

ECLA**EUROPEAN CLASSIFICATION****G06F**

ELECTRICAL DIGITAL DATA PROCESSING (computers in which a part of the computation is effected hydraulically or pneumatically G06D; optically G06E; self-contained input or output peripheral equipment G06K; impedance networks using digital techniques H03H) [C9603]

[N: **WARNING** [C2012.08]

The following IPC groups are not used in the internal ECLA classification scheme. Subject matter covered by these groups is classified in the following ECLA groups:

[G06F3/18](#) covered by [G06F3/00](#), [G06K11/00](#)

[G06F7/04](#) covered by [G06F7/02](#)

[G06F9/302-G06F9/318](#) covered by [G06F9/30](#)

- [G06F9/40](#) covered by [G06F9/44F1A](#) and subgroups - [G06F9/42](#) covered by [G06F9/44F1A1](#) and subgroups - [G06F9/45](#) covered by [G06F8/41](#) and subgroups

]

Note

In this subclass, the following terms or expressions are used with the meaning indicated:

- "handling" includes processing or transporting of data;

- "data processing equipment" means an association of an electric digital data processor classifiable under group [G06F7/00](#), with one or more arrangements classifiable under groups [G06F1/00](#) to [G06F5/00](#) and [G06F9/00](#) to [G06F13/00](#).

G06F1/00

Details of data-processing equipment not covered by groups [G06F3/00](#) to [G06F13/00](#), [N: e.g. cooling, packaging or power supply specially adapted for computer application (security arrangements for protecting computers or computer systems against unauthorised activity [G06F21/00](#))] [C0702]

G06F1/02

- Digital function generators [N: (evaluating functions by calculating only [G06F7/544](#), [G06F7/60](#); generating sawtooth or staircase waveforms [H03K4/00](#))]

G06F1/02W

- [N: Waveform generators, i.e. devices for generating periodical functions of time, e.g. direct digital synthesizers ([G06F1/025](#), [G06F1/03](#) take precedence) [N9904]

G06F1/025

- for functions having two-valued amplitude, e.g. Walsh functions [N: (generation of pulse trains in general [H03K3/00](#))]

G06F1/025W

- [N: Walsh or analogous functions]

G06F1/03

- working, at least partly, by table look-up ([G06F1/025](#) takes precedence)]

Note

In order to be classified in this group, the table must contain function values of the desired or an intermediate function, not merely coefficients.

G06F1/03D

- [N: Logarithmic or exponential functions ([G06F1/03P](#), [G06F1/035](#) take precedence)]

G06F1/03P

- [N: the table being stored on a peripheral device, e.g. papertape, drum]

G06F1/03W

- [N: Waveform generators, i.e. devices for generating periodical functions of time, e.g. direct digital synthesizers ([G06F1/03P](#), [G06F1/035](#) take precedence)]

- G06F1/03W2 [N: in which the phase increment is adjustable, e.g. by using an adder-accumulator]
- G06F1/03W2C [N: the phase increment itself being a composed function of two or more variables, e.g. frequency and phase]
- G06F1/03W4 [N: for generating simultaneously two or more related waveforms, e.g. with different phase angles only]
- G06F1/035 . . . Reduction of table size [N: ([G06F1/03P](#) takes precedence)]
- G06F1/035B [N: by using symmetrical properties of the function, e.g. using most significant bits for quadrant control]
- G06F1/035D [N: by using two or more smaller tables, e.g. addressed by parts of the argument]

- G06F1/04 . Generating or distributing clock signals or signals derived directly therefrom
- G06F1/06 . . Clock generators producing several clock signals [N: ([G06F1/08](#) to [G06F1/14](#) take precedence)] [C9811]
- G06F1/08 . . Clock generators with changeable or programmable clock frequency [C9811]
- G06F1/10 . . Distribution of clock signals [N: e.g. skew] [C9811]
- G06F1/10L [N: in which the distribution is at least partially optical] [N9811]
- G06F1/12 . . Synchronisation of different clock signals [N: provided by a plurality of clock generators] [C9811]
- G06F1/14 . . Time supervision arrangements, e.g. real time clock

- G06F1/16 . Constructional details or arrangements ([instrument details G12B](#))
- G06F1/16D . . [N: Constructional details related to the housing of computer displays, e.g. of CRT monitors, of flat displays ([constructional details related to flat displays integrated in a portable computer, e.g. laptop, handheld computer G06F1/16P9D](#); [constructional details related to television receivers H04N5/64](#))] [N9910] [C1012]
- G06F1/16D2 [N: Arrangements to protect the display from incident light, e.g. hoods] [N9910]
- G06F1/16D4 [N: Multimedia displays, e.g. with integrated or attached speakers, cameras, microphones] [N9910]
- G06F1/16D6 [N: Arrangements to support accessories mechanically attached to the display housing ([G06F1/16D2](#), [G06F1/16D4](#) take precedence)] [N9910]
- G06F1/16D6D [N: to support filters or lenses] [N9910]
- G06F1/16D6F [N: to support document holders] [N9910]
- G06F1/16P . . [N: for portable computers ([cooling arrangements therefor G06F1/20P](#); [constructional details or arrangements for pocket calculators, electronic agendas or books G06F15/02C](#); [constructional details of portable telephone sets: with several bodies H04M1/02A](#))] [C1107]
- G06F1/16P1 [N: with several enclosures having relative motions, each enclosure supporting at least one I/O or computing function ([constructional details of portable telephones comprising a plurality of mechanically joined movable body parts H04M1/02A2](#))] [N1012]
- G06F1/16P1F [N: with folding flat displays, e.g. laptop computers or notebooks having a clamshell configuration, with body parts pivoting to an open position around an axis parallel to the plane they define in closed position] [N1012]
- G06F1/16P1F2 [N: the display being foldable up to the back of the other housing with a single degree of freedom, e.g. by 360° rotation over the axis defined by the rear edge of the base enclosure] [1012]
- G06F1/16P1F4 [N: changing, e.g. reversing, the face orientation of the screen with a two degrees of freedom mechanism, e.g. for folding into tablet PC like

				position or orienting towards the direction opposite to the user to show to a second user] [N1012]
G06F1/16P1R	.	.	.	[N: with enclosures rotating around an axis perpendicular to the plane they define or with ball-joint coupling, e.g. PDA with display enclosure orientation changeable between portrait and landscape by rotation with respect to a coplanar body enclosure] [N1012]
G06F1/16P1S	.	.	.	[N: with sliding enclosures, e.g. sliding keyboard or display] [N1012]
G06F1/16P3	.	.	.	[N: with a single-body enclosure integrating a flat display, e.g. Personal Digital Assistants [PDAs]] [N9701] [C1107]
G06F1/16P4	.	.	.	[N: Carrying enclosures containing additional elements, e.g. case for a laptop and a printer]
G06F1/16P5	.	.	.	[N: Wearable computers, e.g. on a belt] [N9701]
G06F1/16P6	.	.	.	[N: External expansion units, e.g. docking stations] [N9610]
G06F1/16P9	.	.	.	[N: Constructional details or arrangements of portable computers not specific to the type of enclosures covered by groups G06F1/16P1 to G06F1/16P3] [N1012]
G06F1/16P9B	.	.	.	[N: Details related to the integration of battery packs and other power supplies such as fuel cells or integrated AC adapter (details of mounting batteries in general H01M2/10C2)] [N1012]
G06F1/16P9D	.	.	.	[N: Details related to the display arrangement, including those related to the mounting of the display in the housing (constructional details related to the housing of computer displays in general G06F1/16D)] [N1012]
G06F1/16P9D1	.	.	.	[N: the display being based on projection] [N1012]
G06F1/16P9D2	.	.	.	[N: the display being formed by a plurality of foldable display components (G06F1/16P9D5 takes precedence)] [N1012]
G06F1/16P9D3	.	.	.	[N: the display being associated to a digitizer, e.g. laptops that can be used as penpads (touchpads integrated in a laptop or similar computer G06F1/16P9P6 ; secondary touch screen G06F1/16P9P6T ; details related to the relative motion of the display enclosure with respect to the body enclosure; e.g. to move between laptop and tablet PC configuration G06F1/16P1)] [N1012]
G06F1/16P9D4	.	.	.	[N: the display being suitable to be used in combination with an external overhead projector] [N1012]
G06F1/16P9D5	.	.	.	[N: including at least an additional display (G06F1/16P9P6T takes precedence)] [N1012]
G06F1/16P9D5A	.	.	.	[N: the additional display being independently orientable, e.g. for presenting information to a second user] [N1012]
G06F1/16P9D5S	.	.	.	[N: the additional display being small, e.g. for presenting status information] [N1012]
G06F1/16P9D7	.	.	.	[N: the display being flexible, e.g. mimicking a sheet of paper, or rollable)] [N1012]
G06F1/16P9D8	.	.	.	[N: the display being detachable, e.g. for remote use] [N1012]
G06F1/16P9E	.	.	.	[N: Details related to functional adaptations of the enclosure, e.g. to provide protection against EMI, shock, water, or to host detachable peripherals like a mouse or removable expansions units like PCMCIA cards, or to provide access to internal components for maintenance or to removable storage supports like CDs or DVDs, or to mechanically mount accessories (mounting of accessories to a computer display G06F1/16D6 ; display hoods G06F1/16D2 ; cooling arrangements for portable computers G06F1/20P)] [N1012]
G06F1/16P9E1	.	.	.	[N: related to the mounting of internal components, e.g. disc drive or any other functional module] [N1012]

G06F1/16P9E2	[N: related to integrated arrangements for adjusting the position of the main body with respect to the supporting surface, e.g. legs for adjusting the tilt angle] [N1012]
G06F1/16P9K	[N: Details related to the integrated keyboard] [N1012]
G06F1/16P9K2	[N: Arrangements for ergonomically adjusting the disposition of keys of the integrated keyboard] [N1012]
G06F1/16P9K4	[N: Arrangements for reducing the size of the integrated keyboard for transport, e.g. foldable keyboards, keyboards with collapsible keys (G06F1/16P9K2 takes precedence)] [N1012]
G06F1/16P9K6	[N: Arrangements for adjusting the tilt angle of the integrated keyboard independently from the main body (adjusting the tilt angle integrally with the main body G06F1/16P9E2)] [N1012]
G06F1/16P9K8	[N: Detachable keyboards] [N1012]
G06F1/16P9K10	[N: Special purpose buttons or auxiliary keyboards, e.g. retractable mini keypads, keypads or buttons that remain accessible at closed laptop (G06F1/16P9K4 takes precedence)] [N1012]
G06F1/16P9K12	[N: Arrangements for projecting a virtual keyboard] [N1012]
G06F1/16P9M	[N: Miscellaneous details related to the relative movement between the different enclosures or enclosure parts which could be adopted independently from the movement typologies specified in G06F1/16P1 and subgroups] [N1012]
G06F1/16P9M2	[N: for detecting open or closed state or particular intermediate positions assumed by movable parts of the enclosure, e.g. detection of display lid position with respect to main body in a laptop, detection of opening of the cover of battery compartment] [N1012]
G06F1/16P9M4	[N: for locking or maintaining the movable parts of the enclosure in a fixed position, e.g. latching mechanism at the edge of the display in a laptop or for the screen protective cover of a PDA (G06F1/16P9M6 takes precedence)] [N1012]
G06F1/16P9M6	[N: Details related solely to hinges (hinge details related to the transmission of signals or power are classified in G06F1/16P9M8)] [N1012]
G06F1/16P9M8	[N: for the transmission of signal or power between the different housings, e.g. details of wired or wireless communication, passage of cabling] [N1012]
G06F1/16P9P	[N: Constructional details or arrangements related to integrated I/O peripherals not covered by groups G06F1/16P9B to G06F1/16P9M] [N1012]
G06F1/16P9P2	[N: the I/O peripheral being an integrated camera] [N1012]
G06F1/16P9P4	[N: the I/O peripheral being integrated loudspeakers] [N1012]
G06F1/16P9P6	[N: the I/O peripheral being an integrated pointing device, e.g. trackball in the palm rest area, mini-joystick integrated between keyboard keys, touch pads or touch stripes (G06F1/16P9D3 takes precedence; constructional details of pointing devices G06F3/033 ; joysticks in general G05G9/047)] [N1012]
G06F1/16P9P6T	[N: the I/O peripheral being a secondary touch screen used as control interface, e.g. virtual buttons or sliders] [N1012]
G06F1/16P9P7	[N: the I/O peripheral being a single or a set of motion sensors for pointer control or gesture input obtained by sensing movements of the portable computer] [N1012]
G06F1/16P9P8	[N: the I/O peripheral being a printing or scanning device] [N1012]
G06F1/16P9P9	[N: the I/O peripheral being a sending/receiving arrangement to establish a cordless communication link, e.g. radio or infrared link, integrated

- cellular phone (details of antennas disposed inside a computer
H01Q1/22G2)] [N1012]
- G06F1/18 . . Packaging or power distribution [N: (for electrical apparatus in general H05K, H02J)]
- G06F1/18E . . . [N: Enclosures (for electric apparatus in general H05K5/00; for portable computers G06F1/16P)]
- G06F1/18E2 [N: with special features, e.g. for use in industrial environments; grounding or shielding against radio frequency interference (RFI) or electromagnetical interference (EMI) (in general H05K9/00)]
- G06F1/18S [N: Internal mounting support structures, e.g. for printed circuit boards (in general H05K7/14F), internal connecting means (for buses G06F13/40E4)]
- G06F1/18S2 [N: Mounting of motherboards (in general H05K7/14F7C)] [N0702]
- G06F1/18S4 [N: Mounting of expansion boards (in general H05K7/14D)] [N0702]
- G06F1/18S5 [N: Securing of expansion boards in correspondence to slots provided at the computer enclosure (in general H05K7/14B2)] [N0702]
- G06F1/18S6 [N: Mounting of fixed and removable disk drives (constructional details of disk drives housings in general G11B33/00)] [N0702]
- G06F1/18S8 [N: Mounting of power supply units (power supply for computers, per se G06F1/26)] [N0702]
- G06F1/18V . . . [N: Power distribution]
- G06F1/20 . . Cooling means
- G06F1/20P . . . [N: for portable computers, e.g. for laptops] [N0108]
- G06F1/20T . . . [N: comprising thermal management] [N9812]
- G06F1/22 . Means for limiting or controlling the pin/gate ratio
- G06F1/24 . Resetting means (micro-programme loading G06F9/24; restoration from data faults G06F11/00)
- G06F1/26 . Power supply means, e.g. regulation thereof (for memories G11C; [N: regulation in general G05F])
- G06F1/26B . . [N: Arrangements for using multiple switchable power supplies, e.g. battery and AC (G06F1/30 takes precedence)] [N9812]
- G06F1/26P . . [N: Arrangements to supply power to external peripherals either directly from the computer or under computer control, e.g. supply of power through the communication port, computer controlled power-strips] [N0006]
- G06F1/28 . . Supervision thereof, e.g. detecting power-supply failure by out of limits supervision
- G06F1/30 . . Means for acting in the event of power-supply failure or interruption, e.g. power-supply fluctuations (for resetting only G06F1/24; involving the processing of data-words G06F11/00)
- G06F1/30F . . . [N: in the event of power-supply fluctuations] [N9812]
- [N: **WARNING**
Not complete, see also G06F1/30
]
- G06F1/32 . . Means for saving power
- G06F1/32P . . . [N: Power Management, i.e. event-based initiation of power-saving mode] [N9812]
- G06F1/32P1 [N: Monitoring a parameter, a device or an event triggering a change in power modality] [N1204]

G06F1/32P1A	[N: Monitoring remote activity, e.g. over telephone line, network connection] [N1204]
G06F1/32P1B	[N: Monitoring battery level, i.e. power saving action initiated when battery voltage goes below a certain level] [N1204]
G06F1/32P1C	[N: Monitoring of peripheral devices] [N1204]
G06F1/32P1C2	[N: of display devices] [N1204]
G06F1/32P1C4	[N: of disk drive devices] [N1204]
G06F1/32P1C6	[N: of memory devices] [N1204]
G06F1/32P1D	[N: Monitoring task completion, e.g. by use of idle timer, STOP command, WAIT command] [N1204]
G06F1/32P1U	[N: Monitoring user presence or absence] [N1204]
G06F1/32P5	[N: Action, measure or step performed to reduce power consumption] [N1204]
G06F1/32P5C	[N: Power saving by disabling clock generation or distribution] [N1204]
G06F1/32P5F	[N: Power saving by lowering clock frequency] [N1204]
G06F1/32P5M	[N: Power saving in micro controller unit] [N1204]
G06F1/32P5N	[N: Power saving by software initiated power-off] [N1204]
G06F1/32P5P	[N: Power saving in peripheral device] [N1204]
G06F1/32P5P1	[N: Power saving in bus] [N1204]
G06F1/32P5P2	[N: Power saving in optical drive] [N1204]
G06F1/32P5P3	[N: Power saving in cursor control device, e.g. mouse, joystick, trackball] [N1204]
G06F1/32P5P4	[N: Power saving in digitizer or tablet] [N1204]
G06F1/32P5P5	[N: Power saving in display device] [N1204]
G06F1/32P5P6	[N: Power saving in hard disk drive] [N1204]
G06F1/32P5P7	[N: Power saving in keyboard] [N1204]
G06F1/32P5P8	[N: Power saving in memory, e.g. RAM, cache] [N1204]
G06F1/32P5P9	[N: Power saving in modem or I/O interface] [N1204]
G06F1/32P5P10	[N: Power saving in PCMCIA card] [N1204]
G06F1/32P5P11	[N: Power saving in printer] [N1204]
G06F1/32P5S	[N: Power saving by switching off individual functional units in a computer system, i.e. selective power distribution] [N1204]
G06F1/32P5T	[N: Power saving by task scheduling] [N1204]
G06F1/32P5U	[N: Power saving by switching to a less power consuming processor, e.g. sub-CPU] [N1204]
G06F1/32P5V	[N: Power saving by lowering supply or operating voltage] [N1204]

G06F3/00

Input arrangements for transferring data to be processed into a form capable of being handled by the computer; Output arrangements for transferring data from processing unit to output unit, e.g. interface arrangements ([typewriters B41J](#); [conversion of physical variables F15B5/00, G01](#); [image acquisition G06T1/00, G06F9/00](#); [coding, decoding or code conversion in general H03M](#) ; [transmission of digital information H04L](#); [N: in [regulating or control systems G05B](#)])

G06F3/00B

- [N: Specific input/output arrangements not covered by [G06F3/02](#) to [G06F3/16](#), e.g. facsimile, microfilm ([facsimile per se H04N1/00](#); [viewers photographic printing G03B](#); [electrography, magnetography G03G](#); other optical apparatus [G02B27/00](#))

- G06F3/00B6 . . [N: Input arrangements through a video camera]
- G06F3/00S . [N: Digital input from or digital output to memories of the shift register type, e.g. magnetic bubble memories, C-C-D memories (magnetic bubble memories per se [G11C19/08](#), CCD memories per se [G11C19/28](#))]
- G06F3/01 . Input arrangements or combined input and output arrangements for interaction between user and computer (G06F3/16 takes precedence) [N0611]
- G06F3/01B . . [N: Arrangements for interaction with the human body, e.g. for user immersion in virtual reality (for handicapped people in general [A61F4/00](#); robot control [B25J](#); tactile signalling [G08B](#); blind teaching [G09B21/00](#); for electrophonic musical instruments [G10H1/34C](#); electronic switches characterised by the way in which the control signals are generated [H03K17/94](#))] [N0611]
- G06F3/01B2 . . . [N: Head tracking input arrangements] [N0611]
- G06F3/01B4 . . . [N: Eye tracking input arrangements (G06F3/01B8 takes precedence)] [N0611]
- G06F3/01B6 . . . [N: Hand-worn input/output arrangements, e.g. data gloves] [N0611]
- G06F3/01B8 . . . [N: Input arrangements based on nervous system activity detection, e.g. brain waves (EEG) detection, electromyograms (EMG) detection, electrodermal response detection] [N0611]
- G06F3/01F . . [N: Input arrangements with force or tactile feedback as computer generated output to the user] [N0611]
- G06F3/01G . . [N: Gesture based interaction, e.g. based on a set of recognized hand gestures (interaction based on gestures traced on a digitiser [G06F3/048A3G](#))] [N0611] [C0703]
- G06F3/01M . . [N: Input/output arrangements for oriental characters] [N0611]
- G06F3/02 . . Input arrangements using manually operated switches, e.g. using keyboards or dials (keyboard switches per se [H01H13/70](#); electronic switches characterised by the way in which the control signals are generated [H03K17/94](#)) [C0611]
- G06F3/02A . . . [N: Constructional details or processes of manufacture of the input device] [C0611]
- G06F3/02A1 [N: Lever arrangements for operating keyboard cursor control keys in a joystick-like manner] [N9809]
- G06F3/02A2 [N: Arrangements for adjusting the tilt angle of a keyboard, e.g. pivoting legs (for keyboards integrated in a laptop computer [G06F1/16P9K6](#))] [N9809] [C1107]
- G06F3/02A3 [N: Arrangements integrating additional peripherals in a keyboard, e.g. card or barcode reader, optical scanner] [N9809]
- G06F3/02A3P [N: Arrangements providing an integrated pointing device in a keyboard, e.g. trackball, mini-joystick (for pointing devices integrated in a laptop computer [G06F1/16P9P6](#); joysticks [G05G9/047](#); constructional details of pointing devices [G06F3/033](#))] [N9809] [C1107]
- G06F3/02A4 [N: Arrangements for ergonomically adjusting the disposition of keys of a keyboard (for keyboards integrated in a laptop computer [G06F1/16P9K2](#))] [N9809] [C1107]
- G06F3/02A5 [N: Special purpose keyboards] [N9809]
- G06F3/02A6 [N: Arrangements for reducing keyboard size for transport or storage, e.g. foldable keyboards, keyboards with collapsible keys ([G06F3/02A4](#) takes precedence; for keyboards integrated in a laptop computer [G06F1/16P9K4](#))] [N9809] [C1107]
- G06F3/02A9 [N: Key guide holders] [N9909]
- G06F3/02H . . . [N: Cooperation and interconnection of the input arrangement with other

- functional units of a computer (G06F3/023 to G06F3/037 take precedence)]
- G06F3/023 . . . Arrangements for converting discrete items of information into a coded form, e.g. arrangements for interpreting keyboard generated codes as alphanumeric codes, operand codes or instruction codes (coding in connection with keyboards or like devices in general H03M11/00)] [C0701]
- G06F3/023C [N: Cordless keyboards] [N0003]
- G06F3/023K [N: Manual direct entries, e.g. key to main memory]
- G06F3/023M [N: Character input methods] [N9804]
- G06F3/023M2 [N: using switches operable in different directions] [N9804]
- G06F3/023M4 [N: using chord techniques (G06F3/023M2 takes precedence)] [N9804]
- G06F3/023M6 [N: using selection techniques to select from displayed items] [N9804]
- G06F3/023M8 [N: using prediction or retrieval techniques] [N9804]
- G06F3/023P [N: Programmable keyboards (key guide holders G06F3/02A9)] [C9909]
- G06F3/027 for insertion of decimal point [N: (display of decimal point [G06F3/14A](#); complete desk- top or hand- held calculators [G06F15/02](#))]
- G06F3/03 . . Arrangements for converting the position or the displacement of a member into a coded form [C0701]
- G06F3/03H . . . [N: Detection arrangements using opto-electronic means (constructional details of pointing devices not related to the detection arrangement using opto-electronic means [G06F3/033](#) and subgroups; optical digitisers [G06F3/042](#))] [N0701]
- [N: **WARNING**
Groups [G06F3/03H](#) and [G06F3/03H3](#) are not complete, pending a reorganisation. See also [G06F3/042](#) and subgroups
]
- G06F3/03H1 [N: comprising a plurality of distinctive and separately oriented light emitters or reflectors associated to the pointing device, e.g. remote cursor controller with distinct and separately oriented LEDs at the tip whose radiations are captured by a photo-detector associated to the screen] [N1205]
- G06F3/03H2 [N: for tracking the rotation of a spherical or circular member, e.g. optical rotary encoders used in mice or trackballs using a tracking ball or in mouse scroll wheels (tracking relative movement in co-operation with a regularly or irregularly patterned surface, e.g. as in optical mice G06F3/03H3; constructional details of scroll or thumb-wheels G06F3/033L; optical rotary encoders G01D5/347C; thumb wheel switches H01H19/00B)] [N1205]
- G06F3/03H3 [N: in co-operation with a patterned surface, e.g. absolute position or relative movement detection for an optical mouse or pen positioned with respect to a coded surface] [N0701]
- G06F3/03H3A [N: by optically sensing the absolute position with respect to a regularly patterned surface forming a passive digitiser, e.g. pen optically detecting position indicative tags printed on a paper sheet (constructional details of pen-shaped pointing devices G06F3/033P2, G06F3/033P3, G06F3/037)] [N1205]
- G06F3/03H6 [N: using a plurality of light emitters or reflectors or a plurality of detectors forming a reference frame from which to derive the orientation of the object, e.g. by triangulation or on the basis of reference deformation in the picked up image] [N1205]
- G06F3/033 . . . Pointing devices displaced or positioned by the user, e.g. mice, trackballs, pens or joysticks; Accessories therefor [N: (constructional details of joysticks G05G9/047; arrangement for interfacing a joystick to a computer G06F3/038)] [C0701]

G06F3/033B	[N: Foot operated pointing devices] [C0701]
G06F3/0338	with detection of limited linear or angular displacement of an operating part of the device from a neutral position, e.g. isotonic or isometric joysticks [N1208]
G06F3/0346	with detection of the device orientation or free movement in a 3D space, e.g. 3D mice, 6-DOF [six degrees of freedom] pointers using gyroscopes, accelerometers or tilt-sensors [N1208]
G06F3/0354	with detection of 2D relative movements between the device, or an operating part thereof, and a plane or surface, e.g. 2D mice, trackballs, pens or pucks [N1208]
G06F3/0354C	[N: Mouse/trackball convertible devices, in which the same ball is used to track the 2D relative movement] [N1208]
G06F3/0354L	[N: Light pens for emitting or receiving light] [N1208]
G06F3/0354M	[N: Mice or pucks (G06F3/0354C takes precedence)] [N1208]
G06F3/0354M2	[N: having dual sensing arrangement, e.g. two balls or two coils used to track rotation of the pointing device] [N1208]
G06F3/0354N	[N: Pens or stylus] [N1208]
G06F3/0354N2	[N: using a rotatable ball at the tip as position detecting member] [N1208]
G06F3/0354P	[N: Touch pads, in which fingers can move on a surface] [N1208]
G06F3/0354S	[N: Sliders, in which the moving part moves in a plane] [N1208]
G06F3/0354T	[N: Trackballs (G06F3/0354C takes precedence)] [N1208]
G06F3/0362	with detection of 1D translations or rotations of an operating part of the device, e.g. scroll wheels, sliders, knobs, rollers or belts [N1208]
G06F3/037	using the raster scan of a cathode-ray tube (CRT) for detecting the position of the member, e.g. light pens cooperating with CRT monitors [C0701]
G06F3/038	Control and interface arrangements therefor, e.g. drivers or device-embedded control circuitry [N0701]
G06F3/038E	[N: Signal control means within the pointing device] [N0701]
G06F3/038L	[N: for light pen] [N0701]
G06F3/039	Accessories therefor, e.g. mouse pads (furniture aspects A47B21/00) [N0701]
G06F3/039M	[N: Mouse pads] [N0701]
G06F3/041	Digitisers, e.g. for touch screens or touch pads, characterized by the transducing means [N0701]
G06F3/041D	[N: Integrated displays and digitisers] [N0701]
G06F3/041F	[N: using force sensing means]
G06F3/041T	[N: Control and interface arrangements for touch screen][N: WARNING: Not complete, see G06F3/048A3] [N0701]
G06F3/041T2	[N: for error correction or compensation, e.g. parallax, calibration, alignment] [N0701]
G06F3/042	by opto-electronic means [N: (pens detecting optically their absolute position with respect to a coded surface G06F3/03H3)] [N0701]
G06F3/042B	[N: by interrupting or reflecting a light beam, e.g. optical touch-screen] [N0701]
G06F3/042B4	[N: using sweeping light beams, e.g. using rotating or vibrating mirror] [N0701]
G06F3/042C	[N: using a single imaging device like a video camera for tracking the

					absolute position of a single or a plurality of objects with respect to an imaged reference surface, e.g. video camera imaging a display or a projection screen, a table or a wall surface, on which a computer generated image is displayed or projected (tracking a projected light spot to determine a position on a display surface G06F3/038L)] [N1205]
G06F3/042C1	[N: tracking fingers with respect to a virtual keyboard projected or printed on the surface (virtual keyboards on touch screens G06F3/048A3T)] [N1205]
G06F3/042P	[N: by sensing at the edges of the touch surface the interruption of optical paths, e.g. an illumination plane, parallel to the touch surface which may be virtual (sensing beam interruptions in a planar beam grid of an optical touch-screen G06F3/042B)] [N1205]
G06F3/043	using propagating acoustic waves [N0701]
G06F3/043G	[N: in which the acoustic waves are either generated by a movable member and propagated within a surface layer or propagated within a surface layer and captured by a movable member] [N0701]
G06F3/043R	[N: in which generating transducers and detecting transducers are attached to a single acoustic waves transmission substrate] [N0701]
G06F3/044	by capacitive means [N0701]
G06F3/045	using resistive elements, e.g. single continuous surface or two parallel surfaces put in contact [N0701]
G06F3/046	by electromagnetic means [N0701]
G06F3/047	using sets of wires, e.g. crossed wires [N0701]
G06F3/048	Interaction techniques based on graphical user interfaces [GUI] [N1208]

Notes

					[N1208]
G06F3/0481	based on specific properties of the displayed interaction object or a metaphor-based environment, e.g. interaction with desktop elements like windows or icons, or assisted by a cursor's changing behaviour or appearance [N1208]
G06F3/0481C	[N: interaction techniques based on cursor appearance or behaviour being affected by the presence of displayed objects, e.g. visual feedback during interaction with elements of a graphical user interface through change in cursor appearance, constraint movement or attraction/repulsion with respect to a displayed object (interaction techniques based on cursor behaviour involving tactile or force feedback G06F3/01F)] [N1208]
G06F3/0481E	[N: Interaction with three-dimensional environments, e.g. control of viewpoint to navigate in the environment] [N1208]
G06F3/0481H	[N: using icons (graphical programming languages using iconic symbols G06F8/34)] [N1208]
G06F3/0482	interaction with lists of selectable items, e.g. menus [N1208]
G06F3/0483	interaction with page-structured environments, e.g. book metaphor [N1208]
G06F3/0484	for the control of specific functions or operations, e.g. selecting or manipulating an object or an image, setting a parameter value or selecting a range [N1208]
G06F3/0484A	[N: Selection of a displayed object (G06F3/0482 takes precedence)] [N1208]
G06F3/0484M	[N: for image manipulation, e.g. dragging, rotation] [N1208]
G06F3/0484P	[N: Interaction techniques to control parameter settings, e.g. interaction with sliders, dials] [N1208]
G06F3/0485	Scrolling or panning [N1208]

G06F3/0485B [N: Interaction with scrollbars] [N1208]
G06F3/0486 Drag-and-drop [N1208]
G06F3/0487 using specific features provided by the input device, e.g. functions controlled by the rotation of a mouse with dual sensing arrangements, or of the nature of the input device, e.g. tap gestures based on pressure sensed by a digitiser [N1208]
G06F3/0488 using a touch-screen or digitiser, e.g. input of commands through traced gestures [N1208]
G06F3/0488G [N: for entering handwritten data, e.g. gestures, text] [N1208]
G06F3/0488T [N: by partitioning the screen or tablet into independently controllable areas, e.g. virtual keyboards, menus (G06F3/0488G takes precedence)] [N1208]
G06F3/0489 using dedicated keyboard keys or combinations thereof [N1208]
G06F3/0489C [N: Arrangements for controlling cursor position based on codes indicative of cursor displacements from one discrete location to another, e.g. using cursor control keys associated to different directions or using the tab key (arrangements for controlling cursor position based on coordinate signals G06F3/038)] [N1208]
G06F3/0489G [N: Guidance during keyboard input operation, e.g. prompting (help systems G06F9/44W2)] [N1208]
G06F3/0489S [N: Special input arrangements or commands for improving display capability] [N1208]
G06F3/05 Digital input using the sampling of an analogue quantity at regular intervals of time, [N: input from a/d converter or output to d/a converter] (analogue- digital conversion per se H03M1/00; sampling per se H03K17/00; sample- and- hold arrangements per se G11C27/02)
G06F3/06 Digital input from or digital output to record carriers, [N: e.g. RAID, emulated record carriers, networked record carriers (recording or reproducing devices per se G11B; error detection, error correction, monitoring per se regarding storage systems G06F11; accessing or addressing within memory systems or architectures G06F12; information retrieval G06F17/30)] [C1201]
G06F3/06A [N: Dedicated interfaces to storage systems] [N1201]
G06F3/06A2 [N: specifically adapted to achieve a particular effect] [N1201]
G06F3/06A2A [N: Improving or facilitating administration, e.g. storage management] [N1201]
G06F3/06A2A2 [N: by facilitating the interaction with a user or administrator] [N1201]
G06F3/06A2A4 [N: by facilitating the process of upgrading existing storage systems] [N1201]
G06F3/06A2C [N: Saving storage space on storage systems] [N1201]
G06F3/06A2P [N: Improving I/O performance] [N1201]
G06F3/06A2P2 [N: in relation to response time] [N1201]
G06F3/06A2P4 [N: in relation to throughput] [N1201]
G06F3/06A2R [N: Improving the reliability of storage systems] [N1201]
G06F3/06A2R2 [N: in relation to life time, e.g. increasing Mean Time Between Failures (MTBF)] [N1201]
G06F3/06A2R4 [N: in relation to availability] [N1201]
G06F3/06A2R6 [N: in relation to data integrity, e.g. data losses, bit errors] [N1201]
G06F3/06A2S [N: Securing storage systems] [N1201]

G06F3/06A2S2	[N: in relation to access] [N1201]
G06F3/06A2S4	[N: in relation to content] [N1201]
G06F3/06A2W	[N: Power saving in storage systems] [N1201]
G06F3/06A2Z	[N: Reducing size or complexity of storage systems] [N1201]
G06F3/06A4	[N: making use of a particular technique] [N1201]
G06F3/06A4C	[N: Configuration or reconfiguration of storage systems] [N1201]
G06F3/06A4C1	[N: by allocating resources to storage systems] [N1201]
G06F3/06A4C2	[N: by initialisation or re-initialisation of storage systems] [N1201]
G06F3/06A4C4	[N: by changing the state or mode of one or more devices] [N1201]
G06F3/06A4C6	[N: by changing the path, e.g. traffic rerouting, path reconfiguration] [N1201]
G06F3/06A4C8	[N: Permissions] [N1201]
G06F3/06A4F	[N: Organizing or formatting or addressing of data] [N1201]
G06F3/06A4F2	[N: Management of blocks] [N1201]
G06F3/06A4F2D	[N: De-duplication techniques] [N1201]
G06F3/06A4F4	[N: Management of files] [N1201]
G06F3/06A4F6	[N: Management of space entities, e.g. partitions, extents, pools] [N1201]
G06F3/06A4H	[N: Horizontal data movement in storage systems, i.e. moving data in between storage devices or systems] [N1201]
G06F3/06A4H2	[N: Migration mechanisms] [N1201]
G06F3/06A4H2L	[N: Lifecycle management] [N1201]
G06F3/06A4H4	[N: Replication mechanisms] [N1201]
G06F3/06A4H6	[N: Erasing, e.g. deleting, data cleaning, moving of data to a wastebasket] [N1201]
G06F3/06A4M	[N: Monitoring storage devices or systems] [N1201]
G06F3/06A4T	[N: Vertical data movement, i.e. input-output transfer; data movement between one or more hosts and one or more storage devices] [N1201]
G06F3/06A4T2	[N: Data buffering arrangements] [N1201]
G06F3/06A4T4	[N: Controller construction arrangements] [N1201]
G06F3/06A4T6	[N: Command handling arrangements, e.g. command buffers, queues, command scheduling] [N1201]
G06F3/06A4T8	[N: Format or protocol conversion arrangements] [N1201]
G06F3/06A4V	[N: Virtualisation aspects] [N1201]
G06F3/06A4V2	[N: at device level, e.g. emulation of a storage device or system] [N1201]
G06F3/06A4V4	[N: at area level, e.g. provisioning of virtual or logical volumes] [N1201]
G06F3/06A4V6	[N: at data level, e.g. file, record or object virtualisation] [N1201]
G06F3/06A6	[N: adopting a particular infrastructure] [N1201]
G06F3/06A6D	[N: Distributed or networked storage systems, e.g. storage area networks [SAN], network attached storage [NAS]] [N1201]
G06F3/06A6L	[N: In-line storage system] [N1201]
G06F3/06A6L2	[N: Single storage device] [N1201]
G06F3/06A6L2D	[N: Disk device] [N1201]
G06F3/06A6L2D2	{7 dots} [N: Magnetic disk device] [N1201]
G06F3/06A6L2D4	{7 dots} [N: Optical disk device, e.g. CD-ROM, DVD] [N1201]

G06F3/06A6L2F	[N: Non-volatile semiconductor memory device, e.g. flash memory, one time programmable memory [OTP]] [N1201]
G06F3/06A6L2H	[N: Hybrid storage device] [N1201]
G06F3/06A6L2T	[N: Tape device] [N1201]
G06F3/06A6L4	[N: Plurality of storage devices] [N1201]
G06F3/06A6L4H	[N: Hybrid storage combining heterogeneous device types, e.g. hierarchical storage, hybrid arrays] [N1201]
G06F3/06A6L4L	[N: Libraries, e.g. tape libraries, jukebox] [N1201]
G06F3/06A6L4N	[N: Non-volatile semiconductor memory arrays] [N1201]
G06F3/06A6L4R	[N: Disk arrays, e.g. RAID, JBOD] [N1201]
G06F3/08	. .	from or to individual record carriers, e.g. punched card, [N: memory card, integrated circuit (IC) card, smart card (record carriers for use with machines and with at least a part designed to carry digital markings G06K19/00 ; coded identity card or credit card with a coded signal G07F7/10)] [C1201]
G06F3/09	. .	Digital output to typewriters
G06F3/12	. .	Digital output to print unit, [N: e.g. line printer, chain printer] (digital output to typewriter G06F3/09 ; printing of alphanumeric characters G06K15/02)
G06F3/12A	. .	[N: Dedicated interfaces to print systems] [N1111]
G06F3/12A2	. . .	[N: specifically adapted to achieve a particular effect] [N1111]
G06F3/12A2A	[N: Improving or facilitating administration, e.g. print management] [N1111]
G06F3/12A2A10	[N: resulting in reduced user or operator actions, e.g. presetting, automatic actions, using hardware token storing data] [N1111]
G06F3/12A2A12	[N: resulting in increased flexibility in print job configuration, e.g. job settings, print requirements, job tickets] [N1111]
G06F3/12A2A14	[N: resulting in increased flexibility in input data format or job format or job type] [N1111]
G06F3/12A2A16	[N: resulting in the user being informed about print result after a job submission] [N1111]
G06F3/12A2A18	[N: resulting in improved quality of the output result, e.g. print layout, colours, workflows, print preview] [N1111]
G06F3/12A2A20	[N: resulting in adapted or bridged legacy communication protocols, e.g. emulation, protocol extension] [N1111]
G06F3/12A2E	[N: Facilitating exception or error detection and recovery, e.g. fault, media or consumables depleted] [N1111]
G06F3/12A2P	[N: Improving printing performance] [N1111]
G06F3/12A2P2	[N: achieving reduced delay between job submission and print start] [N1111]
G06F3/12A2P2F	[N: at an intermediate node or at the final node] [N1111]
G06F3/12A2P2S	[N: at the submitting node] [N1111]
G06F3/12A2P4	[N: achieving increased printing speed, i.e. reducing the time between printing start and printing end] [N1111]
G06F3/12A2P6	[N: achieving reduced idle time at the output device or increased asset utilization] [N1111]
G06F3/12A2R	[N: Reducing or saving of used resources, e.g. avoiding waste of consumables or improving usage of hardware resources] [N1111]
G06F3/12A2R2	[N: with regard to consumables, e.g. ink, toner, paper] [N1111]

G06F3/12A2R4	[N: with regard to computing resources, e.g. memory, CPU] [N1111]
G06F3/12A2R6	[N: with regard to power consumption] [N1111]
G06F3/12A2S	[N: Increasing security of the print job] [N1111]
G06F3/12A4	[N: specifically adapted to use a particular technique] [N1111]
G06F3/12A4C	[N: Client or server resources management] [N1111]
G06F3/12A4C2	[N: Software update, e.g. print driver, modules, plug-ins, fonts] [N1111]
G06F3/12A4C4	[N: Discovery of devices having required properties] [N1111]
G06F3/12A4C6	[N: Printer definition files] [N1111]
G06F3/12A4C8	[N: Printing driverless or using generic drivers] [N1111]
G06F3/12A4D	[N: Printer resources management or printer maintenance, e.g. device status, power levels] [N1111]
G06F3/12A4D2	[N: Software or firmware update, e.g. device firmware management] [N1111]
G06F3/12A4D4	[N: Device related settings, e.g. IP address, Name, Identification] [N1111]
G06F3/12A4D6	[N: Transmitting printer device capabilities, e.g. upon request or periodically] [N1111]
G06F3/12A4D8	[N: Errors handling and recovery, e.g. reprinting (G06F3/12A4M28A takes precedence)] [N1111]
G06F3/12A4D8C	[N: caused by end of consumables, e.g. paper, ink, toner] [N1111]
G06F3/12A4F	[N: Connection management] [N1111]
G06F3/12A4M	[N: Print job management] [N1111]
G06F3/12A4M10	[N: Secure printing, e.g. user identification, user rights for device usage, unallowed content, blanking portions or fields of a page, releasing held jobs] [N1111]
G06F3/12A4M12	[N: Restricting the usage of resources, e.g. usage or user levels, credit limit, consumables, special fonts] [N1111]
G06F3/12A4M14	[N: Parallel printing or parallel ripping] [N1111]
G06F3/12A4M16	[N: Dividing a job according to job requirements, e.g. black/white and colour pages, covers and body of books, tabs] [N1111]
G06F3/12A4M18	[N: Image or content composition onto a page] [N1111] [C1207]
G06F3/12A4M18V	[N: Variable data printing, e.g. document forms, templates, labels, coupons, advertisements, logos, watermarks, transactional printing, fixed content versioning] [N1204]
G06F3/12A4M20	[N: Job translation or job parsing, e.g. page banding] [N1111]
G06F3/12A4M20C	[N: by conversion to intermediate or common format] [N1111]
G06F3/12A4M20H	[N: by handling markup languages, e.g. XSL, XML, HTML] [N1111]
G06F3/12A4M20P	[N: by conversion to printer ready format] [N1111]
G06F3/12A4M20R	[N: by printer language recognition, e.g. PDL, PCL, PDF] [N1111]
G06F3/12A4M22	[N: Page layout or assigning input pages onto output media, e.g. imposition] [N1111]
G06F3/12A4M22M	[N: for continuous media, e.g. web media, rolls] [N1111]
G06F3/12A4M22S	[N: for sheet based media] [N1111]
G06F3/12A4M24	[N: Configuration of print job parameters, e.g. using UI at the client] [N1111]
G06F3/12A4M24A	[N: Automatic configuration, e.g. by driver] [N1111]
G06F3/12A4M24C	[N: Settings incompatibility, e.g. constraints, user requirements vs.

					device capabilities] [N1111]
G06F3/12A4M24F	[N: User feedback, e.g. print preview, test print, proofing, pre-flight checks] [N1111]
G06F3/12A4M24S	[N: by using pre-stored settings, e.g. job templates, presets, print styles] [N1111]
G06F3/12A4M24U	[N: by updating job settings at the printer] [N1111]

G06F7/533C2	{7 dots} [N: overlapped, i.e. with successive bitgroups sharing one or more bits being recoded into signed digit representation, e.g. using the Modified Booth Algorithm] [N0605]
G06F7/533C2A	{8 dots} [N: each bitgroup having two new bits, e.g. 2nd order MBA] [N0605]
G06F7/535	Dividing only [N0605]
G06F7/537	Reduction of the number of iteration steps or stages, e.g. using the Sweeny-Robertson-Tocher (SRT) algorithm [N: not used, see G06F7/535 or G06F7/537S] [N0605]
G06F7/537S	[N: Non restoring calculation, where each digit is either negative, zero or positive, e.g. SRT; WARNING: Not complete. Provisionally see G06F7/535 + S06F7:537S] [N0605]
G06F7/544	for evaluating functions by calculation ([N: G06F7/48S take precedence]; with a look-up table G06F1/02 ; [N: complex mathematical operations G06F17/10][C0203]
G06F7/544A	[N: Sum of products (for applications thereof, see the relevant places, e.g. G06F17/10 , H03H17/00)]
G06F7/544C	[N: using crossaddition algorithms, e.g. CORDIC]
G06F7/548	Trigonometric functions; Co-ordinate transformations
G06F7/552	Powers or roots, [N: e.g. Pythagorean sums] [C9801]
G06F7/552R	[N: Roots or inverse roots of single operands] [N9801]
G06F7/556	Logarithmic or exponential functions
G06F7/57	Arithmetic logic units (ALU), i.e. arrangements or devices for performing two or more of the operations covered by groups G06F7/483-G06F7/556 or for performing logical operations (instruction execution G06F9/30) [N: G06F7/49, G06F7/491 take precedence (logic gate circuits H03K19/00)] [N0605]
G06F7/575	Basic arithmetic logic units, i.e. devices selectable to perform either addition, subtraction or one of several logical operations, using, at least partially, the same circuitry [N0605]
G06F7/58	Random or pseudo-random number generators [N: (random pulse generators H03K3/84 ; secret telegraphic communication H04L9/00 ; lottery apparatus G07C15/00)]
G06F7/58P	[N: Pseudo-random number generators] [N0005]
G06F7/58P1	[N: using finite field arithmetic, e.g. using a linear feedback shift register] [N0005]
G06F7/58P3	[N: using an integer algorithm, e.g. using linear congruential method] [N0005]
G06F7/58R	[N: Random number generators, i.e. based on natural stochastic processes] [N0005]
G06F7/60	Methods or arrangements for performing computations using a digital non-denominational number representation, i.e. number representation without radix; Computing devices using combinations of denominational and non-denominational

quantity representations, [N: e.g. using difunction pulse trains, STEELE computers, phase computers (conversion of digital data to or from non-denominational form [H03M5/00](#), [H03M7/00](#))] [C0806]

[N: **WARNING** [N0806]

Not complete: for computing devices using combinations of denominational and non-denominational quantity representations see also [G06F7/62](#)]

- G06F7/60E . . [N: using delta-sigma sequences] [C0806]
- G06F7/60H . . [N: Additive or subtractive mixing of two pulse rates into one (beat-frequency oscillators [H03B21/00](#); input circuits of electric counters, e.g. up-down counters [H03K21/00](#))]
- G06F7/60P . . [N: number-of-ones counters, i.e. devices for counting the number of input lines set to ONE among a plurality of input lines, also called bit counters or parallel counters (for applications thereof, see the relevant places, e.g. [G06F7/49](#), [G06F7/501A](#), [G06F7/509](#), [H03M1/00](#), [H03M7/20](#))] [C0605]
- G06F7/62 . . Performing operations exclusively by counting total number of pulses; [N: Multiplication, division or derived operations using combined denominational and incremental processing by counters, i.e. without column shift ([G06F7/68](#) takes precedence)]
- G06F7/64 . . Digital differential analysers, i.e. computing devices for differentiation, integration or solving differential or integral equations, using pulses representing increments; Other incremental computing devices for solving difference equations ([G06F7/70](#) takes precedence; differential analysers using hybrid computing techniques [G06J1/02](#)) [N: DDA application in numerical control [G05B19/18](#)]
- G06F7/66 . . . wherein pulses represent unitary increments only
- G06F7/68 . . using pulse rate multipliers or dividers [N: pulse rate multipliers or dividers per se] ([G06F7/70](#) takes precedence) [N: (frequency division in electronic watches [G04G3/02](#); frequency multiplication or division in oscillators [H03B19/00](#); frequency dividing counters per se [H03K23/00](#) to [H03K29/00](#))]
- G06F7/70 . . using stochastic pulse trains, i.e. randomly occurring pulses the average pulse rates of which represent numbers [N: (conversion of analogue signals into stochastic pulse trains and vice-versa [H03M1/04](#))]
- G06F7/72 . . using residue arithmetic
- G06F7/72A . . . [N: Modular inversion, reciprocal or quotient calculation ([G06F7/72F](#), [G06F7/72H](#), [G06F7/72M](#) take precedence)] [N0302] [C0302]
- G06F7/72C . . . [N: Modular multiplication ([G06F7/72F](#), [G06F7/72H](#), [G06F7/72M](#) take precedence)] [N0302] [C0302]
- G06F7/72E . . . [N: Modular exponentiation ([G06F7/72F](#)), ([G06F7/72H](#)), ([G06F7/72M](#) take precedence)] [N0302] [C0302]
- G06F7/72F . . . [N: Finite field arithmetic (for error detection or correction in general [H03M13/00](#), in computers [G06F11/10](#))]
- G06F7/72F1 [N: over elliptic curves] [N9909]
- G06F7/72F3 [N: Inversion; Reciprocal calculation; Division of elements of a finite field] [N9909]
- G06F7/72H . . . [N: Modulo N arithmetic, with N being either $(2^{**}n)-1$, $2^{**}n$ or $(2^{**}n)+1$, e.g. mod 3, mod 4 or mod 5 ([G06F7/72M](#) takes precedence)] [N0302]
- G06F7/72M . . . [N: using Montgomery reduction] [N9611]
- G06F7/72N . . . [N: using representation by a residue number system]
- G06F7/74 . . Selecting or encoding within a word the position of one or more bits having a specified value, e.g. most or least significant one or zero detection, priority encoders [N: (with

shifting G06F5/01)] [N0605]

- G06F7/76
 - . Arrangements for rearranging, permuting or selecting data according to predetermined rules, independently of the content of the data (according to the content of the data G06F7/06, G06F7/22; parallel / series conversion or vice versa H03M9/00) [N0605]
- G06F7/76L
 - . . [N: having at least two separately controlled rearrangement levels, e.g. multistage interconnection networks (G06F7/76M to G06F7/76R take precedence)] [N0605]
- G06F7/76M
 - . . [N: Masking] [N0605]
- G06F7/76P
 - . . [N: Generation of all possible permutations] [N0605]
- G06F7/76R
 - . . [N: Data position reversal, e.g. bit reversal, byte swapping] [N0605]
- G06F7/78
 - . . for changing the order of data flow, e.g. matrix transposition, LIFO buffers; Overflow or underflow handling therefor [N0605]
- G06F7/78C
 - . . . [N: having a sequence of storage locations each being individually accessible for both enqueue and dequeue operations, e.g. using a RAM] [N0605]
- G06F8/00

[N: Arrangements for software engineering (execution of stored program [G06F9/06](#); testing or debugging [G06F11/36](#); hardware/software co-design [G06F17/50](#); software project management [G06Q10/00C](#))] [N1202]
- G06F8/10
 - . [N: Requirements analysis; Specification techniques] [N1202]
- G06F8/20
 - . [N: Software design] [N1202]
- G06F8/22
 - . . [N: Procedural] [N1202]
- G06F8/24
 - . . [N: Object oriented] [N1202]
- G06F8/30
 - . [N: Creation or generation of source code] [N1202]
- G06F8/31
 - . . [N: Programming languages or programming paradigms] [N1202]
- G06F8/311
 - . . . [N: Functional or applicative languages; Rewrite languages] [N1202]
- G06F8/312
 - . . . [N: List processing, e.g. LISP programming language] [N1202]
- G06F8/313
 - . . . [N: Logic programming, e.g. PROLOG programming language] [N1202]
- G06F8/3135
 - [N: Unification or backtracking] [N1202]
- G06F8/314
 - . . . [N: Parallel programming languages ([G06F8/313](#) takes precedence)] [N1202]
- G06F8/315
 - . . . [N: Object-oriented languages] [N1202]
- G06F8/316
 - . . . [N: Aspect-oriented programming techniques] [N1202]
- G06F8/33
 - . . [N: Intelligent editors (text processing [G06F17/21](#))] [N1202]
- G06F8/34
 - . . [N: Graphical or visual programming (use of icons for interaction with graphical user interfaces [G06F3/048](#))] [N1202]
- G06F8/35
 - . . [N: Model driven] [N1202]
- G06F8/355
 - . . . [N: Round-trip engineering] [N1204]
- G06F8/36
 - . . [N: Software reuse] [N1202]
- G06F8/37
 - . . [N: Compiler construction; Parser generation] [N1202]
- G06F8/38
 - . . [N: to implement user interfaces (interaction techniques for graphical user interfaces [G06F3/048](#))] [N1202]
- G06F8/40
 - . [N: Transformations of program code] [N1202]
- G06F8/41
 - . . [N: Compilation] [N1202]

G06F8/42	. . .	[N: Syntactic analysis] [N1202]
G06F8/423	[N: Preprocessors] [N1202]
G06F8/425	[N: Lexical analysis] [N1202]
G06F8/427	[N: Parsing] [N1202]
G06F8/43	. . .	[N: Checking; Contextual analysis] [N1202]
G06F8/433	[N: Dependency analysis; Data or control flow analysis] [N1202]
G06F8/434	[N: Pointers; Aliasing] [N1202]
G06F8/436	[N: Semantic checking] [N1202]
G06F8/437	[N: Type checking] [N1202]
G06F8/44	. . .	[N: Encoding] [N1202]
G06F8/441	[N: Register allocation; Assignment of physical memory space to logical memory space] [N1202]
G06F8/443	[N: Optimisation] [N1202]
G06F8/4432	[N: Reducing the energy consumption] [N1202]
G06F8/4434	[N: Reducing the memory space required by the program code (digital compression H03M7/30)] [N1202]
G06F8/4435	[N: Detection or removal of dead or redundant code] [N1202]
G06F8/4436	[N: Exlining; Procedural abstraction] [N1202]
G06F8/4441	[N: Reducing the execution time required by the program code] [N1202]
G06F8/4442	[N: Reducing the number of cache misses; Data prefetching (cache prefetching G06F12/08B8)] [N1202]
G06F8/4443	[N: Inlining] [N1202]
G06F8/445	[N: Exploiting fine grain parallelism, i.e. parallelism at instruction level (run-time instruction scheduling G06F9/38E)] [N1202]
G06F8/4451	[N: Avoiding pipeline stalls] [N1202]
G06F8/4452	[N: Software pipelining] [N1202]
G06F8/447	[N: Target code generation] [N1202]
G06F8/45	. . .	[N: Exploiting coarse grain parallelism in compilation, i.e. parallelism between groups of instructions] [N1202]
G06F8/451	[N: Code distribution (considering CPU load at run-time G06F9/50A6L ; load rebalancing G06F9/50L)] [N1202]
G06F8/452	[N: Loops] [N1202]
G06F8/453	[N: Data distribution] [N1202]
G06F8/454	[N: Consistency (cache consistency protocols in hierarchically structured memory systems G06F12/08B4P)] [N1202]
G06F8/456	[N: Parallelism detection] [N1202]
G06F8/457	[N: Communication (intertask communication G06F9/46R6)] [N1202]
G06F8/458	[N: Synchronisation, e.g. post-wait, barriers, locks (synchronisation among tasks G06F9/46R2)] [N1202]
G06F8/47	. . .	[N: Retargetable compilers] [N1202]
G06F8/48	. . .	[N: Incremental compilation (software reuse G06F8/36)] [N1202]
G06F8/49	. . .	[N: Partial evaluation] [N1202]
G06F8/51	. .	[N: Source to source] [N1202]
G06F8/52	. .	[N: Binary to binary] [N1202]

- G06F8/53 . . [N: Decompilation; Disassembly] [N1202]
- G06F8/54 . . [N: Link editing before load time (link editing at or after load time [G06F9/445L](#))] [N1202]
- G06F8/60 . [N: Software deployment] [N1202]
- G06F8/61 . . [N: Installation] [N1202]
- G06F8/62 . . . [N: Uninstallation] [N1202]
- G06F8/63 . . . [N: Image based installation; Cloning; Build to order] [N1202]
- G06F8/64 . . . [N: Retargetable] [N1204]
- G06F8/65 . . [N: Update] [N1202]
- G06F8/66 . . . [N: of program stored in read-only memory [ROM]] [N1202]
- G06F8/665 . . . [N: of program code stored in alterable solid state memory, e.g. EEPROM, flash] [N1204]
- G06F8/67 . . . [N: while running] [N1202]
- G06F8/68 . . . [N: Incremental; Differential] [N1204]
- G06F8/70 . [N: Software maintenance or management] [N1202]
- G06F8/71 . . [N: Version control; Configuration management] [N1202]

- G06F8/73 . . [N: Program documentation] [N1202]
- G06F8/74 . . [N: Reverse engineering; Extracting design information from source code] [N1202]
- G06F8/75 . . [N: Structural analysis for program understanding] [N1202]
- G06F8/751 . . . [N: Code clone detection] [N1202]
- G06F8/76 . . [N: Adapting program code to run in a different environment; Porting] [N1202]
- G06F8/77 . . [N: Software metrics] [N1202]
- G06F8/78 . . [N: Methods to solve the "Year 2000" [Y2K] problem] [N1202]
- G06F9/00** **Arrangements for programme control, e.g. control unit** (programme control for peripheral devices [G06F13/10](#); in regulating or control systems [G05B](#))
- G06F9/02 . using wired connections, e.g. plugboard
- G06F9/04 . using record carriers containing only programme instructions ([G06F9/06](#) takes precedence)
- G06F9/06 . using stored programme, i.e. using internal store of processing equipment to receive and retain programme
- G06F9/22 . . Micro-control or micro-programme arrangements
- G06F9/22D . . . [N: Execution means for micro-instructions irrespective of the micro-instruction function, e.g. decoding of micro-instructions and nano-instructions; timing of micro instructions; programmable logic arrays; delays and fan-out problems]
- G06F9/22F . . . [N: Micro instruction function e.g. input/output micro-instruction; diagnostic micro-instruction; micro-instruction format]
- G06F9/24 . . . Loading of the micro-programme
- G06F9/26 . . . Address formation of the next micro-instruction ([G06F9/28](#) takes precedence) [N: Microprogram storage or retrieval arrangements]

G06F9/26F	[N: Micro-instruction address formation]
G06F9/26N	[N: Arrangements for next micro-instruction selection]
G06F9/26N1	[N: Micro-instruction selection based on results of processing]
G06F9/26N1E	[N: by address selection on input of storage]
G06F9/26N1S	[N: by instruction selection on output of storage]
G06F9/26N2	[N: Micro-instruction selection not based on processing results, e.g. interrupt, patch, first cycle store, diagnostic programs]
G06F9/28	. . .	Enhancement of operational speed, e.g. by using several micro-control devices operating in parallel
G06F9/30	. .	Arrangements for executing machine-instructions, e.g. instruction decode (for executing micro-instructions G06F9/22 ; for executing subprogrammes G06F9/40) [C9412]
G06F9/30A	. . .	[N: Arrangements for executing specific machine instructions] [N1111]
G06F9/30A1	[N: to perform operations on data operands] [N1111]
G06F9/30A1A	[N: Arithmetic instructions] [N1111]
G06F9/30A1A1	[N: with variable precision] [N1111]
G06F9/30A1B	[N: Bit or string instructions; instructions using a mask] [N1111]
G06F9/30A1C	[N: Compare instructions, e.g. Greater-Than, Equal-To, MINMAX] [N1111]
G06F9/30A1F	[N: Format conversion instructions, e.g. Floating-Point to Integer, decimal conversion] [N1111]
G06F9/30A1L	[N: Logical and Boolean instructions, e.g. XOR, NOT] [N1111]
G06F9/30A1M	[N: Movement instructions, e.g. MOVE, SHIFT, ROTATE, SHUFFLE] [N1111]
G06F9/30A1P	[N: Instructions to perform operations on packed data, e.g. vector operations] [N1111]
G06F9/30A2	[N: to perform operations on memory] [N1111]
G06F9/30A2L	[N: LOAD or STORE instructions; Clear instruction] [N1111]
G06F9/30A2P	[N: Prefetch instructions; cache control instructions] [N1111]
G06F9/30A3	[N: to perform operations for flow control] [N1111]
G06F9/30A3B	[N: Unconditional branch instructions] [N1111]
G06F9/30A3C	[N: Conditional branch instructions] [N1111]
G06F9/30A3C2	[N: Multi-way branch instructions, e.g. CASE] [N1111]
G06F9/30A3L	[N: Loop control instructions; iterative instructions, e.g. LOOP, REPEAT] [N1111]
G06F9/30A3S	[N: Instruction skipping instructions, e.g. SKIP] [N1111]
G06F9/30A5	[N: to perform conditional operations, e.g. using guard] [N1111]
G06F9/30A8	[N: to perform miscellaneous control operations, e.g. NOP] [N1111]
G06F9/30A8H	[N: Pipeline control instructions] [N1111]
G06F9/30A8P	[N: Power or thermal control instructions] [N1111]
G06F9/30A8S	[N: Synchronisation or serialisation instructions] [N1111]
G06F9/30A8T	[N: Thread control instructions] [N1111]
G06F9/30B	. . .	[N: Condition code generation, e.g. Carry, Zero flag] [N1111]
G06F9/30R	. . .	[N: Register arrangements] [N9412] [C1204]
G06F9/30R2	[N: Special purpose registers] [N0008] [C1204]

G06F9/30R4	[N: Register structure] [N0008] [C1204]
G06F9/30R4A	[N: having multiple operands in a single register] [N1111]
G06F9/30R4C	[N: for variable length data, e.g. single or double registers] [N1111]
G06F9/30R4D	[N: Shadow registers, e.g. coupled registers, not forming part of the register space] [N1111]
G06F9/30R5	[N: Organisation of register space, e.g. banked or distributed register file] [N1111]
G06F9/30R5C	[N: according to context, e.g. thread buffers] [N1111]
G06F9/30R5C2	[N: Register windows] [N1111]
G06F9/30R5D	[N: according to data content, e.g. floating-point registers, address registers] [N1111]
G06F9/30R5S	[N: Register stacks; shift registers] [N1111] [C1202]
G06F9/30R5X	[N: Extension of register space, e.g. register cache] [N1111]
G06F9/30R6	[N: Implementation provisions of register files, e.g. ports] [N1111]
G06F9/30T	[N: Instruction analysis, e.g. decoding, instruction word fields] [N9412]
G06F9/30T2	[N: of variable length instructions] [N9412] [C1202]
G06F9/30T2A	[N: Determining start or end of instruction; determining instruction length] [N1111]
G06F9/30T3	[N: Special purpose encoding of instructions, e.g. Gray coding] [N1111]
G06F9/30T4	[N: Decoding the operand specifier, e.g. specifier format] [N9507]
G06F9/30T4S	[N: with implied specifier, e.g. top of stack] [N9507]
G06F9/30T4T	[N: of immediate specifier, e.g. constants] [N1111]
G06F9/30U	[N: Runtime instruction translation, e.g. macros] [N1111]
G06F9/30U2	[N: for non-native instruction set, e.g. Javabyte, legacy code] [N1111]
G06F9/30U4	[N: of compressed or encrypted instructions] [N1111]
G06F9/30X	[N: Instruction operation extension or modification] [N1111] [C1202]
G06F9/30X2	[N: according to one or more bits in the instruction, e.g. prefix, sub-opcode] [N1111]
G06F9/30X4	[N: according to execution mode, e.g. mode flag] [N1111]
G06F9/30X6	[N: according to data descriptor, e.g. dynamic data typing] [N1111]
G06F9/30X8	[N: using decoder, e.g. decoder per instruction set, adaptable or programmable decoders] [N1111]
G06F9/32	Address formation of the next instruction, e.g. incrementing the instruction counter, jump (G06F9/38 takes precedence; sub-programme jump G06F9/42)
G06F9/32A	[N: Programme or instruction counter, e.g. incrementing]
G06F9/32B	[N: for non-sequential address] [C1204]
G06F9/32B3	[N: using program counter relative addressing] [N1111]
G06F9/32B6	[N: for loops, e.g. loop detection, loop counter] [C1204]
G06F9/32B8	[N: for interrupts] [N1111]
G06F9/32B9	[N: for runtime instruction patching] [N1111]
G06F9/34	Addressing or accessing the instruction operand or the result; [N: Formation of operand address; Addressing modes (address translation G06F12/00)] [C9507]
G06F9/34X	[N: Extension of operand address space] [N1111]
G06F9/345	of multiple operands or results [N: (addressing multiple banks G06F12/06)] [N9507]

G06F9/345A	[N: using stride] [N1111]
G06F9/35	Indirect addressing, [N: i.e. using single address operand, e.g. address register] [N9507]
G06F9/355	Indexed addressing [N: i.e. using more than one address operand] [N9507] [C1202]
G06F9/355B	[N: using wraparound, e.g. modulo or circular addressing] [N1111]
G06F9/355C	[N: using scaling, e.g. multiplication of index] [N1111]
G06F9/355D	[N: using program counter as base address] [N1111]
G06F9/38	Concurrent instruction execution, e.g. pipeline, look ahead
G06F9/38B	[N: Instruction prefetching] [N1111]
G06F9/38B2	[N: for branches, e.g. hedging, branch folding] [N1111]
G06F9/38B2B	[N: using address prediction, e.g. return stack, branch history buffer] [N1111]
G06F9/38B4	[N: for instruction reuse, e.g. trace cache, branch target cache] [N1111]
G06F9/38B4L	[N: Loop buffering] [N1111]
G06F9/38B6	[N: with instruction modification, e.g. store into instruction stream] [N1111]
G06F9/38B8	[N: Implementation provisions of instruction buffers, e.g. prefetch buffer; banks] [N1111]
G06F9/38B9	[N: Instruction alignment, e.g. cache line crossing] [N1111]
G06F9/38C	[N: Decoding for concurrent execution] [N1111]
G06F9/38C2	[N: Pipelined decoding, e.g. using predecoding] [N1111]
G06F9/38C4	[N: Parallel decoding, e.g. parallel decode units] [N1111]
G06F9/38D	[N: Operand accessing] [C1202]
G06F9/38D1	[N: Data result bypassing, e.g. locally between pipeline stages, within a pipeline stage] [N1111]
G06F9/38D1B	[N: with global bypass, e.g. between pipelines, between clusters] [N1111]
G06F9/38D2	[N: Operand prefetching (cache prefetching G06F12/08B8)] [N9805] [C1202]
G06F9/38D2P	[N: Value prediction for operands; operand history buffers] [N1111]
G06F9/38D4	[N: Maintaining memory consistency (cache consistency protocols G06F12/08B4P)] [N9805]
G06F9/38E	[N: Instruction issuing, e.g. dynamic instruction scheduling, out of order instruction execution]
G06F9/38E1	[N: Dependency mechanisms, e.g. register scoreboarding] [N1111]
G06F9/38E1R	[N: Register renaming] [N1111]
G06F9/38E2	[N: Speculative instruction execution] [C1202]
G06F9/38E2D	[N: using dynamic prediction, e.g. branch history table]
G06F9/38E2S	[N: using static prediction, e.g. branch taken strategy]
G06F9/38E2T	[N: using hybrid branch prediction, e.g. selection between prediction techniques] [N1111]
G06F9/38E4	[N: from multiple instruction streams, e.g. multistreaming (initiation or dispatching of multiple tasks or threads G06F9/46C4)] [N9805]
G06F9/38E6	[N: of compound instructions] [N9805]
G06F9/38E8	[N: Reordering, e.g. using a queue, age tags] [N1111]

G06F9/38E9	[N: Result writeback, i.e. updating the architectural state] [N1111]
G06F9/38E9N	[N: with result invalidation, e.g. nullification] [N1111]
G06F9/38H	[N: Recovery, e.g. branch miss-prediction, exception handling (error detection or correction G06F11/00)]
G06F9/38H2	[N: using multiple copies of the architectural state, e.g. shadow registers] [N9805]
G06F9/38H3	[N: using deferred exception handling, e.g. exception flags] [N1111]
G06F9/38P	[N: using instruction pipelines]
G06F9/38P2	[N: Implementation aspects, e.g. pipeline latches; pipeline synchronisation and clocking] [C1202]
G06F9/38P3	[N: Asynchronous instruction pipeline, e.g. using handshake signals between stages] [N1111] [C1202]
G06F9/38P5	[N: Variable length pipelines, e.g. elastic pipeline] [N1111]
G06F9/38P6	[N: Pipelining a single stage, e.g. superpipelining] [N9507]
G06F9/38S	[N: using a slave processor, e.g. coprocessor (peripheral processor G06F13/12 ; vector processor G06F15/78V)]
G06F9/38S1	[N: for non-native instruction execution, e.g. executing a command; for Java instruction set] [N1111] [C1202]
G06F9/38S1C	[N: Arrangements for communication of instructions and data] [N1111]
G06F9/38T	[N: using a plurality of independent parallel functional units]
G06F9/38T4	[N: controlled by a single instruction, e.g. SIMD] [N1111]
G06F9/38T6	[N: controlled by multiple instructions, e.g. MIMD, decoupled access or execute] [N1111]
G06F9/38T6C	[N: organised in groups of units sharing resources, e.g. clusters] [N1111]
G06F9/38T8	[N: controlled in tandem, e.g. multiplier-accumulator] [N1111]
G06F9/38T8C	[N: for complex operations, e.g. multidimensional or interleaved address generators, macros] [N1111]
G06F9/38T8C2	{7 dots} [N: with adaptable data path] [N1111]
G06F9/44	. .	Arrangements for executing specific programmes
G06F9/44A	. . .	[N: Bootstrapping (secure booting G06F21/57B ; fault tolerant booting G06F11/14A8B ; resetting means G06F1/24 ; power-on self test G06F11/22P)] [N1205]
G06F9/44A1	[N: Processor initialisation] [N1205]
G06F9/44A2	[N: of multiprocessor systems] [N1205]
G06F9/44A3	[N: Loading of operating system] [N1205]
G06F9/44A3A	[N: Boot device selection] [N1205]
G06F9/44A3B	[N: Multiboot arrangements, i.e. selecting an operating system to be loaded] [N1205]
G06F9/44A4	[N: Configuring for operating with peripheral devices; Loading of device drivers] [N1205]
G06F9/44A4A	[N: Plug-and-play (PnP)] [N1205]
G06F9/44A4A2	[N: Self describing peripheral devices] [N1205]
G06F9/44A5	[N: Network booting; Remote initial programme loading (RIPL)] [N1205]
G06F9/44A6	[N: Suspend and resume; Hibernate and awake] [N1205]
G06F9/44A7	[N: Shutdown] [N1205]

G06F9/44F	. . .	[N: Execution paradigms] [N1205]
G06F9/44F1	[N: Procedural] [N1205]
G06F9/44F1A	[N: Executing sub-programmes] [N1205]
G06F9/44F1A1	[N: Formation of sub-programme jump address] [N1205]
G06F9/44F2	[N: Object-oriented] [N1205]
G06F9/44F2A	[N: Object-oriented method invocation or resolution] [N1205]
G06F9/44F2A1	[N: Optimising based on receiver type] [N1205]
G06F9/44F2B	[N: Inheritance] [N1205]
G06F9/44F2C	[N: Object persistence] [N1205]
G06F9/44F3	[N: Data-driven] [N1205]
G06F9/44F4	[N: Unification in logic programming] [N1205]
G06F9/44F5	[N: Finite state machines] [N1205]
G06F9/44W	. . .	[N: Execution mechanisms for user interfaces] [N1205]
G06F9/44W1	[N: Remote windowing , e.g. X-Window System, desktop virtualisation (protocols for telewriting H04L67/38)] [N1205]
G06F9/44W2	[N: Help systems] [N9409]
G06F9/44W6	[N: Multi-language systems; Localisation; Internationalisation] [N1205]
G06F9/445	. . .	Programme loading or initiating [N: (bootstrapping G06F9/44A; movement of software or configuration parameters for network-specific applications H04L67/34)] [N1205]
G06F9/445C	[N: Configuring for programme initiating, e.g. using registry, configuration files] [N1205]
G06F9/445C2	[N: User profiles, roaming (user profiles for network-specific applications H04L67/30U)] [N1205]
G06F9/445L	[N: Dynamic linking or loading; Link editing at or after load time; e.g. Java class loading] [N1205]
G06F9/445L2	[N: Plug-ins; Add-ons] [N1205]
G06F9/445P	[N: Selecting among different versions] [N1205]
G06F9/445P2	[N: Retargetable] [N1205]
G06F9/445P2A	[N: Fat binaries] [N1205]
G06F9/445Q	[N: Conflict resolution, i.e. enabling coexistence of conflicting executables] [N1205]
G06F9/445T	[N: Code layout in executable memory] [N1205]
G06F9/445T2	[N: Sharing] [N1205]
G06F9/445U	[N: Immediately runnable code] [N1205]
G06F9/445U2	[N: Execute-in-place (XIP)] [N1205]
G06F9/445U4	[N: Preparing or optimising for loading] [N1205]
G06F9/445U6	[N: Portable applications, i.e. making applications self-contained, e.g. U3 standard] [N1205]
G06F9/445V	[N: Programme code verification, e.g. Java bytecode verification, proof-carrying code (high-level semantic checks G06F8/43; testing and debugging software G06F11/36)] [N1205]
G06F9/445Z	[N: Unloading] [N1205]
G06F9/455	. . .	Emulation; Software simulation [N: , i.e. virtualisation or emulation of application or operating system execution engines (instruction translation at instruction execution time G06F9/30U; multiprogramming in general G06F9/46; logical

partitioning of resources or management or configuration of virtualized resources G06F9/50C6; in-circuit emulation G06F11/36B7E; environments for testing or debugging software G06F11/36E)] [N1205]

G06F9/455B	[N: Abstract machines for programme code execution, e.g. Java virtual machine (JVM), interpreters, emulators] [N1205]
G06F9/455B2	[N: Runtime interpretation or emulation, e.g. emulator loops, bytecode interpretation] [N1205]
G06F9/455B2B	[N: Command shells] [N1205]
G06F9/455B4	[N: Runtime code conversion or optimisation] [N1205]
G06F9/455B4B	[N: Involving translation to a different instruction set architecture, e.g. just-in-time translation in a JVM] [N1205]
G06F9/455B4C	[N: Optimisation or modification within the same instruction set architecture, e.g. HP Dynamo] [N1205]
G06F9/455B6	[N: Embedded in an application, e.g. JavaScript in a Web browser] [N1205]
G06F9/455H	[N: Hypervisors; Virtual machine monitors] [N1205]
G06F9/455H1	[N: Provision of facilities of other operating environments, e.g. WINE (I/O emulation G06F13/10E)] [N1205]
G06F9/455H3	[N: Bare-metal, i.e. hypervisor runs directly on hardware] [N1205]
G06F9/455H5	[N: Guest-host, i.e. hypervisor is an application program itself, e.g. VirtualBox] [N1205]
G06F9/455H6	[N: Para-virtualisation, i.e. guest operating system has to be modified] [N1205]
G06F9/455H7	[N: Instruction set architectures of guest OS and hypervisor or native processor differ, e.g. Bochs or VirtualPC on PowerPC MacOS] [N1205]
G06F9/455H9	[N: Hypervisor-specific management and integration aspects] [N1205]
G06F9/46	. .	Multiprogramming arrangements [M1108]
G06F9/46G	. . .	[N: Saving or restoring of program or task context]
G06F9/46G2	[N: with multiple register sets]
G06F9/46G4	[N: Program control block organisation]
G06F9/46M	. . .	[N: Distributed object oriented systems (remote method invocation (RMI) G06F9/54P1)] [C0408] [M1112]
G06F9/46T	. . .	[N: Transaction processing]
G06F9/46T2	[N: Transactional memory (G06F9/52E2 takes precedence)] [N1108]
G06F9/46V	. . .	[N: Specific access rights for resources, e.g. using capability register] [N1112]
G06F9/48	. . .	Programme initiating; Programme switching, e.g. by interrupt [N0702] [M1108]
G06F9/48C	[N: Task transfer initiation or dispatching] [N0702]
G06F9/48C2	[N: by interrupt, e.g. masked] [N0702]
G06F9/48C2P	[N: Priority circuits therefor] [N0702]
G06F9/48C2T	[N: Interrupt from clock, e.g. time of day] [N0702]
G06F9/48C2V	[N: with variable priority] [N0702]
G06F9/48C2V1	{7 dots} [N: time dependent] [N0702]
G06F9/48C4	[N: by program, e.g. task dispatcher, supervisor, operating system] [N0702]
G06F9/48C4P	[N: Task life-cycle, e.g. stopping, restarting, resuming execution (G06F9/48C4S takes precedence)] [N0702]

G06F9/48C4P2	{7 dots} [N: resumption being on a different machine, e.g. task migration , virtual machine migration (G06F9/50L2 takes precedence)] [N0702] [C1204]
G06F9/48C4P2M	{8 dots} [N: the task being a mobile agent, i.e. specifically designed to migrate] [N0702]
G06F9/48C4P2M2	{9 dots} [N: with creation or replication] [N0702]
G06F9/48C4P2M4	{9 dots} [N: with migration policy, e.g. auction, contract negotiation] [N0702]
G06F9/48C4S	[N: Scheduling strategies for dispatcher, e.g. round robin, multi-level priority queues] [N0702]
G06F9/48C4S1	{7 dots} [N: involving deadlines, e.g. rate based, periodic] [N0702]
G06F9/48C4S2	{7 dots} [N: taking into account power or heat criteria (power management in computers in general G06F1/32P ; thermal management in computers in general G06F1/20T)] [N1112]
G06F9/50	. . .	Allocation of resources, e.g. of the central processing unit (CPU) [N0702]
G06F9/50A	[N: to service a request] [N0702]
G06F9/50A2	[N: the resources being hardware resources other than CPUs, Servers and Terminals] [N0702]
G06F9/50A2M	[N: the resource being the memory] [N0702]
G06F9/50A2R	[N: Mechanisms to release resources] [N1108]
G06F9/50A6	[N: the resource being a machine, e.g. CPUs, Servers, Terminals] [N0702]
G06F9/50A6A	[N: considering data affinity] [N0702]
G06F9/50A6E	[N: considering the execution order of a plurality of tasks, e.g. taking priority or time dependency constraints into consideration (scheduling strategies G06F9/48C4S and subgroups)] [N0702]
G06F9/50A6H	[N: considering hardware capabilities] [N0702]
G06F9/50A6L	[N: considering the load] [N0702]
G06F9/50A6S	[N: considering software capabilities, i.e. software resources associated or available to the machine] [N0702]
G06F9/50C	[N: Partitioning or combining of resources] [N0702]
G06F9/50C2	[N: Algorithms for mapping a plurality of inter-dependent sub-tasks onto a plurality of physical CPUs (mappping at compile time, see G06F9/45M1)] [N0702]
G06F9/50C4	[N: Grid computing] [N0702]
G06F9/50C6	[N: Logical partitioning of resources; Management or configuration of virtualized resources (specific details on emulation or internal functioning of virtual machines G06F9/455)] [N0702] [M1203]
G06F9/50L	[N: Techniques for rebalancing the load in a distributed system] [N0702]
G06F9/50L2	[N: involving task migration] [N0702]
G06F9/50P	[N: where the allocation takes into account power or heat criteria (power management in computers in general G06F1/32P ; thermal management in computers in general G06F1/20T)] [N1112]
G06F9/52	. . .	Programme synchronisation; Mutual exclusion, e.g. by means of semaphores; [N: Contention for resources among tasks] [N1108]
G06F9/52B	[N: Barrier synchronisation] [N1108]
G06F9/52D	[N: Deadlock detection or avoidance] [N1108]
G06F9/52E	[N: Mutual exclusion algorithms] [N1108]

- G06F9/52E2 [N: by using speculative mechanisms] [N1108]
- G06F9/54 Interprogramme communication; [N: Intertask communication] [N1108]
- G06F9/54A [N: via adapters, e.g. between incompatible applications] [N1108]
- G06F9/54B [N: Event management; Broadcasting; Multicasting; Notifications] [N1108]
- G06F9/54C [N: User-generated data transfer, e.g. clipboards, dynamic data exchange [DDE], object linking and embedding [OLE]] [N1108]
- G06F9/54F [N: Buffers; Shared memory; Pipes] [N1108]
- G06F9/54L [N: where tasks reside in different layers, e.g. user- and kernel-space] [N1108]
- G06F9/54M [N: Message passing systems or structures, e.g. queues] [N1108]
- G06F9/54P [N: Remote procedure calls [RPC]; Web services] [N1108] [M1204]
- G06F9/54P1 [N: Object oriented; Remote method invocation [RMI] (non-remote method invocation [G06F9/42M](#))] [N1108]

- G06F11/00** **Error detection; Error correction; Monitoring** (methods or arrangements for verifying the correctness of marking on a record carrier [G06K5/00](#); in information storage based on relative movement between record carrier and transducer [G11B](#), e.g. [G11B20/18](#); in static stores [G11C](#); coding, decoding or code conversion, for error detection or error correction, in general [H03M13/00](#)) [C9509]
 - [N: **Note**
In this group the indexing codes of [S06F1/00](#) to [S06F15/00](#) are added
]

- G06F11/00F [N: protecting against parasitic influences, e.g. noise, temperatures] [M1108]
 - [N: **WARNING**
[C1108]
This group is no longer used for the classification of new documents as from January 1, 2011. The documents are classified in [G06F11/07](#) and subgroups according to the features used for protecting]

- G06F11/00H [N: Error avoidance ([G06F11/07](#) and subgroups take precedence)] [C1101]
- G06F11/00K [N: Identification ([G06F11/22M1C](#) takes precedence)] [C1101]
- G06F11/00M [N: Reliability or availability analysis] [N9810]

- G06F11/07 responding to the occurrence of a fault, e.g. fault tolerance [N0206]
- G06F11/07P [N: Error or fault processing not based on redundancy, i.e. by taking additional measures to deal with the error or fault not making use of redundancy in operation, in hardware, or in data representation] [N0301] [C1201]
- G06F11/07P1 [N: the processing taking place on a specific hardware platform or in a specific software environment] [N1201]
- G06F11/07P1A [N: in a distributed system consisting of a plurality of standalone computer nodes, e.g. clusters, client-server systems] [N1201] [C1204]
- G06F11/07P1B [N: in a virtual computing platform, e.g. logically partitioned systems] [N1201]
- G06F11/07P1C [N: in a system implementing multitasking (multitasking per se [G06F9/46](#))] [N1201]
- G06F11/07P1D [N: in an object-oriented system] [N1201]

G06F11/07P1E	[N: within a central processing unit [CPU]] [N1201]
G06F11/07P1E1	[N: in a multiprocessor or a multi-core unit (multiprocessors per se G06F15/80)] [N1201]
G06F11/07P1F	[N: in a storage system, e.g. in a DASD or network based storage system (circuits for error detection or correction within digital recording or reproducing units G11B20/18 ; drivers for digital recording or reproducing units G06F3/06 ; storage area networks H04L29/08N9S)] [N1201]
G06F11/07P1G	[N: in a memory management context, e.g. virtual memory or cache management (memory management G06F12/00 ; testing of static memory units G11C29/00)] [N1201]
G06F11/07P1H	[N: in a data processing system embedded in an image processing device, e.g. printer, facsimile, scanner] [N1201]
G06F11/07P1J	[N: in functional embedded systems, i.e. in a data processing system designed as a combination of hardware and software dedicated to performing a certain function (testing or monitoring of automated control systems G05B23/02)] [N1201]
G06F11/07P1J1	[N: in a data processing system embedded in automotive or aircraft systems] [N1201]
G06F11/07P1J5	[N: in a data processing system embedded in a mobile device, e.g. mobile phones, handheld devices] [N1201]
G06F11/07P1K	[N: in an input/output transactions management context (input/output processing in general G06F13/00)] [N1201]
G06F11/07P1L	[N: in a remote unit communicating with a single-box computer node experiencing an error/fault (remote testing G06F11/273R)] [N1201]
G06F11/07P2	[N: Error or fault detection not based on redundancy (power supply failures G06F1/30 ; network fault management H04L12/24D)] [N0301] [C1201]
G06F11/07P2A	[N: by exceeding limits] [N1201]
G06F11/07P2A1	[N: by exceeding a time limit, i.e. time-out, e.g. watchdogs] [N1201]
G06F11/07P2A2	[N: by exceeding a count or rate limit, e.g. word- or bit count limit] [N1201]
G06F11/07P2B	[N: by bit configuration check, e.g. of formats or tags] [N1201]
G06F11/07P4	[N: Error or fault reporting or storing (reporting or storing of non-error data G06F11/30 , G06F11/34)] [N0301] [C1201]
G06F11/07P4A	[N: Readable error formats, e.g. cross-platform generic formats, human understandable formats] [N1201]
G06F11/07P4B	[N: Means for error signaling, e.g. using interrupts, exception flags, dedicated error registers] [N1201]
G06F11/07P4C	[N: Content or structure details of the error report, e.g. specific table structure, specific error fields] [N1201]
G06F11/07P4D	[N: Dumping, i.e. gathering error/state information after a fault for later diagnosis] [N1201]
G06F11/07P4E	[N: Error filtering or prioritizing based on a policy defined by the user or on a policy defined by a hardware/software module, e.g. according to a severity level] [N1201]
G06F11/07P4F	[N: Routing of error reports, e.g. with a specific transmission path or data flow] [N1201]
G06F11/07P4G	[N: Storage of error reports, e.g. persistent data storage, storage using memory protection] [N1201]
G06F11/07P6	[N: Root cause analysis, i.e. error or fault diagnosis (in a hardware test environment G06F11/22 ; in a software test environment G06F11/36)] [N0301] [C1201]

G06F11/07P10	. . .	[N: Remedial or corrective actions (by retry G06F11/14A ; recovery from an exception in an instruction pipeline G06F9/38H ; in a network context H04L29/14)] [N0301] [C1201]
G06F11/07S	. .	[N: Safety measures, i.e. ensuring safe condition in the event of error, e.g. for controlling element] [N1101]
G06F11/08	. .	Error detection or correction by redundancy in data representation, e.g. by using checking codes
G06F11/08N	. . .	[N: using codes with inherent redundancy, e.g. n-out-of-m codes] [N9507]
G06F11/10	. . .	Adding special bits or symbols to the coded information, e.g. parity check, casting out 9's or 11's
G06F11/10A	[N: to protect a block of data words, e.g. CRC or checksum (G06F11/10R takes precedence; security arrangements for protecting computers or computer systems against unauthorized activity G06F21/00)] [N1112]
G06F11/10M	[N: in individual solid state devices (G06F11/10A takes precedence)] [C1112]
G06F11/10M1	[N: using codes or arrangements adapted for a specific type of error (G06F11/10M4 takes precedence)] [N1112]
G06F11/10M1A	[N: Error in accessing a memory location, i.e. addressing error] [N1112]
G06F11/10M1C	[N: Error in check bits] [N1112]
G06F11/10M1D	[N: Identification of the type of error] [N1112]
G06F11/10M1P	[N: Adjacent errors, e.g. error in n-bit (n>1) wide storage units, i.e. package error] [N1112]
G06F11/10M1S	[N: Simple parity] [N1112]
G06F11/10M1U	[N: Unidirectional errors] [N1112]
G06F11/10M1W	[N: using arithmetic codes i.e. codes which are preserved during operation, e.g. modulo 9 or 11 check] [N1112]
G06F11/10M3	[N: with specific ECC/EDC distribution] [N1112]
G06F11/10M4	[N: using arrangements adapted for a specific error detection or correction feature] [N1112]
G06F11/10M4B	[N: Bypassing or disabling error detection or correction] [N1112]
G06F11/10M4R	[N: Updating check bits on partial write, i.e. read/modify/write] [N1112]
G06F11/10M4S	[N: Correcting systematically all correctable errors, i.e. scrubbing] [N1112]
G06F11/10M6	[N: in cache or content addressable memories] [N1112]
G06F11/10M8	[N: in sector programmable memories, e.g. flash disk (G06F11/10M10 takes precedence)] [N1112]
G06F11/10M10	[N: in multilevel memories] [N1112]
G06F11/10R	[N: Parity data used in redundant arrays of independent storages, e.g. in RAID systems] [N1112]
G06F11/10R1	[N: Parity data distribution in semiconductor storages, e.g. in SSD] [N1112]
G06F11/10R2	[N: Degraded mode, e.g. caused by single or multiple storage removals or disk failures] [N1112]
G06F11/10R3	[N: Reconstruction on already foreseen single or plurality of spare disks] [N1112]
G06F11/10R4	[N: Rebuilding, e.g. when physically replacing a failing disk] [N1112]
G06F11/10R5	[N: Parity calculation or recalculation after configuration or reconfiguration]

				of the system] [N1112]
G06F11/14	.	.	.	Error detection or correction of the data by redundancy in operation (G06F11/16 takes precedence)
G06F11/14A	.	.	.	[N: Saving, restoring, recovering or retrying] [C9704]
G06F11/14A2	.	.	.	[N: at machine instruction level] [C9704]
G06F11/14A2C	.	.	.	[N: Checkpointing the instruction stream] [N9704]
G06F11/14A2M	.	.	.	[N: for bus or memory accesses] [N9704]
G06F11/14A4	.	.	.	[N: of data] [M1108]
G06F11/14A8	.	.	.	[N: at system level] [M1108]
G06F11/14A8B	.	.	.	[N: Boot up procedures] [N9704]
G06F11/14A8C	.	.	.	[N: Reconfiguring to eliminate the error (group management mechanisms in a peer-to-peer network H04L67/10P1A)] [N9704] [C1207]
G06F11/14A8C2	.	.	.	[N: by reconfiguration of paths] [N1108]
G06F11/14A8C4	.	.	.	[N: by reconfiguration of node membership] [N1108]
G06F11/14A8C6	.	.	.	[N: with loss of hardware functionality] [N1108]
G06F11/14A8C8	.	.	.	[N: with loss of software functionality] [N1108]
G06F11/14A8E	.	.	.	[N: during software upgrading] [N9810]
G06F11/14A8F	.	.	.	[N: using file system or storage system metadata] [N9704] [C1203]
G06F11/14A8L	.	.	.	[N: Restarting or rejuvenating] [N9810]
G06F11/14A8P	.	.	.	[N: Resetting or repowering] [N9704]
G06F11/14A8T	.	.	.	[N: Transmit or communication errors] [N9704]
G06F11/14A10	.	.	.	[N: Point-in-time backing up or restoration of persistent data] [N1203]
G06F11/14A10D	.	.	.	[N: Management of the data involved in backup or backup restore] [N1203]
G06F11/14A10D2	.	.	.	[N: by selection of backup contents] [N1203]
G06F11/14A10D4	.	.	.	[N: using de-duplication of the data] [N1203]
G06F11/14A10H	.	.	.	[N: Hardware arrangements for backup] [N1203]
G06F11/14A10P	.	.	.	[N: Management of the backup or restore process] [N1203]
G06F11/14A10P2	.	.	.	[N: Backup scheduling policy] [N1203]
G06F11/14A10P4	.	.	.	[N: for networked environments] [N1203]
G06F11/14A10P6	.	.	.	[N: to make the backup process non-disruptive] [N1203]
G06F11/14A10P8	.	.	.	[N: Backup restoration techniques] [N1203]
G06F11/14A12	.	.	.	[N: involving logging of persistent data for recovery] [N1203]
G06F11/14A14	.	.	.	[N: in transactions (G06F17/30S takes precedence)] [N1203]
G06F11/14N	.	.	.	[N: in neural networks] [N1108]
G06F11/14S	.	.	.	[N: Generic software techniques for error detection or fault masking] [N1002] [M1108]
G06F11/14S1	.	.	.	[N: by means of middleware or OS functionality] [N1002]
G06F11/14S1V	.	.	.	[N: involving virtual machines] [N1203]
G06F11/14S2	.	.	.	[N: using N-version programming] [N1002]
G06F11/14S3	.	.	.	[N: through recovery blocks] [N1002]
G06F11/14S4	.	.	.	[N: by run-time replication performed by the application software] [N1002]
G06F11/14S4M	.	.	.	[N: N-modular type] [N1002]

G06F11/14T	. . .	[N: Details of time redundant execution on a single processing unit] [N1002]
G06F11/16	. .	Error detection or correction of the data by redundancy in hardware
G06F11/16A	. . .	[N: where the fault affects the clock signals of a processing unit and the redundancy is at or within the level of clock signal generation hardware] [N0807]
G06F11/16B	. . .	[N: Error detection by comparing the output signals of redundant hardware (G06F11/16C , G06F11/16M take precedence; error detection or correction in information storage based on relative movement between record carrier and transducer G11B20/18 ; checking static stores for correct operation G11C29/00 ; for logic circuits H03K19/003 , H03K19/007 ; for pulse counters or frequency dividers H03K21/40)] [C1003]
G06F11/16B2	[N: where the redundant component is persistent storage][M1203]
G06F11/16B8	[N: where the redundant component is an I/O device or an adapter therefor] [M1203]
G06F11/16B8D	[N: Displays]
G06F11/16B12	[N: in communications, e.g. transmission, interfaces]
G06F11/16C	. . .	[N: Error detection by comparing the output of redundant processing systems] [N0807]
G06F11/16C2	[N: using mutual exchange of the output between the redundant processing components] [N0807]
G06F11/16C4	[N: using additional compare functionality in one or some but not all of the redundant processing components] [N0807]
G06F11/16C6	[N: where the comparison is not performed by the redundant processing components] [N0807]
G06F11/16C6R	[N: and the comparison itself uses redundant hardware] [N0807]
G06F11/16C8	[N: with continued operation after detection of the error] [N0807]
G06F11/16C12	[N: where the output of only one of the redundant processing components can drive the attached hardware, e.g. memory or I/O] [N0807]
G06F11/16D	. . .	[N: Data re-synchronization of a redundant component, or initial sync of replacement, additional or spare unit] [N0807] [C1003]
G06F11/16D2	[N: the resynchronized component or unit being a persistent storage device (re-synchronization of failed mirror storage G06F11/20S2S ; rebuild or reconstruction of parity RAID storage G06F11/10M)] [N1003] [M1203]
		[N: WARNING [N1004] Not complete pending a reclassification. See also G06F11/16D]
G06F11/16M	. . .	[N: where the redundant component is memory or memory area] [N0807] [M1203]
		[N: WARNING [N0807] Not complete. See also G06F11/00C and G06F11/20L and respective subgroups]
G06F11/16M2	[N: Error detection by comparing the memory output] [N1003]
G06F11/16T	. . .	[N: Temporal synchronisation or re-synchronisation of redundant processing components] [N0807]
G06F11/16T2	[N: at clock signal level] [N0807]
G06F11/16T4	[N: at instruction level] [N0807]
G06F11/16T6	[N: at event level, e.g. by interrupt or result of polling] [N0807]
G06F11/16T8	[N: using a quantum] [N0807]

G06F11/16Z	. . .	[N: which are operating with time diversity] [N0807]
G06F11/18	. . .	[N: using passive fault-masking of the redundant circuits (error detection by comparing the output of redundant processing systems with continued operation after detection of the error G06F11/16C8)] [C0807]
G06F11/18E	. . .	[N: Eliminating the failing redundant component] [N0807]
G06F11/18M	. . .	[N: based on mutual exchange of the output between redundant processing components] [N0807]
G06F11/18N	. . .	[N: by voting, the voting not being performed by the redundant components] [N0807]
G06F11/18N2	. . .	[N: where the redundant components implement processing functionality] [N0807]
G06F11/18N2R	. . .	[N: and the voting is itself performed redundantly] [N0807]
G06F11/18R	. . .	[N: Passive fault masking when reading multiple copies of the same data] [N1203]
G06F11/18V	. . .	[N: Details of voting] [N0807]
G06F11/18V4	. . .	[N: where exact match is not required] [N0807]
G06F11/20	. . .	using active fault-masking, e.g. by switching out faulty elements or by switching in spare elements
G06F11/20C	. . .	[N: where interconnections or communication control functionality are redundant (flexible arrangements for bus networks involving redundancy H04L12/40R1)] [N1004] [C1101]
G06F11/20C2	. . .	[N: using redundant communication controllers] [N1004]
G06F11/20C4	. . .	[N: using redundant communication media] [N1004]
G06F11/20C4S	. . .	[N: between storage system components] [N1004]
G06F11/20C6	. . .	[N: and using different communication protocols] [N1004]
G06F11/20K	. . .	[N: Redundant power supplies (power supply failure G06F1/30)]
G06F11/20M	. . .	[N: where memory access, memory control or I/O control functionality is redundant (redundant communication control functionality G06F11/20C2 ; redundant storage control functionality G06F11/20S4)] [N1004] [M1203]
		[N: WARNING [N1004] Not complete pending a reclassification. See also G06F11/20L]
G06F11/20P	. . .	[N: where processing functionality is redundant (redundant communication control functionality G06F11/20C2 , redundant storage control functionality G06F11/20S4)] [N1004] [C1101]
G06F11/20P2	. . .	[N: details of failing over] [N1004]
G06F11/20P2C	. . .	[N: using centralised failover control functionality] [N1004]
G06F11/20P2E	. . .	[N: eliminating a faulty processor or activating a spare] [N1004]
G06F11/20P2M	. . .	[N: using migration] [N1004]
G06F11/20P2S	. . .	[N: switching over of hardware resources] [N1004]
G06F11/20P4	. . .	[N: without idle spare hardware] [N1004]
G06F11/20P6	. . .	[N: with a single idle spare processing component] [N1004]
G06F11/20P8	. . .	[N: with more than one spare processing components] [N1004]
G06F11/20P10	. . .	[N: where the redundant components share a common memory address space] [N1004]
G06F11/20P12	. . .	[N: where the redundant components share persistent storage (G06F11/20P10 takes precedence)] [N1004]

G06F11/20P14	[N: where the redundant components share neither address space nor persistent storage] [N1004]
G06F11/20P16	[N: in regular structures] [N1004]
G06F11/20S	[N: where persistent mass storage functionality or persistent mass storage control functionality is redundant (error detection or correction in information storage based on relative movement between record carrier and transducer G11B20/18)] [N1004] [C1006]
G06F11/20S2	[N: by mirroring] [N1004]
G06F11/20S2C	[N: using more than 2 mirrored copies] [N1004]
G06F11/20S2D	[N: combined with de-clustering of data] [N1004]
G06F11/20S2E	[N: while ensuring consistency] [N1004]
G06F11/20S2L	[N: Optimisation of the communication load] [N1004]
G06F11/20S2M	[N: Management of state, configuration or failover] [N1004]
G06F11/20S2P	[N: using a plurality of controllers] [N1004]
G06F11/20S2P2	{7 dots} [N: Details of asynchronous techniques] [N1004]
G06F11/20S2P4	{7 dots} [N: Details of synchronous techniques] [N1004]
G06F11/20S2P6	{7 dots} [N: Bidirectional techniques] [N1004]
G06F11/20S2S	[N: Data synchronisation] [N1004]
G06F11/20S2U	[N: on the same storage unit] [N1004]
G06F11/20S2W	[N: with a common controller] [N1004]
G06F11/20S4	[N: Redundant storage control functionality] [N1004] [C1101]
G06F11/20S4F	[N: Details of failing over between control units] [N1004]
G06F11/20S6	[N: Redundant storage or storage space (G06F11/20S2 takes precedence)] [N1004]
G06F11/20U	[N: maintaining the standby controller/processing unit updated (initialisation or re-synchronisation thereof G06F11/16D and subgroups)] [N1004]
G06F11/22	Detection or location of defective computer hardware by testing during standby operation or during idle time, e.g. start-up testing (testing of digital circuits, e.g. of separate computer components G01R31/317) [C9511]
G06F11/22A	[N: using arrangements specific to the hardware being tested] [N1111]
G06F11/22A2	[N: to test buses, lines or interfaces, e.g. stuck-at or open line faults] [N1111]
G06F11/22A4	[N: to test error correction or detection circuits] [N1111]
G06F11/22A6	[N: to test input/output devices or peripheral units] [N1111]
G06F11/22A8	[N: to test ALU] [N1111]
G06F11/22A10	[N: to test interrupt circuits] [N1111]
G06F11/22A12	[N: to test CPU or processors] [N1111]
G06F11/22A12M	[N: in multi-processor systems, e.g. one processor becoming the test master (G06F11/273S takes precedence)] [N1111]
G06F11/22C	[N: Verification or detection of system hardware configuration] [N9811]
G06F11/22D	[N: using fault dictionaries] [N1111]
G06F11/22E	[N: using expert systems] [N1111]
G06F11/22G	[N: using neural networks] [N1111]
G06F11/22L	[N: Logging of test results] [N9906]
G06F11/22M	[N: Test methods]

- G06F11/22P . . [N: by power-on test, e.g. power-on self test (POST)] [N1111]
- G06F11/22Q . . [N: by configuration test] [N1111]
- G06F11/22R . . [N: by remote test] [N1112]
- G06F11/24 . . Marginal checking [N: or other specified testing methods not covered by [G06F11/26](#), e.g. race tests] [C9409]
- G06F11/25 . . Testing of logic operation, e.g. by logic analysers [N9511]
- G06F11/26 . . Functional testing [C9511]
- G06F11/26S . . . [N: by simulating additional hardware, e.g. fault simulation] [C9611]
- G06F11/263 . . . Generation of test inputs, e.g. test vectors, patterns or sequences; [N: with adaptation of the tested hardware for testability with external testers] [N9511] [C1111]
- G06F11/263S [N: using a storage for the test inputs, e.g. test ROM, script files] [N1111]
- G06F11/267 . . . Reconfiguring circuits for testing, e.g. LSSD, partitioning [N9511]
- G06F11/27 . . . Built-in tests [N9511]
- G06F11/273 . . . Tester hardware, i.e. output processing circuits [N: ([G06F11/263](#) takes precedence)] [N9511]
- G06F11/273E [N: Test interface between tester and unit under test] [N9511] [C9906]
- G06F11/273S [N: using a dedicated service processor for test] [N9511] [C9906]
- G06F11/277 with comparison between actual response and known fault-free response [N9511] [C1111]

- G06F11/28 . by checking the correct order of processing ([G06F11/08](#) to [G06F11/26](#) take precedence; monitoring patterns of pulse trains [H03K5/19](#))

- G06F11/30 . Monitoring
- G06F11/30A . . [N: Monitoring arrangements specially adapted to the computing system or computing system component being monitored] [N1202]
- G06F11/30A1 . . . [N: where the computing system is distributed, e.g. networked systems, clusters, multiprocessor systems (multiprogramming arrangements [G06F9/46](#); allocation of resources [G06F9/50](#))] [N1202]
- G06F11/30A2 . . . [N: where the computing system is a virtual computing platform, e.g. logically partitioned systems (virtual machines [G06F9/455H](#); logical partitioning of resources [G06F9/50C6](#))] [N1202]
- G06F11/30A3 . . . [N: where the computing system is an embedded system, i.e. a combination of hardware and software dedicated to perform a certain function in mobile devices, printers, automotive or aircraft systems (testing or monitoring of control systems or parts thereof [G05B23/02](#))] [N1202]
- G06F11/30A4 . . . [N: where the computing system is implementing multitasking (multiprogramming arrangements [G06F9/46](#); allocation of resources [G06F9/50](#))] [N1202]
- G06F11/30A5 . . . [N: where the computing system component is a software system] [N1202]
- G06F11/30A6 . . . [N: where the computing system component is a central processing unit (CPU)] [N1202]
- G06F11/30A7 . . . [N: where the computing system component is a bus] [N1202]
- G06F11/30A8 . . . [N: where the computing system component is a motherboard or an expansion card] [N1202]

- G06F11/30A9 . . . [N: where the computing system component is a storage system, e.g. DASD based or network based (digital recording or reproducing [G11B20/18](#); digital input from or digital output to record carriers [G06F3/06](#); arrangements and networking functions for distributed storage of data in a network [H04L29/08N9S](#))] [N1202]
- G06F11/30A10 . . . [N: where the computing system component is a memory, e.g. virtual memory, cache (accessing, addressing or allocating within memory systems or architectures [G06F12/00](#); checking stores for correct operation [G11C29/00](#))] [N1202]
- G06F11/30A11 . . . [N: where the computing system component is an input/output interface (interconnection of, or transfer of information or other signals between, memories, input/output devices or central processing units [G06F13/00](#))] [N1202]
- G06F11/30A12 . . . [N: where the computing system component is the mechanical casing of the computing system] [N1202]
- G06F11/30A13 . . . [N: where the topology of the computing system or computing system component explicitly influences the monitoring activity, e.g. serial, hierarchical systems] [N1202]
- G06F11/30C . . [N: Monitoring arrangements for monitoring the configuration of the computing system or of the computing system component, e.g. monitoring the presence of processing resources, peripherals, I/O links, software programs (verification or detection of system hardware configuration [G06F11/22C](#))] [N1202]
- G06F11/30D . . [N: Monitoring arrangements for monitoring the status of the computing system or of the computing system component, e.g. monitoring if the computing system is on, off, available, not available (error or fault processing without redundancy [G06F11/07P](#); error detection or correction by redundancy in data representation [G06F11/08](#); error detection or correction by redundancy in operation [G06F11/14](#); error detection or correction by redundancy in hardware [G06F11/16](#))] [N1202]
- G06F11/30E . . [N: Monitoring arrangements for monitoring environmental properties or parameters of the computing system or of the computing system component, e.g. monitoring of power, currents, temperature, humidity, position, vibrations (thermal management in cooling arrangements of a computing system [G06F1/20T](#))] [N1202]
- G06F11/30E1 . . . [N: where the monitored property is the power consumption (power management in a computing system [G06F1/32P](#))] [N1202]
- G06F11/30R . . [N: Monitoring arrangements determined by the means or processing involved in reporting the monitored data (error or fault reporting or logging [G06F11/07P4](#))] [N1202]
- G06F11/30R1 . . . [N: where the reporting involves data format conversion] [N1202]
- G06F11/30R2 . . . [N: where the reporting involves data filtering, e.g. pattern matching, time or event triggered, adaptive or policy-based reporting] [N1202]
- G06F11/30R2C [N: the data filtering being achieved in order to maintain consistency among the monitored data, e.g. ensuring that the monitored data belong to the same timeframe, to the same system or component] [N1202]
- G06F11/30R2D [N: the data filtering being achieved by reporting only the changes of the monitored data] [N1202]
- G06F11/30R2G [N: the data filtering being achieved by aggregating or compressing the monitored data] [N1202]
- G06F11/30R3 . . . [N: where the reporting involves the use of self describing data formats, e.g. metadata, markup languages, human readable formats] [N1202]
- G06F11/30S . . [N: Monitoring arrangements determined by the means or processing involved in sensing the monitored data, e.g. interfaces, connectors, sensors, probes, agents (software debugging using additional hardware using a specific debug interface [G06F11/36B7H](#); performance evaluation by tracing or monitoring [G06F11/34T](#))]

			N1202]
G06F11/30S1	.	.	[N: Configuration details thereof, e.g. installation, enabling, spatial arrangement of the probes] [N1202]
G06F11/30S2	.	.	[N: wherein the means or processing minimize the use of computing system or of computing system component resources, e.g. non-intrusive monitoring which minimizes the probe effect: sniffing, intercepting, indirectly deriving the monitored data from other directly available data] [N1202]
G06F11/32	.	.	with visual [N: or acoustical] indication of the functioning of the machine [C9605]
G06F11/32D	.	.	[N: Display for diagnostics, e.g. diagnostic result display, self-test user interface] [N9605]
G06F11/32D4	.	.	[N: Display of waveforms, e.g. of logic analysers (G06F11/32P takes precedence)] [N9605]
G06F11/32P	.	.	[N: Visualisation of programs or trace data] [N9605]
G06F11/32S	.	.	[N: Display of status information] [N9605]
G06F11/32S2	.	.	[N: by lamps or LED`s] [N9605]
G06F11/32S2E	.	.	[N: for error or online/offline status] [N9605]
G06F11/32S4	.	.	[N: Alarm or error message display] [N9605]
G06F11/32S6	.	.	[N: Computer systems status display (G06F11/32S4 takes precedence)] [N9605]
G06F11/34	.	.	Recording or statistical evaluation of computer activity, e.g. of down time, of input/output operation; [N: Recording or statistical evaluation of user activity, e.g. usability assessment] [C1203]
G06F11/34B	.	.	[N: for parallel or distributed programming] [M1203]
G06F11/34C	.	.	[N: for performance assessment] [M1203]
G06F11/34C2	.	.	[N: Workload generation, e.g. scripts, playback] [C9806]
G06F11/34C4	.	.	[N: by assessing time] [N9806] [M1203]
G06F11/34C4A	.	.	[N: where the assessed time is active or idle time] [N9806] [M1203]
G06F11/34C5	.	.	[N: Benchmarking] [N1203]
G06F11/34C6	.	.	[N: for load management (allocation of a server based on load conditions G06F9/50A6L ; load rebalancing G06F9/50L ; redistributing the load in a network by a load balancer H04L67/10A7)] [N1203] [C1207]
G06F11/34E	.	.	[N: monitoring of user actions (checking the network activity of the user for network-specific applications H04L67/22)] [N1203] [C1207]
G06F11/34H	.	.	[N: for planning or managing the needed capacity] [N1203]
G06F11/34M	.	.	[N: Performance evaluation by modeling][C1203]
G06F11/34P	.	.	[N: Performance evaluation by statistical analysis] [N1203]
G06F11/34S	.	.	[N: Performance evaluation by simulation]
G06F11/34S2	.	.	[N: Trace driven simulation]
G06F11/34T	.	.	[N: Performance evaluation by tracing or monitoring]
G06F11/34T2	.	.	[N: Address tracing]
G06F11/34T4	.	.	[N: Data logging (G06F11/14 , G06F11/22A take precedence)]
G06F11/34T6	.	.	[N: Circuit details, i.e. tracer hardware]
G06F11/34T8	.	.	[N: for I/O devices]
G06F11/34T10	.	.	[N: for interfaces, buses]
G06F11/34T12	.	.	[N: for systems]
G06F11/36	.		Preventing errors by testing or debugging software [N0203]

G06F11/36A	. . [N: Software analysis for verifying properties of programs (structural analysis for program understanding G06F9/44G4M6 ; byte-code verification G06F9/445V)] [N1011]
G06F11/36A2	. . . [N: using formal methods, e.g. model checking, abstract interpretation (fault-tolerant software G06F11/16S ; theorem proving G06N5/00H2)] [N1011] [M1108]
G06F11/36A4	. . . [N: by runtime analysis (performance monitoring G06F11/34T)] [N1011]
G06F11/36A6	. . . [N: using software metrics] [N1011]
G06F11/36B	. . [N: Software debugging] [N1011]
G06F11/36B2	. . . [N: by performing operations on the source code, e.g. via a compiler] [N1011]
G06F11/36B3	. . . [N: of optimised code (optimisation G06F9/45E3)] [N1011]
G06F11/36B4	. . . [N: of specific synchronisation aspects] [N1011]
G06F11/36B5	. . . [N: by tracing the execution of the program] [N1011]
G06F11/36B5B [N: tracing values on a bus] [N1011]
G06F11/36B6	. . . [N: by instrumenting at runtime (for security G06F21/00N3E2)] [N1012]
G06F11/36B7	. . . [N: using additional hardware] [N1011]
G06F11/36B7E [N: in-circuit-emulation [ICE] arrangements (emulators G06F11/26S2)] [N1011]
G06F11/36B7H [N: using a specific debug interface] [N1011]
G06F11/36B9	. . . [N: using diagnostics (G06F11/07P takes precedence)] [N1011]
G06F11/36E	. . [N: Environments for testing or debugging software] [N1011]
G06F11/36T	. . [N: Software testing (software testing in telephone exchanges H04M3/24A1 , testing of hardware G06F11/22)] [N1011]
G06F11/36T2	. . . [N: Test management] [N1011]
G06F11/36T2A [N: for coverage analysis] [N1011]
G06F11/36T2C [N: for test version control, e.g. updating test cases to a new software version] [N1011]
G06F11/36T2D [N: for test design, e.g. generating new test cases] [N1011]
G06F11/36T2E [N: for test execution, e.g. scheduling of test suites] [N1011]
G06F11/36T2R [N: for test results analysis] [N1011]
G06F11/36T4	. . . [N: Methods or tools to render software testable] [N1011]

G06F12/00 Accessing, addressing or allocating within memory systems or architectures ([N: digital input or output to record carriers, e.g. to disc storage units [G06F3/06](#); information storage in general [G11](#)] [C0405])

G06F12/02	. Addressing or allocation; Relocation (programme address sequencing G06F9/00 ; arrangements for selecting an address in a digital store G11C8/00)
G06F12/02B	. . [N: with multidimensional access, e.g. row/column, matrix]
G06F12/02C	. . [N: with look ahead addressing means]
G06F12/02D	. . [N: User address space allocation, e.g. contiguous or non contiguous base addressing]
G06F12/02D2	. . . [N: Free address space management] [C0205]
G06F12/02D2E [N: in non-volatile memory] [N0205] [C1112]
G06F12/02D2E2 [N: in block erasable memory, e.g. flash memory] [N0205]
G06F12/02D2G [N: Garbage collection, i.e. reclamation of unreferenced memory] [N0205]

G06F12/02D2G2	[N: using reference counting] [N0205]
G06F12/02D2G4	[N: Incremental or concurrent garbage collection, e.g. in real-time systems (G06F12/02D2G2 takes precedence)] [N0205]
G06F12/02D2G4G	[N: Generational garbage collection] [N0205]
G06F12/02D4	. . .	[N: Multiple user address space allocation, e.g. using different base addresses (interprocessor communication G06F15/163)] [M1112]
G06F12/02D6	. . .	[N: using tables or multilevel address translation means (G06F12/02D2 takes precedence; address translation in virtual memory systems G06F12/10)] [C1112]
G06F12/04	. .	Addressing variable-length words or parts of words
G06F12/06	. .	Addressing a physical block of locations, e.g. base addressing, module addressing, memory dedication (G06F12/08 takes precedence)
		[N: Note This group is limited to Module addressing or allocation; base addressing is classified in G06F12/02D .]
G06F12/06A	. . .	[N: Interleaved addressing]
G06F12/06C	. . .	[N: Address space extension]
G06F12/06C2	[N: for memory modules]
G06F12/06C4	[N: for I/O modules, e.g. memory mapped I/O (I/O protocol G06F13/42)]
G06F12/06D	. . .	[N: Combination of memories, e.g. ROM and RAM such as to permit replacement or supplementing of words in one module by words in another module (address formation of the next micro-instruction G06F9/26 ; masking faults in memories by using spares or by reconfiguring G11C29/70)] [M1112]
G06F12/06K	. . .	[N: Configuration or reconfiguration]
G06F12/06K2	[N: with centralised address assignment]
G06F12/06K2D	[N: and decentralised selection]
G06F12/06K4	[N: with decentralised address assignment]
G06F12/06K4P	[N: the address being position dependent]
G06F12/06K6	[N: with feedback, e.g. presence or absence of unit detected by addressing, overflow detection]
G06F12/06K8	[N: Multiconfiguration, e.g. local and global addressing]
G06F12/08	. .	in hierarchically structured memory systems, e.g. virtual memory systems
G06F12/08B	. . .	[N: Addressing of a memory level in which the access to the desired data or data block requires associative addressing means, e.g. cache]
G06F12/08B2	[N: with main memory updating (G06F12/08B4 takes precedence; see provisionally also G06F12/12)]
G06F12/08B4	[N: Multiuser, multiprocessor, multiprocessing cache systems]
G06F12/08B4J	[N: with cache invalidating means (G06F12/08B4P and subgroups take precedence)]
G06F12/08B4L	[N: with multilevel cache hierarchies]
G06F12/08B4N	[N: with a network or matrix configuration]
G06F12/08B4P	[N: Cache consistency protocols]
G06F12/08B4P2	[N: using directory methods] [C0004]
G06F12/08B4P2A	{7 dots} [N: Associative directories (G06F12/08B4P2C takes precedence)] [N0004]

G06F12/08B4P2C	{7 dots} [N: Copy directories (local copy tags for implementing a bus snooping protocol G06F12/08B4P4)] [N0004]
G06F12/08B4P2D	{7 dots} [N: Distributed directories, e.g. linked lists of caches] [N0004]
G06F12/08B4P2E	{7 dots} [N: Limited pointers directories; State-only directories without pointers] [N0004]
G06F12/08B4P2R	{7 dots} [N: with concurrent directory accessing, i.e. handling multiple concurrent coherency transactions] [N0004]
G06F12/08B4P4	[N: using a bus scheme (e.g. with bus monitoring or watching means)]
G06F12/08B4P4B	{7 dots} [N: in combination with broadcast means (e.g. for invalidation or updating)]
G06F12/08B4P4P	{7 dots} [N: for main memory peripheral accesses (e.g. I/O or DMA)]
G06F12/08B4P6	[N: with software control (e.g. non-cacheable data)]
G06F12/08B4S	[N: with a shared cache]
G06F12/08B4T	[N: for multiprocessing or multitasking]
G06F12/08B6	[N: Multiple simultaneous or quasi-simultaneous cache accessing]
G06F12/08B6M	[N: Cache with multiple tag or data arrays being simultaneously accessible]
G06F12/08B6M2	[N: Partitioned cache, e.g. separate instruction and operand caches]
G06F12/08B6M4	[N: Cache with interleaved addressing]
G06F12/08B6N	[N: Cache with multiport tag or data arrays]
G06F12/08B6P	[N: Overlapped cache accessing, e.g. pipeline (G06F12/08B6M takes precedence)]
G06F12/08B6P2	[N: by multiple requestors]
G06F12/08B6P4	[N: with reload from main memory]
G06F12/08B8	[N: with prefetch]
G06F12/08B10	[N: using pseudo-associative means, e.g. set-associative, hashing]
G06F12/08B12	[N: for peripheral storage systems, e.g. disk cache] [M1112]
G06F12/08B12B	[N: Data transfer between cache memory and other subsystems, e.g. storage devices or host systems] [N1112]
G06F12/08B12D	[N: Allocation and management of cache space] [N1112]
G06F12/08B12F	[N: Mapping of cache memory to specific storage devices or parts of a storage device] [N1112]
G06F12/08B14	[N: with dedicated cache, e.g. instruction or stack]
G06F12/08B16	[N: Cache access modes]
G06F12/08B16B	[N: Burst mode]
G06F12/08B16D	[N: Page mode]
G06F12/08B16F	[N: Parallel mode, e.g. in parallel with main memory or CPU]
G06F12/08B16V	[N: Variable-length word access (G06F12/08B6M4 takes precedence)]
G06F12/08B18	[N: using selective caching, e.g. bypass] [M1112]
G06F12/08B20	[N: using clearing, invalidating or resetting means]
G06F12/08B22	[N: Organization and technology of caches]
G06F12/08B22D	[N: of parts of caches, e.g. directory or tag array]
G06F12/08B22L	[N: with a plurality of cache hierarchy levels (G06F12/08B4L takes precedence)]

				precedence)]
G06F12/10	.	.	.	Address translation
G06F12/10D	.	.	.	[N: using page tables, e.g. page table structures] [N9804]
G06F12/10D2	.	.	.	[N: involving hashing techniques, e.g. inverted page tables] [N9804]
G06F12/10L	.	.	.	[N: using associative or pseudo-associative address translation means, e.g. translation look-aside buffer (TLB)] [M1112]
G06F12/10L2	.	.	.	[N: for multiple virtual address spaces, e.g. segmentation (G06F12/10L4 takes precedence)]
G06F12/10L4	.	.	.	[N: associated with a data cache]
G06F12/10L4P	.	.	.	[N: the data cache being concurrently physically addressed]
G06F12/10L4V	.	.	.	[N: the data cache being concurrently virtually addressed]
G06F12/10M	.	.	.	[N: Decentralised address translation, e.g. in distributed shared memory systems] [N9804]
G06F12/10P	.	.	.	[N: for peripheral access to main memory, e.g. DMA] [N9804] [M1112]
G06F12/10S	.	.	.	[N: for multiple virtual address spaces, e.g. segmentation] [N9804]
G06F12/12	.	.	.	Replacement control
G06F12/12B	.	.	.	[N: using a replacement algorithm]
G06F12/12B2	.	.	.	[N: of the least frequently used type, e.g. with individual count value]
G06F12/12B4	.	.	.	[N: with an age list, e.g. queue, MRU-LRU list]
G06F12/12B4B	.	.	.	[N: being minimized, e.g. non MRU]
G06F12/12B4C	.	.	.	[N: being generated by decoding an array or storage]
G06F12/12B6	.	.	.	[N: with special data handling, e.g. priority of data or instructions, pinning, errors]
G06F12/12B6B	.	.	.	[N: using an additional replacement algorithm]
G06F12/12B8	.	.	.	[N: adapted to multidimensional cache systems, e.g. set-associative, multicache, multiset or multilevel]
G06F12/14	.	.	.	Protection against unauthorised use of memory [N: or access to memory (security arrangements for protecting computers or computer systems against unauthorised activity G06F21/00 ; multiprogramming arrangements G06F9/46)] [C0311] [M1112]
G06F12/14B	.	.	.	[N: by using cryptography (for digital transmission H04L9/00)]
G06F12/14C	.	.	.	[N: by checking the object accessibility, e.g. type of access defined by the memory independently of subject rights (G06F12/14D takes precedence)]
G06F12/14C1	.	.	.	[N: the protection being physical, e.g. cell, word, block]
G06F12/14C1A	.	.	.	[N: for a module or a part of a module]
G06F12/14C1B	.	.	.	[N: for a range]
G06F12/14C2	.	.	.	[N: the protection being virtual, e.g. for virtual blocks or segments before a translation mechanism]
G06F12/14D	.	.	.	[N: by checking the subject access rights]
G06F12/14D1	.	.	.	[N: Key-lock mechanism]
G06F12/14D1A	.	.	.	[N: in a virtual system, e.g. with translation means]
G06F12/14D2	.	.	.	[N: using an access-table, e.g. matrix or list]
G06F12/14D3	.	.	.	[N: in a hierarchical protection system, e.g. privilege levels, memory rings]
G06F12/16	.	.	.	Protection against loss of memory contents [N: contains no material, see G06F11/00]
G06F13/00				Interconnection of, or transfer of information or other signals between, memories,

input/output devices or central processing units (interface circuits for specific input/output devices [G06F3/00](#); multiprocessor systems [G06F15/16](#); transmission of digital information in general [H04L](#); selecting [H04Q](#); [N: multiprogramme control therefor [G06F9/46](#)])

- G06F13/10 . Programme control for peripheral devices ([G06F13/14](#) to [G06F13/42](#) take precedence)
- G06F13/10D . . [N: where the programme performs an interfacing function, e.g. device driver ([G06F13/10E](#) takes precedence; scheduling within device drivers [G06F9/46C4S](#); contention policies within device drivers [G06F9/46R2](#))] [N9602] [C9809]
- G06F13/10E . . [N: where the programme performs an input/output emulation function [C9810]
- G06F13/10E2 . . . [N: Terminal emulation] [N9809]
- G06F13/12 . . using hardware independent of the central processor, e.g. channel or peripheral processor
- G06F13/12L . . . [N: where hardware performs an I/O function other than control of data transfer]
- G06F13/12P . . . [N: where hardware is a sequential transfer control unit, e.g. microprocessor, peripheral processor or state-machine]
- G06F13/12P2 [N: and has means for transferring I/O instructions and statuses between control unit and main processor]
- G06F13/12P4 [N: for dedicated transfers to a network (for protocol converters [G06F13/38A4](#))]
- G06F13/14 . Handling requests for interconnection or transfer
- G06F13/16 . . for access to memory bus ([G06F13/28](#) takes precedence)
- G06F13/16A . . . [N: based on arbitration (arbitration in handling access to a common bus or bus system [G06F13/36](#))] [N0404]
- G06F13/16A2 [N: with latency improvement] [N0404]
- G06F13/16A2C [N: using a concurrent pipeline structure] [N0404]
- G06F13/16A2M [N: by maintaining request order] [N0404]
- G06F13/16A2R [N: by reordering requests] [N0404]
- G06F13/16A2R2 [N: through address comparison] [N0404]
- G06F13/16A2S [N: using refresh] [N0404]
- G06F13/16A4 [N: with request queuing] [N0404]
- G06F13/16A6 [N: with interleaved bank access] [N0404]
- G06F13/16A8 [N: in a multiprocessor architecture (interprocessor communication using common memory [G06F15/167](#))] [N0404]
- G06F13/16A8M [N: Access to multiple memories] [N0404]
- G06F13/16A8S [N: Access to shared memory] [N0404]
- G06F13/16D [N: Details of memory controller] [N0404]
- G06F13/16D2 [N: using buffers] [N0404]
- G06F13/16D4 [N: using bus width] [N0404]
- G06F13/16D6 [N: using multiple buses] [N0404]
- G06F13/16D8 [N: Synchronisation and timing concerns (synchronisation on a memory bus [G06F13/42C3](#))] [N0404]
- G06F13/16D9 [N: Configuration of memory controller to different memory types] [N0404]
- G06F13/18 . . . based on priority control ([G06F13/16A](#) takes precedence) [C0404]

G06F13/20	. . .	for access to input/output bus
G06F13/22	. . .	using successive scanning, e.g. polling (G06F13/24 takes precedence)
G06F13/22B	[N: with priority control]
G06F13/24	. . .	using interrupt (G06F13/32 takes precedence)
G06F13/26	with priority control
G06F13/28	. . .	using burst mode transfer, e.g. direct memory access [N: DMA], cycle steal (G06F13/32 takes precedence)
G06F13/28C	[N: Cycle stealing DMA (G06F13/30 takes precedence)]
G06F13/28H	[N: Halt processor DMA (G06F13/30 takes precedence)]
G06F13/28M	[N: Multiplexed DMA (G06F13/30 takes precedence)]
G06F13/30	with priority control
G06F13/32	. . .	using combination of interrupt and burst mode transfer
G06F13/34	with priority control
G06F13/36	. . .	for access to common bus or bus system
G06F13/362	with centralised access control
G06F13/362B	[N: using a time dependent access]
G06F13/364	using independent requests or grants, e.g. using separated request and grant lines
G06F13/366	using a centralised polling arbiter
G06F13/368	with decentralised access control
G06F13/37	using a physical-position-dependent priority, e.g. daisy chain, round robin or token passing
G06F13/372	using a time-dependent priority, e.g. individually loaded time counters or time slot
G06F13/374	using a self-select method with individual priority code comparator
G06F13/376	using a contention resolving method, e.g. collision detection, collision avoidance
G06F13/378	using a parallel poll method
G06F13/38	. .	Information transfer, e.g. on bus (G06F13/14 takes precedence)
G06F13/38A	. .	[N: using universal interface adapter]
G06F13/38A2	. . .	[N: for adaptation of a particular data processing system to different peripheral devices]
G06F13/38A4	. . .	[N: for adaptation of different data processing systems to different peripheral devices, e.g. protocol converters for incompatible systems, open system]
G06F13/40	. .	Bus structure [N: (for computer networks G06F15/16B4 ; for optical bus networks H04B10/20)]
G06F13/40D	. . .	[N: Coupling between buses]
G06F13/40D1	[N: with data restructuring] [N0108]
G06F13/40D1R	[N: with data re-ordering, e.g. Endian conversion] [N0108]
G06F13/40D1W	[N: with data-width conversion] [N0108]
G06F13/40D2	[N: using switching circuits, e.g. switching matrix, connection or expansion network (G06F13/40D1 takes precedence)] [C0108]
G06F13/40D5	[N: using bus bridges (G06F13/40D2 takes precedence)] [N0008]
G06F13/40D5A	[N: with arbitration] [N0008]

G06F13/40D5A2	[N: and deadlock prevention] [N0008]
G06F13/40D5M	[N: with address mapping] [N0008]
G06F13/40D5R	[N: where the bus bridge performs an extender function] [N0008] [C0108]
G06F13/40D5S	[N: where the bridge performs a synchronising function] [N0008]
G06F13/40D5S2	[N: where the function is bus cycle extension, e.g. to meet the timing requirements of the target bus] [N0008]
G06F13/40D5S4	[N: where the synchronisation uses buffers, e.g. for speed matching between buses] [N0008]
G06F13/40E	[N: Device-to-bus coupling]
G06F13/40E2	[N: Electrical coupling]
G06F13/40E2B	[N: Drivers or receivers (G06F13/40E2T takes precedence; for multistate logic circuits H03K19/00E)] [C9802]
G06F13/40E2B2	[N: Precharging or discharging]
G06F13/40E2H	[N: Live connection to bus, e.g. hot-plugging (current or voltage limitation during live insertion H02H9/00C4)] [N9802]
G06F13/40E2T	[N: Bus impedance matching, e.g. termination] [N9802]
G06F13/40E4	[N: Mechanical coupling (Back panels H05K7/14G)]
G06F13/40E4S	[N: in incremental bus architectures, e.g. bus stacks] [N0108]
G06F13/42	. .	Bus transfer protocol, e.g. handshake; Synchronisation (synchronisation in transmission of digital information in general H04L7/00)
G06F13/42C	[N: on a parallel bus] [C9710]
G06F13/42C1	[N: being a system bus, e.g. VME bus, Futurebus, Multibus] [C9710]
G06F13/42C1A	[N: with asynchronous protocol]
G06F13/42C1S	[N: with synchronous protocol]
G06F13/42C2	[N: being an input/output bus, e.g. ISA bus, EISA bus, PCI bus, SCSI bus] [C9710]
G06F13/42C2A	[N: with asynchronous protocol]
G06F13/42C2S	[N: with synchronous protocol]
G06F13/42C3	[N: being a memory bus]
G06F13/42C3A	[N: with asynchronous protocol]
G06F13/42C3S	[N: with synchronous protocol]
G06F13/42D	[N: on a daisy chain bus] [N9710]
G06F13/42D2	[N: using a handshaking protocol] [N9710]
G06F13/42D4	[N: using a clocked protocol] [N9710]
G06F13/42D6	[N: using an embedded synchronisation, e.g. Firewire bus, Fibre Channel bus, SSA bus] [N9710]
G06F13/42P	[N: on a point to point bus (G06F13/42D , G06F13/42S take precedence)] [N9710] [C9804]
G06F13/42P2	[N: using a handshaking protocol, e.g. Centronics connection] [N9710] [C9804]
G06F13/42P4	[N: using a clocked protocol] [N9710]
G06F13/42P6	[N: using an embedded synchronisation] [N9710]
G06F13/42S	[N: on a serial bus, e.g. I2C bus, SPI bus (on daisy chain buses G06F13/42D)] [N9710]
G06F13/42S2	[N: using a handshaking protocol, e.g. RS232C link] [N9710] [C9804]

G06F13/42S4 [N: using a clocked protocol] [N9710]
G06F13/42S6 [N: using an embedded synchronisation] [N9710]
G06F15/00	Digital computers in general (details G06F1/00 to G06F13/00); Data processing equipment in general (neural networks for image data processing G06T) [C9705]
G06F15/02	. manually operated with input through keyboard and computation using a built-in programme, e.g. pocket calculators
G06F15/02B	. . [N: for combination with other devices having a different main function, e.g. watches, pens]
G06F15/02C	. . [N: Constructional details or arrangements]
G06F15/02D	. . [N: User interface arrangements, e.g. keyboard, display; Interfaces to other computer systems]
G06F15/02D1	. . . [N: with printing provisions]
G06F15/02E	. . [N: of the IC-card-like type]
G06F15/02S	. . [N: adapted to a specific application]
G06F15/02S1	. . . [N: for unit conversion]
G06F15/02S2	. . . [N: for time management, e.g. calendars, diaries]
G06F15/02S3	. . . [N: for measuring]
G06F15/02S4	. . . [N: for data storage and retrieval]
G06F15/02S5	. . . [N: for reading, e.g. e-books (constructional details of portable computers G06F1/16P)] [N1204]
G06F15/04	. programmed simultaneously with the introduction of data to be processed, e.g. on the same record carrier
G06F15/08	. using a plugboard for programming
G06F15/10	. . Tabulators
G06F15/12	. . . having provision for both printed and punched output
G06F15/14	. . Calculating-punches
G06F15/16	. Combinations of two or more digital computers each having at least an arithmetic unit, a programme unit and a register, e.g. for a simultaneous processing of several programmes [N: (coordinating programme control therefor G06F9/44P ; in regulating and control system G05B)]
G06F15/16D	. . [N: Computing infrastructure, e.g. computer clusters, blade chassis or hardware partitioning (casings, cabinets, racks or drawers for data centers H05K5/14S)] [M1112]
G06F15/163	. . Interprocessor communication [N9807]
G06F15/167	. . . using a common memory, e.g. mailbox (memory protection G06F12/14 ; memory access priority G06F13/18) [N9807]
G06F15/17	. . . using an input/output type connection, e.g. channel, I/O port [N9807]
G06F15/173	. . . using an interconnection network, e.g. matrix, shuffle, pyramid, star, snowflake (interface switching circuits G06F13/40) [N9807]
G06F15/173C [N: Intercommunication techniques] [N1112]
G06F15/173C2 [N: Routing techniques specific to parallel machines, e.g. wormhole, store and forward, shortest path problem congestion (routing on a LAN H04L12/56C)] [N1112]

G06F15/173C4	[N: Parallel communications techniques, e.g. gather, scatter, reduce, roadcast, multicast, all to all] [N1112]
G06F15/173C6	[N: Synchronisation; Hardware support therefor (intertask synchronisation G06F9/52)] [N1112]
G06F15/173C8	[N: Distributed shared memory [DSM], e.g. remote direct memory access [RDMA]] [N1112]
G06F15/173D	[N: Direct connection machines, e.g. completely connected computers, point to point communication networks (coupling between buses G06F13/40D)] [N9807] [M1112]
G06F15/173D2	[N: wherein the interconnection is dynamically configurable, e.g. having loosely coupled nearest neighbor architecture (reconfigurable processors arrays G06F15/78R)] [N9807] [M1112]
G06F15/173H	[N: Network adapters, e.g. SCI, Myrinet (protocol engines H04L29/06G)] [N1112]
G06F15/173N	[N: Indirect interconnection networks] [N9807]
G06F15/173N2	[N: hierarchical topologies] [N1112]
G06F15/173N4	[N: non hierarchical topologies] [N9807] [M1112]
G06F15/173N4A	[N: One dimensional, e.g. linear array, ring] [N1112]
G06F15/173N4D	[N: Two dimensional, e.g. mesh, torus] [N9807] [M1112]
G06F15/173N4H	[N: Three dimensional, e.g. hypercubes] [N1112]
G06F15/173N4M	[N: having multistage networks, e.g. broadcasting scattering, gathering, hot spot contention, combining/decombining] [N9807]
G06F15/177	. .	[N: Initialisation or configuration control (processor initialisation G06F9/445B2)] [N9807] [M1112]
G06F15/18	. .	in which a programme is changed according to experience gained by the computer itself during a complete run; Learning machines (adaptive control systems G05B13/00) [N: not used, see G06N1/00L] [C0804]
G06F15/76	. .	Architectures of general purpose stored programme computers (with programme plugboard G06F15/08 ; multicomputers G06F15/16 , general purpose image data processing G06T1/00) [C9511]
G06F15/78	. .	comprising a single central processing unit
G06F15/78B	. . .	[N: System on board, i.e. computer system on one or more PCB, e.g. motherboards, daughterboards or blades] [N1112]
G06F15/78C	. . .	[N: System on chip, i.e. computer system on a single chip; System in package, i.e. computer system on one or more chips in a single package] [N1112]
G06F15/78C2	[N: On-chip cache; Off-chip memory] [N1112]
G06F15/78C4	[N: Specially adapted for real time processing, e.g. comprising hardware timers] [N1112]
G06F15/78C6	[N: Specially adapted for signal processing, e.g. Harvard architectures] [N1112]
G06F15/78C8	[N: Tightly coupled to memory, e.g. computational memory, smart memory, processor in memory] [N1112]
G06F15/78C10	[N: Globally asynchronous, locally synchronous, e.g. network on chip] [N1112]
G06F15/78M	. . .	[N: without memory] [C9511]
G06F15/78M1	[N: on one IC chip (single chip microprocessors)]
G06F15/78M2	[N: on more than one IC chip]

G06F15/78P	. . . [N: with memory] [C9511]
G06F15/78P1 [N: on one IC chip (single chip microcontrollers)]
G06F15/78P1C [N: On-chip cache and off-chip main memory [N9511]
G06F15/78P1D [N: with decentralized control, e.g. smart memories] [N9511]
G06F15/78P1E [N: including a ROM] [N9511]
G06F15/78P1N [N: using interleaved memory (addressing G06F12/06A)] [N9511]
G06F15/78P1S [N: using a single memory module] [N9511]
G06F15/78P2 [N: on more than one IC chip]
G06F15/78R [N: with reconfigurable architecture] [N9511]
G06F15/78R2 [N: Reconfiguration support, e.g. configuration loading, configuration switching, or hardware OS] [N1112]
G06F15/78R2M [N: for multiple contexts] [N1112]
G06F15/78R2P [N: for pipeline reconfiguration] [N1112]
G06F15/78R2S [N: for self reconfiguration] [N1112]
G06F15/78R4 [N: Runtime interface, e.g. data exchange, runtime control] [N1112]
G06F15/78R4C [N: Reconfigurable logic implemented as a co-processor (instruction execution using a coprocessor G06F9/38S)] [N1112]
G06F15/78R4E [N: Reconfigurable logic embedded in CPU, e.g. reconfigurable unit] [N1112]
G06F15/78S [N: Modular architectures, e.g. assembled from a number of identical packages] [M1112]
G06F15/80	. . . comprising an array of processing units with common control, e.g. single instruction multiple data processors (G06F15/82 takes precedence; [N: for correlation function computation G06F17/15C]) [C9710]
G06F15/80A [N: single instruction multiple data [SIMD] multiprocessors] [M1112]
G06F15/80A1 [N: One dimensional arrays, e.g. rings, linear arrays, buses] [M1112]
G06F15/80A2 [N: Two dimensional arrays, e.g. mesh, torus] [M1112]
G06F15/80A3 [N: Three-dimensional arrays or hypercubes]
G06F15/80C [N: Associative processors]
G06F15/80S [N: Systolic arrays] [N1112]
G06F15/80V [N: Vector processors] [N1112]
G06F15/80V2 [N: Details on data memory access] [N1112]
G06F15/80V2C [N: using a cache] [N1112]
G06F15/80V4 [N: Details on data register access] [N1112]
G06F15/80V4S [N: Special arrangements thereof, e.g. mask or switch] [N1112]
G06F15/80V6 [N: Array of vector units] [N1112]
G06F15/82	. . . data or demand driven
G06F15/82D [N: Dataflow computers] [M1112]

G06F17/00 Digital computing or data processing equipment or methods, specially adapted for specific functions [N9409]

G06F17/10	. . . Complex mathematical operations [N: (function generation by table look-up G06F1/03 ; evaluation of elementary functions by calculation G06F7/544)] [N9710] [C1207]
G06F17/11	. . . for solving equations [N: , e.g. nonlinear equations, general mathematical

- optimization problems (optimization specially adapted for a specific administrative, business or logistic context [G06Q10/04](#)) [N9710] [C1207]
- G06F17/12 . . . Simultaneous equations [N: , e.g. systems of linear equations] [N9710] [C1207]
- G06F17/13 . . . Differential equations (using digital differential analysers [G06F7/64](#)) [N9710]
- G06F17/14 . . Fourier, Walsh or analogous domain transformations, [N: e.g. Laplace, Hilbert, Karhunen-Loeve, transforms (for correlation function computation [G06F17/15P](#); spectrum analysers [G01R23/16](#))] [N9710] [C1207]
- G06F17/14F . . . [N: Discrete Fourier transforms] [N9710] [C1207]
- G06F17/14F2 [N: Fast Fourier transforms, e.g. using a Cooley-Tukey type algorithm] [N9710]
- G06F17/14F4 [N: Prime factor Fourier transforms, e.g. Winograd transforms, number theoretic transforms] [N9710] [C1207]
- G06F17/14H . . . [N: Square transforms, e.g. Hadamard, Walsh, Haar, Hough, Slant transforms] [N9710]
- G06F17/14M . . . [N: Discrete orthonormal transforms, e.g. discrete cosine transform, discrete sine transform, and variations therefrom, e.g. modified discrete cosine transform, integer transforms approximating the discrete cosine transform ([G06F17/14H](#) takes precedence)] [N9710]
- G06F17/14W . . . [N: Wavelet transforms] [N9710]
- G06F17/15 . . Correlation function computation [N: including computation of convolution operations (arithmetic circuits for sum of products per se, e.g. multiply-accumulators [G06F7/544A](#); digital filters, e.g. FIR, IIR, adaptive filters [H03H17/00](#))] [N9710] [C1207]
- G06F17/15M . . . [N: Multidimensional correlation or convolution] [N9710] [C1207]
- G06F17/15P . . . [N: using a domain transform, e.g. Fourier transform, polynomial transform, number theoretic transform] [N9710] [C1207]
- G06F17/16 . . Matrix or vector computation, [N: e.g. matrix-matrix or matrix-vector multiplication, matrix factorization (matrix transposition [G06F7/78](#))] [N9710] [C1207]
- G06F17/17 . . Function evaluation by approximation methods, e.g. inter- or extrapolation, smoothing, least mean square method ([N: [G06F17/18](#) takes precedence]; interpolation for numerical control [G05B19/18](#)) [N9710]
- G06F17/17M . . . [N: of multidimensional data] [N9710]
- G06F17/18 . . for evaluating statistical data, [N: e.g. average values, frequency distributions, probability functions, regression analysis (forecasting specially adapted for a specific administrative, business or logistic context [G06Q10/04](#))] [N9710] [C1207]
- G06F17/20 . Handling natural language data (speech analysis or synthesis [G10L](#)) [N9409]
- G06F17/21 . . Text processing ([G06F17/27](#), [G06F17/28](#) take precedence; systems for composing machines [B41B27/00](#)) [N9409]
- G06F17/21F . . . [N: Formatting, i.e. changing of presentation of document ([G06F17/25](#), [G06F17/26](#) take precedence)] [N9409]
- G06F17/21F2 [N: Display of layout of document; Preview] [N9409] [C0506]
- G06F17/21F4 [N: Font handling; Temporal and kinetic typography] [N9409] [C0810]
- G06F17/21F6 [N: Mathematical or scientific, subscripts, superscripts] [N9409]
- G06F17/21F7 [N: Pagination] [N9409]
- G06F17/21F8 [N: Tagging; Marking up (details of markup languages [G06F17/22](#)); Designating a block; Setting of attributes (style sheets, e.g. eXtensible Stylesheet Language Transformation (XSL-T) [G06F17/22T2](#))] [N9409] [C0506]

G06F17/22	. . .	Manipulating or registering by use of codes, e.g. in sequence of text characters [N: (compression H03M7/30)] [N9409] [C0506]
G06F17/22C	[N: Storage facilities] [N9409]
G06F17/22D	[N: Calculation of differences between files] [N0506]
G06F17/22E	[N: Character encodings] [N0506]
G06F17/22E2	[N: Handling non-latin characters, e.g. kana-to-kanji conversion] [N0506]
G06F17/22F	[N: Fragmentation of text-files, e.g. reusable text-blocks, including linking to the fragments, XInclude, Namespaces] [N0506]
G06F17/22H	[N: Hyperlinking (information retrieval based on hyperlinks G06F17/30G4)] [N0912]
G06F17/22L	[N: Hierarchical processing, e.g. outlines] [N0506]
G06F17/22M	[N: Tree structured documents; Markup, e.g. Standard Generalized Markup Language (SGML), Document Type Definition (DTD) (validation and parsing G06F17/27A ; data retrieval G06F17/30 ; coding and compression H03M7/30)] [N0506]
G06F17/22R	[N: Coding or compression of tree-structured data (coding and compression in general H03M7/30)] [N0912]
G06F17/22S	[N: Adaptation of the text data for streaming purposes, e.g. XStream] [N0506]
G06F17/22T	[N: Transformation] [N0506]
G06F17/22T2	[N: Tree transformation for tree-structured or markup documents, e.g. eXtensible Stylesheet Language Transformation (XSL-T) stylesheets, Omnimark, Balise] [N0506]
G06F17/22T4	[N: using dictionaries or tables] [N0506]
G06F17/22T6	[N: Automatic learning of transformation rules, e.g. by example] [N0506]
G06F17/22V	[N: Version control] [N0506]
G06F17/22W	[N: Handling of whitespace] [N0506]
G06F17/24	. . .	Editing, e.g. insert/delete [N: (G06F17/22 takes precedence)] [N9409] [C0506]
G06F17/24A	[N: Annotation, e.g. comment data, footnotes] [N9409]
G06F17/24D	[N: by use of digital ink] [N0310]
G06F17/24F	[N: Form filling; Merging, e.g. graphical processing of form or text] [N9409] [C9801]
G06F17/24R	[N: Tables; Ruled lines] [N9409]
G06F17/24S	[N: Spreadsheets (relational data bases G06F17/30R ; form-filling G06F17/24F)] [N0307]
G06F17/24T	[N: Tabulation, e.g. one dimensional positioning] [N9409]
G06F17/24V	[N: Templates] [N0506]
G06F17/25	. . .	Automatic justification [N9409]
G06F17/26	. . .	Automatic hyphenation [N9409]
G06F17/27	. .	Automatic analysis, e.g. parsing [N: (speech recognition, analysis or synthesis G10L)] [N9409] [C0506]
G06F17/27A	. . .	[N: Parsing] [N0506]
G06F17/27A2	[N: Syntactic parsing, e.g. based on context-free grammar (CFG), unification grammars] [N0506]
G06F17/27A4	[N: Statistical methods] [N0506]
G06F17/27A6	[N: Parsing markup language streams (streaming G06F17/22S)] [N0506]

G06F17/27A8 [N: Validation] [N0506]
G06F17/27C	. . . [N: Orthographic correction, e.g. spelling checkers, vowelisation] [N9409] [C0506]

G06F17/30S4F5	[N: Query predicate definition using graphical user interfaces, including menus and forms (G06F17/30S4F1 takes precedence)] [N0704]
G06F17/30S4F7	[N: Natural language query formulation (natural language analysis, translation, semantics G06F17/27, G06F17/28)] [N0704]
G06F17/30S4F9	[N: Query languages] [N0704]
G06F17/30S4F9A	[N: Active constructs] [N0704]
G06F17/30S4F9E	[N: Embedded query languages] [N0704]
G06F17/30S4F9G	[N: Grouping and aggregation] [N0704]
G06F17/30S4F9P	[N: Stored procedures] [N0704]
G06F17/30S4F9R	[N: Data retrieval commands; view definitions] [N0704]
G06F17/30S4F9X	[N: for particular applications; for extensibility, e.g. user defined types] [N0704] [M1207]
G06F17/30S4P	[N: Query processing] [N0704]
G06F17/30S4P2	[N: Query translation] [N0704]
G06F17/30S4P2N	[N: Translation of natural language queries to structured queries (natural language analysis, translation, semantics G06F17/27, G06F17/28)] [N0704]
G06F17/30S4P2P	[N: Access plan code generation and invalidation; reuse of access plans] [N0704]
G06F17/30S4P2R	[N: Internal representations for queries] [N0704]
G06F17/30S4P2S	[N: Standardisation and Simplification] [N0704]
G06F17/30S4P3	[N: Query optimisation] [N0704]
G06F17/30S4P3P	[N: for parallel queries] [N0704]
G06F17/30S4P3T	[N: Query rewriting and transformation] [N0704]
G06F17/30S4P3T1	{7 dots} [N: of sub-queries or views] [N0704]
G06F17/30S4P3T2	{7 dots} [N: of operators] [N0704]
G06F17/30S4P3T3	{7 dots} [N: to use cached/materialised query results] [N0704]
G06F17/30S4P3T4	{7 dots} [N: Optimising common expressions] [N0704]
G06F17/30S4P3T5	{7 dots} [N: Plan optimisation] [N0704]

G06F17/30S4P3T5J	{8 dots} [N: Join order optimisation] [N0704]
G06F17/30S4P3T5S	{8 dots} [N: Selectivity estimation or determination] [N0704]
G06F17/30S4P3T6	{7 dots} [N: Optimisations to support specific applications; extensibility of optimisers] [N0704]
G06F17/30S4P3T7	{7 dots} [N: Run-time optimisation] [N0704]
G06F17/30S4P4	[N: Query execution] [N0704]
G06F17/30S4P4C	[N: Database cache management] [N0704]
G06F17/30S4P4P	[N: of query operations] [N0704]
G06F17/30S4P4P1	{7 dots} [N: Unary operations; data partitioning operations] [N0704]
G06F17/30S4P4P1A	{8 dots} [N: Aggregation and duplicate elimination] [N0704]
G06F17/30S4P4P1D	{8 dots} [N: Efficient disk access during query execution] [N0704]
G06F17/30S4P4P3	{7 dots} [N: Binary matching operations] [N0704]
G06F17/30S4P4P3J	{8 dots} [N: Join operations] [N0704]
G06F17/30S4P4P7	{7 dots} [N: Intermediate data storage techniques for performance improvement] [N0704]
G06F17/30S4P4P9	{7 dots} [N: Pointer and reference processing operations] [N0704]
G06F17/30S4P4R	[N: Applying rules; deductive queries] [N0704]
G06F17/30S4P4R1	{7 dots} [N: Triggers and constraints] [N0704]
G06F17/30S4P4R3	{7 dots} [N: Recursive queries] [N0704]
G06F17/30S4P4S	[N: Data stream processing; continuous queries] [N0704]
G06F17/30S4P6	[N: Query processing with adaptation to specific hardware, e.g. adapted for using GPUs or SSDs] [N1205]
G06F17/30S4P7	[N: Query processing with adaptation to user needs] [N0704]
G06F17/30S4P7A	[N: using data annotations (user-defined metadata)] [N0704]
G06F17/30S4P7C	[N: using context] [N0704]
G06F17/30S4P7R	[N: using ranking] [N0704]
G06F17/30S4P8	[N: Other types of queries] [N0704]
G06F17/30S4P8A	[N: Approximate and statistical query processing] [N0704]
G06F17/30S4P8D	[N: Query processing support for facilitating data mining operations in structured databases] [N0704]
G06F17/30S4P8F	[N: Fuzzy query processing] [N0704]
G06F17/30S4P8N	[N: Distributed queries] [N1205]
G06F17/30S4P8Q	[N: Querying sequence data, e.g. querying versioned data] [N0704] [M1207]
G06F17/30S4P8T	[N: Querying temporal data] [N0704]
G06F17/30S4V	[N: Query result display and visualisation] [N0704]
G06F17/30S5	[N: Details of integrating or interfacing systems involving at least one database management system] [N1205]
G06F17/30S5C	[N: between a Database Management System and a front-end application] [N1205]
G06F17/30S5E	[N: Details for extract, transform and load [ETL] procedures, e.g. ETL data flows in data warehouses] [N1205]
G06F17/30S5F	[N: in federated and virtual databases (distributed queries G06F17/30S4P8N)] [N1205]

G06F17/30S5V	[N: Details of data format conversion from or to a database] [N1205]
G06F17/30S6	. . .	[N: Visual data mining and browsing structured data] [N0704] [M1207]
G06F17/30S7	. . .	[N: Replication, distribution or synchronisation of data between databases or within a distributed database; Distributed database system architectures therefor] [N1205]
G06F17/30S7A	[N: Details of asynchronous replication and data reconciliation] [N1205]
G06F17/30S7L	[N: Details of synchronous replication] [N1205]
G06F17/30S7P	[N: Details of data partitioning, e.g. horizontal or vertical partitioning] [N1205]
G06F17/30S8	. . .	[N: Details of specialised database models] [N0704] [M1207]
G06F17/30S8H	[N: Hierarchical databases, e.g. IMS, LDAP data stores, Lotus Notes] [N1205]
G06F17/30S8M	[N: Multi-dimensional databases and data warehouses, e.g. MOLAP, ROLAP] [N0704] [M1207]
G06F17/30S8R	[N: Relational databases] [N0704]
G06F17/30S8R1	[N: Clustering or classification (for textual data G06F17/30T4)] [N0704]
G06F17/30S8R1V	[N: including cluster or class visualization or browsing (for textual data G06F17/30T4V)] [N0704]
G06F17/30S8R2	[N: Entity relationship models] [N0704]
G06F17/30S8T	[N: Object oriented databases] [N0704]
G06F17/30T	. .	[N: of unstructured textual data (document management systems G06F17/30D)] [N9507] [C0606]
G06F17/30T1	. . .	[N: Indexing] [N0508] [C0606]
G06F17/30T1E	[N: Selection or weighting of terms for indexing (G06F17/30T2P2E takes precedence; for summarization G06F17/30T5S)] [N0508]
G06F17/30T1P	[N: indexing structures (indexing structures for structured data stores G06F17/30S2P)] [N0606] [C1202]
G06F17/30T1P1	[N: Inverted lists] [N0606]
G06F17/30T1P3	[N: Trees] [N0606]
G06F17/30T1P5	[N: Hash tables] [N0606]
G06F17/30T1P9	[N: Index managing details] [N0606]
G06F17/30T2	. . .	[N: Querying] [N0606]
G06F17/30T2F	[N: Query formulation] [N0606]
G06F17/30T2F1	[N: using system suggestions (G06F17/30T2F2 takes precedence)] [N0606]
G06F17/30T2F1V	[N: using document space presentation or visualization, e.g. category, hierarchy or range presentation and selection] [N0606]
G06F17/30T2F2	[N: reformulation based on results of preceding query] [N0606]
G06F17/30T2F2R	[N: using relevance feedback from the user, e.g. relevance feedback on documents, documents sets, document terms or passages] [N0606]
G06F17/30T2F2R1	{7 dots} [N: using graphical result space presentation or visualisation] [N0606]
G06F17/30T2F4	[N: Natural language query formulation or dialogue systems] [N0606]
G06F17/30T2P	[N: Query processing] [N0606]
G06F17/30T2P2	[N: Query translation] [N0606]
G06F17/30T2P2E	[N: Selection or weighting of terms from queries, including natural

		language queries] [N0606]
G06F17/30T2P2S	[N: Syntactic pre-processing steps, e.g. stopword elimination, stemming (lexical analysis G06F9/45A)] [N0606]
G06F17/30T2P2T	[N: Translation of the query language, e.g. Chinese to English (language translation G06F17/28)] [N0606]
G06F17/30T2P2X	[N: Query expansion] [N0606]
G06F17/30T2P4	[N: Query execution (G06F17/30T3 takes precedence)] [N0606]
G06F17/30T2P4B	[N: using boolean model] [N0606]
G06F17/30T2P4F	[N: using phonetics] [N0606]
G06F17/30T2P4N	[N: using natural language analysis] [N0606]
G06F17/30T2P4P	[N: using probabilistic model] [N0606]
G06F17/30T2P4V	[N: using vector based model] [N0606]
G06F17/30T2P9	[N: Reuse of stored results of previous queries (for formulation of new queries G06F17/30T2F2)] [N0606]
G06F17/30T2V	[N: Presentation or visualization of query results (G06F17/30T2F2R1 takes precedence; browsing or visualization of document space G06F17/30T5)] [N0606]
G06F17/30T3	[N: Filtering based on additional data, e.g. user or group profiles (filtering in web context G06F17/30W1F)] [C0606]
G06F17/30T3L	[N: Profile generation, learning or modification] [C0606]
G06F17/30T4	[N: Clustering or classification (manual classification G06F17/30T6)] [N0606]
G06F17/30T4C	[N: into predefined classes] [N0606]
G06F17/30T4M	[N: including class or cluster creation or modification] [N0606]
G06F17/30T4V	[N: including cluster or class visualization or browsing] [N0606]
G06F17/30T5	[N: Browsing or visualization] [N0508] [C0606]
G06F17/30T5S	[N: Summarization for human users] [N0606]
G06F17/30T6	[N: based on associated metadata or manual classification, e.g. bibliographic data] [N0606]
G06F17/30T6A	[N: using identifiers, e.g. barcodes, RFIDs (for URLs G06F17/30W5B)] [N0606]
G06F17/30T6C	[N: using citations (hypermedia G06F17/30G4)] [N0606]
G06F17/30T8	[N: Creation of semantic tools] [N0508] [C0606]
G06F17/30T8G	[N: Ontology] [N0606]
G06F17/30T8T	[N: Thesaurus] [N0606]
G06F17/30U	[N: Audio data retrieval (retrieval of video data G06F17/30V; retrieval of multimedia data G06F17/30E; general determination or detection of speech characteristics G10L11; speech recognition G10L15; speaker recognition G10L17; electrophonic musical instruments G10H; editing or indexing of data stored based on relative movement between record carrier and transducer G11B27)] [N0606] [C1205]
		[N: WARNING [N1205] Groups G06F17/30U1 - G06F17/30U9 are not complete pending reclassification. See also G06F17/30U]
G06F17/30U1	[N: using features automatically derived from the audio content, e.g. descriptors, fingerprints, signatures, MEP-cepstral coefficients, musical score, tempo (content oriented musical parameter indexing, e.g. tempo G10H; determination or detection of speech characteristics G10L11; audio watermarking, e.g. by

			inserting fingerprints G10L19/00W; indexing by using information signals detectable on the record carrier and recorded by the same method as the main recording G11B27/28)] [N1204]
G06F17/30U1T	.	.	[N: using automatically derived transcript of audio data, e.g. lyrics (speech recognition G10L15)] [N1204]
G06F17/30U2	.	.	[N: using information manually generated or using information not derived from the audio data, e.g. title and artist information, time and location information, usage information, user ratings (programmed access in sequence to addressed parts of tracks of operating discs G11B27/10A1)] [N1204]
G06F17/30U2M	.	.	[N: using information manually generated, e.g. tags, keywords, comments, title or artist information, time, location or usage information, user ratings] [N1204]
G06F17/30U3	.	.	[N: Query formulation specially adapted for audio data retrieval] [N1204]
G06F17/30U3E	.	.	[N: Query by example, e.g. query by humming] [N1204]
G06F17/30U3F	.	.	[N: Filtering; personalisation, e.g. querying making use of user profiles] [N1204]
G06F17/30U3F1	.	.	[N: by using biological or physiological data] [N1204]
G06F17/30U3F2	.	.	[N: Administration of user profiles, e.g. generation, initialization, adaptation, distribution] [N1204]
G06F17/30U4	.	.	[N: Presentation of query results (menu, index or table of content presentation of record carriers G11B27/32, G11B27/34)] [N1204]
G06F17/30U4P	.	.	[N: making use of playlists] [N1204]
G06F17/30U5	.	.	[N: Browsing (generation of a list or set of audio data G06F17/30U4R; trick modes G11B27/00V; browsing through audio recorded on operating discs G11B27/10A1)] [N1204]
G06F17/30U9	.	.	[N: Audio database index structures and management thereof] [N1204]
G06F17/30V	.	.	[N: of video data (recognising patterns G06K9/00; image analysis G06T7/00; editing or indexing information signals on a record carrier in which information is recorded and accessed based on relative movement between record carrier and transducer G11B27/00; source coding or decoding of digital video signal H04N7/26; selective content distribution, e.g. interactive television, video on demand H04N21/00)] [N1204]
G06F17/30V1	.	.	[N: using features automatically derived from the video content, e.g. descriptors, fingerprints, signatures, genre (recognising video content G06K9/00V3; extraction of features or characteristics for pattern recognition of the image G06K9/46)] [N1204]
G06F17/30V1A	.	.	[N: using audio features (general determination or detection of speech characteristics G10L11/00; speech recognition G10L15/00; speaker recognition G10L17/00; contents oriented musical parameter indexing, e.g. tempo G10H)] [N1204]
G06F17/30V1R	.	.	[N: using objects detected or recognised in the video content (methods for image acquisition of a pattern to be recognized involving target detection G06K9/32R1)] [N1204]
G06F17/30V1R1	.	.	[N: the detected or recognised objects being people (face recognition G06K9/00F; human body recognition G06K9/00H1; speaker recognition G10L17/00)] [N1204]
G06F17/30V1T	.	.	[N: using original textual content or text extracted from visual content or transcript of audio data (extraction of overlay text G06K9/32R1T2)] [N1204]
G06F17/30V1V	.	.	[N: using low-level visual features of the video content (methods for preprocessing an image in order to extract features of a pattern to be recognized G06K9/46; image processing involving image features extraction in general G06T)] [N1204]

G06F17/30V1V1	[N: using colour or luminescence (colour analysis on image data G06T7/40C)] [N1204]
G06F17/30V1V2	[N: using shape (G06F17/30V1R takes precedence; segmentation or edge detection on image data G06T7/00S; analysis of geometric attributes on image data G06T7/60)] [N1204]
G06F17/30V1V3	[N: using texture (G06F17/30V1R takes precedence; texture analysis on image data G06T7/40A, G06T7/40B)] [N1204]
G06F17/30V1V4	[N: using motion, e.g. object motion, camera motion (motion analysis on image data G06T7/20)] [N1204]
G06F17/30V1V5	[N: using domain-transform features, e.g. DCT, wavelet transform coefficients] [N1204]
G06F17/30V2	. . .	[N: using information manually generated or using information not derived from the video content, e.g. time and location information, usage information, user ratings] [N1204]
G06F17/30V2M	[N: using information manually generated, e.g. tags, keywords, comments, title and artist information, manually generated time, location and usage information, user ratings] [N1204]
G06F17/30V3	. . .	[N: Query formulation and processing specifically adapted for the retrieval of video data] [N1204]
G06F17/30V3E	[N: Query by example, e.g. a complete video frame or video sequence (graphical querying G06F17/30V3G)] [N1204]
G06F17/30V3F	[N: Filtering and personalisation; User profiles] [N1204]
G06F17/30V3G	[N: Graphical querying, e.g. query-by-region, query-by-sketch, query-by-trajectory, GUIs for designating a person/face/object as a query predicate (end-user interface involving hot spots associated with the video H04N21/4725; end-user interface for selecting a Region of Interest H04N21/4728)] [N1204]
G06F17/30V3L	[N: Query language or query format] [N1204]
G06F17/30V4	. . .	[N: Query results presentation or summarisation specifically adapted for the retrieval of video data (end-user interface for requesting or interacting with video content, e.g. video on demand interface or electronic program guide H04N21/472)] [N1204]
G06F17/30V4R	[N: Presentation of query results (G06F17/30V4S takes precedence; browsing a video collection G06F17/30V5C)] [N1204]
G06F17/30V4S	[N: Presentation in form of a video summary, e.g. the video summary being a video sequence, a composite still image or having synthesized frames] [N1204]
G06F17/30V5	. . .	[N: Browsing of video data (end-user interface for requesting or interacting with video content, e.g. video on demand interface or electronic program guide H04N21/472; indicating arrangements in the context of indexing and addressing recorded information G11B27/34)] [N1204]
G06F17/30V5C	[N: Browsing a collection of video files or sequences] [N1204]
G06F17/30V5D	[N: Browsing the internal structure of a single video sequence] [N1204]
G06F17/30V5H	[N: Hypervideo (linking data to content, e.g. by linking an URL to a video object in the context of video distribution systems H04N21/858)] [N1204]
G06F17/30V9	. . .	[N: Video database index structures or management thereof (table of contents on a record carrier G11B27/32D)] [N1204]
G06F17/30W	. .	[N: Retrieval from the Internet, e.g. browsers (internet protocol H04L29/06J)] [N0110]
G06F17/30W1	. . .	[N: by querying, e.g. search engines or meta-search engines, crawling techniques, push systems] [N0110]

G06F17/30W1F	[N: with filtering and personalisation] [N0110]
G06F17/30W1S	[N: Spatially dependent indexing and retrieval, e.g. location dependent results to queries] [N0110]
G06F17/30W3	. . .	[N: by navigation, e.g. using categorized browsing, portals, synchronized browsing, visual networks of documents, virtual worlds or tours] [N0110]
G06F17/30W5	. . .	[N: by using information identifiers, e.g. encoding URL in specific indicia, browsing history] [N0110]
G06F17/30W5B	[N: by using bar codes] [N0110]
G06F17/30W5H	[N: details of hyperlinks; management of linked annotations] [N1202]
G06F17/30W5K	[N: Bookmark management] [N0110]
G06F17/30W5L	[N: URL specific, e.g. using aliases, detecting broken or misspelled links (address allocation to terminals or nodes connected to a network H04L29/12A)] [N0110]
G06F17/30W7	. . .	[N: Web site content organization and management, e.g. publishing, automatic linking or maintaining pages] [N0110]
G06F17/30W7L	[N: Access to data in other repository systems, e.g. legacy data or dynamic Web page generation] [N0110]
G06F17/30W7S	[N: Document structures and storage, e.g. HTML extensions] [N0110]
G06F17/30W9	. . .	[N: Browsing optimisation] [N0110]
G06F17/30W9C	[N: of access to content, e.g. by caching (accessing, addressing or allocating within memory systems and caches G06F12/08)] [N0110]
G06F17/30W9V	[N: Optimising the visualization of content, e.g. distillation of HTML documents] [N0110]
G06F17/30X	. .	[N: of semistructured data, the underlying structure being taken into account, e.g. mark-up language structure data] [N0508]
G06F17/30X1	. . .	[N: Indexing, e.g. of XML tags] [N0508]
G06F17/30X3	. . .	[N: Mapping or conversion] [N0508]
G06F17/30X3D	[N: Mapping to a database] [N0508]
G06F17/30X3M	[N: Mark-up to mark-up conversion (conversion for visualization in web browsing G06F17/30W9V)] [N0508]
G06F17/30X7	. . .	[N: XML native databases, structures and querying] [N0508]
G06F17/30X7F	[N: Query formulation] [N0606]
G06F17/30X7P	[N: Query processing] [N0606]
G06F17/30X7P2	[N: Query translation] [N0606]
G06F17/30X7P3	[N: Query optimisation] [N0606]

]
- G06F19/701 . . [N: for molecular modelling, e.g. calculation and theoretical details of quantum mechanics, molecular mechanics, molecular dynamics, Monte Carlo methods, conformational analysis or the like (molecular modelling of nucleic acids or proteins [G06F19/16](#))] [N1203]
- G06F19/702 . . [N: for analysis and planning of chemical reactions and syntheses, e.g. synthesis design, reaction prediction, mechanism elucidation] [N1203]
- G06F19/703 . . [N: for computer-assisted identification of chemical compounds or molecular

- structures, e.g. computer-assisted structure elucidation [CASE] systems] [N1203]
- G06F19/704
 - [N: for prediction of properties of compounds, e.g. calculating and selecting molecular descriptors, details related to the development of SAR/QSAR/QSPR models, ADME/Tox models or PK/PD models] [N1203]
- G06F19/705
 - [N: for database search of chemical structures, e.g. full structure search, substructure search, similarity search, pharmacophore search, 3D structure search (information retrieval in general [G06F17/30](#))] [N1203]
- G06F19/706
 - [N: for drug design with the emphasis on a therapeutic agent, e.g. ligand-biological target interactions, pharmacophore generation (drug targeting using protein structure data [G06F19/16](#); binding site identification [G06F19/18](#))] [N1203]
- G06F19/707
 - [N: using machine learning, data mining or chemometrics, e.g. pattern recognition, knowledge discovery, rule extraction, correlation, clustering or classification, chemical name to structure conversion (use of machine learning, data mining or biostatistics for processing genetic or protein-related data [G06F19/24](#))] [N1203]
- G06F19/708
 - [N: for data visualisation, e.g. molecular structure representations, graphics generation, display of maps or networks or other visual representations (data visualisation specially adapted for processing genetic or protein-related data [G06F19/26](#))] [N1203]
- G06F19/709
 - [N: for programming tools or database systems, e.g. ontologies, heterogeneous data integration, data warehousing or computing architectures (programming tools or database systems specially adapted for processing genetic or protein-related data [G06F19/28](#))] [N1203]
- G06F21/00**

Security arrangements for protecting computers, components thereof, programs or data against unauthorised activity [N: (address-based protection against unauthorised use of memory [G06F12/14](#); record carriers for use with machines and with at least a part designed to carry digital markings [G06K19/00](#); preventing unauthorised reproduction or copying of disk-type recordable media [G11B20/00](#); secret or secure communication [H04L9/00](#); digital watermarking on images [H04N1/32](#); protection in video systems or pay television [H04N7/16](#))] [N1205]
- G06F21/10
 - [N: Protecting distributed programs or content, e.g. vending or licensing of copyrighted material] [N1205]
- G06F21/10A
 - [N: Tools for software license management or administration, e.g. managing licenses at corporate level] [N1205]
- G06F21/12
 - [N: Protecting executable software] [N1205]
- G06F21/12A
 - [N: Restricting unauthorised execution of programs] [N1205]
- G06F21/12A2
 - [N: by using dedicated hardware, e.g. dongles, smart cards, cryptographic processors, global positioning systems (GPS) devices] [N1205]
- G06F21/12A4
 - [N: by manipulating the program code, e.g. source code, compiled code, interpreted code, machine code] [N1205]
- G06F21/12A4A
 - [N: Interacting with the operating system] [N1205]
- G06F21/12A6
 - [N: involving web programs, i.e. using technology especially used in internet, generally interacting with a web browser, e.g. hypertext markup language (HTML), applets, java] [N1205]
- G06F21/14
 - [N: against software analysis or reverse engineering, e.g. by obfuscation] [N1205]
- G06F21/16
 - [N: Program or content traceability, e.g. by watermarking (digital watermarking on images [H04N1/32](#))] [N1205]
- G06F21/30
 - [N: Authentication, i.e. establishing the identity or authorisation of security principals] [N1205]

G06F21/30A	. . [N: by remotely controlling device operation] [N1205]
G06F21/31	. . [N: User authentication] [N1205]
G06F21/31A	. . . [N: using a call-back technique via a telephone network] [N1205]
G06F21/31B	. . . [N: by observing the pattern of computer usage, e.g. typical user behaviour] [N1205]
G06F21/32	. . . [N: using biometric data, e.g. fingerprints, iris scans or voiceprints] [N1205]
G06F21/33	. . . [N: using certificates] [N1205]
G06F21/33A [N: for accessing specific resources, e.g. using Kerberos tickets] [N1205]
G06F21/34	. . . [N: involving the use of external additional devices, e.g. dongles or smart cards] [N1205]
G06F21/35 [N: communicating wirelessly] [N1205]
G06F21/36	. . . [N: by graphic or iconic representation] [N1205]
G06F21/40	. . . [N: by quorum, i.e. whereby two or more security principals are required] [N1205]
G06F21/41	. . . [N: where a single sign-on provides access to a plurality of computers] [N1205]
G06F21/42	. . . [N: using separate channels for security data] [N1205]
G06F21/43 [N: wireless channels] [N1205]
G06F21/44	. . [N: Program or device authentication] [N1205]
G06F21/44A	. . . [N: by mutual authentication, e.g. between devices or programs] [N1205]
G06F21/45	. . [N: Structures or tools for the administration of authentication] [N1205]
G06F21/46	. . . [N: by designing passwords or checking the strength of passwords] [N1205]
G06F21/50	. [N: Monitoring users, programs or devices to maintain the integrity of platforms, e.g. of processors, firmware or operating systems] [N1205]
G06F21/51	. . [N: at application loading time, e.g. accepting, rejecting, starting or inhibiting executable software based on integrity or source reliability] [N1205]
G06F21/52	. . [N: during program execution, e.g. stack integrity; Preventing unwanted data erasure; Buffer overflow] [N1205]
G06F21/53	. . . [N: by executing in a restricted environment, e.g. sandbox or secure virtual machine] [N1205]
G06F21/54	. . . [N: by adding security routines or objects to programs] [N1205]
G06F21/55	. . [N: Detecting local intrusion or implementing counter-measures] [N1205]
G06F21/55A	. . . [N: involving long-term monitoring or reporting] [N1205]
G06F21/55B	. . . [N: involving event detection and direct action] [N1205]
G06F21/55C	. . . [N: involving covert channels, i.e. data leakage between processes] [N1205]
G06F21/55C2 [N: with measures against differential power attack] [N1205]
G06F21/56	. . . [N: Computer malware detection or handling, e.g. anti-virus arrangements] [N1205]
G06F21/56A [N: Virus type analysis] [N1205]
G06F21/56B [N: Static detection] [N1205]
G06F21/56B2 [N: by source code analysis] [N1205]
G06F21/56B4 [N: by virus signature recognition] [N1205]
G06F21/56B6 [N: by checking file integrity] [N1205]
G06F21/56C [N: Dynamic detection, i.e. detection performed at run-time, e.g. emulation, suspicious activities] [N1205]

G06F21/56D [N: using dedicated hardware] [N1205]
G06F21/56E [N: eliminating virus, restoring damaged files] [N1205]
G06F21/57	. . [N: Certifying or maintaining trusted computer platforms, e.g. secure boots or power-downs, version controls, system software checks, secure updates or assessing vulnerabilities] [N1205]
G06F21/57A	. . . [N: Secure firmware programming, e.g. of basic input output system (BIOS)] [N1205]
G06F21/57B	. . . [N: Secure boot] [N1205]
G06F21/57C	. . . [N: Assessing vulnerabilities and evaluating computer system security] [N1205]
G06F21/60	. [N: Protecting data] [N1205]
G06F21/60A	. . [N: Providing cryptographic facilities or services] [N1205]
G06F21/60B	. . [N: Tools and structures for managing or administering access control systems] [N1205]
G06F21/60C	. . [N: by securing the transmission between two devices or processes] [N1205]
G06F21/60C2	. . . [N: Secure printing] [N1205]
G06F21/62	. . [N: Protecting access to data via a platform, e.g. using keys or access control rules] [N1205]
G06F21/62A	. . . [N: to a single file or object, e.g. in a secure envelope, encrypted and accessed using a key, or with access control rules appended to the object itself] [N1205]
G06F21/62B	. . . [N: to a system of files or objects, e.g. local or distributed file system or database] [N1205]
G06F21/62B1 [N: where protection concerns the structure of data, e.g. records, types, queries] [N1205]
G06F21/62B3 [N: between heterogeneous systems] [N1205]
G06F21/62B5 [N: Protecting personal data, e.g. for financial or medical purposes] [N1205]
G06F21/62B5A [N: by anonymising data, e.g. decorrelating personal data from the owner's identification] [N1205]
G06F21/62B5B [N: during internet communication, e.g. revealing personal data from cookies] [N1205]
G06F21/62B7 [N: by registering files or documents with a third party] [N1205]
G06F21/62B9 [N: at program execution time, where the protection is within the operating system] [N1205]
G06F21/62C	. . . [N: to features or functions of an application] [N1205]
G06F21/64	. . [N: Protecting data integrity, e.g. using checksums, certificates or signatures] [N1205]
G06F21/64A	. . . [N: using a third party] [N1205]
G06F21/70	. [N: Protecting specific internal or peripheral components, in which the protection of a component leads to protection of the entire computer] [N1205]
G06F21/71	. . [N: to assure secure computing or processing of information] [N1205]
G06F21/72	. . . [N: in cryptographic circuits] [N1205]
G06F21/72A [N: operating on a secure reference time value] [N1205]
G06F21/73	. . . [N: by creating or determining hardware identification, e.g. serial numbers] [N1205]
G06F21/74	. . . [N: operating in dual or compartmented mode, i.e. at least one secure mode] [N1205]

- G06F21/75 . . . [N: by inhibiting the analysis of circuitry or operation] [N1205]
- G06F21/76 . . . [N: in application-specific integrated circuits [ASICs] or field-programmable devices, e.g. field-programmable gate arrays [FPGAs] or programmable logic devices [PLDs]] [N1205]
- G06F21/77 . . . [N: in smart cards] [N1205]
- G06F21/78 . . [N: to assure secure storage of data (address-based protection against unauthorised use of memory G06F 12/14; record carriers for use with machines and with at least a part designed to carry digital markings G06K 19/00)] [N1205]
- G06F21/79 . . . [N: in semiconductor storage media, e.g. directly-addressable memories] [N1205]
- G06F21/80 . . . [N: in storage media based on magnetic or optical technology, e.g. disks with sectors (preventing unauthorised reproduction or copying of disk-type recordable media G11B 20/00)] [N1205]
- G06F21/80A [N: using a security table for the storage sub-system] [N1205]
- G06F21/81 . . [N: by operating on the power supply, e.g. enabling or disabling power-on, sleep or resume operations] [N1205]
- G06F21/82 . . [N: Protecting input, output or interconnection devices] [N1205]
- G06F21/83 . . . [N: input devices, e.g. keyboards, mice or controllers thereof] [N1205]
- G06F21/84 . . . [N: output devices, e.g. displays or monitors] [N1205]
- G06F21/85 . . . [N: interconnection devices, e.g. bus-connected or in-line devices] [N1205]
- G06F21/86 . . [N: Secure or tamper-resistant housings] [N1205]
- G06F21/87 . . . [N: by means of encapsulation, e.g. for integrated circuits] [N1205]
- G06F21/88 . . [N: Detecting or preventing theft or loss] [N1205]
