## Description

This intermediate level workshop offers an opportunity to explore the relationship between computer-implemented inventions (CII) and business methods, game rules, mathematics (including AI) and the presentation of information/graphical user interfaces.

It includes learning modules for participants to prepare ahead of each live session, exercises, and interaction with tutors, who will guide participants from essential concepts and the principles underlying patents to specific topics related to patenting CII and the associated difficulties. An online forum will enable participants to interact with each other and the tutors throughout the workshop.

The workshop is for those already familiar with the concepts underlying patenting CII who would like to refresh their familiarity with the essentials and deepen their knowledge of the field by exploring particular topics.

The online workshop starts on 10 November and ends on 27 November 2025.

The live sessions are scheduled as follows:

**Session 1:** 19 November 2025 10.00 - 11.30 CET  
(GMT +01:00)

**Session 2:** 26 November 2025 10.00 - 11.30 CET  
(GMT +01:00)

## Technical requirements

The online sessions will be held on Zoom.

## Duration

Three hours of online sessions plus fourteen hours of self-study.

## Experts

**Grzegorz Krawczyk**, patent examiner, Image Processing, EPO

**Anders Ströbeck**, patent examiner, Data Comm Protocols & Applications, EPO
