

ECLA

EUROPEAN CLASSIFICATION

D10B

INDEXING SCHEME RELATING TO TEXTILES [N1202]

Note

1. This subclass is for indexing only.
2. The indexing codes of this subclass, relating to the chemical constitution of the fibrous materials, are to be associated with groups of section D, with the exception of those of subclass D06M, as far as these groups themselves do not give information about the chemical nature of the fibres.
3. In a number of fields, the indexing codes relating to the chemical constitution of the fibrous materials are not allotted to documents having an abstract in which the chemical constitution is clearly stated, e.g. if the abstract mentions "polyamide", code [N10B331/021](#) is not allotted.
4. Blends of fibres are indexed according to each constituent fibre.
