Introduction

A.

European patent system

The centralised, fundamentally autonomous and uniform procedure for the grant of European patents, introduced by the European Patent Convention (EPC), is linked in a special way with the national patent law of the member states of the European Patent Organisation, and at a number of stages it "interfaces" with the national legal systems - a feature essential to smooth interaction between European and national law. In each of the contracting states for which it is granted, the European patent has the effect of and is subject to the same conditions as a national patent granted by that state, unless otherwise provided in the EPC (Article 2(2) EPC).

The salient characteristic of these interfaces is that, at the outset or in the course of the European grant procedure or after it has been completed, the patent applicant or proprietor may or must take certain steps before the patent authorities of the contracting states in order to acquire or maintain certain rights in those states. It is therefore of primordial importance for all European applicants and proprietors to be familiar with and carefully observe such procedural steps laid down by national law and the conditions for their validity, if full advantage is to be derived from the European patent system and loss of rights is to be avoided.

This booklet is intended by the European Patent Office as a concise and reliable guide to the most important provisions and requirements of the national law of the contracting states applicable to European patent applications and patents, for the use of European patent applicants and proprietors and all others concerned with the European patent system. It may be considered as it were a "Guide to the Euro-legislation of the contracting states on patents" and thus supplements the guide for applicants - "How to get a European patent". The synopses given in the following tables have been prepared in close collaboration with the authorities of the contracting states responsible for the protection of industrial property, to which the EPO is indebted for their active support and numerous valuable suggestions.

Although we have exercised the greatest care in drawing up the tables, we cannot vouch for the absolute completeness and accuracy of the information given. If only because of their conciseness and the fact that they concentrate on the bare essentials, the tables can be no substitute for consultation of the national legal sources themselves, supplemented where appropriate by professional advice from authorised persons. After all, despite the latest reforms, thorough as they have mostly been, national patent law and practice are not static phenomena but are constantly changing and, of necessity, developing. As a result, it is not even possible to state with any certainty that the legal provisions summarised in the tables will not have been changed by the time this booklet appears. In particular, the reader should not assume that the official fees given at various points in the tables have not been increased in the meantime. It is therefore advisable always to refer back to the official publications of the contracting states so as to keep up to date with the development of national legislation and official practice. The EPO will continue to provide regular and, as far as possible, up-to-date coverage in its Official Journal of legal developments in the contracting states. The reader is in particular referred to the online version of the brochure "National law relating to the EPC"*, which is updated whenever the EPO learns of any relevant changes at national level.

The present 17th edition provides information on the so-called extension states immediately following on the information given for the EPC contracting states.

Extension system

The European Patent Organisation has concluded agreements on co-operation in the field of patents and on extending the protection conferred by European patents (Extension Agreements) with a number of states which are not party to the EPC.

These agreements form the basis of an extension system providing patent applicants with a simple and cost-effective way of obtaining patent protection in these countries. At the applicant's request and on payment of the extension fee, European applications (direct or Euro-PCT, provided PCT applications include the designation both for a European patent **and** for extension states) and patents can be extended to these countries where they will have the same effects as national applications and patents and will enjoy substantially the same protection as patents granted by the EPO for the member states of the European Patent Organisation. **At present**, extension to the following states may be requested:

Bosnia and Herzegovina (as from 1 December 2004)

Montenegro (as from 1 March 2010)

Note: Extension is possible only for those applications filed after entry into force of the agreements.

The extension system largely corresponds to the EPC system operating in the EPC contracting states, except that it is based not on direct application of the EPC but solely on national law modelled on the EPC. It is therefore subject to the national extension rules of the country concerned.

The rules, which are identical for all states mentioned, are summarised below, while the main requirements in each country are indicated in the tables concerned immediately following on the information for the contracting states. For further information on extension see OJ EPO 2004, 619, OJ EPO 2007, 406, OJ EPO 2009, 603 and OJ EPO 2010, 10.

Extension fee

The extension fee of EUR 102 is **payable to the EPO**. The time limit for payment of the extension fee is:

- for European applications

Six months from the date on which the European Patent Bulletin mentions the publication of the European search report.

- for Euro-PCT applications

31 months from the date of filing or earliest date of priority or six months from the date on which the

international search report was published, whichever date is later.

Withdrawal of the request for extension

The request for extension is deemed withdrawn if the extension fee is not paid or the application is withdrawn, refused or deemed withdrawn.

Subsequent payment of extension fees

If the fee for an extension state has not been paid within the basic period, the applicant can pay the extension fee subsequently in combination with a 50% surcharge

1. within two months of expiry of the basic period (for "re-introduced grace period" see OJ EPO 2009, 603) or
2. within two months of notification of a communication of loss of rights owing to non-payment of the designation fee.

In the latter case, a subsequent payment is possible only if the conditions set out in detail in the Guidelines for Examination, A-III, 12.2, are met. Under those conditions, the applicant can request further processing for the designations deemed to be withdrawn (Article 121; Rule 135 EPC), paying the extension fees at the same time.

Accession to the EPC of an extension state

The extension agreement between an extension state and the European Patent Organisation will terminate with the entry into force of the EPC in that state. It will thereafter no longer be possible to extend European patent applications and patents to the former extension state. The **extension system will, however, continue to apply** to all European and international applications **filed prior to the date of entry into force of the EPC in that state**, as well as to all European patents granted in respect of such applications.

The legal situation outlined above exists in Slovenia (termination of the extension agreement with effect from 1 December 2002), in Romania (termination of the extension agreement with effect from 1 March 2003), in Lithuania (termination of the extension agreement with effect from 1 December 2004), in Latvia (termination of the extension agreement with effect from 1 July 2005), in Croatia (termination of the extension agreement with effect from 1 January 2008), in the former Yugoslav Republic of Macedonia (termination of the extension agreement with effect from 1 January 2009), in Albania (termination of the extension agreement with effect from 1 May 2010) and in Serbia (termination of the extension agreement with effect from 1 October 2010).

National legal bases

I.

This table lists (not necessarily all) the contracting and extension states' important national legal sources (laws, regulations, decrees, etc.) of significance for European patent applications and patents and, for the most part, also referred to in the subsequent tables. The title of these legal sources is given in the official language of the states in question. Where necessary, a translation in the official language of the EPO in which this summary is published is given underneath in italics in square brackets. To keep this table to a reasonable size, the "original title" in the case of states with more than one official language is given only in one of these languages.

The dates on which the various items of referenced legislation entered into force have not been included, as this would have cluttered up the tables - especially in cases where some articles of certain laws and regulations entered into force at different times.

Where the Office knows of translations into one of the official languages of the EPO of the legal sources listed, these are referenced. English and French translations of legal texts relating to intellectual property can also be consulted in WIPO's electronic database "WIPO Lex" (www.wipo.int/wipolex/en). It should be noted, however, that these translations are not always up-to-date and that at all times only the original version given in the official publications is the authentic text.

The abbreviations used in the following tables have been introduced for the sake of clarity and do not always coincide with the official abbreviations used in the contracting states.

Filing of European patent applications pursuant to Article 75 (1) (b) and (2) EPC

II.

European patent applications may be filed at the EPO at Munich, its branch at The Hague, its sub-office in Berlin (however not in Vienna) or, if the law of a contracting state so permits, at the central industrial property office or other competent authority of that state.

The following table indicates, for each contracting state, whether European patent applications may be filed at the option of the applicant at the EPO or a national authority, which applications must be filed with the national authorities, the languages in which European patent applications are accepted by the national authorities and what special features need to be borne in mind in connection with the filing.

For the purpose of filing an application, a national representative does not need to be appointed if the applicant has neither a residence nor his principal place of business within the territory of the state concerned (Article 133(1) and (2) EPC).

Attention is drawn to the fact that a translation in respect of every application which is not in English, French or German must be filed in one of these languages within two months of filing the European application (Article 14(2), Rule 6(1) EPC). If this translation is not filed in due time, the application is deemed to be withdrawn (Article 14(2), third sentence, EPC).

European divisional applications must always be filed directly with the EPO at Munich, The Hague or Berlin (Article 76(1), first sentence, EPC). The same applies to new European patent applications filed under Article 61(1)(b) EPC (Article 61(2) EPC).

With regard to the languages specified in column 3, applicants are recommended to file applications where possible in the official language(s) of these states as difficulties of communication may arise – in particular in the case of states which have to examine applications in the light of national security regulations – possibly resulting in European patent applications being deemed to be withdrawn because of non-observance of the time limit for forwarding such applications (Article 77(3) EPC).

This table contains no information on extension states since Article 75(1)(b) EPC does not apply to these states.

- A. Rights conferred by a European patent application after publication pursuant to Article 93 EPC (Article 67 EPC)**
- B. Translations for obtaining provisional protection pursuant to Article 67(3) EPC**

III.

Under Article 67(1) EPC, from the date of its publication a European patent application provisionally confers on the applicant such protection as is conferred by Article 64 EPC in the contracting states designated in the application as published, i.e. the same rights as would be conferred by a national patent granted in those states.

Pursuant to Article 67(2), however, contracting states may prescribe that a European patent application does not confer the protection referred to in Article 64 EPC. The protection attached to the publication of the European patent application may not, though, be less than that which would result from publication of an unexamined national patent application. The applicant must at least be given the right to claim compensation reasonable in the circumstances from an unauthorised user.

A further exception to the basic rule in Article 67(1) is laid down in Article 67(3) regarding the date from which provisional protection is effective.

Under that provision any contracting state which does not have as an official language the language of the proceedings may prescribe that provisional protection shall not be effective until such time as a translation of the claims in one of its official languages at the option of the applicant or, where that state has prescribed the use of one specific official language, in that language:

- (a) has been made available to the public in the manner prescribed by national law, or
- (b) has been communicated to the person using the invention in the said state.

No time limits are prescribed for filing the above-mentioned translations in the contracting states: provisional protection in the individual contracting states becomes effective only when the conditions referred to in Article 67(3) EPC have been fulfilled.

Translation requirements after grant pursuant to Article 65 EPC

IV.

1. Legal basis

Under Article 65(1) of the European Patent Convention, any contracting state may, if the European patent as granted, amended or limited by the European Patent Office is not drawn up in one of its official languages, prescribe that the proprietor of the patent supply to its central industrial property office a translation of the patent as granted, amended or limited in one of that state's official languages at his option or, where that state has prescribed the use of one specific official language, in that language.

Under Article 1(1) of the London Agreement*, a contracting state to the Agreement which has an official language in common with one of the official languages of the EPO will dispense with the translation requirements under Article 65(1) EPC.

Under Article 1(2) of the London Agreement, a contracting state to the Agreement which does not have an official language in common with one of the official languages of the EPO will dispense with the translation requirements under Article 65(1) EPC if the European patent

- has been granted in the EPO official language prescribed by that state, or
- is translated into that language and filed under Article 65(1) EPC.

Under Article 1(3) of the London Agreement, such a contracting state can, however, require that a translation of the **claims** into one of its official languages be filed under Article 65(1) EPC.

2. Translation requirements in the contracting states

Of the 38 contracting states to the European Patent Convention (status: 1 January 2015), 17, namely, Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Estonia, Greece, Italy, Malta, Poland, Portugal, Romania, San Marino, Serbia, Slovakia, Spain and Turkey, have enacted provisions under Article 65 (1) and (2) EPC. These states all require a translation of the complete patent specification.

21 contracting states have ratified the London Agreement (Albania, Croatia, Denmark, Finland, the former Yugoslav Republic of Macedonia, France, Germany, Hungary, Iceland, Ireland, Latvia, Lithuania, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Slovenia, Sweden, Switzerland and the United Kingdom). These states dispense entirely or partly with the translation requirements under Article 65(1) EPC.

Contracting states to the London Agreement which have an official language in common with the EPO, i.e. France, Germany, Ireland, Liechtenstein, Luxembourg, Monaco, Switzerland and the United Kingdom, dispense entirely with the translation requirements.

The following states do not have an official language in common with the EPO and require a translation of the claims to be filed in one of their official languages

if the European patent has been granted in English, or has been translated into English and filed under Article 65(1) EPC: Albania, Croatia**, Denmark, Finland, Hungary, Iceland, the Netherlands, Norway and Sweden. Except for Croatia, the European patent specification can also be filed in these countries in the respective country's language. The former Yugoslav Republic of Macedonia, Latvia, Lithuania and Slovenia only require a translation of the claims into their respective official languages, regardless of the official language in which the EPO has granted the patent. All EPC contracting states have prescribed, in accordance with Article 65(3) EPC, that in the event of failure to observe the relevant national provisions, the European patent will be deemed to be void *ab initio*. The circumstances in which such a loss of rights occurs are determined by the national law of the contracting states concerned. In most contracting states the **time limit** for filing the translation is **non-extendable**.

3. Effect of the European patent as a national patent

Under Article 64(1) EPC, a European patent automatically confers on its proprietor from the date on which the mention of the grant is published in the European Patent Bulletin, in each contracting state in respect of which it is granted, the same rights as would be conferred by a national patent granted in that state.

Accordingly, the proprietor needs to take no action before the central industrial property office in respect of European patents granted for France, Germany, Ireland, Luxembourg, Monaco, Switzerland/Liechtenstein or the United Kingdom. Subject to Article 68 EPC, a European patent takes effect as a national patent on the date on which the mention of the grant is published in the European Patent Bulletin.

See Table VI regarding payment of national renewal fees to the central industrial property offices.

4. Different sets of claims

If, in the event of prior national rights, the European patent application contains different sets of claims for different states (Rule 138 EPC), only a translation of the set of claims applicable to the state in question need be filed.

5. Explanatory notes concerning the table

The following table contains information regarding each of the aforementioned states, which should be of assistance to applicants in filing translations with the central industrial property office.

* Agreement on the application of Article 65 of the European Patent Convention (see OJ EPO 2001, 549 and 2008, 123)

** Under the applicable Croatian Amending Act (in force since 17 March 2009), Croatia also dispenses with the submission of a translation of the patent specification into Croatian in respect of European patents extended to Croatia and granted since 1 May 2008.

Authentic text of a European patent application or European patent (Article 70 EPC)

V.

In any proceedings before the European Patent Office and in any contracting state, the text of a European patent application or a European patent in the language of the proceedings is the authentic text.

Any contracting state may provide that a translation, as provided for in the Convention, in an official language of that state, shall in that state be regarded as authentic, except for revocation proceedings, in the event of the application or patent in the language of the translation conferring protection (Article 69 EPC) which is narrower than that conferred by it in the language of the proceedings.

Any contracting state which adopts a provision of this kind

(a) must allow the applicant for or proprietor of the patent to file a corrected translation of the European patent application or European patent

(b) may prescribe that any person who, in that state, in good faith is using or has made effective and serious preparations for using an invention the use of which would not constitute infringement of the application or patent in the original translation may, after the corrected translation takes effect, continue such use in the course of his business or for the needs thereof without payment (Article 70(4)(b) EPC).

The following table indicates which text of a European patent application or European patent is authentic in the event of translations pursuant to Articles 67(3) and 65(1) EPC being filed, and whether a state has made provision for use in good faith in the meantime as provided for in Article 70(4)(b) EPC.

Payment of renewal fees for European patents

VI.

Under Article 141 EPC, "national" renewal fees in respect of a European patent may be imposed for the years which follow that in which the mention of the grant of the European patent is published in the "European Patent Bulletin". If a renewal fee becomes due shortly before such publication, it is still to be paid to the EPO. The mention of grant will in this case not be published until the renewal fee has been paid. Further information on the calculation of the patent years for which "national" renewal fees are to be paid is published in Official Journal 6/1984, p. 272 f.

The following table indicates the most important national provisions and requirements to be observed when paying "national renewal fees" in respect of European patents. It takes no account of national provisions concerning reductions in renewal fees in connection with licences of right, or of any stipulations applying to the possibilities of extending or deferring payment.

Irrespective of the information given in column 3 of the following table, the minimum period referred to in Article 141(2) EPC is decisive for all contracting states, i.e. "national" renewal fees in respect of a European patent falling due within two months of the publication of the mention of the grant of the European patent are deemed to have been validly paid if they are paid within that period. Any additional fee provided for under national law will not be charged.

Attention is particularly drawn to the fact that the fees given in Columns 1 and 3 are frequently subject to change in various contracting states. The EPO can therefore accept no responsibility for the validity of those figures. As in the past, however, it will endeavour to report such changes as soon as possible in the Official Journal.

(a) No (b) n/a	(a) Yes (b) With effect from the entry into force of the ELC provisions on patents, the specific procedure under Art. 40 of the Law of 28.3.1984 for re-establishing rights lost owing to late payment of fees has been replaced by a general re-establishment procedure under Art. XI.77 ELC. This general procedure applies to European patents granted prior to the ELC's entry into force (Article 35(3) Law of 19.4.2014). The period for filing a request for re-establishment of rights is whichever of the following two expires earlier: - two months from the date of the removal of the cause of failure to comply with the time limit for the action in question - twelve months from the date of expiry of the grace period under Art. XI.48(1), subpara. 4, ELC (i.e. six months from the due date of the renewal fee). The renewal fee must be paid within the applicable period for filing the request for re-establishment of rights. The request must give the reasons for failing to meet the deadline ("due care" test applied) and the supporting evidence must be produced within two months of the date of filing the request. A EUR 350 re-establishment fee is also payable. If the request is granted, the legal consequences of the failure to observe the time limit will be deemed not to have ensued. The decision as to whether to grant or refuse the request will be entered in the register. If the request is granted, any renewal fee would have fallen due in the period from the date of the loss of rights up to and including the date on which the decision to re-establish rights is entered in the register, must be paid within four months of the latter date. Conversion of European patent applications or patents into national patent applications

VII.

1. Basis for conversion

Under Article 135(1) EPC, the central industrial property office of a designated contracting state may apply the procedure for the grant of a national patent at the request of the applicant for or proprietor of a European patent, in the following circumstances:

- (a) where the application is deemed to be withdrawn pursuant to Article 77(3) EPC (delay by national authorities in forwarding the European application);
- (b) in such other cases as are provided for by the national law in which the European patent application is refused or withdrawn or deemed to be withdrawn, or the European patent is revoked under the EPC.

2. Time limit for filing the request for conversion

The request for conversion must be filed within three months after the date on which

- (a) the European patent application has been withdrawn or
- (b) a communication has been notified that the application is deemed to be withdrawn, or
- (c) a decision has been notified refusing the application or revoking the European patent.

The equivalence of the European patent to a regular national filing lapses if the request is not filed in due time (Rule 155(1), second sentence, EPC).

3. Submission of the request for conversion

- (a) Unless the European patent application is deemed to be withdrawn pursuant to Article 77(3) EPC, the request for conversion must be filed with the European Patent Office. It is not deemed to be filed until the conversion fee has been paid to the Office (Article 135(3), second sentence, EPC).
- (b) If the applicant has been notified that the European patent application is deemed to be withdrawn pursuant to Article 77(3) EPC, the request must be filed with the central industrial property office with which the application was filed (Article 135(2) EPC).

4. Transmission of the request

- (a) The requests for conversion which must be filed with the European Patent Office (cf. 3(a) above) are transmitted by the Office to the central industrial

property offices of the contracting states specified therein, accompanied by a copy of the files relating to the European patent application or the European patent (Article 135(3), Rule 155(2) EPC).

- (b) Where the request for conversion has to be filed with a national patent office (cf. 3(b) above), that Office, subject to the provisions of national security, transmits the request, together with a copy of the European patent application, directly to the central industrial property offices of the contracting states specified by the applicant in the request. The effect referred to in Article 66 EPC (i.e. equivalence of the European patent application to a regular national filing in the contracting states designated) lapses if the request for conversion is not transmitted within twenty months after the date of filing or date of priority (Rule 155(3) EPC).

5. Explanatory notes concerning the table

The table below indicates the basis for conversion under the national law of all the contracting states to the EPC and contains useful information regarding the formal requirements of the competent national authorities, the time limits involved and regulations concerning representation or addresses for service if the applicant or his representative before the EPO has neither a residence nor his principal place of business in the contracting states in question.

All European patent applications transmitted pursuant to Article 135(2) or 135(3) EPC are governed by Article 137(1) EPC, which lays down that these applications may not be subjected to formal requirements of national law which are different from or additional to those provided for in the EPC.

The translation referred to in the table should be understood to mean a translation of the original text of the European patent application and, where appropriate, of the text, as amended during proceedings before the EPO, which the applicant wishes to submit to the national procedure (Article 137(2) (b) EPC).

This table contains no information on extension states since Article 135 EPC does not apply to these states.

Payment of fees

VIII.

A number of "national fees" are payable to the patent authorities of the contracting states in connection with the provisions of the EPC (see Tables II, III, IV, VI, VII, IX).

The purpose of the following Table is to facilitate these fee payments by setting out some useful information regarding national legal provisions, accounts held by patent authorities, permissible methods of payment and date considered as the effective payment date.

There is no special mention of common principles and practice governing payment transactions, such as the requirement to state the name of the person making payment and the purpose of the payment and to specify the patent application number or publication number.

References to banks, post offices or postal giro offices denote only the relevant institution or office within the territory of the contracting state in question.

When making payments, allowance should be made for charges which may be levied by banks, especially on incoming foreign transfers, and which it is not the responsibility of the national patent authorities to pay.

Registering a transfer, licences and other rights in respect of a European patent in the national patent register

IX.

1. Up to grant of the European patent, **transfers**, **licences** and **other rights** in respect of European patent applications are registered centrally in the European Patent Register in accordance with Rules 22 to 24 EPC.

2. After grant of the European patent, a transfer is registered in the European Patent Register only during the opposition period or during opposition proceedings, in accordance with Rule 85 in conjunction with Rule 22 EPC. Column 6 of the following table indicates whether and under what conditions the contracting states recognise the registration of such transfers in the European Patent Register for the purposes of the national procedure.

3. This table also sets out the national regulations and requirements concerning the registration of transfers, licences (excluding compulsory licences) and other rights after grant of the European patent or after the final conclusion of opposition proceedings in the individual national patent registers of the designated contracting states. All details concerning the applicable provisions and the nature of the supporting documents to be filed are based on the information supplied to the EPO by the patent authorities of the contracting states.

Miscellaneous

X.

The following table sets out information on

(a) the enactment of national provisions on the question of double protection under Article 139(3) EPC

(b) the territorial field of application of the EPC, pursuant to Article 168(1) EPC

(a) Simultaneous protection

Under Article 139(3) EPC, any contracting state may prescribe whether and on what terms an invention disclosed in both a European patent application or patent and a national application or patent having the same date of filing or, where priority is claimed, the same date of priority, may be protected simultaneously by both applications or patents.

The individual provisions enacted in connection with Article 139(3) EPC are indicated in column 1 of this table.

(b) Territorial field of application

Under Article 168(1) any contracting state may declare in its instrument of ratification or accession, or may inform the Government of the Federal Republic of Germany by written notification any time thereafter, that the Convention shall be applicable to one or more of the territories for the external relations of which it is responsible. European patents granted for that contracting state also have effect in the territories for which such a declaration has taken effect.

The current situation regarding territorial field of application in the individual contracting states is displayed in column 2 of the table.

(c) Reservations

Contracting states' reservations indicated in earlier editions are no longer shown because reservations are no longer allowed under the European Patent Convention (Revision Act version of 29 November 2000 which entered into force on 13 December 2007).

Important note

Under Article 167(5) EPC 1973, reservations for European patents granted on European patent applications filed during the reservation period continue to run for the entire patent term. So they only affect European applications and patents with a filing date prior to 8 October 1987 (for Austria) and prior to 8 October 1992 (for Greece and/or Spain; cf. OJ EPO 1992, 301).

(d) Authorities having jurisdiction under Article 1(2) Protocol on Recognition

The following contracting states have notified the EPO of authorities which have a jurisdiction conferred to decide claims under Article 1(2) Protocol on Recognition:

Austria: Austrian Patent Office (Austrian "Patentblatt" 1993, 154);

United Kingdom: The Comptroller General of Patents Designs and Trade Marks (Sections 12 and 82 Patents Act 1977).
