- Fully design and implementation of the procedures and IT tools (ProClasS) at IMPI-Mexico

- We classify in CPC in all technical fields.
- We classify all documents: Patents and Utility models.
 - We classify PCT and National Applications.
- We started classifying in CPC all new documents from 1st of April 2016.
- We search documents using CPC symbols (internal and external searches).

Topic 2

Quality Assurance process under the CPC system at National Offices.

Quality Assurance process under the CPC system at National Offices.

- Fully design and implementation of the procedures and IT tools (ProClasS) at IMPI-Mexico

Topic 3

CPC Training

CPC Training materials

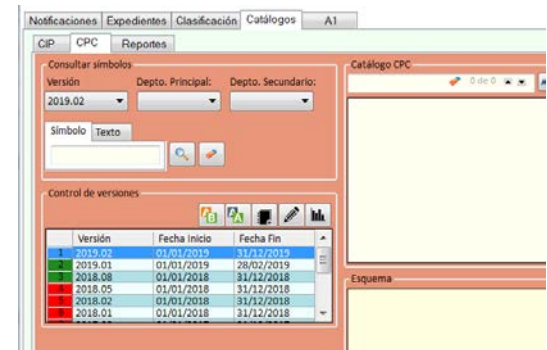

- We use the CPC guidelines.
 - We watch the Epoxy videos.
-
- We believed that we need specific training to 4 classifiers.
 - We suggest to USPTO and EPO's authorities to visit IMPI's Headquarters to see how CPC project is going on.

Topic 4

CPC Implementation

CPC Implementation

- Benefit- Now we have a administrative procedure of Classification and an advanced IT tool (ProClass).
- Challenges- At the beginning of the project, there is not enough information of how to implement the project and some orientation of the IT tools.
- Until this year we developed an IT tool dedicated to update the CPC scheme catalog.
(2016.08 ->2019.01 [13])

- We have classified near of 50,000 applications for A1 and B1 gazette. More or less 8% are national applications.
 - There is not enough resources to reclassification back-file documents yet.
 - There is no intention to translate the scheme to Spanish.
 - It's still pending the proposal of an implementation manual of IMPI's CPC project, in order to orientate other offices in their own implementation.

Topic 5

CPC Data Exchange

CPC Data Exchange

- Front File- We use the FTP folder to transmit our CPC data.
 - We still have some administrative problems with other formality departments. The granted applications has to be digitalized in order to be transmitted to EPO.
- We have in mind to do an inner tool in ProClass to transmit the data via OPS.

Thank you
