

**ECLA****EUROPEAN CLASSIFICATION****H03L****AUTOMATIC CONTROL, STARTING, SYNCHRONISATION, OR STABILISATION OF GENERATORS OF ELECTRONIC OSCILLATIONS OR PULSES** (of dynamo-electric generators [H02P](#))**Notes**

1. This subclass covers:

- automatic control circuits for generators of electronic oscillations or pulses;
- starting, synchronisation, or stabilisation circuits for generators where the type of generator is irrelevant or unspecified.

2. This subclass does not cover stabilisation or starting circuits specially adapted to only one specific type of generator, which are covered by subclasses [H03B](#), [H03K](#).

3. In this subclass, the following expression is used with the meaning indicated:

- "automatic control" covers only closed loop systems.

**H03L1/00**

**Stabilisation of generator output against variations of physical values, e.g. power supply** (automatic control [H03L5/00](#), [H03L7/00](#))

**H03L1/02**

- . against variations of temperature only

**H03L1/02A**

- . . [N: of generators comprising distributed capacitance and inductance]

**H03L1/02B**

- . . [N: by indirect stabilisation, i.e. by generating an electrical correction signal which is a function of the temperature ([H03L1/02A](#) takes precedence)]

**H03L1/02B1**

- . . . [N: by using voltage variable capacitance diodes]

**H03L1/02B1A**

- . . . . [N: and a memory for digitally storing correction values]

**H03L1/02B2**

- . . . [N: by using a memory for digitally storing correction values ([H03L1/02B1A](#) takes precedence)]

**H03L1/02B3**

- . . . [N: by using frequency conversion means which is variable with temperature, e.g. mixer, frequency divider, pulse add/subtract logic circuit ([H03L1/02B1](#), [H03L1/02B2](#) take precedence)]

**H03L1/02C**

- . . [N: of generators comprising piezo-electric resonators ([H03L1/02A](#) and [H03L1/02B](#) take precedence; oscillation generators with a piezo-electric resonator per se [H03B5/32](#))]

**H03L1/04**

- . . Constructional details for maintaining temperature constant

**H03L3/00**

**Starting of generators**

**H03L5/00**

**Automatic control of voltage, current, or power**

**H03L5/02**

- . of power

<b>H03L7/00</b>	<b>Automatic control of frequency or phase; Synchronisation</b> (tuning of resonant circuits in general <a href="#">H03J</a> ; synchronising in digital communication systems, see the relevant groups in class <a href="#">H04</a> )

<a href="#">H03L7/12</a>	.	.	.	using a scanning signal (tuning circuits with automatic scanning over a band of frequencies <a href="#">H03J7/18</a> )
<a href="#">H03L7/14</a>	.	.	.	for assuring constant frequency when supply or correction voltages fail [N: or are interrupted] [C9706]
<a href="#">H03L7/14B</a>	.	.	.	[N: the phase-locked loop controlling several oscillators in turn] [N9507]
<a href="#">H03L7/14D</a>	.	.	.	[N: by switching the reference signal of the phase-locked loop] [N9507]

H03L7/14D2	. . . . .	[N: the switched reference signal being derived from the controlled oscillator output signal] [N9507]
H03L7/14H	. . . . .	[N: by using digital means for generating the oscillator control signal ( <a href="#">H03L7/14B</a> , <a href="#">H03L7/14D</a> take precedence)] [N9507] [C9702]
H03L7/14H2	. . . . .	[N: said digital means comprising a counter or a divider] [N9507]
H03L7/16	. . . . .	Indirect frequency synthesis, i.e. generating a desired one of a number of predetermined frequencies using a frequency- or phase-locked loop
H03L7/18	. . . . .	using a frequency divider or counter in the loop ( <a href="#">H03L7/20</a> , <a href="#">H03L7/22</a> take precedence)
H03L7/18C	. . . . .	[N: the counter or frequency divider being connected to a cycle or pulse swallowing circuit]
H03L7/18D	. . . . .	[N: the frequency divider comprising a phase accumulator generating the frequency divided signal] [N9507] [C9607]
H03L7/181	. . . . .	a numerical count result being used for locking the loop, the counter counting during fixed time intervals [N: ( <a href="#">H03L7/18D</a> takes precedence)] [C9507]
H03L7/183	. . . . .	a time difference being used for locking the loop, the counter counting between fixed numbers or the frequency divider dividing by a fixed number [N: ( <a href="#">H03L7/18D</a> takes precedence)] [C9507]
H03L7/185	. . . . .	using a mixer in the loop ( <a href="#">H03L7/187</a> to <a href="#">H03L7/195</a> take precedence)
H03L7/187	. . . . .	using means for coarse tuning the voltage controlled oscillator of the loop ( <a href="#">H03L7/191</a> to <a href="#">H03L7/195</a> take precedence)
H03L7/189	. . . . .	comprising a D/A converter for generating a coarse tuning voltage
H03L7/191	. . . . .	using at least two different signals from the frequency divider or the counter for determining the time difference ( <a href="#">H03L7/193</a> , <a href="#">H03L7/195</a> take precedence)
H03L7/193	. . . . .	the frequency divider/counter comprising a commutable pre-divider, e.g. a two modulus divider (pulse counters/frequency dividers <a href="#">H03K21/00</a> to <a href="#">H03K29/00</a> )
H03L7/195	. . . . .	in which the counter of the loop counts between two different non zero numbers, e.g. for generating an offset frequency ( <a href="#">H03L7/193</a> takes precedence; pulse counters for predetermined counting <a href="#">H03K21/00</a> to <a href="#">H03K29/00</a> )
H03L7/197	. . . . .	a time difference being used for locking the loop, the counter counting between numbers which are variable in time or the frequency divider dividing by a factor variable in time, e.g. for obtaining fractional frequency division [N: ( <a href="#">H03L7/18D</a> takes precedence)] [C9507]
H03L7/197B	. . . . .	[N: for reducing the locking time interval ( <a href="#">H03L7/197D</a> , <a href="#">H03L7/199</a> take precedence)] [N9903]
H03L7/197D	. . . . .	[N: for fractional frequency division] [C9903]
H03L7/197D1	. . . . .	[N: using a phase accumulator for controlling the counter or frequency divider] [N9903]
H03L7/197D1A	. . . . .	{7 dots} [N: using a cycle or pulse removing circuit] [N9903]
H03L7/199	. . . . .	with reset of the frequency divider or the counter, e.g. for assuring initial synchronisation
H03L7/20	. . . . .	using a harmonic phase-locked loop, i.e. a loop which can be locked to one of a number of harmonically related frequencies applied to it ( <a href="#">H03L7/22</a> takes precedence)
H03L7/22	. . . . .	using more than one loop
H03L7/23	. . . . .	with pulse counters or frequency dividers

- H03L7/23N . . . . . [N: Nested phase locked loops] [N0101] [C0311]
- H03L7/24 . using a reference signal directly applied to the generator
- H03L7/26 . using energy levels of molecules, atoms, or subatomic particles as a frequency reference
- H03L9/00 **Automatic control not provided for in other groups of this subclass** [N0704]
