

## Chapter 6 OTHER WORK

This chapter contains statistics on other work done by the Trilateral Offices, such as search or granting of rights that are not common to all three offices. The data presented below are supplementary to the information already presented earlier in this report.

Other work includes applications for plant patents and reissue patents in the USPTO and also applications for patents other than those for inventions: utility models, designs and trademarks in the JPO, and design patents and trademarks in the USPTO. The searches on behalf of national offices as well as searches for third parties are special items of work done at the EPO.

The numbers of requests received for all of these types of other work are shown in the table below for 2005 and 2006.
