group is being continuously reclassified to [H01L 21/02365](#) and subgroups

- H01L 21/2003 {Characterised by the substrate ([H01L 21/203](#) , [H01L 21/205](#) , [H01L 21/208](#) take precedence-)}
- H01L 21/2007 {Bonding of semiconductor wafers to insulating substrates or to semiconducting substrates using an intermediate insulating layer ([H01L 21/2011](#) takes precedence; bonding of semiconductor wafers to semiconductor wafers for junction formation [H01L 21/187](#)-)}
- U H01L 21/22 Diffusion of impurity materials, e.g. doping materials, electrode materials, into or out of a semiconductor body, or between semiconductor regions; {Interactions between two or more impurities; Redistribution of impurities}
- H01L 21/223 using diffusion into or out of a solid from or into a gaseous phase([H01L 21/221](#) to [H01L 21/222](#) take precedence; diffusion through an applied layer [H01L 21/225](#)-)}
- H01L 21/225 using diffusion into or out of a solid from or into a solid phase, e.g. a doped oxide layer([H01L 21/221](#) to [H01L 21/222](#) take precedence-)}
- H01L 21/228 using diffusion into or out of a solid from or into a liquid phase, e.g. alloy diffusion processes([H01L 21/221](#) to [H01L 21/222](#) take precedence-)}
- H01L 21/24 Alloying of impurity materials, e.g. doping materials, electrode materials, with a semiconductor body([H01L 21/182](#) takes precedence-)}
- H01L 21/26 Bombardment with radiation([H01L 21/3105](#) takes precedence-)}
- H01L 21/263 with high-energy radiation ([H01L 21/261](#) takes precedence-)
- H01L 21/265 producing ion implantation ([H01L 21/261](#) takes precedence-; ion beam tubes for localised treatment [H01J 37/30](#)-)
- WARNING
The groups [H01L 21/26566](#), [H01L 21/2658](#) and [H01L 21/26593](#) are not complete, see provisionally also [H01L 21/26506](#) and [H01L 21/2654](#) and their subgroups
- H01L 21/266 using masks([H01L 21/26586](#) takes precedence-)}
- H01L 21/28 Manufacture of electrodes on semiconductor bodies using processes or apparatus not provided for in [H01L 21/20](#) to [H01L 21/268](#) ; { etching for patterning the electrodes [H01L 21/311](#) and [H01L 21/3213](#)-}
- U H01L 21/28008 {Making conductor-insulator-semiconductor electrodes}
- U H01L 21/28017 {the insulator being formed after the semiconductor body, the semiconductor being silicon}
- NOTE
This group covers deposition of the insulators, including epitaxial insulators, and the conductors within the same process or chamber
- H01L 21/28026 {characterised by the conductor ([H01L 21/28176](#) takes precedence-)}
- NOTE
When the final conductor comprises a superconductor, subject matter is not classified according to the subgroups [H01L 21/28035](#) to [H01L 21/28097](#) . Instead, it is classified in [H01L 21/28026](#)
- H01L 21/28035 {the final conductor layer next to the insulator being silicon, e.g. polysilicon, with or without impurities ([H01L 21/28105](#) takes precedence-)}
- NOTE
A very thin, e.g. silicon, adhesion or seed layer is not considered as the one next to the insulator

- U H01L 21/28044 {the conductor comprising at least another non-silicon conductive layer}
- H01L 21/28052 {the conductor comprising a silicide layer formed by the silicidation reaction of silicon with a metal layer (-formed by metal ion implantation [H01L 21/28044](#)-)}
- H01L 21/28061 {the conductor comprising a metal or metallic silicide formed by deposition, e.g. sputter deposition, i.e. without a silicidation reaction (-[H01L 21/28052](#) takes precedence-)}
- NOTE**
To assess the coverage of groups [H01L 21/28052](#) and [H01L 21/28061](#) , barrier layers, e.g. TaSiN, are not considered
- U H01L 21/28158 {Making the insulator}
- U H01L 21/28167 {on single crystalline silicon, e.g. using a liquid, i.e. chemical oxidation}
- H01L 21/28194 {by deposition, e.g. evaporation, ALD, CVD, sputtering, laser deposition (-[H01L 21/28202](#) takes precedence-)}
- H01L 21/28211 {in a gaseous ambient using an oxygen or a water vapour, e.g. RTO, possibly through a layer (-[H01L 21/28194](#) and [H01L 21/28202](#) take precedence-)}
- NOTE**
thin oxidation layers used as a barrier layer or as a buffer layer, e.g. before the formation of a high-k insulator, are classified here only if important per se
- H01L 21/28273 {Making conductor-insulator-conductor-insulator-semiconductor electrodes (-[H01L 21/28291](#) takes precedence-)}
- H01L 21/283 Deposition of conductive or insulating materials for electrodes {conducting electric current}
- U H01L 21/285 from a gas or vapour, e.g. condensation
- U H01L 21/28506 {of conductive layers}
- U H01L 21/28512 {on semiconductor bodies comprising elements of the fourth group of the Periodic System}
- H01L 21/28518 {the conductive layers comprising silicides (-[H01L 21/28537](#) takes precedence-)}
- H01L 21/28525 {the conductive layers comprising semiconducting material (-[H01L 21/28518](#) , [H01L 21/28537](#) take precedence-)}
- H01L 21/2855 {by physical means, e.g. sputtering, evaporation (-[H01L 21/28518](#) to [H01L 21/28537](#) and [H01L 21/28568](#) take precedence-)}
- H01L 21/28556 {by chemical means, e.g. CVD, LPCVD, PECVD, laser CVD (-[H01L 21/28518](#) to [H01L 21/28537](#) and [H01L 21/28568](#) take precedence-)}
- H01L 21/28568 {the conductive layers comprising transition metals (-[H01L 21/28518](#) takes precedence-)}
- H01L 21/30 Treatment of semiconductor bodies using processes or apparatus not provided for in groups [H01L 21/20](#) to [H01L 21/26](#) (-manufacture of electrodes thereon [H01L 21/28](#)-)
- U H01L 21/302 to change their surface-physical characteristics or shape, e.g. etching, polishing, cutting
- H01L 21/304 Mechanical treatment, e.g. grinding, polishing, cutting((-[H01L 21/30625](#) takes precedence-))

- H01L 21/3046 {using blasting, e.g. sand-blasting (~~H01L 21/2633~~ takes precedence-)}
- H01L 21/306 Chemical or electrical treatment, e.g. electrolytic etching (~~to form insulating layers H01L 21/31-~~)
- U H01L 21/30604 {Chemical etching}
- H01L 21/30608 {Anisotropic liquid etching (~~H01L 21/3063~~ takes precedence-)}
- H01L 21/308 using masks (~~H01L 21/3063~~ , ~~H01L 21/3065~~ take precedence-)
- H01L 21/31 to form insulating layers thereon, e.g. for masking or by using photolithographic techniques (~~layers forming electrodes H01L 21/28~~ ; encapsulating layers ~~H01L 21/56-~~); After treatment of these layers
- U H01L 21/3105 After-treatment
- H01L 21/31051 {Planarisation of the insulating layers (~~H01L 21/31058~~ takes precedence-)}
- U H01L 21/31053 {involving a dielectric removal step}
- H01L 21/31055 {the removal being a chemical etching step, e.g. dry etching (~~etching per se H01L 21/311-~~)}
- H01L 21/311 Etching the insulating layers {by chemical or physical means (~~H01L 21/31058~~ takes precedence-)}
- H01L 21/312 Organic layers, e.g. photoresist (~~H01L 21/3105~~ , ~~H01L 21/32~~ take precedence; {photoresists per se ~~G03C~~})
- WARNING
This group and subgroups are no longer used for the classification of new documents as from May 1, 2011. The backlog of this group is being continuously reclassified to [H01L 21/02107](#) and subgroups thereof
- H01L 21/314 Inorganic layers (~~H01L 21/3105~~ , ~~H01L 21/32~~ take precedence-)

NOTE

Groups [H01L 21/768](#) to [H01L 21/76898](#) cover multi-step processes for manufacturing interconnections.

Information peculiar to single-step processes should also be classified in the corresponding group, e.g.

- cleaning [H01L 21/02041](#)
- etching [H01L 21/311](#) , [H01L 21/3213](#)
- masking [H01L 21/027](#) , [H01L 21/033](#) , [H01L 21/31144](#), [H01L 21/32139](#)
- planarizing [H01L 21/3105](#) , [H01L 21/321](#)

- U H01L 21/76801
 - • • • {characterised by the formation and the after-treatment of the dielectrics, e.g. smoothing}
- H01L 21/76819
 - • • • • {Smoothing of the dielectric (~~planarisation of insulating materials per se [H01L 21/31051](#)~~)}
- U H01L 21/76822
 - • • • • {Modification of the material of dielectric layers, e.g. grading, after-treatment to improve the stability of the layers, to increase their density etc.}

WARNING

Groups [H01L 21/76822](#) - [H01L 21/76837](#) are not complete; see provisionally [H01L 21/76801](#)

- H01L 21/76825
 - • • • • {by exposing the layer to particle radiation, e.g. ion implantation, irradiation with UV light or electrons etc.(~~plasma treatment [H01L 21/76826](#)~~)}
- U H01L 21/76829
 - • • • • {characterised by the formation of thin functional dielectric layers, e.g. dielectric etch-stop, barrier, capping or liner layers}
- H01L 21/76834
 - • • • • {formation of thin insulating films on the sidewalls or on top of conductors (~~H01L 21/76831~~ takes precedence)}

- H01L 21/76835 {Combinations of two or more different dielectric layers having a low dielectric constant (~~H01L 21/76832 takes precedence~~)}
- H01L 21/76838 {characterised by the formation and the after-treatment of the conductors (~~etching for patterning the conductors H01L 21/3213~~)}

NOTE

When the interconnect is also used as the conductor part of a conductor insulator semiconductor electrode (gate level interconnections), documents are classified in the relevant electrode manufacture groups, e.g. [H01L 21/28026](#)

- U H01L 21/76841 {Barrier, adhesion or liner layers}
- H01L 21/7685 {the layer covering a conductive structure (~~H01L 21/76849 takes precedence~~)}
- U H01L 21/76853 {characterized by particular after-treatment steps}
- H01L 21/76865 {Selective removal of parts of the layer (~~H01L 21/76844 takes precedence~~)}
- H01L 21/76867 {characterized by methods of formation other than PVD, CVD or deposition from a liquids (~~PVD H01L 21/2855 ; CVD H01L 21/28556 ; deposition from liquids H01L 21/288~~)}
- U H01L 21/76877 {Filling of holes, grooves or trenches, e.g. vias, with conductive material}
- H01L 21/76879 {by selective deposition of conductive material in the vias, e.g. selective C.V.D. on semiconductor material, plating (~~plating on semiconductors in general H01L 21/288~~)}
- H01L 21/7688 {by deposition over sacrificial masking layer, e.g. lift-off (~~lift-off per se H01L 21/0272~~)}
- H01L 21/76897 {Formation of self-aligned vias or contact plugs, i.e. involving a lithographically uncritical step (~~self-aligned silicidation on field effect transistors H01L 29/665~~)}
- U H01L 21/77 {Manufacture or treatment of devices consisting of a plurality of solid state components or integrated circuits formed in, or on, a common substrate}

NOTE

Integration processes for the manufacture of devices of the type classified in [H01L 27/14](#) to [H01L 27/32](#) are not classified in this group and its sub-groups. Instead, as they are peculiar to said devices, they are classified together with the devices Multistep processes for manufacturing memory structures in general using field effect technology are covered by [H01L 27/1052](#); Multistep processes for manufacturing dynamic random access memory structures are covered by [H01L 27/10844](#); Multistep processes for manufacturing static random access memory structures are covered by [H01L 27/11](#) ; Multistep processes for manufacturing read-only memory structures are covered by [H01L 27/112](#) ; Multistep processes for manufacturing electrically programmable read-only memory structures are covered by [H01L 27/115](#)

- H01L 21/78 with subsequent division of the substrate into plural individual devices (~~cutting to change the surface-physical characteristics or shape of semiconductor bodies H01L 21/304~~)
- H01L 21/782 to produce devices, each consisting of a single circuit element (~~H01L 21/82 takes precedence~~)

	H01L 31/0203	• • Containers; Encapsulations {, e.g. encapsulation of photodiodes} (for photovoltaic devices H01L 31/048; for organic photosensitive devices H01L 51/44)
	H01L 31/0216	• • Coatings (H01L 31/041 takes precedence)
U	H01L 31/02161	• • • {for devices characterised by at least one potential jump barrier or surface barrier}
U	H01L 31/02162	• • • • {for filtering or shielding light, e.g. multicolour filters for photodetectors}
	H01L 31/02165	• • • • • {using interference filters, e.g. multilayer dielectric filters (-interference filters G02B 5/28-)}
U	H01L 31/0224	• • Electrodes
U	H01L 31/022408	• • • {for devices characterised by at least one potential jump barrier or surface barrier}
U	H01L 31/022425	• • • • {for solar cells}
U	H01L 31/022441	• • • • • {Electrode arrangements specially adapted for back-contact solar cells}
	H01L 31/02245	• • • • • • {for metallisation wrap-through [MWT]} type solar cells}
	H01L 31/022458	• • • • • • {for emitter wrap-through [EWT]} type solar cells, e.g. interdigitated emitter-base back-contacts}
U	H01L 31/022466	• • • {made of transparent conductive layers, e.g. TCO, ITO layers}
	H01L 31/022475	• • • • {composed of indium tin oxide [ITO]}
	H01L 31/022483	• • • • • {composed of zinc oxide [ZnO]}
	H01L 31/0232	• • Optical elements or arrangements associated with the device (H01L 31/0236 takes precedence; for photovoltaic cells H01L 31/054; for photovoltaic modules H02S 40/20)
	H01L 31/02327	• • • {the optical elements being integrated or being directly associated to the device, e.g. back reflectors (-optical coatings H01L 31/0216-)}
	H01L 31/024	• • Arrangements for cooling, heating, ventilating or temperature compensation (for photovoltaic devices H01L 31/052)
U	H01L 31/0248	• characterised by their semiconductor bodies
U	H01L 31/0256	• • characterised by the material
U	H01L 31/0264	• • • Inorganic materials

- U H01L 31/028
 - • • including, apart from doping material or other impurities, only elements of the fourth group of the Periodic System
- H01L 31/0284
 - • • • {comprising porous silicon as part of the active layer(s)} (~~porous silicon as antireflective layer for photodiodes [H01L 31/0216](#) ; for solar cells [H01L 31/02168](#)~~)
- H01L 31/032
 - • • including, apart from doping materials or other impurities, only compounds not provided for in groups [H01L 31/0272](#) to [H01L 31/0312](#)
- H01L 31/0321
 - • • • {characterised by the doping material (~~[H01L 31/0323](#) , [H01L 31/0325](#) take precedence~~)}
- H01L 31/0328
 - • • including, apart from doping materials or other impurities, semiconductor materials provided for in two or more of groups [H01L 31/0272](#) to [H01L 31/032](#)
- U H01L 31/0352
 - • characterised by their shape or by the shapes, relative sizes or disposition of the semiconductor regions
- U H01L 31/035209
 - • • {comprising a quantum structures}
- H01L 31/035227
 - • • • {the quantum structure being quantum wires, or nano-rods (~~carbon nano-tubes [H01L 51/0048](#)~~)}
- U H01L 31/036
 - • characterised by their crystalline structure or particular orientation of the crystalline planes
- H01L 31/0368
 - • • including polycrystalline semiconductors (~~[H01L 31/0392](#) takes precedence~~)
- H01L 31/0376
 - • • including amorphous semiconductors (~~[H01L 31/0392](#) takes precedence~~)
- H01L 31/0384
 - • • including other non-monocrystalline materials, e.g. semiconductor particles embedded in an insulating material (~~[H01L 31/0392](#) takes precedence~~)
- H01L 31/03845
 - • • • {comprising semiconductor nano-particles embedded in a semiconductor matrix (~~in insulating matrix [H01L 31/0384](#)~~)}
- H01L 31/0392
 - • • including thin films deposited on metallic or insulating substrates; {characterised by specific substrate materials or substrate features or by the presence of intermediate layers, e.g. barrier layers, on the substrate (~~textured substrates [H01L 31/02366](#)~~)}
- U H01L 31/04
 - adapted as photovoltaic [PV] conversion devices, e.g. PV modules or single PV cells (testing thereof during manufacture {[H01L 22/00](#)}; testing thereof after manufacture [H02S 50/10](#))
- H01L 31/042
 - • PV modules or arrays of single PV cells (supporting structures for PV modules [H02S 20/00](#))
- H01L 31/052
 - • Cooling means directly associated or integrated with the PV cell, e.g. integrated Peltier elements for active cooling or heat sinks directly associated with the PV cells (cooling means in combination with the PV module [H02S 40/42](#))
- U H01L 31/06
 - • characterised by at least one potential-jump barrier or surface barrier

NOTE
Groups [H01L 31/061](#) to [H01L 31/078](#) are based on IPC2012.01]
- H01L 31/061
 - • • the potential barriers being of the point-contact type (~~[H01L 31/07](#) takes precedence~~ [H01L 31/07](#) takes precedence)

- H01L 41/0536 • • • • {Mechanical prestressing means, e.g. springs (-in general [F16F 1/00](#)-)}
- U H01L 41/08 • Piezo-electric or electrostrictive devices

WARNING

Pending reorganisation, the groups [H01L 41/0805](#), [H01L 41/082](#), and [H01L 41/0825](#) are not complete, see provisionally also [H01L 41/08](#)

- H01L 41/107 • • with electrical input and electrical output {e.g. transformers}
- H01L 41/113 • • with mechanical input and electrical output {e.g. generators, sensors}

WARNING

Pending reorganisation, the groups [H01L 41/113](#) to [H01L 41/1138](#) are not complete, see provisionally also [H01L 41/113](#) and [H02N 2/18](#)

- U H01L 41/16 • Selection of materials
- H01L 41/18 • • for piezo-electric or electrostrictive devices {e.g. bulk piezo-electric crystals}
- H01L 41/187 • • • Ceramic compositions {i.e. synthetic inorganic polycrystalline compounds incl. epitaxial, quasi-crystalline materials}

WARNING

Pending reorganisation, the groups [H01L 41/1871](#) to [H01L 41/1878](#) are not complete, see provisionally also [H01L 41/187](#)]

- H01L 41/193 • • • Macromolecular compositions {e.g. piezo-electric polymers}

- H01L 43/00** Devices using galvano-magnetic or similar magnetic effects; Processes or apparatus peculiar to the manufacture or treatment thereof or of parts thereof (~~devices consisting of a plurality of solid state components formed in or on a common substrate [H01L 27/00](#) ; devices with potential-jump barrier, or surface barrier controllable by variation of a magnetic field [H01L 29/82](#)~~)
- H01L 43/12**
 - Processes or apparatus peculiar to the manufacture or treatment of these devices or of parts thereof (~~not peculiar thereto [H01L 21/00](#)~~)
- H01L 45/00** Solid state devices adapted for rectifying, amplifying, oscillating or switching without a potential-jump barrier or surface barrier, e.g. dielectric triodes; Ovshinsky-effect devices; Processes or apparatus peculiar to the manufacture or treatment thereof or of parts thereof (~~devices consisting of a plurality of solid state components formed in or on a common substrate [H01L 27/00](#) ; devices using superconductivity [H01L 39/00](#) ; piezo-electric devices [H01L 41/00](#) ; bulk negative resistance effect devices [H01L 47/00](#) ; { memories [G11C 11/34](#) ; [G11C 13/0002](#) ; amplifying circuits [H03F 11/00](#) ; pulse generation [H03K 3/02](#) ; electronic switching circuits [H03K 17/00](#) ; logic circuits [H03K 19/00](#) }~~)
- WARNING
Groups [H01L 45/04](#) - [H01L 45/16](#) do not correspond to former or current IPC groups. IPC concordance of said groups is - [H01L 45/04](#) - [H01L 45/16](#) : [H01L 45/00](#) . Groups [H01L 45/06](#) to [H01L 45/1691](#) are not complete pending reclassification; see provisionally also group [H01L 45/04](#)
- H01L 47/00** Bulk negative resistance effect devices, e.g. Gunn-effect devices; Processes or apparatus peculiar to the manufacture or treatment thereof or of parts thereof (~~devices consisting of a plurality of solid state components formed in or on a common substrate [H01L 27/00](#)~~)
- H01L 47/005**
 - {Processes or apparatus peculiar to the manufacture or treatment of these devices or of parts thereof (~~not peculiar thereto [H01L 21/00](#)~~)}
- H01L 47/02**
 - Gunn-effect devices {or transferred electron devices}
- H01L 47/026**
 - {Gunn diodes (~~[H01L 47/02](#) takes precedence~~)}
- H01L 49/00** Solid state devices not provided for in groups [H01L 27/00](#) to [H01L 47/00](#) and [H01L 51/00](#) and not provided for in any other subclass; Processes or apparatus peculiar to the manufacture or treatment thereof or of parts thereof
- H01L 49/006**
 - {Quantum devices, e.g. Quantum Interference Devices, Metal Single Electron Transistor (~~using semiconductors in the active part [H01L 29/00](#)~~)}
- H01L 51/00** Solid state devices using organic materials as the active part, or using a combination of organic materials with other materials as the active part; Processes or apparatus specially adapted for the manufacture or treatment of such devices, or of parts thereof (~~devices consisting of a plurality of components formed in or on a common substrate [H01L 27/28](#) ; thermoelectric devices using organic material [H01L 35/00](#) , [H01L 37/00](#) ; piezoelectric, electrostrictive or magnetostrictive elements using organic material [H01L 41/00](#)~~)
- H01L 51/0001**
 - {Processes specially adapted for the manufacture or treatment of devices or of parts thereof (~~multistep processes [H01L 51/0098](#) , [H01L 51/05](#) , [H01L 51/42](#) , [H01L 51/50](#)~~)}
- H01L 51/0029**
 - {Special provisions for controlling the atmosphere during processing (~~[H01L 51/0026](#) takes precedence~~)}

- U H01L 51/0032
- {Selection of organic semiconducting materials, e.g. organic light sensitive or organic light emitting materials}
- NOTE
- This group only covers the selection of organic materials for their electrical or other properties insofar as they are specific for their use in devices covered by the group [H01L 51/00](#).
- For the materials per se, see the relevant subclasses.
- Attention is drawn to the following places:
- organic materials in general [C07C](#), [C07D](#), [C07F](#), [C08L](#);
 - organic materials as electrical conductors [H01B 1/12](#) ;
 - organic materials as electrical insulators [H01B 3/18](#)
- H01L 51/0034
- {Organic polymers or oligomers (organic macromolecular compounds or compositions per se [C08](#))}
- H01L 51/0035
- • {comprising aromatic, heteroaromatic, or aryl chains, e.g. polyaniline (-per se [C08G 73/026](#)), polyphenylene (-per se [C08G 61/10](#)), polyphenylene vinylene (-per se [C08G 61/02](#))}
- H01L 51/0036
- • • {Heteroaromatic compounds comprising sulfur or selenine, e.g. polythiophene (-per se [C08G 61/126](#))}
- H01L 51/0038
- • • {Poly-phenylenevinylene and derivatives (-per se [C08G 61/10](#))}
- U H01L 51/004
- • {comprising aliphatic or olefinic chains, e.g. poly N-vinylcarbazol, PVC, PTFE}
- H01L 51/0041
- • • {Poly acetylene (-per se [C08G 61/04](#), [C08F 38/02](#), [C08F 138/02](#), [C08F 238/02](#)) or derivatives}
- H01L 51/0045
- {Carbon containing materials, e.g. carbon nanotubes, fullerenes (-per se [C01B 31/0206](#))}
- H01L 51/005
- {Macromolecular systems with low molecular weight, e.g. cyanine dyes, coumarine dyes, tetrathiafulvalene (-[H01L 51/0045](#), [H01L 51/0077](#), [H01L 51/0093](#), [H01L 51/0094](#) take precedence)}
- H01L 51/0059
- • {Amine compounds having at least two aryl rest on at least one amine-nitrogen atom, e.g. triphenylamine (-per se [C07C 211/00](#))}
- U H01L 51/0062
- • {aromatic compounds comprising a hetero atom, e.g.: N,P,S}
- H01L 51/0067
- • • {comprising only nitrogen as heteroatom (-[H01L 51/0064](#) takes precedence)}
- H01L 51/0069
- • • {comprising two or more different heteroatoms per ring, e.g. S and N (-[H01L 51/0064](#) takes precedence)}
- H01L 51/0075
- • {Langmuir Blodgett films (-per se [B05D 1/202](#))}
- H01L 51/0076
- • {Liquid crystalline materials (-per se [C09K 19/00](#))}
- U H01L 51/0077
- • {Coordination compounds, e.g. porphyrin}
- H01L 51/0078
- • • {Phthalocyanine (-per se [C09B 47/04](#))}
- H01L 51/0079
- • • {~~Metal complexes comprising a IIIB-metal (B, Al, Ga, In or Tl)~~ {~~Metal complexes comprising a IIIB-metal (B, Al, Ga, In or Tl)~~, e.g. Tris (8-hydroxyquinoline) gallium (GaQ3)}
- H01L 51/0091
- • • {Metal complexes comprising a IB-metal (~~Cu, Ag, Au~~) {~~Cu, Ag, Au~~}
- H01L 51/0092

Project: N/A (H01Q)**H01Q 1/00**

Details of, or arrangements associated with, aerials (~~arrangements for varying orientation of directional pattern~~ [H01Q 3/00](#)-)

NOTES

This group covers only:

- structural details or features of aerials not dependent on electric operation;
- structural details or features applicable to more than one

type of aerial or aerial element.

Structural details or features described with reference to, or clearly applicable only to, aerals or aerial elements of a particular type are classified in the group appropriate to that type.

- H01Q 1/002
 - {Protection against seismic waves, thermal radiation or other disturbances, e.g. nuclear explosion; Arrangements for improving the power handling capability of an aerial (~~-cooling~~ [H01Q 1/02-](#))}
- H01Q 1/005
 - {Damping of vibrations; Means for reducing wind-induced forces (~~-damping of vibrations in general~~ [F16F-](#))}
- H01Q 1/02
 - Arrangements for de-icing; Arrangements for drying-out; {Arrangements for cooling; Arrangements for preventing corrosion (~~-radomes~~ [H01Q 1/42-](#))}
- H01Q 1/08
 - Means for collapsing aerals or parts thereof; {Collapsible aerals} ({ collapsible supports [H01Q 1/1235](#) } ; collapsible loop aerals [H01Q 7/02](#) ; { collapsible helical aerals [H01Q 11/086](#) ; collapsible reflecting surfaces [H01Q 15/161](#) , [H01Q 15/20](#) } ; collapsible H-aerals or Yagi aerals [H01Q 19/04-](#))}
- U H01Q 1/081
 - {Inflatable antennas}
- H01Q 1/082
 - • {Balloon antennas (~~-balloon supported antennas~~ [H01Q 1/1292-](#))}
- H01Q 1/084
 - {Pivotable antennas (~~-mechanical movement of aerial or aerial system for changing or varying the orientation or the shape of the directional pattern~~ [H01Q 3/02](#) ; adjustment of angle between two radiating elements [H01Q 9/12-](#))}
- H01Q 1/12
 - Supports; Mounting means ({ for the purpose of scanning [H01Q 3/00](#) ; mounting structure for reflecting surfaces [H01Q 15/14](#) ; Towers, masts, or poles [E04H 12/00](#) } ; supporting conductors in general [H02G 7/00-](#))}
- U H01Q 1/1207
 - {for fastening a rigid aerial element}
- H01Q 1/1228
 - • {on a boom (~~-coupling of tubular pipes~~ [F16B 7/04-](#))}
- H01Q 1/125
 - {Means for positioning (~~-stabilising~~ [H01Q 1/18](#) ; remotely controlled positioning [H01Q 3/005-](#))}
- H01Q 1/1257
 - • {using the received signal strength (~~-direction finding~~ [G01S 3/38](#) ; diversity [H04B 7/10-](#))}
- H01Q 1/18
 - • Means for stabilising aerals on an unstable platform (~~-reducing wind-induced forces~~ [H01Q 1/005-](#))}
- H01Q 1/185
 - • {by electronic means (~~-electronic scanning~~ [H01Q 3/26-](#))}
- H01Q 1/22
 - • by structural association with other equipment or articles (~~-portable transceivers~~ [H04B 1/3827-](#))}
- H01Q 1/2208
 - • {associated with components used in interrogation type services, i.e. in systems for information exchange between an interrogator/reader and a tag/transponder, e.g. in Radio Frequency Identification (RFID) systems (~~-~~[G06K 7/00](#) and [G06K 19/00](#) take precedence)}
- H01Q 1/2233
 - • • {used in consumption-meter devices, e.g. electricity, gas or water meters (~~-remote reading of utility meters~~ [G01D 4/002](#) ; transmission of measured values using a radio link in general [G08C 17/02-](#))}
- H01Q 1/2241
 - • • {used in or for vehicle tyres (~~-tyres in general~~ [B60C 3/04-](#))}
- H01Q 1/225
 - • {used in level-measurement devices, e.g. for level gauge measurement (~~-level measuring with electromagnetic waves in general~~ [G01F 23/284-](#))}
- H01Q 1/2283
 - • {mounted in or on the surface of a semiconductor substrate as a chip-type antenna or integrated with other components into an IC package (~~-chip carriers for flat cards~~ [H01L 23/49855-](#))}
- H01Q 1/2291
 - • {used in bluetooth or WI-FI devices of Wireless Local Area Networks (WLAN) (~~-~~[H01Q 1/241](#) takes precedence; WLAN in general [H04W-](#))}

- U H01Q 1/24
 - • • with receiving set
- H01Q 1/241
 - • • {used in mobile communications, e.g. GSM ([H01Q 1/247](#) , [H01Q 1/248](#) take precedence)}
- H01Q 1/247
 - • • {with frequency mixer, e.g. for direct satellite reception or Doppler radar (~~active antennas~~ [H01Q 23/00\)}](#)
- H01Q 1/27
 - Adaptation for use in or on movable bodies ([H01Q 1/08](#) , [H01Q 1/12](#) , [H01Q 1/18](#) take precedence; { portable transceivers [H04B 1/3827](#) })
- U H01Q 1/28
 - • Adaptation for use in or on aircraft, missiles, satellites, or balloons
- H01Q 1/285
 - • • {Aircraft wire antennas (~~means for trailing~~ [H01Q 1/30\)}](#)
- H01Q 1/32
 - • Adaptation for use in or on road or rail vehicles (~~telescopic elements~~ [H01Q 1/10](#) ; resilient mountings for aerials [H01Q 1/20\)](#)
- U H01Q 1/325
 - • • {characterised by the location of the antenna on the vehicle}
- H01Q 1/3283
 - • • {side-mounted antennas, e.g. bumper-mounted, door-mounted (~~mounted on windscreens~~ [H01Q 1/1271\)}](#)
- H01Q 1/34
 - • Adaptation for use in or on ships, submarines, buoys, or torpedoes (~~for subaqueous use~~ [H01Q 1/04](#) ; retractable loop aerials [H01Q 7/02\)](#)
- H01Q 1/36
 - Structural form of radiating elements, e.g. cone, spiral, umbrella; {Particular materials used therewith} (~~H01Q 1/08~~ , [H01Q 1/14](#) take precedence)
- H01Q 1/38
 - • formed by a conductive layer on an insulating support ({ patch antennas [H01Q 9/0407](#) ; microstrip dipole antennas [H01Q 9/065](#) ; microstrip slot antennas [H01Q 13/106](#) ; transmission line microstrip antennas [H01Q 13/206](#) ; manufacturing reflecting surfaces using insulating material for supporting the reflecting surface [H01Q 15/142](#) } ; conductors in general [H01B 5/14\)](#)
- U H01Q 1/42
 - Housings not intimately mechanically associated with radiating elements, e.g. radome
- H01Q 1/422
 - • {comprising two or more layers of dielectric material (~~H01Q 1/425~~ takes precedence)}
- H01Q 1/44
 - using equipment having another main function to serve additionally as an aerial; {Means for giving an aerial anaesthetic aspect} (~~H01Q 1/28~~ to [H01Q 1/34](#) take precedence)
- H01Q 1/46
 - • Electric supply lines or communication lines(~~circuits for signal transmission via power distribution lines~~ [H04B 3/56\)}](#)
- H01Q 1/48
 - Earthing means; Earth screens; Counterpoises (~~earthing pins~~ [H01R 4/66\)](#)
- H01Q 1/50
 - Structural association of aerials with earthing switches, lead-in devices or lightning protectors (~~lead-in devices~~ [H01B](#) ; lightning protectors, switches [H01H](#))
- H01Q 1/52
 - Means for reducing coupling between aerials; Means for reducing coupling between an aerial and another structure(~~absorbing means~~ [H01Q 17/00\)}](#)
- U H01Q 1/521
 - • {reducing the coupling between adjacent antennas}
- H01Q 1/525
 - • • {between emitting and receiving antennas (~~feed-through nulling for radar~~ [G01S 7/038\)}](#)
- H01Q 1/526
 - • {Electromagnetic shields (~~anechoic chambers~~ [G01R 29/105](#) ; shielding of instruments [G12B 17/00](#) , of CRT [H01J 29/867](#) , of electrical apparatus or components [H05K 9/00\)}](#)
- H01Q 1/528
 - • {reducing the reradiation of a support structure (~~in a parabolic reflector antenna~~ [H01Q 19/023\)}](#)
- H01Q 3/00**

Arrangements for changing or varying the orientation or the shape of the directional pattern of the waves radiated from an aerial or aerial system(~~means for positioning~~ [H01Q 1/125](#))}

- H01Q 3/005
 - {using remotely controlled aerial positioning or scanning (~~remote control in general G08C-~~)}
- H01Q 3/12
 - using mechanical relative movement between primary active elements and secondary devices of aerials or aerial systems(~~positioning H01Q 1/1264-~~)}
- H01Q 3/26
 - varying the relative phase or relative amplitude of energisation between two or more active radiating elements; varying the distribution of energy across a radiating aperture ({ H01Q 3/12 } , H01Q 3/22 , H01Q 3/24 take precedence; { use of steered beams for mobile service area coverage H04Q7/3615 })
- H01Q 3/2605
 - • {Array of radiating elements provided with a feedback control over the element weights, e.g. adaptive arrays (~~tracking G01S 3/42-~~)}
- H01Q 3/2664
 - • {electrically moving the phase centre of a radiating element in the focal plane of a focussing device (~~switching H01Q 3/245 , phased-array feeds H01Q 3/2658-~~)}
- H01Q 3/267
 - • {Phased-array testing or checking devices (~~measuring radiation diagrams of aerials G01R 29/10-~~)}
- H01Q 3/2676
 - • {Optically controlled phased array (~~optical fibre networks H03H 2/003-~~)}
- U H01Q 3/2682
 - • {Time delay steered arrays}
- H01Q 3/2694
 - • • {using also variable phase-shifters (~~H01Q 3/2688 takes precedence-~~)}
- H01Q 3/30
 - • varying the {relative}phase {between the radiating elements of an array (~~H01Q 3/2605 , H01Q 3/2658 , H01Q 3/2682 , H01Q 3/44 take precedence-~~)}
- H01Q 3/34
 - • • by electrical means (~~active lenses or reflecting arrays H01Q 3/46-~~)
- H01Q 3/36
 - • • with variable phase-shifters(~~combined with time delay devices H01Q 3/2682-~~)}
- H01Q 3/42
 - • • using frequency-mixing(~~H01Q 3/2676 takes precedence-~~)}
- U H01Q 3/44
 - varying the electric or magnetic characteristics of reflecting, refracting, or diffracting devices associated with the radiating element
- H01Q 3/443
 - • {varying the phase velocity along a leaky transmission line (~~frequency scanning H01Q 3/22 ; non-resonant leaky-waveguide or transmission-line aerials H01Q 13/20-~~)}
- H01Q 5/00**

Arrangements for simultaneous operation of aerials on two or more different wavebands, { e.g. dual-~~band~~ or multi-band ~~like~~ arrangements for broad wavebands } (~~length of elements adjustable H01Q 9/14 ; combinations of separate active aerial units operating in different wavebands and connected to a common feeder system H01Q 21/30 ; { non-simultaneous operation of aerials with adjustable lengths or elements H01Q 9/14 ; broad/multi-band operation in general without specific features H01Q 5/00 }~~)
- D H01Q 5/0003
 - {Single aerial units operating on two or more wavebands(~~H01Q 5/02 takes precedence-~~)}

INSTALLATION OF ELECTRIC CABLES OR LINES, OR OF COMBINED OPTICAL AND ELECTRIC CABLES OR LINES {-distribution points incorporating switches [H02B](#); guiding telephone cords [H04M 1/15](#); cable ducts or mountings for telephone or telegraph exchange installations [H04Q 1/06](#)-}

NOTES

1. This subclass covers installation of communication cables or lines, including those comprising a combination of optical and electrical conductors, or of lightning conductors as well as installation of power cables or lines.

2. This subclass does not cover installation of purely optical cables, which is covered by groups { [G02B 6/4401](#) } , [G02B 6/46](#) .

3. In this subclass, the following expression is used with the meaning indicated:

- "electric cable" includes cables comprising optical conductors, e.g. fibres, in combination with electrical conductors.

In this subclass it is desirable to add indexing codes of group [H02G 2200/00](#) whenever appropriate

U H02G 1/00

NOTES

1. Groups [H02P 21/06](#) to [H02P 21/12](#) cover vector control arrangements or methods involving the use of rotor position or speed sensors.

2. Vector control arrangements or methods not involving the use of rotor position or speed sensors are classified in groups [H02P 21/0039](#) and subgroups

When classifying in this group, it is desirable to also classify in groups [H02P 25/00](#) to [H02P 27/00](#) if the kind of AC motor, structural details, or the kind of supply voltage are of interest.

- H02P 21/0003
 - {Control strategies in general, e.g. linear type e.g. P, PI, PID, using robust control }
- H02P 21/0007
 - • {using sliding mode control }
- H02P 21/001
 - • {using fuzzy control }
- H02P 21/0014
 - • {using neural networks }
- H02P 21/0017
 - • {Model reference adaptation, e.g. MRAS or MRAC, useful for control or parameter estimation }
- H02P 21/0021
 - • {using different modes of control depending on a parameter, e.g. the speed }
- H02P 21/0025
 - • {implementing a off line learning phase to determine and store useful data for on-line control }
- H02P 21/0039
 - {not involving the use of rotor position or speed sensors }
- H02P 21/0042
 - • {Rotor flux based control }
- H02P 21/0046
 - • {Stator flux based control }
- H02P 21/005
 - • • {Direct torque control (DTC) or field acceleration method (FAM) }
- H02P 21/0053
 - • {Determining the initial rotor position (arrangements for starting [H02P 21/0032](#); position detection in general [H02P 6/16](#)-[H02P 6/185](#)) }

	H02P 21/0085	• {-specially adapted for high speeds, e.g. above nominal speed}

H03G CONTROL OF AMPLIFICATION (-impedance networks, e.g. attenuators, [H03H](#); control of transmission in lines [H04B 3/04](#)-)

NOTES

This subclass covers:

- control of gain of amplifiers or frequency-changers,
- control of frequency range of amplifiers,
- limiting amplitude or rate of change of amplitude

Attention is drawn to the Note following the title of subclass [H03F](#).

H03G 1/00 Details of arrangements for controlling amplification{ for arrangements combined with means for generating a controlling signal, or these means per se, see the other main groups of [H03G](#)-}

Project: N/A (H03H)**H03H**

IMPEDANCE NETWORKS, e.g. RESONANT CIRCUITS; RESONATORS (-measuring, testing [G01R](#); arrangements for producing a reverberation or echo sound [G10K 15/08](#) ; impedance networks or resonators consisting of distributed impedances, e.g. of the waveguide type, [H01P](#); control of amplification, e.g. bandwidth control of amplifiers, [H03G](#); tuning resonant circuits, e.g. tuning coupled resonant circuits, [H03J](#); networks for modifying the frequency characteristics of communication systems [H04B-](#))

NOTES

This subclass covers :

networks comprising lumped impedance elements;
networks comprising distributed impedance elements together with lumped impedance elements;
networks comprising electromechanical or electro-acoustic elements;
networks simulating reactances and comprising discharge tubes or semiconductor devices;
constructions of electromechanical resonators.

In this subclass, the following expression is used with the meaning indicated:
"passive elements" means resistors, capacitors, inductors, mutual inductors or diodes.

Attention is drawn to the Notes following the titles of class [B81](#) and subclass [B81B](#) relating to "micro-structural devices" and "micro-structural systems".

In this subclass, main groups with a higher number take precedence.

H03H 1/00

U H03H 11/00**Networks using active elements**WARNING

Group [H03H 11/11](#) does not correspond to former or current IPC groups.

Concordance CPC : IPC for these groups is as follows: - [H03H 11/11](#) - [H03H 11/04](#)

- U H03H 11/02
 - Multiple-port networks
- U H03H 11/04
 - Frequency selective two-port networks
- H03H 11/0416
 - {using positive impedance converters (~~H03H 11/08~~ takes precedence)}
- U H03H 11/0422
 - {using transconductance amplifiers, e.g. gmC filters}
- H03H 11/0427
 - {Filters using a single transconductance amplifier; Filters derived from a single transconductor filter, e.g. by element substitution, cascading, parallel connection (~~H03H 11/0433~~ to **H03H11/C10** take precedence)}
- H03H 11/0433
 - {Two integrator loop filters (~~H03H 11/0455~~ takes precedence)}
- H03H 11/10
 - using negative impedance converters (~~H03H 11/08~~ takes precedence)
- H03H 11/12
 - using amplifiers with feedback ({ [H03H 11/0422](#) }, [H03H 11/08](#) , [H03H 11/10](#) take precedence)
- H03H 11/1213
 - {using transistor amplifiers (~~H03H 11/1204~~ takes precedence; parallel-T filters [H03H 11/1295](#))}
- H03H 11/1217
 - {using a plurality of operational amplifiers (~~H03H 11/1204~~ takes precedence; parallel-T filters [H03H 11/1295](#))}
- H03H 11/1221
 - {Theory; Synthesis (~~H03H 11/1226~~ to [H03H 11/1252](#) take precedence)}
- H03H 11/126
 - {using a single operational amplifier (~~H03H 11/1204~~ takes precedence; parallel-T filters [H03H 11/1295](#))}
- H03H 11/1265
 - {Synthesis (~~H03H 11/1269~~ to [H03H 11/1282](#) take precedence)}
- H03H 11/26
 - Time-delay networks (~~analogue shift registers [G11C 27/04](#)~~)
- H03H 11/34
 - Networks for connecting several sources or loads working on different frequencies or frequency bands, to a common load or source (~~for use in multiplex transmission systems [H04J 1/00](#)~~)
- H03H 11/36
 - Networks for connecting several sources or loads, working on the same frequency band, to a common load or source (~~phase shifters providing two or more output signals [H03H 11/22](#)~~)
- U H03H 11/40
 - Impedance converters
- H03H 11/405
 - {Positive impedance converters (~~H03H 11/42~~ takes precedence; used in frequency selective networks [H03H 11/0416](#))}
- H03H 11/42
 - Gyrators (~~used in frequency selective networks [H03H 11/08](#)~~)
- H03H 11/44
 - Negative impedance converters (~~H03H 11/42~~ takes precedence; used in frequency selective networks [H03H 11/10](#))
- U H03H 11/46
 - One-port networks
- U H03H 11/52
 - simulating negative resistances
- H03H 11/525
 - {Simulating frequency dependent negative resistance [FDNR]}

U H03M 2201/00 Indexing scheme relating to A/D or D/A conversion

NOTE

As this scheme is obtained by conversion from the former deep indexing system RM03 it reflects the several editions of that system in the following way:

- code symbols added at subsequent editions are indicated by numbers [2] or [3] in square brackets, the code symbols present from the first edition on having no indication;

- headers which did not have a code symbol in the RM03 system and thus could not be assigned to documents, but which need a code symbol in the ICO system for the purpose of a correct hierarchical order, are indicated by the symbol [H];

- the edition according to which a document has been indexed is indicated by the assignment of one of code symbols [H03M 2201/01](#) through [H03M 2201/03](#) to that document.

In principle, therefore, a search should include a separate combination of appropriate code symbols for each edition, each combination including one of codes [H03M 2201/01](#) through [H03M 2201/03](#).

On an incidental base, however, code symbols from later editions have been assigned to documents indexed according to an earlier edition.

WARNING

The use of this indexing scheme has been discontinued for all documents published later than 1989.

- U H03M 2201/60 . Fidelity improvement
- U H03M 2201/61 . . Adjustment or control means [H]
- U H03M 2201/6142 . . . Means used [H]
- U H03M 2201/615 Compensation [3]
- H03M 2201/6164 using stored correction values (-for previous editions, see provisionally [H03M 2201/72](#))[3]
- H03M 2201/6171 using a computer for more than just storing (-for previous editions, see provisionally [H03M 2201/72](#))[3]

Project: N/A (H04B)**H04B**

TRANSMISSION (transmission systems for measured values, control or similar signals [G08C](#); coding, decoding, code conversion, in general [H03M](#); broadcast communication [H04H](#); multiplex systems [H04J](#); secret communication [H04K](#); transmission of digital information [H04L](#))

NOTE

This subclass covers the transmission of information-carrying signals, the transmission being independent of the nature of the information, and includes monitoring and testing arrangements and the suppression and limitation of noise and interference.

H04B 1/00

Details of transmission systems, not covered by a single one of groups [H04B 3/00](#) to [H04B 13/00](#); Details of transmission systems not characterised by the medium used for transmission (-tuning resonant circuits [H03J](#))

NOTE

In this group, group [H04B 1/0003](#) takes precedence over groups [H04B 1/005](#) to [H04B 1/76](#)

H04B 1/0003

- {Software-defined radio [SDR]} systems, i.e. systems wherein components typically implemented in hardware, e.g. filters or modulators/demodulators, are implemented using software, e.g. by involving an AD or DA conversion stage such that at least part of the signal processing is performed in the digital domain (-digital baseband systems [H04L 25/00](#) ; digital modulation/demodulation [H04L 27/00](#) ; CDMA [H04B 1/707](#) ; TDMA [H04B 7/2643](#) ; image transmission [H04N 5/00](#)-)}

WARNING

Groups [H04B 1/0003](#) and subgroups are not complete pending a reorganisation. See also group [H04B 1/406](#)

- U H04B 1/0007
 - {wherein the AD/DA conversion occurs at radiofrequency or intermediate frequency stage}
- H04B 1/001
 - • {Channel filtering, i.e. selecting a frequency channel within the SDR system (-multiplexing of multicarrier modulation signals being represented by different frequencies [H04L 5/06](#) ; multiplexing of multicarrier modulation signals [H04L 5/023](#)-)}
- H04B 1/0014
 - • {using DSP [Digital Signal Processor] quadrature modulation and demodulation}
- H04B 1/0017
 - • {Digital filtering (-[H04B 1/001](#) takes precedence; digital filters per se [H03H 17/00](#)-)}
- H04B 1/0021
 - • {Decimation, i.e. data rate reduction techniques (-[H04B 1/0025](#) takes precedence-)}
- H04B 1/0025
 - • {using a sampling rate lower than twice the highest frequency component of the sampled signal (-for demodulation of angle-modulated signals [H03D 3/006](#)-)}
- U H04B 1/0028
 - {wherein the AD/DA conversion occurs at baseband stage}
- H04B 1/0032
 - • {with analogue quadrature frequency conversion to and from the baseband (-quadrature modulators and demodulators per se [H03D 3/007](#) , [H03C 3/40](#)-)}
- H04B 1/0035
 - • {Channel filtering, i.e. selecting a frequency channel within a software radio system (-multiplexing of multicarrier modulation signals being represented by different frequencies [H04L 5/06](#) ; multiplexing of multicarrier modulation signals [H04L 5/023](#)-)}
- H04B 1/0039

 - • • {to be used in vehicles (~~H04B 1/086~~ takes precedence; holding or mounting accessories [B60R 11/02](#)-)}
- H04B 1/10
 - • Means associated with receiver for limiting or suppressing noise or interference {induced by transmission (~~interference reduction in spread spectrum systems [H04B 1/7097](#) ; equalising on HF or IF [H04B 7/005](#) ; diversity systems [H04B 7/02](#) ; elimination of image frequencies [H03D 7/18](#) ; noise suppression by control of amplification [H03G 3/00](#) , [H03G 5/00](#) , [H03G 7/00](#) ; squelching [H03G 3/26](#) , [H03G 3/34](#)-)}~~
- H04B 1/1009
 - • • {Placing the antenna at a place where the noise level is low and using a noise-free transmission line between the antenna and the receivers (~~screened aerials [H01Q 7/04](#) ; feeders for aerials [H01Q 9/00](#)-)}~~
- H04B 1/1018
 - • • {noise filters connected between the power supply and the receiver (~~suppression or limitation of noise from electric apparatus [H04B 15/00](#) ; demodulation [H03D](#) ; ripple filters [H02M 1/14](#) ; filters in general **95G** , [H03H](#) ; power supplies [H04B 1/1607](#)-)}~~
- U H04B 1/1027
 - • • {assessing signal quality or detecting noise/interference for the received signal}
- H04B 1/1036
 - • • • {with automatic suppression of narrow band noise or interference, e.g. by using tuneable notch filters (~~H04B 1/123~~ takes precedence; filter circuits [H03H](#)-)}
- H04B 1/1081
 - • • {Reduction of multipath noise (~~by equalising [H04B 7/005](#)-)}~~
- H04B 1/12
 - • • Neutralising, balancing, or compensation arrangements (~~balancing ripple filters [H04B 15/005](#) , [H02M 1/143](#)-)}~~
- H04B 1/123
 - • • • {using adaptive balancing or compensation means (~~adaptive filter circuits and algorithms [H03H](#)-)}~~
- H04B 1/126
 - • • • • {having multiple inputs, e.g. auxiliary antenna for receiving interfering signal (~~aerials in general [H01Q](#)-)}~~
- H04B 1/16
 - • Circuits (~~demodulators [H03D](#)-}~~
- H04B 1/1607
 - • • {Supply circuits (~~converters **92P** , **92Q** , [H02M](#) ; filters therefor [H02M 1/14](#) ; voltage stabilisers [G05F 1/46](#)-)}~~
- H04B 1/1615
 - • • • {Switching on; Switching off, e.g. remotely (~~battery saving circuits associated with selective call operation [H04W 52/00](#) ; details of power consumption reduction in a PLL, [H03L 7/0802](#) , [H03L 7/14](#) , [H03L 2207/08](#) , [H03L 2207/18](#) ; muting amplifiers by gain control see [H03G 3/34](#)-)}~~
- H04B 1/163
 - • • {Special arrangements for the reduction of the damping of resonant circuits of receivers (~~amplifiers [H03F](#) ; negative impedance networks for line transmission systems [H04B 3/16](#)-)}~~
- H04B 1/1638
 - • • {Special circuits to enhance selectivity of receivers not otherwise provided for (~~resonant circuits [H03H](#)-)}~~
- U H04B 1/1646
 - • • {adapted for the reception of stereophonic signals}
- H04B 1/1692
 - • • • {using companding of the stereo difference signal, e.g. FMX (~~volume compression or expansion in amplifiers [H03G 7/00](#)-)}~~
- H04B 1/18
 - • • Input circuits, e.g. for coupling to an aerial or a transmission line (~~input circuits for amplifiers in general [H03F](#) ; coupling networks between aerials or lines and receivers independent of the nature of the receiver [H03H](#)-}~~

- H04B 1/20
 - • • for coupling gramophone pick-up, recorder output, or microphone to receiver, {e.g. for Hi-Fi systems or audio/video combinations (-constructional details for associated working of receivers and recording devices [G11B 31/003](#) ; for television signals only [H04N 5/00-](#))}
- H04B 1/207
 - • • {with an audio or audio/video bus for signal distribution (-[H04B 1/205](#) takes precedence-)}
- H04B 1/26
 - • • for superheterodyne receivers (-multiple frequency-changing [H03D 7/16-](#))
- H04B 1/30
 - • • for homodyne or synchrodyne receivers (-demodulator circuits [H03D 1/22-](#))
- H04B 1/302
 - • • {for single sideband receivers (-demodulator circuits [H03D 1/24-](#))}
- H04B 1/38
 - Transceivers, i.e. devices in which transmitter and receiver form a structural unit and in which at least one part is used for functions of transmitting and receiving { ~~(-construction of portable transceivers H04B 1/034 ; specially adapted to be fitted into airplanes B64D 43/00 ; paging systems G08B 3/10 ; traffic between a small number of stations with amplifiers or loudspeakers H04M 9/001 ; selecting arrangements for radio-calling systems H04W ; wireless communication networks H04W-)~~ }
- H04B 1/3805
 - • {with built-in auxiliary receivers}
- H04B 1/3816
 - • {Mechanical arrangements for accommodating identification devices, e.g. cards, ~~or~~ chips ; with connectors for programming identification devices}
- N H04B 1/3818
 - • • Arrangements for facilitating insertion or removal of identification devices

Project: N/A (H04J)**H04J**

MULTIPLEX COMMUNICATION (~~transmission in general [H04B](#); peculiar to transmission of digital information [H04L 5/00](#) ; systems for the simultaneous or sequential transmission of more than one television signal [H04N 7/08](#) ; in exchanges [H04Q 11/00](#) ; stereophonic systems [H04S](#)~~)

NOTE

This subclass covers

- circuits or apparatus for combining or dividing signals for the purpose of transmitting them simultaneously or sequentially over the same transmission path;
- monitoring arrangements therefor.

H04J 1/00

Frequency-division multiplex systems (~~[H04J 14/00](#) takes precedence~~)

U H04J 1/02

• Details

H04J 1/04

- • Frequency-transposition arrangements{ modulation with carrier or side-band suppression [H03C 1/52](#) , [H03C 1/60](#) ; single-band suppression [H04B 1/00](#) , [H04B 15/00](#) ; telegraphic communication [H04L 27/02](#) , [H04L 25/49](#) ; transference of modulation from one carrier to another, e.g. frequency-changing [H03D 7/00](#) ; demodulation or transference of modulation of modulated electromagnetic waves [H03D 9/00](#)}

H04J 1/06

- • Arrangements for supplying the carrier waves {Arrangements for supplying synchronisation signals(~~carrier supply [H04L 5/10](#) ; frequency multiplication [H03B 19/00](#) , [H03B 21/00](#) ; mixing [H03D 7/00](#) , [H03D 9/00](#) ; synchronisation in general [H03B](#)~~)}

H04J 1/08

- • Arrangements for combining channels{(~~branching filters [H01P 1/213](#) , [H03H 7/46](#)~~)}

H04J 1/10

- • Intermediate station arrangements, e.g. for branching, for tapping-off{ repeater circuits [H04B 3/36](#) , [H04B 3/58](#) ; two-way amplifiers [H03F 3/62](#)}

H04J 1/12

- • Arrangements for reducing cross-talk between channels{ in line transmission systems [H04B 3/32](#) ; in cables or lines [H04B 3/26](#) to [H04B 3/30](#)}

H04J 1/16

- • Monitoring arrangements{(~~for transmission in general [H04B 17/00](#) ; for amplifiers [H03F 1/52](#) , [H03F 1/523](#)~~)}

H04J 1/18

- in which all the carriers are amplitude-modulated (~~[H04J 1/02](#) takes precedence~~){ in telephony [H04Q 11/02](#) , [H04Q 11/023](#) ; in stereophony [H04H](#) ; in telegraphy [H04L 5/06](#) ; in telemetry [G08C 15/02](#) , [G08C 15/04](#)}

H04J 1/20

- in which at least one carrier is angle-modulated (~~[H04J 1/02](#) takes precedence~~; FM without multiplex [H04B 1/00](#) , [H04B 14/006](#) , [H04B 15/00](#) ; PSK [H04L 5/12](#) ; impulse-modulation without multiplex [H04B 14/02](#) ; time-division multiplexing for data transmission [H04L 5/22](#) ; telemetry [G08C 15/06](#) to [G08C 15/12](#) ; telephony [H04Q 11/00](#) , [H04Q 11/04](#) , [H04Q 11/0407](#))

H04J 3/00

Time-division multiplex systems (~~[H04J 14/00](#) takes precedence; relay systems [H04B 7/14](#) ; selecting techniques [H04Q](#)~~)

H04J 3/02

- Details (~~electronic switching or gating [H03K 17/00](#)~~)

H04J 3/025

- • {Filter arrangements (~~[H04J 3/08](#) takes precedence; filters per se [H03H 7/00](#) , [H03H 9/00](#)~~)}

H04J 3/04

- • Distributors combined with modulators or demodulators{(~~pulse distributors in general [H03K 5/15](#) ; pulse counters [H03K 21/00](#) to [H03K 29/06](#) ; for telegraphy [H04L 5/22](#) , [H04L 13/00](#) to [H04L 23/00](#) , [H04L 25/45](#) ; for telephony [H04Q 11/04](#)~~)}

H04J 3/06

- • Synchronising arrangements{(~~for television systems [H04N 5/04](#) ; bit-synchronisation [H04L 7/00](#)~~)}

- U H04J 3/0602 . . . {Systems characterised by the synchronising information used}
- U H04J 3/0605 {Special codes used as synchronising signal}
- H04J 3/0611 {PN codes (~~H04J 3/0608~~ takes precedence)}
- H04J 3/062 . . . {Synchronisation of signals having the same nominal but fluctuating bit rates, e.g. using buffers (~~pulse-stuffing H04J 3/07~~ ; asynchronous-synchronous conversion [H04L 5/24](#) ; speed conversion [H04L 25/05](#) ; speed conversion in computers [G06F 5/06](#))}
H04J 3/0635 . . . {Clock or time synchronisation in a network (~~timer in protocols [H04L 69/28](#)~~)}
- H04J 3/0638 {Clock or time synchronisation among nodes; Internode synchronisation (~~synchronization for ring networks [H04L 12/422](#) ; data switching networks with synchronous transmission [H04L 12/43](#)~~)}
- H04J 3/0652 {Synchronisation among time division multiple access [TDMA] nodes, e.g. time triggered protocol [TTP] (~~bus network with centralized control in which slots are of a TDMA packet structure [H04L 12/4035](#)~~)}
- U H04J 3/0658 {Clock or time synchronisation among packet nodes}
- U H04J 3/0661 {using timestamps}
- H04J 3/0667 {Bidirectional timestamps, e.g. NTP or PTP for compensation of clock drift and for compensation of propagation delays (~~monitoring or testing of delay in data switching networks [H04L 12/2657](#)~~)}
- H04J 3/07 . . . using pulse stuffing for systems with different or fluctuating information rates {or bit rates}
- H04J 3/14 . . Monitoring arrangements (~~for SDH/SONET rings [H04J 3/085](#)~~)
- H04J 3/16 . in which the time allocation to individual channels within a transmission cycle is variable, e.g. to accommodate varying complexity of signals, to vary number of channels transmitted (~~H04J 3/17 , [H04J 3/24](#) take precedence~~)
- U H04J 3/1605 . . {Fixed allocated frame structures}
- H04J 3/1611 . . . {Synchronous digital hierarchy [SDH] or SONET (~~H04J 3/1664~~ takes precedence for interactions with OTN)}
- U H04J 3/1652 . . . {Optical Transport Network (OTN)}
- H04J 3/1658 {~~carrying packets or ATM cells; [H04J 3/1664](#) takes precedence for payloads with different packet types~~}
- H04J 3/167 {~~interaction with SDH/SONET, e.g. carrying SDH/SONET frames, interfacing with SDH/SONET; [H04J 3/1664](#) takes precedence~~}
- U H04J 3/1682 . . {Allocation of channels according to the instantaneous demands of the users, e.g. concentrated multiplexers, statistical multiplexers}
- H04J 3/1688 . . . {the demands of the users being taken into account after redundancy removal, e.g. by predictive coding, by variable sampling (~~reducing bandwidth of signals in general [H04B 1/66](#) ; in PCM-systems [H04B 14/046](#) ; removal of redundancy in telegraph communication [H03M 7/30](#)~~)}
- H04J 3/1694 . . {Allocation of channels in TDM/TDMA networks, e.g. distributed multiplexers (~~Passive Optical Networks [H04Q 11/0062](#)~~)}
- U H04J 3/17 . in which the transmission channel allotted to a first user may be taken away and re-allotted to a second user if the first user becomes inactive, e.g. TASI{(speech analysis or identification [G10L](#))}
- H04J 3/175 . . {Speech activity or inactivity detectors (~~echo suppressors [H04B 3/20](#)~~)}
- H04J 3/22 . in which the sources have different rates or codes (~~simultaneous speech and digital data or video transmission [H04M 11/06](#) ; see provisional also [H04J 3/16](#)~~)}

H04J 3/24	<ul style="list-style-type: none"> in which the allocation is indicated by an address {the different channels being transmitted sequentially}(-H04J 3/17 takes precedence; in computers G06F 12/00 , G06F 13/00 { code multiplex systems H04J 13/00 ; selecting techniques H04Q ; relay systems H04B 7/14 })

NOTE

1. This group covers: "Jamming", only when it means purposefully trying to interfere with the physical transmission and reception of communication. Provided this condition is met, this group covers devices and methods for: (a) jamming of communication: i. jamming by intentionally decreasing the signal to noise ratio ii. deceptive jamming iii. passive jamming iiiii. destructive jamming (b) countermeasures against jamming (c) countermeasures against undesired self-jamming resulting from jamming (d) countermeasures against surveillance, interception or detection (e) other electronic countermeasures using or against electromagnetic or acoustic waves (f) signal detection techniques used in relation to i. jamming: for interception and monitoring of the jamming target signal ii. anti-jamming: for jamming detection, iii. anti-surveillance: for surveillance detection (g) jamming for testing or assessing countermeasures (h) jamming used to prevent: - cellular phone communication i. in a vehicle during motion ii. in particular areas, including prisons, hospitals, planes, petrol stations, theatres iii. to trigger RCIEDs - reception of positioning data using GPS - wireless communication in ad hoc networks or in sensor networks - exchange of data between wirelessly connected devices or device units, on Bluetooth, infrared or near field links - unauthorized access to network, service or information, including: i. access to a WLAN network ii. access to information stored in contactless carriers, including RFID carriers - transmission of an alarm, against burglary or vehicle theft - remote control of devices - surveillance i. of speech in meeting rooms ii. of electromagnetic emissions from a computer screen - interception or detection of a wirelessly transmitted signal] 2. In this group, the following acronyms are used: GPS = global positioning system RCIED = remote controlled improvised explosive device RFID = radio frequency identification WLAN= wireless local area network

WARNING

Groups [H04K 3/00](#) -[H04K 3/94](#) do not correspond to former or current IPC groups. Concordance CPC : IPC for these groups is as follows: - [H04K 3/00](#) - [H04K 3/94](#) : [H04K 3/00](#)

- H04K 3/20
- {-Countermeasures against jamming (in radar [G01S 7/36](#); interference suppression in receivers [H04B 1/10](#))}
- H04K 3/22
- • {-including jamming detection and monitoring}
- H04K 3/222
- • • {-wherein jamming detection includes detecting the absence or impossibility of intelligible communication on at least one channel}
- H04K 3/224
- • • {-with countermeasures at transmission and/or reception of the jammed signal, e.g. stopping operation of transmitter or receiver, nulling or enhancing transmitted power in direction of or at frequency of jammer}
- H04K 3/226
- • • • {-Selection of non-jammed channel for communication (spectrum sharing arrangements [H04W 16/14](#); selection of wireless resources by user or terminal [H04W 72/02](#))}
- H04K 3/228
- • • • {-Elimination in the received signal of jamming or of data corrupted by jamming (interference suppression in receivers [H04B 1/10](#))}

- H04K 3/25
 - • {based on characteristics of target signal or of transmission (as countermeasure against surveillance [H04K 3/827](#)), e.g. using direct sequence spread spectrum or fast frequency hopping-(spread spectrum techniques [H04B 1/69](#))}
- H04K 3/255
 - • • {based on redundancy of transmitted data, transmission path or transmitting source}
- H04K 3/28
 - • {with jamming and anti-jamming mechanisms both included in a same device or system, e.g. wherein anti-jamming includes prevention of undesired self-jamming resulting from jamming}
- H04K 3/40
 - {Jamming having variable characteristics}
- H04K 3/41
 - • {characterized by the control of the jamming activation or deactivation time (control of jamming activation and deactivation time only for the purpose of alternating between jamming mode and target monitoring mode [H04K 3/45](#))}
- H04K 3/415
 - • • {based on motion status or velocity, e.g. for disabling use of mobile phones in a vehicle}
- H04K 3/42
 - • {characterized by the control of the jamming frequency or wavelength}
- H04K 3/43
 - • {characterized by the control of the jamming power, signal-to-noise ratio or geographic coverage area}
- H04K 3/44
 - • {characterized by the control of the jamming waveform or modulation type}
- H04K 3/45
 - • {characterized by including monitoring of the target or target signal, e.g. in reactive jammers or follower jammers for example by means of an alternation of jamming phases and monitoring phases, called "look-through mode"}
- H04K 3/46
 - • {characterized in that the jamming signal is produced by retransmitting a received signal, after delay or processing}
- H04K 3/60
 - {Jamming involving special techniques}
- H04K 3/62
 - • {by exposing communication, processing or storing systems to electromagnetic wave radiation, e.g. causing disturbance, disruption or damage of electronic circuits, or causing external injection of faults in the information}
- H04K 3/65
 - • {using deceptive jamming or spoofing, e.g. transmission of false signals for premature triggering of RCIED, for forced connection or disconnection to/from a network or for generation of dummy target signal}
- H04K 3/68
 - • {using passive jamming, e.g. by shielding or reflection (shielding of apparatus or components against electric or magnetic field [H05K 9/00](#))}
- H04K 3/80
 - {Jamming or countermeasure characterized by its function}
- H04K 3/82
 - • {related to preventing surveillance, interception or detection}
- H04K 3/822
 - • • {by detecting the presence of a surveillance, interception or detection}
- H04K 3/825
 - • • {by jamming}
- H04K 3/827
 - • • {using characteristics of target signal or of transmission (as countermeasure against jamming [H04K 3/25](#)), e.g. using direct sequence spread spectrum or fast frequency hopping-(spread spectrum techniques [H04B 1/69](#))}
- H04K 3/84
 - • {related to preventing electromagnetic interference in petrol station, hospital, plane or cinema}
- H04K 3/86
 - • {related to preventing deceptive jamming or unauthorized interrogation or access, e.g. WLAN access or RFID reading (record carriers with integrated circuit chips including means for preventing undesired reading or writing from or to record carriers by hindering electromagnetic reading or writing [G06K 19/07318](#); arrangements for sensing record carriers including arrangements for protecting the interrogation against piracy attacks [G06K 7/10257](#))}

- H04K 3/88 • • {related to allowing or preventing alarm transmission}
- H04K 3/90 • • {related to allowing or preventing navigation or positioning, e.g. GPS}
- H04K 3/92 • • {related to allowing or preventing remote control}
- H04K 3/94 • • {related to allowing or preventing testing or assessing}

- H04K 2203/00 {Jamming of communication; Countermeasures}**
- H04K 2203/10 • {Jamming or countermeasure used for a particular application}
- H04K 2203/12 • • {for acoustic communication}
- H04K 2203/14 • • {for the transfer of light or images, e.g. for video-surveillance, for television or from a computer screen}
- H04K 2203/16 • • {for telephony}
- H04K 2203/18 • • {for wireless local area networks or WLAN}
- H04K 2203/20 • • {for contactless carriers, e.g. RFID carriers (record carriers with integrated circuit chips including means for preventing undesired reading or writing from or to record carriers by hindering electromagnetic reading or writing [G06K 19/07318](#); arrangements for sensing record carriers including arrangements for protecting the interrogation against piracy attacks [G06K 7/10257](#))}

- H04K 2203/22 • • {for communication related to vehicles}
- H04K 2203/24 • • {for communication related to weapons}
- H04K 2203/30 • {Jamming or countermeasure characterized by the infrastructure components}
- H04K 2203/32 • • {including a particular configuration of antennas}
- H04K 2203/34 • • {involving multiple cooperating jammers}
- H04K 2203/36 • • {including means for exchanging jamming data between transmitter and receiver, e.g. in forward or backward direction}

Project: N/A (H04L)**H04L**

TRANSMISSION OF DIGITAL INFORMATION, e.g. TELEGRAPHIC COMMUNICATION (typewriters [B41J](#); order telegraphs, fire or police telegraphs [G08B](#); visual telegraphy [G08B](#), [G08C](#); teleautographic systems [G08C](#); ciphering or deciphering apparatus per se [G09C](#); coding, decoding or code conversion, in general [H03M](#); arrangements common to telegraphic and telephonic communication [H04M](#); selecting [H04Q](#))

NOTE

This subclass covers transmission of signals having been supplied in digital form and includes data transmission, telegraphic communication and methods or arrangements for monitoring.

NOTE

1. This group covers: 1.1 Cryptographic mechanisms including cryptographic protocols and cryptographic algorithms, whereby a cryptographic protocol is a distributed cryptographic algorithm defined by a sequence of steps precisely specifying the actions required of two or more entities to achieve specific security objectives (e.g. cryptographic protocol for key agreement), and whereby a cryptographic algorithm is specifying the steps followed by a single entity to achieve specific security objectives (e.g. cryptographic algorithm for symmetric key encryption). 1.2 [H04L 9/00](#) focuses on cryptographic mechanisms such as encryption schemes, digital signatures, hash functions, random number generation, key management, said cryptographic mechanisms

providing information security such as privacy or confidentiality, data integrity, message authentication, entity authentication, authorization, validation, certification, time-stamping, anonymity, revocation, non-repudiation. 1.3 [H04L 9/00](#) covers also countermeasures against attacks on cryptographic mechanisms. 2. This group does not cover: 2.1 Networking architectures or network communication protocols for securing the traffic flowing through data packet networks and providing secure exchanges among applications communicating through data packet networks, which are covered by [H04L 63/00](#). Attention is drawn to the Note 1. after group [H04L 63/00](#) 2.2 Security arrangements for protecting computers or computer systems against unauthorised activity, which are covered by [G06F 21/00](#)

NOTE

(1) This group covers:

- access to a public data network, such as an IP network, for subscribers, i.e. customers of a network service provider, over a wired network.
- communication of generic types of data between end-user equipments, located typically at the subscriber premises, and an access server, which acts as interface between the access network and the public data network.

(2) This group does not cover:

- wireless access networks, which are covered by [H04W](#)
- optical distribution networks, which are covered by [H04Q 11/0067](#)
- bit-level, or PHY layer, processing of data between digital subscriber line equipments, which is covered by [H04M 11/06](#)
- design of DSL, digital subscriber line, modems, which is covered by [H04M 11/06](#)
- exchange of data related to functionalities of home network appliances between a home network and an external network, which is covered by [H04L 12/2803](#)
- management of WDM parameters in optical multiplex systems, which is covered by [H04J 14/02](#)
- circuit-switched access networks, which are covered by [H04M 7/1205](#)
- access arrangements for providing telephone service in networks other than PSTN/ISDN, which are covered by [H04M 7/0066](#)

(3) In this group the following terms or expressions are used with the meaning indicated:

- ATM means Asynchronous Transfer Mode
- LAN means Local Area Network
- BRAS means Broadband Remote Access Server
- DSLAM means Digital Subscriber Line Access Multiplexer
- MSAN means MultiService Access Node
- DSL means Digital Subscriber Line
- IP means Internet Protocol
- WDM means Wavelength Division Multiplexing
- SDH means Synchronous Digital Hierarchy
- OTN means Optical Transport Network
- PSTN means Public Switched Telephone Network
- ISDN means Integrated Services Digital Network
- TDM means Time-Division Multiplexing
- TDMA means Time Division Multiple Access

NOTE

[N: Notes (1) This group covers: • only communications which fulfil the following two conditions: 1. they are based on packet data; 2. there is real-time or pseudo-real-time temporal association between source and destination, or source and network, or destination and network; • provided that the above two conditions are met, this group covers arrangements relating to 1. the transmission of the multimedia data itself, 2. the user-to-

user, user-to-network, inter-network or intra-network signalling supporting:
a. the establishment of a session for the subsequent transmission of the multimedia data, or b. the maintenance of the session or c. the application services available to the user during the session (unless explicitly excluded in certain cases). (2) This group does not cover: • non-real-time multimedia file transfer, which is covered by [H04L 29/08117](#) . • multimedia store or forward messaging as in e-mail, MMS or the like, which is covered by [H04L 12/58](#) • analogue multimedia streaming, as in analogue television systems, which is covered by [H04N 7/00](#) and [H04N 5/00](#) • bit streaming, i.e. not packet-based, as in ISDN which is covered by [H04Q 11/04](#) • instant messaging, which is covered by [H04L 12/581](#) • any other multimodal data communications which do not meet the conditions of being packet-based and real-time or pseudo-real-time. (3) In this group the following terms or expressions are used with the meaning indicated: • H.323 means International Telecommunication Union Recommendation no. 323, series H, entitled "Packet-based multimedia communications systems" • IP means Internet Protocol • IMS means IP Multimedia Subsystem • ISDN means Integrated Services Digital Network • MGC means Media Gateway Control/Controller • MGCP means Media Gateway Control Protocol • MMS means Multimedia Messaging Service • PBX means Private Branch Exchange • PSTN means Public Switched Telephone Network • QoS means Quality of Service • RTP means Real Time Protocol • RTCP means Real Time Control Protocol • SIP means Session Initiation Protocol • SPAM means unsolicited electronic mail • SPIT means SPAM Prevention in IP Telephony] [N: WARNING [Group [H04L 29/06176](#) or subgroups are not complete pending reorganisation. NOTE

This group covers: (1) Networking arrangements or communication protocols to support networked applications which occur at the abstract network layers 5 to 7 of the OSI layer model. The higher layers constitute the interface between the network and the computer applications that use the network to communicate. (2) Network-specific aspects of client-server applications as well as of networking arrangements supporting networked/distributed applications, e.g. data transport, scheduling. This group also covers specific networked application layer protocols, e.g. FTP, WAP, HTTP. This group does not cover: (1) Distributed applications which are network-agnostic, i.e. distributed information systems for which the network functions are transparent. These field are covered, e.g. by [G06F 9/00](#) , [G06F 17/00](#) . Data switching network provisions in general and the lower layer network functionalities which support application layer provisions are covered by [H04L 12/00](#)]

Project: N/A (H04N)**H04N**

PICTORIAL COMMUNICATION, e.g. TELEVISION (measuring, testing [G01](#); systems for autographic writing, e.g. writing telegraphy, which involve following an outline{ [G08C 21/00](#) }; information storage based on relative movement between record carrier and transducer [G11B](#); coding, decoding or code conversion, in general [H03M](#); broadcast distribution or the recording of use made thereof [H04H](#))

NOTE

1. This subclass covers :

{generation, recording or} transmission of pictures or their transient or permanent reproduction either locally or remotely {and the corresponding electronic image capture and reproduction process employing image representative electric signals,} by methods or arrangements {involving at least one of} the following steps:

step (a): the {electronic acquisition or} scanning of a picture {or scene} , i.e. resolving the whole picture-containing area into individual picture-elements and the derivation of picture-representative electric signals related thereto, simultaneously or in sequence {, e.g. by reading an electronic solid-state image sensor [SSIS] pickup device (e.g. CCD or CMOS image sensor) as electronic image sensor converting optical image information into said electrical signals;]
step (b): the reproduction of the whole picture-containing area {or scene} by the reproduction of individual picture-elements into which the picture is resolved by means of picture representative electric signals derived therefrom, simultaneously or in sequence by converting an electric image signal into light e.g. with an electronic spatial light modulator;

concerning cameras or projectors:

video cameras or TV cameras, e.g. in studios, CCTV cameras, surveillance cameras, camcorders; constructional or mechanical details related to such cameras even when not peculiar to the presence of an electronic image sensor [EIS] e.g. housings; arrangements or methods for image capture using an EIS or image projection using an electronic spatial light modulator [ESLM], i.e.

(i) sensor read-out;

(ii) processing of electrical image signals from the EIS or provided to the ESLM for the generation of respective camera or projector control signals,

for controlling the EIS or its read-out for e.g. exposure, scene selection for auto focussing, or electronic image enhancement or processing of the image signals captured by the EIS, e.g. white balance, electronic motion blur correction, noise suppression [H04N 5/00](#) ,

for controlling the ESLM, e.g. control of the light source based on electronic image signal, light conditioning specially adapted for the ESLM, or

for controlling other camera functions, e.g. exposure, shaking by influencing optical parts of the camera (generation of control signals for focussing for optical elements [G02B 7/28](#) ; using such signals to control focus of particular apparatus, see the subclasses for the apparatus, e.g. [G03B](#), [G03F](#), [H04N](#));

electronic image data storage (data storage in general [G11B](#), [G11C](#)); in-camera image processing e.g. correction of lens distortion, defect pixel correction, noise suppression, removal of motion blur, improving of the dynamic range of the image, in-projector image processing, electronic image data manipulation, e.g. during display or projection (image processing per se [G06T](#));

electronic viewfinders e.g. control of image pickup devices based on information indicated by the electronic viewfinder displaying an image signal generated by the EIS ;

electrical or mechanical aspects of camera modules using electronic image sensors, as well as related constructional details as in webcams or mobile phones (see [H04M 1/0264](#) for mounting structure in mobile phones);

details of projectors peculiar to the use of an ESLM, e.g. dichroic or polarizing arrangements specially adapted for the ESLM (dichroic or polarizing arrangements in general [G02B](#), [G03B](#));

remote control of cameras or projectors peculiar to the EIS or the ESLM, e.g. affecting their operation, or based on a generated image signal;

adaptations peculiar to the use of a EIS or ESLM and/or the display, the transmission, recording or other use of electrical image data and related circuitry, e.g. mounting of EIS or ESLM, integrated cleaning system for the EIS, dust mapping, cooling of the EIS, controlling the operation of the EIS by external input signals;

systems or apparatus wherein the inventive contribution lies in the interaction between features covered in Notes 1 above, concerning cameras and projectors, when interacting with those covered in Note 1 of [G03B](#), e.g. switch-over between electronic motion-blur correction of electronic viewfinder during focussing and optical motion-blur correction of the lens during exposure, electronic motion blur correction of the electronic image sensor based on output signals of additional sensor, or interaction between mechanical shutter and electronic control of the charge accumulation period of the EIS;]

(in group [H04N 1/00](#)) systems for the transmission or the reproduction of arbitrarily composed pictures or patterns in which the local light variations composing a picture are not subject to variation with time, e.g. documents (both written and printed), maps, charts, photographs (other than cinematograph films);
circuits specially designed for dealing with pictorial communication signals, e.g. television signals, as distinct from merely signals of a particular frequency range.

2. This subclass does not cover :

circuits or other parts of systems which form the subject of other subclasses, which are covered by the corresponding subclasses, e.g. [H03C](#), [H03F](#), [H03J](#), [H04B](#), [H04H](#);
systems in which legible alphanumeric or like character forms are analysed according to step (a) of Note (1) to derive an electric signal from which the character is recognised by comparison with stored information, which are covered by subclass [G06K](#);
systems for the direct photographic copying of an original picture in which an electric signal representative of the picture is derived according to the said step (a) of and employed to modify the operation of the system, e.g. to control exposure, which are covered by class [G03](#);
systems for the reproduction according to step (b) of Note (1) of pictures comprising alphanumeric or like character forms but involving the production of the equivalent of a signal which would be derived according to the abovementioned step (a), e.g. by cams, punched card or tape, coded control signal, or other means, which are covered by the subclass for the application, e.g. [G01D](#), [G06T](#), [H04L](#);
systems for the reproduction to the above-mentioned step (b) of pictures comprising alphanumeric or like character forms and involving the generation according to the abovementioned step (a) of picture-representative electric signals from a pre-arranged assembly of such characters, or records thereof, forming an integral part of the systems, which are covered by the subclass for the application, e.g. [B41B](#), [G06K](#), subject to those applications which are covered by this subclass;
printing, duplication or marking methods, or materials or processes therefor, which are covered by the relevant subclasses, e.g. [B41C](#), [B41M](#), [G03C](#), [G03F](#), [G03G](#);
apparatus or methods for taking photographs using light sensitive film for image capture, apparatus/methods for printing, for projecting or viewing images using film stock, photographic film or slides by optical means, e.g. mounting of optical elements, flashes, and their related controls, e.g. exposure, focus, (opto-)mechanical motion blur (anti-shake), cooling, beam shaping;
aspects of apparatus or methods for taking photographs using an electronic image sensor [EIS] for image capture, insofar as they correspond to those of said apparatus methods for taking photographs using light sensitive film, i.e. insofar as not peculiar to the presence of the EIS, e.g. mounting of optical elements or flashes not peculiar to the presence of the EIS, and their related controls insofar as they are not peculiar to the presence or use of the EIS, e.g. exposure, focus, (opto-)mechanical motion blur (anti-shake);
aspects of apparatus or methods for projecting or viewing images using an electronic spatial light modulator [ESLM], insofar as they correspond to those of said apparatus/ methods for projecting or viewing images using film stock, photographic film or slides, i.e. insofar as not peculiar to the presence of the ESLM, e.g. mounting of optical elements not peculiar to the presence of the ESLM, and their related controls not peculiar to the presence of the ESLM, e.g. cooling, beam shaping, optical keystone correction;

(opto-)mechanical image enhancement in printers or projectors, e.g.
keystone correction;
optical viewfinders;
remote control of cameras and projectors insofar not peculiar to the EIS
or ESLM, e.g. not affecting their operation, or being based on a generated
image signal;
optical aspects of camera modules using electronic image sensors and
related constructional details (optical elements or arrangements associated
with solid state imager structures [H01L 27/14625](#));
constructional aspects of projectors, e.g. cooling, beam shaping, light
integrating means not peculiar to the ESLM;]

3. In this subclass, the following expression is used with the meaning indicated:
"television systems" means those systems for the {electronic generation} ,
transmission and reproduction of arbitrarily composed pictures in which
the local light variations composing a picture may change with time, e.g.
natural "live" scenes, {electronic} recordings of such scenes such as
cinematograph films].

4. In this subclass, as in subclass [G03B](#), the following terms are used with the
meaning indicated:

"camera": a device capturing image information represented by light
patterns reflected or emitted from objects, and exposing a light sensitive
film or a main electronic image sensor during a timed exposure, usually
through a photographic lens, and producing an image on a light sensitive
film or an electrical image information signal respectively;

"projector": a device displaying image information by projection of light
patterns, usually through an optical lens, wherein the light patterns are
generated by illuminating an image, e.g. film or slide, or by converting an
electric image signal into an optical signal using an electronic spatial light
modulator;

"electronic image sensor [EIS]": optoelectronic transducer, converting
optical image information into an electrical signal susceptible of being
processed, stored, transmitted or displayed;

"additional sensor": a sensor, other than the main electronic image sensor,
used for controlling a camera;

"electronic spatial light modulator [ESLM]": optoelectronic transducer
converting electric signals representing image information into optical
image information.]

WARNING

The following IPC groups are not used in the CPC scheme. Subject matter
covered by these groups is classified in the following CPC groups :

- [H04N 5/31](#) covered by [G01S 7/52](#), [G01S 15/89](#)
- [H04N 5/761](#) covered by [H04N 5/782](#)
- [H04N 5/7613](#) covered by [H04N 5/782](#)
- [H04N 5/7617](#) covered by [H04N 5/782](#)
- [H04N 5/922](#) covered by [H04N 5/92](#)
- [H04N 5/924](#) covered by [H04N 5/92](#)

	H04N 1/00185	• • • {Image output (for details of particular output arrangements see the relevant sub-class, e.g. B41J , G03B , G09G , G11B)}

- H04N 1/00188 . . . {Printing, e.g. prints or reprints ([H04N 1/0019](#) , [H04N 1/00196](#) take precedence-)}
- H04N 1/00196 . . . {Creation of a photo-montage, e.g. photoalbum ([H04N 1/0019](#) takes precedence-)}
- H04N 1/00204 . . {with a digital computer or a digital computer system, e.g. an internet server (-programmed control between transmitter and receiver or between image input and image output device [H04N 1/32561](#)-)}
- H04N 1/00206 . . {Transmitting or receiving computer data via an image communication device, e.g. a facsimile transceiver ([H04N 1/00236](#) takes precedence-)}
- U H04N 1/00209 . . {Transmitting or receiving image data, e.g. facsimile data, via a computer, e.g. using e-mail, a computer network, the internet, I-fax}
- U H04N 1/00214 . . . {details of transmission}
- H04N 1/00217 {only involving computer data transmission protocols, e.g. SMTP, WAP or HTTP (-communication protocol aspects and techniques in packet data networks [H04L 69/00](#) ; network-specific arrangements or communication protocols supporting networked applications [H04L 67/00](#)-)}
- U H04N 1/00222 . . . {details of image data generation or reproduction, e.g. scan-to-email or network printing}
- H04N 1/00225 {details of image data generation, e.g. scan-to-email or network scanners (-using an image reading device as a local input to a computer [H04N 1/00241](#)-)}
- H04N 1/00228 {Image push arrangements, e.g. from an image reading device to a specific network destination (-push based network services [H04L 67/26](#)-)}
- H04N 1/00233 {details of image data reproduction, e.g. network printing or remote image display (-using an image reproducing device as a local output from a computer [H04N 1/00238](#) ; digital output from computer to printer unit [G06F 3/12](#)-)}
- H04N 1/00236 . . {using an image reading or reproducing device, e.g. a facsimile reader or printer, as a local input to or local output from a computer (-image input to or image output from a computer via a network [H04N 1/00209](#)-)}
- H04N 1/00238 . . . {using an image reproducing device as a local output from a computer (-output via network, e.g. network printing [H04N 1/00233](#)-)}
- H04N 1/00241 . . . {using an image reading device as a local input to a computer (-input via network, e.g. network scanners [H04N 1/00225](#)-)}
- H04N 1/00244 . . {with a server, e.g. an internet server (-fax-servers or the like for store and forward [H04N 1/324](#)-)}
- H04N 1/00249 . . {with a photographic apparatus, e.g. a photographic printer or a projector (photographic apparatus per se [G03B](#), [G03D](#))}
- H04N 1/00267 . . {with a viewing or projecting apparatus, e.g. for reading image information from a film ([H04N 1/00262](#) takes precedence-)}
- H04N 1/00281 . . {with a telecommunication apparatus, e.g. a switched network of teleprinters for the distribution of text-based information, a selective call terminal (-details of transmission [H04N 1/00095](#) ; establishing a communication with one of a facsimile machine or another apparatus sharing a single line [H04N 1/32704](#) ; interfacing cordless telephone terminals with an accessory to increase the functionality of user interface [H04M 1/72527](#)-)}
- U H04N 1/00283 . . {with a television apparatus}
- H04N 1/00286 . . . {with studio circuitry, devices or equipment, e.g. television cameras (-television studio circuitry, devices or equipment per se [H04N 5/222](#)-)}

H04N 1/00291	• • • {with receiver circuitry (-television receiver circuitry per se H04N 5/44-)}
H04N 1/00297	• • • {with a television signal recorder, e.g. for recording facsimile images on a VCR (-motion video recording combined with still video recording in a still video camera H04N 1/212-)}
H04N 1/00302	• • {with a telephonic apparatus, e.g. telephone answering machine or videotex terminal (- H04N 1/00307 takes precedence; telephonic communication H04M-)}
H04N 1/00307	• • {with a mobile telephone apparatus (-constructional features of portable telephone sets H04M 1/0202 ; mobile radio systems H04W 84/00)}
H04N 1/0031	• • {with a selective call apparatus, e.g. a paging device (-selective call receivers H04W 88/022 ; selective call encoders H04W 88/185-)}
H04N 1/00312	• • {with a digital transmission apparatus, e.g. a switched network of teleprinters for the distribution of text-based information, SMS or ISDN device (-transmitting or receiving via a computer e.g. using e-mail, a computer network or the internet H04N 1/00214 ; transmission of digital information H04L-)}
H04N 1/00315	• • {with a radio transmission apparatus (-with a cordless telephone H04N 1/00305 ; systems or arrangements for the transmission of a picture signal specially adapted for transmission via radio H04N 1/00103 ; H04N 1/00307 takes precedence; radio transmission systems H04B 7/00 ; wireless communication networks H04W-)}
H04N 1/0032	• {with a medium handling apparatus, e.g. a sheet sorter (handling thin or filamentary material, e.g. sheets B65H)}
H04N 1/00326	• {with a data reading, recognizing or recording apparatus, e.g. with a bar-code apparatus (-arrangements for the associated working of recording or reproducing apparatus with related apparatus G11B 31/00-)}
U H04N 1/00328	• • {with an apparatus processing optically-read information}
H04N 1/00331	• • • {with an apparatus performing optical character recognition (-arrangements for recognising printed or written characters G06K 9/00-)}
H04N 1/00334	• • • {with an apparatus processing barcodes or the like (-arrangements for sensing record carriers G06K 7/00-)}
H04N 1/00336	• • • {with an apparatus performing pattern recognition, e.g. of a face or a geographic feature (-arrangements for recognising patterns G06K 9/00-)}
H04N 1/00339	• • {with an electronic or magnetic storage medium I/O device (-RFID or the like H04N 1/00342-)}
H04N 1/00342	• • {with a radio frequency tag transmitter or receiver (-storage of additional information in an RFID tag attached to an image bearing paper sheet H04N 1/32138-)}
H04N 1/00344	• {with a management, maintenance, service or repair apparatus (-monitoring H04N 1/00002)}
H04N 1/00347	• {with another still picture apparatus, e.g. hybrid still picture apparatus (-circuits or arrangements for control or supervision between image input and image output device H04N 1/32-)}
H04N 1/0035	• {User-machine interface; Control console (-input or output arrangements for computers G06F 3/00-)}
H04N 1/00352	• {Input means (- H04N 1/00411 takes precedence; input arrangements for computers G06F 3/00-)}
H04N 1/00355	• • {Mark-sheet input (-sensing record carriers G06K 7/00 ; recognising printed or written characters G06K 9/00-)}
U H04N 1/00358	• • • {Type of the scanned marks}

- H04N 1/00366 {Marks in boxes or the like, e.g. crosses or blacking out (~~H04N 1/0036 takes precedence~~)}
- H04N 1/00381 . . {Input by recognition or interpretation of visible user gestures (~~manual input means, e.g. digitisers, writing tablets H04N 1/00392 ; recognition algorithms G06K 9/00335 ; gesture input to computers G06F3/00B8~~)}
- H04N 1/00384 . . {Key input means, e.g. buttons or keypads (~~electromechanical details of key input means in general H01H 13/00~~)}
- H04N 1/00389 . . . {Programmable function keys, e.g. for one-touch operation (~~H04N 1/00387 takes precedence; for automation of transmitter jobs H04N 1/32058~~)}
- H04N 1/00395 . . {Arrangements for reducing operator input (~~input arrangements for job or mode instructions or parameters H04N 1/00962 ; intelligent menu interfaces H04N 1/00437~~)}
- H04N 1/00405 . {Output means (~~output arrangements for computers G06F 3/00~~)}
- U H04N 1/00408 . . {Display of information to the user, e.g. menus}
- H04N 1/00413 {using menus, i.e. presenting the user with a plurality of selectable options (~~H04N 1/00464 takes precedence~~)}
- U H04N 1/00416 {Multi-level menus}
- U H04N 1/00419 {Arrangements for navigating between pages or parts of the menu}
- H04N 1/00427 {using a menu list (~~H04N 1/00421 , H04N 1/00424 , H04N 1/00429 take precedence~~)}
- H04N 1/00477 . . {Indicating status, e.g. of a job (~~for control or supervision between transmitter and receiver or between image input and image output device H04N1/3219~~)}
- H04N 1/0049 . . {providing a visual indication to the user, e.g. using a lamp (~~H04N 1/00408 takes precedence~~)}
- U H04N 1/00519 . {Constructional details not otherwise provided for, e.g. housings, covers}
- H04N 1/00543 . {Allowing easy access, e.g. for maintenance or in case of paper jam (~~H04N 1/00538 takes precedence~~)}
- H04N 1/00557 . {Connection or assembly of components or elements (~~H04N 1/00538 takes precedence~~)}
- H04N 1/00559 . {Mounting or support of components or elements (~~H04N 1/00538 takes precedence~~)}
- U H04N 1/00567 . {Handling of original or reproduction media, e.g. cutting, separating, stacking}
- H04N 1/0057 . {Conveying sheets before or after scanning (~~arrangements for conveying sheets as part of the scanning operation H04N 1/04 and subgroups~~)}
- H04N 1/00588 . . {to the scanning position (~~H04N 1/00572 , H04N 1/00594 take precedence~~)}
- H04N 1/00591 . . {from the scanning position (~~H04N 1/00572 takes precedence~~)}
- H04N 1/00594 . . . {along at least a part of the same path as transport to the scanning position (~~H04N 1/00575 takes precedence~~)}
- H04N 1/00599 . . {Using specific components (details of components related to handling thin or filamentary material B65H)}
- H04N 1/00612 . . . {Path switches (~~H04N 1/00575 , H04N 1/00623 , H04N 1/00633 take precedence~~)}
- H04N 1/00631 . . {Ejecting or stacking (~~H04N 1/00641 takes precedence~~)}
- H04N 1/00633 . . {selectively to one of a plurality of output trays (~~H04N 1/00641 takes precedence~~)}
- H04N 1/00641 . {Sorting, reordering or inverting (postal sorting or sorting individual articles B07C)}

- H04N 1/00649
 - {Control or synchronising different handling operations} (~~H04N 1/00657~~ takes precedence-)
- H04N 1/00652
 - • {Control of feeding speed, e.g. fast feeding to scanning position} (~~H04N 1/00673~~ takes precedence-)
- H04N 1/00655
 - {Apparatus in common for different handling operations} (~~H04N 1/00575~~ , ~~H04N 1/00594~~ , ~~H04N 1/00596~~ , ~~H04N 1/00618~~ take precedence-)

- H04N 1/00941
 - • {Interaction of different applications (~~H04N 1/00949~~ takes precedence; multiprogramming arrangements of computers ~~G06F 9/46~~)}
- H04N 1/00949
 - • {Combining applications, e.g. to create workflows (~~allocation of computer machine resources considering the execution order of a plurality of tasks ~~G06F 9/5038~~~~)}
- H04N 1/00954
 - {Scheduling operations or managing resources (~~H04N 1/0096~~ takes precedence; program initiating or switching ~~G06F 9/48~~ ; allocation of computer resources ~~G06F 9/50~~)}
- H04N 1/00957
 - {Compiling jobs, e.g. for batch processing (~~H04N 1/3208~~ takes precedence; program code compilation ~~G06F 8/41~~)}
- H04N 1/0096
 - {Simultaneous or quasi-simultaneous functioning of a plurality of operations (~~H04N 1/32545~~ takes precedence; multiprogramming arrangements of computers ~~G06F 9/46~~)}
- H04N 1/00962
 - {Input arrangements for operating instructions or parameters, e.g. updating internal software (~~program loading in general ~~G06F 9/445~~ ; network-specific protocols involving the movement of software or configuration parameters ~~H04L 67/34~~~~)}
- H04N 1/00968
 - {by scanning marks on a sheet (~~mark-sheet input means ~~H04N 1/00355~~ ; sensing record carriers ~~G06K 7/00~~~~)}
- H04N 1/024
 - Details of scanning heads; {Means for illuminating the original (~~circuit details thereof ~~H04N 1/40~~~~)}
- U H04N 1/02418
 - {for picture information pick up and reproduction}
- H04N 1/02472
 - • {using a single head, i.e. for pick up and reproduction (~~H04N 1/02436~~ takes precedence)}
- H04N 1/02481
 - {Arrangements for positioning elements within a head (~~H04N 1/02409~~ takes precedence)}
- H04N 1/0249
 - {Arrangements for mounting or supporting elements within a scanning head (~~H04N 1/02481~~ takes precedence)}
- U H04N 1/028
 - for picture information pick-up
- H04N 1/0281
 - • {with means for collecting light from a line or an area of the original and for guiding it to only one or a relatively low number of picture element detectors (~~light-guides per se ~~G02B 6/00~~~~)}
- U H04N 1/02815
 - • {Means for illuminating the original, not specific to a particular type of pick-up head}
- U H04N 1/0282
 - • • {Using a single or a few point light sources, e.g. a laser diode}
- H04N 1/02825
 - • • {in combination with at least one reflector which is fixed in relation to the light source (~~H04N 1/02835~~ and ~~H04N 1/0284~~ take precedence)}
- H04N 1/02835
 - • • {in combination with a light guide, e.g. optical fibre, glass plate (~~light-guides per se ~~G02B 6/00~~~~)}
- U H04N 1/02845
 - • • {using an elongated light source, e.g. tubular lamp, LED array}
- H04N 1/02855
 - • • {in combination with a light guide, e.g. optical fibre, glass plate (~~light-guides per se ~~G02B 6/00~~~~)}
- U H04N 1/02885
 - • • {Means for compensating spatially uneven illumination, e.g. an aperture arrangement}
- H04N 1/0289
 - • • {Light diffusing elements, e.g. plates or filters (~~optical diffusing elements per se ~~G02B 5/02~~~~)}
- H04N 1/02895
 - • • {Additional elements in the illumination means or cooperating with the illumination means, e.g. filters (~~H04N 1/02885~~ takes precedence; optical elements other than lenses per se ~~G02B 5/00~~)}
- H04N 1/029
 - • Heads optically focused on only one picture element at a time (~~H04N 1/0281~~ takes precedence)}

- H04N 1/03

- H04N 1/2392
 - • • {for displaying or indicating, e.g. a condition or state (-details of displaying or indicating means [H04N 1/00405](#)-)}
- H04N 1/31
 - • Mechanical arrangements for picture transmission, e.g. adaptation of clutches, gearing, gear transmissions {contains no documents}
- H04N 1/32
 - Circuits or arrangements for control or supervision between transmitter and receiver {or between image input and image output device (-[H04N 1/38](#) , [H04N 1/387](#) take precedence-)}
- H04N 1/32005
 - • {Automation of particular receiver jobs, e.g. rejecting unwanted calls (-requesting a communication from a transmitter [H04N 1/32771](#) ; with picture signal storage for forwarding messages [H04N 1/32358](#)-)}
- H04N 1/32016
 - • • {according to the caller's identification, e.g. fax number (-[H04N 1/3201](#) takes precedence-)}
- H04N 1/32026
 - • • {Changing the receiver mode of operation, e.g. paper reception to memory reception or vice versa (-[H04N 1/32673](#) takes precedence-)}

- U H04N 1/32037
 - • {Automation of particular transmitter jobs, e.g. multi-address calling, auto-dialing}
- H04N 1/32048
 - • • {Auto-dialling or Auto-calling (~~H04N 1/32053~~ to ~~H04N 1/32074~~ take precedence-)}
- H04N 1/32053
 - • • {Delayed transmission, e.g. to make use of reduced connection rates (~~H04N 1/32074~~ takes precedence-)}
- U H04N 1/32101
 - • {Display, printing, storage or transmission of additional information, e.g. ID code, date and time or title}
- U H04N 1/32106
 - • • {separate from the image data, e.g. in a different computer file}
- H04N 1/32112
 - • • • {in a separate computer file, document page or paper sheet, e.g. a fax cover sheet (~~H04N 1/32122~~ takes precedence-)}
- H04N 1/32117
 - • • • {in a separate transmission or protocol signal prior to or subsequent to the image data transmission, e.g. in digital identification signal (DIS), in non standard setup (NSS) or in non standard field (NSF)(-for mode signalling ~~H04N 1/333-~~)}
- H04N 1/32128
 - • • {attached to the image data, e.g. file header, transmitted message header, information on the same page or in the same computer file as the image (~~for information embedded in the image H04N 1/32144-~~)}
- U H04N 1/32144
 - • • {embedded in the image data, i.e. enclosed or integrated in the image, e.g. watermark, super-imposed logo or stamp}
- U H04N 1/32149
 - • • • {Methods relating to embedding, encoding, decoding, detection or retrieval operations}
- H04N 1/32154
 - • • • • {Transform domain methods (~~H04N 1/32309~~ takes precedence-)}
- H04N 1/32203
 - • • • • {Spatial or amplitude domain methods (~~H04N 1/32309~~ takes precedence-)}
- H04N 1/32208
 - • • • • • {involving changing the magnitude of selected pixels, e.g. overlay of information or super-imposition (~~H04N 1/32219~~ , ~~H04N 1/32224~~ take precedence-)}
- H04N 1/32219
 - • • • • • {involving changing the position of selected pixels, e.g. word shifting, or involving modulating the size of image components, e.g. of characters (~~H04N 1/32224~~ takes precedence-)}
- H04N 1/32229
 - • • • • • {with selective or adaptive application of the additional information, e.g. in selected regions of the image (~~H04N 1/32213~~ takes precedence-)}
- H04N 1/32261
 - • • • • • {in binary data (~~H04N 1/32256~~ takes precedence-)}
- H04N 1/32352
 - • • • {Controlling detectability or arrangements to facilitate detection or retrieval of the embedded information, e.g. using markers (~~for decoding, detection or retrieval operations H04N 1/32149~~ and subgroups take precedence-)}
- H04N 1/32358
 - • {using picture signal storage, e.g. at transmitter (~~H04N 1/17~~ takes precedence-)}
- U H04N 1/324
 - • • {intermediate the transmitter and receiver terminals, e.g. at an exchange}
- H04N 1/32406
 - • • • {in connection with routing or relaying, e.g. using a fax-server or a store-and-forward facility (~~stored and forward data switching systems H04L 12/54-~~)}
- H04N 1/32496
 - • {Changing the task performed, e.g. reading and transmitting, receiving and reproducing, copying (~~facsimile mode changing H04N 1/333-~~)}
- U H04N 1/32609
 - • {Fault detection or counter-measures, e.g. original mis-positioned, shortage of paper}
- U H04N 1/32614
 - • • {related to a single-mode communication, e.g. at the transmitter or at the receiver}

- H04N 1/32619
 - • • {with retransmission (-retransmission after changing the mode [H04N 1/3333](#)-)}
- H04N 1/32646
 - • • {Counter-measures (-inhibiting an operation [H04N 1/00925](#) , interrupting an operation [H04N 1/00915](#)-)}
- H04N 1/32651
 - • • {Indicating or reporting (-details of user-machine interface [H04N 1/0035](#)-)}
- H04N 1/32673
 - • • {Adjusting or controlling an operating mode, e.g. from paper reception to memory reception (-[H04N 1/32678](#) takes precedence; Inhibiting an operation [H04N 1/00925](#)-)}
- H04N 1/32678
 - • • {Performing substitution, e.g. substitute reception or substituting a corrupted line of data (-[H04N 1/32384](#) takes precedence-)}
- H04N 1/32683
 - • • {Preventive counter-measures, e.g. using redundant hardware, or anticipating a fault (-arrangements for keeping a communication line open [H04N 1/32795](#)-)}
- H04N 1/327
 - • Initiating, continuing or ending a single-mode communication; Handshaking therefor{(-[H04N 1/32614](#) takes precedence-)}
- H04N 1/32702
 - • • {using digital control signals (-[H04N 1/32704](#) , [H04N 1/32614](#) , [H04N 1/32771](#) take precedence-)}
- U H04N 1/32704
 - • • {Establishing a communication with one of a facsimile and another telecommunication apparatus sharing a single line}
- U H04N 1/32715
 - • • • {Detecting}
- H04N 1/32736
 - • • • • {a state or mode of the facsimile apparatus (-[H04N 1/32728](#) takes precedence-)}
- U H04N 1/32765
 - • • {Initiating a communication}
- H04N 1/32767
 - • • • {in response to a user operation, e.g. actuating a switch (-[H04N 1/32769](#) and [H04N 1/32771](#) take precedence-)}
- U H04N 1/32771
 - • • • {in response to a request, e.g. for a particular document}
- H04N 1/32776
 - • • • • {using an interactive, user-operated device, e.g. a computer terminal, mobile telephone (-[H04N 1/32782](#) , [H04N 1/32784](#) take precedence-)}
- H04N 1/32786
 - • • {Ending a communication (-[H04N 1/32614](#) takes precedence-)}
- H04N 1/32789
 - • • {Details of handshaking (-[H04N 1/32793](#) , [H04N 1/32795](#) and [H04N 1/32797](#) take precedence-)}
- H04N 1/32797
 - • • {Systems adapted to communicate over more than one channel, e.g. via ISDN (-changing transmission mode according to type of channel [H04N 2201/33364](#) ; multichannel or multilink communication protocols [H04L 69/14](#)-)}
- U H04N 1/333
 - • Mode signalling or mode changing; Handshaking therefor
- H04N 1/33361
 - • • {according to characteristics or the state of the communication line (-[H04N 1/33353](#) and [H04N 2201/33371](#) take precedence-)}
- H04N 1/34
 - • for coin-freed systems; {pay systems (-telephonic metering [H04M 15/00](#) , coin-freed or like apparatus per se [G07F](#)-)}
- H04N 1/38
 - Circuits or arrangements for blanking or otherwise eliminating unwanted parts of pictures (-[H04N 1/387](#) takes precedence-)
- H04N 1/387
 - Composing, repositioning or otherwise {geometrically}modifying originals (-photoelectronic composing of characters [B41B 19/00](#) ; { image data processing or generation, in general [G06T](#) })
- U H04N 1/3872
 - • {Repositioning or masking}
- U H04N 1/3873
 - • • {defined only by a limited number of coordinate points or parameters, e.g. corners, centre; for trimming}
- H04N 1/3875
 - • • • {combined with enlarging or reducing (-enlarging or reducing per se [H04N 1/393](#)-)}

- H04N 1/40
 - Picture signal circuits (~~H04N 1/387~~ takes precedence)
- H04N 1/40025
 - {Circuits exciting or modulating particular heads for reproducing continuous tone value scales (~~H04N 1/401~~ , ~~H04N 1/407~~ take precedence)}
- H04N 1/40056
 - {Circuits for driving or energising particular reading heads or original illumination means (~~H04N 1/401~~ , ~~H04N 1/407~~ take precedence)}
- H04N 1/40068
 - {Modification of image resolution, i.e. determining the values of picture elements at new relative positions (~~H04N 1/3935~~ takes precedence)}
- H04N 1/40093
 - {Modification of content of picture, e.g. retouching (~~geometric modifications H04N 1/387-~~)}
- H04N 1/401
 - Compensating positionally unequal response of the pick-up or reproducing head (~~H04N 1/403~~ takes precedence)
- H04N 1/403
 - Discrimination between the two tones in the picture signal of a two-tone original (~~shaping pulses by limiting or thresholding, in general H03K 5/08-~~)
- U H04N 1/405
 - Halftoning, i.e. converting the picture signal of a continuous-tone original into a corresponding signal showing only two levels

WARNING
[H04N 1/405](#) and sub-groups, except for [H04N 1/4056](#) are not complete, see [H04N 1/40018](#)
- H04N 1/4051
 - {producing a dispersed dots halftone pattern, the dots having substantially the same size (~~different sizes H04N 1/4057-~~)}
- U H04N 1/4055
 - {producing a clustered dots or a size modulated halftone pattern}
- H04N 1/4057
 - {the pattern being a mixture of differently sized sub-patterns, e.g. spots having only a few different diameters (~~multi-toning H04N 1/40087-~~)}
- H04N 1/4058
 - {with details for producing a halftone screen at an oblique angle (~~H04N 1/4056~~ takes precedence)}

- U H04N 3/22 . . . Circuits for controlling dimension, shape or centering of picture on screen
- H04N 3/223 . . . Controlling dimensions (-by maintaining the cathode-ray tube high voltage constant [H04N 3/185](#)-)
- H04N 3/26 . . Modifications of scanning arrangements to improve focusing (-focusing circuits in general [H01J](#)-)
- H04N 3/27 . . Circuits special to multi-standard receivers (-circuitry of multi-standard receivers in general [H04N 5/46](#)-)

H04N 5/00

Details of television systems (-scanning details or combination thereof with generation of supply voltages [H04N 3/00](#) ; specially adapted for colour television [H04N 9/00](#) ; { servers specially adapted for the distribution of content [H04N 21/20](#) ; client devices specially adapted for the reception of or interaction with content [H04N 21/40](#) })

NOTE

Groups [H04N 5/341](#) to [H04N 5/378](#) are based on IPC2012.01

- H04N 5/04 . Synchronising (-for television systems using pulse code modulation [H04N 7/24](#) ; in general [H03L 7/00](#)-)
- U H04N 5/06 . . Generation of synchronising signals
- U H04N 5/067 . . . Arrangements or circuits at the transmitter end
- H04N 5/0675 . . . {for mixing the synchronising signals with the picture signal or mutually (-electrical gates [H03K 17/00](#)-)}
- U H04N 5/08 . . Separation of synchronising signals from picture signals
- H04N 5/10 . . . Separation of line synchronising signal from frame synchronising signal {or vice-versa}
- H04N 5/14 . Picture signal circuitry for video frequency region (-[H04N 5/222](#) takes precedence-)
- H04N 5/144 . . {Movement detection} (-for video coding [H04N 19/503](#) ; analysis of motion in general [G06T 7/20](#)-)}
- H04N 5/145 . . . {Movement estimation} (-for video coding [H04N 19/51](#)-)}
- H04N 5/148 . . {Video amplifiers} (-amplifiers in general [H03F](#)-)}
- H04N 5/21 . . Circuitry for suppressing or minimising disturbance, e.g. moirè, halo,{even if the automatic gain control is involved} (-suppression of noise in television recording [H04N 5/911](#)-)
- H04N 5/211 . . . {Ghost signal cancellation} (-[H04N 5/217](#) takes precedence-)}
- H04N 5/213 . . . Circuitry for suppressing or minimising impulsive noise (-[H04N 5/217](#) takes precedence-)
- H04N 5/217 . . . in picture signal generation {in cameras comprising an electronic image sensor, e.g. digital cameras, TV cameras, video cameras, camcorders, webcams, to be embedded in other devices, e.g. in mobile phones, computers or vehicles} (-noise reduction or noise suppression involving solid-state image sensors [H04N 5/357](#)-)}
- U H04N 5/2173 . . . {in solid-state picture signal generation}

- H04N 5/2175
 - • • • {Suppression of excedentary charges, e.g. blooming, smearing (-within the image sensor [H04N 3/1556](#) , [H04N 3/1568](#)-)}
- U H04N 5/222
 - Studio circuitry; Studio devices; Studio equipment; {Cameras comprising an electronic image sensor, e.g. digital cameras, video cameras, TV cameras, video cameras, camcorders, webcams, camera modules for embedding in other devices e.g. mobile phones, computers or vehicles}
- U H04N 5/2224
 - {related to virtual studio applications}
- H04N 5/2226
 - • {Determination of depth image, e.g. for foreground/background separation (-determining depth by image analysis in general [G06T 7/0051](#) ; segmentation by image analysis in general [G06T 7/0079](#)-)}
- H04N 5/225
 - • Television cameras; {Cameras comprising an electronic image sensor, e.g. digital cameras, video cameras, video cameras, camcorders, webcams, camera modules for embedding in other devices e.g. mobile phones, computers or vehicles (-optical systems [G02B](#); associated working of recording or reproducing apparatus with TV camera or receiver in which the television signal is not significantly involved [G11B 31/006](#) ; tubes [H01J](#)-)}
- H04N 5/2251
 - • {Constructional details (-arrangement comprising a plurality of cameras [H04N 5/247](#) ; stereoscopic cameras having a single image sensor [H04N 13/0207](#)-)}
- H04N 5/2257
 - • {Mechanical and electrical details of cameras or camera modules for embedding in other devices (-mounting structure in mobile phone see [H04M 1/0264](#) ; optical details [G03B](#)-)}
- H04N 5/2258
 - • {Cameras using two or more image sensors, e.g. a CMOS sensor for video and a CCD for still image (-cameras having one image sensor for each colour [H04N 9/045](#) , [H04N 9/09](#)-)}
- H04N 5/2259
 - • {Means for changing the camera field of view without moving the camera body, e.g. nutating or panning optics or image-sensors (-picture signal generation using shifting image-sensors [H04N 5/349](#) ; varying magnification e.g. angle of view for cameras using only optical means [G03B](#)-)}
- H04N 5/232
 - • • Devices for controlling television cameras, e.g. remote control; {Control of cameras comprising an electronic image sensor, e.g. digital cameras, video cameras, TV cameras, video cameras, camcorders, webcams, camera modules for embedding in e.g. mobile phones, computers or vehicles} (-[H04N 5/235](#) takes precedence; { varying magnification for cameras, e.g. angle of view, by optical means only [G02B 7/00](#) }, [G03B](#))
- H04N 5/23203
 - • • {Remote control signaling for cameras or for parts of camera, e.g. between main body and part of camera (-distributing sync-signals to television cameras [H04N 5/0733](#)-)}
- H04N 5/23209
 - • • • {for interchangeable parts of camera involving control signals based on electric image signals provided by an electronic image sensor (-interchangeably mounting lenses on cameras not involving a control signal based on electric image signals provided by a main electronic image sensor [G03B 17/14](#)-)}
- H04N 5/23212
 - • • {Focusing based on image signal provided by the electronic image sensor (-generation of focusing signals in general [G02B 7/28](#)-)}
- H04N 5/23219
 - • • {Control of camera operation based on recognized human faces, facial parts, facial expressions or other parts of the human body (-face recognition per se [G06K 9/00221](#)-)}
- H04N 5/23229
 - • • {comprising further processing of the captured image without influencing the image pickup process (image processing in general [G06T](#))}
- H04N 5/23232
 - • • • {by using more than one image in order to influence resolution, frame rate or aspect ratio (-providing high dynamic range image [H04N 5/2355](#)-)}

- H04N 5/23238 . . . {Control of image capture or reproduction to achieve a very large field of view, e.g. panorama (panoramic or widescreen photography [G03B 27/00](#))}
- H04N 5/23241 . . . {Control of camera operation in relation to power supply, e.g. by reducing power consumption of electronic image sensor or image processor or by checking or displaying battery state (details of energy supply or management for digital still cameras not peculiar to the electronic image sensor [G03B 2217/007](#))}
- H04N 5/23248 . . . {for stable pick-up of the scene in spite of camera body vibration (image-sensor selective scanning per se [H04N 3/1562](#))}
- U H04N 5/23251 {Motion detection}
- H04N 5/23254 {based on the image signal (analysis of motion by image processing in general [G06T 7/20](#))}
- H04N 5/23258 {based on additional sensors (cameras when not peculiar to the use or presence of the EIS [G03B 2217/005](#))}
- U H04N 5/23264 {Vibration or motion blur correction}
- H04N 5/2327 {performed by controlling the image sensor readout, e.g. by controlling the integration time (controlling the image sensor readout in general [H04N 5/345](#) , [H04N 5/353](#))}
- H04N 5/23274 {by controlling the scanning position, e.g. windowing (windowed readout of image sensor in general [H04N 5/3454](#))}
- H04N 5/2328 {performed by mechanical compensation (stabilization for imaging systems using optical elements in general s [G02B 27/646](#) ; cameras when not peculiar to the use or presence of the EIS [G03B 2205/0007](#))}
- H04N 5/23296 . . . {Control of means for changing angle of the field of view, e.g. optical zoom objective, electronic zooming or combined use of optical and electronic zooming (optical details of zoom lenses [G02B 15/14](#) ; optical zooming only for cameras [G03B 5/00](#))}
- H04N 5/235 . . . Circuitry (or methods) for compensating for variation in the brightness of the object {based on an electric image signals provided by an electronic image sensor (exposure control for film cameras or cameras using an additional sensor [G03B 7/00](#))}
- H04N 5/2351 . . . {Circuitry for evaluating the brightness variations of the object (within the image sensor [H04N 5/351](#) ; photometry in general [G01J 1/00](#))}
- H04N 5/2353 . . . {by influencing the exposure time, e.g. shutter ([H04N 5/2352](#) takes precedence; within the image sensor [H04N 5/353](#))}
- H04N 5/2354 . . . {by influencing the scene brightness using illuminating means ([H04N 5/2352](#) takes precedence)}
- H04N 5/2355 . . . {by increasing the dynamic range of the final image compared to the dynamic range of the electronic image sensor , e.g. by adding correct exposed portions of short and long exposed images (image enhancement in general using more than one image [G06T 5/50](#))}
- H04N 5/2358 . . . {by influencing at least one of the pick-up tube voltages ([H04N 5/2352](#) takes precedence)}
- H04N 5/238 . . . by influencing the optical part of the camera, (e.g. diaphragm, intensifier, fibre bundle ([H04N 5/2352](#) takes precedence)}
- H04N 5/243 . . . by influencing the picture signal, (e.g. signal amplitude gain control ([H04N 5/2352](#) takes precedence)}
- H04N 5/247 . . . Arrangements of television cameras {(constructional details of cameras [H04N 5/2251](#) ; stereoscopic picture signal generators [H04N 13/0239](#) ; [H04N 13/0242](#))}

- H04N 5/253
 - • Picture signal generating by scanning motion picture films or slide opaques, e.g. for telecine (scanning details therefor [H04N 3/36](#) ; { standard conversion therefor [H04N 7/0112](#) })
- H04N 5/257
 - • Picture signal generators using flying-spot scanners (-[H04N 5/253](#) takes precedence-)
- U H04N 5/262
 - • Studio circuits, e.g. for mixing, switching-over, change of character of image, other special effect ;{Cameras specially adapted for the electronic generation of special effects}
- H04N 5/2625
 - • • {for obtaining an image which is composed of images from a temporal image sequence, e.g. for a stroboscopic effect (sequence generated by event triggered capturing [H04N 7/188](#))}
- H04N 5/2627
 - • • • {for providing spin image effect, 3D stop motion effect or temporal freeze effect (-2D image animation in general [G06T 13/80](#))}
- H04N 5/268
 - • • Signal distribution or switching (-for broadcasting [H04H 20/00](#) -)
- U H04N 5/272
 - • • Means for inserting a foreground image in a background image, i.e. inlay, outlay
- H04N 5/2723
 - • • • {Insertion of virtual advertisement; Replacing advertisements physical present in the scene by virtual advertisement (-data processing systems or methods specially adapted for marketing [G06Q 30/02](#))}
- H04N 5/30
 - Transforming light or analogous information into electric information (-[H04N 5/222](#) takes precedence; scanning details [H04N 3/00](#) ; light transforming elements [H01J](#) , [H01L](#) -)
- H04N 5/32
 - • Transforming X-rays(-image transformers [H01J 31/00](#) -)
- H04N 5/335
 - • using solid-state image sensors [SSIS](-[H04N 5/32](#) , [H04N 5/33](#) take precedence-)

NOTE

In this group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place
Groups [H04N 5/341](#) to [H04N 5/378](#) are based on IPC2012.01

- U H04N 5/341
 - • • Extracting pixel data from an image sensor by controlling scanning circuits, e.g. by modifying the number of pixels having been sampled or to be sampled
- H04N 5/3415
 - • • • {for increasing the field of view by combining the outputs of a plurality of sensors, e.g. panoramic imaging (-linear arrays using abutted sensors [H04N 5/3692](#))}
- H04N 5/351
 - • • Control of the SSIS depending on the scene, e.g. brightness or motion in the scene{(-circuitry for evaluating the brightness variations of the object [H04N 5/2351](#) -)}
- H04N 5/353
 - • • • Control of the integration time{(-circuitry for compensating for variation in the brightness of the object by influencing the exposure time [H04N 5/2353](#))}
- U H04N 5/355
 - • • • Control of the dynamic range
- H04N 5/35536
 - • • • • {involving multiple exposures (-combination of exposures for increasing the dynamic range [H04N 5/235](#))}
- U H04N 5/357
 - • • Noise processing, e.g. detecting, correcting, reducing or removing noise
- H04N 5/3572
 - • • • {the noise resulting only from the lens unit, e.g. flare, shading, vignetting or "cos4"(-suppressing or minimizing noise in picture signal generation [H04N 5/217](#) -)}
- H04N 5/363
 - • • • applied to reset noise, e.g. KTC noise {related to CMOS structures}
- U H04N 5/369
 - • • SSIS architecture; Circuitry associated therewith

- H04N 5/372
 - • • Charge-coupled device [CCD] sensors; Time delay and integration [TDI] registers or shift registers specially adapted for SSIS{(-charge coupled imager structure [H01L 27/148](#)-)}
- H04N 5/374
 - • • Addressed sensors, e.g. MOS or CMOS sensors{(-MOS imager structure [H01L 27/14643](#)-)}
- U H04N 5/3745
 - • • • having additional components embedded within a pixel or connected to a group of pixels within a sensor matrix, e.g. memories, A/D converters, pixel amplifiers, shared circuits or shared components
- H04N 5/37452
 - • • • • {comprising additional storage means (-by controlling the amount of charges storable in the pixel [H04N 5/3559](#)-)}
- H04N 5/38
 - Transmitter circuitry{(-[H04N 5/14](#) takes precedence-)}
- H04N 5/40
 - • Modulation circuits{(-in general [H03C 1/00](#) , [H03C 3/00](#) , [H03C 5/00](#)-)}
- H04N 5/44
 - Receiver circuitry{(-[H04N 5/14](#) takes precedence-)}
- H04N 5/4403
 - • {User interfaces for controlling a television receiver or set top box [STB] through a remote control device, e.g. graphical user interfaces (GUI); Remote control devices therefor{(-user interfaces for controlling a tuning device of a television receiver through a remote control [H03J 9/00](#) ; constructive details of casings for the remote control device [H01H 9/0235](#) ; remote control of peripheral devices connected to a television receiver through the remote control device of the television receiver [H04B 1/205](#) ; remote control devices in general [G08C](#)-)}
- U H04N 2005/4405
 - • • {Hardware details of remote control devices}
- H04N 2005/4425
 - • • • {Remote control device emulator integrated into a non-television apparatus, e.g. a PDA, media center or smart toy{(-remote control device for a television receiver integrated into a mobile phone [H04M 1/72533](#)-)}
- H04N 5/4446
 - • {IF amplifier circuits specially adapted for B&W TV{(-RF amplifiers in general [H03F 3/189](#)-)}
- H04N 5/445
 - • for displaying additional information{(-[H04N 5/50](#) takes precedence-)}
- H04N 5/44504
 - • • {Circuit details of the additional information generator, e.g. details of the character or graphics signal generator, overlay mixing circuits{(-graphics pattern generators for visual indicators [G09G 5/36](#) ; generation of individual character patterns for visual indicators [G09G 5/24](#)-)}
- H04N 5/44543
 - • • {Menu-type displays{(-[H04N 5/44582](#) , [H04N 5/44591](#) take precedence-)}
- H04N 5/455
 - • Demodulation-circuits{(-demodulation in general [H03D](#)-)}
- H04N 5/46
 - • for receiving on more than one standard at will{(-deflecting circuits of multi-standard receivers [H04N 3/27](#)-)}
- H04N 5/50
 - • Tuning indicators; Automatic tuning control{(-tuning control in general [H03J](#)-)}
- H04N 5/52
 - • Automatic gain control{(-in general [H03G](#)-)}
- H04N 5/54
 - • • for positively-modulated picture signals{(-[H04N 5/53](#) takes precedence-)}
- H04N 5/56
 - • • for negatively-modulated picture signals{(-[H04N 5/53](#) takes precedence-)}
- H04N 5/60
 - • for the sound signals{(-for silent tuning, i.e. muting [H04N 5/505](#)-)}
- H04N 5/607
 - • • {for more than one sound signal, e.g. stereo, multilanguages{(-[H04N 5/602](#) takes precedence-)}
- H04N 5/62
 - • • Inter-carrier circuits, i.e. heterodyning sound and vision carriers{(-[H04N 5/607](#) takes precedence-)}
- H04N 5/63
 - Generation or supply of power specially adapted for television receivers{(-generation of supply voltages in combination with electron beam deflecting [H04N 3/18](#) ; regulating of voltage or current in general [G05F](#) ; transformers [H01F](#) ; supplying or distributing electric power, in general [H02J](#) ; static converters [H02M](#)-)}

- H04N 5/64
 - Constructional details of receivers, e.g. cabinets, dust covers (furniture aspects [A47B](#) , e.g. [A47B 81/06](#)-)
- H04N 5/66
 - Transforming electric information into light information (scanning details [H04N 3/00](#) ; { electro- or magneto optic devices [G02F 1/00](#) ; CRT's [H01J](#) })
- H04N 5/68
 - • Circuit details for cathode-ray display tubes (deviation circuits [H04N 3/16](#) , [H03K 4/00](#)-)
- H04N 5/72
 - Modifying the appearance of television pictures by optical filters or diffusing screens (optical filters or diffusing screens per se [G02B 5/00](#)-)
- H04N 5/74
 - Projection arrangements for image reproduction, e.g. using eidophor (optical systems in general [G02B](#))

WARNING
[H04N 5/74](#) and subgroups are no longer used for the classification of new documents as from October 1, 2008. The backlog is being continuously reclassified to subgroups of [H04N 9/31](#)
- H04N 5/76
 - Television signal recording (diagnosis, testing or measuring for television signal recorders [H04N 17/06](#) ; recording in connection with measuring [G01D](#) ; information storage {in which the television signal is not involved, driving, starting, stopping, head switching, editing, indexing} in general [G11](#) , e.g. [G11B](#)-)
- H04N 5/7605
 - • {on discs or drums (H04N 5/781 , [H04N 5/805](#) , [H04N 5/83](#) , [H04N 5/85](#) take precedence-)}
- H04N 5/765
 - • Interface circuits between an apparatus for recording and another apparatus (associated working of recording or reproducing apparatus with a television camera or receiver in which the television signal is not significantly involved [G11B 31/00](#)-)
- H04N 5/78
 - • using magnetic recording (H04N 5/91 takes precedence; { mechanical details in so far as non typical for television circuitry [G11B 5/00](#) })
- H04N 5/7805
 - • • {Recording or playback not using inductive heads, e.g. magneto-optical, thermomagnetic, magnetostrictive, galvanomagnetic (electrostatic recording [H04N 5/80](#) , photographic recording [H04N 5/84](#)-)}
- H04N 5/80
 - • using electrostatic recording (H04N 5/91 takes precedence-)
- H04N 5/84
 - • using optical recording (H04N 5/80 , [H04N 5/89](#) , [H04N 5/91](#) take precedence-)
- H04N 5/87
 - • • Producing a motion picture film from a television signal (scanning of motion picture films for television signal generation [H04N 3/36](#) ; television signal generation by scanning a motion picture film [H04N 5/253](#) [H04N 9/11](#) ; { standard conversion therefor [H04N 7/0112](#) })
- H04N 5/89
 - • using holographic recording (H04N 5/91 takes precedence-)

WARNING
 Not complete, see also [H04N 5/76](#) , [H04N 5/7605](#) , [H04N 5/84](#) , [H04N 5/85](#)
- H04N 5/903
 - • using variable electrical capacitive recording (H04N 5/91 takes precedence-)

WARNING
 Not complete, see also [H04N 5/7605](#)
- H04N 5/907
 - • using static stores, e.g. storage tubes, semiconductor memories (H04N 5/91 takes precedence; based on relative movement between record carrier and transducer [H04N 5/78](#) to [H04N 5/903](#)-)
- H04N 5/91
 - • Television signal processing therefor (of colour signals [H04N 9/79](#)-)
- H04N 5/911
 - • • for the suppression of noise (H04N 5/932 takes precedence-)

	H04N 5/913	<ul style="list-style-type: none"> • • • for scrambling; {for copy protection} (-scrambling of a television signal for transmission H04N 7/167-)
	H04N 5/917	<ul style="list-style-type: none"> • • • for bandwidth reduction (-bandwidth reduction H04N 7/12 ; using pulse code modulation H04N 7/24-)

H04N 21/00

Selective content distribution, e.g. interactive television, VOD [Video On Demand](-broadcast communication [H04H](#) ; arrangements, apparatus, circuits or systems for communication control or processing being characterised by a protocol [H04L 29/06](#) ; { broadcast or conference over packet-switching networks [H04L 12/18](#) , } real-time bi-directional transmission of motion video data [H04N 7/14](#)-)

NOTE

1. This group covers : • interactive video distribution processes, systems, or elements thereof, which are characterised by point-to-multipoint system configurations, and which are mainly used for motion video data unidirectional distribution or delivery resulting from interactions between systems operators, e.g. access or service providers, or users e.g. subscribers, and system elements. • such systems include dedicated communication systems, such as television distribution systems, which primarily distribute or deliver motion video data in the manner indicated, which may, in addition, provide a framework for further, diverse data communications or services in either unidirectional or bi-directional form. However, video will occupy most of the downlink bandwidth in the distribution process. • typically, system operators interface with transmitter-side elements or users' interface with receiver-side elements in order to facilitate, through interaction with such elements, the dynamic control of data processing or data flow at various points in the system. This interaction is typically occasional or intermittent in nature. • processes, systems or elements thereof specially adapted to the generation, distribution and processing of data, which is either associated with video content, e.g. metadata, ratings, or related to the user or his environment and which has been actively or passively gathered. This data is either used to facilitate interaction or to alter or target the content. 2. In this main group, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place 3. In this main group, the following terms and expressions are used with the meaning indicated:

additional data - designates still pictures, textual, graphical or executable data such as software. It is used to convey supplemental information and can be generated prior to or during the distribution process itself, e.g. metadata, keys. content designates video or audio streams, which may be combined with additional data. Video data will always be present and occupy most of the downlink bandwidth in the distribution process

server - designates an apparatus designed for adapting the content received from the content provider to the distribution network. It also manages the distribution to client devices or intermediate components over a network. Further servers may also be present for gathering or generating additional data, e.g. rights management server

additional data server - designates a server, which sole purpose is the distribution or management of additional data. It is not in charge of the distribution of video or audio data

client - designates an apparatus such as a TV receiver, a set-top-box, a PC-TV, a mobile appliance (e.g. mobile phone or receiver in a vehicle), for receiving video, audio and possibly additional data from one or several servers or intermediate components via a network for further processing, storing or displaying. It can also transmit this data on a home-based local network to further devices, e.g. a home server transmitting video to PCs and set-top-boxes within a home.

local network - pertains to a restricted area, e.g. a home or a vehicle, and designates the link between a client and its peripheral devices

network - is to be distinguished from "local network": "network" designates the link between the server and the clients, or between the server and the intermediate components, or between the intermediate components and the clients, or between remotely located clients

distribution - encompasses broadcasting, multicasting and unicasting techniques for transmitting content from one or more sources to one or more receiving stations. The distribution follows a request by a receiving station to the source, e.g. VOD or from a customization of the content by the source, e.g. targeting advertisements to a demographic group in a unidirectional or bidirectional system. Additionally, distribution encompasses techniques where the client acts as a source and another client acts as a receiving station, e.g. a peer-to-peer system for sharing video among client devices

end-user - designates a physical person, e.g. a TV viewer, who consumes the content using the client device. He is the final recipient of the content distributed by the server

interaction - covers actions occurring between or among two or more objects that have an effect upon one another, wherein objects comprise users, system operators, system elements, or content. The user may interact with content locally at the client device, e.g. for requesting additional data stored within the client device. The user may interact with content remotely through a server e.g. for VOD playback control or for uploading video to a server. The client device may interact with the content e.g. selecting content based upon the user profile. The client device may interact with a server using a return channel, e.g. for authenticating client or uploading client hardware capabilities. The server may interact with a client device, e.g. to force a client to tune to an advertisement channel

upstream - designates the direction of data flow towards the source, e.g. a server receiving a request via a mobile phone network

downstream - designates the direction of data flow towards a client, e.g. a client receiving data originating from a server elementary stream An elementary stream (ES) as defined by the MPEG system layer designates the output of an audio or video encoder

H04T

INDEXING SCHEME RELATING TO STANDARDS FOR ELECTRIC COMMUNICATION TECHNIQUE (CLASS [H04](#))NOTES

This scheme constitutes an non-associated internal scheme for indexing exclusively documents issued by standardisation bodies (herein called standards) for electric communication technique ([H04](#)).

As standardisation bodies organize their documents in different ways, the present scheme is subdivided into main groups related to a particular CPC range to allow different indexing approaches.

Scheme index:

Wireless communication standards	H04T 2001/00	-
H04T2001/999		
Standards related to data switching networks in general	H04T 2012/00	-
H04T2012/99		
Internet standards	H04T 2029/00	-
H04T2029/99		

H04T 2029/00

Standards related to data transmission protocols not covered by any of the codes [H04T 2001/00](#) to [H04T 2012/00](#)

Project: N/A (H04W)

H04W

WIRELESS COMMUNICATIONS NETWORKS (-radio transmission systems [H04B 7/00](#) ; transmission systems using electromagnetic waves other than radio waves, e.g. light, infrared [H04B 10/00](#) ; communication systems using wireless extensions, i.e. wireless links without selective communication, e.g. cordless telephones [H04M 1/72](#) ; broadcast communication [H04H](#)-)

NOTES

This subclass covers :

communication networks for selectively establishing one or a plurality of wireless communication links between a desired number of users or between users and network equipment, for the purpose of transferring information via these wireless communication links;
 networks deploying an infrastructure for mobility management of wireless users connected thereto, e.g. cellular networks, WLAN [Wireless Local Area Network], wireless access networks, e.g. WLL [Wireless Local Loop] or self-organising wireless communication networks, e.g. ad hoc networks;
 planning or deployment specially adapted for the above-mentioned wireless networks;
 services or facilities specially adapted for the above-mentioned wireless networks;
 arrangements or techniques specially adapted for the operation of the above-mentioned wireless networks.

This subclass does not cover :

communication systems using wireless extensions, i.e. wireless links without selective communication, e.g. cordless telephones, which are covered by group [H04M 1/72](#) ;

broadcast communication, which is covered by subclass [H04H](#).

In this subclass, at each hierarchical level, in the absence of an indication to the contrary, classification is made in the first appropriate place.

H04W 4/00

{Mobile application}services or facilities specially adapted for wireless communication networks{(-network arrangements or communication protocols for networked applications [H04L 67/00](#) ; network arrangements or protocols for real-time communications [H04L 65/00](#) ; network arrangements or network protocols for addressing or naming [H04L 61/00](#) ; application independent communication protocol aspects and techniques in packet data networks [H04L 69/00](#) ; network architectures or network communication protocols for network security [H04L 63/00](#) ; wireless network security [H04W 12/00](#) ; message switching systems [H04L 12/58](#) ; arrangements for broadcast or conference [H04L 12/18](#) ; telephonic communication, substation extension arrangements, cordless telephones, portable communication terminals with improved user interface to control a main telephone operation mode or to indicate the communication status [H04M 1/72522](#) ; automatic or semi-automatic exchanges for telephonic communication - systems providing special services or facilities to subscribers [H04M 3/42](#)-)}

NOTE

1. This groups covers mobile application services or application service signalling for communication over wireless networks. 2. This group focuses on application services specially adapted for wireless networks or adjusted to the wireless environment

H04W 4/001

- {Provisioning or reconfiguring application services e.g. OMA DM (-network management [H04L 12/24](#) ; network arrangements or communication protocols for networked applications involving the movement of software or configuration parameters, e.g. applets [H04L 67/34](#) ; program loading or initiating [G06F 9/445](#) ; mobile agents [G06F 9/4862](#)-)}

H04W 4/003

- {Mobile application execution environments for application services, e.g. communicating with application store or appstore servers in the application service network and vice versa, 3GPP SIM Application toolkit [SAT], 3GPP OSA or 3GPP MEXE (-processing of user or subscriber data at user equipment or user record carrier [H04W 8/183](#)-)}

H04W 4/005

- {for Machine-to-Machine communication [M2M, MTC], e.g. 3GPP M2M, OMA M2M, 3GPP MTC or Wireless Sensor Networks [WSN](-self-organizing networks [H04W 84/18](#) ; network arrangements or communication protocols for networked applications adapted for proprietary or special purpose networking environments, e.g. medical networks, sensor networks, networks in a car, remote metering networks [H04L 67/12](#) ; mechanical means for transferring the output of a sensing member [G01D 5/00](#)-)}

H04W 4/008

- {using short range communication, e.g. NFC, RFID or PAN (-telephonic substation extension arrangements interfacing with an external accessory using a two-way short-range wireless interface [H04M 1/7253](#) ; mechanical means for transferring the output of a sensing member [G01D 5/00](#); near-field transmission systems [H04B 5/00](#)-)}

H04W 4/02	<ul style="list-style-type: none"> • {Mobile application}Services making use of the location of users or terminals{, e.g. OMA SUPL, OMA MLP or 3GPP LCS} (-mobility data transfer H04W 8/08 ; access restriction based on user location or mobility data H04W 48/04 ; registration, e.g. affiliation to network, de-registration, e.g. terminating affiliation H04W 60/00 ; locating users or terminals for network management purpose H04W 64/00 ; navigation or navigational instruments G01C 21/00 ; radio direction-finding, radio navigation, determining distance or velocity by use of radio waves, locating or presence-detecting by use of the reflection or re-radiation of radio waves or analogous arrangements using other waves G01S-)

PRINTED CIRCUITS; CASINGS OR CONSTRUCTIONAL DETAILS OF ELECTRIC APPARATUS; MANUFACTURE OF ASSEMBLAGES OF ELECTRICAL COMPONENTS (-details of instruments or comparable details of other apparatus not otherwise provided for [G12B](#); thin-film or thick-film circuits [H01L 27/01](#) , [H01L 27/13](#) ; non-printed means for electric connections to or between printed circuits, {electric connections or line connectors, apparatus or processes for manufacturing, assembling, maintaining or repairing such connections or connectors}[H01R](#); casings for, or constructional details of, particular types of apparatus, see the relevant subclasses; processes involving only a single technical art, e.g. heating, spraying, for which provision exists elsewhere, see the relevant classes)

NOTES

This subclass covers:

- combinations of a radio or television receiver with apparatus having a different main function;- printed circuits structurally associated with non-printed electric components; - {printed connectors (non printed connectors [H01R](#))}

In this subclass, the following expression is used with the meaning indicated:

- "printed circuits" covers all kinds of mechanical constructions of circuits that consist of an insulating base or support carrying the conductor and are combined structurally with the conductor throughout their length, especially in a two-dimensional plane, the conductors of which are secured to the base in a non-dismountable manner, and also covers the processes or apparatus for manufacturing such constructions, e.g. forming the circuit by mechanical or chemical treatment of a conductive foil, paste, or film on an insulating support.

H05K 1/00

Printed circuits (-assemblies of a plurality of individual semiconductor or solid state devices [H01L 25/00](#) ; devices consisting of a plurality of solid state components formed in or on a common substrate, e.g. integrated circuits, thin-film or thick-film circuits, [H01L 27/00](#)-)

- N Y10T 16/5326 . . . having adjustable spacer between leaf and hinged member [e.g., shim]
- N Y10T 16/5327 . . . Adjustable along or parallel to hinge axis
- N Y10T 16/5329 . . . having interdigitated surfaces or slot for hinge-to-member fastener
- N Y10T 16/533 . . having cover
- N Y10T 16/5335 . . . Leaf cover
- N Y10T 16/534 . . having clamp for attaching hinge to hinged member
- N Y10T 16/5345 . . . Circumferential clamp
- N Y10T 16/535 . . having means to facilitate assembly and disassembly of hinge sections to join or disjoin hinged members
- N Y10T 16/5353 . . . Resiliently biased hinge
- N Y10T 16/5355 having helical spring along hinge axis
- N Y10T 16/5357 . . . Resiliently biased retaining means
- N Y10T 16/5358 having discrete latch and spring to slide or pivot latch
- N Y10T 16/5359 Discrete retaining means for pivotal contacting surfaces
- N Y10T 16/536 . . . Separation of pivotal contacting surfaces
- N Y10T 16/53605 having movable or removable connector
- N Y10T 16/53607 Pintle removable from remainder of hinge
- N Y10T 16/536075 and additional connector for pintle or separate pintle sections
- N Y10T 16/53608 Screw-threaded connector
- N Y10T 16/5361 Axially shifting hinge sections
- N Y10T 16/53613 At specific angular orientation of hinge sections
- N Y10T 16/53615 Hook and pin
- N Y10T 16/5362 Hook in aperture
- N Y10T 16/53625 Hook to hook
- N Y10T 16/5363 . . . and discrete movable or removable connector to fasten one hinge section to another
- N Y10T 16/5367 . . . by relatively sliding connection [e.g., dovetail]
- N Y10T 16/5369 including receiving connector attachable to hinged member
- N Y10T 16/537 . . having means to reduce friction between hinge parts
- N Y10T 16/5373 . . . by fluid lubricant
- N Y10T 16/5377 . . . Ball or roller bearing
- N Y10T 16/5379 Circularly distributed balls or rollers
- N Y10T 16/538 . . Resiliently biased hinge
- N Y10T 16/5381 . . . including means to render spring ineffective through all or a portion of swing
- N Y10T 16/53815 comprising manipulatable element or portion
- N Y10T 16/5382 . . . Biased from either direction toward neutral position [e.g., double acting]
- N Y10T 16/53822 Helical spring transverse to hinge axis
- N Y10T 16/53824 Plural hinge axes [e.g., multiple pintle]
- N Y10T 16/53825 and barrels for helical springs on separate axes
- N Y10T 16/53826 Resiliently biased rolling or sliding cam surface
- N Y10T 16/53828 by helical spring along hinge axis
- N Y10T 16/5383 . . . having transverse helical spring or elastic strip
- N Y10T 16/53832 Plural hinge axes [e.g., multiple pintle]
- N Y10T 16/53833 Four or more axes

- N Y10T 16/53834 to counterbalance weight of hinged member [e.g., closure biased to open position]
- N Y10T 16/53835 including pivoted coaxial spring retaining bar
- N Y10T 16/53836 Over-center spring or linkage travel [e.g., "holdback hinge"]
- N Y10T 16/53838 having means to hold hinged members against pivotal movement about hinge axis [i.e., catch]
- N Y10T 16/5384 . . . Over-center spring or linkage travel [e.g., "holdback hinge"]
- N Y10T 16/53843 Plural hinge axes
- N Y10T 16/53845 Coil spring having axis along or parallel to hinge axis
- N Y10T 16/53848 including camming or sliding surface to deflect spring perpendicularly to the hinge axis
- N Y10T 16/5385 . . . having means to hold hinged members against pivotal movement about hinge axis [e.g., catch]
- N Y10T 16/5386 . . . having force adjustment
- N Y10T 16/53862 Rotatable spring-engaging collar
- N Y10T 16/538627 having detention aperture or protuberance
- N Y10T 16/538633 having tool-receiving aperture
- N Y10T 16/53864 . . . Plural hinge axes [e.g., multiple pintle]
- N Y10T 16/5387 . . . having axially biased camming surface
- N Y10T 16/5388 . . . Coil
- N Y10T 16/53883 Plural coils
- N Y10T 16/53885 to counterbalance weight of hinged member [e.g., horizontal closure biased to open position]
- N Y10T 16/53888 On pintle
- N Y10T 16/5389 . . . torsion spring
- N Y10T 16/539 . . . Gravitating hinge having vertical axis
- N Y10T 16/5393 . . . having lift rod
- N Y10T 16/5395 . . . having plural spaced hinge axes
- N Y10T 16/5398 . . . including cam surface and follower
- N Y10T 16/53984 and rolling element
- N Y10T 16/53985 Between opposing surfaces
- N Y10T 16/53987 and detent in cam surface
- N Y10T 16/53988 On axially twisted or helically fluted element
- N Y10T 16/53992 including means to hold hinged members against pivotal movement
- N Y10T 16/53996 having aperture for slidably receiving pintle [e.g., camming knuckle]
- N Y10T 16/54 . . . including means to hold or retard hinged members against pivotal movement [e.g., catch]
- N Y10T 16/5401 . . . Magnetic
- N Y10T 16/5402 . . . Resiliently biased catch
- N Y10T 16/54021 having spring force adjustment
- N Y10T 16/54023 including toggle linkage
- N Y10T 16/54024 having discrete manipulatable release means [e.g., lever]
- N Y10T 16/540243 including cam or eccentric
- N Y10T 16/540247 Sliding release means or lever-actuated sliding catch
- N Y10T 16/54025 Sliding
- N Y10T 16/540253 Movement along or parallel to hinge axis

N	Y10T 16/540254 Interdigitated or plural sockets
N	Y10T 16/540255 Opposed interdigitated sliding collars on hinge axis
N	Y10T 16/540256 and catch receiving socket
N	Y10T 16/540257 and catch receiving socket
N	Y10T 16/54026 Pivoted
N	Y10T 16/54028 Plural alternately useable detents
N	Y10T 16/54029 Spring arm
N	Y10T 16/540295 Plural opposed arms
N	Y10T 16/5403	. . . by friction
N	Y10T 16/54033 Screw-threaded adjustment
N	Y10T 16/54034 Along or parallel to hinge axis
N	Y10T 16/540345 Threaded pintle
N	Y10T 16/54035 Cam or wedge actuator
N	Y10T 16/54038 On hinge pin or between surfaces surrounding hinge axis
N	Y10T 16/5404	. . . Pivoted
N	Y10T 16/54044 Plural alternately useable detents
N	Y10T 16/54048 and sliding
N	Y10T 16/54052 Serially connected pivoted arms between leaves [e.g., brace]
N	Y10T 16/54056 About axis along or parallel to hinge axis
N	Y10T 16/5406	. . . by transversely moving pin in slot
N	Y10T 16/5407	. . . having discrete manipulatable release means [e.g., lever operated]
N	Y10T 16/5408	. . . by shifting hinged members
N	Y10T 16/54085 Along hinge axis
N	Y10T 16/5409	. . . Sliding
N	Y10T 16/54095 Along or parallel to hinge axis
N	Y10T 16/541	. . including toothed gear
N	Y10T 16/542	. . comprising nested open curved portions attached to hinged members
N	Y10T 16/543	. . . including hinge pin
N	Y10T 16/544	. . including transversely moving pin in slot
N	Y10T 16/5443	. . . Plural noncollinear pins and slots
N	Y10T 16/5444 Parallel slots
N	Y10T 16/5445	. . . having pin fixed to pivoted arm or plate
N	Y10T 16/5448	. . . Hinge pin movable along slot
N	Y10T 16/545	. . including sliding surfaces to permit relative translation of hinged members
N	Y10T 16/5453	. . . and stop or abutment for pivotal movement
N	Y10T 16/5457	. . . Movement transverse to hinge axis
N	Y10T 16/546	. . Three-hinged members
N	Y10T 16/547	. . having plural hinge axes [e.g., multiple pintle]
N	Y10T 16/5472	. . . having transverse or skewed axes
N	Y10T 16/5474	. . . Connected by serially arranged pivoted links between hinged members
N	Y10T 16/5475 Plural sets of serially arranged pivoted links
N	Y10T 16/5476	. . . Four or more axes
N	Y10T 16/5478	. . . including stop or latch
N	Y10T 16/548	. . including laminated leaf

- N Y10T 16/549 *. . Wire hinge*
- N Y10T 16/551 *. . having stop or abutment*
- N Y10T 16/5513 *. . . Adjustable or resilient*
- N Y10T 16/5515 *. . . comprising relieved axially opposed relatively rotating surfaces*
- N Y10T 16/5518 *. . . comprising platelike bearing portion curved about hinge axis*
- N Y10T 16/552 *. . Hinge axis passes through hinged member [e.g., floor hinge]*
- N Y10T 16/5525 *. . . Pintle or pivot concealed in hinged member*
- N Y10T 16/553 *. . including means to retain pintle in hinge [e.g., tamper proof, nonrising pintle, etc.]*
- N Y10T 16/5535 *. . . Threaded or slotted pintle or knuckle*
- N Y10T 16/554 *. . including means to fasten leaf to member*
- N Y10T 16/5543 *. . . by expandable connector*
- N Y10T 16/5547 *. . . Self-penetrating fastener*

N	Y10T 24/3685	• • <i>Button with shank for friction grip fastener</i>
N	Y10T 24/3687	• • <i>Heat or adhesive secured type</i>
N	Y10T 24/3689	• • <i>Thread or wire through apertured button</i>
N	Y10T 24/3691	• • <i>Eye shank type button</i>
N	Y10T 24/3694	• • <i>Ornamental type</i>
N	Y10T 24/3696	• • <i>for cuff or collar</i>
N	Y10T 24/3698	• • <i>Fabric embracing</i>
N	Y10T 24/37	• <i>Drawstring, laced-fastener, or separate essential cooperating device therefor</i>
N	Y10T 24/3703	• • <i>Includes separate device for holding drawn portion of lacing</i>
N	Y10T 24/3705	• • • <i>Device engages tie in lacing</i>
N	Y10T 24/3708	• • • • <i>and fully covers tie</i>
N	Y10T 24/3711	• • • <i>Device engages element or formation on lacing</i>

N	Y10T 24/3713	• • • having relatively movable holding components or surfaces
N	Y10T 24/3716	• • • • with pivotal connection therebetween
N	Y10T 24/3718	• • • • with integral resilient linking structure therebetween
N	Y10T 24/3721	• • • • • formed from wire
N	Y10T 24/3724	• • • having lacing wound thereabout or wedged therein
N	Y10T 24/3726	• • with holding means fixedly mounted on lacing
N	Y10T 24/3729	• • • and forming lacing tips
N	Y10T 24/3732	• • Includes lacing holding structure within directing means therefor
N	Y10T 24/3734	• • having diverse shaped directing means for lacing
N	Y10T 24/3737	• • having lacing directing means in particular pattern
N	Y10T 24/3739	• • Includes lacing guiding roller within directing means
N	Y10T 24/3742	• • having eyelet type directing means
N	Y10T 24/3745	• • • with permanently deformed mounting structure
N	Y10T 24/3747	• • • • Mounting structure formed from different material than directing passage
N	Y10T 24/375	• • having hook shaped directing means
N	Y10T 24/3753	• • • and movable component or surface for closing throat
N	Y10T 24/3755	• • • Mounted by structure allowing bodily movement thereof
N	Y10T 24/3758	• • • formed from wire
N	Y10T 24/3761	• • • with mounting structure formed from different material
N	Y10T 24/3763	• • • with permanently deformed mounting structure
N	Y10T 24/3766	• • • • Expanding stud
N	Y10T 24/3768	• • having loop or sleeve shaped directing means
N	Y10T 24/3771	• • • Entirely formed from flaccid material
N	Y10T 24/3774	• • • Mounted by structure allowing bodily movement thereof
N	Y10T 24/3776	• • • formed from wire
N	Y10T 24/3779	• • • with permanently deformed mounting structure
N	Y10T 24/3782	• • • • Loop or sleeve closed when mounted
N	Y10T 24/3784	• • • • Expanding stud
N	Y10T 24/3787	• • having elastic segment in lacing
N	Y10T 24/3789	• • having means covering tip of lacing
N	Y10T 24/3792	• • • Tasseled
N	Y10T 24/3795	• • • with plural components
N	Y10T 24/3797	• • • with permanently deformed mounting structure
N	Y10T 24/38	• Strap cable or pipe button
N	Y10T 24/39	• Cord and rope holders
N	Y10T 24/3902	• • Chain
N	Y10T 24/3904	• • • Bead chain fasteners
N	Y10T 24/3907	• • Sheathed strand
N	Y10T 24/3909	• • Plural-strand cord or rope
N	Y10T 24/3911	• • Friction disk
N	Y10T 24/3913	• • Knot engaging
N	Y10T 24/3916	• • One-piece
N	Y10T 24/3918	• • • Wedge slot
N	Y10T 24/392	• • • Wire

N	Y10T 24/3922 Cord runs through center of coil
N	Y10T 24/3924	. . . Sheet material
N	Y10T 24/3927	. . . Slack adjuster
N	Y10T 24/3929	. . . Rubber
N	Y10T 24/3931	. . . Wire
N	Y10T 24/3933	. . . Swagged, deformable
N	Y10T 24/3936	. . Pivoted part
N	Y10T 24/3938	. . . Lever tension
N	Y10T 24/394	. . . Cam lever
N	Y10T 24/3942 Laterally shifted rope
N	Y10T 24/3944 Cam engaging or disengaging
N	Y10T 24/3947 Fixed and movable jaws, movable jaw pulled
N	Y10T 24/3949 Link-connected parallel jaws
N	Y10T 24/3951 Dual cam
N	Y10T 24/3953	. . . Pivotal means with plate aperture
N	Y10T 24/3956	. . . Jaws locked together by cam, wedge, lever, or screw
N	Y10T 24/3958	. . Screw clamp
N	Y10T 24/396	. . . Screw clamp with snubber
N	Y10T 24/3962	. . . Tangential bolt
N	Y10T 24/3964	. . . J-shaped bolt
N	Y10T 24/3967	. . . Bolt perpendicular to cable axis
N	Y10T 24/3969	. . Sliding part or wedge
N	Y10T 24/3971	. . . Rope looped about movable member
N	Y10T 24/3973	. . . Rope clamped between cone and socket
N	Y10T 24/3976	. . . Sliding ball
N	Y10T 24/3978	. . . Screw actuated
N	Y10T 24/398	. . Bendable, ductible
N	Y10T 24/3982	. . Safety release
N	Y10T 24/3984	. . Alignable aperture and spring pressed moving element
N	Y10T 24/3987	. . Loop, adjustable
N	Y10T 24/3989	. . Snubbers, cleats by dielectric loss
N	Y10T 24/3991	. . Loop engaging
N	Y10T 24/3993	. . Ball or roller
N	Y10T 24/3996	. . Sliding wedge
N	Y10T 24/3998	. . Helical preform
N	Y10T 24/40	. Buckles
N	Y10T 24/4002	. . Harness
N	Y10T 24/4005	. . . Combined buckles and snap hooks
N	Y10T 24/4007	. . . Lock
N	Y10T 24/4009 Key
N	Y10T 24/4012	. . . Clamping
N	Y10T 24/4014 One-piece
N	Y10T 24/4016 Pivoted part or lever
N	Y10T 24/4019 Sliding part or wedge

N	Y10T 24/4021	. . . Cross bails
N	Y10T 24/4023 Pivoted stud plate
N	Y10T 24/4026 Rigid stud
N	Y10T 24/4028	. . . Penetrating tongue
N	Y10T 24/403 Guarded
N	Y10T 24/4033 One-piece
N	Y10T 24/4035 Multiple
N	Y10T 24/4037 Pivoted
N	Y10T 24/404 Lever actuated
N	Y10T 24/4042 Stud
N	Y10T 24/4044 Sliding part or wedge
N	Y10T 24/4047	. . . Strap loops and attaching devices
N	Y10T 24/4049	. . . Loop shields
N	Y10T 24/4051	. . Garment shielded
N	Y10T 24/4053	. . Combined pressure bar and guard
N	Y10T 24/4056	. . . Hook attached
N	Y10T 24/4058	. . Penetrating prong
N	Y10T 24/406	. . . One-piece
N	Y10T 24/4063 Hook attached
N	Y10T 24/4065	. . . Pivoted
N	Y10T 24/4067 Hook attached
N	Y10T 24/407	. . . Slide
N	Y10T 24/4072	. . Pivoted lever
N	Y10T 24/4074	. . . Hook attached
N	Y10T 24/4077	. . . Looped strap
N	Y10T 24/4079	. . Sliding part of wedge
N	Y10T 24/4081	. . . Hook attached
N	Y10T 24/4084	. . . Looped strap
N	Y10T 24/4086	. . Looped strap
N	Y10T 24/4088	. . One-piece
N	Y10T 24/4091	. . . Hook attached
N	Y10T 24/4093	. . . Looped strap
N	Y10T 24/4095	. . Fabric covered
N	Y10T 24/4098	. . Ornamental and/or object supported
N	Y10T 24/41	. Pierced earring fastener
N	Y10T 24/42	. Independent, headed, aperture pass-through fastener
N	Y10T 24/43	. Fastener with revolving component wrapping structure-to-be-secured about fastener
N	Y10T 24/44	. Clasp, clip, support-clamp, or required component thereof
N	Y10T 24/44009	. . Gripping member adapted for tool actuation or release
N	Y10T 24/44017	. . with specific mounting means for attaching to rigid or semirigid supporting structure or structure-to-be-secured
N	Y10T 24/44026	. . . for cooperating with aperture in supporting structure or structure-to-be-secured
N	Y10T 24/44034	. . Dissociable gripping members

- N Y10T 24/44043 . . . Channel and inserted bar
- N Y10T 24/44051 having operator or locking means
- N Y10T 24/4406 Resilient channel or bar
- N Y10T 24/44068 . . having gripping member actuated by fluid force
- N Y10T 24/44077 . . having inserted and receiving interlocking members connected by bendable, nonbiasing strap
- N Y10T 24/44085 . . . Discrete flaccid strap
- N Y10T 24/44094 with distinct means for preventing separation of members
- N Y10T 24/44103 Slidably mounted
- N Y10T 24/44111 with separate flaccid flap or pocket for protecting structure-to-be-secured
- N Y10T 24/4412 with separate, cavity-blocking gate on receiving member
- N Y10T 24/44128 Resilient inserted or receiving member
- N Y10T 24/44137 Inserted or receiving member substantially covered or coated for protection or to promote gripping
- N Y10T 24/44145 Resilient inserted member
- N Y10T 24/44154 having engaging face formed from nonmetallic material
- N Y10T 24/44162 having head and neck type engaging face
- N Y10T 24/44171 having internal supporting or reinforcing element
- N Y10T 24/44179 Circular head or neck
- N Y10T 24/44188 having wedge shaped, inserted and receiving members
- N Y10T 24/44197 with specific means for attaching to flaccid strap or supporting strap
- N Y10T 24/44205 On the inserted member
- N Y10T 24/44214 having necked button sliding along length of closed, variable width loop
- N Y10T 24/44222 . . having flaccid gripping member
- N Y10T 24/44231 . . . formed from elastic material
- N Y10T 24/44239 . . Encircling gripping member including semirigid band and operator for tightening
- N Y10T 24/44248 . . Encircling gripping member including semirigid band and means for adjusting girth
- N Y10T 24/44256 . . with specifically shaped, nongripping, rigid structure for connecting independently operable clasps, clips, or support-clamps
- N Y10T 24/44265 . . Gripping member face integral with or rigidly affixed to screw-driving portion
- N Y10T 24/44274 . . having either discrete flaccid or thin, nonbiasing, integral, connecting hinge
- N Y10T 24/44282 . . having equally spaced or continual gripping faces revolving about central axis
- N Y10T 24/44291 . . including pivoted gripping member
- N Y10T 24/44299 . . . Pivoted member also slides
- N Y10T 24/44308 Tapered face
- N Y10T 24/44316 . . . Pivoting gripping member either supports or coacts with sliding engaging face
- N Y10T 24/44325 . . . having three or more pivotally connected gripping members
- N Y10T 24/44333 . . . having toggle operator for moving
- N Y10T 24/44342 . . . having rigid linking arm pivotally connected to each gripping member
- N Y10T 24/4435 with extended lever portion
- N Y10T 24/44359 having lever end modified for attachment to support
- N Y10T 24/44368 . . . Pivoted gripping member applies camming force
- N Y10T 24/44376 . . . Spring or resiliently biased about pivot

N	Y10T 24/44385 Distinct spring
N	Y10T 24/44393 Attached solely by spring
N	Y10T 24/44402 with operator for moving pivoted member
N	Y10T 24/4441 Camming or wedging element
N	Y10T 24/44419 Pivoted or rotated element
N	Y10T 24/44427 with position locking-means for gripping members
N	Y10T 24/44436 including pivoted arm
N	Y10T 24/44444 having specific surface material or irregularity on or along engaging face
N	Y10T 24/44453 having specific handle structure
N	Y10T 24/44462 Coil spring
N	Y10T 24/4447 having coil portion coaxial or parallel with pivotal axis
N	Y10T 24/44479 Flat or leaf spring
N	Y10T 24/44487	. . . Closed by gravity or weight of structure-to-be-secured
N	Y10T 24/44496	. . . with operator means for moving pivoted member
N	Y10T 24/44504 Threaded cylindrical rod and mating cavity
N	Y10T 24/44513 Camming or wedging element
N	Y10T 24/44521 Pivoted or rotated element
N	Y10T 24/4453	. . . with position locking-means for gripping members
N	Y10T 24/44538 Integral locking-means
N	Y10T 24/44547	. . . having inserted and receiving interlocking engaging faces
N	Y10T 24/44556 Resilient gripping member
N	Y10T 24/44564	. . . having specific surface material or irregularity on or along engaging face
N	Y10T 24/44573	. . including track or way guided and retained gripping member
N	Y10T 24/44581	. . . Biased by distinct spring
N	Y10T 24/4459	. . . with operator for moving guided member
N	Y10T 24/44598 Threaded cylindrical rod and mating cavity
N	Y10T 24/44607	. . . Track or way oblique to path of gripping member
N	Y10T 24/44615	. . . with position locking-means for gripping members
N	Y10T 24/44624 Integral locking-means
N	Y10T 24/44632	. . . with specific mounting means for attaching to flaccid supporting structure or structure-to-be-secured
N	Y10T 24/44641	. . having gripping member formed from, biased by, or mounted on resilient member
N	Y10T 24/4465	. . . Integrally combined, independently operable, diverse clasps, clips, or support-clamps
N	Y10T 24/44658	. . . with specific means for mounting to flaccid supporting structure or structure-to-be-secured
N	Y10T 24/44667 Mounting means made entirely from integral wire portion of resilient gripping member
N	Y10T 24/44675 Wire coiled about flaccid supporting structure
N	Y10T 24/44684	. . . with operator for moving biased engaging face
N	Y10T 24/44692 Camming or wedging element
N	Y10T 24/44701 Encircling sleeve type element
N	Y10T 24/44709 Pivoted or rotated element

N	Y10T 24/44718 Element pivots or rotates in plane parallel to plane bisecting opposed engaging faces
N	Y10T 24/44726 Elongated element with pivot between cam and handle portions
N	Y10T 24/44735 for moving engaging face of U-shaped gripping member
N	Y10T 24/44744	. . . with position locking-means for engaging faces
N	Y10T 24/44752 Integral locking-means
N	Y10T 24/44761 Pivoted lock member
N	Y10T 24/44769	. . . Opposed engaging faces on gripping member formed from single piece of resilient material
N	Y10T 24/44778 Piece totally forms clasp, clip, or support-clamp and has shaped, wirelike, or bandlike configuration with uniform cross section throughout its length
N	Y10T 24/44786 Opposed faces located in and bias towards common plane in nonuse position
N	Y10T 24/44795 Resilient gripping member having tightly twisted portion
N	Y10T 24/44803 Resilient gripping member having coiled portion
N	Y10T 24/44812 Convolutions of coil form faces
N	Y10T 24/44821 Relatively movable segments of resilient gripping member contact and cross in nonuse position
N	Y10T 24/44829 Segments form opposed engaging faces
N	Y10T 24/44838 having specific handle structure
N	Y10T 24/44846 having specific handle structure
N	Y10T 24/44855 Terminal end of resilient member having engagement or disengagement enhancing structural modifications
N	Y10T 24/44863 having specific surface irregularity on or along engaging face
N	Y10T 24/44872 having specific handle structure
N	Y10T 24/4488 Movably attached to gripping member
N	Y10T 24/44889 Interlocking faces
N	Y10T 24/44897 with reinforcing member
N	Y10T 24/44906 having specific surface irregularity on or along engaging face
N	Y10T 24/44915 Corrugated or toothed face
N	Y10T 24/44923 Clasp, clip, or support-clamp cut or shaped from a single sheet of resilient, uniformly thick, planar material
N	Y10T 24/44932	. . . having specific surface material or irregularity on or along engaging face
N	Y10T 24/4494	. . . having specific handle structure
N	Y10T 24/44949	. . . including resilient biasing wire
N	Y10T 24/44957 Coiled wire
N	Y10T 24/44966	. . having gripping member shifted by operator
N	Y10T 24/44974	. . . Threaded cylindrical rod and mating cavity
N	Y10T 24/44983	. . formed from single rigid piece of material
N	Y10T 24/44991	. . . having specific surface irregularity on or along engaging face
N	Y10T 24/45	. Separable-fastener or required component thereof [e.g., projection and cavity to complete interlock]
N	Y10T 24/45005	. . with third detached member completing interlock [e.g., hook type]
N	Y10T 24/4501	. . . Quick connect or release [e.g., spring and detent]
N	Y10T 24/45016	. . . for jewelry
N	Y10T 24/45021	. . . including eyelet [e.g., shoes]

N	Y10T 24/45026	. . . for key holder
N	Y10T 24/45031	. . . for tire chain, strap, etc. [e.g., rotatable or sliding spring gate]
N	Y10T 24/45037	. . . for apparel and related accessories
N	Y10T 24/45042 Button, button related
N	Y10T 24/45047 Snap [e.g., key hole type]
N	Y10T 24/45052 Post and receiver [e.g., pin and slot]
N	Y10T 24/45058 Hook [e.g., within cavity]
N	Y10T 24/45063 Belt, strap, etc. [e.g., buckle or snap fastener]
N	Y10T 24/45068 Glove
N	Y10T 24/45073 Purse, wallet, etc.
N	Y10T 24/45079 Belt, strap, harness, etc.
N	Y10T 24/45084 for safety belt buckle, strap, harness, etc.
N	Y10T 24/45089 Sliding or rotating element
N	Y10T 24/45094 Element having key slot
N	Y10T 24/45099 Resilient element [e.g., snap type]
N	Y10T 24/45105 for upholstery, panel, trim strip, etc. [e.g., spring biased]
N	Y10T 24/4511 Link with pivoted gate
N	Y10T 24/45115 Hook
N	Y10T 24/4512 Snap with spring bias [e.g., gate]
N	Y10T 24/45126 for connecting chains [e.g., opposed pivoted hook]
N	Y10T 24/45131 for heavy load bearing device [e.g., chain, rope, cable, etc.]
N	Y10T 24/45136 Haim, harness, whiffletree, rein, etc.
N	Y10T 24/45141 for chain, rope, cable, etc.
N	Y10T 24/45147 Coupler with sliding socket to complete interlock
N	Y10T 24/45152	. . Each mating member having similarly shaped, sized, and operated interlocking or intermeshable face
N	Y10T 24/45157 Zipper-type [e.g., slider]
N	Y10T 24/45162 for garment [e.g., with ribs and grooves interlocking elements]
N	Y10T 24/45168 for container [e.g., bag]
N	Y10T 24/45173 Resilient element
N	Y10T 24/45178 Snap [e.g., identical elements]
N	Y10T 24/45183 Clasp [e.g., spring type]
N	Y10T 24/45188 for jewelry [e.g., buckle type]
N	Y10T 24/45194 for belt or strap
N	Y10T 24/45199 Hook
N	Y10T 24/45204 for belt, strap, etc. [e.g., with pivoted gate locking member]
N	Y10T 24/45209 for apparel
N	Y10T 24/45215 Slot and tab or tongue
N	Y10T 24/4522 Sliding or rotating element
N	Y10T 24/45225	. . including member having distinct formations and mating member selectively interlocking therewith
N	Y10T 24/4523 Hook
N	Y10T 24/45236 Multiple catch [e.g., with pivoted gate]
N	Y10T 24/45241 Slot and tab or tongue
N	Y10T 24/45246 having teeth or serrations [e.g., sliding with respect to each other]

- N Y10T 24/45251 . . . Resilient element [e.g., with spring]
- N Y10T 24/45257 Snap with cavity
- N Y10T 24/45262 . . . Pin, post and receiver
- N Y10T 24/45267 . . . Notched clasp [e.g., with receiving slot]
- N Y10T 24/45272 . . . Projection passes through cavity then moves toward noninserted portion of its member to complete interlock [e.g., snap hook]
- N Y10T 24/45277 Entire projection member forms loop or ring when interlocked
- N Y10T 24/45283 Includes slidable gate closing entrance throat
- N Y10T 24/45288 Hook type projection member
- N Y10T 24/45293 Plural hooks entering opposite sides of same cavity
- N Y10T 24/45298 Hooks formed solely from wire
- N Y10T 24/45304 Noninserted portion of projection member includes movably connected gate for closing access throat
- N Y10T 24/45309 Threaded gate
- N Y10T 24/45314 Revolvably mounted disc shaped gate
- N Y10T 24/45319 Pivotaly connected gate
- N Y10T 24/45325 Gate swings transversely to plane of hook
- N Y10T 24/4533 Gate also slides relative to pivot
- N Y10T 24/45335 having means biasing gate about pivot
- N Y10T 24/4534 and position locking-means for gate
- N Y10T 24/45346 Includes distinct biasing spring
- N Y10T 24/45351 Coil type spring
- N Y10T 24/45356 Coiled about pivotal axis of gate
- N Y10T 24/45361 having position locking-means for gate
- N Y10T 24/45366 Locking-means pivotaly connected
- N Y10T 24/45372 Locking-means slidably mounted
- N Y10T 24/45377 Gate closes when structure-to-be-secured is tensioned
- N Y10T 24/45382 Track or way guided gate
- N Y10T 24/45387 having means biasing gate
- N Y10T 24/45393 Guide of gate encircles shank
- N Y10T 24/45398 Cavity in shank forms track or way
- N Y10T 24/45403 with position locking-means for gate
- N Y10T 24/45408 Resilient, self-biased gate
- N Y10T 24/45414 with position locking-means for gate
- N Y10T 24/45419 Gate and hook formed from plastic
- N Y10T 24/45424 Gate and hook formed solely from wire
- N Y10T 24/45429 Gate and hook formed from single piece of sheet metal
- N Y10T 24/45435 Projection pivotaly attached to shank or mounting structure
- N Y10T 24/4544 Projection slidably mounted to shank or mounting structure
- N Y10T 24/45445 Projection self-biased towards shank or mounting structure
- N Y10T 24/4545 and formed solely from wire
- N Y10T 24/45455 Cooperating with relatively stationary wire gate
- N Y10T 24/45461 . . . Interlocking portion actuated or released responsive to preselected condition [e.g., heat, pressure]
- N Y10T 24/45466 . . . having electric or fluid powered, actuation or release, of interlock

- N Y10T 24/45471 . . . Projection having movable connection between components thereof or variable configuration
- N Y10T 24/45476 with additional, similar projection for engaging different cavity
- N Y10T 24/45482 and operator therefor
- N Y10T 24/45487 including camming or wedging element on projection member
- N Y10T 24/45492 Pivotaly attached element
- N Y10T 24/45497 including pivotal connection between projection components
- N Y10T 24/45503 Component slides relative to connection
- N Y10T 24/45508 and spring or resilient extension biasing about pivot
- N Y10T 24/45513 including slidably guided connection between nonself-biasing projection components
- N Y10T 24/45518 and distinct spring biasing component
- N Y10T 24/45524 including resiliently biased projection component or surface segment
- N Y10T 24/45529 Requiring manual force applied against bias to interlock or disengage
- N Y10T 24/45534 having connected leading edge and separated trailing arms
- N Y10T 24/45539 Cooperating with cavity having side walls and axially biased component capping end
- N Y10T 24/45545 forming total external surface of projection
- N Y10T 24/4555 and encircling hollow central area
- N Y10T 24/45555 having separate mounting means inserted into area
- N Y10T 24/4556 Plastic deformation of means or surface required for mounting
- N Y10T 24/45565 having separate mounting means encompassing cross section of projection
- N Y10T 24/45571 having dome-shaped head and expansion slit along side
- N Y10T 24/45576 and connected surface at tip of head
- N Y10T 24/45581 having inserted end formed by oppositely biased surface segments
- N Y10T 24/45586 Constructed from wire
- N Y10T 24/45592 having both resiliently biased and rigid components forming external surface of projection
- N Y10T 24/45597 . . . Projection member including noninserted spring for engaging and pushing against receiving member
- N Y10T 24/45602 . . . Receiving member includes either movable connection between interlocking components or variable configuration cavity
- N Y10T 24/45607 with additional cavity for engaging different projection
- N Y10T 24/45613 having common means actuating or releasing interlocking components or surfaces
- N Y10T 24/45618 and interlocking with independently associated or dissociated projection members
- N Y10T 24/45623 and operator therefor
- N Y10T 24/45628 for plural, oppositely shifting, similar interlocking components or segments
- N Y10T 24/45634 Operator includes camming or wedging element
- N Y10T 24/45639 including pivotally connected element on receiving member
- N Y10T 24/45644 for shifting pivotally connected interlocking component
- N Y10T 24/45649 Element and component pivot about same axis
- N Y10T 24/45654 for shifting slidably connected and guided, nonself-biasing interlocking component

N	Y10T 24/4566 including slidably connected and guided element on receiving member
N	Y10T 24/45665 for shifting pivotally connected interlocking component
N	Y10T 24/4567 for shifting slidably connected and guided, nonself-biasing, interlocking component
N	Y10T 24/45675 having pivotally connected interlocking component
N	Y10T 24/45681 Blocking removal of formation on projection from complementary formation on side wall of cavity
N	Y10T 24/45686 and position locking-means therefor
N	Y10T 24/45691 and relatively movable handle therefor
N	Y10T 24/45696 Requiring manual force thereon to interlock or disengage
N	Y10T 24/45702 Plural, oppositely shifting, similar interlocking components
N	Y10T 24/45707 having aperture therein alignable with parallel access opening
N	Y10T 24/45712 having interlocking portion thereof housed continuously within cavity
N	Y10T 24/45717 having cavity with side walls and axially biased component capping end
N	Y10T 24/45723 having slidably connected, nonself-biasing interlocking component
N	Y10T 24/45728 Blocking removal of formation on projection from complementary formation on side wall of cavity
N	Y10T 24/45733 and position locking-means therefor
N	Y10T 24/45738 and relatively movable handle therefor
N	Y10T 24/45743 Requiring manual force thereon to interlock or disengage
N	Y10T 24/45749 Plural, oppositely shifting, similar interlocking components
N	Y10T 24/45754 having closed aperture therethrough alignable with parallel access opening
N	Y10T 24/45759 having flaccid component defining access opening of cavity
N	Y10T 24/45764 Component formed solely by flaccid cord
N	Y10T 24/4577 with nonflaccid component
N	Y10T 24/45775 having resiliently biased interlocking component or segment
N	Y10T 24/4578 Cavity or projection rotates about axis of cavity to dissociate
N	Y10T 24/45785 Requiring manual force applied against bias to interlock or disengage
N	Y10T 24/45791 and partially blocking separate, nonresilient access opening of cavity
N	Y10T 24/45796 and closed elongated access opening for guiding transverse projection travel after insertion
N	Y10T 24/45801 Nonresilient walls define opening
N	Y10T 24/45806 formed from wire
N	Y10T 24/45812 and access opening with gapped perimeter for allowing movement of noninserted projection support therepast
N	Y10T 24/45817 Cavity constructed solely from wire
N	Y10T 24/45822 Partially blocking separate, nonresilient, access opening of cavity
N	Y10T 24/45827 and bodily shifted into or out of interlock location by manual force thereon
N	Y10T 24/45832 formed from wire
N	Y10T 24/45838 having curved or bent engaging section conforming to contour of projection
N	Y10T 24/45843 Similar, distinct sections
N	Y10T 24/45848 having distinct sections engaging projection at spaced points
N	Y10T 24/45853 including separate, nonprojection-engaging spring for biasing

- N Y10T 24/45859 *Biased component or segment entirely formed from wire*
- N Y10T 24/45864 *having portion of cavity deformed during mounting*
- N Y10T 24/45869 *and cooperating with separate mounting component*
- N Y10T 24/45874 *having axially extending expansion slit along side of cavity*
- N Y10T 24/4588 *Means for mounting projection or cavity portion*
- N Y10T 24/45885 *Allows bodily movement facilitating interlock*
- N Y10T 24/4589 *About pivotal connection*
- N Y10T 24/45895 *Includes resilient component separate from portion*
- N Y10T 24/45901 *Allows relocation of portion*
- N Y10T 24/45906 *having component of means permanently deformed during mounting operation*
- N Y10T 24/45911 *and formed from or fixedly attached to projection or cavity portion*
- N Y10T 24/45916 *Cooperates with detached component of means*
- N Y10T 24/45921 *having shape facilitating impaling of mounting surface*
- N Y10T 24/45927 *and inserted into or through cavity or projection*
- N Y10T 24/45932 *and encircling cavity or projection*
- N Y10T 24/45937 *Consisting of thermally fusible substance*
- N Y10T 24/45942 *having threaded formation*
- N Y10T 24/45948 *having specific structure for cooperating with stitching*
- N Y10T 24/45953 *having shape facilitating impaling of mounting surface*
- N Y10T 24/45958 *Plural distinct cavities or projections*
- N Y10T 24/45963 *Hook type*
- N Y10T 24/45969 *Hook-shaped projection member passing through cavity*
- N Y10T 24/45974 *formed from single piece of sheet metal*
- N Y10T 24/45979 *formed solely from wire*
- N Y10T 24/45984 *Cavity having specific shape*
- N Y10T 24/4599 *including closed elongated access opening for guiding transverse projection travel after insertion*
- N Y10T 24/45995 *having access opening with gapped perimeter for allowing movement of noninserted projection support therepast*
- N Y10T 24/46 *Pin or separate essential cooperating device therefor*
- N Y10T 24/4602 *with separately operable, manually releasable, nonpenetrating means for mounting [e.g., drapery hook]*
- N Y10T 24/4604 *having distinct guiding, holding, or protecting means for penetrated portion*
- N Y10T 24/4605 *Means detachable from or flaccidly connected to pin [e.g., hatpin type]*
- N Y10T 24/4607 *for pin having plural penetrating portions*
- N Y10T 24/4609 *including relatively movable guiding, holding, or protecting components or surfaces*
- N Y10T 24/4611 *having operator for moving holding component or surface*
- N Y10T 24/4613 *Moves pivoting holding component*
- N Y10T 24/4614 *Moves slidably guided, nonself-biasing, holding component*
- N Y10T 24/4616 *having pierceable [e.g., cork] or naturally resilient [e.g., rubber] surfaces*
- N Y10T 24/4618 *with pivotal connection therebetween*
- N Y10T 24/462 *with slidable connection between nonself-biasing components*
- N Y10T 24/4621 *having resiliently biased component or surface*

- N Y10T 24/4623 Coiled about longitudinal axis of held portion
- N Y10T 24/4625 and aperture therein alignable with another spaced aperture of means
- N Y10T 24/4627 and nonresilient structure for guiding portion thereto
- N Y10T 24/4629 including structure for cooperating with formation [e.g., cavity] formed on penetrating portion
- N Y10T 24/463 for pin having plural penetrating portions
- N Y10T 24/4632 Each independently movable towards and into cooperation with means
- N Y10T 24/4634 including relatively movable guiding, holding, or protecting components or surfaces
- N Y10T 24/4636 with connection allowing component to revolve about axis of held penetrating portion
- N Y10T 24/4638 with pivotal connection therebetween
- N Y10T 24/4639 having position locking means therefor
- N Y10T 24/4641 Spring or resiliently biased
- N Y10T 24/4643 with slidable connection between nonself-biasing components
- N Y10T 24/4645 Component slides parallel to axis of held penetrating portion
- N Y10T 24/4646 Means engages formation formed on penetrating portion
- N Y10T 24/4648 having nonresilient and resilient components
- N Y10T 24/465 Means formed from single resilient wire
- N Y10T 24/4652 Means formed from resilient sheet metal
- N Y10T 24/4654 with independent, spaced, intermediate connections, or formations [e.g., coils], about which portion or means move
- N Y10T 24/4655 Includes slidable connection
- N Y10T 24/4657 with pivotal connection between penetrating portion and means
- N Y10T 24/4659 Connection also permits sliding movement
- N Y10T 24/4661 Resiliently biased about connection
- N Y10T 24/4663 with slidable connection intermediate penetrating portion and means
- N Y10T 24/4664 having resilient bridging structure between portion and means
- N Y10T 24/4666 Means includes structure for cooperating with formation [e.g., cavity] formed on portion
- N Y10T 24/4668 and penetrating portion formed from wire
- N Y10T 24/467 Bridging structure includes elongated nonwire element
- N Y10T 24/4671 Wire also forms coiled bridging structure about which portion moves
- N Y10T 24/4673 including distinct device for cooperating with coil
- N Y10T 24/4675 having means also formed from same wire
- N Y10T 24/4677 with cavity for guiding structure-to-be-secured towards penetrating portion [e.g., stocking support]
- N Y10T 24/4679 having penetrating portion retractable or of changeable length
- N Y10T 24/468 having interconnected distinct penetrating portions
- N Y10T 24/4682 Connection allows movement therebetween
- N Y10T 24/4684 Slidable connection
- N Y10T 24/4686 Resilient connection
- N Y10T 24/4688 formed from common wire
- N Y10T 24/4689 and pointing in same direction
- N Y10T 24/4691 Penetrating portion includes relatively movable structure for resisting extraction

N	Y10T 24/4693	• • <i>having specific wire penetrating portion</i>
N	Y10T 24/4695	• • • <i>Wire curved or bent</i>

N	Y10T 29/49067 Specified diverse magnetic materials
N	Y10T 29/49069 Data storage inductor or core
N	Y10T 29/49071 by winding or coiling
N	Y10T 29/49073 by assembling coil and core
N	Y10T 29/49075 including permanent magnet or core
N	Y10T 29/49076 From comminuted material
N	Y10T 29/49078 Laminated
N	Y10T 29/4908 Acoustic transducer
N	Y10T 29/49082	. . . Resistor making
N	Y10T 29/49083 Heater type
N	Y10T 29/49085 Thermally variable
N	Y10T 29/49087 with envelope or housing
N	Y10T 29/49089 Filling with powdered insulation
N	Y10T 29/49091 with direct compression of powdered insulation
N	Y10T 29/49092 Powdering the insulation
N	Y10T 29/49094 by oxidation
N	Y10T 29/49096 with winding
N	Y10T 29/49098 Applying terminal
N	Y10T 29/49099 Coating resistive material on a base
N	Y10T 29/49101 Applying terminal
N	Y10T 29/49103 Strain gauge making
N	Y10T 29/49105	. . . Switch making
N	Y10T 29/49107	. . . Fuse making
N	Y10T 29/49108	. . . Electric battery cell making
N	Y10T 29/4911 including sealing
N	Y10T 29/49112 including laminating of indefinite length material
N	Y10T 29/49114 including adhesively bonding
N	Y10T 29/49115 including coating or impregnating
N	Y10T 29/49117	. . . Conductor or circuit manufacturing
N	Y10T 29/49119 Brush
N	Y10T 29/49121 Beam lead frame or beam lead device
N	Y10T 29/49123 Co-axial cable
N	Y10T 29/49124 On flat or curved insulated base, e.g., printed circuit, etc.
N	Y10T 29/49126 Assembling bases
N	Y10T 29/49128 Assembling formed circuit to base
N	Y10T 29/4913 Assembling to base an electrical component, e.g., capacitor, etc.
N	Y10T 29/49131 by utilizing optical sighting device
N	Y10T 29/49133 with component orienting
N	Y10T 29/49135 and shaping, e.g., cutting or bending, etc.
N	Y10T 29/49137 Different components
N	Y10T 29/49139 by inserting component lead or terminal into base aperture
N	Y10T 29/4914 with deforming of lead or terminal
N	Y10T 29/49142 including metal fusion

N	Y10T 29/49144 by metal fusion
N	Y10T 29/49146 with encapsulating, e.g., potting, etc.
N	Y10T 29/49147 Assembling terminal to base
N	Y10T 29/49149 by metal fusion bonding
N	Y10T 29/49151 by deforming or shaping
N	Y10T 29/49153 with shaping or forcing terminal into base aperture
N	Y10T 29/49155 Manufacturing circuit on or in base
N	Y10T 29/49156 with selective destruction of conductive paths
N	Y10T 29/49158 with molding of insulated base
N	Y10T 29/4916 Simultaneous circuit manufacturing
N	Y10T 29/49162 by using wire as conductive path
N	Y10T 29/49163 with sintering of base
N	Y10T 29/49165 by forming conductive walled aperture in base
N	Y10T 29/49167 with deforming of conductive path
N	Y10T 29/49169 Assembling electrical component directly to terminal or elongated conductor
N	Y10T 29/49171 with encapsulating
N	Y10T 29/49172 by molding of insulating material
N	Y10T 29/49174 Assembling terminal to elongated conductor
N	Y10T 29/49176 with molding of electrically insulating material
N	Y10T 29/49178 by shrinking of cover
N	Y10T 29/49179 by metal fusion bonding
N	Y10T 29/49181 by deforming
N	Y10T 29/49183 of ferrule about conductor and terminal
N	Y10T 29/49185 of terminal
N	Y10T 29/49187 with forming eyelet from elongated conductor
N	Y10T 29/49188 with penetrating portion
N	Y10T 29/4919 Through insulation
N	Y10T 29/49192 with insulation removal
N	Y10T 29/49194 Assembling elongated conductors, e.g., splicing, etc.
N	Y10T 29/49195 with end-to-end orienting
N	Y10T 29/49197 including fluid evacuating or pressurizing
N	Y10T 29/49199 including deforming of joining bridge
N	Y10T 29/49201 with overlapping orienting
N	Y10T 29/49202 including oppositely facing end orienting
N	Y10T 29/49204 Contact or terminal manufacturing
N	Y10T 29/49206 by powder metallurgy
N	Y10T 29/49208 by assembling plural parts
N	Y10T 29/4921 with bonding
N	Y10T 29/49211 of fused material
N	Y10T 29/49213 Metal
N	Y10T 29/49215 by impregnating a porous mass
N	Y10T 29/49217 by elastic joining
N	Y10T 29/49218 with deforming

N	Y10T 29/4922 with molding of insulation
N	Y10T 29/49222 forming array of contacts or terminals
N	Y10T 29/49224 with coating
N	Y10T 29/49226	. . . Electret making
N	Y10T 29/49227	. . . Insulator making
N	Y10T 29/49229	. . Prime mover or fluid pump making
N	Y10T 29/49231	. . . I.C. [internal combustion] engine making
N	Y10T 29/49233 Repairing, converting, servicing or salvaging
N	Y10T 29/49234 Rotary or radial engine making
N	Y10T 29/49236	. . . Fluid pump or compressor making
N	Y10T 29/49238 Repairing, converting, servicing or salvaging
N	Y10T 29/4924 Scroll or peristaltic type
N	Y10T 29/49242 Screw or gear type, e.g., Moineau type
N	Y10T 29/49243 Centrifugal type
N	Y10T 29/49245 Vane type or other rotary, e.g., fan
N	Y10T 29/49247	. . . Valve lifter making
N	Y10T 29/49249	. . . Piston making
N	Y10T 29/4925 Repairing, converting, servicing or salvaging
N	Y10T 29/49252 Multi-element piston making
N	Y10T 29/49254 Utilizing a high energy beam, e.g., laser, electron beam
N	Y10T 29/49256 with assembly or composite article making
N	Y10T 29/49258 with thermal barrier or heat flow provision
N	Y10T 29/49259 with fiber reinforced structure
N	Y10T 29/49261 by composite casting or molding
N	Y10T 29/49263 by coating or cladding
N	Y10T 29/49265 Ring groove forming or finishing
N	Y10T 29/49266 Gudgeon pin, wrist pin, piston pin, or boss therefor
N	Y10T 29/49268 with other attaching provision for connecting rod
N	Y10T 29/4927	. . . Cylinder, cylinder head or engine valve sleeve making
N	Y10T 29/49272 with liner, coating, or sleeve
N	Y10T 29/49274	. . . Piston ring or piston packing making
N	Y10T 29/49275 including forging or hammering
N	Y10T 29/49277 including casting or molding
N	Y10T 29/49279 including rolling or die forming, e.g., drawing, punching
N	Y10T 29/49281 including coating or plating
N	Y10T 29/49282 including grinding or honing
N	Y10T 29/49284 including machining or angular cutting
N	Y10T 29/49286	. . . Crankshaft making
N	Y10T 29/49288	. . . Connecting rod making
N	Y10T 29/4929 including metallurgical bonding
N	Y10T 29/49291 including metal forging or die shaping
N	Y10T 29/49293	. . . Camshaft making
N	Y10T 29/49295	. . . Push rod or rocker arm making
N	Y10T 29/49297	. . . Seal or packing making

N	Y10T 29/49298	. . . Poppet or I.C. engine valve or valve seat making
N	Y10T 29/493 Valve guide making
N	Y10T 29/49302 Repairing, converting, servicing or salvaging
N	Y10T 29/49304 Valve tappet making
N	Y10T 29/49306 Valve seat making
N	Y10T 29/49307 Composite or hollow valve stem or head making
N	Y10T 29/49309 including forging
N	Y10T 29/49311 including extruding
N	Y10T 29/49313 including casting
N	Y10T 29/49314 with assembly or composite article making
N	Y10T 29/49316	. . Impeller making
N	Y10T 29/49318	. . . Repairing or disassembling
N	Y10T 29/4932	. . . Turbomachine making
N	Y10T 29/49321 Assembling individual fluid flow interacting members, e.g., blades, vanes, buckets, on rotary support member
N	Y10T 29/49323 Assembling fluid flow directing devices, e.g., stators, diaphragms, nozzles
N	Y10T 29/49325 Shaping integrally bladed rotor
N	Y10T 29/49327	. . . Axial blower or fan
N	Y10T 29/49329	. . . Centrifugal blower or fan
N	Y10T 29/4933	. . . Fluid coupling device
N	Y10T 29/49332	. . . Propeller making
N	Y10T 29/49334 Utilizing hollow tube blank
N	Y10T 29/49336	. . . Blade making
N	Y10T 29/49337 Composite blade
N	Y10T 29/49339 Hollow blade
N	Y10T 29/49341 with cooling passage
N	Y10T 29/49343 Passage contains tubular insert
N	Y10T 29/49345	. . Catalytic device making
N	Y10T 29/49346	. . Rocket or jet device making
N	Y10T 29/49348	. . Burner, torch or metallurgical lance making
N	Y10T 29/4935	. . Heat exchanger or boiler making
N	Y10T 29/49352	. . . Repairing, converting, servicing or salvaging
N	Y10T 29/49353	. . . Heat pipe device making
N	Y10T 29/49355	. . . Solar energy device making
N	Y10T 29/49357	. . . Regenerator or recuperator making
N	Y10T 29/49359	. . . Cooling apparatus making, e.g., air conditioner, refrigerator
N	Y10T 29/49361	. . . Tube inside tube
N	Y10T 29/49362	. . . Tube wound about tube
N	Y10T 29/49364	. . . Tube joined to flat sheet longitudinally, i.e., tube sheet
N	Y10T 29/49366	. . . Sheet joined to sheet
N	Y10T 29/49368 with inserted tubes
N	Y10T 29/49369 Utilizing bond inhibiting material
N	Y10T 29/49371 with subsequent fluid expansion
N	Y10T 29/49373	. . . Tube joint and tube plate structure

N	Y10T 29/49375 including conduit expansion or inflation
N	Y10T 29/49377	. . . Tube with heat transfer means
N	Y10T 29/49378 Finned tube
N	Y10T 29/4938 Common fin traverses plurality of tubes
N	Y10T 29/49382 Helically finned
N	Y10T 29/49384 Internally finned
N	Y10T 29/49385 Made from unitary workpiece, i.e., no assembly
N	Y10T 29/49387	. . . Boiler making
N	Y10T 29/49389	. . . Header or manifold making
N	Y10T 29/49391	. . . Tube making or reforming
N	Y10T 29/49393	. . . with metallurgical bonding
N	Y10T 29/49394	. . Accumulator making
N	Y10T 29/49396	. . Condenser, evaporator or vaporizer making
N	Y10T 29/49398	. . Muffler, manifold or exhaust pipe making
N	Y10T 29/494	. . Fluidic or fluid actuated device making
N	Y10T 29/49401	. . Fluid pattern dispersing device making, e.g., ink jet
N	Y10T 29/49403	. . Tapping device making
N	Y10T 29/49405	. . Valve or choke making
N	Y10T 29/49407	. . . Repairing, converting, servicing or salvaging
N	Y10T 29/49409	. . . Valve seat forming
N	Y10T 29/4941	. . . Valve stem or tire valve making
N	Y10T 29/49412	. . . with assembly, disassembly or composite article making
N	Y10T 29/49414 Joining plural semi-circular components
N	Y10T 29/49416 with material shaping or cutting
N	Y10T 29/49417 including molding or casting
N	Y10T 29/49419 including machining or drilling
N	Y10T 29/49421 including metallurgical bonding
N	Y10T 29/49423 including metal deforming
N	Y10T 29/49425 including metallurgical bonding
N	Y10T 29/49426	. . . including metal shaping and diverse operation
N	Y10T 29/49428	. . Gas and water specific plumbing component making
N	Y10T 29/4943	. . . Plumbing fixture making
N	Y10T 29/49432	. . . Nozzle making
N	Y10T 29/49433 Sprayer
N	Y10T 29/49435	. . . Flexible conduit or fitting therefor
N	Y10T 29/49437	. . . Flue connector device making
N	Y10T 29/49439	. . . Trap making
N	Y10T 29/4944	. . . Return connector device making
N	Y10T 29/49442	. . . T-shaped fitting making
N	Y10T 29/49444	. . . Elbow or L-shaped fitting making
N	Y10T 29/49446	. . . Ferrule making or reforming
N	Y10T 29/49448	. . Agricultural device making
N	Y10T 29/49449	. . . Traction apparatus, e.g., for tractor
N	Y10T 29/49451	. . . Harvester guard

N	Y10T 29/49453	. . Pulley making
N	Y10T 29/49455	. . . Assembly
N	Y10T 29/49456 with shaping
N	Y10T 29/49458	. . . Disc splitting to form pulley rim groove
N	Y10T 29/4946	. . . Groove forming in sheet metal pulley rim
N	Y10T 29/49462	. . Gear making
N	Y10T 29/49464	. . . Assembling of gear into force transmitting device
N	Y10T 29/49465	. . . Gear mounting
N	Y10T 29/49467	. . . Gear shaping
N	Y10T 29/49469 Worm gear
N	Y10T 29/49471 Roll forming
N	Y10T 29/49472 Punching or stamping
N	Y10T 29/49474 Die-press shaping
N	Y10T 29/49476 Gear tooth cutting
N	Y10T 29/49478 Gear blank making
N	Y10T 29/4948 with specific gear material
N	Y10T 29/49481	. . Wheel making
N	Y10T 29/49483	. . . Railway or trolley wheel making
N	Y10T 29/49485 Multiple part or composite
N	Y10T 29/49487 with axle or hub
N	Y10T 29/49488	. . . Steering wheel
N	Y10T 29/4949	. . . Material winding, e.g., reel, spool
N	Y10T 29/49492	. . . Land wheel
N	Y10T 29/49494 Assembling tire to wheel body
N	Y10T 29/49496 Disc type wheel
N	Y10T 29/49497 Assembling wheel disc to rim and hub
N	Y10T 29/49499 Assembling wheel disc to rim
N	Y10T 29/49501 with disc shaping
N	Y10T 29/49503 Integral rim and disc making
N	Y10T 29/49504 Disc shaping
N	Y10T 29/49506 Tensioned spoke type wheel making
N	Y10T 29/49508 Tensioning all spokes simultaneously
N	Y10T 29/4951 Tensioning spokes in series
N	Y10T 29/49512 Tensioning spokes individually
N	Y10T 29/49513 Compression, e.g., nontension, spoke type wheel making
N	Y10T 29/49515 Joining spokes to rim and hub
N	Y10T 29/49517 Joining spokes to rim
N	Y10T 29/49519 Joining spokes to hub
N	Y10T 29/4952 Making plural spokes from a single blank
N	Y10T 29/49522 Individual spoke making
N	Y10T 29/49524 Rim making
N	Y10T 29/49526 with assembling
N	Y10T 29/49528 Demountable rim making
N	Y10T 29/49529 Die-press shaping

N	Y10T 29/49531 Roller forming
N	Y10T 29/49533 Hub making
N	Y10T 29/49535 with assembling
N	Y10T 29/49536 Hub shaping
N	Y10T 29/49538 Tire making
N	Y10T 29/4954 Wheel trim making, e.g., wheel cover, hubcap
N	Y10T 29/49542 with means for retaining trim member on wheel
N	Y10T 29/49544	. . Roller making
N	Y10T 29/49545	. . . Repairing or servicing
N	Y10T 29/49547	. . . Assembling preformed components
N	Y10T 29/49549 Work contacting surface element assembled to core
N	Y10T 29/49551 Work contacting surface wound about core
N	Y10T 29/49552 with prestressing of component by heat differential, e.g., shrink, fit
N	Y10T 29/49554 Work contacting surface having annular axial sections
N	Y10T 29/49556 Work contacting surface element assembled to end support members
N	Y10T 29/49558 Includes securing removable cover on roller
N	Y10T 29/4956	. . . Fabricating and shaping roller work contacting surface element
N	Y10T 29/49561 toothed roller
N	Y10T 29/49563 with coating or casting about a core
N	Y10T 29/49565	. . . One-piece roller making
N	Y10T 29/49567	. . Dental appliance making
N	Y10T 29/49568	. . . Orthodontic device making
N	Y10T 29/4957	. . Sound device making
N	Y10T 29/49572	. . . Hearing aid component making
N	Y10T 29/49574	. . . Musical instrument or tuning fork making
N	Y10T 29/49575	. . . including diaphragm or support therefor
N	Y10T 29/49577	. . . Phonograph component making
N	Y10T 29/49579	. . Watch or clock making
N	Y10T 29/49581	. . . having arbor, pinion, or balance
N	Y10T 29/49583	. . . having indicia, face, or dial
N	Y10T 29/49584	. . . having case, cover, or back
N	Y10T 29/49586	. . . having crown, stem, or pendent
N	Y10T 29/49588	. . Jewelry or locket making
N	Y10T 29/4959	. . . Human adornment device making
N	Y10T 29/49591 Bracelet making
N	Y10T 29/49593 Finger ring making
N	Y10T 29/49595	. . . Latch, clasp, or fastener component making
N	Y10T 29/49597	. . . Ornamental stock making
N	Y10T 29/49599	. . Knob or knob shank making
N	Y10T 29/496	. . Multiperforated metal article making
N	Y10T 29/49602	. . . Coil wound wall screen
N	Y10T 29/49604	. . . Filter
N	Y10T 29/49606	. . Turnbuckle making
N	Y10T 29/49607	. . Spring-head clip making

N	Y10T 29/49609	• • Spring making
N	Y10T 29/49611	• • • for vehicle or clutch
N	Y10T 29/49613	• • • for human comfort

N	Y10T 29/49831	• • • • Advancing station
N	Y10T 29/49833	• • • Punching, piercing or reaming part by surface of second part
N	Y10T 29/49835	• • • • with shaping
N	Y10T 29/49837	• • • • • of first part

- N Y10T 29/49838 . . . by stringing
- N Y10T 29/4984 . . . Retaining clearance for motion between assembled parts
- N Y10T 29/49842 Between tube-forming helical coils
- N Y10T 29/49844 Through resilient media
- N Y10T 29/49845 by deforming interlock
- N Y10T 29/49847 by folding part into plural ears
- N Y10T 29/49849 by wrapping around
- N Y10T 29/49851 of link closure
- N Y10T 29/49853 of sphere, i.e., ball, in socket
- N Y10T 29/49854 Ball point pen making
- N Y10T 29/49856 Allowing assembled sphere to move in single plane only
- N Y10T 29/49858 of flange into tubular socket
- N Y10T 29/4986 Outwardly deforming internally fitted rod
- N Y10T 29/49861 . . . Sizing mating parts during final positional association
- N Y10T 29/49863 . . . with prestressing of part
- N Y10T 29/49865 by temperature differential [e.g., shrink fit]
- N Y10T 29/49867 of skin on frame member
- N Y10T 29/49869 by flexing
- N Y10T 29/4987 Elastic joining of parts
- N Y10T 29/49872 Confining elastic part in socket
- N Y10T 29/49874 Prestressing rod, filament or strand
- N Y10T 29/49876 by snap fit
- N Y10T 29/49877 . . . of flexible wall, expansible chamber devices [e.g., bellows]
- N Y10T 29/49879 . . . Spaced wall tube or receptacle
- N Y10T 29/49881 . . . of separate helix [e.g., screw thread]
- N Y10T 29/49883 . . . Ribbing
- N Y10T 29/49885 . . . with coating before or during assembling
- N Y10T 29/49886 to roughen surface
- N Y10T 29/49888 . . . Subsequently coating
- N Y10T 29/4989 . . . with spreading of cable strands
- N Y10T 29/49892 . . . Joining plate edge perpendicularly to frame
- N Y10T 29/49893 . . . Peripheral joining of opposed mirror image parts to form a hollow body
- N Y10T 29/49895 . . . Associating parts by use of aligning means [e.g., use of a drift pin or a "fixture"]
- N Y10T 29/49897 Registering mating opposed tool parts [e.g., registering a punch and a cooperating die]
- N Y10T 29/49899 by multiple cooperating aligning means
- N Y10T 29/49901 Sequentially associating parts on stationary aligning means
- N Y10T 29/49902 by manipulating aligning means
- N Y10T 29/49904 . . . Assembling a subassembly, then assembling with a second subassembly
- N Y10T 29/49906 . . . Metal deforming with nonmetallic bonding
- N Y10T 29/49908 . . . Joining by deforming
- N Y10T 29/49909 Securing cup or tube between axially extending concentric annuli
- N Y10T 29/49911 by expanding inner annulus
- N Y10T 29/49913 by constricting outer annulus

N	Y10T 29/49915 Overedge assembling of seated part
N	Y10T 29/49917 by necking in cup or tube wall
N	Y10T 29/49918 At cup or tube end
N	Y10T 29/4992 by flaring inserted cup or tube end
N	Y10T 29/49922 by bending over projecting prongs
N	Y10T 29/49924 of parallel side-by-side elongated members
N	Y10T 29/49925 Inward deformation of aperture or hollow body wall
N	Y10T 29/49927 Hollow body is axially joined cup or tube
N	Y10T 29/49929 Joined to rod
N	Y10T 29/49931 Joined to overlapping ends of plural rods
N	Y10T 29/49933 After thinning
N	Y10T 29/49934 by axially applying force
N	Y10T 29/49936 Surface interlocking
N	Y10T 29/49938 Radially expanding part in cavity, aperture, or hollow body
N	Y10T 29/4994 Radially expanding internal tube
N	Y10T 29/49941 Peripheral edge joining of abutting plates
N	Y10T 29/49943 Riveting
N	Y10T 29/49945	. . . by driven force fit
N	Y10T 29/49947	. . . by applying separate fastener
N	Y10T 29/49948 Multipart cooperating fastener [e.g., bolt and nut]
N	Y10T 29/4995 Nonthreaded
N	Y10T 29/49952 At least one part is nonmetallic
N	Y10T 29/49954 Fastener deformed after application
N	Y10T 29/49956 Riveting
N	Y10T 29/49957 At least one part nonmetallic
N	Y10T 29/49959 Nonresilient fastener
N	Y10T 29/49961 At least one part nonmetallic
N	Y10T 29/49963 Threaded fastener
N	Y10T 29/49964 At least one part nonmetallic
N	Y10T 29/49966 with supplemental joining
N	Y10T 29/49968 Metal fusion joining
N	Y10T 29/4997 At least one part nonmetallic
N	Y10T 29/49972	. . with separating, localizing, or eliminating of as-cast defects from a metal casting [e.g., anti-pipe]
N	Y10T 29/49973	. . . Compressing ingot while still partially molten
N	Y10T 29/49975	. . . Removing defects
N	Y10T 29/49977 From center of ingot to leave hollow blank
N	Y10T 29/49979 After deforming
N	Y10T 29/4998	. . Combined manufacture including applying or shaping of fluent material
N	Y10T 29/49982	. . . Coating
N	Y10T 29/49984 and casting
N	Y10T 29/49986 Subsequent to metal working
N	Y10T 29/49988	. . . Metal casting
N	Y10T 29/49989 Followed by cutting or removing material

N	Y10T 29/49991 Combined with rolling
N	Y10T 29/49993 Filling of opening
N	Y10T 29/49995 Shaping one-piece blank by removing material
N	Y10T 29/49996 Successive distinct removal operations
N	Y10T 29/49998 Work holding
N	Y10T 29/50 Convertible metal working machine
N	Y10T 29/505 Vise type
N	Y10T 29/51 Plural diverse manufacturing apparatus including means for metal shaping or assembling
N	Y10T 29/5101 Slide fastener or slide fastener element
N	Y10T 29/5102 Binding or covering and cutting
N	Y10T 29/5103 Cutting covering material only
N	Y10T 29/5104 Type of machine
N	Y10T 29/5105 Drill press
N	Y10T 29/5107 Drilling and other
N	Y10T 29/5108 Portable
N	Y10T 29/5109 Lathe

N	Y10T 29/53091	• • • for work-holder for assembly or disassembly
N	Y10T 29/53096	• • including means to provide a controlled environment
N	Y10T 29/531	• • Nuclear device
N	Y10T 29/53104	• • Roller or ball bearing
N	Y10T 29/53109	• • • including deforming means
N	Y10T 29/53113	• • Heat exchanger
N	Y10T 29/53117	• • • including means to manipulate heat exchanger tube bundle
N	Y10T 29/53122	• • • including deforming means

N	Y10T 29/53126	• • Means to place sheath on running-length core
N	Y10T 29/5313	• • Means to assemble electrical device
N	Y10T 29/53135	• • • Storage cell or battery
N	Y10T 29/53139	• • • • including deforming means
N	Y10T 29/53143	• • • Motor or generator
N	Y10T 29/53148	• • • • Means to assemble commutator
N	Y10T 29/53152	• • • • Means to position insulation
N	Y10T 29/53157	• • • • Means to stake wire to commutator or armature
N	Y10T 29/53161	• • • • including deforming means
N	Y10T 29/53165	• • • Magnetic memory device
N	Y10T 29/5317	• • • Laminated device
N	Y10T 29/53174	• • • Means to fasten electrical component to wiring board, base, or substrate
N	Y10T 29/53178	• • • • Chip component
N	Y10T 29/53183	• • • • Multilead component
N	Y10T 29/53187	• • • Multiple station assembly apparatus
N	Y10T 29/53191	• • • Means to apply vacuum directly to position or hold work part
N	Y10T 29/53196	• • • Means to apply magnetic force directly to position or hold work part
N	Y10T 29/532	• • • Conductor
N	Y10T 29/53204	• • • • Electrode
N	Y10T 29/53209	• • • • Terminal or connector
N	Y10T 29/53213	• • • • • Assembled to wire-type conductor
N	Y10T 29/53217	• • • • • Means to simultaneously assemble multiple, independent conductors to terminal
N	Y10T 29/53222	• • • • • Means comprising hand-manipulatable implement
N	Y10T 29/53226	• • • • • • Fastening by deformation
N	Y10T 29/5323	• • • • • • Fastening by elastic joining
N	Y10T 29/53235	• • • • • • Means to fasten by deformation
N	Y10T 29/53239	• • • • • • Means to fasten by elastic joining
N	Y10T 29/53243	• • • • Multiple, independent conductors
N	Y10T 29/53248	• • • • Switch or fuse
N	Y10T 29/53252	• • • Means to simultaneously fasten three or more parts
N	Y10T 29/53257	• • • Means comprising hand-manipulatable implement
N	Y10T 29/53261	• • • Means to align and advance work part
N	Y10T 29/53265	• • • with work-holder for assembly
N	Y10T 29/5327	• • • Means to fasten by deforming
N	Y10T 29/53274	• • Means to disassemble electrical device
N	Y10T 29/53278	• • • Storage cell or battery
N	Y10T 29/53283	• • • Means comprising hand-manipulatable implement
N	Y10T 29/53287	• • Means to place traveler on ring or ring on bobbin of a textile machine
N	Y10T 29/53291	• • Slide fastener
N	Y10T 29/53296	• • • Means to assemble stop onto stringer
N	Y10T 29/533	• • • Means to assemble slider onto stringer
N	Y10T 29/53304	• • • Means to assemble teeth onto stringer
N	Y10T 29/53309	• • • Disassembly means

N	Y10T 29/53313	• • Means to interrelatedly feed plural work parts from plural sources without manual intervention
N	Y10T 29/53317	• • • Box or pallet assembly means
N	Y10T 29/53322	• • • Means to assemble container
N	Y10T 29/53326	• • • • Handle to container
N	Y10T 29/5333	• • • • Label to container
N	Y10T 29/53335	• • • • Pressurized dispensing container
N	Y10T 29/53339	• • • • Hypodermic syringe
N	Y10T 29/53343	• • • • including fluid component
N	Y10T 29/53348	• • • Running-length work
N	Y10T 29/53352	• • • • Means including orbiting running-length work supply
N	Y10T 29/53357	• • • • Pipe section
N	Y10T 29/53361	• • • • Assembled to article
N	Y10T 29/53365	• • • Multiple station assembly apparatus
N	Y10T 29/5337	• • • including assembly pallet
N	Y10T 29/53374	• • • including turret-type conveyor
N	Y10T 29/53378	• • • including converging conveyers
N	Y10T 29/53383	• • • and means to fasten work parts together
N	Y10T 29/53387	• • • • by deforming
N	Y10T 29/53391	• • • • by elastic joining
N	Y10T 29/53396	• • • • by friction fit
N	Y10T 29/534	• • Multiple station assembly or disassembly apparatus
N	Y10T 29/53404	• • • including turret-type conveyor
N	Y10T 29/53409	• • • including converging conveyers
N	Y10T 29/53413	• • • • and primary central conveyor
N	Y10T 29/53417	• • • Means to fasten work parts together
N	Y10T 29/53422	• • • • by deforming
N	Y10T 29/53426	• • • • by elastic joining
N	Y10T 29/5343	• • Means to drive self-piercing work part
N	Y10T 29/53435	• • including assembly pallet
N	Y10T 29/53439	• • including provision to utilize thermal expansion of work
N	Y10T 29/53443	• • Means to assemble or disassemble container and fluid component
N	Y10T 29/53448	• • Vehicle wheel
N	Y10T 29/53452	• • • Railway wheel
N	Y10T 29/53457	• • Tumbler lock
N	Y10T 29/53461	• • toy doll
N	Y10T 29/53465	• • Film or tape cartridge
N	Y10T 29/5347	• • Crystal to watch or clock
N	Y10T 29/53474	• • Means to insert or extract pen point
N	Y10T 29/53478	• • with magazine supply
N	Y10T 29/53483	• • • and magnetic work-holder or positioner
N	Y10T 29/53487	• • • Assembling means comprising hand-manipulatable implement
N	Y10T 29/53491	• • • • One work part comprising living tissue
N	Y10T 29/53496	• • • • comprising driver for snap-off-mandrel fastener; e.g., Pop [TM] riveter

N	Y10T 29/535 One work part comprising nut or screw
N	Y10T 29/53504 One work part comprising paper clip
N	Y10T 29/53509 Means to assemble tire stud into tire tread
N	Y10T 29/53513 Means to fasten by deforming
N	Y10T 29/53517 Fastening sinker to fishing line
N	Y10T 29/53522	. . . Means to fasten by deforming
N	Y10T 29/53526	. . Running-length work
N	Y10T 29/5353	. . . Assembled on core
N	Y10T 29/53535	. . including means to vibrate work
N	Y10T 29/53539	. . including work conveyer
N	Y10T 29/53543	. . . including transporting track
N	Y10T 29/53548 and work carrying vehicle
N	Y10T 29/53552	. . Valve applying or removing
N	Y10T 29/53557	. . . Engine valve unit puller or applier
N	Y10T 29/53561	. . . Engine valve spring compressor [only]
N	Y10T 29/53565 Plural spring engagement
N	Y10T 29/5357 Screw operated
N	Y10T 29/53574 Parallel or tong type, side entrance
N	Y10T 29/53578 Lever operated
N	Y10T 29/53583 Single jaw or valve engagement
N	Y10T 29/53587 Plier type
N	Y10T 29/53591	. . . to or from wheel rim of resilient tire or tube
N	Y10T 29/53596	. . . Removal tool
N	Y10T 29/536	. . Piston ring inserter or remover
N	Y10T 29/53604	. . . Plier-type operation
N	Y10T 29/53609 with ring encirclement
N	Y10T 29/53613	. . Spring applier or remover
N	Y10T 29/53617	. . . Transmission spring
N	Y10T 29/53622	. . . Helical spring
N	Y10T 29/53626	. . . Flat spiral spring [e.g., watch or clock type]
N	Y10T 29/5363	. . . Circular spring
N	Y10T 29/53635	. . . Leaf spring
N	Y10T 29/53639	. . Means to stake watch or clock
N	Y10T 29/53643	. . . Plier type
N	Y10T 29/53648	. . Brake lining to brake shoe
N	Y10T 29/53652	. . Tube and coextensive core
N	Y10T 29/53657	. . to apply or remove a resilient article [e.g., tube, sleeve, etc.]
N	Y10T 29/53661	. . . Nipple to nursing bottle
N	Y10T 29/53665	. . . Well protector to sucker rod
N	Y10T 29/5367	. . Coupling to conduit
N	Y10T 29/53674	. . Loose-leaf sheet binder
N	Y10T 29/53678	. . Compressing parts together face to face
N	Y10T 29/53683	. . Spreading parts apart or separating them from face to face engagement
N	Y10T 29/53687	. . by rotation of work part

N	Y10T 29/53691	. . . Means to insert or remove helix
N	Y10T 29/53696	. . Means to string
N	Y10T 29/537	. . tool handle and tool
N	Y10T 29/53704	. . tool chuck and tool
N	Y10T 29/53709	. . Overedge assembling means
N	Y10T 29/53713	. . . Belt-hook attacher
N	Y10T 29/53717	. . . Annular work
N	Y10T 29/53722 with radially acting tool inside annular work
N	Y10T 29/53726 with second workpiece inside annular work one workpiece moved to shape the other
N	Y10T 29/5373 comprising driver for snap-off-mandrel fastener; e.g., Pop [TM] riveter
N	Y10T 29/53735 including near side fastener shaping tool
N	Y10T 29/53739 Pneumatic- or fluid-actuated tool
N	Y10T 29/53743 Liquid
N	Y10T 29/53748 and gas
N	Y10T 29/53752 having rotary drive mechanism
N	Y10T 29/53757 having allochiral actuating handles
N	Y10T 29/53761 having repositionable annulus engaging tool
N	Y10T 29/53765 including near side fastener shaping tool
N	Y10T 29/5377	. . . Riveter
N	Y10T 29/53774 Single header
N	Y10T 29/53778 Pipe joiner
N	Y10T 29/53783	. . . Clip applier
N	Y10T 29/53787	. . . Binding or covering
N	Y10T 29/53791 Edge binding
N	Y10T 29/53796	. . Puller or pusher means, contained force multiplying operator
N	Y10T 29/538	. . . Hubcap and hub
N	Y10T 29/53804	. . . Battery post and terminal
N	Y10T 29/53809	. . . Cotter pin and cooperating member
N	Y10T 29/53813 Plier type means
N	Y10T 29/53817	. . . Valve stem pin or key and another member
N	Y10T 29/53822	. . . Machine key and another member
N	Y10T 29/53826	. . . Arbor-type press means
N	Y10T 29/5383	. . . having fluid operator
N	Y10T 29/53835	. . . having wedge operator
N	Y10T 29/53839	. . . having percussion or explosive operator
N	Y10T 29/53843 Tube, sleeve, or ferrule inserting or removing
N	Y10T 29/53848	. . . having screw operator
N	Y10T 29/53852 C-frame
N	Y10T 29/53857 Central screw, work-engagers around screw
N	Y10T 29/53861 Work-engager arms along or parallel to screw
N	Y10T 29/53865 with arm connecting engaging means
N	Y10T 29/5387 Pivotal arms
N	Y10T 29/53874 Pivotal grippers on screw

N	Y10T 29/53878 Tubular or tube segment forms work-engager
N	Y10T 29/53883 Screw threaded work-engager
N	Y10T 29/53887 Movable grippers on screw
N	Y10T 29/53891 Plate or bar forms work-engager
N	Y10T 29/53896	. . . having lever operator
N	Y10T 29/539 Plier type means
N	Y10T 29/53904	. . Means comprising piston ring group contractor or holder
N	Y10T 29/53909	. . Means comprising hand manipulatable tool
N	Y10T 29/53913	. . . Aligner or center
N	Y10T 29/53917 Tube with tube
N	Y10T 29/53922 Auto wheel with auto chassis
N	Y10T 29/53926 Clutch plates
N	Y10T 29/5393	. . . Means comprising impact receiving tool
N	Y10T 29/53935 C-frame
N	Y10T 29/53939 Thread protector [e.g., wheel axle type]
N	Y10T 29/53943	. . . Hand gripper for direct push or pull
N	Y10T 29/53948 Centrifugal separator
N	Y10T 29/53952 Tube sleeve or ferrule applying or removing
N	Y10T 29/53957 Thread-tapping grip
N	Y10T 29/53961	. . with work-holder for assembly
N	Y10T 29/53965	. . . for assembling a luminescent mantle
N	Y10T 29/5397	. . . and assembling press [e.g., truss assembling means, etc.]
N	Y10T 29/53974	. . . having means to permit support movement while work is thereon
N	Y10T 29/53978	. . including means to relatively position plural work parts
N	Y10T 29/53983	. . Work-supported apparatus
N	Y10T 29/53987	. . Tube, sleeve or ferrule
N	Y10T 29/53991	. . Work gripper, anvil, or element
N	Y10T 29/53996	. . by deforming
N	Y10T 29/54	. Miscellaneous apparatus
N	Y10T 74/00 - Y10T 74/00	<u>Former US Class 74 Series</u>
N	Y10T 74/00	Machine element or mechanism
N	Y10T 74/10	. High frequency vibratory devices
N	Y10T 74/11	. Tripping mechanism
N	Y10T 74/111	. . Speed controlled
N	Y10T 74/113	. . . Valve gear trips [e.g., steam engine "Corliss" type]
N	Y10T 74/114	. . Retarded
N	Y10T 74/115	. . . Plural, sequential, trip actuations
N	Y10T 74/116	. . . Clock train
N	Y10T 74/118 Winding knob trip [e.g., alarm mechanism]
N	Y10T 74/119	. . Hit and miss
N	Y10T 74/12	. Gyroscopes
N	Y10T 74/1204	. . with caging or parking means
N	Y10T 74/1207	. . . Rotor spin and cage release type

N	Y10T 74/1211	• • • and resetting means
N	Y10T 74/1214	• • with gimbal lock preventing means
N	Y10T 74/1218	• • Combined
N	Y10T 74/1221	• • Multiple gyroscopes
N	Y10T 74/1225	• • • with rotor drives
N	Y10T 74/1229	• • Gyroscope control
N	Y10T 74/1232	• • • Erecting
N	Y10T 74/1236	• • • • by plural diverse forces
N	Y10T 74/1239	• • • • by jet
N	Y10T 74/1243	• • • • by weight
N	Y10T 74/1246	• • • • by friction
N	Y10T 74/125	• • • • by magnetic field
N	Y10T 74/1254	• • • • by motor torque
N	Y10T 74/1257	• • • Damping
N	Y10T 74/1261	• • with pick off
N	Y10T 74/1264	• • • Optical
N	Y10T 74/1268	• • • Pneumatic
N	Y10T 74/1271	• • • Conducting liquid
N	Y10T 74/1275	• • • Electrical
N	Y10T 74/1279	• • • Electrical and magnetic
N	Y10T 74/1282	• • with rotor drive
N	Y10T 74/1286	• • Vertical gyroscopes
N	Y10T 74/1289	• • Horizontal gyroscopes
N	Y10T 74/1293	• • Flexure hinges for gyros
N	Y10T 74/1296	• • Flywheel structure
N	Y10T 74/13	• Machine starters
N	Y10T 74/131	• • Automatic
N	Y10T 74/132	• • • Separate power mesher
N	Y10T 74/133	• • • Holders
N	Y10T 74/134	• • • Clutch connection
N	Y10T 74/136	• • • Worm and wheel
N	Y10T 74/137	• • • Reduction gearing
N	Y10T 74/138	• • Radial meshing
N	Y10T 74/139	• • Cam operated
N	Y10T 74/14	• Rotary member or shaft indexing, e.g., tool or work turret
N	Y10T 74/1406	• • with safety device or drive disconnect
N	Y10T 74/1412	• • with locating point adjusting
N	Y10T 74/1418	• • Preselected indexed position
N	Y10T 74/1424	• • • Sequential
N	Y10T 74/1429	• • • • Skip position
N	Y10T 74/1435	• • • • Held by torque
N	Y10T 74/1441	• • • • Geneva or mutilated gear drive
N	Y10T 74/1447	• • • • Velocity control
N	Y10T 74/1453	• • • • Interlocked rotator and brake

N	Y10T 74/1459 Diverse-type brakes
N	Y10T 74/1465 with axially acting friction brake
N	Y10T 74/1471	. . Plural operators or input drives
N	Y10T 74/1476	. . with means to axially shift shaft
N	Y10T 74/1482	. . Single revolution input effects desired fractional output
N	Y10T 74/1488	. . Control means
N	Y10T 74/1494	. . Locking means
N	Y10T 74/15	. Intermittent grip type mechanical movement
N	Y10T 74/1502	. . Escapement
N	Y10T 74/1503	. . Rotary to intermittent unidirectional motion
N	Y10T 74/1505	. . . Automatically controlled
N	Y10T 74/1506 Speed
N	Y10T 74/1508	. . . Rotary crank or eccentric drive
N	Y10T 74/151 Adjustable
N	Y10T 74/1511 Lever transmitter
N	Y10T 74/1513 Adjustable leverage
N	Y10T 74/1515 Rack and pinion transmitter
N	Y10T 74/1516 Adjustable throw
N	Y10T 74/1518 Rotary cam drive
N	Y10T 74/1519 Adjustable throw
N	Y10T 74/1521 Radial cam
N	Y10T 74/1523 Radial cam
N	Y10T 74/1524	. . . Intermittently engaged clutch
N	Y10T 74/1526	. . Oscillation or reciprocation to intermittent unidirectional motion
N	Y10T 74/1527	. . . Screw and nut devices
N	Y10T 74/1529	. . . Slide actuator
N	Y10T 74/1531 Multiple acting
N	Y10T 74/1532	. . . Rack actuator
N	Y10T 74/1534 Multiple acting
N	Y10T 74/1535 Inwardly facing racks
N	Y10T 74/1537 Oscillating
N	Y10T 74/1539 Multiple acting
N	Y10T 74/154 Inwardly facing racks
N	Y10T 74/1542	. . . Strap actuator
N	Y10T 74/1544 Multiple acting
N	Y10T 74/1545 Spring or weight return
N	Y10T 74/1547 Single acting
N	Y10T 74/1548 Engine starter type
N	Y10T 74/155 Spring or weight return
N	Y10T 74/1552 Spring or weight return
N	Y10T 74/1553	. . . Lever actuator
N	Y10T 74/1555 Rotary driven element
N	Y10T 74/1556 Multiple acting
N	Y10T 74/1558	. . Grip units and features

N	Y10T 74/156	. . . Compound movement handle
N	Y10T 74/1561 Reversible
N	Y10T 74/1563 Transverse pivots
N	Y10T 74/1565	. . . Gripper releasing devices
N	Y10T 74/1566 Power pawl lifter
N	Y10T 74/1568 Automatic
N	Y10T 74/1569 Idle stroke
N	Y10T 74/1571 Cooperating holding pawl
N	Y10T 74/1573 Power stroke
N	Y10T 74/1574 Cooperating holding pawl
N	Y10T 74/1576 Holding pawl lifter
N	Y10T 74/1577	. . . Gripper mountings, lever
N	Y10T 74/1579 Reversible
N	Y10T 74/1581 Multiple acting
N	Y10T 74/1582 Single ratchet or clutch
N	Y10T 74/1584	. . . Gripper mountings, slide
N	Y10T 74/1585 Multiple acting
N	Y10T 74/1587	. . . Grip features
N	Y10T 74/1589 Driving band
N	Y10T 74/159 Clamping
N	Y10T 74/1592 Driven band and gripper
N	Y10T 74/1594 Positive grip
N	Y10T 74/1595 Driving ratchet-bar or rack
N	Y10T 74/1597 Multiple acting
N	Y10T 74/1598 Driven ratchet-bar and power dog
N	Y10T 74/16	. Alternating-motion driven device with means during operation to adjust stroke
N	Y10T 74/1608	. . Constant length stroke with means to displace end limits
N	Y10T 74/1616	. . . Cyclical displacement responsive to the alternating-motion
N	Y10T 74/1625	. . Stroke adjustable to zero and/or reversible in phasing
N	Y10T 74/1633	. . . Plural driving means to jointly drive the driven device
N	Y10T 74/1642	. . . Device driven from selected points on oscillating link
N	Y10T 74/165	. . . Driving lever with adjustable pivot point
N	Y10T 74/1658	. . . Eccentric and strap drive, shiftable eccentric
N	Y10T 74/1667 Changing the extent of eccentricity
N	Y10T 74/1675	. . . Crank pin drive, shiftable pin
N	Y10T 74/1683	. . . Cam and follower drive
N	Y10T 74/1692 Axial-type cam [e.g., wobbler type]
N	Y10T 74/17	. Rotary driven device adjustable during operation relative to its supporting structure
N	Y10T 74/173	. . Screw and nut adjusting means
N	Y10T 74/177	. . Rack and pinion adjusting means
N	Y10T 74/18	. Mechanical movements
N	Y10T 74/18008	. . Oscillating to reciprocating and alternating rotary
N	Y10T 74/18016	. . Oscillating to reciprocating and intermittent rotary

N	Y10T 74/18024	• • Rotary to reciprocating and rotary
N	Y10T 74/18032	• • • Rotary to reciprocating or rotary
N	Y10T 74/1804	• • Rotary to reciprocating and alternating rotary
N	Y10T 74/18048	• • Rotary to reciprocating and intermittent rotary
N	Y10T 74/18056	• • Rotary to or from reciprocating or oscillating
N	Y10T 74/18064	• • • Head motions
N	Y10T 74/18072	• • • Reciprocating carriage motions
N	Y10T 74/1808	• • • • Phonograph type
N	Y10T 74/18088	• • • Rack and pinion type
N	Y10T 74/18096	• • • • Shifting rack
N	Y10T 74/18104	• • • • Shiftable pinion
N	Y10T 74/18112	• • • • Segmental pinion
N	Y10T 74/1812	• • • • Alternately rotated pinion
N	Y10T 74/18128	• • • • Clutchable gears
N	Y10T 74/18136	• • • • • Bevel
N	Y10T 74/18144	• • • Overcoming dead center
N	Y10T 74/18152	• • • Belt or chain carried member
N	Y10T 74/1816	• • • Crank, lever, toggle, and slide
N	Y10T 74/18168	• • • Crank, lazy-tong, and slide
N	Y10T 74/18176	• • • Crank, pitman, lever, and slide
N	Y10T 74/18182	• • • • Pump jack type
N	Y10T 74/18184	• • • Crank, pitman, and lever
N	Y10T 74/182	• • • • Multiple levers
N	Y10T 74/18208	• • • Crank, pitman, and slide
N	Y10T 74/18216	• • • Crank, lever, and slide
N	Y10T 74/18224	• • • • Rack connections
N	Y10T 74/18232	• • • Crank and lever
N	Y10T 74/1824	• • • • Slidable connections
N	Y10T 74/18248	• • • Crank and slide
N	Y10T 74/18256	• • • • Slidable connections [e.g., scotch yoke]
N	Y10T 74/18264	• • • Crank and multiple pitmans
N	Y10T 74/18272	• • • Planetary gearing and slide
N	Y10T 74/1828	• • • Cam, lever, and slide
N	Y10T 74/18288	• • • Cam and lever
N	Y10T 74/18296	• • • Cam and slide
N	Y10T 74/18304	• • • • Axial cam
N	Y10T 74/18312	• • • • • Grooved
N	Y10T 74/1832	• • • • • Multiple screw
N	Y10T 74/18328	• • • • • Alternately rotated screw
N	Y10T 74/18336	• • • • Wabblers type
N	Y10T 74/18344	• • • Unbalanced weights
N	Y10T 74/18352	• • • Trammel-pitman
N	Y10T 74/1836	• • Rotary to rotary
N	Y10T 74/18368	• • • Inertia or centrifugal transmitters

N	Y10T 74/18376	. . . Crank, pitman, lever, and crank
N	Y10T 74/18384	. . . Crank, lever, and crank
N	Y10T 74/18392	. . . Crank, pitman, and crank
N	Y10T 74/184	. . . Cranks, link connected
N	Y10T 74/18408	. . . Cranks, slidable connections
N	Y10T 74/18416	. . Rotary to alternating rotary
N	Y10T 74/18424	. . . Mangle connections
N	Y10T 74/18432 Shiftable driven gear
N	Y10T 74/1844 Central teeth
N	Y10T 74/18448 Mutilated gearing connections
N	Y10T 74/18456	. . . Crank, pitman, and lever
N	Y10T 74/18464	. . . Reciprocating rack connections
N	Y10T 74/18472 Crank and pitman actuator
N	Y10T 74/1848 Simple crank actuator
N	Y10T 74/18488	. . . Oscillating rack connections
N	Y10T 74/18496 Mangle actuated
N	Y10T 74/18504 Crank and pitman actuator
N	Y10T 74/18512	. . . Flexible connector type
N	Y10T 74/1852	. . . Associated inertia devices
N	Y10T 74/18528	. . Rotary to intermittent unidirectional motion
N	Y10T 74/18536	. . . Space machines
N	Y10T 74/18544	. . Rotary to gyratory
N	Y10T 74/18552	. . . Unbalanced weight
N	Y10T 74/1856	. . Reciprocating or oscillating to intermittent unidirectional motion
N	Y10T 74/18568	. . Reciprocating or oscillating to or from alternating rotary
N	Y10T 74/18576	. . . including screw and nut
N	Y10T 74/18584 Shaft shorter than nut
N	Y10T 74/18592 Auxiliary drive [e.g., fluid piston, etc.] for load
N	Y10T 74/186 Alternate power path operable on failure of primary
N	Y10T 74/18608 Single input split into two intermediate outputs that are subsequently superposed into a single output
N	Y10T 74/18616 Single input, plural outputs
N	Y10T 74/18624 Plural inputs, single output
N	Y10T 74/18632 Plural nuts driving shaft
N	Y10T 74/1864 Shaft and nut driven
N	Y10T 74/18648 Carriage surrounding, guided by, and primarily supported by member other than screw [e.g., linear guide, etc.]
N	Y10T 74/18656 Carriage surrounded, guided, and primarily supported by member other than screw [e.g., linear guide, etc.]
N	Y10T 74/18664 Shaft moves through rotary drive means
N	Y10T 74/18672 Plural screws in series [e.g., telescoping, etc.]
N	Y10T 74/1868 Deflection related
N	Y10T 74/18688 Limit stop
N	Y10T 74/18696 including means to selectively transmit power [e.g., clutch, etc.]
N	Y10T 74/18704 Means to selectively lock or retard screw or nut

N	Y10T 74/18712 Contamination related
N	Y10T 74/1872 Imperforate enclosure
N	Y10T 74/18728 Backlash
N	Y10T 74/18736 Pressurized fluid introduced between nut and screw
N	Y10T 74/18744 Lubrication
N	Y10T 74/18752 Manually driven
N	Y10T 74/1876	. . . including inertia device
N	Y10T 74/18768 with rack and pinion
N	Y10T 74/18776 Rectilinear rack
N	Y10T 74/18784	. . . including bevel gears
N	Y10T 74/18792	. . . including worm
N	Y10T 74/188	. . . including spur gear
N	Y10T 74/18808 with rack
N	Y10T 74/18816 Curvilinear rack
N	Y10T 74/18824 with biasing means
N	Y10T 74/18832	. . . including flexible drive connector [e.g., belt, chain, strand, etc.]
N	Y10T 74/1884 with sprocket wheel
N	Y10T 74/18848 with pulley
N	Y10T 74/18856	. . Oscillating to oscillating
N	Y10T 74/18864	. . . Snap action
N	Y10T 74/18872 Plate spring
N	Y10T 74/1888	. . . Geared connections
N	Y10T 74/18888	. . Reciprocating to or from oscillating
N	Y10T 74/18896	. . . Snap action
N	Y10T 74/18904 Plate spring
N	Y10T 74/18912	. . . Compound lever and slide
N	Y10T 74/1892	. . . Lever and slide
N	Y10T 74/18928 Straight line motions
N	Y10T 74/18936 Slidable connections
N	Y10T 74/18944 Link connections
N	Y10T 74/18952 toggle transmissions
N	Y10T 74/1896 Cam connections
N	Y10T 74/18968 Flexible connections
N	Y10T 74/18976	. . . Rack and pinion
N	Y10T 74/18984	. . . Inclined ramp
N	Y10T 74/18992	. . Reciprocating to reciprocating
N	Y10T 74/19	. Gearing
N	Y10T 74/19005	. . Nonplanetary gearing differential type [e.g., gearless differentials]
N	Y10T 74/19009	. . Single gearing unit includes fluid drive
N	Y10T 74/19014	. . Plural prime movers selectively coupled to common output
N	Y10T 74/19019	. . Plural power paths from prime mover
N	Y10T 74/19023	. . Plural power paths to and/or from gearing
N	Y10T 74/19028	. . . Alternate input connections single hand crank
N	Y10T 74/19033	. . . Fluid drive divides or combines alternate paths

N	Y10T 74/19037	. . . One path includes fluid drive
N	Y10T 74/19042	. . . Friction-type gearing
N	Y10T 74/19047	. . . Worm-type gearing
N	Y10T 74/19051	. . . Single driven plural drives
N	Y10T 74/19056 Parallel
N	Y10T 74/1906 Nonparallel
N	Y10T 74/19065 Aligned
N	Y10T 74/1907 Parallel and aligned
N	Y10T 74/19074	. . . Single drive plural driven
N	Y10T 74/19079 Parallel
N	Y10T 74/19084 Spur
N	Y10T 74/19088 Bevel
N	Y10T 74/19093 Spur and bevel
N	Y10T 74/19098 Helical
N	Y10T 74/19102 Belt or chain
N	Y10T 74/19107 Nonparallel
N	Y10T 74/19112 Aligned
N	Y10T 74/19116 Vehicle
N	Y10T 74/19121 Concentric
N	Y10T 74/19126	. . . Plural drivers plural driven
N	Y10T 74/1913 Bevel
N	Y10T 74/19135 Spur
N	Y10T 74/1914	. . . Alternate drivers and driven
N	Y10T 74/19144	. . . Miscellaneous [plural power paths]
N	Y10T 74/19149	. . with fluid drive
N	Y10T 74/19153	. . . Condition responsive control
N	Y10T 74/19158	. . . with one or more controllers for gearing, fluid drive, or clutch
N	Y10T 74/19163 with interrelated controls
N	Y10T 74/19167	. . In series plural interchangeably locked nonplanetary units
N	Y10T 74/19172	. . Reversal of direction of power flow changes power transmission to alternate path
N	Y10T 74/19177	. . . Input and output exchange functions
N	Y10T 74/19181	. . toothed gear and recirculated unconnected elements
N	Y10T 74/19186	. . Alternating rotary or continuous
N	Y10T 74/19191	. . Alternating rotary
N	Y10T 74/19195	. . . Progressive
N	Y10T 74/192	. . . Shiftable and/or slidable gears
N	Y10T 74/19205	. . . Clutchable gears
N	Y10T 74/1921 On single driven member
N	Y10T 74/19214 On single driving member
N	Y10T 74/19219	. . Interchangeably locked
N	Y10T 74/19223	. . . Disconnectable counter shaft
N	Y10T 74/19228	. . . Multiple concentric clutch shafts
N	Y10T 74/19233	. . . Plurality of counter shafts

N	Y10T 74/19237	. . . Internal-external gears
N	Y10T 74/19242	. . . Combined gear and clutch
N	Y10T 74/19247 Preselector
N	Y10T 74/19251	. . . Control mechanism
N	Y10T 74/19256 Automatic
N	Y10T 74/1926 Speed responsive
N	Y10T 74/19265 Governor
N	Y10T 74/1927 with belt gearing
N	Y10T 74/19274 torque responsive
N	Y10T 74/19279 Cam operated
N	Y10T 74/19284	. . . Meshing assisters
N	Y10T 74/19288 Double clutch and interposed transmission
N	Y10T 74/19293	. . . Longitudinally slidable
N	Y10T 74/19298 Multiple spur gears
N	Y10T 74/19302 with tumbler gear
N	Y10T 74/19307 Selective
N	Y10T 74/19312 Direct clutch and drive
N	Y10T 74/19316 Progressive
N	Y10T 74/19321 Direct clutch and drive
N	Y10T 74/19326 Fluid operated
N	Y10T 74/1933 Multiple bevel gears
N	Y10T 74/19335 Single spur gear
N	Y10T 74/1934 Tumbler and cone
N	Y10T 74/19344 Multiple cone
N	Y10T 74/19349 Single bevel gear
N	Y10T 74/19353 Pin or crown gears
N	Y10T 74/19358	. . . Laterally slidable gears
N	Y10T 74/19363 Rotary carriage
N	Y10T 74/19367 Swinging carriage
N	Y10T 74/19372	. . . Single forward and reverse speeds
N	Y10T 74/19377	. . . Slidable keys or clutches
N	Y10T 74/19381 Alternative clutch shaft
N	Y10T 74/19386 Multiple clutch shafts
N	Y10T 74/19391 Progressive
N	Y10T 74/19395 Keys simultaneously slidable
N	Y10T 74/194 Selective
N	Y10T 74/19405 Multiple forward and reverse
N	Y10T 74/19409 Single forward and reverse
N	Y10T 74/19414 Single clutch shaft
N	Y10T 74/19419 Progressive
N	Y10T 74/19423 Multiple key
N	Y10T 74/19428 Spur
N	Y10T 74/19433 Fluid operated
N	Y10T 74/19437 Electrically operated

N	Y10T 74/19442 Single key
N	Y10T 74/19447 Clutch and ratchet
N	Y10T 74/19451 Spur gears
N	Y10T 74/19456 Intermediate clutch
N	Y10T 74/1946 Sliding clutch carrier
N	Y10T 74/19465 Sliding clutch operator
N	Y10T 74/1947 Selective
N	Y10T 74/19474 Multiple key
N	Y10T 74/19479 Spur gears
N	Y10T 74/19484 Single speed forward and reverse
N	Y10T 74/19488 Spur gears
N	Y10T 74/19493 Bevel gears
N	Y10T 74/19498 Bevel and idler gears
N	Y10T 74/19502	. . Pivotaly supported
N	Y10T 74/19507	. . . Windmill turntable
N	Y10T 74/19512	. . . Screw
N	Y10T 74/19516	. . . Spur
N	Y10T 74/19521	. . . Bevel
N	Y10T 74/19526 Wheel type
N	Y10T 74/1953 Wringer type
N	Y10T 74/19535	. . Follow-up mechanism
N	Y10T 74/1954	. . Eccentric driving shaft and axle
N	Y10T 74/19545	. . Central driving shaft in axle
N	Y10T 74/1955	. . Parallel shafts, adjustable gear mesh
N	Y10T 74/19555	. . Varying speed ratio
N	Y10T 74/1956	. . Adjustable
N	Y10T 74/19565	. . . Relative movable axes
N	Y10T 74/1957 Parallel shafts
N	Y10T 74/19575 Automatic control
N	Y10T 74/1958 Parallel shafts
N	Y10T 74/19585	. . . Fixed axes
N	Y10T 74/1959 Parallel shafts
N	Y10T 74/19595 Automatic control
N	Y10T 74/196 Parallel shafts
N	Y10T 74/19605	. . Reversing means
N	Y10T 74/19609	. . . Governor control
N	Y10T 74/19614	. . Disconnecting means
N	Y10T 74/19619	. . Displaceable elements
N	Y10T 74/19623	. . Backlash take-up
N	Y10T 74/19628	. . Pressure distributing
N	Y10T 74/19633	. . Yieldability in gear trains
N	Y10T 74/19637	. . with brake means for gearing
N	Y10T 74/19642	. . Directly cooperating gears
N	Y10T 74/19647	. . . Parallel axes or shafts

N	Y10T 74/19651 External type
N	Y10T 74/19656 Pin teeth
N	Y10T 74/1966	. . . Intersecting axes
N	Y10T 74/19665 Bevel gear type
N	Y10T 74/1967	. . . Rack and pinion
N	Y10T 74/19674	. . . Spur and bevel
N	Y10T 74/19679	. . . Spur
N	Y10T 74/19684 Motor and gearing
N	Y10T 74/19688	. . . Bevel
N	Y10T 74/19693 Motor vehicle drive
N	Y10T 74/19698	. . . Spiral
N	Y10T 74/19702 Screw and nut
N	Y10T 74/19707 Plural longitudinally variably spaced nuts
N	Y10T 74/19712 Threadless
N	Y10T 74/19716 Non-linear screw
N	Y10T 74/19721 Thread geometry
N	Y10T 74/19726 Thread pitch varies over axial length
N	Y10T 74/1973 Shaft thread is spirally wound wire
N	Y10T 74/19735 Nut disengageable from screw
N	Y10T 74/1974 Nut segments hinged parallel to shaft [e.g., clam shell-type, etc.]
N	Y10T 74/19744 Rolling element engaging thread
N	Y10T 74/19749 Recirculating rolling elements
N	Y10T 74/19753 Plural independent recirculating element paths
N	Y10T 74/19758 Single thread common to plural paths
N	Y10T 74/19763 Roller return path in shaft
N	Y10T 74/19767 Return path geometry
N	Y10T 74/19772 Rolling element deflector
N	Y10T 74/19777 Interconnected or cooperating rollers or roller structure
N	Y10T 74/19781 Non-recirculating rolling elements
N	Y10T 74/19786 Captured sphere
N	Y10T 74/19791 Cylindrical or quasi-cylindrical roller element [e.g., inclined roller, etc.]
N	Y10T 74/19795 Parallel to shaft
N	Y10T 74/198 Perpendicular to shaft
N	Y10T 74/19805 Less than 360 degrees of contact between nut and screw
N	Y10T 74/19809 Independent nut segments
N	Y10T 74/19814 Integral deformable tangs engaging screw
N	Y10T 74/19819	. . . Driven rack or shaft
N	Y10T 74/19823	. . . Screw
N	Y10T 74/19828	. . . Worm
N	Y10T 74/19833 Variable speed
N	Y10T 74/19837 Intermittent motion
N	Y10T 74/19842 Distribution of pressure
N	Y10T 74/19847	. . . torque actuated safety devices

- N Y10T 82/2571 . . . Alignment adjuster
- N Y10T 82/2572 . . Attachment
- N Y10T 82/2574 . . . Stop [e.g., carriage, tool, work, etc.]
- N Y10T 82/2577 Tool slide
- N Y10T 82/2579 Collet or spindle
- N Y10T 82/2581 Indexible [e.g., roll type, etc.]
- N Y10T 82/2583 . . Tool and work rest
- N Y10T 82/2585 . . Tool rest
- N Y10T 82/2587 . . . Turret type holder [e.g., multiple tools, etc.]
- N Y10T 82/2589 . . . Quick release tool or holder clamp
- N Y10T 82/2591 . . . Tool post
- N Y10T 82/2593 . . Work rest
- N Y10T 82/2595 . . . with noise or vibration dampener
- N Y10T 82/2597 . . . Center rest
- N Y10T 82/26 . . Work driver
- N Y10T 82/262 . . Lathe dog
- N Y10T 82/264 . . . Cam grip
- N Y10T 82/266 . . Mandrel
- N Y10T 82/268 . . . Expansible
- N Y10T 82/27 . . Centerer
- N Y10T 82/28 . . Drill press attachment for turning
- N Y10T 82/29 . . Attachment for cutting a valve
- N Y10T 82/30 . . Miscellaneous

**N Y10T 117/00 -
Y10T 117/00**

Former US Class 117 Series

- N Y10T 117/00 *Single-crystal, oriented-crystal, and epitaxy growth processes; non-coating apparatus therefor***
- N Y10T 117/10 . . Apparatus
 - N Y10T 117/1004 . . . with means for measuring, testing, or sensing
 - N Y10T 117/1008 with responsive control means
 - N Y10T 117/1012 with a window or port for visual observation or examination
 - N Y10T 117/1016 . . . with means for treating single-crystal [e.g., heat treating]
 - N Y10T 117/102 . . . for forming a platelet shape or a small diameter, elongate, generally cylindrical shape [e.g., whisker, fiber, needle, filament]
 - N Y10T 117/1024 . . . for crystallization from liquid or supercritical state
 - N Y10T 117/1028 Crucibleless apparatus having means providing movement of discrete droplets or solid particles to thin-film precursor [e.g., Verneuil method]

N	Y10T 117/1032	• • • Seed pulling
N	Y10T 117/1036	• • • • including solid member shaping means other than seed or product [e.g., EDHG die]
N	Y10T 117/104	• • • • • Means for forming a hollow structure [e.g., tube, polygon]
N	Y10T 117/1044	• • • • • including means forming a flat shape [e.g., ribbon]
N	Y10T 117/1048	• • • • • • Pulling includes a horizontal component
N	Y10T 117/1052	• • • • including a sectioned crucible [e.g., double crucible, baffle]
N	Y10T 117/1056	• • • • including details of precursor replenishment
N	Y10T 117/106	• • • • including sealing means details
N	Y10T 117/1064	• • • • including a fully-sealed or vacuum-maintained crystallization chamber [e.g., ampoule]
N	Y10T 117/1068	• • • • including heating or cooling details [e.g., shield configuration]
N	Y10T 117/1072	• • • • including details of means providing product movement [e.g., shaft guides, servo means]
N	Y10T 117/1076	• • • having means for producing a moving solid-liquid-solid zone
N	Y10T 117/108	• • • • Including a solid member other than seed or product contacting the liquid [e.g., crucible, immersed heating element]
N	Y10T 117/1084	• • • • having details of a stabilizing feature
N	Y10T 117/1088	• • • • including heating or cooling details
N	Y10T 117/1092	• • • Shape defined by a solid member other than seed or product [e.g., Bridgman-Stockbarger]
N	Y10T 117/1096	• • • including pressurized crystallization means [e.g., hydrothermal]
N	Y10T 152/00 - Y10T 152/00	<u>Former US Class 152 Series</u>
N	Y10T 152/00	Resilient tires and wheels
N	Y10T 152/10	• Tires, resilient
N	Y10T 152/10009	• • Emergency
N	Y10T 152/10018	• • with splash guards
N	Y10T 152/10027	• • with wear indicating feature
N	Y10T 152/10036	• • Cushion and pneumatic combined
N	Y10T 152/10045	• • • Metallic spring cushion
N	Y10T 152/10054	• • • Enclosed cushion
N	Y10T 152/10063	• • • Superimposed
N	Y10T 152/10072	• • • • Plungers
N	Y10T 152/10081	• • • • Edge-secured cushion
N	Y10T 152/1009	• • • • Guide flanges
N	Y10T 152/10099	• • • • • Radial stops
N	Y10T 152/10108	• • • • • Bolts or studs
N	Y10T 152/10117	• • • Integral
N	Y10T 152/10126	• • • • with removable inner tube
N	Y10T 152/10135	• • Armored
N	Y10T 152/10144	• • • Single tube tires internal
N	Y10T 152/10153	• • • • Metal
N	Y10T 152/10162	• • • • • Plates
N	Y10T 152/10171	• • • Casing construction

N	Y10T 152/1018 Embedded
N	Y10T 152/10189 Metal
N	Y10T 152/10198 Plates
N	Y10T 152/10207 Annular
N	Y10T 152/10216 Linked mat
N	Y10T 152/10225 Woven
N	Y10T 152/10234	. . . Interliners
N	Y10T 152/10243 Cotton, fabric, or rubber
N	Y10T 152/10252 Metal
N	Y10T 152/10261 Scale armor
N	Y10T 152/1027 Annular
N	Y10T 152/10279	. . Cushion
N	Y10T 152/10288	. . . Sectional
N	Y10T 152/10297 Annular
N	Y10T 152/10306 Superimposed
N	Y10T 152/10315 Superimposed
N	Y10T 152/10324 with apertured external binders
N	Y10T 152/10333 Radial bolt secured
N	Y10T 152/10342 Abutting sections
N	Y10T 152/10351 with annular internal binders
N	Y10T 152/1036 Interfitting
N	Y10T 152/10369 Indented at joints
N	Y10T 152/10378	. . . Casing enclosed core
N	Y10T 152/10387 Separate core
N	Y10T 152/10396 Removable
N	Y10T 152/10405 Sponge rubber
N	Y10T 152/10414 with core compression
N	Y10T 152/10423 Superimposed rings
N	Y10T 152/10432 Sectional transversely
N	Y10T 152/10441 Balls
N	Y10T 152/1045 Integral structure
N	Y10T 152/10459 Recessed
N	Y10T 152/10468 Chambered
N	Y10T 152/10477 Perforated
N	Y10T 152/10486 Chambered
N	Y10T 152/10495	. . Pneumatic tire or inner tube
N	Y10T 152/10504	. . . Asymmetric tire
N	Y10T 152/10513	. . . Tire reinforcement material characterized by short length fibers or the like
N	Y10T 152/10522	. . . Multiple chamber
N	Y10T 152/10531 Cylinder and piston
N	Y10T 152/1054 Mutually free walls
N	Y10T 152/10549 Interfitting
N	Y10T 152/10558 Balls
N	Y10T 152/10567 with simultaneous inflating means

N	Y10T 152/10576 Annular chambers
N	Y10T 152/10585 with simultaneous inflating means
N	Y10T 152/10594 Mutually free walls
N	Y10T 152/10603 with simultaneous inflating means
N	Y10T 152/10612 with simultaneous inflating means
N	Y10T 152/10621	. . . Sectional casings
N	Y10T 152/1063 Circumferential
N	Y10T 152/10639 Rigid inner sections
N	Y10T 152/10648	. . . with means restricting relative movement between tire and inner tube [e.g., anti-creep feature, etc.]
N	Y10T 152/10657	. . . with means to protect inner tube from rim
N	Y10T 152/10666	. . . Automatic sealing of punctures [e.g., self-healing, etc.]
N	Y10T 152/10675 Using flowable coating or composition
N	Y10T 152/10684 On inner surface of tubeless tire
N	Y10T 152/10693 Sealant in plural layers or plural pockets
N	Y10T 152/10702 within or part of construction of inflating inner tube
N	Y10T 152/10711 Sealant in plural layers or plural pockets
N	Y10T 152/1072 by compression
N	Y10T 152/10729 with reinflating means
N	Y10T 152/10738	. . . with means to protect tire from rim
N	Y10T 152/10747	. . . Means other than rim closing the tire opening
N	Y10T 152/10756 Positive casing closure
N	Y10T 152/10765	. . . Characterized by belt or breaker structure
N	Y10T 152/10774 Consisting of only one ply
N	Y10T 152/10783 Reinforcing plies made up from wound narrow ribbons
N	Y10T 152/10792 Structure where each bias angle reinforcing cord ply has no opposingly angled ply
N	Y10T 152/10801 Structure made up of two or more sets of plies wherein the reinforcing cords in one set lie in a different angular position relative to those in other sets
N	Y10T 152/1081 Breaker or belt characterized by the chemical composition or physical properties of elastomer or the like
N	Y10T 152/10819	. . . Characterized by the structure of the bead portion of the tire
N	Y10T 152/10828 Chafer or sealing strips
N	Y10T 152/10837 Bead characterized by the radial extent of apex, flipper or chafer into tire sidewall
N	Y10T 152/10846 Bead characterized by the chemical composition and or physical properties of elastomers or the like
N	Y10T 152/10855	. . . Characterized by the carcass, carcass material, or physical arrangement of the carcass materials
N	Y10T 152/10864 Sidewall stiffening or reinforcing means other than main carcass plies or foldups thereof about beads
N	Y10T 152/10873 with two or more differing cord materials
N	Y10T 152/10882	. . Patches
N	Y10T 152/10891	. . . Mechanically secured
N	Y10T 152/109 Inside and outside, bolt connected

N	Y10T 152/10909	. . . with plugs
N	Y10T 152/10918	. . . Bandages
N	Y10T 152/10927 Mechanically secured
N	Y10T 152/10936 to felly or rim
N	Y10T 156/00 - Y10T 156/00	<u>Former US Class 156 Series</u>
N	Y10T 156/00	Adhesive bonding and miscellaneous chemical manufacture
N	Y10T 156/10	. Methods of surface bonding and/or assembly therefor
N	Y10T 156/1002	. . with permanent bending or reshaping or surface deformation of self sustaining lamina
N	Y10T 156/1003	. . . by separating laminae between spaced secured areas [e.g., honeycomb expanding]
N	Y10T 156/1005	. . . by inward collapsing of portion of hollow body
N	Y10T 156/1007	. . . Running or continuous length work
N	Y10T 156/1008 Longitudinal bending
N	Y10T 156/101 Prior to or during assembly with additional lamina
N	Y10T 156/1011 Overedge bending or overedge folding
N	Y10T 156/1013 and edge-joining of one piece blank to form tube
N	Y10T 156/1015 Folding
N	Y10T 156/1016 Transverse corrugating
N	Y10T 156/1018 Subsequent to assembly of laminae
N	Y10T 156/102 with deformation or cutting of corrugated lamina
N	Y10T 156/1021 Treating material of corrugated lamina or dry adhesive thereon to render tacky
N	Y10T 156/1023 Surface deformation only [e.g., embossing]
N	Y10T 156/1025	. . . to form undulated to corrugated sheet and securing to base with parts of shaped areas out of contact
N	Y10T 156/1026	. . . with slitting or removal of material at reshaping area prior to reshaping
N	Y10T 156/1028	. . . by bending, drawing or stretch forming sheet to assume shape of configured lamina while in contact therewith
N	Y10T 156/103 Encasing or enveloping the configured lamina
N	Y10T 156/1031 with preshaping of lamina
N	Y10T 156/1033 Flexible sheet to cylinder lamina
N	Y10T 156/1034	. . . Overedge bending of lamina about edges of sheetlike base
N	Y10T 156/1036	. . . Bending of one piece blank and joining edges to form article
N	Y10T 156/1038 Hollow cylinder article
N	Y10T 156/1039	. . . Surface deformation only of sandwich or lamina [e.g., embossed panels]
N	Y10T 156/1041 Subsequent to lamination
N	Y10T 156/1043	. . . Subsequent to assembly
N	Y10T 156/1044 of parallel stacked sheets only
N	Y10T 156/1046 Bending of one lamina only
N	Y10T 156/1048 to form dished or receptacle-like product
N	Y10T 156/1049 Folding only
N	Y10T 156/1051	. . . by folding
N	Y10T 156/1052	. . with cutting, punching, tearing or severing

- N Y10T 156/1054 . . . and simultaneously bonding [e.g., cut-seaming]
- N Y10T 156/1056 . . . Perforating lamina
- N Y10T 156/1057 Subsequent to assembly of laminae
- N Y10T 156/1059 . . . Splitting sheet lamina in plane intermediate of faces
- N Y10T 156/1061 . . . Spiral peeling
- N Y10T 156/1062 . . . Prior to assembly
- N Y10T 156/1064 Partial cutting [e.g., grooving or incising]
- N Y10T 156/1066 Cutting to shape joining edge surfaces only
- N Y10T 156/1067 Continuous longitudinal slitting
- N Y10T 156/1069 Bonding face to face of laminae cut from single sheet
- N Y10T 156/107 Punching and bonding pressure application by punch
- N Y10T 156/1072 Closure cap liner applying type
- N Y10T 156/1074 Separate cutting of separate sheets or webs
- N Y10T 156/1075 of plural laminae from single stock and assembling to each other or to additional lamina
- N Y10T 156/1077 Applying plural cut laminae to single face of additional lamina
- N Y10T 156/1079 Joining of cut laminae end-to-end
- N Y10T 156/108 . . . Flash, trim or excess removal
- N Y10T 156/1082 . . . Partial cutting bonded sandwich [e.g., grooving or incising]
- N Y10T 156/1084 . . . of continuous or running length bonded web
- N Y10T 156/1085 One web only
- N Y10T 156/1087 Continuous longitudinal slitting
- N Y10T 156/1089 . . . of discrete laminae to single face of additional lamina
- N Y10T 156/109 . . . Embedding of laminae within face of additional laminae
- N Y10T 156/1092 . . . All laminae planar and face to face
- N Y10T 156/1093 with covering of discrete laminae with additional lamina
- N Y10T 156/1095 Opposed laminae are running length webs
- N Y10T 156/1097 Lamina is running length web
- N Y10T 156/1098 Feeding of discrete laminae from separate sources
- N Y10T 156/11 . . Methods of delaminating, per se; i.e. , separating at bonding face
- N Y10T 156/1105 . . Delaminating process responsive to feed or shape at delamination
- N Y10T 156/1111 . . Using solvent during delaminating [e.g., water dissolving adhesive at bonding face during delamination, etc.]
- N Y10T 156/1116 . . . Using specified organic delamination solvent
- N Y10T 156/1121 . . Using vibration during delaminating
- N Y10T 156/1126 . . Using direct fluid current against work during delaminating
- N Y10T 156/1132 . . . Using vacuum directly against work during delaminating
- N Y10T 156/1137 . . . Using air blast directly against work during delaminating
- N Y10T 156/1142 . . Changing dimension during delaminating [e.g., crushing, expanding, warping, etc.]
- N Y10T 156/1147 . . . Using shrinking or swelling agent during delaminating
- N Y10T 156/1153 . . Temperature change for delamination [e.g., heating during delaminating, etc.]
- N Y10T 156/1158 . . . Electromagnetic radiation applied to work for delamination [e.g., microwave, uv, ir, etc.]
- N Y10T 156/1163 . . . Sintering for delamination

- N Y10T 156/1168 *• • Gripping and pulling work apart during delaminating*
- N Y10T 156/1174 *• • • Using roller for delamination [e.g., roller pairs operating at differing speeds or directions, etc.]*
- N Y10T 156/1179 *• • • with poking during delaminating [e.g., jabbing, etc.]*
- N Y10T 156/1184 *• • • • Piercing layer during delaminating [e.g., cutting, etc.]*
- N Y10T 156/1189 *• • • with shearing during delaminating*
- N Y10T 156/1195 *• • • Delaminating from release surface*
- N Y10T 156/12 *• Surface bonding means and/or assembly means with cutting, punching, piercing, severing or tearing*
- N Y10T 156/125 *• • Plural severing means each acting on a different work piece*
- N Y10T 156/13 *• • Severing followed by associating with part from same source*
- N Y10T 156/1304 *• • Means making hole or aperture in part to be laminated*
- N Y10T 156/1309 *• • • and securing separate part over hole or aperture*
- N Y10T 156/1313 *• • Cutting element simultaneously bonds [e.g., cut seaming]*
- N Y10T 156/1317 *• • Means feeding plural workpieces to be joined*
- N Y10T 156/1322 *• • • Severing before bonding or assembling of parts*
- N Y10T 156/1326 *• • • • Severing means or member secured thereto also bonds*
- N Y10T 156/133 *• • • • Delivering cut part to indefinite or running length web*
- N Y10T 156/1335 *• • • • • Cutter also delivers cut piece*
- N Y10T 156/1339 *• • • • Delivering cut part in sequence to serially conveyed articles*
- N Y10T 156/1343 *• • • Cutting indefinite length web after assembly with discrete article*
- N Y10T 156/1348 *• • Work traversing type*
- N Y10T 156/1352 *• • • with liquid applying means*
- N Y10T 156/1357 *• • • • Slitting and severing*
- N Y10T 156/1361 *• • • • Cutting after bonding*
- N Y10T 156/1365 *• • • Fixed cutter*
- N Y10T 156/137 *• • Stamp from multiple row sheet type*
- N Y10T 156/1374 *• • with means projecting fluid against work*
- N Y10T 156/1378 *• • Cutter actuated by or secured to bonding element*
- N Y10T 156/1383 *• • • with liquid applicator*
- N Y10T 156/1387 *• • • • Common actuator for bonding and liquid applying means*
- N Y10T 156/1391 *• • • • • Liquid applied to web before cutting*
- N Y10T 156/1396 *• • • • • Roller applicator*
- N Y10T 156/14 *• Surface bonding means and/or assembly means with shaping, scarifying, or cleaning joining surface only*
- N Y10T 156/15 *• Combined or convertible surface bonding means and/or assembly means*
- N Y10T 156/16 *• Surface bonding means and/or assembly means with bond interfering means [slip sheet, etc.]*
- N Y10T 156/17 *• Surface bonding means and/or assembly means with work feeding or handling means*
- N Y10T 156/1702 *• • For plural parts or plural areas of single part*
- N Y10T 156/1705 *• • • Lamina transferred to base from adhered flexible web or sheet type carrier*
- N Y10T 156/1707 *• • • • Discrete spaced laminae on adhered carrier*
- N Y10T 156/171 *• • • • • Means serially presenting discrete base articles or separate portions of a single article*
- N Y10T 156/1712 *• • • Indefinite or running length work*

N	Y10T 156/1715 Means joining indefinite length work edge to edge
N	Y10T 156/1717 Means applying adhesively secured tape to seam
N	Y10T 156/172 Means applying fluid adhesive to work edge
N	Y10T 156/1722 Means applying fluent adhesive or adhesive activator material between layers
N	Y10T 156/1724 At spaced areas
N	Y10T 156/1727 Plural indefinite length or running length workpieces
N	Y10T 156/1729 Fluid applied to nip between indefinite length webs
N	Y10T 156/1732 Fluid applied to plural workpieces
N	Y10T 156/1734 Means bringing articles into association with web
N	Y10T 156/1737 Discontinuous, spaced area, and/or patterned pressing
N	Y10T 156/1739 Webs of different width, longitudinally aligned
N	Y10T 156/1741 Progressive continuous bonding press [e.g., roll couples]
N	Y10T 156/1744	. . . Means bringing discrete articles into assembled relationship
N	Y10T 156/1746 Plural lines and/or separate means assembling separate sandwiches
N	Y10T 156/1749 All articles from single source only
N	Y10T 156/1751 At least three articles
N	Y10T 156/1754 At least two applied side by side to common base
N	Y10T 156/1756 Plural ranks
N	Y10T 156/1759 Sheet form common base
N	Y10T 156/1761 Stacked serially
N	Y10T 156/1763 Magazine stack directly contacting separate work
N	Y10T 156/1766 Magazine movable to work
N	Y10T 156/1768 Means simultaneously conveying plural articles from a single source and serially presenting them to an assembly station
N	Y10T 156/1771 Turret or rotary drum-type conveyer
N	Y10T 156/1773 For flexible sheets
N	Y10T 156/1776 Means separating articles from bulk source
N	Y10T 156/1778 Stacked sheet source
N	Y10T 156/178 Rotary or pivoted picker
N	Y10T 156/1783 Translating picker
N	Y10T 156/1785	. . Magazine stack directly contacting work
N	Y10T 156/1788	. . Work traversing type and/or means applying work to wall or static structure
N	Y10T 156/179	. . . with liquid applying means
N	Y10T 156/1793	. . . Grip or clamp for web end
N	Y10T 156/1795	. . . Implement carried web supply
N	Y10T 156/1798	. . with liquid adhesive or adhesive activator applying means

N	Y10T 403/32204	• • • • with threaded joint
N	Y10T 403/32213	• • • Articulate joint is a swivel

- N Y10T 403/32221 . . . Articulate joint comprises pivoted clevis or channel bar
- N Y10T 403/32229 . . . Articulate joint is a slide
- N Y10T 403/32237 . . including operator
- N Y10T 403/32245 . . Arcuate shank moves in complementary guide
- N Y10T 403/32254 . . Lockable at fixed position
- N Y10T 403/32262 . . . At selected angle
- N Y10T 403/32271 Movable brace between members
- N Y10T 403/32278 Members rotatable about oblique axes
- N Y10T 403/32286 Clamping screw traverses sliding complementary arcuate bearing surfaces
- N Y10T 403/32295 Securing yoke or ring spaced radially from locking means
- N Y10T 403/32303 Eyebolt
- N Y10T 403/32311 Ball and socket
- N Y10T 403/32319 including pivot stud
- N Y10T 403/32327 including radially spaced detent or latch component
- N Y10T 403/32336 Engaging notch or recess in outer periphery of component
- N Y10T 403/32344 Side of rod engages recess in radial face
- N Y10T 403/32352 Pivoted detent
- N Y10T 403/32361 Engaging recess in radial face
- N Y10T 403/32368 including radial interengaging tongue and slot or serrations
- N Y10T 403/32377 Radially spaced arcuate slot engages fastener
- N Y10T 403/32385 Locked by plural motions of one member
- N Y10T 403/32393 including bridging keeper
- N Y10T 403/32401 Locked by nesting parts
- N Y10T 403/32409 Members locked in axial alignment
- N Y10T 403/32418 Plural distinct positions
- N Y10T 403/32426 . . . Plural distinct positions
- N Y10T 403/32434 Unidirectional movement, e.g., ratchet, etc.
- N Y10T 403/32442 At least one discrete position
- N Y10T 403/32451 Step-by-step adjustment
- N Y10T 403/32459 Retainer extends through aligned recesses
- N Y10T 403/32467 . . . Telescoping members
- N Y10T 403/32475 having detent
- N Y10T 403/32483 Spring biased
- N Y10T 403/32491 Threaded
- N Y10T 403/32501 Cam or wedge
- N Y10T 403/32508 having transverse pin
- N Y10T 403/32516 Remotely actuated
- N Y10T 403/32524 Self-locking
- N Y10T 403/32532 . . . Clamped members
- N Y10T 403/32541 . . Rotatable members resiliently biased to one position
- N Y10T 403/32549 . . including limit means
- N Y10T 403/32557 . . . for pivotal motion
- N Y10T 403/32565 Ball and socket with restricted movement about one axis

N	Y10T 403/32573 Ball stud passes through confining opening
N	Y10T 403/32581 Pin and slot
N	Y10T 403/32591 Opposed stops on one member
N	Y10T 403/32598	. . Threaded interface
N	Y10T 403/32606	. . Pivoted
N	Y10T 403/32614	. . . including circumferential biasing or damping means
N	Y10T 403/32622	. . . Rocking or rolling contact
N	Y10T 403/32631	. . . Universal ball and socket
N	Y10T 403/32639 including internal tie means
N	Y10T 403/32647 Plural concave surfaces with diverse curvature
N	Y10T 403/32655 Interposed concavo-convex component
N	Y10T 403/32663 Outer surfaces
N	Y10T 403/32672 Swiveled ball parts or seat
N	Y10T 403/32681 Composite ball
N	Y10T 403/32688 Spring biased segments
N	Y10T 403/32696 Nonmetallic part
N	Y10T 403/32704 Stud extends into ball
N	Y10T 403/32713 Elastomerically biased or backed components
N	Y10T 403/32721 Elastomeric seat
N	Y10T 403/32729 Externally packed
N	Y10T 403/32737 including liner, shim, or discrete seat
N	Y10T 403/32745 Spring acts through wedging surfaces
N	Y10T 403/32754 Variably preloaded
N	Y10T 403/32762 Spring-biased seat opposite ball stud
N	Y10T 403/32771 Porous
N	Y10T 403/32778 Completely spacing the members
N	Y10T 403/32786 Divided socket-type coupling
N	Y10T 403/32795 Bifurcated socket
N	Y10T 403/32803 Separable socket sections
N	Y10T 403/32811 Spring-biased
N	Y10T 403/32819	. . . including tension or take-up means
N	Y10T 403/32827 Interposed spring means coaxial with pivot
N	Y10T 403/32836 Acting through tapered surface on bearing component
N	Y10T 403/32844 Manually variable
N	Y10T 403/32852 External of bearing assembly, e.g., antirattler, etc.
N	Y10T 403/32861	. . . T-pivot, e.g., wrist pin, etc.
N	Y10T 403/32868 Floating pin
N	Y10T 403/32877 Pin is integral with or secured to inner member
N	Y10T 403/32885 Expanded pin or end
N	Y10T 403/32893 including distinct pin retainer
N	Y10T 403/32901 Unitary clip or plug
N	Y10T 403/32909 Threaded pin end
N	Y10T 403/32918 fork and tongue
N	Y10T 403/32926 with interposed antifriction means

N	Y10T 403/32934 Oppositely laterally movable tines
N	Y10T 403/32942	. . . On oblique interface
N	Y10T 403/32951	. . . Transverse pin or stud
N	Y10T 403/32959 Traverses interposed facing component
N	Y10T 403/32967 Attached to or integral with one member
N	Y10T 403/32975	. . Rotatable
N	Y10T 403/32983	. . . Rod in socket
N	Y10T 403/32991	. . Axially spring-biased coaxial members
N	Y10T 403/33	. Transverse rod to spaced plate surfaces
N	Y10T 403/335	. . Retainer utilizes or abuts plural plates
N	Y10T 403/34	. Branched
N	Y10T 403/341	. . Three or more radiating members
N	Y10T 403/342	. . . Polyhedral
N	Y10T 403/343 Unilateral of plane
N	Y10T 403/344	. . . Plural pairs of axially aligned members
N	Y10T 403/345	. . . Coplanar
N	Y10T 403/346 Additional rod held by encompassing means
N	Y10T 403/347	. . Polyhedral
N	Y10T 403/348	. . Parallel rods
N	Y10T 403/349	. . Coplanar
N	Y10T 403/35	. Diverse material coupling member
N	Y10T 403/36	. Three or more serial joints, at least one diverse
N	Y10T 403/362	. . Nonaligned axes
N	Y10T 403/364	. . Separable intermediate joint
N	Y10T 403/366	. . . Axially acting connector
N	Y10T 403/368	. . . Screw or cam
N	Y10T 403/37	. Joint involving plural layers of single rod
N	Y10T 403/38	. Laterally related rods independently joined to transverse surface
N	Y10T 403/39	. Rod to member to side, e.g. , plate, rod side, etc.
N	Y10T 403/3906	. . Rod side to member to side
N	Y10T 403/3913	. . Unilateral of side
N	Y10T 403/3921	. . Arcuate or multiplanar side
N	Y10T 403/3926	. . . Encompassed side
N	Y10T 403/3933	. . Intermediate member includes tubular part
N	Y10T 403/3941	. . . Side or tubular part deformed in situ
N	Y10T 403/3946	. . . Intermediate member extends through side
N	Y10T 403/3953 Split or divided tubular part and coacting compressor
N	Y10T 403/3961 Transverse clamp secures rod and tubular part
N	Y10T 403/3966 Rod also extends through side
N	Y10T 403/3973	. . . Oblique rod
N	Y10T 403/3981	. . . Intermediate member secured to side by radial flange
N	Y10T 403/3986	. . . Internally threaded tubular part
N	Y10T 403/3993	. . Intermediate member extends completely through side
N	Y10T 403/40	. Radially spaced members joined by independent coupling

N	Y10T 403/405	• • Flexible intermediate member
N	Y10T 403/41	• Coacting connection between inner member and plural parts of outer member
N	Y10T 403/42	• Rigid angle coupling, e.g. , elbow or u, etc.
N	Y10T 403/43	• Axially curved or bent portion of rod is joint component
N	Y10T 403/4309	• • Interfitted crossing rods
N	Y10T 403/4318	• • Joined to laterally related transverse surface at axially spaced points
N	Y10T 403/4327	• • Reversely bent portion
N	Y10T 403/4336	• • • Around eye-forming thimble
N	Y10T 403/4345	• • • with wedge clamp
N	Y10T 403/4354	• • • Held by crimped collar
N	Y10T 403/4363	• • • Open U
N	Y10T 403/4372	• • Intertwisted ends
N	Y10T 403/4381	• • End of rod is deflected laterally within connector
N	Y10T 403/4391	• • Plural rods distorted by single component
N	Y10T 403/44	• Three or more members connected at single locus
N	Y10T 403/443	• • All encompassed
N	Y10T 403/447	• • Mutually contacting
N	Y10T 403/45	• Flexibly connected rigid members
N	Y10T 403/451	• • Rigid sleeve encompasses flexible bushing
N	Y10T 403/452	• • • Longitudinally divided sleeve
N	Y10T 403/453	• • Flexible sleeve-type coupling
N	Y10T 403/454	• • Connecting pin traverses radially interposed elastomer
N	Y10T 403/455	• • Elastomer interposed between radially spaced members
N	Y10T 403/456	• • • Elastomer encompasses shoulder on inner member
N	Y10T 403/457	• • • including axially acting compressing means
N	Y10T 403/458	• • • Composite bushing with elastomeric component
N	Y10T 403/459	• • Helical spring type coupling
N	Y10T 403/46	• Rod end to transverse side of member
N	Y10T 403/4602	• • Corner joint
N	Y10T 403/4605	• • Stirrup
N	Y10T 403/4608	• • Structure attached to rod end encompasses side
N	Y10T 403/4611	• • • Clamped saddle
N	Y10T 403/4614	• • • Yoke or ring
N	Y10T 403/4617	• • • • having radial screw at bight
N	Y10T 403/4621	• • including saddle
N	Y10T 403/4622	• • Gland type
N	Y10T 403/4625	• • • Rod and side gripped simultaneously by single actuation
N	Y10T 403/4628	• • Rod clamped to hole edge
N	Y10T 403/4631	• • Rod to open edge of side, e.g., wrap-around connection
N	Y10T 403/4634	• • Rod and side deformingly interlocked
N	Y10T 403/4637	• • Radially interposed, side-engaging shim or bushing
N	Y10T 403/4641	• • Socket formed by shaping or deforming side
N	Y10T 403/4642	• • Integral transverse projection on side, e.g., necked, etc.
N	Y10T 403/4645	• • • From rod side

Former US Class 407 Series

N Y10T 407/00

Cutters, for shaping

- N Y10T 407/10 • including noncutting work modifying means
- N Y10T 407/11 • including chip breaker, guide or deflector detachable from tool and tool holder
- N Y10T 407/112 • • Adjustable relative to cutting edge
- N Y10T 407/114 • • • including adjusting means
- N Y10T 407/116 • • Attached to or integral with tool clamping jaw
- N Y10T 407/118 • • Chip breaker
- N Y10T 407/12 • Freely movable cutting edge
- N Y10T 407/13 • Yieldable tool
- N Y10T 407/134 • • Resiliently mounted tool
- N Y10T 407/137 • • • including yield stress or flexure limit adjusting means
- N Y10T 407/14 • with means to apply fluid to cutting tool
- N Y10T 407/15 • Rotary broach
- N Y10T 407/16 • Rectilinear broach
- N Y10T 407/1614 • • Hollow tool for surrounding workpiece
- N Y10T 407/1628 • • including holder having seat for inserted tool
- N Y10T 407/1642 • • • Annular tool
- N Y10T 407/1657 • • • including single tooth
- N Y10T 407/1671 • • Plural tooth groups
- N Y10T 407/1685 • • including sequentially acting teeth of stepped cutting width
- N Y10T 407/17 • Gear cutting tool
- N Y10T 407/1705 • • Face mill gear cutting tool
- N Y10T 407/171 • • • Adjustable teeth
- N Y10T 407/1715 • • Hob
- N Y10T 407/172 • • • Thread cutting
- N Y10T 407/1725 • • • including holder having seat for inserted tool
- N Y10T 407/173 • • • for cutting involute gear tooth
- N Y10T 407/1735 • • Rotary, gear shaving cutting tool
- N Y10T 407/174 • • Gear generating, revolving shaper cutting tool
- N Y10T 407/1745 • • Rotary, tooth form cutting tool
- N Y10T 407/18 • File or rasp
- N Y10T 407/1805 • • Flexible blade or carrier therefor
- N Y10T 407/181 • • Tire rasp
- N Y10T 407/1815 • • Rotary file or round disc
- N Y10T 407/182 • • Composite, diverse sector, or assembled
- N Y10T 407/1825 • • Handle or holder, per se

- N Y10T 407/19 *• Rotary cutting tool*
- N Y10T 407/1902 *• • Gang*
- N Y10T 407/1904 *• • Composite body of diverse material*
- N Y10T 407/1906 *• • including holder [i.e., head] having seat for inserted tool*
- N Y10T 407/1908 *• • • Face or end mill*
- N Y10T 407/191 *• • • • Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools*
- N Y10T 407/1912 *• • • • Tool adjustable relative to holder*
- N Y10T 407/1914 *• • • • • Radially*
- N Y10T 407/1916 *• • • • • And axially*
- N Y10T 407/1918 *• • • • • • Selectively*
- N Y10T 407/192 *• • • • with separate means to fasten tool to holder*
- N Y10T 407/1922 *• • • • • Wedge clamp element*
- N Y10T 407/1924 *• • • • Specified tool shape*
- N Y10T 407/1926 *• • • Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools*
- N Y10T 407/1928 *• • • Tool adjustable relative to holder*
- N Y10T 407/193 *• • • • Radially*
- N Y10T 407/1932 *• • • with means to fasten tool seat to holder*
- N Y10T 407/1934 *• • • with separate means to fasten tool to holder*
- N Y10T 407/1936 *• • • • Apertured tool*
- N Y10T 407/1938 *• • • • Wedge clamp element*
- N Y10T 407/194 *• • • • • Resilient clamp jaw*
- N Y10T 407/1942 *• • • Peripherally spaced tools*
- N Y10T 407/1944 *• • • • Sectional support*
- N Y10T 407/1946 *• • Face or end mill*
- N Y10T 407/1948 *• • • with cutting edge entirely across end of tool [e.g., router bit, end mill, etc.]*
- N Y10T 407/195 *• • Compound tooth arrangement*
- N Y10T 407/1952 *• • Having peripherally spaced teeth*
- N Y10T 407/1954 *• • • Axially tapering tool*
- N Y10T 407/1956 *• • • Circumferentially staggered*
- N Y10T 407/1958 *• • • • Plural teeth spaced about a helix*
- N Y10T 407/196 *• • • Varying in cutting edge profile*
- N Y10T 407/1962 *• • • Specified tooth shape or spacing*
- N Y10T 407/1964 *• • • • Arcuate cutting edge*
- N Y10T 407/1966 *• • • • • Helical tooth*
- N Y10T 407/20 *• Profiled circular tool*
- N Y10T 407/21 *• Arc segment tool*
- N Y10T 407/22 *• including holder having seat for inserted tool*
- N Y10T 407/2202 *• • Plural spaced seats and common holder*
- N Y10T 407/2204 *• • • Relatively adjustable seats*
- N Y10T 407/2206 *• • • Simultaneously usable*
- N Y10T 407/2208 *• • Plural simultaneously usable separable tools in common seat or common clamp actuator for plural simultaneously usable tools*
- N Y10T 407/221 *• • • Adjustable tool*

- N Y10T 407/2212 . . *with tool ejector*
- N Y10T 407/2214 . . *with separate means to adjust tool to and fro relative to holder*
- N Y10T 407/2216 . . . *with indicator*
- N Y10T 407/2218 . . . *Plural provisions for adjustment*
- N Y10T 407/222 . . . *by moving tool seat*
- N Y10T 407/2222 . . *Tool adjustable relative to holder*
- N Y10T 407/2224 . . . *with indicator*
- N Y10T 407/2226 . . . *Plural provisions for adjustment*
- N Y10T 407/2228 *Plural interfering seats*
- N Y10T 407/223 *including pivotable seat or tool*
- N Y10T 407/2232 *with detent*
- N Y10T 407/2234 *Pivoted seat*
- N Y10T 407/2236 *And pivotable tool*
- N Y10T 407/2238 . . . *by adjustable or replaceable stop*
- N Y10T 407/224 *Adjustable*
- N Y10T 407/2242 *Screw*
- N Y10T 407/2244 . . . *by movement of seat relative to holder*
- N Y10T 407/2246 *Pivoted seat*
- N Y10T 407/2248 . . . *Pivoted tool*
- N Y10T 407/225 . . . *Resiliently biased tool clamping jaw*
- N Y10T 407/2252 . . . *Rectilinearly*
- N Y10T 407/2254 *including rotatable cam clamp element*
- N Y10T 407/2256 *including wedge clamp element*
- N Y10T 407/2258 *And guide or detent*
- N Y10T 407/226 *including detent*
- N Y10T 407/2262 *Tool gripped directly by set screw*
- N Y10T 407/2264 *Slidable jaw*
- N Y10T 407/2266 . . *Holder adapted for tools of different shape*
- N Y10T 407/2268 . . *with chip breaker, guide or deflector*
- N Y10T 407/227 . . *with separate means to fasten tool seat to holder*
- N Y10T 407/2272 . . *with separate means to fasten tool to holder*
- N Y10T 407/2274 . . . *Apertured tool*
- N Y10T 407/2276 *with means projecting through aperture to force tool laterally against reaction surface*
- N Y10T 407/2278 *Tilting clamp element and separate means to tilt same*
- N Y10T 407/228 . . . *Rotatable cam clamp element*
- N Y10T 407/2282 . . . *including tool holding clamp and clamp actuator*
- N Y10T 407/2284 *Wedge clamp element*
- N Y10T 407/2286 *Resiliently biased clamp jaw*
- N Y10T 407/2288 *Integral with holder*
- N Y10T 407/229 *Pivoted jaw*
- N Y10T 407/2292 *Slidable jaw*
- N Y10T 407/23 . *including tool having plural alternatively usable cutting edges*
- N Y10T 407/235 . . *with integral chip breaker, guide or deflector*

N	Y10T 407/24	• with chip breaker, guide or deflector
N	Y10T 407/245	• • comprising concave surface in cutting face of tool
N	Y10T 407/25	• including cut off tool
N	Y10T 407/26	• comprising cutting edge bonded to tool shank
N	Y10T 407/27	• comprising tool of specific chemical composition
N	Y10T 407/28	• Miscellaneous
N	Y10T 408/00 - Y10T 408/00	<u>Former US Class 408 Series</u>
N	Y10T 408/00	Cutting by use of rotating axially moving tool
N	Y10T 408/03	• Processes
N	Y10T 408/04	• • Bit detachable
N	Y10T 408/05	• with means to weigh or test work or product
N	Y10T 408/08	• with means to regulate operation by use of templet, tape, card, or other replaceable information supply
N	Y10T 408/10	• with interlock between machine elements
N	Y10T 408/13	• with randomly-actuated stopping means
N	Y10T 408/14	• • Responsive to condition of Tool or tool-drive
N	Y10T 408/15	• • Responsive to condition of work or product
N	Y10T 408/16	• with control means energized in response to activator stimulated by condition sensor
N	Y10T 408/165	• • to control Tool rotation
N	Y10T 408/17	• • to control infeed
N	Y10T 408/172	• • • Responsive to Tool
N	Y10T 408/173	• • • Responsive to work
N	Y10T 408/175	• • to control relative positioning of Tool and work
N	Y10T 408/18	• with stopping upon completion of prescribed operation
N	Y10T 408/20	• • Responsive to condition of work or product
N	Y10T 408/21	• with signal, indicator, illuminator or optical means
N	Y10T 408/23	• including means to cause Tool to progressively vibrate toward work
N	Y10T 408/26	• with means to condition tool
N	Y10T 408/29	• with means to deForm work temporarily
N	Y10T 408/31	• Convertible cutting means
N	Y10T 408/33	• • Utilizing common cutting Tool
N	Y10T 408/34	• Combined cutting means
N	Y10T 408/344	• • including Tool operating on rotating work
N	Y10T 408/348	• • Plural other type cutting means
N	Y10T 408/35	• • • including plural rotating tools
N	Y10T 408/352	• • including rotating cutter other than rotating, axially moving Tool
N	Y10T 408/353	• • • Crystalline cutter
N	Y10T 408/355	• • • Utilized in cutting work or product to length
N	Y10T 408/3555	• • • • Adapted to cut entire thickness of work at one pass
N	Y10T 408/356	• • including plunging [single stroke] cutter
N	Y10T 408/36	• Machine including plural tools
N	Y10T 408/365	• • Axes of tools moving with work during operation

- N Y10T 408/367 *. . . including means to infeed Tool and means to infeed work or including coaxial tools*
- N Y10T 408/368 *. . . Plural work stations*
- N Y10T 408/37 *. . Turret of tools*
- N Y10T 408/375 *. . Coaxial tools*
- N Y10T 408/378 *. . . Coaxial, opposed tools*
- N Y10T 408/3784 *. . . . with additional, converging Tool*
- N Y10T 408/3788 *. . . . Plural pairs of coaxial, opposed tools*
- N Y10T 408/3792 *. . . . with means to sequentially feed tools toward work*
- N Y10T 408/3796 *. . . . with interconnected means to simultaneously feed tools*
- N Y10T 408/38 *. . Plural, simultaneously operational tools*
- N Y10T 408/3806 *. . . with plural simultaneously operational work stations*
- N Y10T 408/3809 *. . . . Successively acting on workpiece*
- N Y10T 408/381 *. Pivotaly mounted, work-advancing, work-supporting means, pivot-axis parallel to tool-axis*
- N Y10T 408/3811 *. . . with provision for adjustment of relationship of axes*
- N Y10T 408/3817 *. . . at least one Tool driven by orbiting wrist plate*
- N Y10T 408/3822 *. . . at least one Tool including flexible drive connection*
- N Y10T 408/3828 *. . . with work-infeed*
- N Y10T 408/3833 *. . . with means to advance work relative to Tool*
- N Y10T 408/3839 *. . . with presser-foot*
- N Y10T 408/3844 *. . . with tool-opposing, work-engaging surface*
- N Y10T 408/385 *. . Rotatable about parallel axes*
- N Y10T 408/39 *. with radially outer limit of cutting edge moving to define cylinder partially, but not entirely encircled by work*
- N Y10T 408/42 *. Axis of Tool moving with work during operation*
- N Y10T 408/44 *. with means to apply transient, fluent medium to work or product*
- N Y10T 408/45 *. . including Tool with duct*
- N Y10T 408/453 *. . . and means to move gaseous fluid by application of vacuum*
- N Y10T 408/455 *. . . Conducting channel extending to end of Tool*
- N Y10T 408/458 *. . . including nozzle*
- N Y10T 408/46 *. . including nozzle*
- N Y10T 408/47 *. with work-infeed means*
- N Y10T 408/476 *. . Driven by fluid motor*
- N Y10T 408/482 *. . Driven by means having sliding engagement therewith*
- N Y10T 408/488 *. . Driven by lever or connecting link*
- N Y10T 408/494 *. . and gear to drive infeed means*
- N Y10T 408/50 *. with product handling or receiving means*
- N Y10T 408/51 *. . Ejector*
- N Y10T 408/52 *. with work advancing or guiding means*
- N Y10T 408/54 *. . Means to intermittently advance work*
- N Y10T 408/545 *. . . Rotary, work-supporting means*
- N Y10T 408/55 *. with work-engaging structure other than Tool or tool-support*
- N Y10T 408/551 *. . with means actuated by work to release Tool from fixed position in Tool support*

N	Y10T 408/552	. . . Adapted to engage work at tool-axis
N	Y10T 408/553	. . Centering means adapted to be replaced by Tool
N	Y10T 408/554	. . Magnetic or suction means
N	Y10T 408/556	. . Tool supporting wheel
N	Y10T 408/5565	. . . Wheel-axis parallel to tool-axis
N	Y10T 408/557	. . Frictionally engaging sides of opening in work
N	Y10T 408/558	. . . Opening coaxial with Tool
N	Y10T 408/5583 Engaging sides of opening being enlarged by Tool
N	Y10T 408/5584 Engaging surface axially advanced of tool-action
N	Y10T 408/5586 Engaging surface subsequent to tool-action on that surface
N	Y10T 408/5587 Valve fitting
N	Y10T 408/559	. . Funnel like work-engaging surface cooperating with protuberance on work
N	Y10T 408/56	. . Adapted to "form" recession in work
N	Y10T 408/5605	. . . Recession at tool-axis
N	Y10T 408/561	. . Having tool-opposing, work-engaging surface
N	Y10T 408/5612	. . . Tool having shiftable tool-axis
N	Y10T 408/5614	. . . Angularly adjustable surface
N	Y10T 408/5616 Adjustable about axis that is parallel to tool-axis
N	Y10T 408/5617	. . . Laterally adjustable surface
N	Y10T 408/5619	. . . Flexible or concatenated member
N	Y10T 408/5621	. . . Connected to Tool through opening being enlarged by Tool
N	Y10T 408/5622 Plural, coaxially opposing, work-engaging means
N	Y10T 408/5623	. . . with presser foot
N	Y10T 408/56238 Encompassed by Tool during cut
N	Y10T 408/56245 including tool-guide [or bushing]
N	Y10T 408/56253 Base supported machine
N	Y10T 408/5626	. . . with means to move Tool relative to other work-engaging structure along tool-axis
N	Y10T 408/5627 Having sliding engagement therewith
N	Y10T 408/56275 Screw coaxial with Tool
N	Y10T 408/5628	. . . Tool having screw-thread engaging frame to cause infeed
N	Y10T 408/563	. . Work-gripping clamp
N	Y10T 408/5633	. . . Adapted to coaxially grip round work
N	Y10T 408/56337 Oppositely moving lateral clamps
N	Y10T 408/5634 Three or more moving clamps
N	Y10T 408/56343 Base supported clamp
N	Y10T 408/5635	. . . Oppositely moving lateral clamps
N	Y10T 408/5638	. . . Adjustable relative to tool-axis
N	Y10T 408/564	. . Movable relative to Tool along tool-axis
N	Y10T 408/5647	. . . including means to move Tool
N	Y10T 408/5653	. . . with means to bias Tool away from work
N	Y10T 408/566	. . Axially fixed to Tool
N	Y10T 408/5665	. . . Work-engaging surface parallel to tool-axis
N	Y10T 408/567	. . Adjustable, tool-guiding jig

N	Y10T 408/568	• • • Guide bushing
N	Y10T 408/569	• • Bushing
N	Y10T 408/57	• Tool-support with means to receive tool-position indicator
N	Y10T 408/60	• Plural tool-assemblages
N	Y10T 408/62	• • Coaxial
N	Y10T 408/625	• • • Spring biased
N	Y10T 408/63	• Tool or tool-support with torque-applying ratchet
N	Y10T 408/637	• • with thrust applying means
N	Y10T 408/639	• • • Reversible ratchet
N	Y10T 408/641	• • • Double-acting ratchet
N	Y10T 408/643	• • Reversible ratchet
N	Y10T 408/65	• Means to drive tool
N	Y10T 408/655	• • with specific Tool structure
N	Y10T 408/66	• • Friction gearing
N	Y10T 408/665	• • Universal or flexible drive connection to rotate Tool
N	Y10T 408/67	• • Belt and pulley
N	Y10T 408/675	• • including means to move Tool along tool-axis
N	Y10T 408/6757	• • • Fluid means
N	Y10T 408/6764	• • • Laterally adjustable Tool
N	Y10T 408/6771	• • • with clutch means
N	Y10T 408/6774	• • • • including plural speed drive
N	Y10T 408/6776	• • • • Actuated by Tool movement
N	Y10T 408/6779	• • • Rack and pinion
N	Y10T 408/6786	• • • Manually moved lever
N	Y10T 408/6793	• • • Screw coaxial with Tool
N	Y10T 408/68	• Tool or tool-support with thrust-applying machine-engaging screw
N	Y10T 408/70	• Tool or tool-support with torque-applying clutch
N	Y10T 408/72	• • Friction clutch
N	Y10T 408/73	• Tool or tool-support with torque-applying spline
N	Y10T 408/75	• • Relative motion of splined shaft and tool-support causing release of Tool from operating position
N	Y10T 408/76	• Tool-carrier with vibration-damping means
N	Y10T 408/78	• Tool of specific diverse material
N	Y10T 408/81	• Tool having crystalline cutting edge
N	Y10T 408/83	• Tool-support with means to move Tool relative to tool-support
N	Y10T 408/85	• • to move radially
N	Y10T 408/852	• • • with Tool releasing trigger
N	Y10T 408/853	• • • • and separate Tool setting means
N	Y10T 408/854	• • • to move eccentrically mounted Tool
N	Y10T 408/855	• • • • Tool-support including plural, adjustable sections
N	Y10T 408/856	• • • Moving means including pinion engaging rack-like surface of Tool
N	Y10T 408/858	• • • Moving means including wedge, screw or cam
N	Y10T 408/8583	• • • • with resiliently urged Tool
N	Y10T 408/85837	• • • • • with spring retainer

N	Y10T 408/85843 Resilient Tool or tool-support
N	Y10T 408/8585 including oppositely moving, diverging tools
N	Y10T 408/8588 Axially slidable moving-means
N	Y10T 408/85884 Tool pivotally mounted on support
N	Y10T 408/85888 Having axially spaced shoulders
N	Y10T 408/85892 Screw driven wedge or cam
N	Y10T 408/85893 Screw with axis radially spaced from tool-axis
N	Y10T 408/85894 Annular wedge-collar
N	Y10T 408/858945 Axially spaced tool-retaining collars
N	Y10T 408/858946 with travelling wedge
N	Y10T 408/858948 Tool having axially facing, collar-receiving groove
N	Y10T 408/858949 including two-piece collar
N	Y10T 408/85895 Traveling wedge
N	Y10T 408/858953 Interfitting, tool-retaining wedge
N	Y10T 408/858955 including separable interfitting element
N	Y10T 408/858957 Having externally threaded shank connected to tool-support
N	Y10T 408/85896 Annular wedge-collar
N	Y10T 408/859 Rotary cam
N	Y10T 408/8591 Scroll plate
N	Y10T 408/85913 Volute scroll
N	Y10T 408/85915 with means to rotate scroll
N	Y10T 408/85918 with adjustable means to limit scroll movement
N	Y10T 408/8592 Coaxial with tool-axis
N	Y10T 408/8593 Wedge moving perpendicular to tool-axis
N	Y10T 408/8595 Pivotal tool-support
N	Y10T 408/8598 Screw extending perpendicular to tool-axis
N	Y10T 408/85985 Plural tools moved by diametrically opposed screws
N	Y10T 408/85988 Screws mounted on common shaft
N	Y10T 408/8599 Tool having pitch-stabilizing ridge
N	Y10T 408/85995 with tool-holding clamp and clamp actuator
N	Y10T 408/86	. Tool-support with means to permit positioning of the Tool relative to support
N	Y10T 408/865	. . Pivotal Tool
N	Y10T 408/868	. . . with multiple cutting positions
N	Y10T 408/87	. . Tool having stepped cutting edges
N	Y10T 408/8713	. . . including means to permit both radial and axial positioning of edge
N	Y10T 408/8725	. . . including means to permit relative axial positioning of edges
N	Y10T 408/8729 with work-engaging structure other than cutting edge
N	Y10T 408/8734 including central Tool axially movable relative to support
N	Y10T 408/8738	. . . including inverse cutting edge
N	Y10T 408/875	. . including means to "form" depression in work
N	Y10T 408/88	. . including central-lead
N	Y10T 408/885	. . including tool-holding clamp and clamp actuator
N	Y10T 408/888	. . . Movable along tool-axis
N	Y10T 408/89	. Tool or Tool with support

- N Y10T 408/892 . . *with work-engaging structure detachable from cutting edge*
- N Y10T 408/8923 . . . *Removable central lead*
- N Y10T 408/8925 . . . *Depth-limiting member*
- N Y10T 408/8928 . . . *Adjustable*
- N Y10T 408/893 . . *Hollow milling Tool*
- N Y10T 408/895 . . *Having axial, core-receiving central portion*
- N Y10T 408/8953 . . . *with lateral outlet*
- N Y10T 408/8957 . . . *and having stepped cutting edges*
- N Y10T 408/896 . . *Having product-receiving chamber*
- N Y10T 408/8967 . . . *and central lead-screw*
- N Y10T 408/8973 . . . *and central lead*
- N Y10T 408/898 . . *Helical ribbon Tool*
- N Y10T 408/899 . . *Having inversely angled cutting edge*
- N Y10T 408/90 . . . *and axially extending peripheral cutting spur*
- N Y10T 408/901 . . *Having axially extending peripheral cutting spur*
- N Y10T 408/902 . . *Having central lead-screw*
- N Y10T 408/904 . . *with pitch-stabilizing ridge*
- N Y10T 408/9042 . . . *and radially spaced cutting edge*
- N Y10T 408/9044 . . . *including cutting teeth of different width*
- N Y10T 408/9045 *and different root circles*
- N Y10T 408/9046 . . . *including tapered section*
- N Y10T 408/90467 *and relieved cutting edge*
- N Y10T 408/90473 *including work-embracing cutting edges*
- N Y10T 408/9048 . . . *Extending outwardly from tool-axis*
- N Y10T 408/905 . . *Having stepped cutting edges*
- N Y10T 408/906 . . . *Axially spaced*
- N Y10T 408/9065 *with central lead*
- N Y10T 408/907 . . *including detailed shank*
- N Y10T 408/909 . . *Having peripherally spaced cutting edges*
- N Y10T 408/9093 . . . *Each formed by a pair of axially facing facets*
- N Y10T 408/9095 . . . *with axially extending relief channel*
- N Y10T 408/9097 *Spiral channel*
- N Y10T 408/9098 . . . *with means to retain Tool to support*
- N Y10T 408/90987 *Wedge means*
- N Y10T 408/90993 *Screw driven means*
- N Y10T 408/91 . *Machine frame*
- N Y10T 408/92 . . *with counterweight mechanism*
- N Y10T 408/93 . . *including pivotally mounted tool-carrier*
- N Y10T 408/935 . . . *including laterally movable tool-carrier*
- N Y10T 408/94 . *Tool-support*
- N Y10T 408/95 . . *with tool-retaining means*
- N Y10T 408/953 . . . *Clamping jaws*
- N Y10T 408/957 . . . *Tool adapter*
- N Y10T 408/96 . *Miscellaneous*

N	Y10T 408/97	• • Drill bushings
N	Y10T 408/98	• • Drill guide
N	Y10T 408/99	• • Adjustable stop
N	Y10T 409/00 - Y10T 409/00	<u>Former US Class 409 Series</u>
N	Y10T 409/00	Gear cutting, milling, or planing
N	Y10T 409/10	• Gear cutting
N	Y10T 409/100159	• • with regulation of operation by use of templet, card, or other replaceable information supply
N	Y10T 409/100318	• • • including follower for templet
N	Y10T 409/100477	• • and burnishing simultaneously
N	Y10T 409/100636	• • with compensation for backlash in drive means
N	Y10T 409/100795	• • with work or product advancing
N	Y10T 409/100954	• • • Utilizing transfer arm
N	Y10T 409/101113	• • Gear chamfering or deburring
N	Y10T 409/101272	• • • Using relatively reciprocating or oscillating cutter
N	Y10T 409/101431	• • Gear tooth shape generating
N	Y10T 409/10159	• • • Hobbing
N	Y10T 409/101749	• • • • Process
N	Y10T 409/101908	• • • • • Generating tooth for bevel gear
N	Y10T 409/102067	• • • • including means to shift hob between cutting passes
N	Y10T 409/102226	• • • • with control means energized in response to activator stimulated by condition sensor
N	Y10T 409/102385	• • • • Plural hobs
N	Y10T 409/102544	• • • • including infeed means
N	Y10T 409/102703	• • • • • to infeed along axis of work rotation

N	Y10T 409/103339	• • • • • to infeed radially of axis of work rotation
N	Y10T 409/103498	• • • • • Infeed of cutter
N	Y10T 409/103657	• • • • • and infeed tangentially of work axis
N	Y10T 409/103816	• • • Milling with radial faced tool
N	Y10T 409/103975	• • • • Process
N	Y10T 409/104134	• • • • Adapted to cut bevel gear
N	Y10T 409/104293	• • • • • with means to continuously rotate work and means to co-form all teeth of gear
N	Y10T 409/104452	• • • • • Bevel gear having nonparallel opposing tooth flanks
N	Y10T 409/104611	• • • • • including rotary cutter cradle
N	Y10T 409/10477	• • • by relative axial movement between synchronously indexing or rotating work and cutter
N	Y10T 409/104929	• • • • Crowning
N	Y10T 409/105088	• • • • Displacing cutter axially relative to work [e.g., gear shaving, etc.]
N	Y10T 409/105247	• • • • • Using gear shaper-cutter
N	Y10T 409/105406	• • • • • Plural distinct cutting edges

N	Y10T 409/105565 Cutting rotating work, the axis of which lies in a plane intersecting the cutter axis
N	Y10T 409/105724	. . . Gear shaving
N	Y10T 409/105883	. . . Using rotary cutter
N	Y10T 409/106042 having axially directed cutting edge
N	Y10T 409/106201 Plural rotary cutters
N	Y10T 409/10636 On reciprocating carriage
N	Y10T 409/106519	. . . Using reciprocating or oscillating cutter
N	Y10T 409/106678 Bevel gear cutting
N	Y10T 409/106837 Dual cutters
N	Y10T 409/106996 Double acting cutter
N	Y10T 409/107155 Rectilinearly reciprocating cutter
N	Y10T 409/107314 Cutter comprising a rack
N	Y10T 409/107473	. . . Making a noncircular gear, worm, rotor, or a planar-faced gear
N	Y10T 409/107632	. . Gear shaving
N	Y10T 409/107791	. . Using rotary cutter
N	Y10T 409/10795	. . . Process
N	Y10T 409/108109	. . . End mill
N	Y10T 409/108268 Radially faced
N	Y10T 409/108427 Using plural, selectively usable tools
N	Y10T 409/108586	. . . Plural rotary cutters
N	Y10T 409/108745	. . . Cutting action along work axis
N	Y10T 409/108904 Cutting action intersecting work axis
N	Y10T 409/109063	. . Using reciprocating or oscillating cutter
N	Y10T 409/109222	. . . Broach
N	Y10T 409/109381	. . . including circumferentially disposed cutting edges
N	Y10T 409/10954	. . Work dividing or checking of work position or division
N	Y10T 409/109699	. . with work clamping
N	Y10T 409/20	. with refurbishing of cutter
N	Y10T 409/30	. Milling
N	Y10T 409/300056	. . Thread or helix generating
N	Y10T 409/300112	. . . Process
N	Y10T 409/300168	. . . with means to regulate operation by use of templet, card, or other replaceable information supply
N	Y10T 409/300224 Complete cycle
N	Y10T 409/30028 to regulate cutting depth [e.g., relief, taper, etc.]
N	Y10T 409/300336 to regulate rate of motion [e.g., stopping, etc.]
N	Y10T 409/300392	. . . with nonthread or nonhelix generating, milling cutter
N	Y10T 409/300448	. . . with means to advance work or product
N	Y10T 409/300504	. . . Plural cutters or work holders
N	Y10T 409/30056	. . . with planetary cutter
N	Y10T 409/300616	. . . Work means to move work axially and means to interrelate work movement with cutter rotation
N	Y10T 409/300672	. . . with means to rotate work and means to interrelatedly infeed the work relative to the cutter

N	Y10T 409/300728 Means to infeed the cutter
N	Y10T 409/300784	. . . with means to circumferentially adjust the position of the cutter with respect to the work
N	Y10T 409/30084	. . with regulation of operation by templet, card, or other replaceable information supply
N	Y10T 409/300896	. . . with sensing of numerical information and regulation without mechanical connection between sensing means and regulated means [i.e., numerical control]
N	Y10T 409/300952	. . . to cut lock key
N	Y10T 409/301008 Using templet other than a key
N	Y10T 409/301064 Complete cycle
N	Y10T 409/30112	. . . Process
N	Y10T 409/301176	. . . Reproducing means
N	Y10T 409/301232 including pantograph cutter-carrier
N	Y10T 409/301288 and means to move work at work station
N	Y10T 409/301344 About work axis
N	Y10T 409/3014 Pivotally supported for vertical movement
N	Y10T 409/301456 and means to counterbalance carrier
N	Y10T 409/301512 including plural cutters
N	Y10T 409/301568 by use of pivotally supported tracer
N	Y10T 409/301624 Duplicating means
N	Y10T 409/30168 with means for operation without manual intervention
N	Y10T 409/301736 to make a double curvature foil
N	Y10T 409/301792 including means to sense optical or magnetic image
N	Y10T 409/301848 with means to support templet above or under work
N	Y10T 409/301904 including tracer adapted to trigger electrical energy
N	Y10T 409/30196 to actuate electrically driven work or tool moving means
N	Y10T 409/302016 to actuate fluid driven work or tool moving means
N	Y10T 409/302072 including tracer adapted to trigger fluid energy
N	Y10T 409/302128 to actuate fluid driven work or tool moving means
N	Y10T 409/302184 including cutter and tracer fixed to move laterally together
N	Y10T 409/30224 and provision for circumferential relative movement of cutter and work
N	Y10T 409/302296 including plural cutters
N	Y10T 409/302352 including plural cutters
N	Y10T 409/302408 including cross-slide tool carrier
N	Y10T 409/302464 including plural cutters
N	Y10T 409/30252 including cross-slide tool carrier
N	Y10T 409/302576 with means to support templet above or under work
N	Y10T 409/302632 with provision for circumferential relative movement of cutter and work
N	Y10T 409/302688 with provision for circumferential relative movement of cutter and work
N	Y10T 409/302744 and means for operation without manual intervention
N	Y10T 409/3028 including tracer adapted to trigger electrical or fluid energy
N	Y10T 409/302856 For using planar templet in cutting profile [e.g., contour map from planar map, etc.]
N	Y10T 409/302912 including means for operation without manual intervention

N	Y10T 409/302968	. . . including means for operation without manual intervention
N	Y10T 409/303024 including simultaneously usable plural tracers or including tracer adapted to simultaneously use plural templets
N	Y10T 409/30308 to make a double curvature foil
N	Y10T 409/303136 to make a double curvature foil
N	Y10T 409/303192 including cutter and tracer fixed to move together
N	Y10T 409/303248 with provision for circumferential relative movement of cutter and work
N	Y10T 409/303304	. . . and provision for circumferential relative movement of cutter and work
N	Y10T 409/30336	. . . including cutter and tracer fixed to move together
N	Y10T 409/303416	. . Templet, tracer, or cutter
N	Y10T 409/303472	. . . Tracer
N	Y10T 409/303528 Adapted to trigger electrical energy
N	Y10T 409/303584 Photocell
N	Y10T 409/30364 Adapted to trigger fluid energy
N	Y10T 409/303696	. . . Templet
N	Y10T 409/303752	. . Process
N	Y10T 409/303808	. . . including infeeding
N	Y10T 409/303864	. . with means to weigh or test work or product
N	Y10T 409/30392	. . with means to protect operative or machine [e.g., guard, safety device, etc.]
N	Y10T 409/303976	. . with means to control temperature or lubricate
N	Y10T 409/304032	. . . Cutter or work
N	Y10T 409/304088	. . with means to remove chip
N	Y10T 409/304144	. . Means to trim edge
N	Y10T 409/3042	. . Means to remove scale or raised surface imperfection
N	Y10T 409/304256	. . . Means to remove flash or burr
N	Y10T 409/304312	. . with means to dampen vibration
N	Y10T 409/304368	. . Means to mill epitrochoidal shape
N	Y10T 409/304424	. . Means for internal milling
N	Y10T 409/30448	. . with detachable or auxiliary cutter support to convert cutting action
N	Y10T 409/304536	. . including means to infeed work to cutter
N	Y10T 409/304592	. . . with compensation for backlash in drive means
N	Y10T 409/304648	. . . with control means energized in response to activator stimulated by condition sensor
N	Y10T 409/304704 In response to cutter or cutter carriage
N	Y10T 409/30476 In response to work or work carriage
N	Y10T 409/304816 to control rate of infeed or return
N	Y10T 409/304872 to control limit of infeed
N	Y10T 409/304928 Adapted to hydraulically or pneumatically stimulate control
N	Y10T 409/304984 Adapted to electrically stimulate control
N	Y10T 409/30504 to control rate of infeed or return
N	Y10T 409/305096 to effect stopping of infeed
N	Y10T 409/305152	. . . with means to change rate of infeed
N	Y10T 409/305208	. . . Means to mill indeterminate length work
N	Y10T 409/305264	. . . Multiple work stations
N	Y10T 409/30532	. . . with means to advance work or product

N	Y10T 409/305376 Vertically
N	Y10T 409/305432 Endless or orbital work or product advancing means
N	Y10T 409/305488 to reciprocate or oscillate work
N	Y10T 409/305544 with work holder
N	Y10T 409/3056 and means to selectively position work
N	Y10T 409/305656 including means to support work for rotation during operation
N	Y10T 409/305712 and including means to infeed cutter toward work axis
N	Y10T 409/305768 with linear movement of work
N	Y10T 409/305824 with angular movement of work
N	Y10T 409/30588	. . . including friction gearing drive
N	Y10T 409/305936	. . . including fluid drive
N	Y10T 409/305992	. . with means to effect stopping upon completion of operation
N	Y10T 409/306048	. . with means to advance work or product
N	Y10T 409/306104	. . . Endless or orbital work or product advancing means
N	Y10T 409/30616	. . with means to precisely reposition work
N	Y10T 409/306216	. . Randomly manipulated, work supported, or work following device
N	Y10T 409/306272	. . . For machining commutator
N	Y10T 409/306328	. . . For cutting longitudinal groove in shaft [e.g., keyway, etc.]
N	Y10T 409/306384	. . . with work supported guide means
N	Y10T 409/30644 to guide tool to move in arcuate path
N	Y10T 409/306496	. . . with work follower
N	Y10T 409/306552	. . . Randomly manipulated
N	Y10T 409/306608 End mill [e.g., router, etc.]
N	Y10T 409/306664	. . including means to infeed rotary cutter toward work
N	Y10T 409/30672	. . . with means to limit penetration into work
N	Y10T 409/306776	. . . Axially
N	Y10T 409/306832 with infeed control means energized in response to activator stimulated by condition sensor
N	Y10T 409/306888 In response to cutter condition
N	Y10T 409/306944 In response to work condition
N	Y10T 409/307 with work holder
N	Y10T 409/307056 and laterally
N	Y10T 409/307112 Simultaneously
N	Y10T 409/307168 Plural cutters
N	Y10T 409/307224	. . . with infeed control means energized in response to activator stimulated by condition sensor
N	Y10T 409/30728 In response to cutter condition
N	Y10T 409/307336 In response to work condition
N	Y10T 409/307392	. . . with means to change rate of infeed
N	Y10T 409/307448	. . . with work holder
N	Y10T 409/307504 Indexable
N	Y10T 409/30756	. . . Machining arcuate surface
N	Y10T 409/307616 with means to move cutter eccentrically
N	Y10T 409/307672	. . . Angularly adjustable cutter head
N	Y10T 409/307728	. . . including gantry-type cutter-carrier

N	Y10T 409/307784	. . . Plural cutters
N	Y10T 409/30784	. . including means to adjustably position cutter
N	Y10T 409/307896	. . . with work holder or guide
N	Y10T 409/307952	. . . Linear adjustment
N	Y10T 409/308008 with control for adjustment means responsive to activator stimulated by condition sensor
N	Y10T 409/308064 Responsive to position of cutter
N	Y10T 409/30812 and means to clamp cutter support in adjusted position
N	Y10T 409/308176 with position indicator or limit means
N	Y10T 409/308232 and angular adjustment
N	Y10T 409/308288 including gantry-type cutter-carrier
N	Y10T 409/308344 Plural cutters
N	Y10T 409/3084	. . . with position indicator or limit means
N	Y10T 409/308456	. . . with right angle cutter drive
N	Y10T 409/308512	. . . Compound angular adjustment
N	Y10T 409/308568	. . . Plural cutters
N	Y10T 409/308624	. . with limit means to aid in positioning of cutter bit or work [e.g., gauge, stop, etc.]
N	Y10T 409/30868	. . Work support
N	Y10T 409/308736	. . . with position indicator or stop
N	Y10T 409/308792	. . . Indexable
N	Y10T 409/308848 including dividing head
N	Y10T 409/308904 Multiple row dividing head
N	Y10T 409/30896	. . . with angular adjustment
N	Y10T 409/309016	. . . with work holder or guide
N	Y10T 409/309072 including cutter limited to rotary motion
N	Y10T 409/309128	. . . with means to adjust work support vertically
N	Y10T 409/309184	. . including cutter limited to rotary motion
N	Y10T 409/30924	. . . Cutter turning about vertical axis
N	Y10T 409/309296	. . Detachable or repositionable tool head
N	Y10T 409/309352	. . Cutter spindle or spindle support
N	Y10T 409/309408	. . . with cutter holder
N	Y10T 409/309464 and draw bar
N	Y10T 409/30952	. . with cutter holder
N	Y10T 409/309576	. . Machine frame
N	Y10T 409/309632	. . . Overarm harness structure
N	Y10T 409/309688	. . . including counterbalancing means
N	Y10T 409/309744	. . . including means to compensate for deformation
N	Y10T 409/3098 Deflection of cutter spindle
N	Y10T 409/309856	. . . Convertible from lathe
N	Y10T 409/309912	. . . including relatively movable components and means to relatively immobilize these components
N	Y10T 409/309968	. . Tailstock
N	Y10T 409/40	. Broaching
N	Y10T 409/400175	. . Process

N	Y10T 409/40035	• • <i>with control means energized in response to activator stimulated by condition sensor</i>
N	Y10T 409/400525	• • • <i>Responsive to condition of work or product</i>
N	Y10T 409/4007	• • <i>with means to distribute cutter infeed force</i>
N	Y10T 409/400875	• • <i>with means to select cutter or to select or modify cutter drive</i>
N	Y10T 409/40105	• • <i>with means to clean, lubricate, or modify temperature of work or cutter</i>
N	Y10T 409/401225	• • <i>with product handling means</i>
N	Y10T 409/4014	• • • <i>Between plural broaching stations</i>
N	Y10T 409/401575	• • • <i>Means to eject broached product</i>
N	Y10T 409/40175	• • • <i>Chip removal means</i>
N	Y10T 409/401925	• • <i>with means to protect operative or machine [e.g., guard, safety device, etc.]</i>
N	Y10T 409/4021	• • • <i>with safety means for overload or safety interlock</i>
N	Y10T 409/402275	• • <i>with work immobilizer and means to activate work immobilizer interrelated with cutter infeed, work infeed, or work advance</i>
N	Y10T 409/40245	• • <i>with work infeed or advancing means and means to clamp the work thereto, which clamping means is interrelated with work or cutter infeed</i>
N	Y10T 409/402625	• • <i>Means to remove flash or burr</i>
N	Y10T 409/4028	• • <i>Means for cutting groove</i>
N	Y10T 409/402975	• • • <i>Arcuate groove in cylindrical surface</i>
N	Y10T 409/40315	• • • • <i>Rifling</i>
N	Y10T 409/403325	• • <i>Orbital carrier for cutter</i>
N	Y10T 409/4035	• • <i>Orbital carrier for work</i>
N	Y10T 409/403675	• • <i>with means to cyclically manipulate cutter or cutter support</i>
N	Y10T 409/40385	• • • <i>to reorient, introduce, or remove cutter</i>
N	Y10T 409/404025	• • • <i>Cutter released to interim support at termination of cutting stroke</i>
N	Y10T 409/4042	• • • <i>to remove and return cutter to cutter support</i>
N	Y10T 409/404375	• • <i>with plural cutters</i>
N	Y10T 409/40455	• • <i>with means to advance, infeed, or manipulate work</i>
N	Y10T 409/404725	• • • <i>Interrelated with cutter infeed</i>
N	Y10T 409/4049	• • • • <i>including means supporting work and additional means opposing infeed force</i>
N	Y10T 409/405075	• • • • <i>including work indexing means for sequential cutting of different surfaces of a single workpiece</i>
N	Y10T 409/40525	• • • • <i>including work indexing means for sequential cutting of surfaces of different workpieces</i>
N	Y10T 409/405425	• • • • <i>with means to retract work from path of tool's idle return stroke</i>
N	Y10T 409/4056	• • • <i>to infeed work past cutter</i>
N	Y10T 409/405775	• • <i>with means to hold work during cutting</i>
N	Y10T 409/40595	• • • <i>including work clamping means</i>
N	Y10T 409/406125	• • • <i>with means to adjust or facilitate adjustment of work or work holder</i>
N	Y10T 409/4063	• • • <i>with means on work or work holder to guide cutter during infeed</i>
N	Y10T 409/406475	• • <i>Cutter infeed means</i>
N	Y10T 409/40665	• • • <i>Imparting rectilinear motion to cutter</i>
N	Y10T 409/406825	• • • • <i>and rotary motion to cutter</i>
N	Y10T 409/407	• • • • <i>Fluid powered means</i>
N	Y10T 409/407175	• • • • <i>Rack means</i>

N	Y10T 409/40735 Screw means
N	Y10T 409/407525	. . Machine frame
N	Y10T 409/4077	. . Cutter support or guide
N	Y10T 409/50	. Planing
N	Y10T 409/500164	. . with regulation of operation by templet, card, or other replaceable information supply
N	Y10T 409/500328	. . . including use of tracer adapted to trigger electrical or fluid energy
N	Y10T 409/500492 including provision for circumferential relative movement of cutter and work
N	Y10T 409/500656	. . . including provision for circumferential relative movement of cutter and work
N	Y10T 409/50082	. . Process
N	Y10T 409/500984	. . with means to lubricate
N	Y10T 409/501148	. . with product handling means
N	Y10T 409/501312	. . Randomly manipulated, work supported, or work following device
N	Y10T 409/501476	. . Means to remove flash or burr
N	Y10T 409/50164	. . . Elongated work
N	Y10T 409/501804 Flash or burr inside hollow work
N	Y10T 409/501968 Transverse burr
N	Y10T 409/502132	. . . Flat work
N	Y10T 409/502296	. . of commutator
N	Y10T 409/50246	. . Means for trimming edge [e.g., chamfering, scarfing, etc.]
N	Y10T 409/502624	. . Means for cutting groove
N	Y10T 409/502788	. . . Arcuate groove
N	Y10T 409/502952 For rifling
N	Y10T 409/503116	. . . Inside hollow work
N	Y10T 409/50328	. . Means for shaving by blade spanning work surface
N	Y10T 409/503444	. . . Concave work surface [e.g., bearing, stereotype printing plate, etc.]
N	Y10T 409/503608	. . . Circumferential surface
N	Y10T 409/503772	. . . including rack driven infeed means
N	Y10T 409/503936	. . . including roller infeed means
N	Y10T 409/5041	. . Means for cutting arcuate surface
N	Y10T 409/504264	. . . Cycloidal surface
N	Y10T 409/504428	. . . with work infeed and means to arcuately reposition the cutter
N	Y10T 409/504592	. . . with work infeed and means to arcuately reposition the work
N	Y10T 409/504756	. . with means to relatively infeed cutter and work
N	Y10T 409/50492	. . . and means to rotate work and cutter at same rate about converging axes
N	Y10T 409/505084	. . . with plural sequentially acting cutters or with double acting cutter
N	Y10T 409/505248	. . . and means to vary rate of infeed
N	Y10T 409/505412	. . . Reciprocating work infeed means
N	Y10T 409/505576 with fluid-driven bed
N	Y10T 409/50574 with rack-driven bed
N	Y10T 409/505904 with screw-driven bed
N	Y10T 409/506068 and means to permit repositioning of cutter laterally
N	Y10T 409/506232	. . . Reciprocating cutter infeed means
N	Y10T 409/506396 Reciprocating cutter horizontally

N	Y10T 409/50656 with work support and lead screw to reposition work support
N	Y10T 409/506724 with fluid-powered means to drive cutter
N	Y10T 409/506888 with pivoting link to drive cutter
N	Y10T 409/507052 Link driven by crank
N	Y10T 409/507216 with rack to drive cutter
N	Y10T 409/50738 with screw to drive cutter
N	Y10T 409/507544 with link or cam to drive cutter
N	Y10T 409/507708 with rack to drive cutter
N	Y10T 409/507872	. . . including means causing return stroke
N	Y10T 409/508036	. . Machine frame
N	Y10T 409/5082	. . . Means to permit repositioning of cutter
N	Y10T 409/508364 Laterally
N	Y10T 409/508528 Plural independently positioned cutters
N	Y10T 409/508692 including clutch
N	Y10T 409/508856 including repositioning means and means to effect stopping thereof
N	Y10T 409/50902	. . . including relatively movable components and means to relatively immobilize these components
N	Y10T 409/509184	. . . Work table
N	Y10T 409/509348	. . Tool head
N	Y10T 409/509512	. . . with selectively usable cutting edges
N	Y10T 409/509676	. . . with means to permit repositioning of cutting for idle return stroke
N	Y10T 409/50984 comprising pivotable cutter or cutter support
N	Y10T 428/00 - Y10T 428/00	<u>Former US Class 428 Series</u>
N	Y10T 428/00	Stock material or miscellaneous articles
N	Y10T 428/10	. Liquid crystal optical display having layer of specified composition
N	Y10T 428/1005	. . Alignment layer of specified composition
N	Y10T 428/1009	. . . Alignment layer is inorganic
N	Y10T 428/1014	. . . Silicon compound [i.e., organosilicon]
N	Y10T 428/1018	. . . Polyamide
N	Y10T 428/1023	. . . Polyimide
N	Y10T 428/1027 Polyimidefluoride
N	Y10T 428/1032 Polyimide-metallo
N	Y10T 428/1036	. . with viewing layer of specified composition
N	Y10T 428/1041	. . . Polarizer or dye containing viewing layer
N	Y10T 428/1045	. . . Silicon compound [e.g., glass, organosilicon, etc.]
N	Y10T 428/105	. . . Ester [e.g., polycarbonate, polyacrylate, etc.]
N	Y10T 428/1055	. . with charge transferring layer of specified composition
N	Y10T 428/1059	. . with bonding or intermediate layer of specified composition [e.g., sealant, space, etc.]
N	Y10T 428/1064	. . . Inorganic layer
N	Y10T 428/1068	. . . Silicon compound [i.e., organosilicon]
N	Y10T 428/1073	. . . Epoxy
N	Y10T 428/1077	. . . Ester
N	Y10T 428/1082	. . . Unsaturated aliphatic polymer [e.g., vinyl, etc.]

- N Y10T 428/1086 • • *with substrate layer of specified composition*
- N Y10T 428/1091 • • • *Releasable substrate layer to expose adhesive*
- N Y10T 428/1095 • • • *Inorganic substrate layer [e.g., ceramic, metallic, glass, etc.]*

- N Y10T 428/12167 Nonmetal containing
- N Y10T 428/12174 Mo or W containing
- N Y10T 428/12181 . . Composite powder [e.g., coated, etc.]
- N Y10T 428/12188 . . having marginal feature for indexing or weakened portion for severing
- N Y10T 428/12194 . . . For severing perpendicular to longitudinal dimension
- N Y10T 428/12201 . . Width or thickness variation or marginal cuts repeating longitudinally
- N Y10T 428/12208 . . . Variation in both width and thickness
- N Y10T 428/12215 . . . Marginal slots [i.e., deeper than wide]
- N Y10T 428/12222 . . Shaped configuration for melting [e.g., package, etc.]
- N Y10T 428/12229 . . Intermediate article [e.g., blank, etc.]
- N Y10T 428/12236 . . . Panel having nonrectangular perimeter
- N Y10T 428/12243 Disk
- N Y10T 428/1225 Symmetrical
- N Y10T 428/12257 Only one plane of symmetry
- N Y10T 428/12264 . . . having outward flange, gripping means or interlocking feature
- N Y10T 428/12271 . . . having discrete fastener, marginal fastening, taper, or end structure
- N Y10T 428/12278 Same structure at both ends of plural taper
- N Y10T 428/12285 Single taper [e.g., ingot, etc.]
- N Y10T 428/12292 . . Workpiece with longitudinal passageway or stopweld material [e.g., for tubular stock, etc.]
- N Y10T 428/12299 . . Workpiece mimicking finished stock having nonrectangular or noncircular cross section
- N Y10T 428/12306 . . Workpiece of parallel, nonfastened components [e.g., fagot, pile, etc.]
- N Y10T 428/12313 . . . Arranged to avoid lateral displacement
- N Y10T 428/12319 . . . Composite
- N Y10T 428/12326 . . with provision for limited relative movement between components
- N Y10T 428/12333 . . Helical or with helical component
- N Y10T 428/1234 . . Honeycomb, or with grain orientation or elongated elements in defined angular relationship in respective components [e.g., parallel, intersecting, etc.]
- N Y10T 428/12347 . . Plural layers discontinuously bonded [e.g., spot-weld, mechanical fastener, etc.]
- N Y10T 428/12354 . . Nonplanar, uniform-thickness material having symmetrical channel shape or reverse fold [e.g., making acute angle, etc.]
- N Y10T 428/12361 . . having aperture or cut
- N Y10T 428/12368 . . . Struck-out portion type
- N Y10T 428/12375 . . having member which crosses the plane of another member [e.g., T or X cross section, etc.]
- N Y10T 428/12382 . . Defined configuration of both thickness and nonthickness surface or angle therebetween [e.g., rounded corners, etc.]
- N Y10T 428/12389 . . having variation in thickness
- N Y10T 428/12396 . . . Discontinuous surface component
- N Y10T 428/12403 . . . Longitudinally smooth and symmetrical
- N Y10T 428/1241 . . Nonplanar uniform thickness or nonlinear uniform diameter [e.g., L-shape]
- N Y10T 428/12417 . . . Intersecting corrugating or dimples not in a single line [e.g., waffle form, etc.]

- N Y10T 428/12424 • • Mass of only fibers
- N Y10T 428/12431 • • Foil or filament smaller than 6 mils
- N Y10T 428/12438 • • • Composite
- N Y10T 428/12444 • • Embodying fibers interengaged or between layers [e.g., paper, etc.]
- N Y10T 428/12451 • • Macroscopically anomalous interface between layers
- N Y10T 428/12458 • • having composition, density, or hardness gradient
- N Y10T 428/12465 • • having magnetic properties, or preformed fiber orientation coordinate with shape
- N Y10T 428/12472 • • Microscopic interfacial wave or roughness
- N Y10T 428/12479 • • Porous [e.g., foamed, spongy, cracked, etc.]
- N Y10T 428/12486 • • Laterally noncoextensive components [e.g., embedded, etc.]
- N Y10T 428/12493 • • Composite; i.e., plural, adjacent, spatially distinct metal components [e.g., layers, joint, etc.]
- N Y10T 428/125 • • • Deflectable by temperature change [e.g., thermostat element]
- N Y10T 428/12507 • • • • More than two components
- N Y10T 428/12514 • • • • One component Cu-based
- N Y10T 428/12521 • • • • Both components Fe-based with more than 10% Ni
- N Y10T 428/12528 • • • Semiconductor component
- N Y10T 428/12535 • • • with additional, spatially distinct nonmetal component
- N Y10T 428/12542 • • • • More than one such component
- N Y10T 428/12549 • • • • • Adjacent to each other
- N Y10T 428/12556 • • • • Organic component
- N Y10T 428/12562 • • • • • Elastomer
- N Y10T 428/12569 • • • • • Synthetic resin
- N Y10T 428/12576 • • • • Boride, carbide or nitride component
- N Y10T 428/12583 • • • • Component contains compound of adjacent metal
- N Y10T 428/1259 • • • • • Oxide
- N Y10T 428/12597 • • • • Noncrystalline silica or noncrystalline plural-oxide component [e.g., glass, etc.]
- N Y10T 428/12604 • • • • • Film [e.g., glaze, etc.]
- N Y10T 428/12611 • • • • Oxide-containing component
- N Y10T 428/12618 • • • • • Plural oxides
- N Y10T 428/12625 • • • • Free carbon containing component
- N Y10T 428/12632 • • • Four or more distinct components with alternate recurrence of each type component
- N Y10T 428/12639 • • • Adjacent, identical composition, components
- N Y10T 428/12646 • • • • Group VIII or IB metal-base
- N Y10T 428/12653 • • • • • Fe, containing 0.01-1.7% carbon [i.e., steel]
- N Y10T 428/1266 • • • O, S, or organic compound in metal component
- N Y10T 428/12667 • • • • Oxide of transition metal or Al
- N Y10T 428/12674 • • • Ge- or Si-base component
- N Y10T 428/12681 • • • Ga-, In-, Tl- or Group VA metal-base component
- N Y10T 428/12687 • • • Pb- and Sn-base components: alternative to or next to each other
- N Y10T 428/12694 • • • • and next to Cu- or Fe-base component
- N Y10T 428/12701 • • • Pb-base component

N	Y10T 428/12708	. . . Sn-base component
N	Y10T 428/12715 Next to Group IB metal-base component
N	Y10T 428/12722 Next to Group VIII metal-base component
N	Y10T 428/12729	. . . Group IIA metal-base component
N	Y10T 428/12736	. . . Al-base component
N	Y10T 428/12743 Next to refractory [Group IVB, VB, or VIB] metal-base component
N	Y10T 428/1275 Next to Group VIII or IB metal-base component
N	Y10T 428/12757 Fe
N	Y10T 428/12764 Next to Al-base component
N	Y10T 428/12771	. . . Transition metal-base component
N	Y10T 428/12778 Alternative base metals from diverse categories
N	Y10T 428/12785 Group IIB metal-base component
N	Y10T 428/12792 Zn-base component
N	Y10T 428/12799 Next to Fe-base component [e.g., galvanized]
N	Y10T 428/12806 Refractory [Group IVB, VB, or VIB] metal-base component
N	Y10T 428/12812 Diverse refractory group metal-base components: alternative to or next to each other
N	Y10T 428/12819 Group VB metal-base component
N	Y10T 428/12826 Group VIB metal-base component
N	Y10T 428/12833 Alternative to or next to each other
N	Y10T 428/1284 W-base component
N	Y10T 428/12847 Cr-base component
N	Y10T 428/12854 Next to Co-, Fe-, or Ni-base component
N	Y10T 428/12861 Group VIII or IB metal-base component
N	Y10T 428/12868 Group IB metal-base component alternative to platinum group metal-base component [e.g., precious metal, etc.]
N	Y10T 428/12875 Platinum group metal-base component
N	Y10T 428/12882 Cu-base component alternative to Ag-, Au-, or Ni-base component
N	Y10T 428/12889 Au-base component
N	Y10T 428/12896 Ag-base component
N	Y10T 428/12903 Cu-base component
N	Y10T 428/1291 Next to Co-, Cu-, or Ni-base component
N	Y10T 428/12917 Next to Fe-base component
N	Y10T 428/12924 Fe-base has 0.01-1.7% carbon [i.e., steel]
N	Y10T 428/12931 Co-, Fe-, or Ni-base components, alternative to each other
N	Y10T 428/12937 Co- or Ni-base component next to Fe-base component
N	Y10T 428/12944 Ni-base component
N	Y10T 428/12951 Fe-base component
N	Y10T 428/12958 Next to Fe-base component
N	Y10T 428/12965 Both containing 0.01-1.7% carbon [i.e., steel]
N	Y10T 428/12972 Containing 0.01-1.7% carbon [i.e., steel]
N	Y10T 428/12979 Containing more than 10% nonferrous elements [e.g., high alloy, stainless]
N	Y10T 428/12986	. . . Adjacent functionally defined components
N	Y10T 428/12993	. . Surface feature [e.g., rough, mirror]

N	Y10T 428/13	• Hollow or container type article [e.g., tube, vase, etc.]
N	Y10T 428/1303	• • Paper containing [e.g., paperboard, cardboard, fiberboard, etc.]
N	Y10T 428/1307	• • • Bag or tubular film [e.g., pouch, flexible food casing, envelope, etc.]
N	Y10T 428/131	• • Glass, ceramic, or sintered, fused, fired, or calcined metal oxide or metal carbide containing [e.g., porcelain, brick, cement, etc.]
N	Y10T 428/1314	• • • Contains fabric, fiber particle, or filament made of glass, ceramic, or sintered, fused, fired, or calcined metal oxide, or metal carbide or other inorganic compound [e.g., fiber glass, mineral fiber, sand, etc.]
N	Y10T 428/1317	• • • Multilayer [continuous layer]
N	Y10T 428/1321	• • • • Polymer or resin containing [i.e., natural or synthetic]
N	Y10T 428/1324	• • Flexible food casing [e.g., sausage type, etc.]
N	Y10T 428/1328	• • Shrinkable or shrunk [e.g., due to heat, solvent, volatile agent, restraint removal, etc.]
N	Y10T 428/1331	• • • Single layer [continuous layer]
N	Y10T 428/1334	• • Nonself-supporting tubular film or bag [e.g., pouch, envelope, packet, etc.]
N	Y10T 428/1338	• • • Elemental metal containing
N	Y10T 428/1341	• • • Contains vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit
N	Y10T 428/1345	• • • Single layer [continuous layer]
N	Y10T 428/1348	• • Cellular material derived from plant or animal source [e.g., wood, cotton, wool, leather, etc.]
N	Y10T 428/1352	• • Polymer or resin containing [i.e., natural or synthetic]
N	Y10T 428/1355	• • • Elemental metal containing [e.g., substrate, foil, film, coating, etc.]
N	Y10T 428/1359	• • • • Three or more layers [continuous layer]
N	Y10T 428/1362	• • • Textile, fabric, cloth, or pile containing [e.g., web, net, woven, knitted, mesh, nonwoven, matted, etc.]
N	Y10T 428/1366	• • • • Textile, fabric, cloth, or pile is sandwiched between two distinct layers of material unlike the textile, fabric, cloth, or pile layer
N	Y10T 428/1369	• • • Fiber or fibers wound around each other or into a self-sustaining shape [e.g., yarn, braid, fibers shaped around a core, etc.]
N	Y10T 428/1372	• • • Randomly noninterengaged or randomly contacting fibers, filaments, particles, or flakes
N	Y10T 428/1376	• • • Foam or porous material containing
N	Y10T 428/1379	• • • Contains vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit
N	Y10T 428/1383	• • • • Vapor or gas barrier, polymer derived from vinyl chloride or vinylidene chloride, or polymer containing a vinyl alcohol unit is sandwiched between layers [continuous layer]
N	Y10T 428/1386	• • • Natural or synthetic rubber or rubber-like compound containing
N	Y10T 428/139	• • • Open-ended, self-supporting conduit, cylinder, or tube-type article
N	Y10T 428/1393	• • • • Multilayer [continuous layer]
N	Y10T 428/1397	• • • Single layer [continuous layer]
N	Y10T 428/14	• Layer or component removable to expose adhesive
N	Y10T 428/1405	• • Capsule or particulate matter containing [e.g., sphere, flake, microballoon, etc.]
N	Y10T 428/141	• • Bituminous
N	Y10T 428/1414	• • Ceramic, glass, glasslike, vitreous
N	Y10T 428/1419	• • Wax containing

N	Y10T 428/1424	• • Halogen containing compound
N	Y10T 428/1429	• • • Fluorine
N	Y10T 428/1433	• • • Coloring agent containing
N	Y10T 428/1438	• • Metal containing
N	Y10T 428/1443	• • • Aluminum
N	Y10T 428/1448	• • • Coloring agent containing
N	Y10T 428/1452	• • Polymer derived only from ethylenically unsaturated monomer
N	Y10T 428/1457	• • • Silicon
N	Y10T 428/1462	• • Polymer derived from material having at least one acrylic or alkacrylic group or the nitrile or amide derivative thereof [e.g., acrylamide, acrylate ester, etc.]
N	Y10T 428/1467	• • Coloring agent
N	Y10T 428/1471	• • Protective layer
N	Y10T 428/1476	• • Release layer
N	Y10T 428/1481	• • Dissimilar adhesives
N	Y10T 428/1486	• • Ornamental, decorative, pattern, or indicia
N	Y10T 428/149	• • Sectional layer removable
N	Y10T 428/1495	• • • Adhesive is on removable layer
N	Y10T 428/15	• Sheet, web, or layer weakened to permit separation through thickness
N	Y10T 428/16	• Two dimensionally sectional layer
N	Y10T 428/161	• • with frame, casing, or perimeter structure
N	Y10T 428/162	• • Transparent or translucent layer or section
N	Y10T 428/163	• • Next to unitary web or sheet of equal or greater extent
N	Y10T 428/164	• • • Continuous two dimensionally sectional layer
N	Y10T 428/166	• • • • Glass, ceramic, or metal sections [e.g., floor or wall tile, etc.]
N	Y10T 428/167	• • • • Cellulosic sections [e.g., parquet floor, etc.]
N	Y10T 428/168	• • • Nonrectangular
N	Y10T 428/169	• • Sections connected flexibly with external fastener
N	Y10T 428/17	• Three or more coplanar interfitted sections with securing means
N	Y10T 428/18	• Longitudinally sectional layer of three or more sections
N	Y10T 428/183	• • Next to unitary sheet of equal or greater extent
N	Y10T 428/187	• • • Continuous sectional layer
N	Y10T 428/19	• Sheets or webs edge spliced or joined
N	Y10T 428/192	• • Sheets or webs coplanar
N	Y10T 428/193	• • • Double faced corrugated sheets or webs connected
N	Y10T 428/195	• • • Beveled, stepped, or skived in thickness
N	Y10T 428/197	• • • with noncoplanar reinforcement
N	Y10T 428/198	• • • • Pile or nap surface sheets connected
N	Y10T 428/20	• Patched hole or depression
N	Y10T 428/21	• Circular sheet or circular blank
N	Y10T 428/211	• • Gear
N	Y10T 428/213	• • Frictional
N	Y10T 428/214	• • End closure
N	Y10T 428/215	• • Seal, gasket, or packing
N	Y10T 428/216	• • Ornamental, decorative, pattern, or indicia

- N Y10T 428/218 *. . Aperture containing*

- N Y10T 428/24215 *. . . Acute or reverse fold of exterior component*
- N Y10T 428/24223 *. . . . Embedded in body of web*
- N Y10T 428/24231 *. . . . At opposed marginal edges*
- N Y10T 428/2424 *. Annular cover*

N	Y10T 428/24248 One piece
N	Y10T 428/24256 Abutted or lapped seam
N	Y10T 428/24264	. . . Particular fold structure [e.g., beveled, etc.]
N	Y10T 428/24273	. . including aperture
N	Y10T 428/24281	. . . Struck out portion type
N	Y10T 428/24289 Embedded or interlocked
N	Y10T 428/24298	. . . Noncircular aperture [e.g., slit, diamond, rectangular, etc.]
N	Y10T 428/24306 Diamond or hexagonal
N	Y10T 428/24314 Slit or elongated
N	Y10T 428/24322	. . . Composite web or sheet
N	Y10T 428/24331 including nonapertured component
N	Y10T 428/24339 Keyed
N	Y10T 428/24347 From both sides
N	Y10T 428/24355	. . Continuous and nonuniform or irregular surface on layer or component [e.g., roofing, etc.]
N	Y10T 428/24364	. . . with transparent or protective coating
N	Y10T 428/24372	. . . Particulate matter
N	Y10T 428/2438 Coated
N	Y10T 428/24388 Silicon containing coating
N	Y10T 428/24397 Carbohydrate
N	Y10T 428/24405 Polymer or resin [e.g., natural or synthetic rubber, etc.]
N	Y10T 428/24413 Metal or metal compound
N	Y10T 428/24421 Silicon containing
N	Y10T 428/2443 Sand, clay, or crushed rock or slate
N	Y10T 428/24438	. . . Artificial wood or leather grain surface
N	Y10T 428/24446	. . . Wrinkled, creased, crinkled or creped
N	Y10T 428/24455 Paper
N	Y10T 428/24463 Plural paper components
N	Y10T 428/24471	. . . Crackled, crazed or slit
N	Y10T 428/24479	. . including variation in thickness
N	Y10T 428/24488	. . . Differential nonuniformity at margin
N	Y10T 428/24496	. . . Foamed or cellular component
N	Y10T 428/24504 Component comprises a polymer [e.g., rubber, etc.]
N	Y10T 428/24512 Polyurethane
N	Y10T 428/24521	. . . with component conforming to contour of nonplanar surface
N	Y10T 428/24529 and conforming component on an opposite nonplanar surface
N	Y10T 428/24537 Parallel ribs and/or grooves
N	Y10T 428/24545 Containing metal or metal compound
N	Y10T 428/24554 including cellulosic or natural rubber component
N	Y10T 428/24562	. . . Interlaminar spaces
N	Y10T 428/2457	. . . Parallel ribs and/or grooves
N	Y10T 428/24579 with particulate matter
N	Y10T 428/24587 Oblique to longitudinal axis of web or sheet
N	Y10T 428/24595	. . . and varying density

- N Y10T 428/24603 Fiber containing component
- N Y10T 428/24612 . . . Composite web or sheet
- N Y10T 428/2462 with partial filling of valleys on outer surface
- N Y10T 428/24628 . . Nonplanar uniform thickness material
- N Y10T 428/24636 . . . Embodying mechanically interengaged strand[s], strand-portion[s] or strand-like strip[s] [e.g., weave, knit, etc.]
- N Y10T 428/24645 with folds in parallel planes
- N Y10T 428/24653 . . . Differential nonplanarity at margin
- N Y10T 428/24661 . . . Forming, or cooperating to form cells
- N Y10T 428/24669 . . . Aligned or parallel nonplanarities
- N Y10T 428/24678 Waffle-form
- N Y10T 428/24686 Pleats or otherwise parallel adjacent folds
- N Y10T 428/24694 Parallel corrugations
- N Y10T 428/24702 with locally deformed crests or intersecting series of corrugations
- N Y10T 428/24711 Plural corrugated components
- N Y10T 428/24719 with corrugations of respective components intersecting in plane projection
- N Y10T 428/24727 with planar component
- N Y10T 428/24736 . . . Ornamental design or indicia
- N Y10T 428/24744 . . Longitudinal or transverse tubular cavity or cell
- N Y10T 428/24752 . . Laterally noncoextensive components
- N Y10T 428/2476 . . . Fabric, cloth or textile component
- N Y10T 428/24769 . . . Cellulosic
- N Y10T 428/24777 . . Edge feature
- N Y10T 428/24785 . . . including layer embodying mechanically interengaged strands, strand portions or strand-like strips [e.g., weave, knit, etc.]
- N Y10T 428/24793 . . . Comprising discontinuous or differential impregnation or bond
- N Y10T 428/24802 . . Discontinuous or differential coating, impregnation or bond [e.g., artwork, printing, retouched photograph, etc.]
- N Y10T 428/2481 . . . including layer of mechanically interengaged strands, strand-portions or strand-like strips
- N Y10T 428/24818 Knitted, with particular or differential bond sites or intersections
- N Y10T 428/24826 . . . Spot bonds connect components
- N Y10T 428/24835 . . . including developable image or soluble portion in coating or impregnation [e.g., safety paper, etc.]
- N Y10T 428/24843 . . . with heat sealable or heat releasable adhesive layer
- N Y10T 428/24851 . . . Intermediate layer is discontinuous or differential
- N Y10T 428/2486 with outer strippable or release layer
- N Y10T 428/24868 Translucent outer layer
- N Y10T 428/24876 Intermediate layer contains particulate material [e.g., pigment, etc.]
- N Y10T 428/24884 Translucent layer comprises natural oil, wax, resin, gum, glue, gelatin
- N Y10T 428/24893 . . . including particulate material
- N Y10T 428/24901 including coloring matter
- N Y10T 428/24909 Free metal or mineral containing
- N Y10T 428/24917 . . . including metal layer
- N Y10T 428/24926 . . . including ceramic, glass, porcelain or quartz layer

- N Y10T 428/24934 . . . including paper layer
- N Y10T 428/24942 . . including components having same physical characteristic in differing degree
- N Y10T 428/2495 . . . Thickness [relative or absolute]
- N Y10T 428/24959 of adhesive layers
- N Y10T 428/24967 Absolute thicknesses specified
- N Y10T 428/24975 No layer or component greater than 5 mils thick
- N Y10T 428/24983 . . . Hardness
- N Y10T 428/24992 . . . Density or compression of components
- N Y10T 428/25 . Web or sheet containing structurally defined element or component and including a second component containing structurally defined particles
- N Y10T 428/251 . . Mica
- N Y10T 428/252 . . Glass or ceramic [i.e., fired or glazed clay, cement, etc.] [porcelain, quartz, etc.]
- N Y10T 428/253 . . Cellulosic [e.g., wood, paper, cork, rayon, etc.]
- N Y10T 428/254 . . Polymeric or resinous material
- N Y10T 428/256 . . Heavy metal or aluminum or compound thereof
- N Y10T 428/257 . . . Iron oxide or aluminum oxide
- N Y10T 428/258 . . Alkali metal or alkaline earth metal or compound thereof
- N Y10T 428/259 . . Silicic material
- N Y10T 428/26 . Web or sheet containing structurally defined element or component, the element or component having a specified physical dimension
- N Y10T 428/261 . . In terms of molecular thickness or light wave length
- N Y10T 428/263 . . Coating layer not in excess of 5 mils thick or equivalent
- N Y10T 428/264 . . . Up to 3 mils
- N Y10T 428/265 1 mil or less
- N Y10T 428/266 . . of base or substrate
- N Y10T 428/268 . . Monolayer with structurally defined element
- N Y10T 428/269 . . including synthetic resin or polymer layer or component
- N Y10T 428/27 . Web or sheet containing structurally defined element or component, the element or component having a specified weight per unit area [e.g., gms/sq cm, lbs/sq ft, etc.]
- N Y10T 428/273 . . of coating
- N Y10T 428/277 . . . Cellulosic substrate
- N Y10T 428/28 . Web or sheet containing structurally defined element or component and having an adhesive outermost layer
- N Y10T 428/2804 . . Next to metal
- N Y10T 428/2809 . . including irradiated or wave energy treated component
- N Y10T 428/2813 . . Heat or solvent activated or sealable
- N Y10T 428/2817 . . . Heat sealable
- N Y10T 428/2822 Wax containing
- N Y10T 428/2826 Synthetic resin or polymer
- N Y10T 428/283 . . . Water activated
- N Y10T 428/2835 . . including moisture or waterproof component
- N Y10T 428/2839 . . with release or antistick coating
- N Y10T 428/2843 . . including a primer layer
- N Y10T 428/2848 . . Three or more layers

- N Y10T 428/2852
 - • Adhesive compositions
- N Y10T 428/2857
 - • • including metal or compound thereof or natural rubber
- N Y10T 428/2861
 - • • having readily strippable combined with readily readhearable properties [e.g., stick-ons, etc.]
- N Y10T 428/2865
 - • • including monomer or polymer of carbohydrate [e.g., starch, dextrin, etc.] Or protein [e.g., casein, animal protein, etc.] Or derivative thereof
- N Y10T 428/287
 - • • including epoxy group or epoxy polymer
- N Y10T 428/2874
 - • • including aldehyde or ketone condensation polymer [e.g., urea formaldehyde polymer, melamine formaldehyde polymer, etc.]
- N Y10T 428/2878
 - • • including addition polymer from unsaturated monomer
- N Y10T 428/2883
 - • • • including addition polymer of diene monomer [e.g., SBR, SIS, etc.]
- N Y10T 428/2887
 - • • • including nitrogen containing polymer [e.g., polyacrylonitrile, polymethacrylonitrile, etc.]
- N Y10T 428/2891
 - • • • including addition polymer from alpha-beta unsaturated carboxylic acid [e.g., acrylic acid, methacrylic acid, etc.] Or derivative thereof
- N Y10T 428/2896
 - • • including nitrogen containing condensation polymer [e.g., polyurethane, polyisocyanate, etc.]
- N Y10T 428/29
 - Coated or structually defined flake, particle, cell, strand, strand portion, rod, filament, macroscopic fiber or mass thereof
- N Y10T 428/2902
 - • Channel shape
- N Y10T 428/2904
 - • Staple length fiber
- N Y10T 428/2905
 - • • Plural and with bonded intersections only
- N Y10T 428/2907
 - • • with coating or impregnation
- N Y10T 428/2909
 - • • Nonlinear [e.g., crimped, coiled, etc.]
- N Y10T 428/2911
 - • Mica flake
- N Y10T 428/2913
 - • Rod, strand, filament or fiber
- N Y10T 428/2915
 - • • including textile, cloth or fabric
- N Y10T 428/2916
 - • • including boron or compound thereof [not as steel]
- N Y10T 428/2918
 - • • including free carbon or carbide or therewith [not as steel]
- N Y10T 428/292
 - • • • In coating or impregnation
- N Y10T 428/2922
 - • • Nonlinear [e.g., crimped, coiled, etc.]
- N Y10T 428/2924
 - • • • Composite
- N Y10T 428/2925
 - • • • Helical or coiled
- N Y10T 428/2927
 - • • including structurally defined particulate matter
- N Y10T 428/2929
 - • • Bicomponent, conjugate, composite or collateral fibers or filaments [i.e., coextruded sheath-core or side-by-side type]
- N Y10T 428/2931
 - • • • Fibers or filaments nonconcentric [e.g., side-by-side or eccentric, etc.]
- N Y10T 428/2933
 - • • Coated or with bond, impregnation or core
- N Y10T 428/2935
 - • • • Discontinuous or tubular or cellular core
- N Y10T 428/2936
 - • • • Wound or wrapped core or coating [i.e., spiral or helical]
- N Y10T 428/2938
 - • • • Coating on discrete and individual rods, strands or filaments
- N Y10T 428/294
 - • • • including metal or compound thereof [excluding glass, ceramic and asbestos]
- N Y10T 428/2942
 - • • • • Plural coatings
- N Y10T 428/2944
 - • • • • Free metal in coating
- N Y10T 428/2945
 - • • • • Natural rubber in coating

N	Y10T 428/2947 Synthetic resin or polymer in plural coatings, each of different type
N	Y10T 428/2949 Glass, ceramic or metal oxide in coating
N	Y10T 428/2951 Metal with weld modifying or stabilizing coating [e.g., flux, slag, producer, etc.]
N	Y10T 428/2953 Titanium compound in coating
N	Y10T 428/2955 Silicic material in coating
N	Y10T 428/2956 Glass or silicic fiber or filament with metal coating
N	Y10T 428/2958 Metal or metal compound in coating
N	Y10T 428/296 Rubber, cellulosic or silicic material in coating
N	Y10T 428/2962 Silane, silicone or siloxane in coating
N	Y10T 428/2964 Artificial fiber or filament
N	Y10T 428/2965 Cellulosic
N	Y10T 428/2967 Synthetic resin or polymer
N	Y10T 428/2969 Polyamide, polyimide or polyester
N	Y10T 428/2971 Impregnation
N	Y10T 428/2973 Particular cross section
N	Y10T 428/2975 Tubular or cellular
N	Y10T 428/2976 Longitudinally varying
N	Y10T 428/2978 Surface characteristic
N	Y10T 428/298 Physical dimension
N	Y10T 428/2982 Particulate matter [e.g., sphere, flake, etc.]
N	Y10T 428/2984 Microcapsule with fluid core [includes liposome]
N	Y10T 428/2985 Solid-walled microcapsule from synthetic polymer
N	Y10T 428/2987 Addition polymer from unsaturated monomers only
N	Y10T 428/2989 Microcapsule with solid core [includes liposome]
N	Y10T 428/2991 Coated
N	Y10T 428/2993 Silicic or refractory material containing [e.g., tungsten oxide, glass, cement, etc.]
N	Y10T 428/2995 Silane, siloxane or silicone coating
N	Y10T 428/2996 Glass particles or spheres
N	Y10T 428/2998 including synthetic resin or polymer
N	Y10T 428/30 Self-sustaining carbon mass or layer with impregnant or other layer
N	Y10T 428/31 Surface property or characteristic of web, sheet or block
N	Y10T 428/315 Surface modified glass [e.g., tempered, strengthened, etc.]
N	Y10T 428/32 Composite [nonstructural laminate] of inorganic material having metal-compound-containing layer and having defined magnetic layer
N	Y10T 428/325 Magnetic layer next to second metal compound-containing layer
N	Y10T 436/00 - Y10T 436/00	<u>Former US Class 436 Series</u>
N	Y10T 436/00	Chemistry: analytical and immunological testing
N	Y10T 436/10 Composition for standardization, calibration, simulation, stabilization, preparation or preservation; processes of use in preparation for chemical testing
N	Y10T 436/100833 Simulative of a gaseous composition
N	Y10T 436/101666 Particle count or volume standard or control [e.g., platelet count standards, etc.]

N	Y10T 436/102499	• • Blood gas standard or control
N	Y10T 436/103332	• • Bilirubin or uric acid standard or control
N	Y10T 436/104165	• • Lipid, cholesterol, or triglyceride standard or control
N	Y10T 436/104998	• • Glucose, ketone, nitrate standard or control
N	Y10T 436/105831	• • Protein or peptide standard or control [e.g., hemoglobin, etc.]
N	Y10T 436/106664	• • Blood serum or blood plasma standard or control
N	Y10T 436/107497	• • Preparation composition [e.g., lysing or precipitation, etc.]
N	Y10T 436/108331	• • Preservative, buffer, anticoagulant or diluent
N	Y10T 436/109163	• • Inorganic standards or controls
N	Y10T 436/11	• Automated chemical analysis
N	Y10T 436/110833	• • Utilizing a moving indicator strip or tape
N	Y10T 436/111666	• • Utilizing a centrifuge or compartmented rotor
N	Y10T 436/112499	• • with sample on test slide
N	Y10T 436/113332	• • with conveyance of sample along a test line in a container or rack
N	Y10T 436/114165	• • • with step of insertion or removal from test line
N	Y10T 436/114998	• • • with treatment or replacement of aspirator element [e.g., cleaning, etc.]
N	Y10T 436/115831	• • Condition or time responsive
N	Y10T 436/116664	• • • with automated titrator
N	Y10T 436/117497	• • with a continuously flowing sample or carrier stream
N	Y10T 436/118339	• • • with formation of a segmented stream
N	Y10T 436/119163	• • with aspirator of claimed structure
N	Y10T 436/12	• Condition responsive control
N	Y10T 436/13	• Tracers or tags
N	Y10T 436/14	• Heterocyclic carbon compound [i.e. , O, S, N, Se, Te, as only ring hetero atom]
N	Y10T 436/141111	• • Diverse hetero atoms in same or different rings [e.g., alkaloids, opiates, etc.]
N	Y10T 436/142222	• • Hetero-O [e.g., ascorbic acid, etc.]
N	Y10T 436/143333	• • • Saccharide [e.g., DNA, etc.]
N	Y10T 436/144444	• • • • Glucose
N	Y10T 436/145555	• • Hetero-N
N	Y10T 436/146666	• • • Bile pigment
N	Y10T 436/147777	• • • Plural nitrogen in the same ring [e.g., barbituates, creatinine, etc.]
N	Y10T 436/148888	• • • • Uric acid
N	Y10T 436/15	• Inorganic acid or base [e.g. , hcl, sulfuric acid, etc.]
N	Y10T 436/153333	• • Halogen containing
N	Y10T 436/156666	• • Sulfur containing
N	Y10T 436/16	• Phosphorus containing
N	Y10T 436/163333	• • Organic [e.g., chemical warfare agents, insecticides, etc.]
N	Y10T 436/166666	• • of inorganic phosphorus compound in body fluid
N	Y10T 436/17	• Nitrogen containing
N	Y10T 436/170769	• • N-Nitroso containing [e.g., nitrosamine, etc.]
N	Y10T 436/171538	• • Urea or blood urea nitrogen
N	Y10T 436/172307	• • Cyanide or isocyanide
N	Y10T 436/173076	• • Nitrite or nitrate
N	Y10T 436/173845	• • Amine and quaternary ammonium

N	Y10T 436/174614	• • • Tertiary amine
N	Y10T 436/175383	• • • Ammonia
N	Y10T 436/176152	• • Total nitrogen determined
N	Y10T 436/176921	• • • As part of an elemental analysis
N	Y10T 436/177692	• • Oxides of nitrogen
N	Y10T 436/178459	• • • Only nitrogen dioxide
N	Y10T 436/179228	• • • Both nitrogen oxide and dioxide
N	Y10T 436/18	• Sulfur containing
N	Y10T 436/182	• • Organic or sulfhydryl containing [e.g., mercaptan, hydrogen, sulfide, etc.]
N	Y10T 436/184	• • • Only hydrogen sulfide
N	Y10T 436/186	• • Sulfur dioxide
N	Y10T 436/188	• • Total or elemental sulfur
N	Y10T 436/19	• Halogen containing
N	Y10T 436/193333	• • In aqueous solution
N	Y10T 436/196666	• • Carbon containing compound [e.g., vinylchloride, etc.]
N	Y10T 436/20	• Oxygen containing
N	Y10T 436/200833	• • Carbonyl, ether, aldehyde or ketone containing
N	Y10T 436/201666	• • • Carboxylic acid
N	Y10T 436/202499	• • • Formaldehyde or acetone
N	Y10T 436/203332	• • Hydroxyl containing
N	Y10T 436/204165	• • • Ethanol
N	Y10T 436/204998	• • Inorganic carbon compounds
N	Y10T 436/205831	• • • Carbon monoxide only
N	Y10T 436/206664	• • Ozone or peroxide
N	Y10T 436/207497	• • Molecular oxygen
N	Y10T 436/208339	• • • Fuel/air mixture or exhaust gas analysis
N	Y10T 436/209163	• • • Dissolved or trace oxygen or oxygen content of a sealed environment
N	Y10T 436/21	• Hydrocarbon
N	Y10T 436/212	• • Aromatic
N	Y10T 436/214	• • Acyclic [e.g., methane, octane, isoparaffin, etc.]
N	Y10T 436/216	• • • Unsaturated [e.g., ethylene, diene, etc.]
N	Y10T 436/218	• • Total hydrocarbon, flammability, combustibility [e.g., air-fuel mixture, etc.]
N	Y10T 436/22	• Hydrogen, per se
N	Y10T 436/23	• Carbon containing
N	Y10T 436/235	• • In an aqueous solution [e.g., TOC, etc.]
N	Y10T 436/24	• Nuclear magnetic resonance, electron spin resonance or other spin effects or mass spectrometry
N	Y10T 436/25	• including sample preparation
N	Y10T 436/25125	• • Digestion or removing interfering materials
N	Y10T 436/2525	• • Stabilizing or preserving
N	Y10T 436/25375	• • Liberation or purification of sample or separation of material from a sample [e.g., filtering, centrifuging, etc.]
N	Y10T 436/255	• • • including use of a solid sorbent, semipermeable membrane, or liquid extraction
N	Y10T 436/25625	• • Dilution

N	Y10T 436/2575	• • Volumetric liquid transfer
N	Y10T 436/25875	• • Gaseous sample or with change of physical state
N	Y10T 464/00 - Y10T 464/00	<u>Former US Class 464 Series</u>
N	Y10T 464/00	<i>Rotary shafts, gudgeons, housings, and flexible couplings for rotary shafts</i>
N	Y10T 464/10	• having heating or cooling means
N	Y10T 464/20	• with auxilliary indicator or alarm
N	Y10T 464/30	• Electrical or magnetic coupling
N	Y10T 464/40	• Coupling accommodates drive between members having misaligned or angularly related axes, transmits torque via radially directed pin, and has particular balancing means
N	Y10T 464/50	• Shafting having particular vibration dampening or balancing structure
N	Y10T 477/00 - Y10T 477/00	<u>Former US Class 477 Series</u>
N	Y10T 477/00	<i>Interrelated power delivery controls, including engine control</i>
N	Y10T 477/10	• Steering by driving
N	Y10T 477/20	• Plural engines
N	Y10T 477/23	• • Electric engine
N	Y10T 477/24	• • • with brake control
N	Y10T 477/26	• • • with clutch control
N	Y10T 477/27	• • with clutch control
N	Y10T 477/30	• Electric engine
N	Y10T 477/32	• • with clutch control
N	Y10T 477/322	• • • with brake control
N	Y10T 477/3225	• • • • Stopped at end of cycle
N	Y10T 477/323	• • • Engine stopped at end of cycle
N	Y10T 477/325	• • • Common controller
N	Y10T 477/327	• • • Electric clutch
N	Y10T 477/328	• • • Speed responsive
N	Y10T 477/33	• • with transmission control
N	Y10T 477/333	• • • Load motion limit control
N	Y10T 477/337	• • • Transmission change by moving engine
N	Y10T 477/34	• • • Reversible engine
N	Y10T 477/343	• • • Engine starting interlock
N	Y10T 477/347	• • • Condition responsive engine control
N	Y10T 477/35	• • Brake engaged when engine energy deactivated, brake disengaged when engine energy activated
N	Y10T 477/357	• • • Cam actuated brake
N	Y10T 477/363	• • • Electrically actuated brake
N	Y10T 477/37	• • Brake actuation opens switch to engine
N	Y10T 477/373	• • • Electrically actuated brake
N	Y10T 477/377	• • • Fluid actuated brake
N	Y10T 477/38	• • Control means selectively operates engine energy input and brake
N	Y10T 477/387	• • • Fluid actuated brake
N	Y10T 477/393	• • • Electrically actuated brake

N	Y10T 477/40	• Gas turbine engine
N	Y10T 477/45	• • Continuously variable transmission
N	Y10T 477/50	• with supercharger
N	Y10T 477/55	• • Manifold pressure control
N	Y10T 477/60	• Transmission control
N	Y10T 477/606	• • Differential transmission
N	Y10T 477/613	• • Plural outputs
N	Y10T 477/619	• • Continuously variable friction transmission
N	Y10T 477/6197	• • • with fluid drive
N	Y10T 477/6203	• • • with clutch control
N	Y10T 477/621	• • • with brake control
N	Y10T 477/6217	• • • Interrelated control of diverse transmissions
N	Y10T 477/6223	• • • Constant speed output
N	Y10T 477/623	• • • Controlled by engine map
N	Y10T 477/6237	• • • Belt-type
N	Y10T 477/624	• • • • Fluid pressure control
N	Y10T 477/6242	• • • • • Ratio change controlled
N	Y10T 477/62423	• • • • • Engine coast braking
N	Y10T 477/62427	• • • • • with electric valve control
N	Y10T 477/62429	• • • • • • Duty ratio control
N	Y10T 477/6243	• • • Fluid pressure control
N	Y10T 477/625	• • Fluid resistance inhibits rotation of planetary transmission element
N	Y10T 477/631	• • including fluid drive
N	Y10T 477/633	• • • Impeller-turbine-type
N	Y10T 477/6333	• • • • Engine controlled
N	Y10T 477/6337	• • • • with countershaft gearing
N	Y10T 477/63378	• • • • • and turbine shaft brake
N	Y10T 477/63385	• • • • • and clutch control
N	Y10T 477/63393	• • • • • Control of or by fluid drive
N	Y10T 477/634	• • • • with hydrodynamic braking
N	Y10T 477/6343	• • • • with nonratio brake
N	Y10T 477/6347	• • • • Control responsive to fluid drive
N	Y10T 477/635	• • • • with clutch control
N	Y10T 477/6351	• • • • • Disengaged during shift
N	Y10T 477/6352	• • • • • Speed responsive
N	Y10T 477/63525	• • • • • • Electrical
N	Y10T 477/6353	• • • • with fluid unit vane control
N	Y10T 477/6357	• • • • Fill and empty-type fluid units
N	Y10T 477/636	• • • Ratio control
N	Y10T 477/637	• • • • with planetary transmission control
N	Y10T 477/638	• • with clutch control
N	Y10T 477/6388	• • • and brake control
N	Y10T 477/6389	• • • • Temperature responsive control
N	Y10T 477/639	• • • • Engine controlled

N	Y10T 477/6392 Clutch controlled
N	Y10T 477/6394 Gearing controlled
N	Y10T 477/6395	. . . Temperature responsive control
N	Y10T 477/6403	. . . Clutch, engine, and transmission controlled
N	Y10T 477/6407 Electronic digital control
N	Y10T 477/641	. . . Clutch and transmission controlled
N	Y10T 477/6414 Speed responsive control
N	Y10T 477/6415 with manual override
N	Y10T 477/6417 Vacuum actuated clutch
N	Y10T 477/6418	. . . Clutch and engine controlled
N	Y10T 477/6422 Speed responsive control
N	Y10T 477/6424 Plural speed signals
N	Y10T 477/6425	. . . Clutch controlled
N	Y10T 477/6428 Electric clutch
N	Y10T 477/643 Vacuum actuated clutch
N	Y10T 477/6432 Electric control
N	Y10T 477/6433	. . . Engine controlled
N	Y10T 477/6437 Speed responsive
N	Y10T 477/644	. . with brake control
N	Y10T 477/646	. . . Anti-creep
N	Y10T 477/647	. . . Brake controls transmission
N	Y10T 477/648 Pressure controlled
N	Y10T 477/649	. . . One control blocks another
N	Y10T 477/65	. . Control by sensed ambient condition, pattern indicia, external signal, or temperature
N	Y10T 477/653	. . . Temperature control
N	Y10T 477/656	. . Engine starting interlock
N	Y10T 477/663	. . Exhaust emission control
N	Y10T 477/669	. . Engine ignition control for transmission change
N	Y10T 477/67	. . . Ignition advanced or retarded
N	Y10T 477/671	. . . Ignition intermitting and safety means limiting duration of intermission
N	Y10T 477/673	. . . Ignition intermitting controlled by manifold pressure
N	Y10T 477/674	. . . Ignition intermitting initiated by positioning accelerator
N	Y10T 477/6745 Initiation inhibited by sensed condition
N	Y10T 477/675	. . Engine controlled by transmission
N	Y10T 477/676	. . . Constant output shaft speed
N	Y10T 477/677	. . . Diminution during transmission change
N	Y10T 477/679	. . . Responsive to transmission output condition
N	Y10T 477/68	. . . Transmission setting contingent
N	Y10T 477/6805 Change to neutral idles engine
N	Y10T 477/6808 Engine input variable in neutral
N	Y10T 477/681	. . Anticreep
N	Y10T 477/688	. . Transmission controlled by engine
N	Y10T 477/689	. . . Shift from neutral shock control

N	Y10T 477/6895 Pressure controlled
N	Y10T 477/69	. . . Engine [coast] braking
N	Y10T 477/691 Electric valve control
N	Y10T 477/692	. . . by acceleration
N	Y10T 477/693	. . . by input manifold pressure or engine fuel control
N	Y10T 477/6931 Selector-type
N	Y10T 477/6933 with positive shift means
N	Y10T 477/69335 with synchronization
N	Y10T 477/6934 Prevents unsafe or unintentional shift
N	Y10T 477/6935 Reverse inhibitor
N	Y10T 477/6936 Shift valve control
N	Y10T 477/69362 Hysteresis
N	Y10T 477/693625 Electric control
N	Y10T 477/69363 Plural shift valves
N	Y10T 477/693635 Electric control
N	Y10T 477/693636 Downshift control
N	Y10T 477/693637 Kickdown
N	Y10T 477/693638 Selector valve overrule
N	Y10T 477/69364 Downshift control
N	Y10T 477/693643 Kickdown
N	Y10T 477/693645 Selector valve overrule
N	Y10T 477/69365 Electric control
N	Y10T 477/69366 Downshift control
N	Y10T 477/69367 Downshift control
N	Y10T 477/693675 Kickdown
N	Y10T 477/69368 Selector valve overrule
N	Y10T 477/6937 Servo motor timing
N	Y10T 477/69373 Downshift
N	Y10T 477/693738 with fluid accumulator
N	Y10T 477/693742 Electric valve control
N	Y10T 477/693746 Double acting servo
N	Y10T 477/693754 Speed responsive control
N	Y10T 477/693762 Electric valve control
N	Y10T 477/69377 with fluid accumulator
N	Y10T 477/69378 Engine parameter controls back pressure
N	Y10T 477/69379 Electric valve control
N	Y10T 477/6938 Double acting servo
N	Y10T 477/69383 Speed responsive control
N	Y10T 477/69387 Electric valve control
N	Y10T 477/6939 Transmission pressure controlled
N	Y10T 477/69393 Variable capacity pump
N	Y10T 477/69395 Line pressure controlled
N	Y10T 477/693958 Responsive to speed
N	Y10T 477/693962 Electric valve control

N	Y10T 477/693964 Duty ratio control
N	Y10T 477/693965 Transmission setting contingent
N	Y10T 477/693973 Electric valve control
N	Y10T 477/69398 Electric valve control
N	Y10T 477/694	. . Engine control linkage mounted on manual gearshift lever
N	Y10T 477/70	. Clutch control
N	Y10T 477/71	. . with starter
N	Y10T 477/73	. . with fluid drive
N	Y10T 477/735	. . . Speed responsive control
N	Y10T 477/74	. . with brake control
N	Y10T 477/743	. . . Clutch controlled
N	Y10T 477/745 and brake controlled
N	Y10T 477/747	. . . Engine controlled
N	Y10T 477/75	. . Condition responsive control
N	Y10T 477/753	. . . Speed responsive
N	Y10T 477/755 Slip rate control
N	Y10T 477/757	. . . Overload release
N	Y10T 477/759 Engine shut off
N	Y10T 477/76	. . Electric clutch
N	Y10T 477/78	. . Regulated clutch engagement
N	Y10T 477/79	. . Engine controlled by clutch control
N	Y10T 477/80	. Brake control
N	Y10T 477/81	. . Sensed condition responsive control of engine or brake
N	Y10T 477/813	. . . Brake
N	Y10T 477/814 and engine
N	Y10T 477/816 Speed or acceleration responsive
N	Y10T 477/817	. . . Speed or acceleration responsive
N	Y10T 477/82	. . Plural diverse brake means
N	Y10T 477/83	. . Engine energy control having adjusting and holding device, with means on brake control to override holding device
N	Y10T 477/833	. . . Holding device engaged by electric means
N	Y10T 477/835 Magnetic holding device
N	Y10T 477/837	. . . Mechanical holding device engaged by mechanical means
N	Y10T 477/839 Device or means including a threaded shaft, rack or ratchet
N	Y10T 477/84	. . Brake control having holding device, with means on engine control to override holding device
N	Y10T 477/847	. . . Holding device responsive to motion, speed or acceleration
N	Y10T 477/85 Holding device comprising brake valve operated by solenoid
N	Y10T 477/853	. . . Holding device engaged by electric means
N	Y10T 477/857 Holding device comprising brake valve operated by solenoid
N	Y10T 477/86	. . Brake engaged when engine energy deactivated, brake disengaged when engine energy is activated
N	Y10T 477/865	. . . Internal combustion engine
N	Y10T 477/868 Controls brake valve
N	Y10T 477/869 Vacuum actuated brake

- N Y10T 477/87 *• • Brake condition change modifies engine condition*
- N Y10T 477/873 *• • • Brake actuation interrupts ignition circuit of fluid engine*
- N Y10T 477/877 *• • • Brake actuation decreases or eliminates fluid energy input to engine*
- N Y10T 477/878 *• • • • by closing throttle valve*
- N Y10T 477/879 *• • • • by preventing increasing operation of engine energy control*
- N Y10T 477/88 *• • Decreasing fluid energy input to engine actuates brake*
- N Y10T 477/89 *• • Control means selectively operates engine energy input and brake*
- N Y10T 477/893 *• • • Foot operated control means*
- N Y10T 477/8936 *• • • • Engine and brake control including interconnected elements*
- N Y10T 477/8941 *• • • • Pivots and translates*
- N Y10T 477/8944 *• • • • • Pivots about intermediate fulcrum*
- N Y10T 477/8947 *• • • • Pivots about two fulcrums*
- N Y10T 477/8953 *• • • • Pivots about intermediate fulcrum*
- N Y10T 477/8959 *• • • • Lever reciprocates on moveable supports at both ends*
- N Y10T 477/8964 *• • • • Pivots for sequential operation*
- N Y10T 477/897 *• • • Control means including fluid passage*

**N Y10T 483/00 -
Y10T 483/00**

Former US Class 483 Series

N Y10T 483/00

Tool changing

- N Y10T 483/10 *• Process*
- N Y10T 483/11 *• with safety means*
- N Y10T 483/115 *• • Guard*
- N Y10T 483/12 *• with means to regulate operation by means of replaceable information supply [e.g. , templet, tape, card, etc.]*
- N Y10T 483/123 *• • Replaceable information comprising tool location*
- N Y10T 483/127 *• • • including determining optimum tool access path*
- N Y10T 483/13 *• with control means energized in response to activator stimulated by condition sensor*
- N Y10T 483/132 *• • Responsive to tool identifying information*
- N Y10T 483/134 *• • • Identifying information on tool or tool holder*
- N Y10T 483/136 *• • Responsive to tool*
- N Y10T 483/138 *• • • including means to monitor and control, i.e., adaptive machining*
- N Y10T 483/14 *• with signal or indicator*
- N Y10T 483/15 *• with means to condition or adjust tool or tool support*
- N Y10T 483/16 *• with means to transfer work*
- N Y10T 483/165 *• • Plural machine tools, e.g., flexible manufacturing*
- N Y10T 483/17 *• including machine tool or component*
- N Y10T 483/1702 *• • Rotating work machine tool [e.g., screw machine, lathe, etc.]*
- N Y10T 483/1705 *• • • Tool support comprises rotary spindle*
- N Y10T 483/1707 *• • • Tool having specific mounting or work treating feature*
- N Y10T 483/171 *• • • • Workpiece holder [e.g., chuck or chuck jaw, collet, etc.]*
- N Y10T 483/1712 *• • • • Turning tool insert changer*
- N Y10T 483/1714 *• • • Tool changer between tool support and matrix*
- N Y10T 483/1717 *• • • • Plural matrices*
- N Y10T 483/1719 *• • • • Tool support comprises turret*

N	Y10T 483/1721 Linearly moveable tool changer
N	Y10T 483/1724 Linearly moveable tool changer
N	Y10T 483/1726	. . . Direct tool exchange between tool support and matrix
N	Y10T 483/1729	. . Reciprocating tool machine tool [e.g., broaching machine, shaping machine, etc.]
N	Y10T 483/1731	. . . including matrix
N	Y10T 483/1733	. . Rotary spindle machine tool [e.g., milling machine, boring, machine, grinding machine, etc.]
N	Y10T 483/1736	. . . Tool having specific mounting or work treating feature
N	Y10T 483/1738 Tool head
N	Y10T 483/174 Abrading wheel
N	Y10T 483/1743 including means for angularly orienting tool and spindle
N	Y10T 483/1745 Spindle angularly oriented to align with tool
N	Y10T 483/1748	. . . Tool changer between spindle and matrix
N	Y10T 483/175 Plural matrices
N	Y10T 483/1752 including tool holder pivotable about axis
N	Y10T 483/1755 Plural tool holders pivotable about common axis
N	Y10T 483/1757 including intermediate tool changer
N	Y10T 483/176 Intermediate tool changer includes tool holder pivotable about axis
N	Y10T 483/1762 Tool holders pivotable with respect to each other
N	Y10T 483/1764 Tool holders pivotable about plural nonparallel axes
N	Y10T 483/1767 Linearly movable tool holders
N	Y10T 483/1769 Extensible tool holders
N	Y10T 483/1771 Translatable axis
N	Y10T 483/1774 Distinct tool changer for each tool
N	Y10T 483/1776 including intermediate tool changer
N	Y10T 483/1779 Linearly movable tool holder
N	Y10T 483/1781 Tool holder pivotable about plural nonparallel axes
N	Y10T 483/1783 including linearly translatable tool changer [e.g., shuttle, ram, etc.]
N	Y10T 483/1786 Plural tool holders
N	Y10T 483/1788 Orthogonally translatable
N	Y10T 483/179	. . . Direct tool exchange between spindle and matrix
N	Y10T 483/1793 Spindle comprises tool changer
N	Y10T 483/1795 Matrix indexes selected tool to transfer position
N	Y10T 483/1798 including means to project tool from matrix
N	Y10T 483/18	. Tool transfer to or from matrix
N	Y10T 483/1809	. . Matrix including means to latch tool
N	Y10T 483/1818	. . Matrix including means to project tool for transfer
N	Y10T 483/1827	. . . Rectilinear
N	Y10T 483/1836	. . . Pivoting
N	Y10T 483/1845	. . Plural matrices
N	Y10T 483/1855	. . . including tool replenishing
N	Y10T 483/1864	. . including tool pot or adapter
N	Y10T 483/1873	. . Indexing matrix
N	Y10T 483/1882	. . . Rotary disc

N	Y10T 483/1891	• • • Chain or belt
N	Y10T 483/19	• Miscellaneous
