Introduction	16
Data description	17
Overview of bibliographic data flow	22
References	26
Table of tags	27
Item description and general considerations	45
Kinds of EP patent documents	47

XML elements: detailed description	59
Root element ep-bulletin	59
B000 - Office specific system/file information	61
eptags - EPO specific tags	61
B001EP - Selective mask for states involved	61
B003EP - Indicator 'no A-document published by EPO'	64
B004EP - Re-establishment of rights indicator	64
B005EP - Printer/Producer identification	64
B006EP - Indicator for international applications	64
B007EP- Reserved for EPO internal use	65
B008EP - Indicator for "small changes"	65
B009EP - Text from B725EP tag in the three EPO official languages	65
B010EP - Other rights and legal means of execution	66
B012EP - New revocation procedure (Art 105a)	67
B015EP - Number of copies to be printed	68
B050EP - Free text	69
B053EP - Additional remarks	69
B070EP - B publication technical field (subsequently filed technical information)	69
B075EP - Petition for review	69
B078EP - Date of 'No opposition filed'	72
B080EP - Public notification	72
B090EP - Limitation procedure	73
B091EP - Limitation procedure - Initial filing	74
B092EP - Limitation procedure - Request rejected	75
B093EP - Limitation procedure - Request allowed	76
B100 - Document identification	77
B110 - Publication number of the document (EPO or WIPO)	77
B120 - Plain language designation	78
B130 - Kind of document	80
B132EP - Original kind code	81
B133EP - New kind code	82
B140 - Date of publication	82
B150 - Patent correction information	82
B190 – Publishing country or organisation	85
B200 - Domestic filing data	86

B210 - Application number	86
B220 - Application filing date	87
B235 - Date of refusal of application	87
B236 - Date of withdrawal of application	87
B237 - Date of application deemed withdrawn	87
B238EP - Date of receipt of request for re-establishment of rights	87
B238 - Date of decision for re-establishment of rights	87
B239 - Date of revocation	87
B241 - Date of request for examination	87
B242 - Date of despatch of the first examination report	87
B243 - Date of 'patent maintained as amended'	87
B244 - Request for conversion (to national application) under EPC Art. 135	88
B245 - Date of suspension (Rule 14) / Interruption (Rule 142) of proceedings	88
B245EP - Suspension/Interruption indicator	88
B246 - Date of resumption of proceedings (Rule 14 / Rule 142)	89
B250 - Filing language	89
B251EP - Procedure language	89
B260 - Publication language	90
B270 - Previously filed application	91
B300, B310, B320, B330 - Priority data	93
B400 – Public availability dates	95
B405 - Patent Bulletin / Gazette information	95
B430 - Unexamined document without grant (first publication)	96
B450 - Document with grant (second publication)	96
B451EP - Date of announcement of intention to grant	97
B452EP - Date of announcement of intention to grant (after 01.07.2002)	97
B453EP - Limitation decision	97
B477 - Document printed as amended, third level of publication (e.g. EPO 'B2')	99
B480 - Corrigendum issued data	99
B500 - Technical Data	100
B510 - International Patent Classification (IPC)	100
B510EP - International Patent Classification (IPCR – in force from week 01-2006)	103
B520EP – Cooperative Patent Classification (CPC)	107
B540 - Title	109
B560 - List of prior art documents	110

B565 - Date of completion of search report	110
B565EP - Date of drawing up and despatch of supplementary search report	110
B566EP - Date of despatch for correction to the search report	110
B598 - Figure number on first (title) page, abstract drawing	111
B600 - References to other legal or procedural related domestic patent documents	111
B610 - Earlier document information	111
B620 - Parent application data	112
B620EP - Divisional application(s)	113
B700 - Parties concerned with the document	114
B710 - Applicants	114
B720 - Inventors	116
B730 - Grantees/Proprietors	118
B740 - Attorney/Representative of the applicant(s)/proprietor(s)	120
B780 - Opposition(s)	121
B790 - Licence(s)	127
B800 - International Convention Data	128
B830 - Information concerning deposit of micro-organisms	128
B840 - Designated contracting states	129
B844EP - States to which the application/patent is extended	129
B848EP - States to which the patent is validated	130
B860 - PCT application data	130
B870 - PCT publication data	131
B880 - Publication of the deferred search report	131
B920 - Opt-out data (UPC)	132
B7000 – Granted patents with Unitary Patent Protection	134
B7001 - Date of filing for a unitary protection request	135
B7002 - Decision date & purport of unitary protection request	135
B7004 - Date of withdrawal of the unitary protection request	136
B7006 – Place of business	136
B7010 – Other rights & legal means of execution	137
B7021 – Date of registration	138
B7022 – Date of effect	138
B7023 – Participating member states	138
B7030 – Licensing commitments	139
B7040 – Information communicated by other authorities	139

B7050 – Renewal fees	140
B7060 – Proceedings before the UPC – actions, action-decisions, appeals, appeal-decisions	141
B7080 – Public notification	146
B7091 – Date of intention to license	147
B7092 – Date of the withdrawal of the intention to license	147
B7120 – Revocation on request	148
B7231 – Date of request for re-establishment of rights	149
B7238 – Date of decision & purport for re-establishment of rights	150
B7239 – Date of revocation	151
B7245 – Date of suspension (Rule 14) / Interruption (Rule 142) of proceedings	151
B7246 – Date of resumption of proceedings (Rule 14 / Rule 142)	151
B7720 – Inventors	152
B7471 – Date of dispatch of the lapse situation	153
B7475 – Date of legal effect of the lapse	153
B7730 – Proprietors of UPP	154
B7740 – Representative of the proprietors of UPP	155
B7790 – Licence registration	156
B7910 - Limitation procedure - Initial filing	157
B7920 - Limitation procedure – Request rejected	158
B7930 - Limitation procedure – Request allowed	159
Unicode Table 1 – C0 Controls and Basic Latin (Mostly old ASCII code pages)	160
Unicode Table 2 – C1 Controls and Latin-1	163
Publication event list	166
Publication event list for EP patents with “Unitary Patent Protection”	171

Summary of changes in Version 3

The **main** changes compared with Version 2.2 are:

- The tagging of the data is now XML (WIPO ST.36) compliant compared to SGML (WIPO ST.32)
- Every tag has an end tag
- Some tags are now in lower case eg. <adr>, <city>, <date>
- All attributes are in lower case and the values are in quotes
- There are no “floating” tags:
 -
 is replaced by UTF-8 code 000D – carriage return)
 - <BCHG> and <ECHG> replaced by a new way of indicating changes - see <B002EP> below
- The new IPC standard is introduced (WIPO ST.8)
- The character encoding is now Unicode/UTF-8

Note: 99% of B tags remain the same as in the previous SGML file.

Current users should have few problems converting their systems to these new files. Particular attention should be given to:

- Unicode/UTF-8 encoding – most systems can do this change automatically – the **rendering** (font) of the encoding is left to the user; for example Microsoft Windows users could use Arial Unicode MS
- The way changes are marked up in the new files
- The new IPC coding.

Summary of changes in Version 3.1

- <B510> and <B510EP> details have been updated.

- **WIPO ST.35 will not be used for XML data delivery**
- **Data delivery will only be possible via the EBD website**
- WIPO ST.32 (SGML) and WIPO ST.35 formats will continue to be published on the website into 2008 but users should switch to the XML format **which has been the official EPO data from week 1, 2006.**

Summary of changes in Version 3.2

These changes are made due to the introduction of EPC 2000 articles and rules into the EPO systems starting on 13 December 2007 (see: <http://www.epo.org/patents/law/legislative-initiatives/epc2000.html>). In many cases the actual use of the new articles and rules by applicants is unknown - it may be many months and/or years before this new data ever appears in the EBD files but, of course, we must be ready before then to process the data.

For PHASE 2: ep-bulletin.dtd ver 1.1

the following changes have been made:

- version number of DTD changes
- added sequence attribute to root element
- added B075EP + sub-tags - for petition for review
- added B090EP + sub-tags - for limitation request
- added B690 + sub-tags - for previously filed application

Summary of changes in Version 3.21

- removed B690 + sub-tags - previously filed application - from this document. It is still in the DTDs listed above but WILL NOT BE USED (on the advice of WIPO). In PHASE 3 of EPC2000 it will be introduced as, probably, <B270>, but this has to be cleared by WIPO; once it is agreed by WIPO we will issue new DTDs which will also contain other EPC2000 tags.

Summary of changes in Version 3.22

- Added EPC 2000 new Article and Rule numbers in place of old equivalents eg. Art. 158(3) becomes 153(4). (Annex II of EPC 2000 has a cross-reference list).
- Corrected
`<!ELEMENT B0900EP (B091EP+) >` to `<!ELEMENT B0900EP (B091EP) >`
 (DTD is OK on this point)
- Clarified values at <B0756EP>
- Various tidying up of text layout
- Note that examples may still have the older DTD version number

Summary of changes in Version 3.23

This document covers the changes for Phase 3 a) and b) - which will occur at different times during 2008:

Phase	What	Publ. run	Publ. week
Phase 3 a) Datimtex v1.5	- added: <!ELEMENT B012EP (B0120EP+)> - New revocation procedure - changed: <!ELEMENT B0900EP (B091EP+, B092EP?,B093EP?)> - Limitation procedure - added: <!ELEMENT B270 (dnum,date,ctry,kind?,dtxxt*) > - Previously filed application - Changed DTD version number to 1-3 (note: examples may have older version numbers)	2008-04-18	2008-21 (21.05.2008)
Phase 3 b) Datimtex v1.6	- added: details for B3 publications - added: <!ELEMENT B453EP (B4530EP+)> Limitation decision - changed, added attribute <!ELEMENT B132EP (#PCDATA)> <!ATTLIST B132EP sequence CDATA #IMPLIED > - added at <B121EP> Descriptive text for B2 and B3 documents - changed root element attribute values for id and/or file for ep-bulletin.dtd and ep- patent-document.dtd	2008-06-20	2008-30 (23.07.2008)

Summary of changes in Version 3.24

- There have been no new elements or attributes added or changed.
- An additional attribute value has been added to the **comments** of tag <B245EP> - added value "7" = Bankruptcy of the representative (Rule 142(1)c)
- The version number has changed to keep pace with ep-patent-document.dtd where there have been changes (these changes do not affect the abstract)

Summary of changes in Version 3.24.1

On page 26, changed B730 to B731, grantee data.

Summary of changes in Version 3.24.2

Add Montenegro (ME) & San Marino (SM) in B001EP tag

Summary of changes in Version 3.25

- Define B565 tag which will contain the date of completion of search report
- Define tags for the Validation states B848EP & B849EP

Summary of changes in Version 3.26

Define the group tag B7000 to store the following data of the with Unitary Patent Protection (UPP) :

Date of filing for a unitary protection request
 Date of withdrawal of the unitary protection request
 Decision date & purport of unitary protection request
 Place of business
 Registration data (date, effect, countries)
 Inventors
 Proprietor's Reference, name & address
 Proprietor's representative
 Renewal fees
 Date of dispatch of the lapse situation
 Date of legal effect of the lapse
 Date of request for re- establishment of rights
 Date of decision & purport for re-establishment of rights
 Intention to license
 Withdrawal of the Intention to license
 Licence registration
 Legal means of execution
 Interruption (Rule 142)
 Resumption
 Revocation
 Revocation on request
 Limitation procedure - initial request
 Limitation procedure - request rejected
 Limitation procedure - request allowed
 Public notification

Summary of changes in Version 4.0

Define the following additional data of the Unitary Patent Protection (UPP) to be included in the group tag B7000:

Proceedings before the UPC (action, appeal, decision)
 Licensing commitment
 Information communicated by other authorities

and also (**not** part of the B7000 group tag).

Opt-out dates (registration & withdrawal)
 C0 marker

Summary of changes in Version 4.1

Detail definition of the value 9120 stored in B006EP tag

Summary of changes in Version 4.2

Adapt word document to the MS Office 365/Word version

Suppress unnecessary blank pages

Summary of changes in Version 4.3

Define B520EP to store the CPC symbols

Remove value '1' [Stay (Rule 14)] from B7245 because Rule 14 EPC does not apply for the Unitary Protection procedure.

Summary of changes in Version 4.4

Example when a negative decision is changed into a positive decision

New table with the possible values on the UPC "*Decision code*"

Summary of changes in Version 4.5

Table with the possible values of the UPC "*Decision code*" has been reviewed & confirmed by UPC on 5th December 2022. Consequently amend also the examples of B7060 tag (Proceedings before the UPC).

Add new validation state codes in "B001EP - Selective mask for states involved" tag

Explain the value "PBKFEE" in the B7471@kind attribute

Add that according Rule 5(5),(7) and Rule 5a(1) of the Rules of Procedure of the UPC, the B921 (opt-out) & B922 (withdrawal of the opt-out) tags may also have status="r" or status="d"

Summary of changes in Version 4.5.1

Replace the country name Turkey by Türkiye

Mark B7061 as changed in the example "**Action filed at UPC**"

Do no mark as changed B7062 in the example "Appeal filed on a decision by UPC"

Add tag B7910 tag in the example structure

Review examples of B921 (opt-out) & B922 (withdrawal of the opt-out)

Review UPC "*Decision code*" table to correct the typo "REVOKED_" by "REVOKED"

Summary of changes in Version 4.5.2

Include the following disclaimer for tags B921 (opt-out) & B922 (withdrawal of the opt-out)

Summary of changes in Version 4.5.3

Add disclaimer "*Responsibility for the accuracy, completeness or quality of the data relating to the optouts lies entirely with the Unified Patent Court.*"

Summary of changes in Version 4.5.4

Review UPC “*Decision code*” table to add the decision code “PROCEEDING_TERMINATED”
Review code of the purport for re-establishment of rights (B7238 tag) to keep only the values ‘2’ & ‘3’

Summary of changes in Version 4.5.5

Add a description for B790 tag - Licences

Amend the definition UPC “*Action code*” value ‘P’ to “*Provisional measures on protective measures or injunctions*”

Correct the positions in B001EP Tunesia & Moldova:

87-88	TN	Tunesia **
89-90	MD	Moldova **

Add Georgia country code ‘GE’ in B001EP in positions 91-92

The following tags have also been amended:

- B7061: add attributes *sequence*, *spc-ctry*, *spc-number*
- B7065: add attribute *sequence*
- B921 & B922: add attribute case-number

Summary of changes in Version 4.5.6

Add the positions in B001EP for Laos:

94-95	LA	Lao People's Democratic Republic **
-------	----	-------------------------------------

In tag “B7050 – Renewal fees”, add this sentence in the description:

It contains the data of the **most recent** *renewal year*.

Summary of changes in Version 4.5.7

Update of status of Moldova from Validation state to Designated state.

Clarification of situations where UP effect can be deleted.

Update of some links to the EPO website, correction of some minor typographical errors and

Removal of some out of date parts of the document:

- page 81 of version 4.5.6 - removed the diagram

- Page 101 of version 4.5.6 - removed

Corrections and changes to previous publications using earlier versions of the IPC

For several months and, probably, years the EPO will be processing data coded to previous versions (editions) of the IPC - for the front file (01.2006 on) we will use the 50 position IPCR in all cases and positions 20 to 27 - the version indicator date - will contain the date of creation of the IPC as held in the EPO database. This could, of course, be well before 2006 ...

- Page 155 of version 4.5.6 - table removed
Character set

Introduction

Many EPO computer systems and projects process data on the EPO's IBM **mainframe** - one of the code pages on this system is IBM EBCDIC (Extended Binary Coded Decimal Interchange Code) Code Page 500. This is an internationally recognised code page for EBCDIC. As mentioned at the beginning we extract EBD data from the EPASYS system which stores data in Code Page 500:

HEX DIGITS												
1ST →	4-	5-	6-	7-	8-	9-	A-	B-	C-	D-	E-	F-
2ND ↓	-0	&	-	ø	Ø	°	μ	€	{	}	\	0
	SP010000	SM030000	SP100000	LO610000	LO620000	SM190000	SM170000	SC040000	SM110000	SM140000	SM070000	ND100000
-1	(RSP)	é	/	Ê	a	i	~	£	A	J	÷	1

...

Summary of changes in Version 4.5.8

Correction of a typographical error – the correct most recent version of the Bulletin DTD is dtd-version="ep-bulletin-v1-7">. This is now the version mentioned in Section 11, case c).

Summary of changes in Version 4.5.9

Document cleanup.

Europäisches
Patentamt
European
Patent Office
Office européen
des brevets

Introduction

1. What are EBD files? EBD stands for EPO Bibliographic Data (it could also be EP Bulletin Data); the files consist of EPO patent data marked up using XML tags; the data gives details of all newly published applications and patents and recent changes to previously published patents. For example, the data includes details of date of filing, titles, applicant data, classification, priority data, etc. These are fairly complex files which require a good understanding of EPO patent procedures.
2. This document describes the format for bibliographic data used for:
 - 2.1 The EP Bulletin - see: [European Patent Bulletin | epo.org](http://epo.org)
 - 2.2 The EBD website - see <https://www.epo.org/searching-for-patents/data/bulk-data-sets/ebd.html>
 - 2.3 EPO patent publications – the title page - see: <https://data.epo.org/publication-server/?lg=en>
 - 2.4 EPO bibliographic data exchange where the mark-up of the data conforms to WIPO Standard ST.36 - see <https://www.wipo.int/en/web/standards>
3. The format provides for a system independent data format, using XML. (Note that the full text and images of all EP A and B documents are also available in ST.36 (XML) format).
4. The EBD files are available at: <https://publication-bdds.apps.epo.org/raw-data/products/public/product/10>
Check the website for the latest updates – including changes to this document.
5. The application of the standard for bibliographic data processing is described below. As stated, it should be noted that these files contain fairly complex data and a good knowledge of EPO patent rules and formalities is required to make full use of the data, which includes a careful study of this document.
6. **Note:** not all data elements in ST.36 and the ep-bulletin.dtd are used by the EPO; only the ones used are described in this document.

Data description

1. The bibliographic data described below includes all the information according to Rule 143 of the EPC (European Patent Convention, 13th edition; previously Rule 92). That is “**Rule 143 - Entries in the Register of European Patents**”
<https://www.epo.org/en/legal/epc/2020/r143.html>

(1) The Register of European Patents shall contain the following entries:

(a) number of the European patent application;

(b) date of filing of the application;

(c) title of the invention;

(d) classification symbols assigned to the application;

(e) the Contracting States designated;

(f) particulars of the applicant for or proprietor of the patent as provided in Rule 41, paragraph 2(c);

(g) family name, given names and country and place of residence of the inventor designated by the applicant for or proprietor of the patent, unless he has waived his right to be mentioned under Rule 20, paragraph 1;

(h) particulars of the representative of the applicant for or proprietor of the patent as provided in Rule 41, paragraph 2(d). In the case of several representatives only the particulars of the representative first named, followed by the words "and others" and, in the case of an association referred to in Rule 152, paragraph 11, only the name and address of the association;

(i) priority data (date, State and file number of the previous application);

(j) in the event of a division of the application, the numbers of all the divisional applications;

(k) in the case of a divisional application or a new application under Article 61, paragraph 1(b), the information referred to in sub-paragraphs (a), (b) and (i) with regard to the earlier application;

(l) date of publication of the application and, where appropriate, date of the separate publication of the European search report;

(m) date of filing of the request for examination;

(n) date on which the application is refused, withdrawn or deemed to be withdrawn;

- (o) date of publication of the mention of the grant of the European patent;
- (p) date of lapse of the European patent in a Contracting State during the opposition period and, where appropriate, pending a final decision on opposition;
- (q) date of filing opposition;
- (r) date and purport of the decision on opposition;
- (s) dates of stay and resumption of proceedings in the cases referred to in Rules 14 & 78;
- (t) dates of interruption and resumption of proceedings in the case referred to in Rule 142;
- (u) date of re-establishment of rights provided that an entry has been made in accordance with sub-paragraph (n) or sub-paragraph (r);
- (v) the filing of a request for conversion under Article 135, paragraph 3;
- (w) rights and transfer of such rights relating to an application or a European patent where these Implementing Regulations provide that they shall be recorded.
- (x) date and purport of the decision on the request for limitation or revocation of the European patent;
- (y) date and purport of the decision of the Enlarged Board of Appeal on the petition for review.

2. This information allows users to keep European Patent Register information up-to-date. For details about the EPO Patent Register see: www.epo.org and click on the **European Patent Register link**. The big differences between the Register and EBD files are:
 - 2.1 The register provides complete historical data for a patent file plus other information not included in Rule 143. The EBD covers one publication week and all new and changed data during that week.
 - 2.2 The EBD provides bulk data (for a publication week only) which can be downloaded for database updates etc. The Register deals with individual files only.
3. It must be stressed that this format will be used only for EP publication data and not necessarily, for example, from other EPO systems such as DOCDB .
4. All data in the EBD format is extracted from the EPO's EPASYS and UNIPSYS databases – EPASYS is a database that contains all procedural data regarding European patent documents. EPASYS data input is the responsibility of many EPO staff (examiners and formalities officers) with many thousands of transactions taking place per day. No new data content is added during the conversion to the EBD format (except XML tags) - we can only process what is in the EPASYS database. If there is a mistake in EPASYS, for example, there will be a mistake in the EBD data.

5. Once per week there is a process, called 'Publication Run', which extracts all the data required from EPASYS for the publication of EP A and B publications, the EP Bulletin and for data exchange purposes. It is at this time that the bibliographic data file is created. Therefore, the data is a 'photograph' of all the previous weeks additions, changes, etc. in EPASYS
6. It should be noted that the EBD file is not a cumulative record of all the changes which may have been made to a file (for this users should refer to the Register of European Patents (see above) - it is a 'snap shot' of only those changes which occurred in a particular publication week. In addition there is a clear distinction between A and B publications (separate files) since these are separate documents for publication purposes - therefore, the B file is not an update of the A file; it is a file in its own right (extracted from EPASYS) - although, of course, much of the data may be the same in both files.
7. Pursuant to Article 83(3)(4) Agreement on a Unified Patent Court, a proprietor of or an applicant for a European patent may opt out from the exclusive competence of the Court and withdraw their opt out at any time. The opt out and its withdrawal take effect upon their entry in the UPC Register. The date of registration of the opt-out & the date of withdrawal of the opt-out will be stored in the tags B921 & B922 respectively.
8. According to Rule 5(5),(7) and Rule 5a(1) of the Rules of Procedure of the UPC, the proprietor of a European patent or the applicant for a published application for a European patent may record a correction of the opt-out/withdrawal of the opt-out or the removal of an unauthorised opt-out/unauthorised withdrawal of an opt out. Consequently, the B921 & B922 tags may also have a status="r" (replaced) or status="d" (deleted).
9. For EP patents with **"Unitary patent protection" (UPP)** the related bibliographic data will be stored in a new group tag B7000 and will include all the items described in the UPR Rule 16 and in the [Regulation \(EU\) No 1257/2012](#)
 - R 16(1)(a), UPR - (a) date of publication of the mention of the grant of the European patent;
 - R 16(1)(b), UPR - (b) date of filing of the request for unitary effect for the European patent;
 - R 16(1)(c), UPR - (c) particulars of the representative of the proprietor of the European patent as provided for in Rule 41, paragraph 2(d), EPC; in the case of several representatives, only the particulars of the representative first named, followed by the words "and others" and, in the case of an association referred to in Rule 152, paragraph 11, EPC, only the name and address of the association;
 - R 16(1)(d), UPR - (d) date and purport of the decision on the registration of unitary effect for the European patent
 - R 16(1)(e), UPR - (e) date of registration of the unitary effect of the European patent;

- R 16(1)(f), UPR - (f) date of effect of the European patent with unitary effect pursuant to Article 4, paragraph 1, Regulation (EU) No 1257/2012;
- R 16(1)(g), UPR - (g) participating Member States in which the European patent with unitary effect has unitary effect pursuant to Article 18, paragraph 2, Regulation (EU) No 1257/2012
- R 16(1)(h), UPR - (h) particulars of the proprietor of the European patent with unitary effect as provided for in Rule 41, paragraph 2(c), EPC;
- R 16(1)(i), UPR - (i) family name, given names and address of the inventor designated by the applicant for or proprietor of the patent, unless he has waived his right to be mentioned under Rule 20 paragraph 1 EPC;
- R 16(1)(j), UPR - (j) rights and transfer of such rights relating to the European patent with unitary effect where the present Rules provide that they shall be recorded at the request of an interested party;
- R 16(1)(k), UPR - (k) licensing commitments undertaken by the proprietor of the European patent with unitary effect in international standardisation bodies pursuant to Article 9, paragraph 1(c), Regulation (EU) No 1257/2012, where the proprietor requested their registration;
- R 16(1)(l), UPR - (l) date of filing and date of withdrawal of the statement provided for in Rule 12;
- R 16(1)(m), UPR - (m) date of lapse of the European patent with unitary effect
- R 16(1)(n), UPR - (n) data as to the payment of renewal fees for the European patent with unitary effect, including, where applicable, data on the payment of an additional fee pursuant to Rule 13, paragraph 3;
- R 16(1)(r), UPR - (r) date of receipt of a request for re-establishment of rights;
- R 16(1)(s), UPR - (s) refusal of a request for re-establishment of rights;
- R 16(1)(t), UPR - (t) date of re-establishment of rights;
- R 16(1)(u), UPR - (u) dates of interruption and resumption of proceedings;
- R 16(1)(w), UPR - (w) information regarding a place of business of the applicant on the date of filing of the application for the European patent pursuant to Article 7, paragraph 1(b), Regulation (EU) No 1257/2012 provided by the proprietor of the European patent or of the European patent with unitary effect.
- R 16(1)(o), UPR - (o) a record of the information communicated to the European Patent Office concerning proceedings before the Unified Patent Court;

- R 16(1)(p), UPR – (p) a record of the information communicated to the European Patent Office by the central industrial property offices, courts and other competent authorities of the participating Member States;
- R 16(1)(q), UPR - (q) date and purport of the decision on the validity of a European patent with unitary effect taken by the Unified Patent Court;
- R 16(1)(v), UPR - (v) date of issuance, date of expiry and date and purport of the decision on the validity of a supplementary protection certificate for a product protected by the European patent with unitary effect as well as the participating Member State issuing it.

According to Regulation (EU) No 1257/2012 on page L 36/4 , Article 2 mentions “Register for unitary patent protection’ means the register constituting part of the European Patent Register in which the unitary effect and any limitation, licences, transfer, revocation or lapse of a European patent with unitary effect are registered”. Therefore the revocation dates and limitation data will be also stored in the EBD/St.36 XML file in B7000 group tag.

Overview of bibliographic data flow

OBJ In terms of volume and size of data the average weekly bibliographic data for 2025
:

New (first) EP publications:

A1 and A2	:	1400 Docs
A3	:	360 Docs
B1	:	1052 Docs
B2	:	15 Docs

Euro PCT	:	2485 Docs
----------	---	-----------

Note: when stored all these files will be 'zipped' to create a zip file with a size varying from 5 to 50MB, containing two files: one for all A publications and one for all B publications - these will extract to, say, 35 and 350 MB respectively in 2025.

10. When extracting the data from EPASYS we split the job into the following parts:

10.1 A1 and A2: EP patent applications and Euro-PCT's (Art. 153(4)) which have not been published in one of the three EPO languages.

These are listed in the EP Bulletin in Section I.1(2)

10.2 A3: EP patent applications (Title page plus search report)

These are listed in the EP Bulletin in Section I.1(3)

10.3 B1: EP patent specifications

These are listed in the EP Bulletin in Section II.1(1)

10.4 B2: NEW EUROPEAN PATENT SPECIFICATION
NEUE EUROPÄISCHE PATENTSCHRIFT
NOUVEAU FASCICULE DE BREVET EUROPEEN

to be followed with a new second line indicating B2
'After Opposition procedure'
'Nach dem Einspruchsverfahren'
'Après la procédure d'opposition'

These are listed in the EP Bulletin in Section II.1(2)

10.5 B3: NEW EUROPEAN PATENT SPECIFICATION
NEUE EUROPÄISCHE PATENTSCHRIFT
NOUVEAU FASCICULE DE BREVET EUROPEEN

to be followed with a second line indicating a B3

'After limitation procedure (B3-1)'
'Nach dem Beschränkungsverfahren (B3-1)'
'Après la procédure de limitation (B3-1)'.

These are listed in the EP Bulletin in Section II.1(3)

10.6 Euro-PCT applications:

International applications which have entered the European phase (Art 153(1)). These are listed in the EP Bulletin in Section I.1(1) which contains all Euro-PCT applications for which the EPO has not printed the A-document. To identify these applications in the Bulletin Section I.1(1), an asterisk '*' is printed next to the publication number.

10.7 International applications not entering the European phase.

These are listed in the EP Bulletin in Section I.2 which contains all international applications which have not paid the fees in due time and therefore are not entering the European phase.

10.8 A-patent application changes

These are listed in the EP Bulletin in Section I.12

10.9 B-patent specification changes

These are listed in the EP Bulletin in Section II.12

11. The new EP publications:

A1, A2 and A3: EP patent applications
B1, B2 and B3: EP patent specifications

need little explanation - these are the documents coded as "ready for publication" 4.5 weeks before the publication. Therefore, for example, the EPO publication contractors will use this data, together with data previously captured by them, eg. description and drawings, to create and print the final patent documents for that week.

12. Changed EP documents:

These need more explanation - especially on the size of the two files: generally over 10 MB altogether.

In the EP Bulletin only brief details are given of changes to published documents. The most common changes, for A documents, for example, are shown in Section I.7: "Date of filing of request for examination", with the following format:

(11) 0 851 243 13.10.1999

In the XML file ALL the bibliographic data for this publication would be given.

Table of tags

These tables do **not** include all bibliographic tags listed in WIPO ST.36 and in the DTD; only those required for the Bulletin-EBD format. The table is followed by a detailed description of each tag and example mark up.

Key to column headers:

INID: an acronym for “Internationally agreed Numbers for the Identification of (bibliographic) Data.”: a list of approximately 60 distinct bibliographic data widely used on the first page of patent documents or in Patent Gazettes. (See WIPO ST.9)

Rep tag: Repeat tag

INID code	Rep Tag	Bibliographic tag				Description	
					B7930	Limitation request allowed	
						B7931	Despatched on (date)
						B7932	Translation received (date)
						B7933	Payment received (date)

Note: "R" in third column (Rep. tag) means that the tag may be repeated.

Item description and general considerations

1. Dates are stored in 8 bytes. The format is always yyyyymmdd. The date is preceded by the <date> tag.
2. The issue number of the Bulletin is stored in 6 bytes in. The format is yyyyynn. The issue number is preceded by the <bnum> tag
3. The values used for country, state or language code fields are according to the Standard ISO/R 639-1967(F). The country code is preceded by the <ctry> tag and is always in UPPER case.
4. All elements are closed by an end tag i.e. the 'start tag' with a slash character </...>.

Example:

```
<B110> ... data ... </B110>
<B450><date>20050420</date><bnum>200516</bnum> </B450>
```

5. A few characters, according to the XML standard, are coded as character entity references:

& : &	- ampersand (the most common)
> : >	- greater than
< : <	- less than

Example:

J.A. Kemp & Co. = J.A. Kemp & Co.

6. Euro-PCT applications

WIPO sends application data to the EPO. Later on these applications will be split into:

- Applications **not entering** the European phase because the application is deemed to be withdrawn. These are printed in the Bulletin in "Section I.2".
- Applications **entering** the European phase (Euro-PCT). But there are two categories:
 - A. Applications for which EPO **does print** the A-document.
Currently EPO prints, after translation, applications which were filed in Russian, Japanese, Spanish and Chinese. These are printed in the Bulletin in Section I.1(2) together with the EP documents.
 - B. Applications for which EPO **does not print** the A-document because the application was filed in one of the three official languages of the EPO (English, French or German).

These are printed in the Bulletin in "Section I.1(1)".

However, if the file goes forward for substantive examination, etc, the EPO may print the Patent Specification (B-document).

The usage and contents of ep-bulletin (country, doc-number), B110, B190, B003EP and B006EP tags for the cases above is shown in the table below.

Situation	country	Doc-number	B110	B190	B003EP	B006EP
Normal EPO publications These applications are printed in EPO Bulletin "Section I.1(2)".	EP	EPO publ number	EPO publ number	EP	Not used	Not used
WIPO publications with no EPO publication nr. and which are NOT entering the European phase . These applications are printed in the EPO Bulletin "Section I.2". Note: Tag <B237> contains the date when the application is deemed to be withdrawn.	WO	WIPO publ nr	WIPO publ nr	WO	Not used	9121
WIPO publications entering the European phase , (EURO PCT) and the EPO prints the A-document. These applications are printed in the EPO Bulletin "Section I.1(2)"	EP	EPO publ number	EPO publ number	EP	Not used	Not used
WIPO publications entering the European phase , (EURO PCT) and the EPO does not print the A-document. These applications are printed in the in EPO Bulletin "Section I.1(1)".	EP	EPO publ number	EPO publ number	EP	* (asterisk)	Not used

Kinds of EP patent documents

1. A1/A2 new publication

ep-bulletin ... kind=**A1** or **A2**
status=**n**

Example:

```
<ep-bulletin id="EP1024184A1" file="00100234.4" lang="de" country="EP" doc-
number="1024184" kind="A1" date-publ="20050105" status="n" dtd-version="ep-bulletin-v1-1">
```

```
<B110>1024184</B110>
```

```
<B130>A2</B130>
```

```
<B430>
  <date>20050105</date>
  <bnum>200501</bnum>
</B430>
```

2. A1/A2 publication deleted

ep-bulletin kind=**A1** or **A2**
status=**r**

B110 marked as deleted status=**d** ie. Publication is deleted

B130 marked as changed status=**r**

B430 marked as deleted status=**d**

Example:

```
<ep-bulletin id="EP1510131A1" file="03077683.5" lang="en" country="EP" doc-
number="1510131" kind="A1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-1">
```

```
<B002EP>
<ep-chg-info>
  <ep-chg idref="ep-chg0001" btag="B110" date="20041119" status="d"/>
  <ep-chg idref="ep-chg0002" btag="B130" date="20041119" status="r"/>
  <ep-chg idref="ep-chg0003" btag="B430" date="20041119" status="d"/>
</ep-chg-info>
</B002EP>
```

...

```
<B110 id="ep-chg0001">1510131</B110> ..
```

```
<B130 id="ep-chg0002">A1</B130> ..
```

```
<B430 id="ep-chg0003"></B430>
```

or

```
<B430 id="ep-chg0003"/>
```

3. A3 publication deleted

- ep-bulletin kind=**A2**
- ep-bulletin status=**r**
- B880 marked as deleted status=**d**

Example:

```
<ep-bulletin id="EP1407749A2" file="03292493.8" lang="en" country="EP" doc-
number="1407749" kind="A2" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
3">
```

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B880" date="20041119" status="d"/>
  </ep-chg-info>
</B002EP>
```

```
...
<B880 id="ep-chg0001"></B880>
```

or

```
<B880 id="ep-chg0001"/>
....
```

4. B1 new publication

- ep-bulletin kind=**B1**
- ep-bulletin status=**n**

Example:

```
<ep-bulletin id="EP1104651B1" file="99926835.2" lang="en" country="EP" doc-
number="1104651" kind="B1" date-publ="20050105" status="n" dtd-version="ep-bulletin-v1-
3">
```

```
...
<B130>B1
</B130>
...
<B450>
  <date>20050102</date>
  <bnum>200501</bnum>
</B450>
```

5. B1 publication deleted

- ep-bulletin kind=**B1**
- ep-bulletin status=**r**
- B130 marked as changed status=**r**
- B450 marked as deleted status=**d**

```
<ep-bulletin id="EP0950772B1" file="99302798.6" lang="en" country="EP" doc-
number="0950772" kind="B1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
1">...
```

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B130" date="20041119" status="r"/>
    <ep-chg idref="ep-chg0002" btag="B450" date="20041119" status="d"/>
  </ep-chg-info>
</B002EP>
```

```
.....
<B130 id="ep-chg0001">A2</B130>
```

```
.....
<B450 id="ep-chg0002"></B450>
```

or

```
<B450 id="ep-chg0002"/>
```

```
.....
```

6. B2 new publication

- ep-bulletin kind=**B2**
- ep-bulletin status=**n**

```
<ep-bulletin id="EP0709426B2" file="95810650.2" lang="de" country="EP" doc-
number="0709426" kind="B2" date-publ="20050105" status="n" dtd-version="ep-bulletin-v1-
1">
```

```
...
<B130>B2</B130>
```

```
...
<B450>
  <date>20000705
  <bnum>200027
</B450>
```

```
...
<B477>
  <date>20050105
  <bnum>200501
</B477>
```

7. B2 publication deleted

- ep-bulletin kind=**B2**
- ep-bulletin status=**r**
- B130 marked as changed status=**r**
- B477 marked as deleted status=**d**

```
<ep-bulletin id="EP1015504B2" file="98954254.3" lang="en" country="EP" doc-
number="1015504" kind="B2" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
1">
```

```
...
```

```
<B002EP>
```

```
<ep-chg-info>
```

```
<ep-chg idref="ep-chg0001" btag="B130" date="20041119" status="r"/>
```

```
<ep-chg idref="ep-chg0002" btag="B477" date="20041119" status="d"/>
```

```
</ep-chg-info>
```

```
</B002EP>
```

```
.....
```

```
<B130 id="ep-chg0001">B1</B130>
```

```
.....
```

```
<B477 id="ep-chg0002"></B477>
```

or

```
<B477 id="ep-chg0002"/>
```

```
.....
```

8. B3 new publication

EPC 2000 Phase 3b)

- ep-bulletin kind=**B3**
- ep-bulletin status=n

```
<ep-bulletin id="EP0709426B31" file="95810650.2" lang="de" country="EP" doc-
number="0709426" kind="B3" date-publ="20050105" status="n" sequence="1" dtd-
version="ep-bulletin-v1-3">
```

```
...
```

```
<B130>B3</B130>
```

```
...
```

```
<B450>
```

```
<date>20000705
```

```
<bnum>200027
```

```
</B450>
```

```
...
<B453EP>
```

```
<B4530EP sequence="1" limitation-sequence="1">
```

```
<kind>B3</kind>
```

```
<date>20050105</date>
```

```
<bnum>200501</bnum>
```

```
</B4530EP>
```

```
</B453EP>
```

Notes:

- Kind B3 is the first EPO patent publication which has the possibility of one or more occurrences of the original kind code (leaving aside corrected patents)
- For this reason we have added to the kind code (B3) in the id attribute a sequence number - "B31", "B32", etc - otherwise the id would not be unique.
- We have also added the "**sequence**" attribute to the root element.

9. Request for a **“Unitary patent protection”** on a granted EP patent

- ep-bulletin kind=B1
- ep-bulletin status=r
- B7001 tag marked as changed with status=n

```
<ep-bulletin id="EP0950772B1" file="99302798.6" lang="en" country="EP" doc-
number="0950772" kind="B1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
6">...
```

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B7001" date="20170108" status="n"/>
  </ep-chg-info>
</B002EP>
..
<B7000>
  <B7001 id="ep-chg0001"><date>20170106</date></B7001>
</B7000>
</ep-bulletin>
```

10. Positive decision of the request for a **“Unitary patent protection”** on a granted EP patent

- ep-bulletin kind=B1, B3
- ep-bulletin status=r
- B7002 tag marked as changed with status=n

```
<ep-bulletin id="EP0950772B1" file="99302798.6" lang="en" country="EP" doc-
number="0950772" kind="B1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
6">...
```

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B7002" date="20170115" status="n"/>
  </ep-chg-info>
</B002EP>
..
<B7000>
  <B7001><date>20170106</date></B7001>
  <B7002 id="ep-chg0001" decision="P">
    <date>20170114</date>
  </B7002>
...
</B7000>
</ep-bulletin>
```

Additionally, an XML document with **kind="C0"** & **status="u"** (for unpublished) will also be available with the same bibliographic data but no tags marked as changed; for example:

```
<ep-bulletin id="EP0950772C0" file="99302798.6" lang="en" country="EP" doc-
number="0950772" kind="C0" date-publ="20050105" status="u" dtd-version="ep-bulletin-v1-
6">...
</ep-bulletin>
```

11. Deletion of the registration of the unitary patent

In certain situations, there may be deletion of a registration of a unitary patent, so far, the following cases have been identified:

- a) If a decision is changed from positive to negative
- b) If a registration is made in error and subsequently cancelled
- c) If a registration is made, but then the B1 publication is deleted

For each of these three situations the flow is slightly different:

Case a):

It may happen that the registration of unitary patent request is deleted e.g. when the decision is changed from positive to negative. In this case we will have the following XML mark-up:

- ep-bulletin kind=B1, B2, B3
- ep-bulletin status=r
- B7002 tag marked as changed with status=r
- B7021, B7022 & B7023 tags marked as changed with status=d
- Optionally B7006 tag may be marked as changed with status=d

```
<ep-bulletin id="EP10158909B1" file="10158909.1" lang="de" country="EP" doc-
number="2246661" kind="B1" date-publ="20150514" status="r" dtd-version="ep-
bulletin-v1-6"> ...
```

```
<B002EP>
```

```
<ep-chg-info>
```

```
<ep-chg idref="ep-chg0001" btag="B7002" date="20171127" status="r"/>
```

```
<ep-chg idref="ep-chg0002" btag="B7021" date="20171127" status="d"/>
```

```
<ep-chg idref="ep-chg0003" btag="B7022" date="20171127" status="d"/>
```

```
<ep-chg idref="ep-chg0004" btag="B7023" date="20171127" status="d"/>
```

```
</ep-chg-info>
```

```
</B002EP>
```

```
...
```

```
<B7000>
```

```
<B7001><date>20170106</date></B7001>
```

```
<B7002 id="ep-chg0001" decision="N">
```

```
<date>20170114</date>
```

```
</B7002>
```

```
<B7020>
```

```
<B7021 id="ep-chg0002">
```

```
<date></date>
```

```
</B7021>
```

```
<B7022 id="ep-chg0003">
```

```
<date></date>
```

```
</B7022>
```

```
<B7023 id="ep-chg0004">
```

```
<ctry></ctry>
```

```
</B7023>
```

```
</B7020>
```

```
</B7000>
```

Additionally, an XML document with kind="C0" & status="d" (for deleted) will also be available with the same bibliographic data but no tags marked as changed; for example:

```
<ep-bulletin id=" EP10158909C0" file="10158909.1" lang="en" country="EP" doc-
number="2246661" kind="C0" date-publ="20050105" status="d" dtd-version="ep-
bulletin-v1-6"> . . .
</ep-bulletin>
```

Case b):

The situation starts from the UP request (B7001=n) and UP registration (C0 publication, B7002=n and decision is Positive) having been announced. However, the EPO, of its own motion, realises that the UP registration should not be permitted and initiates the cancellation of UP registration (C0 marker deleted, C0 status d). In this case we will have the following XML markup

- ep-bulletin kind=B1, B2, B3
- ep-bulletin status=r
- B7002, B7021, B7022 & B7023 tags marked as changed with status=d
- Optionally B7006 tag may be marked as changed with status=d

```
<B002EP>
<ep-chg-info>
<ep-chg idref="ep-chg0001" btag="B7002" date="20171127" status="d"/>
<ep-chg idref="ep-chg0002" btag="B7021" date="20171127" status="d"/>
<ep-chg idref="ep-chg0003" btag="B7022" date="20171127" status="d"/>
<ep-chg idref="ep-chg0004" btag="B7023" date="20171127" status="d"/>
</ep-chg-info>
</B002EP>
...
<B7000>
  <B7001><date>20260106</date></B7001>
  <B7002 id="ep-chg0001" >
    <date></date>
  </B7002>
  <B7020>
  <B7021 id="ep-chg0002">
    <date></date>
  </B7021>
  <B7022 id="ep-chg0003">
    <date></date>
  </B7022>
  <B7023 id="ep-chg0004">
    <ctry></ctry>
  </B7023>
</B7020>
</B7000>
```

Additionally, an XML document with kind="C0" & status="d" (for deleted) will also be available with the same bibliographic data but no tags marked as changed; for example:

```
<ep-bulletin id=" EP10158909C0" file="10158909.1" lang="en" country="EP" doc-
number="2246661" kind="C0" date-publ="20050105" status="d" dtd-version="ep-
bulletin-v1-6">. . .
</ep-bulletin>
```

Case c):

In this situation, the B1 (or B2 or B3) and all the events in the UP procedure, including the UP registrations need to be cancelled due to legal actions such as interruption or for example appeal of the proprietor against the grant of his own patent. In these cases, the original announcements of the granted patents, the unitary effect and the UP registrations will be cancelled, and these cancellations will be announced in the EBD

- ep-bulletin kind=B1, B2, B3
- ep-bulletin status=r
- B130 tag marked as changed with status=r
- B450, B7001, B7002, B7021, B7022 & B7023 tags marked as changed with status=d
- Optionally B7006 tag may be marked as changed with status=d

```
<B002EP>

    <ctry></ctry>
</B7023>
</B7020>
</B7000>
```

Additionally, an XML document with kind="C0" & status="d" (for deleted) will also be available with the same bibliographic data but no tags marked as changed; for example:

```
<ep-bulletin id=" EP10158909C0" file="10158909.1" lang="en" country="EP" doc-
number="2246661" kind="C0" date-publ="20050105" status="d" dtd-version="ep-
bulletin-v1-7">. . .
</ep-bulletin>
```

12. Negative decision of the request for a “**Unitary patent protection**” is changed in **positive**

It may happen that a decision is changed from **negative** to **positive** due to a UPC decision on an action filed by the patent proprietor. In this case we will have the following XML mark-up:

- ep-bulletin kind=B1, B3
- ep-bulletin status=r
- B7002 tag marked as changed with status=r

```
<ep-bulletin id="EP0950772B1" file="99302798.6" lang="en" country="EP" doc-
number="0950772" kind="B1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-
6">. . .
```

```
<B002EP>
<ep-chg-info>
  <ep-chg idref="ep-chg0001" btag="B7002" date="20170115" status="r"/>
</ep-chg-info>
</B002EP>
```

```
..
<B7000>
  <B7001><date>20170106</date></B7001>
  <B7002 id="ep-chg0001" decision="P">
    <date>20170114</date>
</B7002>
```

```
...
</B7000>
</ep-bulletin>
```

Additionally, an XML document with kind="C0" & status="u" (for unpublished) will also be available with the same bibliographic data but no tags marked as changed; for example:

Europäisches
Patentamt
European
Patent Office
Office européen
des brevets

```
<ep-bulletin id="EP0950772C0" file="99302798.6" lang="en" country="EP" doc-  
number="0950772" kind="C0" date-publ="20050105" status="u" dtd-version="ep-bulletin-v1-  
6">...  
</ep-bulletin>
```

13. Corrections

1. Printed EP patent applications and patent specifications which have failed to pass the in-house quality assurance inspection, or are reported to be in error by external agencies, are subjected to a corrections procedure. It is estimated that, on average, twenty documents per week are subjected to this procedure, about 0.5% of the total published documents. These documents have the following kind codes:
 - A8 Correction - reprint of the title page of an A-document
 - A9 Correction - complete reprint of an A-document
 - B8 Correction - reprint of the title page of a B-document
 - B9 Correction - complete reprint of a B-document
2. Therefore, based on a specification which is in accordance with WIPO ST.50: *Guidelines for Issuing corrections, alterations and supplements relating to patent information*, the EPO have implemented an automated corrections procedure.
3. The objectives of the procedure are: to have a centralised registration of documents requiring correction, to include the corrected documents in the weekly delivery of documents to the publishers and the subsequent dissemination of the corrected documents to external agencies.
4. The central registration is by means of a special coding (CORR) carried out by EPO staff in the European Patent Administration (EPASYS) database. This coding consists of 'correction items' which detail the corrections being made and possible re-publication to be done.
5. The EBD file contains additional information concerning the corrections being made. These are specified in more detail below.

XML elements: detailed description

Root element ep-bulletin

The following attributes are used in this order: -

id=	The country code, application number and the kind code
file=	Application number with check digit
lang=	Language of publication code "en", "fr" or "de"
country=	Publishing country or organisation – EP or WO
doc-num=	Number of the document, (EPO or WIPO publication number). Same value as <B110>
kind=	Kind of document. Same value as <B130>. unless <B130> has a coding.
correction-code=	Correction code according to WIPO ST.50, eg. W1
date-publ=	Document date of publication. Format is yyyyymmdd
status=	Status of the application; the current values used are: n : New publication e.g. A1, A2, B1, B2 or B3 published for the first time. r : Replacement of data for an application already published. c : Correction u : Unpublished d : Deletion - only used when kind="C0"
sequence=	Sequence number - only used (so far) for kind B3 (EPC2000)
dtd-version=	The version number of the Document Type Definition

Examples:

```
<ep-bulletin id="EP1024184A1" file="00100234.4" lang="de" country="EP" doc-number="1024184"
kind="A1" date-publ="20050104" status="r" dtd-version="ep-bulletin-v1-1">
```

```
<ep-bulletin id="EP00100102A2" file="00100102.3" lang="en" country="EP" doc-number="1018688"
kind="A2" date-publ="20060104" status="r" dtd-version="ep-bulletin-v1-1">
```

```
<ep-bulletin id="EP00115135B9W1" file="00115135.6" lang="en" country="EP" doc-
number="1049079" kind="B9" correction-code="W1" date-publ="20060104" status="c" dtd-
version="ep-bulletin-v1-1">
```

```
<ep-bulletin id="EP0950772C0" file="99302798.6" lang="en" country="EP" doc-number="0950772"
kind="C0" date-publ="20050105" status="u" dtd-version="ep-bulletin-v1-6">. . .
</ep-bulletin>
```

```
<ep-bulletin id="EP0950772C0" file="99302798.6" lang="en" country="EP" doc-number="0950772"
kind="C0" date-publ="20050105" status="d" dtd-version="ep-bulletin-v1-6">. . .
</ep-bulletin>
```

Note: each file starts with:

```
<?xml version="1.0" encoding="UTF-8" ?>
<!DOCTYPE ep-bulletin PUBLIC "-//EPO//EP BULLETIN 1.1//EN" "ep-bulletin-v1-1.dtd">
```

This prologue and declaration are required for XML files. Each file (document instance) starts with these two lines and `<ep-bulletin . . . >` and ends with `</ep-bulletin>`

The basic structure of the DTD is as follows (? = optional):

Note: when the file is merged with the full text of the patent document then we use a different DTD: `ep-patent-document.dtd`; however, all the data elements found in `<SDOBI>` remain exactly the same. The basic structure of this DTD is as follows:

In the model above EITHER `<bibliographic-data>` OR `<SDOBI>` may be used; for the EPO publication system and files we will stick to `<SDOBI>` for the foreseeable future since many other systems and clients use this format. It is intended that there should be a one-to-one relationship between the elements in both models.

SDOBI - Sub-DOCUMENT for Bibliographic data

This tag is kept for backward compatibility with old SGML files; for this reason it is also kept in the main publication DTD: ep-patent-document – see above.

Attribute:

lang= Publication language. Same value as <B260>.

Example:

<SDOBI lang="en">

B000 - Office specific system/file information

eptags - EPO specific tags

Again, kept for backward compatibility and to avoid unnecessary changes. Under ST.36 rules this should really be: <ep-tags> or the like. Tags within this group may be changed at the discretion of the EPO.

B001EP - Selective mask for states involved

Mask for a selection on a particular state involved either by designation, extension or validation. It contains all the states involved in the previously published situation as well as the current situation.

Every state has a fixed position within the mask reflecting the country code if the state has been mentioned, otherwise, if not present, it contains two dots.

Position	Country code	Country name
01-02	AT	Austria
03-04	BE	Belgium
05-06	CH	Switzerland
07-08	DE	Germany
09-10	DK	Denmark
11-12	ES	Spain
13-14	FR	France
15-16	GB	United Kingdom
17-18	GR	Greece
19-20	IT	Italy
21-22	LI	Liechtenstein
23-24	LU	Luxembourg
25-26	NL	Netherlands
27-28	SE	Sweden
29-30	MC	Monaco
31-32	PT	Portugal
33-34	IE	Ireland
35-36	SI	Slovenia
37-38	LT	Lithuania
39-40	LV	Latvia
41-42	FI	Finland

43-44	RO	Romania
45-46	MK	Macedonia
47-48	CY	Cyprus
49-50	AL	Albania
51-52	TR	Türkiye
53-54	BG	Bulgaria
55-56	CZ	Czech Republic
57-58	EE	Estonia
59-60	HU	Hungary
61-62	PL	Poland
63-64	SK	Slovakia
65-66	BA	Bosnia and Herzegovina*
67-68	HR	Croatia
69-70	IS	Iceland
71-72	YU	Serbia and Montenegro*
73-74	MT	Malta
75-76	NO	Norway
77-78	RS	Republic of Serbia
79-80	ME	Montenegro
81-82	SM	San Marino
83-84	MA	Morocco **
85-86	KH	Cambodia **
87-88	TN	Tunesia **
89-90	MD	Moldova
91-92	GE	Georgia **
93-94	LA	Lao People's Democratic Republic **

* = "Extension states", recognising EP patent applications & patents on their territory.

** = "Validation states", recognising EP patent applications & patents on their territory.

Note: The states codes stored in this tag are not necessarily the same state codes as in tag <B840> 'Designated contracting states'; e.g. when one or several states have been deleted, the tag <B840> contains the new situation of the Designated contracting states, however the tag <B001EP> contains the states codes from the previous publication week as well.

Example:

```
<B001EP>ATBECHDEDKESFRGBGRITLILUNLSEMCPTIESILTLVFIROMKCYALTRBGCZEEHUPLSKBAHRISYU.....</
B001EP>
```

```
<B840 id="ep-chg0001">
  <ctry>CH</ctry>
  <ctry>DE</ctry>
  <ctry>FR</ctry>
  <ctry>IT</ctry>
  <ctry>LI</ctry>
</B840>
```

Only the state codes CH, DE, FR, IT & LI have been kept, the rest have been removed.

B002EP - Changed tags

This is a "container" for indicating all changes within a file; it contains the tags:

<ep-chg-info> and <ep-chg>

...1 <ep-chg-info>

Container for:

...2 <ep-chg>

This tag gives the details of where in the file (which Bnnn tag) changes have been made; it has the following attributes giving details of the change:

Attributes:

idref = reference to the id of the Bnnn tag changed
 btag = the actual tag where data has changed eg. B240
 date = date of the change
 status = type of change, the values for the EPO are:
 n = new data, inserted data
 r = replacement data
 d = deleted data

Examples:

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B542" date="20041118" status="r"/>
    <ep-chg idref="ep-chg0002" btag="B542" date="20041118" status="r"/>
    <ep-chg idref="ep-chg0003" btag="B542" date="20041118" status="r"/>
  </ep-chg-info>
</B002EP>
```

Example: the title has been replaced in the three languages:

```
<B540>
  <B541>de</B541>
  <B542 id="ep-chg0001">Verfahren zum Aufschäumen eines metallischen Werkstoffes</B542>
  <B541>en</B541>
  <B542 id="ep-chg0002">Process for foaming metallic articles</B542>
  <B541>fr</B541>
  <B542 id="ep-chg0003">Procédé pour le moussage d'articles métalliques</B542>
</B540>
```

<ep-chg> is recursive to allow for history of changes - changes to changes - possibly to be used in the EP register; recursion will **not** be used in the EBD.

B003EP - Indicator 'no A-document published by EPO'

This field contains an '*' (asterisk) for the EURO-PCT applications for which **no** A-document has been published by the EPO because it was filed with WIPO in one of the official languages of the EPO.

B004EP - Re-establishment of rights indicator

It contains the code of the decision after a request for re-establishment of rights.

The values used by the EPO are:

- 2 : Request not accepted
- 3 : Request accepted

Note: Used together with <B238>.

B005EP - Printer/Producer identification

B006EP - Indicator for international applications

This tag identifies the type of International applications. The values used by the EPO are:

- 9120 : The EPO has been informed by WIPO that EP was designated in this application
- 9121 : Not Entering the European phase

<B006EP>9120</B006EP>

B007EP- Reserved for EPO internal use

This tag is reserved for EPO internal use.

B008EP - Indicator for "small changes"

This tag identifies "small changes" which are not printed in the EPO Bulletin such as removing the country code in the postcode. Currently and when present it contains the value 8.

B009EP - Text from B725EP tag in the three EPO official languages

This tag will contain the text stored in tag <B725EP> in EPO official languages ie. German, English and French to print in the EPO Bulletin. See Tag <B720>.

The text language order is German, English and French.

Example:

```
<B009EP>  
  <text>Der weitere Erfinder hat auf seine Nennung verzichtet</text>  
  <text>The other inventor has agreed to waive his entitlement to designation</text>  
  <text>L'autre inventeur a renoncé à sa désignation</text>  
</B009EP>
```

B010EP - Other rights and legal means of execution

```
<B010EP>
  <B011EP>
    <date>Date of notification</date>
    <dnum><text>sequence number</text></dnum>
    (States concerned)
    <ctry>Country code</ctry>
    <ctry>Country code</ctry>
    ...
  </B011EP>
</B010EP>
```

Example:

```
<B010EP>
  <B011EP>
    <date>20041103</date>
    <dnum>
      <text>01</text>
    </dnum>
    <ctry>DE</ctry>
    <ctry>ES</ctry>
    <ctry>FR</ctry>
    <ctry>GB</ctry>
    <ctry>IT</ctry>
  </B011EP>
</B010EP>
```

B012EP - New revocation procedure (Art 105a)

EPC 2000 Phase 3 a) change

EPC Article 105a - Request for limitation or revocation

(1) At the request of the proprietor, the European patent may be revoked or be limited by an amendment of the claims. The request shall be filed with the European Patent Office in accordance with the Implementing Regulations. It shall not be deemed to have been filed until the limitation or revocation fee has been paid.

(2) The request may not be filed while opposition proceedings in respect of the European patent are pending.

1. This form of revocation is always from the proprietor. (**Note:** Revocation within the existing opposition procedure may also be on request from the proprietor). This new procedure caters for revocation from the proprietor outside of the opposition procedure.

Both the request for Revocation 105a and the revocation itself are published in the Bulletin.

2. Note that the final result can only be a positive decision to actually revoke the patent.

  <B051EP> Language
    The values used are:
    de : German text
    en : English text
    fr : French text
  <B052EP> Free Text
</B050EP>
```

Example:

```
<B050EP>
  <B051EP>de</B051EP>
  <B052EP>Teilanmeldung 92117411.6 eingereicht am 06/11/87.</B052EP>
  <B051EP>en</B051EP>
  <B052EP>Divisional application 92117411.6 filed on 06/11/87.</B052EP>
  <B051EP>fr</B051EP>
  <B052EP>Demande divisionnaire 92117411.6 déposée le 06/11/87.</B052EP>
</B050EP>
```

B053EP - Additional remarks

Examples:

```
<B053EP>Diese Anmeldung ist am 03 - 07 - 2004 als Teilanmeldung zu der unter INID-Kode 62
erwähnten Anmeldung eingereicht worden.</B053EP>
```

```
<B053EP>This application was filed on 28 - 02 - 2002 as a divisional application to the application
mentioned under INID code 62.</B053EP>
```

```
<B053EP>A request for correction of the drawings has been filed pursuant to Rule 139 EPC. A
decision on the request will be taken during the proceedings before the Examining Division
(Guidelines for Examination in the EPO, A-V, 3.).</B053EP>
```

B070EP - B publication technical field (subsequently filed technical information)

Example:

```
<B070EP>The file contains technical information submitted after the application was filed and not
included in this specification
</B070EP>
```

B075EP - Petition for review

EPC2000: new procedure enabling any party to appeal proceedings adversely affected by the decision of the Board of Appeal to file a petition for review of the decision by the Enlarged Board of Appeal (EBA).

This information is only published when the decision is known.

<B0750EP review-number="Xnnnnn/nn">	Petition for review number (As we can have multiple petitions for review). Comprises a unique number for a given year, e.g. R0001/08
<B0751EP>	Appeal number
<B0752EP>	Petitioner code
<B0753EP>	Date of notice of petition (May be included at a later date)
<B0755EP>	Date of decision
<B0756EP>	Kind of decision : R01 to R12

Board with 3 Members

R01: Petition for review obviously inadmissible (not deemed to be filed) or simultaneously obviously inadmissible and obviously unsubstantiated.

R02: Petition for review obviously unsubstantiated only.

[R03: free]

Board with 5 Members

R04: Petition for review inadmissible.

R05: Rejection of the petition for review.

R06: Petition for review allowed and re-opening of the Appeal Procedure with total refund of the fee for the petition for review.

R07: Petition for review allowed and re-opening of the Appeal Procedure with partial refund of the fee for the petition for review.

[R08: free]

Board with 3 or 5 Members

R09: Withdrawal of the petition for review.

R10: Petition for review deemed to be withdrawn.

R11: other kind of disposal.

[R12: free]

Example of “Petition for review”:

```
<B075EP>  
  <B0750EP id="ep-chg0001" review-number="R0001/08">  
    <B0751EP>T0621/03-3309</B0751EP>

</B080EP>
```

B090EP - Limitation procedure

EPC 2000 Phase 2 and 3 a)

Under EPC 2000, the proprietor of the patent can request a limitation of the scope of the patent (claims). They can do this more than once. The request can be made during the opposition period as well as after it.

EPC Article 105a - Request for limitation or revocation

(1) At the request of the proprietor, the European patent may be revoked or be limited by an amendment of the claims. The request shall be filed with the European Patent Office in accordance with the Implementing Regulations. It shall not be deemed to have been filed until the limitation or revocation fee has been paid.

(2) The request may not be filed while opposition proceedings in respect of the European patent are pending.

Note: In the EPO the description and drawings may also change as well as the claims.

XML/DTD:

Firstly, the main grouping tag which groups the, possible, different sequence of events:

```
<!ELEMENT B090EP (B0900EP+) >
```

Secondly, the sub-grouping tag which groups the, possible, different sequence of tags within that event (filing, rejection and allowed):

```
<!ELEMENT B0900EP (B091EP+, B092EP?,B093EP?)>
```

```
<!ATTLIST B0900EP

    lang CDATA #IMPLIED
    begin-date CDATA #IMPLIED
    end-date CDATA #IMPLIED >
```

```
<!ELEMENT B091EP (B0911EP,B0912EP?,B0913EP?,B0914EP?) >
```

```
<!ATTLIST B091EP
    id ID #IMPLIED >
```

B091EP - Limitation procedure - Initial filing

EPC 2000 Phase 2

XML structure:

XML	Description	EPASYS
<B0900EP limitation-sequence> - see above	Limitation sequence number	LIMP07
<B0911EP><date>	Date of filing	LIMP01
<B0912EP>	Limitation kind: 01 = filed during opposition period (9 months) 02 = filed after opposition period (9 months)	LIMP02
<B0913EP>	Decision code: 01 = admissible 02 = inadmissible 03 = deemed not filed 04 = deemed not filed, opposition pending/filed 05 = withdrawn	LIMP03
<B0914EP><date>	Date of payment	LIMP04

Example of “Limitation procedure with initial filing”:

```
<B090EP>
  <B0900EP limitation-sequence="1">
    <B091EP>
      <B0911EP><date>20080914</date></B0911EP>
      <B0912EP>01</B0912EP>
      <B0913EP>01</B0913EP>
    </B091EP>
  </B0900EP>
  <B0900EP limitation-sequence="2">
    <B091EP>
      <B0911EP><date>20081009</date></B0911EP>
      <B0912EP>01</B0912EP>
      <B0913EP>01</B0913EP>
    </B091EP>
  </B0900EP>
</B090EP>
```

Notes:

- The limitation will be present in the EBD file **after** the decision is known but **not** as soon as a request for limitation has been filed.
- Any change will be indicated at the <B091EP> level.

B092EP - Limitation procedure - Request rejected

Implementation EPC 2000 Phase 3 a)

XML	Description	EPASYS
<B092EP>	Rejection of limitation request	
<B0921EP>	Kind of rejection: 01 = substantive refusal 02 = inadmissible for formal reasons (R.94) 03 = no (late) reply to subset report 04 = RALL (request allowed) requirements not fulfilled	REJL01
<B0922EP><date>	Decision despatched on	REJL02
<B0923EP><date>	Legal effect on	REJL03

Example:

```

<B092EP>
  <B0921EP>02</B0921EP>
  <B0922EP><date>20080612</date></B0922EP>
  <B0923EP><date>20090808</date></B0923EP>
</B092EP>
  
```

B093EP - Limitation procedure - Request allowed

Implementation EPC 2000 Phase 3 a)

XML	Description	EPASYS
<B093EP>	Request allowed	
<B0931EP><date>	Despatched on	RALL01
<B0932EP><date>	Translation received on	RALL02
<B0933EP><date>	Full payment received on	RALL03

Example:

```
<B093EP>
  <B0931EP><date>yyyymmdd</date></B0931EP>
  <B0932EP><date>yyyymmdd</date></B0932EP>
  <B0933EP><date>yyyymmdd</date></B0933EP>
</B093EP>
```

When the request is accepted, the result will be a **new B3-publication**.

B100 - Document identification

B110 - Publication number of the document (EPO or WIPO)

Example:

<B110>1118543</B110> - EPO number

<B110>2003043537</B110> - WIPO number

B120 - Plain language designation

Containing tags: <B121> and <B121EP>

Example:

```
<B120>
  <B121>Plain language designation of the kind of document</B121>
  <B121EP>Descriptive text for B121 (EPO)</B121EP>
</B120>
```

The language depends on contents of tag <'B260> - publication language - e.g. for code 'en' tag <B121> will contain 'EUROPEAN PATENT APPLICATION'

Examples:

For A documents

```
<B120><B121>EUROPEAN PATENT APPLICATION</B121></B120>

<B120><B121>EUROPEAN PATENT APPLICATION</B121>
  <B121EP>published in accordance with Art. 153(4) EPC</B121EP>
</B120>
```

Note: previously Article 158(3) - pre EPC 2000

```
<B120><B121>EUROPÄISCHE PATENTANMELDUNG</B121></B120>

<B120><B121>DEMANDE DE BREVET EUROPEEN</B121></B120>
```

For B documents

```
<B120><B121>EUROPEAN PATENT SPECIFICATION</B121></B120>

<B120><B121>EUROPÄISCHE PATENTSCHRIFT</B121></B120>

<B120><B121>FASCICULE DE BREVET EUROPEEN</B121></B120>
```

New for EPC 2000

For B2:

<B120><B121>NEW EUROPEAN PATENT SPECIFICATION</B121></B120>
<B121EP>After opposition procedure</B121EP>

<B120><B121>NEUE EUROPÄISCHE PATENTSCHRIFT</B121></B120>
<B121EP>Nach dem Einspruchsverfahren</B121EP>

<B120><B121>NOUVEAU FASCICULE DE BREVET EUROPEEN</B121></B120>
<B121EP>Après la procédure d'opposition</B121EP>

For B3:

<B121>NEW EUROPEAN PATENT SPECIFICATION</B121>
<B121EP>After limitation procedure (B3-1)</B121EP>

<B121>NEUE EUROPÄISCHE PATENTSCHRIFT</B121>
<B121EP>Nach dem Beschränkungsverfahren(B3-1)</B121EP>

<B121>NOUVEAU FASCICULE DE BREVET EUROPEEN</B121>
<B121EP>Après la procédure de limitation (B3-1)</B121EP>

B130 - Kind of document

The values used by the EPO are:

- A1 Application published with search report
- A2 Application published without search report
- A3 Separate publication of the search report

- A8 Correction - reprint of the title page of an A-document
- A9 Correction - complete reprint of an A-document

- B1 Granted patent
- B2 Amended granted patent after opposition procedure
- B3 Amended granted patent after limitation procedure

- B8 Correction - reprint of the title page of a B-document
- B9 Correction - complete reprint of a B-document

B132EP - Original kind code

```
<!ELEMENT B132EP (#PCDATA) >
```

```
<!ATTLIST B132EP
          sequence CDATA #IMPLIED >
```

The values used by the EPO are:

A1 Application published with search report
 A2 Application published without search report
 A3 Separate publication of the search report

B1 Granted patent
 B2 Amended granted patent after opposition procedure
 B3 Amended granted patent after limitation procedure

Only used within correction files (status="c"). See also <B150> for examples.

Examples:

```
<ep-bulletin id="EP02075796A9W1" file="02075796.9" lang="en" country="EP" doc-
number="1217438" kind="A9" correction-code="W1" date-publ="20050105" status="c" dtd-
version="ep-bulletin-v1-1">
```

```
....
```

```
<B130>A9</B130>
```

```
<B132EP>A2</B132EP>
```

```
...
```

```
<B150>
```

```
  <B151>W1</B151>
```

```
  <B155>
```

```
    <B1551>de</B1551>
```

```
    <B1552>Beschreibung</B1552>
```

```
    <B1551>en</B1551>
```

```
    <B1552>Description</B1552>
```

```
    <B1551>fr</B1551>
```

```
    <B1552>Description</B1552>
```

```
  </B155>
```

```
</B150>
```

For a corrected B3, the B132EP tag will contain the **sequence** attribute with the value of the original B3 sequence number.

```
<B130>B9</B130>
```

```
<B132EP sequence="1">B3</B132EP>
```

B133EP - New kind code

The values used by the EPO are:

- A1 Application published with search report
- A2 Application published without search report
- A3 Separate publication of the search report

- B1 Granted patent
- B2 Amended granted patent after opposition procedure
- B3 Amended granted patent after limitation procedure

Only used within correction files (status="c"). See <B150> for examples.

B140 - Date of publication

<B140><date>20050105</date></B140>

B150 - Patent correction information

<B150>

<B151>Supplementary correction code

The values used by the EPO are:

DL - Deletion (cancellation) of a previously announced correction

YF - Replacement of electronic file (no reprint will be made, only data is changed)

Wn - Reprint required - n = the Nth reprint.

```

Note. Although the code of reprint A9 is given, indicating a reprint of the entire document, the supplementary correction code YF indicates to the publisher that only the electronic file is to be reprocessed and no reprint done.

B190 – Publishing country or organisation

Country or organisation, which actually publishes the document. The values used by EPO are:

EP European Patent Office

WO WIPO

B200 - Domestic filing data

B210 - Application number

Number assigned by the EPO when the application is filed. The number is stored as eight digits plus a check digit in the following format 'YYNNNNNN.P'.

Where:

- **YY** = Year of application

Note: From 2000 it is 00, 01, etc care should be taken with any sort programs based on this number.

- **NNNNNN** = Number
- **P** = Check digit : calculated according to Modulus 10 - calculations detect single transpositions and incorrect keying of a single digit. The calculation is performed as follows:

The units position and every alternate position of the basic number is multiplied by 2. The digits resulting from the multiplication are added to those that were not multiplied. The total is subtracted from the next higher number ending with zero. The result is the check digit.

EP application number : 03789660.2

0	3	7	8	9	6	6	0	(base)
x	x	x	x	x	x	x	x	(multiply)
1	2	1	2	1	2	1	2	(by)

0	6	7	16	9	12	6	0	

Add every digit separately (i.e. 16 has to be added as 1+6):

$$0 + 6 + 7 + 1 + 6 + 9 + 1 + 2 + 6 + 0 = 38$$

Divide 38 : 10 = 3 and the remainder is 8

Subtract 10 - 8 = 2 check digit

Also a **root element** attribute "**file=**" contains the application number.

```
<ep-bulletin id="EP03789660A1" file="03789660.2" lang="en" country="EP" doc-number="1826796"
kind="A1" date-publ="20070829" status="n" dtd-version="ep-bulletin-v1-3">
```

B220 - Application filing date

```
<B220>
  <date>20000417</date>
</B220>
```

(Similar construct for the following data elements).

B235 - Date of refusal of application

B236 - Date of withdrawal of application

B237 - Date of application deemed withdrawn

B238EP - Date of receipt of request for re-establishment of rights

B238 - Date of decision for re-establishment of rights

Note: Used together with tag <B004EP>

B239 - Date of revocation

When a patent is revoked our Patent Administration System delivers only the actual legal date of effect of the revocation which will be stored and marked up as follows:

```
<ep-bulletin . . . status="r" >
. . .
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B239" date="20060104" status="n"/>
  </ep-chg-info>
</B002EP>
. . .
<B239 id="ep-chg0001">
  <date>20060218</date>
</B239>
```

B241 - Date of request for examination

B242 - Date of despatch of the first examination report

B243 - Date of 'patent maintained as amended'

B244 - Request for conversion (to national application) under EPC Art. 135

```
<B244>
  <date>Date of the request for conversion to national application</date>
  <ctry>Country code (States concerned)</ctry>
</B244>
```

Example:

```
<B244>
  <date>19940221</date>
  <ctry>DE</ctry>
  <ctry>ES</ctry>
  <ctry>IT</ctry>
</B244>
```

B245 - Date of suspension (Rule 14) / Interruption (Rule 142) of proceedings

Note: Used together with tag <B245EP>

B245EP - Suspension/Interruption indicator

Indicates the type of suspension or Interruption. The values used by EPO are, according to EPC rules (old EPC: Rules 13 and 90):

- 1 Suspension (Rule 14)
- 2 Applicant died (Rule 142(1)(a))
- 3 Legal incapacity of applicant (Rule 142(1)(a))
- 4 Legal prevention (Rule 142(1)(b))
- 5 Representative died (Rule 142(1)(c))
- 6 Legal incapacity of representative (Rule 142(1)(c))
- 7 Bankruptcy of the representative (Rule 142(1)(c))

Examples:

- Date of suspension (Rule 14) :

```
<B245>
  <date>19880916</date>
</B245>
<B245EP>1</B245EP>
```
- Date of interruption (Rule 142) :

```
<B245>
  <date>19880916</date>
</B245>
<B245EP>2</B245EP>
```

Note: Used together with tag <B245> and/or <B246>

B246 - Date of resumption of proceedings (Rule 14 / Rule 142)

(Old EPC: Rules 13 and 90)

Examples:

- Date of resumption (Rule 14) :

```
<B245EP>1<B245EP>
<B246>
    <date>19890916</date>
</B246>
```

- Date of resumption (Rule 142)

```
<B245EP>2</B245EP>
<B246>
    <date>19890916</date>
</B246>
```

Note: Used together with tag <B245> and/or <B246>

B250 - Filing language

It contains the language code in which the application was originally filed e.g:

de	German
en	English
fr	French
ja	Japanese
	etc.

B251EP - Procedure language

Content: en, fr or de

Note: Under EPC Article 14, (3): The official language of the European Patent Office in which the European patent application is filed or into which it is translated shall be used as the language of the proceedings in all proceedings before the European Patent Office, unless the Implementing Regulations provide otherwise.

B260 - Publication language

Language in which the Application/Patent has to be published. Currently, EPO uses the following languages:

- fr French
- en English
- de German

Also a **root element attribute** "**lang=**"

```
<ep-bulletin id="EP00100102A2" file="00100102.3" lang="en" country="EP" doc-  
number="1018688" kind="A2" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-3">
```

B270 - Previously filed application

EPC 2000 Phase 3 a)

This relates to new INID code (27) under WIPO ST.9; where the provisional wording is:

Reference to a previously filed application for the purposes of obtaining a filing date under the Patent Law Treaty (PLT) Article 5(7).

which states:

(7) [Replacing Description and Drawings by Reference to a Previously Filed Application]

(a) Subject to the requirements prescribed in the Regulations, a reference, made upon the filing of the application, in a language accepted by the Office, to a previously filed application shall, for the purposes of the filing date of the application, replace the description and any drawings.

(b) Where the requirements referred to in subparagraph (a) are not complied with, the application may be deemed not to have been filed. Where the application is deemed not to have been filed, the Office shall notify the applicant accordingly, indicating the reasons therefor.

EPO definition from requirements: The applicant may file "by reference to a previously filed application". This means, rather than filing the text of a new EP application, the applicant refers to the description, any drawings, and potentially claims of that previously filed application. Such reference to date/state/number of the previously filed application is enough for obtaining a date of filing for the new EP application. The applicant then has two months from the date of filing for filing the actual text of that EP application, in the form of a certified copy of the earlier application. If not filed, it may still be filed within two months from an EPO invitation (is dispensed with in cases where the previously filed application is available to the EPO). Otherwise the application will not be dealt with as a European patent application. The bibliography of the previously filed application (like its date of filing, any priority claim etc.) is of no relevance to the new EP application, nor is its date of filing taken as the basis for the calculation of time limits (unless this previously filed application is also claimed as a priority, which is possible, and will continue to be recorded as such).

EPC Rule 40 - Date of Filing:

(1) (c) a description or reference to a previously filed application.

(2) A reference to a previously filed application under paragraph 1(c) shall state the filing date and number of that application and the Office with which it was filed. Such reference shall indicate that it replaces the description and any drawings.

XML/DTD

<!ELEMENT B270 (dnum,date,ctry,kind?,dtx*) >

<!ATTLIST B270
id ID #IMPLIED >

  <date>20040228</date>
  <ctry>JP</ctry>
</B270>
```

B300, B310, B320, B330 - Priority data

(30) Data relating to priority under the Paris Convention

(31) Number(s) assigned to priority application(s)

(32) Date(s) of filing of priority application(s)

(33) WIPO Standard ST.3 code identifying the national industrial property office allotting the priority application number or the organization allotting the regional priority application number; for international applications filed under the PCT, the code "WO" is to be used

<B300>

<B310>Number</B310>

<B320>

<date>Date</date>

</B320>

<B330>

<ctry>Country in which the priority application was filed</ctry>

</B330>

</B300>

- ◆ For a PCT priority the tag <B330> contains the code WO and the format of the priority number, <B310>, is PCT/xxyy/n where:

xx Original country

yy Year

n Variable length priority number

- ◆ There is no tag to mark the beginning of the repeatable group for tags <B310>, <B320> and <B330>. However these tags are always presented in the same sequence.

- ◆ In respect to year 2000 compliance the EPO generally relies on the priority number - <B310> - given by the issuing office which may or may not be year 2000 compliant.

Example: for priority data:

```
<B300>
  <B310>14534299</B310>
  <B320><date>19990525</date>    </B320>
  <B330><ctry>JP</ctry></B330>
  <B310>PCT/JP00/02045</B310>
  <B320><date>20000330</date></B320>
  <B330><ctry>WO</ctry></B330>
</B300>
```

Example: change on priority data:

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B300" date="20041112" status="r"/>
  </ep-chg-info>
</B002EP>

<B300 id="ep-chg0001">
  <B310>0350215</B310>
  <B320>
    <date>20030612</date>
  </B320>
  <B330>
    <ctry>FR</ctry>
  </B330>
  <B310>0350215</B310>
  <B320>
    <date>20030612</date>
  </B320>
  <B330>
    <ctry>FR</ctry>
  </B330>
</B300>
```

Example: deletion of priority data:

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B300" date="20041117" status="d"/>
  </ep-chg-info>
</B002EP>

<B300 id="ep-chg0001"></B300>
```

B400 – Public availability dates

B405 - Patent Bulletin / Gazette information

```

<B405>
  <date>Publication date</date>
  <bnum>Issue number of the Bulletin</bnum>
</B405>
  
```

Date when the EPO Bulletin is actually published and the corresponding issue number.

Example:

```

<B405>
  <date>20050105</date>
  <bnum>200501</bnum>
</B405>
  
```

B430 - Unexamined document without grant (first publication)

(43) Date of making available to the public by printing or similar process of an unexamined patent document, on which no grant has taken place on or before the said date

```
<B430>
    <date>Publication date</date>
    <bnum>Issue number of the Bulletin</bnum>
</B430>
```

Date of publication of application (A1, A2) and issue number of the EPO Bulletin in which the first publication of the application is mentioned.

Example:

```
<B430>
    <date>19940302</date>
    <bnum>199409</bnum>
</B430>
```

The publication date is also a **root element attribute**:

```
<ep-bulletin id="EP00100102A2" file="00100102.3" lang="en" country="EP" doc-number="1018688"
kind="A2" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-1">
```

B450 - Document with grant (second publication)

(45) Date of making available to the public by printing or similar process of a patent document on which grant has taken place on or before the said date

```
<B450>
    <date>Publication date</date>
    <bnum>Issue number of the Bulletin</bnum>
</B450>
```

Date of publication of specification (B1) and the issue of the EPO Bulletin in which the mention of the grant is published.

The publication date is also a **root element attribute**:

```
<ep-bulletin id="EP00000001B1" file="00000001.8" lang="de" country="EP" doc-number="1118543"
kind="B1" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-1">
```

B451EP - Date of announcement of intention to grant

Date of announcement of intention to grant a patent.

B452EP - Date of announcement of intention to grant (after 01.07.2002)

Date of announcement of intention to grant a patent. (Communication pursuant to Rule 51(4) EPC after 01.07.2002; Rule 71(3) EPC 2000)

B453EP - Limitation decision

EPC 2000 Phase 3 b)

For publication (and XML placement): existing INID code (45) will be used with the title: "Date of publication and mention of the limitation decision:"

XML/DTD:

```
<!ELEMENT B453EP (B4530EP+) >
  <!ELEMENT B4530EP (kind,date,bnum) >
  <!ATTLIST B4530EP
    id ID #IMPLIED
    sequence CDATA #IMPLIED
    limitation-sequence CDATA #IMPLIED >
```

Note: the value in the limitation-sequence attribute relates to the number stored in the limitation-sequence attribute in B090EP tag.

Example:

```
<B453EP>
  <!-- First B3 -->
  <B4530EP id="ep-chg0001" sequence="1" limitation-sequence="1">
    <kind>B3</kind>
    <date>20080102</date>
    <bnum>200801</bnum>
  </B4530EP>
  <!-- Second B3 -->
  <B4530EP sequence="2" limitation-sequence="2">
    <kind>B3</kind>
    <date>20080305</date>
    <bnum>200810</bnum>
  </B4530EP>
</B453EP>
```

B472, B475 - Term of grant, lapse

```
<B472>
  <B475>Lapse of a patent
    <date>Date of lapse</date>
    <ctry>Country code</ctry>
  </B475>
</B472>
```

In the EBD file this data can take two formats, depending on the time the record was created, for the back file there is, generally, no change tag,

Example:

```
<B472>
  <B475>
    <date>20030805</date>
    <ctry>AT</ctry>
    <date>20030831</date>
    <ctry>CH</ctry>
    <date>20030831</date>
    <ctry>LI</ctry>
    <date>20030705</date>
    <ctry>DE</ctry>
    <date>20040430</date>
    <ctry>FR</ctry>
  </B475>
</B472>
```

Example for new lapse of a patent:

```
<B002EP>
  <ep-chg-info>
    <ep-chg idref="ep-chg0001" btag="B475" date="20041118" status="n"/>
  </ep-chg-info>
</B002EP>

<B472>
  <B475 id="ep-chg0001">
    <date>20040310</date>
    <ctry>AT</ctry>
    <date>20040310</date>
    <ctry>BE</ctry>
    <date>20040310</date>
    <ctry>CH</ctry>
  </B475>
</B472>
```

B477 - Document printed as amended, third level of publication (e.g. EPO 'B2')

```
<B477>
  <date>Publication date</date>
  <bnun>Issue number of the Bulletin</bnun>
</B477>
```

```
<B477>
  <date>20020821</date>
  <bnun>200234</bnun>
</B477>
```

Date of publication (B2) and issue number of the EPO Bulletin in which the mention of the document printed as amended is published.

The publication date is also a **root element attribute**:

```
<ep-bulletin id="EP90907061B2" file="90907061.7" lang="de" country="EP" doc-number="0472565"
kind="B2" date-publ="20050105" status="r" dtd-version="ep-bulletin-v1-1">
```

B480 - Corrigendum issued data

(48) Date of issuance of a corrected patent document

```
<B480>
  <date>Date of publication of correction</date>
  <bnun>Bulletin number where announced</bnun>
</B480>
```

See tag <B150> for examples.

B500 - Technical Data

XML structure:

B510 - International Patent Classification (IPC)

Note: This coding will no longer be used in the XML files after publication week 52-2005 but instead the IPC coding will be stored in tag B510EP.

<B510>
 <B516> Will contain "version" edition statement indicator 8 or, for earlier files 7, etc
 <B511> First information
 <B512> Inventive classification would be B511 & B512
 <B513> Non inventive classification
 <B514> "
 <B515> "
 <B517EP> Non-obligatory suppl. class. - **no longer used in IPCR** - but for changes to any old files it may be present
 </B510>

Example:

<B510>
 <B516>8
 <B511> 8B 60R 13/08 A
 <B512> 8C 08J 9/00 B
 <B512> 8C 08J 9/10 B
 <B513> 8C 08L 51/06 -
 </B510>

Europäisches
Patentamt
European
Patent Office
Office européen
des brevets

IMPORTANT NOTES:

- There is no "edition" 8 in the new WIPO ST.8; therefore we will not have, for example, Int. CL.8 printed on the title page of EP patents, but for consistency with current (pre-2006) processing we will keep this number, for all practical purposes it is 8 and indicated as such to EPO examiners in the guide to the new IPC.
- Tag B510 will be used to store the IPC coding until the publication week 52-2005. From publication week 01-2006, we will only use tag **B510EP** for the new (IPCR) coding (see details in the following pages).
- Back file data will NOT be changed to B510EP because it is published data in the public domain

B510EP - International Patent Classification (IPC – in force from week 01-2006)

The new WIPO ST.8 standard defined in the PDF document available at <http://www.wipo.int/export/sites/www/standards/en/pdf/03-08-01.pdf> states:

Industrial property offices are asked to implement this new version of Standard ST.8 for all patent documents with a publication date from January 1, 2006, onwards. For patent documents published prior to that date, the previous version of the Standard should continue to be used.

This recording convention provides that symbols of the International Patent Classification (IPC) should be presented on machine-readable records for the exchange of information in machine-readable form in a fixed-length field in 50 positions, each part of the Int. Cl. symbol being recorded in specific positions and in the manner prescribed.

*...
A schematic representation of the contents of the 50 positions is as follows:*

Section	Class			Subclass	Main Group				Separating character	Subgroup						Blanks			
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	

Version indicator								Classification level	First or later position of a symbol	Classification value	Action date							
20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38

Original or reclassified data	Source of classification data	Generating office		Blanks							
39	40	41	42	43	44	45	46	47	48	49	50

As can be seen from the section of the DTD printed below each part has been assigned an element name; for example: <generating-office>

<!ELEMENT B510EP (classification-ipcr+)>

<B510EP> contains <classification-ipcr> which in turns contains all the new tags for each part of the classification **or** it can be stored in a fixed length field of 50 positions within the <text> data element.

<!ELEMENT classification-ipcr ((section , class , subclass , main-group? , subgroup? , ipc-version-indicator , classification-level? , symbol-position? , classification-value? , action-date? , classification-status? , classification-data-source? , generating-office?) | text)>

This can also be represented by the following table:

Position(s)	Content	Values	ST.36 (XML)
1	Section	A-H	<section>
2-3	Class	01...99	<class>
4	Subclass	A...Z	<subclass>
5 to 8	Main Group (right aligned)	1...9999, blank	<main-group>
9	Separating character	/ ("Slash")	
10 to 15	Subgroup (left aligned)	00...999999 blank	<subgroup>
16 to 19	For future use	4 blanks	
20 to 27	Version indicator	YYYYMMDD date format	<ipc-version-indicator>
28	Classification level	C, A, S	<classification-level>
29	First or later position of symbol	F, L	<symbol-position>
30	Classification value (inventive or non-inventive)	I, N	<classification-value>
31 to 38	Action date	YYYYMMDD date format	<action-date> <date>
39	Original or reclassified data	BRVD	<classification-status>
40	Source of classification data	H M G	<classification-data-source>
41-42	Generating office	AA ZZ (ST.3)	<generating-office> <country>
43-50	For future use	8 blanks	

To mark up this data with each part coded is very heavy mark up; for example:

```
<B510EP>
  <classification-ipcr sequence="1">
    <section>C</section>
    <class>22</class>
    <subclass>C</subclass>
    <main-group>1</main-group>
    <subgroup>02</subgroup>
    <ipc-version-indicator>20050101</ipc-version-indicator>
    <classification-level>A</classification-level>
    <symbol-position>F</symbol-position>
    <classification-value>I</classification-value>
    <action-date>20050105</action-date>
    <classification-status>B</classification-status>
    <classification-data-source>H</classification-data-source>
    <generating-office>EP</generating-office>
  </classification-ipcr>
</B510EP>
```

This is for **one** classification of, on average, 2 or 3 classifications for an EP document. We will, therefore, capture the new IPC **as one fixed length field of 50 positions** conforming to the new IPC (see above); for example (this example taken from WIPO ST.8):

```
<B510EP>
  <classification-ipcr sequence="1">
    <text>B28B 5/00 20060101AFI20070601BHEP </text>
  </classification-ipcr>
</B510EP>
```

Because the field is always fixed length rendering for display, page layout etc. should be straightforward. Before contacting the EPO about the meaning and interpretation of the new IPC please refer to the tables above and new WIPO ST.8:

<http://www.wipo.int/export/sites/www/standards/en/pdf/03-08-01.pdf>

Example:

```
<B510EP>
  <classification-ipcr sequence="1">
    <text>C09D 151/00 20000101AFI20060104BHEP </text>
  </classification-ipcr>
  <classification-ipcr sequence="2">
    <text>C08F 265/06 20000101ALI20060104BHEP </text>
  </classification-ipcr>
  <classification-ipcr sequence="3">
    <text>C09D 5/02 20000101ALI20060104BHEP </text>
  </classification-ipcr>
  <classification-ipcr sequence="4">
    <text>C09D 175/04 20000101ALI20060104BHEP </text>
  </classification-ipcr>
</B510EP>
```

Note: the spaces or blanks (which are important) are coded in UTF-8 as 0020 (space).

Corrections and changes to previous publications using earlier versions of the IPC

For several months and, probably, years the EPO will be processing data coded to previous versions (editions) of the IPC - for the front file (01.2006 on) we will use the 50 position IPCR in all cases and positions 20 to 27 - the version indicator date - will contain the date of creation of the IPC as held in the EPO database. This could, of course, be well before 2006.

In some cases it may not be possible to determine the version indicator date because the classification is no longer valid in such cases the value of the version indicator date will be set to eight zeros: 00000000, example:

```
<B510EP>
<classification-ipcr sequence="1">
<text>H05K 1/05      00000000AFI20060104BHEP      </text>
</classification-ipcr>
</B510EP>
```

For information:

The publication of the new IPC on the title page of EP patent documents will be similar to the layout below:

(51) Int. Cl.:
C07D 231/56 (2006.01) **C07D 417/12 (2006.01)**
C07D 401/04 (2006.01) **C07D 409/14 (2006.01)**
C07D 401/06 (2006.01) **C07D 409/12 (2006.01)**

B520EP – Cooperative Patent Classification (CPC)

The Cooperative Patent Classification (CPC) is an extension of the IPC and is jointly managed by the EPO and the US Patent and Trademark Office. It is divided into nine sections, A-H and Y, which in turn are sub-divided into classes, sub-classes, groups and sub-groups.

The Cooperative Patent Classification (CPC) was initiated as a joint partnership between the USPTO and the EPO where the Offices have agreed to harmonize their existing classification systems (ECLA and USPC, respectively) and migrate towards a common classification scheme. This was a strategic decision by both offices and is seen as an important step towards advancing harmonization efforts currently being undertaken through the IP5's Working Group 1 on Classification.

The migration to CPC was developed based in large part on the existing European Classification System (ECLA) modified to ensure compliance with the International Patent Classification system (IPC) standards administered by the World Intellectual Property Organization (WIPO).

The CPC symbols will be stored in as one fixed length field of **50 positions** as described in the following table:

Tags supported in CPC standard	Position in CPC standard	Description	Values
<classification-symbol >	1	Section	A, ...,H, Y
	2-3	Class	01...99
	4	Subclass	A...Z
	5 to 8	Main Group	1...9999, right aligned
	9	Separator	/ ("Slash")
	10 to 15	Subgroup	00,..., 999999
	16 to 19	n.a.	Trailing spaces
<classification-scheme> <date>	20 to 27	Version indicator (date format)	CCYYMMDD
<classification-level>	28	Core, Advanced	Not applicable
<symbol-position>	29	First, Later	F, L – only for CPCI
<classification-value>	30	Inventive or Additional	I, A
<action-date> <date>	31 to 38	Date format	CCYYMMDD
<classification-status>	39	Original or reclassified	B, R
<classification-data-source>	40	Human, Concordance, Generated	H C G
<generating-office> <country>	41-42	Country code	AA,..., ZZ (ST.3)

</B560>
```

These tags are only used on the title page of B documents.

B565 - Date of completion of search report

```
<B565>
  <date>yyyymmdd</date>
</B565>
```

Date when the European search report was drawn up.

B565EP - Date of drawing up and despatch of supplementary search report

```
<B565EP>
  <date>yyyymmdd</date>
</B565EP>
```

Date when a supplementary European search report was drawn up.

B566EP - Date of despatch for correction to the search report

Date of despatch of new documents to the applicant after publication of the search report.

B598 - Figure number on first (title) page, abstract drawing

This tag contains the figure number(s) of the drawings to include in the first title page.

Example:

```
<B590>
    <B598>4b</B598>
    <B598>4c</B598>
</B590>
```

B600 - References to other legal or procedural related domestic patent documents

B610 - Earlier document information

(61) Number and, if possible, filing date of the earlier application, or number of the earlier publication, or number of earlier granted patent, inventor's certificate, utility model or the like to which the present patent document is an addition

```
<B610>
  <parent>Parent relation
    <pdoc>Earlier document data
      <dnum>
        <anum>Application number of an earlier application</anum>
        <pnum>Publication number of an earlier application</pnum>
      </dnum>
      <date>Date of receipt</date>
    </pdoc>
  </parent>
</B610>
```

B620 - Parent application data

(62) Number and, if possible, filing date of the earlier application from which the present patent document has been divided up

```
<B620>
  <parent>Parent relation
    <pdoc>Parent document data
      <dnum>
        <anum>Application number of the Parent application</anum>
        <pnum>Publication number of the Parent application</pnum>
      </dnum>
      <date>Date of receipt</date>
    </pdoc>
  </parent>
</B620>
```

Example with two parent application numbers:

```
<B620>

    </cdoc>
  </parent>
</B620EP>
```

B700 - Parties concerned with the document

B710 - Applicants

<B710>

<B711>

<snm>Name</snm>

<iid>EPO number of the Applicant</iid>

<irf>Reference of the Applicant</irf>

<syn>Synonym, cross reference of the Applicant</syn>

<adr>Address

<str>Street</str>

<city>City, Town</city>

<ctry>Country code</ctry>

</adr>

<B716EP>Designated states for the applicant. Used only when some of the designated states are mentioned

<ctry> Country code</ctry>

</B716EP>

<B717EP>Designated extension for the applicant. Used only when some of the extended states are mentioned

<ctry> Country code</ctry>

</B717EP>

<B718EP> Effective date for transfer of rights

<date>yyyymmdd</date>

</B718EP>

</B711>

</B710>

Note: The name and address data, extracted from EPASYS, cannot be as precisely specified as might be desired. For example, under <snm> all names are given: corporate or personal and, in the latter, last name is not tagged separately from first name. In the <str> field other data than street is entered and in the <city> field we may have city and state, for example.

Examples of all these can be seen below.

Example: “Applicants”:

The designated states are: AT BE CH LI DE.

- The first applicant applies for countries: 'AT BE CH LI'
- The second applicant applies for countries: 'DE'.

```
<B710>
  <B711>
    <snm>F.HOFFMANN-LA ROCHE AG</snm>
    <iid>01138591</iid>
    <irf>19023 EP-Si</irf>
    <adr>
      <str>Grenzacherstrasse 124</str>

    <B716EP>
      <ctry>AT</ctry>
      <ctry>BE</ctry>
      <ctry>CH</ctry>
      <ctry>LI</ctry>
    </B716EP>
  </B711>
  <B711>
    <snm>Roche Diagnostics GmbH</snm>
    <iid>00205391</iid>
    <irf>19023 EP-Si</irf>
    <adr>
      <str>
      </str>
      <city>68298 Mannheim</city>
      <ctry>DE</ctry>
    </adr>
    <B716EP>
      <ctry>DE</ctry>
    </B716EP>
  </B711>
</B710>
```

B720 - Inventors

```
<B720>
  <B721>
    <snm>Name</snm>
    <adr>Address
      <str>Street</str>
      <city>Town</city>
      <ctry>Country code</ctry>
    </adr>
  </B721>
</B720>
```

Or, when the inventor has agreed to waive his entitlement to designation:

```
<B720>
  <B721>
    <B725EP>
      <text>Text according to publication language. See Table below
      </text>
    </B725EP>
  </B721>
</B720>
```

Note. Text from tag <B725EP> also used in tag <B009EP>.

Example:

```
<B720>
  <B721>
    <snm>Bornmann, Uwe</snm>
    <adr>
      <str>Mayerhansenstrasse 7/6</str>
      <city>A-4060 Leonding</city>
      <ctry>AT</ctry>
    </adr>
  </B721>
  <B721>
    <snm>Schörgenhuber, Heinz</snm>
    <adr>
      <str>Karl Wiserstrasse 8</str>
      <city>A-4020 Linz</city>
      <ctry>AT</ctry>
    </adr>
  </B721>
</B720>
```

Text used when inventors waive their entitlement to designation

Publication language Text in <B725EP>

When there is only one inventor and he has agreed to waive his entitlement to designation

De "Der Erfinder hat auf seine Nennung verzichtet"
En "The inventor has agreed to waive his entitlement to designation"
Fr "L'inventeur a renoncé à sa désignation"

When there are several inventors and they all have agreed to waive their entitlement to designation

De "Die Erfinder haben auf ihre Nennung verzichtet"
En "The inventors have agreed to waive their entitlement to designation"
Fr "Les inventeurs ont renoncé à leur désignation"

When there are several inventors and one of them has agreed to waive his entitlement to designation

De "Der weitere Erfinder hat auf seine Nennung verzichtet"
En "The other inventor has agreed to waive his entitlement to designation"
Fr "L'autre inventeur a renoncé à sa désignation"

When there are several inventors and some of them have agreed to waive their entitlement to designation

De "Die weiteren Erfinder haben auf ihre Nennung verzichtet"
En "The other inventors have agreed to waive their entitlement to designation"
Fr "Les autres inventeurs ont renoncé à leur désignation"

Example: “Inventors” who waived their entitlement to designation

```
<B720>
  <B721>
    <snm>Frey, Juerg</snm>
    <adr>
      <str>Haggenstr. 80</str>
      <city>9014 St. Gallen</city>
      <ctry>CH</ctry>
    </adr>
  </B721>
  <B721>
    <B725EP>
      <text>Die andere Erfinder haben auf ihre Nennung verzichtet.</text>
    </B725EP>
  </B721>
</B720>
```

Text from tag <B725EP> used as well in tag <B009EP> but in all three EPO official languages.

```
<B009EP>
  <text>Die andere Erfinder haben auf ihre Nennung verzichtet.</text>
  <text>The other inventors have agreed to waive their entitlement to designation.</text>
  <text>Les autres inventeurs ont renoncé à leur désignation.</text>
</B009EP>
```

B730 - Grantees/Proprietors

```
<B730>
  <B731>
    <snm>Name</snm>
    <iid>EPO number of the grantee</iid>
    <irf>Reference of the grantee</irf>
    <syn>Synonym, cross reference of the grantee</syn>
    <adr>Address
      <str>Street</str>
      <city>Town</city>
      <ctry>Country code</ctry>
    </adr>
    <B736EP>Designated states for the grantee. Used only when some of the designated
states are mentioned
      <ctry>Country code</ctry>
    </B736EP>

    <B738EP>Effective date for transfer of rights
      <date> yyyymmdd</date>
    </B738EP>
  </B731>
</B730>
```

Example: change on grantee/proprietor:

```
<B002EP>
  <ep-chg-info>

</B780>
```

B790 - Licence(s)

When the licence has been registered for an EP patent application, the serial number & legal effect date of the licence as well as the name & address of the licensee will be stored in B790 group tag as follows:

```
<B790>
  <B791>
    <dnum>
      <text>Serial number of the licence</text>
    </dnum>
    <date>Date of legal effect of the licence</date>
    <kind>Kind of licence</kind>
    <snm>Name</snm>
    <iid>EPO number of the Licensee</iid>
    <adr>Address
      <str>Street</str>
      <city>Town</city>
      <ctry>Country code</ctry>
    </adr>
    <B796>Designated states concerned
      <ctry>Country code</ctry>
    </B796>
  </B791>
</B790>
```

Remarks:

- The first two numbers of the serial number of a main licence and the next two numbers represent the serial number of a sub-licence.
- The maximum serial number for a main licence and a sub-licence is 10.
- For an exclusive licence the tag <kind> contains the code "E".

Example:

```
<B790>
  <B791>
    <dnum>
      <text>0100</text>
    </dnum>
    <date>20010806</date>

      <ctry>ES</ctry><ctry>FR</ctry><ctry>IT</ctry>
    </B796>
  </B791>
</B790>
```

B800 - International Convention Data

B830 - Information concerning deposit of micro-organisms

<B830>
 <B831>EPO Declaration statement</B831>
 </B830>

Example in “English”:

<B830>
 <B831>Declaration under Rule 32(1) EPC (expert solution)</B831>
 </B830>

Example in “German”:

<B830>
 <B831>Erklärung nach Regel 32(1) EPÜ (Sachverständigenlösung)</B831>
 </B830>

Example in “French”:

<B830>
 <B831>Déclaration conformément à la règle 32(1) CBE (solution de l'expert)</B831>
 </B830>

Pre EPC 2000 was Rule 28 (4)

Pre-EPC 2000

<B830>
 <B831>Declaration under Rule 28(4) EPC (expert solution)</B831>
 </B830>

Post EPC 2000

<B830>
 <B831>Declaration under Rule 32(1) EPC (expert solution)</B831>
 </B830>

B840 - Designated contracting states

```
<B840>
    <ctry>Country code</ctry>
</B840>
```

Each state code is preceded by a tag ctry.

Example:

```
<B840>
    <ctry>DE</ctry>
    <ctry>DK</ctry>
    <ctry>ES</ctry>
    <ctry>NL</ctry>
    <ctry>SE</ctry>
</B840>
```

B844EP - States to which the application/patent is extended

```
<B844EP>States to which the application/patent is extended
    <B845EP>Extended state data
        <ctry>Country code</ctry>
        <date>Payment date</date>
        <B846EP>Date of withdrawal
            <date>yyyymmdd</date>
        </B846EP>
    </B845EP>
</B844EP>
```

Example:

```
<B844EP>
    <B845EP>
        <ctry>LT</ctry>
        <date>19930708</date>
    </B845EP>
    <B845EP>
        <ctry>LV</ctry>
        <date>19930731</date>
    </B845EP>
    <B845EP>
        <ctry>SI</ctry>
        <date>19930531</date>
        <B846EP>
            <date>19940430</date>
        </B846EP>
    </B845EP>
</B844EP>
```

B848EP - States to which the patent is validated

```
<B848EP>States to which the patent is validated
  <B849EP>Extended state data
    <ctry>Country code</ctry>
    <date>Payment date</date>
  </B849EP>
</B848EP>
```

Example:

```
<B848EP>
  <B849EP>
    <ctry>XX</ctry>
    <date>20140828</date>
  </B849EP>
</B848EP>
```

B860 - PCT application data

(86) Filing data of the PCT international application, i.e., international filing date, international application number, and, optionally, the language in which the published international application was originally filed; or, in the case of design patents, registration data of the Hague Agreement international application, i.e., international registration date and international registration number.

```
<B860>
  <B861>
    <dnum>
      <anum>PCT Application number</anum>
    </dnum>
    <date>PCT Date of filing</date>
  </B861>
  <B862>Filing language</B862>
</B860>
```

Example:

```
<B860>
  <B861>
    <dnum>
      <anum>GB1999004210</anum>
    </dnum>
    <date>19991213</date>
  </B861>
  <B862>en</B862>
</B860>
```

B870 - PCT publication data

(87) Publication data of the PCT international application, i.e., international publication date, international publication number, and, optionally, the language in which the international application is published

```
<B870>
  <B871>
    <dnum>
      <pnum>PCT Publication number</pnum>
    </dnum>
    <date>Publication date</date>
    <bnum>Issue number of the Gazette</bnum>
  </B871>
</B870>
```

Example:

```
<B870>
  <B871>
    <dnum>
      <pnum>WO2000039549</pnum>
    </dnum>
    <date>20000706</date>
    <bnum>200027</bnum>
  </B871>
</B780>
```

B880 - Publication of the deferred search report

```
<B880>
  <date>Publication date</date>
  <bnum>Issue number of the Bulletin</bnum>
</B880>
```

Date and issue of the EPO Bulletin in which the mention of the Search Report is published.

Note: For PCT applications, <date> tag (Publication date), contains the actual date of the international search report and <bnum> tag (Issue number of the Bulletin), contains '000000'.

Example:

```
<B880>
  <date>19910724</date>
  <bnum>000000</bnum>
</B880>
```

B920 - Opt-out data (UPC)

Pursuant to Article 83(3)(4) Agreement on a Unified Patent Court, a proprietor of or an applicant for a European patent may opt out from the exclusive competence of the Court and withdraw their opt out at any time. The opt out and its withdrawal take effect upon their entry in the UPC Register.

Disclaimer: Responsibility for the accuracy, completeness or quality of the data relating to the optouts lies entirely with the Unified Patent Court.

The date of registration of the opt-out & the date of withdrawal of the opt-out will be stored in the following XML structure :

```
<B920>
  <B921 case-number="UPC reference">
    <date>Date of registration of the opt-out</date>
  </B921>
  <B922 case-number="UPC reference">
    <date>Date of withdrawal of the opt-out</date>
  </B922>
</B920>
```

Examples:

- Registration of the opt-out (new)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B921" date="20171119" status="n"/>
</B002EP>
```

...

```
<B920>
  <B921 id="ep-chg0001" case-number=" App_525299/2023">
    <date>20170524</date>
  </B921>
</B920>
```

- Registration of the withdrawal of the opt-out (new)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B922" date="20171119" status="n"/>
</B002EP>
```

```
<B920>
  <B922 id="ep-chg0001" case-number="App_525853/2023">
    <date>20170607</date>
  </B922>
</B920>
```

According to Rule 5(5),(7) and Rule 5a(1) of the Rules of Procedure of the UPC, the proprietor of a European patent or the applicant for a published application for a European patent may record a correction of the opt-out/withdrawal of the opt-out or the removal of an unauthorised opt-out/unauthorised withdrawal of an opt out.

Disclaimer: Responsibility for the accuracy, completeness or quality of the data relating to the optouts lies entirely with the Unified Patent Court.

Consequently, the B921 & B922 tags may also have a status="r" (replaced) or status="d" (deleted). Examples:

- Correction of the opt-out (replaced)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B921" date="20171125" status="r"/>
</B002EP>
```

...

```
<B920>
  <B921 id="ep-chg0001" case-number="App_558999/2023">
    <date>20170524</date>
  </B921>
</B920>
```

- Correction of the withdrawal of the opt-out (replaced)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B922" date="20171126" status="r"/>
</B002EP>
```

..

```
<B920>
  <B922 id="ep-chg0001" case-number="App_525741/2023">
    <date>20170607</date>
  </B922>
</B920>
```

- Removal of the opt-out (deleted)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B921" date="20171125" status="d"/>
</B002EP>
```

...

```
<B920>
  <B921 id="ep-chg0001" case-number="UPC_APP_337164/2023">
    <date></date>
  </B921>
</B920>
```

- Removal of the withdrawal of the opt-out (deleted)

```
<B002EP><ep-chg idref="ep-chg0001" btag=" B922" date="20171127" status="d"/>
</B002EP>
```

...

```
<B920>
  <B922 id="ep-chg0001" case-number="App_9761/2024">
    <date></date>
  </B922>
</B920>
```

B7000 – Granted patents with Unitary Patent Protection

The basic structure B7000 group in the DTD is as follows

B7001 - Date of filing for a unitary protection request

After the patent has been granted, the patentee may file a request for unitary protection for his EP patent but it has to be done within one month after the date of grant.

Example:

```
<B7001 id="ep-chg0001">
  <date>20160724</date>
</B7001>
```

B7002 - Decision date & purport of unitary protection request

The request will be examined and after a formal check, either positive or negative decision will be given. The date & purport it will be stored in the following XML structure:

```
<B7002 decision="value">
  <date>20160724</date>
</B7002>
```

Possible values in **decision** attribute:

- **P** : positive request
- **N** : negative request

Note. Only when the attribute decision contains the value "P" i.e. positive request, the rest of the UPP bibliographic data will be available e.g. date of registration, date of effect, participating member states, proprietor, etc.

Examples:

Positive decision

```
<B7002 id="ep-chg0004" decision="P">
  <date>20160724</date>
</B7002>
```

Negative decision

```
<B7002 id="ep-chg0004" decision="N">
  <date>20160724</date>
</B7002>
```

B7004 - Date of withdrawal of the unitary protection request

The patent proprietor may request to withdraw his request for unitary patent protection but this request has to be requested **before** the decision on the “request for unitary protection” has been approved.

Example:

```
<B7004 id="ep-chg0004">
  <date>20160724</date>
</B7004>
```

B7006 – Place of business

The original principal place of business on the date of filing of the application for the European patent as defined [R 16(1)(w), UPR]

Example:

Change in the place of business:

```
<B7006 id="ep-chg0006">
  <adr>
    <str>Michael-Steinherr Strasse 34 </str>
    <city>D-8904 Friedberg</city>
    <ctry>DE</ctry>
  </adr>
</B7006>
```

Deletion of the place of business:

```
<B7006 id="ep-chg0006">
  <adr/>
</B7006>
```

B7010 – Other rights & legal means of execution

When there is a legal means of execution on a EP patent with unitary effect, it will be stored in the following XML structure:

```

<B7010>
  <B7011>
    <date>Date of notification</date>
    <dnum><text>sequence number</text></dnum>
    (States concerned)
    <ctry>Country code </ctry>
    <ctry>Country code </ctry>
    ...
  </B7011>
</B7010>

```

Example:

```

<B7010>
  <B7011>
    <date>20120705</date>
    <dnum><text>02</text></dnum>
    <ctry>AT</ctry>
    <ctry>BE</ctry>
    <ctry>CH</ctry>
    <ctry>CY</ctry>
    <ctry>DE</ctry>
    <ctry>DK</ctry>
  </B7011>
</B7010>

```

B7021 – Date of registration

In case of a positive decision, the date of registration will contain the same date as the date of the decision on the unitary protection request.

Example:

```
<B7020>
  <B7021 id="ep-chg0020">
    <date>20160724</date>
  </B7021>
...
</B7020>
```

B7022 – Date of effect

The date of effect for the unitary protection and it should take effect retroactively in the participating Member States as from **the date of publication of the mention of the grant** of the European patent in the European Patent Bulletin.

Example:

```
<B7020>
...
  <B7022 id="ep-chg0021">
    <date>20160724</date>
  </B7022>
...
</B7020>
```

B7023 – Participating member states

The country codes for **only** of those participating Member States - at the date of decision - where the UPC has exclusive jurisdiction with regard to European Patents as **from date of registration of the unitary effect** as defined in Article 18(2) in the Regulation EU 1257/2012.

Example:

```
<B7020>
...
  <B7023 id="ep-chg0002">
    <ctry>AT</ctry>
    <ctry>BE</ctry>
    <ctry>DE</ctry>
...
  </B7023>
</B7020>
```

B7030 – Licensing commitments

The licensing commitments undertaken by the proprietor of the European patent with unitary effect in international standardisation bodies where the proprietor requested their registration will be stored as follows:

XML structure:

```
<B7030>
  <B7031 sequence="1">
    <date>Date of registration</date>
    <onm>Name of the standardisation body</onm>
  </B7031>
</B7030>
```

Note: the value in the **sequence** attribute is a sequential number

B7040 – Information communicated by other authorities

The information communicated to the European Patent Office by the central industrial property offices, courts and other competent authorities of the participating Member States will be stored as follows:

XML structure:

```
<B7040>
  <B7041 sequence="1">
    <date>Date of registration</date>
    <ctry>Country code</ctry>
  </B7041>
</B7040>
```

Note: the value in the **sequence** attribute is a sequential number

B7050 – Renewal fees

As defined in R 16(1)(n), the data to the payment of renewal fees of an EP patent with unitary effect, including, where applicable, data on the payment of an additional fee will be stored on B7050 group tag. It contains the data of the **most recent renewal year**.

Example:

Renewal fees without penalty:

```
<B7050 id="ep-chg0011">
  <B7052 ordinal-year="01"><date>20161015</date></B7052>
</B7050>
```

Renewal fees with penalty:

```
<B7050 id="ep-chg0011">
  <B7052 ordinal-year="01"><date>20161215</date></B7052>
  <B7053><date>20161010</date></B7053>
  <B7054><date>20161215</date></B7054>
</B7050>
```

B7060 – Proceedings before the UPC – actions, action-decisions, appeals, appeal-decisions

When a patent proprietor does not agree with a EPO decision related to an UPP, then he has to file an action before UPC where a decision will be given. Should this decision not satisfy the patent proprietor, he may file an appeal at the UPC “Court of Appeal” who will give a final decision. Here is an example of the process flow:

The information communicated to the European Patent Office concerning proceedings before the Unified Patent Court will be stored in the following XML structure:

```
<B7060>
  <B7061 sequence="n"
    action-type="Action code" case-number ="UPC case number reference"
    spc-ctry="SPC country code" spc-number="SPC number">
    <date>Date of filing of the action at the UPC</date>

    <B7062 sequence="n"
      reference="European Case Law Identifier" decision="Decision code">
      <date>Date of decision given by the UPC </date>
      <B7065 sequence="n" case-number="UPC reference ">
        <date>Date of filing of the Appeal</date>
        <B7066 sequence="n"
          reference="European Case Law Identifier"
          decision=" Decision code">
            <date>Date of decision of the Appeal</date>
        </B7066>
      </B7065>
    </B7062>
  </B7061>
</B7060>
```

Possible values on the "**Action code**":

- C : Counterclaims revocation
- D : Damages
- E : EPO decision
- I : Infringement_action
- L : Compensation for licence
- N : Non_infringement
- P : Protective measures and injunctions
- R : Revocation action
- U : Use if invention prior to grant

Possible values of the UPC “**Decision code**”:

1st Instance	Code	Patent	SPC	Action against EPO	Meaning
	ACTION_REJECTED	x	x	x	Action rejected as inadmissible
	PROCEEDING_TERMINATED	x	x	x	No decision on the merits and case written-off
	INFRINGED	x	x		Patent(s)/SPC(s) is(are) infringed
	NOT_INFRINGED	x	x		Patent(s)/SPC(s) is(are) not infringed
	REVOKED_IN_PART	x			Patent(s) is(are) revoked partially
	REVOKED	x			Patent(s) is(are) revoked completely
	VALID_BUT_AMENDED	x			Patent(s) is(are) valid but amended
	VALID	x	x		Patent(s)/SPC(s) is(are) valid and not amended
	REVERSED			x	EPO decision on unitary patent/unitary effect reversed
	CONFIRMED			x	EPO decision on unitary patent/unitary effect confirmed
	INVALID		x		SPC(s) is(are) invalid
Appeal	Code	Patent	SPC	Action against EPO	Meaning
	APPEAL_REJECTED	x	x	x	Appeal rejected as <i>inadmissible</i>
	PROCEEDING_TERMINATED	x	x	x	No decision on the merits and case written-off
	INFRINGED	x	x		Patent(s)/SPC(s) is(are) infringed
	NOT_INFRINGED	x	x		Patent(s)/ SPC(s) is(are) not infringed
	REVOKED_IN_PART	x			Patent(s) is(are) revoked partially
	REVOKED	x			Patent(s) is(are) revoked completely
	VALID		x		Patent(s)/SPC is(are) valid
	INVALID		x		SPC(s) is(are) invalid
	APPEAL_ALLOWED			x	Appeal against decision of court of first instance concerning action against EPO decisions allowed
	REFERRED_TO_FIRST_INSTANCE	x	x		Court of appeal refers the action back to the court of first instance for decision or retrial

Examples:

2. *Action filed at the UPC:*

```
<B7060>
  <B7061 id="ep-chg0016" sequence="1" action-type="E" case-number ="UPC_17/2016">
    <date>20161001</date>
  </B7061>
</B7060>
```

3. *Action filed at the UPC on SPC*

```
B7060>
  <B7061 sequence="1" action-type="I" case-number="ACT_642/2024"
    spc-ctry="FR" spc-number="22C1028">
    <date>20240122</date>
  </B7061>
</B7060>
```

4. *Decision on an action previously filed at UPC:*

```
<B7060>
  <B7061 sequence="1" action-type="E" case-number ="UPC_17/2016">
    <date>20161001</date>
    <B7062 id="ep-chg0017" sequence="1"
      reference="ECLI:UP:CD_P:2016-678"
      decision="ACTION_REJECTED">
        <date> 20161129</date>
    </B7062>
  </B7061>
</B7060>
```

5. *Appeal filed on a decision given by the UPC:*

```
<B7060>
  <B7061 sequence="1" action-type="E" case-number ="UPC_17/2016">
    <date>20161001</date>
    <B7062 sequence="1"
      reference="ECLI:UP:CD_P:2016-678"
      decision="ACTION_REJECTED">
        <date> 20161129</date>
        <B7065 id="ep-chg0018" sequence="2"
          case-number="UPC-E-012678/2016-CA">
            <date> 20161206</date>
          </B7065>
        </B7062>
      </B7061>
    </B7060>
```

6. *Decision on a filed appeal:*

```
<B7060>
  <B7061 sequence="1" action-type="I" case-number ="UPC_17/2016">
    <date>20161001</date>
    <B7062 id="ep-chg0017" sequence="1"
      reference="ECLI:UP:CD_P:2016-678" decision="INFRINGED">
        <date> 20161129</date>
        <B7065 sequence="2" case-number="UPC-E-012678/2016-CA ">
          <date>20161206</date>
          <B7066 id="ep-chg0019" sequence="1"
            reference="ECLI:UP:CA:2016:1024"
            decision=" NOT_INFRINGED">
              <date>20161229</date>
            </B7066>
          </B7065>
        </B7062>
      </B7061>
    </B7060>
```

B7080 – Public notification

When there is a public notification for an EP patent with unitary effect, this information will be stored on B7080 group tag.

XML structure:

```
<B7080>
  <B7081>Inspection place
    Code  Meaning
    • 1: The Hague
    • 2: Munich
    • 3: Berlin
  </B7081>
  <B7082>Addressee
    <snm>Name</snm>
    <iid>EPO number</iid>
    <adr>Address
      <str>Street</str>
      <city>City, town</city>
      <ctry>Country code</ctry>
    </adr>
  </B7082>
  <B7083>Free text</B7083>
</B7080>
```

Example:

```
<B7080 id="ep-chg0001">
  <B7081>1</B7081>
  <B7082>
    <snm>Jung, Dae-Hoon</snm>
    <iid>101528504</iid>
    <adr>
      <str>201, 115-4, Silheung-dong Geumcheon-gu</str>
      <city>Seoul 423-746</city>
      <ctry>KR</ctry>
    </adr>
  </B7082>
  <B7083>.....</B7083>
</B7080>
```

B7091 – Date of intention to license

In order to promote and facilitate the economic exploitation of an invention protected by a European patent with unitary effect, the proprietor of that patent should be able to offer it to be licensed in return for appropriate consideration. To that end, the patent proprietor should be able to file a statement with the EPO that he is prepared to grant a license in return for appropriate consideration. In that case, the patent proprietor should benefit from a reduction of the renewal fees as from the EPO's receipt of such statement.

Example:

Request to license

```
<B7090>
  <B7091 id="ep-chg0015">
    <date>20161124</date>
  </B7091>
</B7090>
```

B7092 – Date of the withdrawal of the intention to license

The proprietor may withdraw his intention to license his patent with unitary protection.

Example:

Withdraw the request to license

```
<B7090>
  <B7091>
    <date>20161124</date>
  </B7091>
  <B7092 id="ep-chg0016">
    <date>20161223</date>
  </B7092>
</B7090>
```

B7120 – Revocation on request

According to Regulation (EU) No 1257/2012 on page L 36/4 , Article 2 mentions that the date of revocation under Article 105a should be available for patents with unitary effect. Therefore, this event will be stored on B7120 group tag. It will be stored in the following XML structure:

```
<B7120>
  <B7121>
    <date>date of request</date>
  </B7121>
  <B7122>kind of revocation</B7122>
  <B7123>code decision of the revocation on request</B7123>
  <B7124><date>date of payment</date></B7124>
  <B7126><date>date of dispatch of the decision</date></B7126>
  <B7127><date>date of legal effect</date> </B7127>
</B7120>
```

Possible values on the “**kind of revocation**”:

- 01 : filed during opposition period
- 02 : filed after opposition period

Possible values on the “**code decision on revocation request**”:

- 01 : admissible
- 02 : inadmissible
- 03 : deemed not filed

Example:

```
<B7120>
  <B7121>
    <date>20151117</date>
  </B7121>
  <B7122>02</B7122>
  <B7123 id="ep-chg0001">01</B7123>
  <B7124>
    <date>20151118</date>
  </B7124>
  <B7126>
    <date>20151125</date>
  </B7126>
  <B7127 id="ep-chg0002">
    <date>20151230</date>
  </B7127>
</B7120>
```

B7231 – Date of request for re-establishment of rights

The proprietor may file a request re-establishment of rights for the following reasons:

- he filed a request for unitary effect was filed too late (later than one month after the date of grant)
- he has been notified that his patent with unitary effect is about to lapse

This event will be stored in B7231 tag.

Examples:

*Request for re-establishment of rights **due to a late filing on the request for unitary effect**, then kind attribute contains 'REES **UREQ**'*

```
<B7230>
  <B7231 id="ep-chg0015" kind="REES UREQ">
    <date>20150629</date>
  </B7231>
</B7230>
```

*Request for re-establishment of rights **due to a notification of lapse** (in this example: because 4th renewal year is not yet paid), then the kind attribute contains 'REES **UDLA**'*

```
<B7230>
  <B7231 id="ep-chg0015" kind="REES UDLA RFEE04">
    <date>20161124</date>
  </B7231>
</B7230>
```

B7238 – Date of decision & purport for re-establishment of rights

The request for re-establishment of rights will be examined and the decision will be communicated to the proprietor. This event will be stored in B7238 tag and the purport will be stored in its **decision** attribute where the possible values are:

- '2' : rejected
- '3' : accepted

Example:

Accepted request for re-establishment of rights **due to a late filing on the request for unitary effect**, then attribute **kind** in B7231 tag contains 'REES **UREQ**' & the attribute **decision** in B7238 tag contains the value '**3**'

```
<B7230>
  <B7231 kind="REES UREQ">
    <date>20150629</date>
  </B7231>
  <B7238 decision="3">
    <date>20160126</date>
  </B7238>
</B7230>
```

Accepted request for re-establishment of rights **due to a notification of lapse** (in this example: because 4th renewal year was not yet paid) the attribute **kind** in B7231 tag contains 'REES **UDLA**' & the attribute **decision** in B7238 tag contains the value '**3**'

```
<B7230>
  <B7231 kind="REES UDLA RFEE04">
    <date>20161124</date>
  </B7231>
  <B7238 id="ep-chg0015" decision="3">
    <date>20161124</date>
  </B7238>
</B7230>
```

B7239 – Date of revocation

According to Regulation (EU) No 1257/2012 on page L 36/4 , Article 2 mentions that date of revocation after an opposition procedure should be available for patents with unitary effect. Therefore, this event will be stored on B7239 tag.

Example:

```
<B7230>
  <B7239 id="ep-chg0001">
    <date>20161031</date>
  </B7239>
</B7230>
```

B7245 – Date of suspension (Rule 14) / Interruption (Rule 142) of proceedings

When there is a suspension or an interruption on a EP patent with unitary effect, the date will be stored in B7245 tag and the reason in the **kind** attribute which may contain the following values:

- ‘2’ : Applicant died (Rule 142(1)(a))
- ‘3’ : Legal incapacity of applicant (Rule 142(1)(a))
- ‘4’ : Legal prevention (Rule 142(1)(b))
- ‘5’ : Representative died (Rule 142(1)(c))
- ‘6’ : Legal incapacity of representative (Rule 142(1)(c))
- ‘7’ : Bankruptcy of the representative (Rule 142(1)c)

Example:

```
<B7240>
  <B7245 id=ep-chg0001 kind="2">
    <date>20160724</date>
  </B7245>
</B7240>
```

B7246 – Date of resumption of proceedings (Rule 14 / Rule 142)

When the suspension or interruption is resumed, the date of resumption will be stored in B7246 tag.

Example:

```
<B7240>
  <B7246 id="ep-chg0001">
    <date>20160831</date>
  </B7246>
</B7240>
```

B7720 – Inventors

According to the UPR Rule 16(1)(i), the inventors have to be included in the UPP chapter. The B7720 group tag will contain the same data as B720 group tag.

Example:

```
<B7720 id="ep-chg0001">
  <B7721>
    <snm>Nickel, Norbert H.</snm>
    <adr>
      <str>2 Ringslebenstrasse, Apt. 229</str>
      <city>12353 Berlin</city>
      <ctry>DE</ctry>
    </adr>
  </B7721>
  <B7721>
    <B7725>
      <text>The other inventors have agreed to waive their entitlement to
      designation.</text>
    </B7725>
  </B7721>
</B7720>
```

B7471 – Date of dispatch of the lapse situation

When the renewal fee is not paid in due time, a letter is sent to the proprietor notifying him that the patent is about to be lapsed. This event will be stored in B7471 tag where the attribute **kind** contains the reason code. The possible values are:

RFEEnn	Renewal fee not paid for year <i>nn</i>
PBKFEE	When the proprietor has requested and received the compensation for translation costs but it turns out that it was done on basis of a false declaration, the proprietor will be invited to pay back the compensation costs together with the first following due renewal fee. When the proprietor fails to pay these compensation costs, it will lead to a notification of lapse where attribute kind contains this value.

Patent with unitary effect where a notification of lapse has been sent because the renewal fee for the 2nd year has not been paid

```
<B7471 id="ep-chg0011" kind="RFEE02">
  <date>20161220</date>
</B7471>
```

Patent with unitary effect where a notification of lapse has been sent because the compensation for translation costs have not been paid back by the proprietor

```
<B7471 kind="PBKFEE">
  <date>20151008</date>
</B7471>
```

B7475 – Date of legal effect of the lapse

After all the delays for renewal fees have expired, the patent with unitary effect will be set as "lapsed" and the a date of legal effect will be stored in B7475 tag where the attribute **kind** contains the reason code. The possible values are:

- 01 : Renewal fee not paid
- 02 : Compensation fee not paid back
- 03 : Renewal & compensation fees not paid
- 20 : end 20th year

Example:

EP patent with unitary effect lapsed at the end of 20th year

```
<B7475 id="ep-chg0012" kind="20">
  <date>20161124</date>
</B7475>
```

B7730 – Proprietors of UPP

As described in the UPR Rule 16(1)(h), particulars of the proprietor of the European patent with unitary effect as provided for in Rule 41, paragraph 2(c), EPC.

Note. In case of transfer of rights, the tag B7738 will be inserted with '00000000' in the date tag

Examples:

Change of address of the proprietor of UPP

```
<B7730 id="ep-chg009">
  <B7731>
    <snm>Novartis AG</snm>
    <iid>100189475</iid>
    <irf>N3-87</irf>
    <adr>
      <str>Lichtstrasse 35</str>
      <city>4056 Basel</city>
      <ctry>CH</ctry>
    </adr>
  </B7731>
</B7730>
```

Change due to a transfer of rights of the proprietor of UPP

```
<B7730 id="ep-chg010">
  <B7731>
    <snm>Novartis AG</snm>
    <iid>100189475</iid>
    <irf>N3-87</irf>
    <adr>
      <str>Lichtstrasse 35</str>
      <city>4056 Basel</city>
      <ctry>CH</ctry>
    </adr>
    <B7738>
      <date>00000000</date>
    </B7738>
  </B7731>
</B7730>
```

B7740 – Representative of the proprietors of UPP

As described in the UPR Rule 16(1)(c), UPR - (c) particulars of the representative of the proprietor of the European patent as provided for in Rule 41, paragraph 2(d), EPC.

Example:

```
<B7740 id="ep-chg0010">
  <B7741>
    <snm>Zinkler, Franz </snm>
    <sfx>et al</sfx>
    <iid>101189957</iid>
    <adr>
      <str>Patentanwälte Schoppe, Postfach 246</str>
      <city>82043 Pullach </city>
      <ctry>DE</ctry>
    </adr>
  </B7741>
</B7740>
```

B7790 – Licence registration

When the licence has been registered for an EP patent with unitary effect, the serial number & legal effect date of the licence as well as the name & address of the licensee will be stored in B790 group tag.

Example:

```
<B7790 id="ep-chg0020">
  <B7791>
    <dnum>
      <text>0101</text>
    </dnum>
    <date>20110801</date>
    <snm>Orbital 2 Limited</snm>
    <iid>101243244</iid>
    <adr>
      <str>Morva Griggs Close</str>
      <city>Chipping Campden Gloucestershire GL55 6BJ</city>
      <ctry>GB</ctry>
    </adr>
    <B7796>
      <ctry>AT</ctry><ctry>BE</ctry>
    </B7796>
  </B7791>
</B7790>
```

B7910 - Limitation procedure - Initial filing

According to Regulation (EU) No 1257/2012 on page L 36/4 , Article 2 mentions that the limitation data under Article 105a should be available for patents with unitary effect. Consequently the B091EP tag data is replicated in the B7910 group tag with the following XML structure:

```
<B7901 limitation-sequence="n">          Limitation sequence number
  <B7910>
    <B7911><date>Date of filing</date><B7911>
    <B7912>Limitation kind</B7912>
    <B7913>Decision code</B7913>
    <B7914><date>Date of payment</date></B7914>
  </B7910>
</B7901>
```

Possible values on the “**Limitation kind**”:

- 01 : filed during opposition period
- 02 : filed after opposition period

Possible values on the “**Decision code**”:

- 01 : admissible
- 02 : inadmissible
- 03 : deemed not filed
- 04: deemed not filed, opposition pending/filed
- 05: withdrawn

Example:

```
<B7900>
  <B7901 limitation-sequence="1">
    <B7910 id="ep-chg0003">
      <B7911><date>20080914</date></B7911>
      <B7912>01</B7912>
      <B7913>01</B7913>
    </B7910>
  </B7901>
</B7900>
```

B7920 - Limitation procedure – Request rejected

Same as for B7910 group tag, when the request for limitation for a patent with unitary effect is rejected, the B092EP tag data is replicated in the B7920 group tag and this is the XML structure:

```
<B7920>    Rejection of limitation
    <B7921>Kind of rejection</B7921>
    <B7922><date>Decision despatched on</date><B7922>
    <B7923><date>Legal effect on</date><B7923>
</B7920>
```

Possible values on the “**Kind of rejection**”:

- 01 : substantive refusal
- 02 : inadmissible for formal reasons (R.94)
- 03 : no (late) reply to subset report
- 04 : RALL (request allowed) requirements not fulfilled

Example:

```
<B7900>
  <B7901 limitation-sequence="1">
    <B7910>
      <B7911><date>20080914</date>
      </B7911><B7912>01</B7912>
      <B7913>01</B7913>
    </B7910>

    <B7920 id="ep-chg0004">
      <B7921>02</B7921>
      <B7922><date>20080612</date></B7922>
      <B7923><date>20090808</date></B7923>
    </B7920>

  </B7901>
</B7900>
```

B7930 - Limitation procedure – Request allowed

Same as for B7920 group tag, when the request for limitation for a patent with unitary effect has been allowed the B093EP tag data is replicated in the B7930 group tag and this is the XML structure:

```
<B7930>    Request allowed
    <B7931><date>Despatched on</date></B7931>
    <B7932><date>Translation received on</date></B7932>
    <B7933><date>Full payment received on</date></B7931>
</B7930>
```

Example:

```
<B7900>
  <B7901 limitation-sequence="1">
    <B7910>
      <B7911><date>20080914</date>
      </B7911><B7912>01</B7912>
      <B7913>01</B7913>
    </B7910>

    <B7930 id="ep-chg0004">
      <B7931><date>20150929</date></B7931>
      <B7932><date> 20151008</date></B7932>
      <B7933><date> 20151008</date></B7933>
    </B7930>

  </B7901>
</B7900>
```

Unicode Table 1 – C0 Controls and Basic Latin (Mostly old ASCII code pages)

In re-designing the EPO publication system to use XML we decided storing the data in Unicode UTF-8 as it is now common for all XML based systems.

Character	Unicode	Description
<control>	000A	New line control code; Line Feed
<control>	000C	New page control code; Form Feed
<control>	000D	Carriage return control code
<control>	001B	Escape control code
<control>	0020	Space
!	0021	Exclamation mark
"	0022	Quotation mark
#	0023	Numerical sign
\$	0024	Dollar sign
%	0025	Percent sign
&	0026	Ampersand
'	0027	Apostrophe
(	0028	Left, opening parenthesis
)	0029	Right, close parenthesis
*	002A	Asterisk
+	002B	Plus
,	002C	Comma
-	002D	Hyphen or minus
.	002E	Full stop, Period
/	002F	Solidus, slash
0	0030	Digit 0
1	0031	Digit 1
2	0032	Digit 2
3	0033	Digit 3
4	0034	Digit 4
5	0035	Digit 5
6	0036	Digit 6
7	0037	Digit 7
8	0038	Digit 8
9	0039	Digit 9
:	003A	Colon
;	003B	Semicolon
<	003C	Less-than sign use <
=	003D	Equals
>	003E	Greater than sign use >
