

Global Dossier TF

Expected future scenario by KINPA

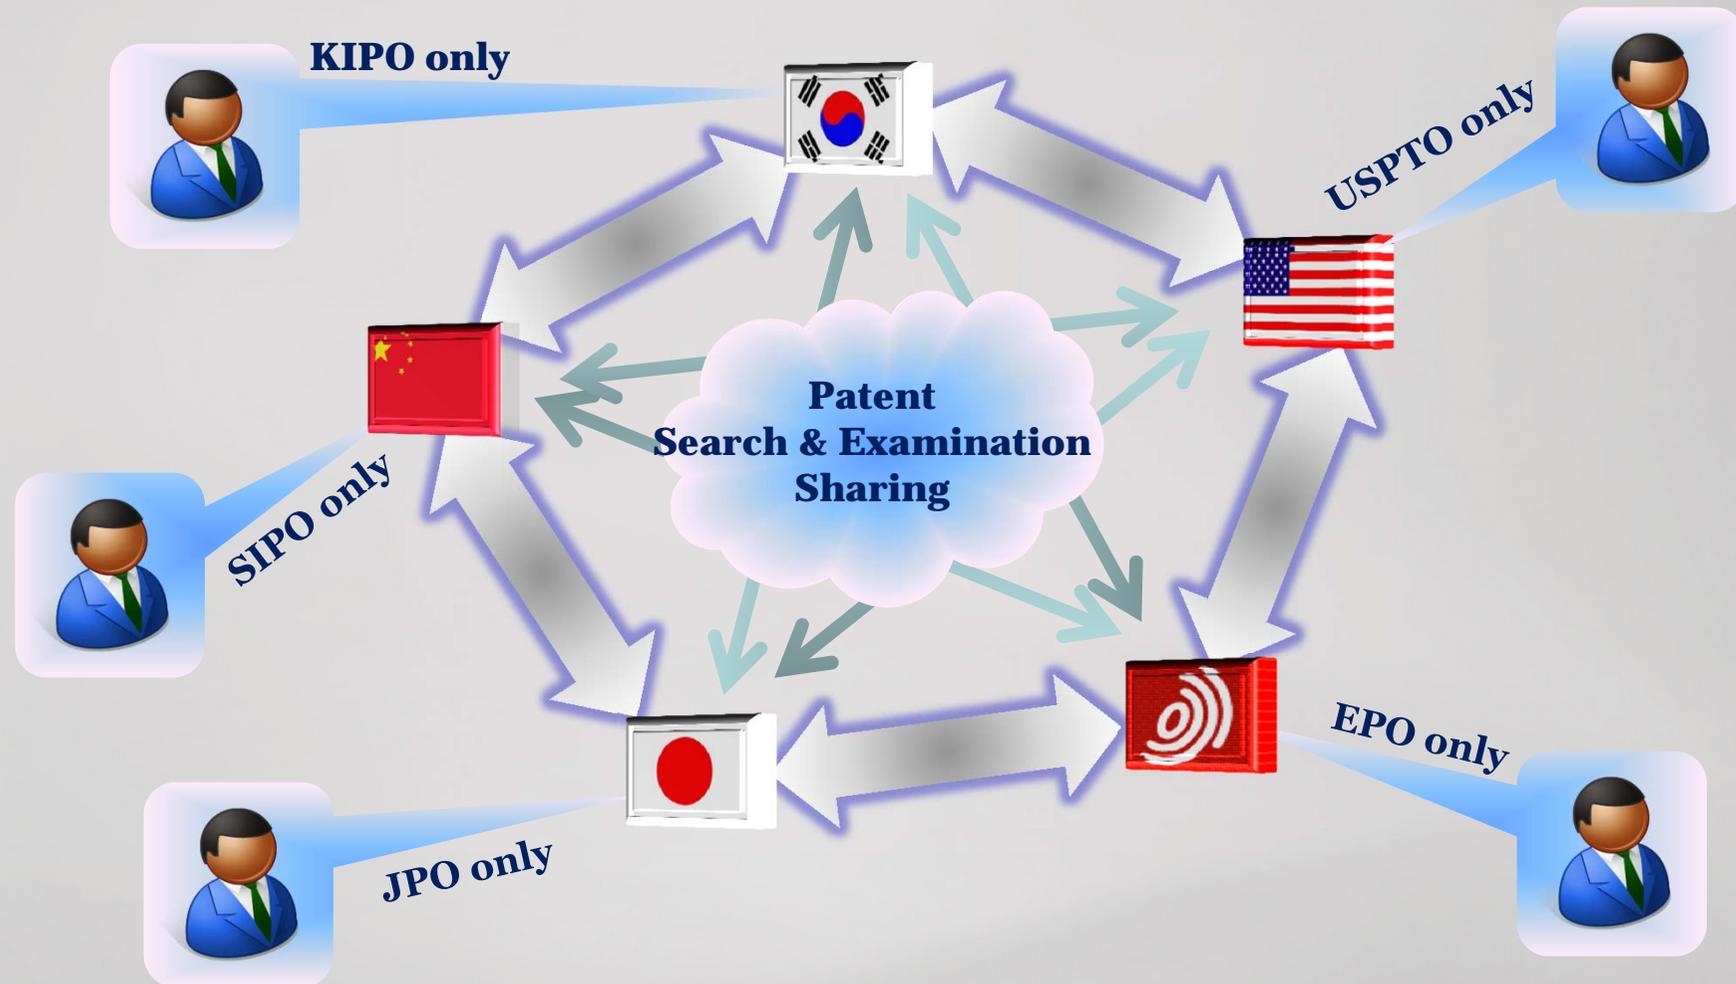

Jan. 22, 2013

KINPA

Korea INtellectual Property Association

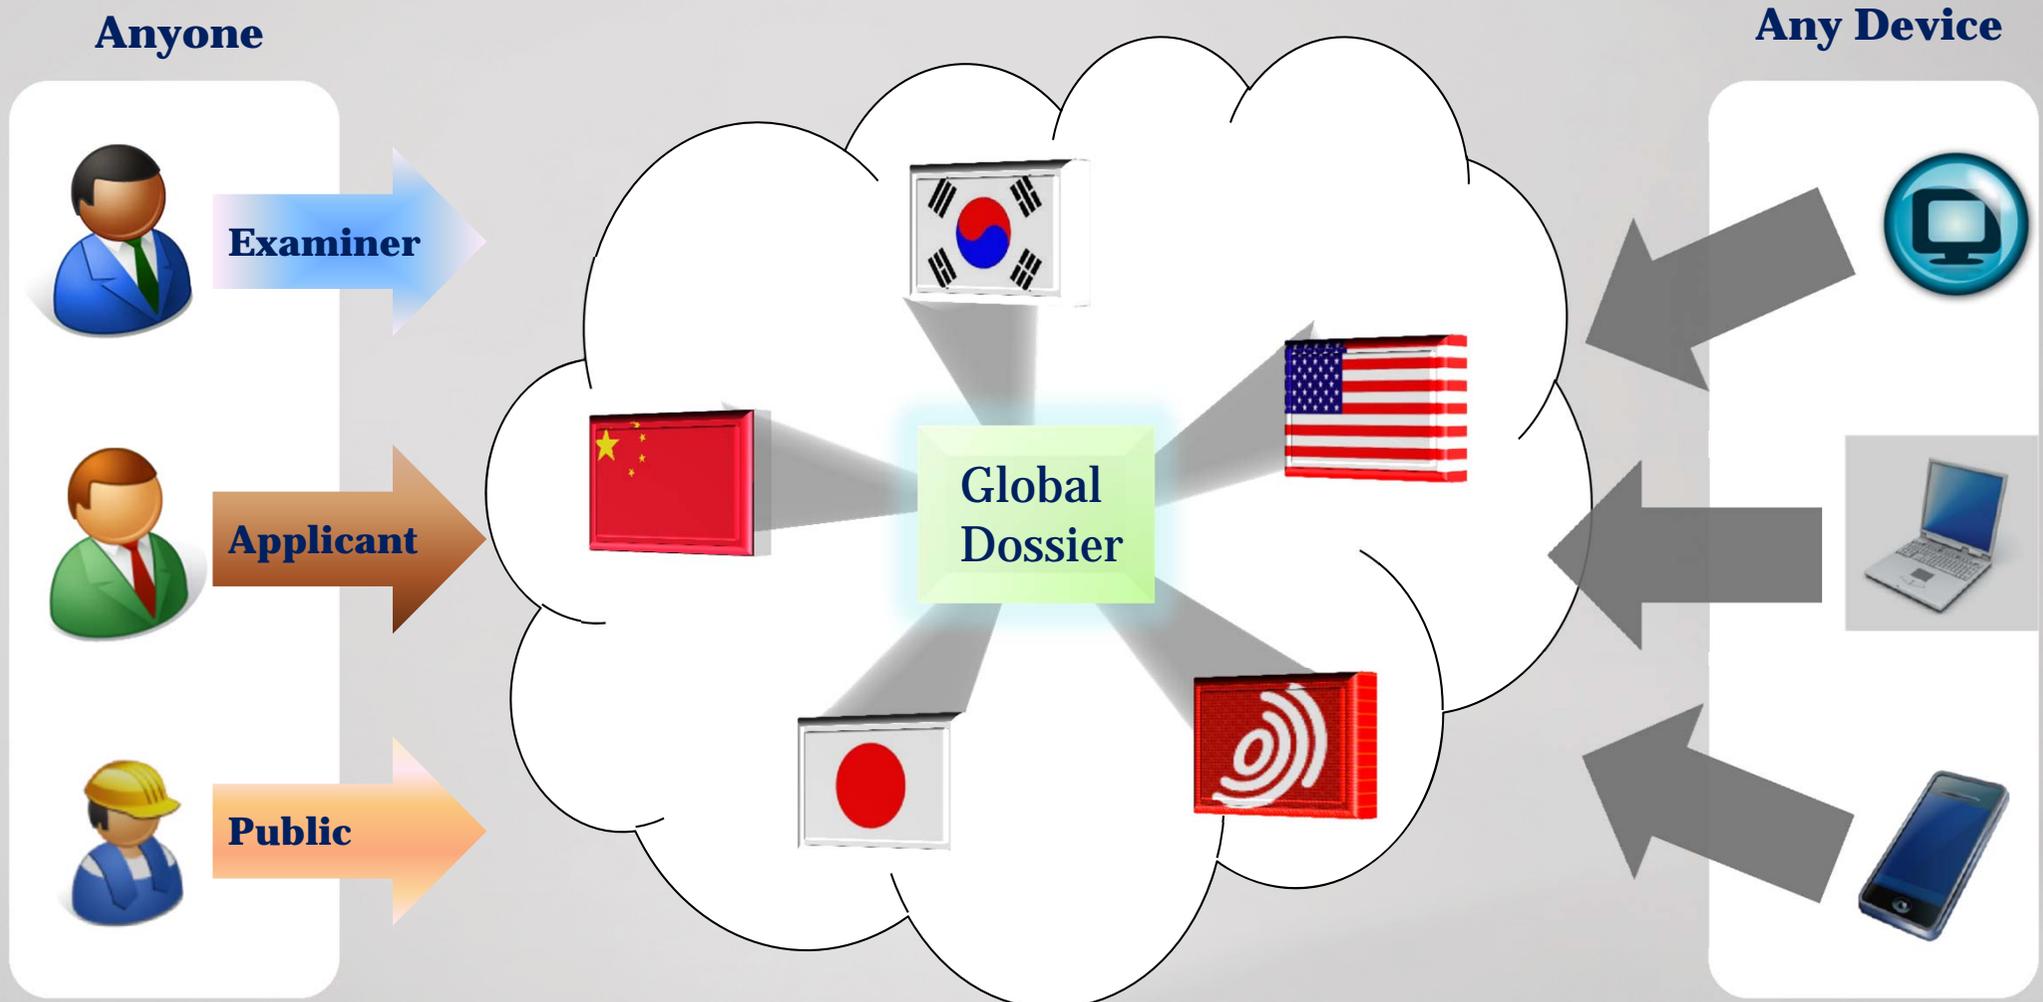

Present Status

- Patent Search & Examination Sharing Systems already have been built among Patent Offices
- The easiest way would be an organic integration of the present systems

IP5 Industry as an applicant & public can contribute to make a Global Dossier successfully!

Expected future scenario

PORTFOLIO 

Compatability with a company system

- to utilize data efficiently in company system
- guarantee of data conversion

- mobile terminal v. computer
- search & view documents only
- filing documents under a secure authentication

Access by multi terminals

Timeline with alerts

- very important to keep a due date (ex; priority date)
- Red light or Green light

- confused to submit various docs before each Office
- offer lists of docs to be submitted

Subsequent filing

Expected ripple effect

1.

Easy Access to Applicant

- PPH, claiming priority and etc can be done with ease by the Global Dossier

2.

Get a Speedy & Accurate Examination Result

- A patent Office can access an examination result of the other Patent Office and provide a rapid & exact examination result to applicant

3.

Easy Access to public

- strengthen the accessibility to patent examination result would make easier in doing R&D

*

Harmonization with Trademark & Design

- in the near future, a demand for Trademark & Design would be requested
