## 1. Preliminary remarks

The present Guidelines are dedicated to the specific procedures before the EPO in its capacity as PCT Authority. Their full name is "Guidelines for Search and Examination at the European Patent Office as PCT Authority", or "PCT-EPO Guidelines" for short.

The PCT-EPO Guidelines are aimed primarily at examiners and formalities officers, but are also intended to serve applicants, agents and other users of the patent system as a basis for illustrating the law and practice in proceedings before the EPO in the international phase of the PCT procedure.

They are published as a standalone document in electronic format only, and will be revised on a yearly basis at the same time as the Guidelines for Examination in the European Patent Office ("EPC Guidelines"). The electronic publication includes not only the online version in HTML format, but also a printable PDF file.

The current eleventh edition features several updates – most notably in Part A, where additional clarifications have been introduced to ensure clearer guidance.

Any indication from readers drawing attention to errors as well as suggestions for improvement is highly appreciated and can be sent to [Guidelines@epo.org](mailto:Guidelines@epo.org).

Any references to persons made in the Guidelines are to be understood as being gender-neutral.

### 1.1 Relationship between the PCT and the EPC

In all PCT procedures before the EPO, the PCT is applied in accordance with the provisions of Part X of the EPC, "International applications under the Patent Cooperation Treaty – Euro-PCT applications", the Implementing Regulations to the EPC ("EPC Rules") and the relevant further legislation.

*Art. 150(1) EPC*

The legal basis for all EPO activities under the PCT is Part X of the EPC (Articles 150-153) as implemented by the provisions of the Implementing Regulations to the EPC, in particular Rules 157-165, and by further legislation such as decisions of the President and the Administrative Council of the European Patent Organisation.

For international applications which are the subject of proceedings before the EPO in any of its functions, the provisions of the PCT and its Regulations ("PCT Rules") apply, supplemented by the provisions of the EPC. In case of conflict between the provisions of the EPC and those of the PCT or the PCT Rules, the PCT or the PCT Rules prevail.

*Art. 150(2) EPC*

The PCT allows offices to notify the IB of an incompatibility of certain provisions with their national law, in which case those provisions do not

apply before them. A list of notifications of incompatibility filed by the EPO is published on the WIPO website.<sup>1</sup>

## **1.2. Further legal sources and instructions**

An agreement between the European Patent Organisation and the International Bureau of WIPO ("Agreement EPO-WIPO") concerning the functioning of the EPO as International Authority (ISA, SISA and IPEA) sets out all particulars of the EPO's work in that capacity. The latest agreement, dated October 2017, entered into force on 1 January 2018 and has been amended several times since then. A consolidated version of the text as amended can be found on the WIPO website.<sup>2</sup>

Moreover, detailed instructions on the procedure to be followed by the PCT Authorities are given in the Administrative Instructions under the PCT ("PCT/AI"),<sup>3</sup> the PCT Receiving Office Guidelines ("RO Guidelines", "GL/RO")<sup>4</sup> and the PCT International Search and Preliminary Examination Guidelines ("ISPE Guidelines", "GL/ISPE"),<sup>5</sup> all of which are available on the WIPO website. The PCT-EPO Guidelines are intended to be complementary to, but not a substitute for, these sources. In case of conflict, the PCT Administrative Instructions, the PCT Receiving Office Guidelines and the PCT International Search and Preliminary Examination Guidelines prevail.

### **1.2.1 Relationship between the PCT-EPO Guidelines and the RO Guidelines**

The RO Guidelines are intended to assist receiving Offices in carrying out the duties entrusted to them under the PCT and provide them with reference material that can help them in processing international applications under the PCT. However, the RO Guidelines do not cover all possible procedures that may be in place at a receiving Office, and not all tasks referred to need to be performed for every international application. The PCT-EPO Guidelines provide details on the procedure followed and criteria applied by the EPO as receiving Office, including details on specific cases.

### **1.2.2. Relationship between the PCT-EPO Guidelines and the ISPE Guidelines**

The ISPE Guidelines set out in detail the procedures and criteria to be followed by all International Searching and Preliminary Examining Authorities. However, to accommodate divergent practice amongst different authorities, they allow for some degree of freedom as to which procedures/criteria are used, with the different possible options either defined in a specific paragraph of the particular chapter concerned or listed in an appendix to that chapter. Generally, the EPO will use the same criteria when searching and examining an international application as would have been used in the European procedure. This means that where the

---

<sup>1</sup> [wipo.int/pct/en/texts/reservations/res\\_incomp.html](http://wipo.int/pct/en/texts/reservations/res_incomp.html).

<sup>2</sup> [wipo.int/export/sites/www/pct/en/docs/agreements/ag-ep.pdf](http://wipo.int/export/sites/www/pct/en/docs/agreements/ag-ep.pdf).

<sup>3</sup> [wipo.int/en/web/pct-system/texts/ai/ai\\_index](http://wipo.int/en/web/pct-system/texts/ai/ai_index).

<sup>4</sup> [wipo.int/pct/en/texts/ro/index.html](http://wipo.int/pct/en/texts/ro/index.html).

<sup>5</sup> [wipo.int/pct/en/texts/ispe/index.html](http://wipo.int/pct/en/texts/ispe/index.html).

*Art. 16(3)*  
*Art. 32(3)*  
*Art. 152 EPC*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*OJ EPO 2020, A35*  
*OJ EPO 2024, A29*

ISPE Guidelines are either silent or non-exhaustive or give no guidance on a particular topic, then the equivalent provisions of the EPC Guidelines are applied *mutatis mutandis* to PCT search and preliminary examination. A list of the criteria chosen by the EPO where the ISPE Guidelines leave it to authorities to choose between alternative options is provided in section 3.2 below.

### 1.3 Further sources of information

Further information on the international phase can be found in the PCT Applicant's Guide.<sup>6</sup> It is supplemented by a number of annexes containing specific information both on the procedures before the EPO as receiving Office and International Authority (ISA, SISA and IPEA) and on the procedure where the EPO is designated/elected Office.

### 1.4 Use of artificial intelligence

See EPC Guidelines, General Part, 5.

## 2. Explanatory notes

### 2.1 Overview

The PCT-EPO Guidelines follow the structure of the EPC Guidelines (Parts A, B, C, E, F, G and H, without D because there is no opposition, limitation or revocation under the PCT), and as far as possible the organisation within each part is similar to that of the EPC Guidelines, adapted to the particularities of the PCT system. The sequence of chapters within Part A, however, differs from that of the EPC Guidelines. This is due to the particular way in which the content is being gradually extended and the structure may be reconsidered prior to completion of Part A.

Thus, these Guidelines comprise the following seven parts:

Part A:	Guidelines for Formalities Examination
Part B:	Guidelines for Search
Part C:	Guidelines for Procedural Aspects in Chapter II
Part E:	Guidelines on General Procedural Matters
Part F:	The International Application
Part G:	Patentability
Part H:	Amendments and Corrections

Part A deals with the procedures for formalities examination at the EPO in its capacity as RO, (S)ISA and IPEA. Part B deals with search matters. Part C relates to procedures to be followed in Chapter II.

---

<sup>6</sup> [wipo.int/pct/en/appguide/index.jsp](http://wipo.int/pct/en/appguide/index.jsp)

Part E deals with procedural matters relevant to several or all of the stages in procedure at the EPO as PCT Authority. Part F deals with the requirements which the application must fulfil other than patentability, in particular unity of invention (Rule 13), sufficiency of disclosure (Art. 5), clarity (Art. 6) and the right to priority (Art. 8). Part G deals with excluded subject-matter (Art. 17(2)(a)(i) and Rule 39; Art. 34(4)(a)(i) and Rule 67), novelty (Art. 33(2)), inventive step (Art. 33(3)) and industrial application (Art. 33(4)). Part H deals with the requirements relating to amendments and corrections. It relates in particular to the right to amend, the allowability of amendments and the correction of defects and errors.

Each part of the Guidelines is divided into chapters, each subdivided into numbered sections which may be further divided into subsections. Cross-references to other sections and subsections are indicated by the relevant letter of that part, then the chapter number (a Roman numeral) and then the section or subsection number (so C-V, 4.2 would be used to refer to subsection 4.2 of chapter V of Part C of the PCT-EPO Guidelines). When referring to the Guidelines for Examination in the EPO, the same format is used, preceded by "EPC Guidelines".

Marginal references to articles and rules without further identification relate to the Articles or Rules of the Patent Cooperation Treaty which provide authority for what is stated. It is believed that such references avoid the need for extensive quotation from the PCT itself. References to Articles or Rules of the European Patent Convention are followed by "EPC".

*Art. 150(2) EPC*

Marginal references to the RO and ISPE Guidelines relate to the corresponding sections in those Guidelines and are an indication that the present Guidelines apply within the framework of the RO and ISPE Guidelines, in conformity with the supplementary role of the EPC in the international phase.

Where the practice for EP and PCT applications is the same (e.g. for the assessment of novelty), cross-references are made to the EPC Guidelines. Where the practices are only partially overlapping, the information is contained in full in the PCT-EPO Guidelines, in order to avoid possible confusion. Chapter 3, Annex I, provides an EPC-PCT concordance table.

Any references to persons made in the PCT-EPO Guidelines are to be understood as being gender-neutral.

## **2.2 Applicability of the PCT-EPO Guidelines**

These Guidelines are intended to cover normal occurrences. They should therefore be considered only as general instructions. The application of these Guidelines to individual international patent applications is the responsibility of the formalities and examining staff and they may have to go beyond these instructions in exceptional cases. Nevertheless, as a general rule, parties can expect the EPO in its capacity as RO, (S)ISA or IPEA to act in accordance with these Guidelines until such time as they – or the relevant legal provisions – are amended. Notices concerning such amendments are published in the Official Journal of the EPO and on the

EPO website. It should also be noted that these Guidelines do not constitute legal provisions.

## 2.3 Abbreviations

In these Guidelines, the following abbreviations are used:

AAD	Arrangements for the automatic debiting procedure
ADA	Arrangements for deposit accounts
ARIPO	African Regional Intellectual Property Organization
Art.	Article
EPC	European Patent Convention
EPC Guidelines	Guidelines for Examination in the EPO
EPO	European Patent Office
ESOP	European search opinion
GL/ISPE	PCT International Search and Preliminary Examination Guidelines
GL/RO	PCT Receiving Office Guidelines
IB	International Bureau
IPE	International preliminary examination
IPEA	International Preliminary Examining Authority
IPER	International preliminary examination report
IPRP	International preliminary report on patentability
ISA	International Searching Authority
ISR	International search report
OJ EPO	Official Journal of the European Patent Office
PCT	Patent Cooperation Treaty
PCT AG I	PCT Applicant's Guide – Introduction to the International Phase
PCT/AI	Administrative Instructions under the PCT

PCT-CLAR	Request for clarification before search
PCT-EPO Guidelines	Guidelines for Search and Examination at the EPO as PCT Authority
PPH	Patent Prosecution Highway
RFees	Rules relating to Fees
RO	Receiving Office
SIS	Supplementary international search
SISA	Supplementary International Searching Authority
SISR	Supplementary international search report
WIPO	World Intellectual Property Organization
WO-ISA	Written opinion of the International Searching Authority

#### 2.4 Forms used by the RO, ISA, SISA and IPEA

The following forms are used by the EPO as RO:

PCT/RO/103	Invitation to correct the purported international application
PCT/RO/104	Notification that the purported international application is not and will not be treated as an international application
PCT/RO/105	Notification of the international application number and of the international filing date
PCT/RO/106	Invitation to correct defects in the international application
PCT/RO/107	Invitation relating to certain parts of the international application that are, or appear to be, missing
PCT/RO/108	Invitation to request rectification
PCT/RO/109	Notification of decision concerning request for rectification
PCT/RO/110	Invitation to correct priority claim and/or notification of possibility to request restoration of the right of priority
PCT/RO/111	Notification relating to priority claim

PCT/RO/114	Notification on decision of confirmation of incorporation by reference of element or part
PCT/RO/117	Notification that international application considered to be withdrawn
PCT/RO/119	Notification of refund of fees
PCT/RO/126	Notification concerning later submitted parts of an international application
PCT/RO/129	Notification concerning request to restore the international filing date
PCT/RO/130	Invitation to request omission of information from international publication
PCT/RO/131	Notification of defects with regard to correspondence submitted by the applicant
PCT/RO/132	Communication in cases for which no other form is applicable
PCT/RO/133	Invitation to pay prescribed fees together with late payment fee
PCT/RO/135	Notification of date of receipt of priority document or of priority application number
PCT/RO/136	Notification of withdrawal
PCT/RO/138	Communication regarding extension of time limit
PCT/RO/151	Notification of transmittal of purported international application to the International Bureau as receiving Office and invitation to pay fee
PCT/RO/152	Invitation to authorize transmittal of purported international application to the International Bureau as Receiving Office and to pay fee
PCT/RO/158	Notification of intended refusal of request to restore right of priority and/or invitation to furnish declaration or other evidence
PCT/RO/159	Notification of decision on request to restore right of priority

The following forms are used by the EPO as ISA:

PCT/ISA/202	Notification of receipt of search copy
-------------	--

PCT/ISA/203	Declaration of non-establishment of international search report
PCT/ISA/205	Notification of modification of abstract approved by International Searching Authority
PCT/ISA/206	Invitation to pay additional fees and, where applicable, protest fee
PCT/ISA/207	Informal clarification: note/invitation
PCT/ISA/208	Invitation to pay additional fees in case of later submitted sheets
PCT/ISA/210	International search report
PCT/ISA/212	Notification of decision on protest or declaration that protest considered not to have been made
PCT/ISA/213	Notification of refund of search fee
PCT/ISA/216	Invitation to request rectification
PCT/ISA/217	Notification of decision concerning request for rectification
PCT/ISA/220	Notification of transmittal of the international search report and the written opinion of the International Searching Authority, or the declaration
PCT/ISA/224	Communication in cases for which no other form is applicable
PCT/ISA/225	Invitation to furnish nucleotide and/or amino acid sequence listing and to pay, where applicable, late furnishing fee
PCT/ISA/237	Written opinion of the International Searching Authority

The following forms are used by the EPO as SISA:

PCT/SISA/501	Supplementary international search report
PCT/SISA/502	Declaration of non-establishment of supplementary international search report
PCT/SISA/503	Notification of decision on review of opinion; or declaration that request for review of opinion considered not to have been made

PCT/SISA/504	Invitation to furnish nucleotide and/or amino acid sequence listing and to pay, where applicable, late furnishing fee
PCT/SISA/506	Notification of receipt of copy of international application for the purposes of supplementary international search
PCT/SISA/524	Communication in cases for which no other form is applicable

The following forms are used by the EPO as IPEA:

PCT/IPEA/402	Notification of receipt of demand by competent International Preliminary Examining Authority
PCT/IPEA/403	Notification concerning payment of the preliminary examination and handling fees
PCT/IPEA/404	Invitation to correct defects in the demand
PCT/IPEA/405	Invitation to restrict or pay additional fees, and, where applicable, protest fee
PCT/IPEA/407	Notification that demand considered not to have been submitted
PCT/IPEA/408	Written opinion of the International Preliminary Examining Authority
PCT/IPEA/409	International preliminary report on patentability (Chapter II of the Patent Cooperation Treaty)
PCT/IPEA/411	Invitation to request rectification
PCT/IPEA/412	Notification of decision concerning request for rectification
PCT/IPEA/415	Notification concerning documents transmitted
PCT/IPEA/420	Notification of decision on protest or declaration that protest considered not to have been made
PCT/IPEA/423	Invitation to correct defects in correspondence submitted by the applicant
PCT/IPEA/424	Communication in cases for which no other form is applicable
PCT/IPEA/425	Notification of cancellation of certain elections
PCT/IPEA/427	Communication regarding extension of time limit
PCT/IPEA/428	Note on informal communication with the applicant

PCT/IPEA/429	Notification concerning informal communication with the applicant
PCT/IPEA/431	Invitation to submit amendments
PCT/IPEA/432	Communication regarding amendments not taken into account
PCT/IPEA/436	Notification of transmittal of demand to the International Bureau or to the competent International Preliminary Examining Authority
PCT/IPEA/440	Invitation to pay prescribed fees together with late payment fee
PCT/IPEA/441	Invitation to furnish nucleotide and/or amino acid sequence listing and to pay, where applicable, late furnishing fee
PCT/IPEA/442	Invitation to indicate competent International Preliminary Examining Authority
PCT/IPEA/443	Invitation to furnish translation for the purposes of international preliminary examination
PCT/IPEA/444	Notification by non-competent International Preliminary Examining Authority that demand considered not to have been submitted

The forms can be found via the following link: [wipo.int/pct/en/forms/](http://wipo.int/pct/en/forms/)

## 2.5 Publications

Since 1 January 2009, the following kind codes have been used for publication of a PCT application:

Code	Publication details
A1	International application published with ISR
A2	International application published without ISR or international application published with declaration under Article 17(2)(a)
A3	Later publication of ISR with revised front page
A4	Later publication of amended claims and/or statement (Article 19) with revised front page
A8	International application republished with corrections to front page bibliographic data
A9	International application or ISR republished with corrections, alterations or supplements (see also WIPO Standard ST.50)

### **3.2 Annex II: Criteria chosen by the EPO as ISA/IPEA on specific points in the ISPE Guidelines**

In a number of cases the ISPE Guidelines leave ISAs/IPEAs the choice between alternative guidelines upon which each ISA/IPEA may rely as appropriate.

The options are set out in the appendices to the chapters of the ISPE Guidelines mentioned below. The paragraph number (e.g. Point A5.16) refers to the relevant paragraph in the chapter concerned (in this case Chapter 5, point 16).

The EPO as ISA/IPEA has chosen the options listed below.

#### **Appendix to Chapter 4**

Point A4.05	References to prior art	Option [1] applies
-------------	-------------------------	--------------------

#### **Appendix to Chapter 5**

Point A5.16	Multiple dependent claims	Option [2] applies
Point A5.20	Interpretation of claims	Option [2] applies
Point A5.21	The EPO applies the first sentence concerning "use" claims	
Point A5.26	Product-by-process claims	Option [1] applies
Point A5.42	Conciseness	Option [2] applies

#### **Appendix to Chapter 9**

Point A9.07	Excluded subject matter	Option [2] applies
-------------	-------------------------	--------------------

Point A9.15	Programs for computers	Option [2] applies
-------------	------------------------	--------------------

**Appendix to Chapter 12**

Point A12.02	Novelty: effective date	Option [1] applies
--------------	-------------------------	--------------------

**Appendix to Chapter 13**

Point A13.08.1	The EPO applies the problem-solution approach	
----------------	---	--

**Appendix to Chapter 14**

Point A14.01[2]	The EPO applies the criterion of industrial applicability	
-----------------	---	--

**Appendix to Chapter 20**

Point A20.21	Disclaimer	Option [2] applies
--------------	------------	--------------------

## Chapter I – Introduction I-1

1.	Overview	I-1
2.	Purpose of Part A	I-1
3.	Other parts relating to formalities	I-1

## Chapter II – Filing of international applications and examination on filing II-1

1.	Where and how international applications may be filed	II-1
1.1	Filing with the EPO as receiving Office	II-1
1.2	Methods of filing with the EPO as receiving Office	II-1
1.2.1	Filing of applications electronically	II-2
1.2.2	Filing of applications by delivery by hand or by post	II-3
1.2.3	Filing of applications by other means	II-3
1.3	Filing of documents subsequent to the application	II-4
1.4	Debit orders for deposit accounts held with the EPO	II-4
1.5	Application numbering system	II-4
2.	Competence of the EPO to act as receiving Office	II-4
3.	Procedure on filing	II-5
3.1	Acknowledgement of receipt	II-5
3.2	Filing via a competent national authority	II-5
4.	Examination on filing	II-6
4.1	Minimum requirements for according an international filing date	II-6
4.1.1	Transmittal of the international application to the ISA and IB	II-7
4.2	Defects	II-7
5.	Incorporation by reference of missing elements or parts	II-7

<b>6.</b>	<b>Correction of erroneously filed elements or parts</b>	<b><u>II-8</u></b>
6.1	Correct element or part not furnished for the purpose of incorporation by reference	<u>II-9</u>
6.1.1	International filing date has not yet been accorded	<u>II-9</u>
6.1.2	International filing date has already been accorded	<u>II-9</u>
6.2	Correct element or part furnished for the purpose of incorporation by reference	<u>II-9</u>
 <b>Chapter III – Fees</b>		 <b><u>III-1</u></b>
<b>1.</b>	<b>General</b>	<b><u>III-1</u></b>
<b>2.</b>	<b>Amounts of fees</b>	<b><u>III-1</u></b>
<b>3.</b>	<b>Methods of payment</b>	<b><u>III-1</u></b>
<b>4.</b>	<b>Fees to be paid to the EPO as receiving Office</b>	<b><u>III-2</u></b>
4.1	Transmittal fee	<u>III-2</u>
4.2	International filing fee	<u>III-2</u>
4.3	International search fee	<u>III-3</u>
4.4	Fee for a certified copy of the priority document	<u>III-4</u>
4.4.1	Fee for establishment and transmittal of a certified copy of the priority document to the IB	<u>III-4</u>
4.4.2	Fee for a certified copy of the priority document for the applicant	<u>III-4</u>
4.5	Late payment fee	<u>III-4</u>
4.6	Fee for requesting restoration of priority right	<u>III-5</u>
<b>5.</b>	<b>Fees to be paid to the ISA/EP</b>	<b><u>III-5</u></b>
5.1	Additional search fee	<u>III-5</u>
5.2	Protest fee	<u>III-5</u>
5.3	Fee for the late furnishing of sequence listings	<u>III-5</u>
<b>6.</b>	<b>Fees to be paid if a SIS request is submitted</b>	<b><u>III-6</u></b>
6.1	Supplementary search handling fee	<u>III-6</u>
6.2	Supplementary search fee	<u>III-6</u>
6.3	Review fee	<u>III-6</u>

<b>7.</b>	<b>Fees to be paid to the IPEA/EP</b>	<b><u>III-6</u></b>
7.1	Handling fee	<u>III-6</u>
7.2	Preliminary examination fee	<u>III-6</u>
7.2.1	Additional preliminary examination fee	<u>III-6</u>
7.3	Protest fee	<u>III-7</u>
7.4	Fee for the late furnishing of sequence listings	<u>III-7</u>
7.5	Late payment fee	<u>III-7</u>
<b>8.</b>	<b>Reduction of fees</b>	<b><u>III-8</u></b>
8.1	Reduction of the international filing fee	<u>III-8</u>
8.1.1	Reduction for applications filed in electronic form	<u>III-8</u>
8.1.1.1	Reduction for filing in PDF	<u>III-8</u>
8.1.1.2	Reduction for filing the request in XML	<u>III-8</u>
8.1.1.3	Reduction for filing request and specification in XML	<u>III-8</u>
8.1.2	Reductions for applicants from certain states	<u>III-8</u>
8.2	Reduction of the international search fee, additional search fee and the supplementary search fee	<u>III-9</u>
8.2.1.1	Reduction of the additional search fee	<u>III-9</u>
8.3	Reduction of the (supplementary search) handling fee	<u>III-9</u>
8.4	Reduction of the preliminary examination fee	<u>III-9</u>
8.4.1	Reduction of the additional preliminary examination fee	<u>III-9</u>
<b>9.</b>	<b>Refund of fees</b>	<b><u>III-10</u></b>
9.1	Refund of the international filing fee	<u>III-10</u>
9.2	Refund of the (additional) international search fee	<u>III-11</u>
9.2.1	Examples of refunds where the ISR is based on earlier search	<u>III-11</u>
9.2.1.1	Full refund	<u>III-11</u>
9.2.1.2	Partial refund	<u>III-11</u>
9.2.1.3	No refund	<u>III-12</u>
9.3	Refund of additional search fees and, where applicable, the protest fee	<u>III-12</u>
9.4	Refund of the supplementary search fee	<u>III-12</u>
9.5	Refund of the review fee	<u>III-12</u>
9.6	Refund of the handling fee	<u>III-12</u>
9.7	Refund of the preliminary examination fee	<u>III-13</u>

9.8	Refund of additional examination fees and, where applicable, the protest fee	III-13
-----	--	--------

## **Chapter IV – Special provisions** **IV-1**

<b>1.</b>	<b>PCT Direct service (see also B-IV, 1.2)</b>	<b>IV-1</b>
1.1	General remarks	IV-1
1.2	Form of submissions	IV-1
1.3	Processing by the EPO as RO	IV-2
1.4	Processing by the EPO as ISA	IV-2
<b>2.</b>	<b>Withdrawals</b>	<b>IV-2</b>
2.1	General remarks	IV-2
2.2	Withdrawal of the international application	IV-3
2.2.1	Conditional withdrawal	IV-3
2.3	Withdrawal of designations	IV-3
2.4	Withdrawal of priority claims	IV-3
2.5	Withdrawal of the supplementary search request	IV-4
2.6	Withdrawal of the demand or of elections	IV-4
<b>3.</b>	<b>Applications disclosing nucleotide and/or amino acid sequences</b>	<b>IV-5</b>

## **Chapter V – Drawings** **V-1**

<b>1.</b>	<b>Graphic forms of presentation considered to be drawings</b>	<b>V-1</b>
1.1	Technical drawings	V-1
1.2	Photographs or coloured drawings	V-1
<b>2.</b>	<b>Presentation of drawings</b>	<b>V-1</b>
2.1	Grouping of drawings	V-1
2.2	Reproducibility of drawings	V-2
2.3	Figure accompanying the abstract	V-2
<b>3.</b>	<b>Requirements regarding the paper used</b>	<b>V-2</b>

<b>4.</b>	<b>Presentation of the sheets of drawings</b>	<b><u>V-2</u></b>
4.1	Usable surface area of sheets	<u>V-2</u>
4.2	Numbering of sheets of drawings	<u>V-2</u>
<b>5.</b>	<b>General layout of drawings</b>	<b><u>V-3</u></b>
5.1	Page-setting	<u>V-3</u>
5.2	Numbering of figures	<u>V-3</u>
5.3	Whole figure	<u>V-3</u>
<b>6.</b>	<b>Prohibited matter</b>	<b><u>V-4</u></b>
<b>7.</b>	<b>Execution of drawings</b>	<b><u>V-4</u></b>
7.1	Drawings of lines and strokes	<u>V-4</u>
7.2	Shading	<u>V-4</u>
7.3	Cross-sections	<u>V-4</u>
7.3.1	Sectional figures	<u>V-4</u>
7.3.2	Hatching	<u>V-4</u>
7.4	Scale of drawings	<u>V-5</u>
7.5	Numbers, letters and reference signs	<u>V-5</u>
7.5.1	Leading lines	<u>V-5</u>
7.5.2	Arrows	<u>V-5</u>
7.5.3	Height of the numbers and letters in the drawings	<u>V-6</u>
7.5.4	Consistent use of reference signs in the description, claims and drawings	<u>V-6</u>
7.5.5	Consistent use of reference signs in the drawings	<u>V-6</u>
7.6	Variations in proportions	<u>V-6</u>
<b>8.</b>	<b>Text matter in drawings</b>	<b><u>V-6</u></b>
<b>9.</b>	<b>Conventional symbols</b>	<b><u>V-7</u></b>
<b>10.</b>	<b>Amendments to drawings</b>	<b><u>V-7</u></b>
<b>11.</b>	<b>Graphic forms of presentation not considered to be drawings</b>	<b><u>V-7</u></b>
11.1	Chemical and mathematical formulae	<u>V-7</u>
11.2	Tables	<u>V-8</u>
11.2.1	Tables in the description	<u>V-8</u>
11.2.2	Tables in the claims	<u>V-8</u>

## **Chapter VI – Examination of formal requirements**

**VI-1**

<b>1.</b>	<b>Claim to priority</b>	<b><u>VI-1</u></b>
1.1	Formal requirements under Rule 4.10	<u>VI-1</u>
1.2	Priority period	<u>VI-2</u>
1.3	Inconsistency in the priority claim	<u>VI-2</u>
1.4	Defects in the priority claim	<u>VI-2</u>
1.4.1	Correction of the priority claim upon invitation	<u>VI-3</u>
1.4.2	Failure to correct	<u>VI-3</u>
1.5	Restoration of the right of priority	<u>VI-4</u>
1.6	Applicant's entitlement to claim priority	<u>VI-7</u>
1.7	Provision of the priority document	<u>VI-7</u>
1.8	Certified copies of international applications	<u>VI-8</u>
<b>2.</b>	<b>Designation of states</b>	<b><u>VI-8</u></b>
2.1	Non-designation for reasons of national law	<u>VI-8</u>
2.2	Closure of the national route	<u>VI-9</u>
<b>3.</b>	<b>Extension and validation states</b>	<b><u>VI-9</u></b>
3.1	Extension states	<u>VI-9</u>
3.2	Validation states	<u>VI-10</u>
<b>4.</b>	<b>Designation of inventor</b>	<b><u>VI-11</u></b>

## **Chapter VII – Languages**

**VII-1**

<b>1.</b>	<b>Admissible languages on filing</b>	<b><u>VII-1</u></b>
1.1	General	<u>VII-1</u>
1.2	International application filed in multiple languages	<u>VII-1</u>
1.2.1	Abstract and text matter of the drawings	<u>VII-1</u>
1.2.2	Request	<u>VII-1</u>
1.2.3	Description and claims	<u>VII-1</u>
1.2.3.1	Sentences or short fragments of the description and/or claims in a language other than the language of the proceedings	<u>VII-1</u>
1.2.3.2	Technical or non-technical terms used in the description and/or the claims in a language other than the language of the proceedings	<u>VII-2</u>

1.2.4	Sequence listing	VII-2
<b>2.</b>	<b>Language of the proceedings</b>	<b>VII-2</b>
2.1	Language for the purpose of the international search	VII-2
2.2	Language for the purpose of the supplementary international search	VII-3
2.3	Language for the purpose of the international preliminary examination	VII-3
2.3.1	Language of the international application	VII-3
2.3.2	Language of the amendments	VII-3
2.3.3	Language of the demand	VII-4
<b>3.</b>	<b>Derogations from the language of the proceedings in written proceedings</b>	<b>VII-4</b>
3.1	Written submissions	VII-4
3.2	International applications filed in Dutch	VII-4
3.3	Priority documents	VII-5
3.4	Third-party observations	VII-5
<b>4.</b>	<b>Correction of the translation</b>	<b>VII-5</b>
<b>5.</b>	<b>Authentic text of the international application</b>	<b>VII-5</b>

## **Chapter VIII – Common provisions** **VIII-1**

<b>1.</b>	<b>Representation</b>	<b>VIII-1</b>
1.1	General principles	VIII-1
1.2	Representation by an agent	VIII-1
1.3	Representation by a common agent, common representative or "deemed common representative"	VIII-2
1.4	Representation by an employee	VIII-3
1.5	Manner of appointment of an agent, common agent or common representative	VIII-3
1.6	Address for correspondence	VIII-3
1.7	Representation before the EPO as International Searching Authority	VIII-4
1.8	Representation before the EPO as Supplementary International Searching Authority	VIII-4

---

1.9	Representation before the EPO as International Preliminary Examining Authority	<u>VIII-5</u>
1.10	Representation before the EPO as designated or elected Office	<u>VIII-5</u>
1.11	Power of attorney	<u>VIII-6</u>
1.12	General power of attorney	<u>VIII-6</u>
1.13	Waivers – exceptions to applicability	<u>VIII-7</u>
<b>2.</b>	<b>Form of documents</b>	<b><u>VIII-7</u></b>
2.1	Documents making up the international application	<u>VIII-7</u>
2.2	Later documents	<u>VIII-7</u>
2.3	Number of copies	<u>VIII-8</u>
2.4	Filing of subsequent documents	<u>VIII-8</u>
<b>3.</b>	<b>Signature of documents</b>	<b><u>VIII-8</u></b>
3.1	Documents filed after filing the international application	<u>VIII-8</u>
3.2	Signature of the PCT request and a power of attorney	<u>VIII-8</u>
3.3	Form of signature	<u>VIII-9</u>
3.4	Joint applicants	<u>VIII-9</u>

## Chapter I – Introduction

### 1. Overview

This current edition of Part A of the PCT-EPO Guidelines deals with filing requirements (Chapter A-II), fees (Chapter A-III), certain special provisions (Chapter A-IV), drawings (Chapter A-V), certain formal requirements (Chapter A-VI), languages (Chapter A-VII) and common provisions (Chapter A-VIII). Other chapters relating to formalities will gradually be added in successive editions.

### 2. Purpose of Part A

Formalities officers should note that this Part A is intended to provide them with knowledge and background to help them carry out their functions in a uniform and expeditious manner. It provides guidance in addition to other relevant PCT legal sources (General Part, 1.2).

### 3. Other parts relating to formalities

It should be noted that information on the procedures for formalities examination at the EPO in its capacity as RO, (S)ISA and IPEA is not restricted to this Part A. Other chapters of the PCT-EPO Guidelines are necessary for the work carried out by formalities officers.

## Chapter II – Filing of international applications and examination on filing

### 1. Where and how international applications may be filed

#### 1.1 Filing with the EPO as receiving Office

Natural and legal persons who are nationals or residents of a PCT contracting state may file an international application with any of the following as receiving Office, provided that this option is available to them:

*Art. 2(xv)*  
*Art. 9, 10*  
*Rule 18, 19*  
*A-II, 3.2*

- the national office of that state
- the office acting for that state
- the International Bureau (IB)

Natural and legal persons who are nationals or residents of an EPC contracting state may file an international application with the EPO as receiving Office instead.

*Art. 151 EPC*  
*Rule 157(1) EPC*  
*OJ EPO 2014, A33*

If there are two or more applicants, it is sufficient for at least one of them to satisfy these requirements. For instance, if a national or resident of a contracting state to the PCT and the EPC is mentioned in the PCT request form as inventor and applicant for the purposes of the United States only, the international application may be filed with the EPO as receiving Office regardless of the residence and nationality of the other applicant(s).

*OJ EPO 2014, A33*  
*PCT/AI 203*  
*WIPO PCT Guide*  
*5.020-5.023*  
*PCT Newsletter*  
*5/2012, 8*  
*4/2014, 6*

The national patent offices of Belgium, Monaco, Montenegro and San Marino do not act as receiving Offices under the PCT. They have delegated this task to the EPO, which will thus act as receiving Office on their behalf for all international applications filed by applicants who are nationals or residents of, or have their principal place of business in, one of these states.

*Rule 19.1(b)*  
*OJ EPO 2018, A17*  
*OJ EPO 2018, A105*  
*OJ EPO 2019, A96*  
*OJ EPO 2022, A82*

For more information on when the EPO is competent to act as receiving Office (see A-II, 2).

#### 1.2 Methods of filing with the EPO as receiving Office

International applications must be filed using the PCT request form (PCT/RO/101).

They can be filed online in electronic form, or by delivery by hand or by post in paper form. If the application is filed online, fee reductions apply (see A-III, 8.1.1).

*Rule 11, 92.4 PCT*  
*OJ EPO 2025, A33*  
*OJ EPO 2025, A35*

*OJ EPO 2025, A52*  
*OJ EPO 2025, A53*

*OJ EPO 2024, A41,  
OJ EPO 2024, A42  
WIPO PCT Guide  
6.003*

The EPO no longer accepts international applications filed by fax (a change with effect from 1 July 2024). Nor does it accept international applications filed by email, telegram, telex or teletext.

*Rule 89bis  
OJ EPO 2025, A52  
OJ EPO 2025, A53*

### **1.2.1 Filing of applications electronically**

An international application may be filed electronically with the EPO as receiving Office.

*OJ EPO 2023, A97  
OJ EPO 2021, A21,  
OJ EPO 2021, A43  
OJ EPO 2018, A25  
OJ EPO 2024, A32*

All documents filed electronically must comply with the requirements set out in Part 7 of the Administrative Instructions under the PCT and Annex F thereof, which sets out the standard for the electronic filing and processing of international applications.

The EPO offers the following free-of-charge electronic filing tools:—Online Filing 2.0

– EPO Contingency Upload Service

*OJ EPO 2014, A107*

In addition, applicants may use ePCT, an electronic filing tool offered by WIPO.

*OJ EPO 2020, A59*

The EPO no longer accepts international applications filed with it as receiving Office using the PCT-SAFE filing software. This has been the case since 1 July 2020.

All the means of electronic filing, except for the EPO Contingency Upload Service, allow applicants to fill in the PCT request form (PCT/RO/101) directly in the electronic document formats that are accepted by the EPO as receiving Office.

*PCT/AI 706*

*OJ EPO 2025, A52*

If the documents making up the international application have been prepared by conversion from a different electronic document format (pre-conversion format), the applicant may submit the documents in that format too, preferably together with a statement that the international application in electronic form is a complete and accurate copy of the documents in pre-conversion format. Each pre-conversion document must be in a format that fulfils the requirements stipulated in OJ EPO 2025, A52. It is recommended that pre-conversion documents be submitted as ZIP files. The purpose of filing in pre-conversion format is that if an applicant discovers that the relevant part of the international application as filed in electronic form is not a complete and accurate copy of the document submitted in pre-conversion format, they may ask the EPO in its capacity as receiving Office to correct the international application accordingly within 30 months of the priority date.

### 1.2.2 Filing of applications by delivery by hand or by post

An international application may be filed by delivery by hand or by post with one of the EPO's filing offices in Munich, The Hague or Berlin. Neither the sub-office in Vienna nor the Brussels Bureau is a filing office. The EPO's addresses and opening hours can be found on its website. All EPO filing offices are based in the Central European Time (CET) zone, i.e. UTC +1, and Central European Summer Time (CEST) i.e. UTC +2. CEST starts on the last Sunday in March and ends on the last Sunday in October.

*OJ EPO 2006, 439*  
*OJ EPO 2025, A33*  
*OJ EPO 2025, A35*

The EPO filing offices in Munich's PschorrHöfe building and Berlin (see the decision of the President of the EPO dated 2 April 2025, OJ EPO 2025, A33) are equipped with automated mailboxes, which may be used at any time. There is no automated mailbox facility in Munich's Isar building or The Hague; outside office hours, documents may be handed to the porter.

The documents making up the international application must be filed in one copy only: PCT request form, description, claims, abstract and drawings (Box No. IX of the PCT request form). The same applies to any other documents referred to in Rule 3.3(a)(ii) PCT and listed in Box No. IX of the PCT request form.

*Art. 3(2) PCT*  
*Art. 4 to 7 PCT*  
*Rule 3.3 PCT*  
*Rule 4 to 8 PCT*  
*Rule 11.1 PCT*  
*Rule 157(2) EPC*  
*WIPO PCT Guide*  
*5.010, 5.179*  
*OJ EPO 2006, 439*

The international filing date accorded to an application delivered by hand or by post is the date of handing over or receipt respectively at an EPO filing office, provided that the requirements under Art. 11 are fulfilled (see A-II, 4.1).

If a filing sent by post is lost or delayed, the EPO accepts evidence of posting only if the document was sent via a postal authority or one of the following generally recognised postal service providers: Chronopost, DHL, Federal Express, flexpress, TNT, SkyNet, UPS or Transworld. As evidence, confirmation of registration by the post office or confirmation of receipt by the postal service provider must be provided at the EPO's request. Rule 82 and 82*quater* do not apply to the priority period, but they do apply to the time limit for submission of a request for restoration of the right of priority under Rule 26*bis*.3 (see A-VI, 1.5).

*Art. 48(1)*  
*Rule 26*bis*.3, 82.1, 82*quater**  
*OJ EPO 2015, A29*

### 1.2.3 Filing of applications by other means

International applications may not be filed with the EPO by fax, by email or similar means of communication. Any application filed by such means will be considered not to have been received and the applicant will be informed accordingly using Form PCT/RO/142 or other suitable means.

*OJ EPO 2024, A41, A42*  
*OJ EPO 2000, 458*

They thus have no legal effect in the proceedings under the PCT and cannot be used validly to perform any procedural act. No time limit in connection with a procedural act can be complied with by such means.

**1.3 Filing of documents subsequent to the application**

*Rule 17 PCT*  
*OJ EPO 2016, A78*  
*OJ EPO 2019, A27*

Documents subsequent to the international application may be filed with the EPO as receiving Office electronically or on paper (see A-II, 1.2).

*OJ EPO 2025, A52*  
*OJ EPO 2025, A53*  
*OJ EPO 2024, A41,*  
*OJ EPO 2024, A42*

Priority documents issued in paper form which have to be certified by the issuing authority should also be submitted to the EPO in that form to ensure the validity of the certification. On the other hand, priority documents issued in electronic form may only be filed electronically using Online Filing 2.0, and provided they have been digitally signed by the issuing authority and the signature is accepted by the EPO; they may not be filed using the EPO Contingency Upload Service (see EPC Guidelines A-III, 6.7.1). Electronic priority documents may also be filed with the IB using ePCT.

**1.4 Debit orders for deposit accounts held with the EPO**

An international application may be accompanied by a debit order for the fees due on filing. For the electronic means of filing accepted for debit orders see A-III, 3.

**1.5 Application numbering system**

*PCT/AI 307*

At the EPO, the number range starting at 000001 (PCT/EPyyyy/000001) is used for paper filings. The number range starting at 050000 (PCT/EPyyyy/050000) is assigned to electronic filings made using Online Filing 2.0 or ePCT.

**2. Competence of the EPO to act as receiving Office**

The EPO is competent to act as the receiving Office for an international application provided that:

*Rule 19.1 to 19.2*  
*Rule 157(1) EPC*  
*OJ EPO 2014, A33*

- The applicant is a **national or resident** of an EPC contracting state which is also a PCT contracting state (currently the case for all EPC contracting states). If there are two or more applicants, at least one must be a resident or national of an EPC contracting state. A person mentioned only as an inventor does not qualify as an applicant. Hence, the nationality or residence of a person mentioned only as an inventor is irrelevant for determining whether the EPO is competent to act as receiving Office.

*Rule 12.1(a)*  
*Art. 14 EPC*  
*Rule 157(2) EPC*

- The international application is filed in one of the **EPO's official languages** (English, French or German).

*Rule 19.4(b)*  
*Rule 19.4(c)*  
*OJ EPO 1993, 764*  
*GL/RO 274*

Where the applicant is not a national or resident of an EPC contracting state or the application is in a language other than English, French or German, the EPO is not the competent receiving Office and the EPO will transmit the purported international application to the IB. The applicant will be informed accordingly (Form PCT/RO/151). For the purpose of the international filing date, the application will nevertheless be considered to have been received by the IB as receiving Office on the date that the EPO received it. In such cases, the EPO does not charge the transmittal fee for the transmittal of the documents to the IB. Any fees paid to the EPO will be refunded.

If an international application is filed with the EPO acting as receiving Office, the EPO is the only competent ISA, so the ISA does not need to be entered in Box No. VII of the PCT request form.

*Art. 16*  
*Rule 4.1(b)(iv),*  
*4.14bis*  
*Art. 152 EPC*  
*Agreement EPO-*  
*WIPO, Art. 3(1)*  
*OJ EPO 2017, A115*  
*PCT/AI Annex C*

### 3. Procedure on filing

#### 3.1 Acknowledgement of receipt

For international applications filed using Online Filing 2.0, receipt is acknowledged electronically following successful submission. The acknowledgement contains the identity of the receiving Office, the date and time of receipt, a reference or application number, a list of the files transmitted and, a message digest, i.e. the message in compressed form.

*OJ EPO 2025, A52*  
*OJ EPO 2025, A53*

The EPO as receiving Office will acknowledge receipt of a purported international application filed on paper. To do this, it uses EPO Form 1031, which will be sent by post, as a rule within four working days. In it, the EPO will explicitly confirm the receipt of each document making up the international application and each accompanying item. However, the EPO does not verify the number of sheets making up a given document.

*OJ EPO 2019, A19*  
*OJ EPO 2025, A52*  
*OJ EPO 2025, A53*

The EPO acknowledges receipt of documents filed using the EPO Contingency Upload Service electronically in the service. An acknowledgement indicating in particular the application number, where applicable, is also sent in accordance with the provisions governing the filing of documents on paper.

Upon receipt of paper documents purporting to be an international application, the EPO as receiving Office proceeds according to GL/RO, Chapter IV, paragraph 35.

#### 3.2 Filing via a competent national authority

If the applicant has chosen the EPO as receiving Office, the international application should be sent directly to one of the EPO filing offices and not to a national patent office.

*Art. 10 PCT*  
*Rule 157(1) EPC*

The national law of an EPC contracting state may stipulate that, for national security reasons, an international application must be filed with the EPO as receiving Office via a competent authority of that state.

*Art. 75(2), 151 EPC*  
*Rule 157(1), (3) EPC*  
*Rule 19.1(b)*  
*GL/RO Chapter III*  
*GL/RO 43*

In such cases, the national authority will act as the "filing office" for the EPO acting as receiving Office. The date of receipt of the application by the national authority will be accorded as the international filing date by the EPO as receiving Office, provided that the application meets the PCT requirements for a filing date to be accorded (see A-II, 4.1).

The national authority must ensure that the application reaches the EPO not later than two weeks before the end of the 13th month from filing or, if

priority is claimed, from the earliest date of priority. For further details, see GL/RO Chapter III.

The addresses of the national patent authorities of the EPC contracting states and information on national legislation are provided in the publication "National law relating to the EPC", available on the EPO website ([epo.org](http://epo.org)).

#### **4. Examination on filing**

##### **4.1 Minimum requirements for according an international filing date**

The international filing date of an international application is the date on which it is received at one of the EPO's filing offices, or at a national authority in an EPC contracting state (see A-II, 3.2), provided that the following minimum requirements are fulfilled at the time of receipt:

- The applicant is a resident or national of an EPC contracting state.
- The application (description and claim(s)) is in English, French or German.
- The application contains at least the following elements:
  - an indication that it is intended as an international application (this indication is in the header of the request form, PCT/RO/101)
  - a request which constitutes the designation of a state bound by the PCT on the international filing date (filing the request form, PCT/RO/101, automatically designates all PCT contracting states)
  - the name of the applicant
  - a part which on the face of it appears to be a description
  - a part which on the face of it appears to be a claim or claims.

If these requirements have been fulfilled, the purported international application will be accorded its actual date of receipt as the international filing date; the applicant will be notified accordingly (Form PCT/RO/105).

Each international application has a single filing date. The term "international filing date" should therefore not be interpreted to mean any further filing date in respect of an international application. The word "international" only refers to the fact that the application concerned was filed as an application under the PCT.

The (international) filing date is not to be confused with the date of entry into the European phase before the EPO or into any national phase before a designated/elected Office. This means that even after entry into the European phase any reference to the filing date of the application concerned is a reference to the international filing date.

Art. 11  
GL/RO 39-44

**4.1.1 Transmittal of the international application to the ISA and IB**

One copy of the international application is kept by the receiving Office ("home copy"), one copy ("record copy") is transmitted to the IB, and another copy ("search copy") is transmitted to the competent ISA.

*Art. 12*  
*Rule 21, 93.1*  
*PCT/AI 305*

The record copy is the copy of the international application transmitted to the IB by the receiving Office for publication purposes. It is transmitted promptly after an international filing date has been accorded; the EPO as receiving Office transmits it electronically. This record copy is kept in the IB's records and considered the true copy of the international application. It consists of the application documents and accompanying items filed on the international filing date. It must be transmitted even if the international application is considered withdrawn by the receiving Office or has been withdrawn by the applicant. In this case, the notice effecting withdrawal must also be transmitted.

*Art. 12*  
*Rule 22, 23, 24, 25,*  
*93.2*  
*PCT/AI 705bis*

The search copy is the copy of the international application that is transmitted to the competent ISA by the receiving Office for the purposes of performing the international search once the search fee has been paid. It is kept in the competent ISA's records.

*Art. 12*  
*Rule 93.3*

**4.2 Defects**

If the EPO as receiving Office finds that, at the time of receipt, the international application does not comply with one or more of the requirements under Art. 11 for according an international filing date, it will invite the applicant to file the required correction(s) within two months of the date of the invitation (Form PCT/RO/103). If the applicant complies, the international filing date will be the date of receipt of the correction(s); otherwise, the application will not be treated as an international application (Form PCT/RO/104). For further details on the procedure followed by the EPO as receiving Office in the event of defects under Art. 11(1), see GL/RO 45-48 and 50.

*Art. 11(2)*  
*Rule 20*  
*GL/RO 45-48A*

If the defect is the omission of an element (description or claims), the applicant may decide either to furnish the missing element as a correction under Art. 11(2) and Rule 20.3(a)(i) as described above or to confirm its incorporation by reference. The second option is described in A-II, 5.

*Rule 4.18, 20.5*

If the time limit for the correction of the purported international application expires after the 12-month priority period, the applicant's attention is drawn to this circumstance in Form PCT/RO/103.

**5. Incorporation by reference of missing elements or parts**

If the applicant has omitted to file with the international application a part of the description or of the claims, part or all of the drawings or an entire element, i.e. the entire description or all the claims, the omission may be incorporated in the international application by reference.

*Rule 4.18, 20.3, 20.5,*  
*20.6, 20.7*

Firstly, the omission must be completely contained in an application from which priority was claimed on the international filing date. For an omission to be "completely contained", it must be identical to the corresponding text/drawing in the priority document.

Secondly, the PCT request must have contained a statement of incorporation by reference to the priority application. A statement to that effect is already provided for in Box VI of the PCT request form (PCT/RO/101).

Thirdly, the conditions for confirmation in Rule 20.6 and 20.7 must be met.

If all the conditions are met, the omission is considered to be incorporated by reference and the international filing date is unaffected.

If the description and/or claims as contained in the priority application do not qualify as missing parts on the grounds that the international application already contained a complete description and/or a complete set of claims, the EPO as receiving Office will proceed to a negative finding under GL/RO paragraph 205D and will not transmit the international application to the IB in accordance with Rule 19.4(a)(iii).

An applicant wishing to add to an international application omitted parts which have no basis in a priority application may do so under Rule 20.5. However, the filing date of the application as a whole will then be the date on which the missing parts are filed.

#### **6. Correction of erroneously filed elements or parts**

*Rule 20.5bis*

If the international application contains an erroneously filed element (description or claims) or an erroneously filed part of the description, claims or drawings (including the case where all the drawings have been erroneously filed), the applicant may correct the international application by furnishing the correct element or part under Rule 20.5*bis*.

*OJ EPO 2022, A71*

*OJ EPO 2020, A81*

According to that rule, which entered into force on 1 July 2020, the applicant may request to either

- (a) correct the international application under Rule 20.5*bis*(b) or (c) (see A-II, 6.1); or
- (b) where the correct element or part is contained in a priority application, incorporate it in the international application by reference under Rule 20.5*bis*(d).

Until 31 October 2022, this latter option was not available at the EPO, since this procedure was incompatible with the legal framework under the EPC. The EPO as receiving Office had therefore notified the IB of this incompatibility under Rule 20.8(a-*bis*). However, following the withdrawal of this notification of incompatibility with Rule 20.5*bis*(a)(ii) and (d), the EPO as receiving Office may now also process requests for incorporation by reference of the correct element or part for international applications filed on or after 1 November 2022 (see A-II, 6.2).

For details on the procedure before the EPO as International Searching Authority (see B-III, 2.3.3). For the procedure before the EPO as designated or elected Office (see EPC Guidelines C-III, 1.3).

## 6.1 Correct element or part not furnished for the purpose of incorporation by reference

The procedure to be followed varies depending on whether the correction is requested either on/before the date on which the requirements under Art. 11(1) for the accordance of an international filing date are fulfilled (see A-II, 6.1.1) or after that date (see A-II, 6.1.2).

*Rule 20.5bis(b) and (c)*

### 6.1.1 International filing date has not yet been accorded

If the international filing date has not yet been accorded, the wrong element or part will be replaced with the correct one and the international filing date will be the date on which the requirements under Art. 11(1) are fulfilled, taking into account the correct element or part only. The EPO as receiving Office follows the procedure outlined in AI, section 310.

*Rule 20.5bis(b)  
PCT/AI 310  
GL/RO 203A*

### 6.1.2 International filing date has already been accorded

If the requirements under Art. 11(1) have already been fulfilled and the international filing date has been accorded, the wrong element or part will be replaced with the correct one and the international filing date will be changed to the date on which the correct element or part was received, unless the applicant requests that the correct element or part be disregarded under Rule 20.5bis(e). The EPO as receiving Office follows the procedure outlined in AI, sections 310 and 310bis.

*Rule 20.5bis(c)  
PCT/AI 310 and  
310bis*

## 6.2 Correct element or part furnished for the purpose of incorporation by reference

For international applications filed on or after 1 November 2022, the EPO as receiving Office will process requests for incorporation by reference under Rule 20.5bis(d) of the correct element or part. If the requirements of Rule 20.6(b) and Rule 4.18 are fulfilled, the correct element or part will be considered to have been contained in the purported international application on the date on which one or more elements referred to in Art. 11(1)(iii) were first received by the receiving Office, without a change to the international filing date. This correction will also have no impact on the amount of the international filing fee. The wrong element or part, marked as "ERRONEOUSLY FILED (RULE 20.5bis)", will remain in the international application. The EPO as receiving Office follows the procedure outlined in AI, section 309.

*Rule 20.5bis(a)(ii) and (d)  
OJ EPO 2022, A71  
PCT/AI 309  
GL/RO 241*

For the procedure before the EPO as ISA (see B-III, 2.3.3) and for the procedure before the EPO as SISA (see B-XII, 3). For the procedure before the EPO as IPEA (see H-II, 2.2.2) and the notice from the EPO dated 14 June 2020, OJ EPO 2020, A81. For the procedure before the EPO as designated Office/elected Office (see EPC Guidelines C-III, 1.3).

For international applications filed until 31 October 2022, if the applicant requests within the time limit under Rule 20.7 that a correct element or part be incorporated by reference, the EPO as receiving Office will transmit the international application to the IB as receiving Office, provided the applicant authorises it to do so. No fee will be charged under Rule 19.4(b) for such transmittal. Unless the applicant has already submitted authorisation to transmit the international application, the EPO as receiving Office will invite the applicant to do so using Form PCT/RO/152.

*Rule 19.4(a)(iii)  
Rule 20.5bis(a)(ii) and (d)  
Rule 20.8(a-bis)  
PCT/AI 309(g)  
GL/RO 195*

If the applicant does not authorise the transmittal, the request will be treated as a request for correction under Rule 20.5*bis*(b) or (c). The EPO as receiving Office will therefore follow the procedure outlined in A-II, 6.1.

## Chapter III – Fees

### 1. General

Guidance for the payment of fees, expenses and prices is published in each issue of the EPO's Official Journal. Updated information relating to fees and methods of payment, including the EPO bank account for payments in euro, can also be found on the EPO website (*epo.org*) under: *Applying for a patent → Fees → International (PCT) fees*. Applicants are also recommended to consult the latest information available on the WIPO website.

### 2. Amounts of fees

The latest information about amounts can be found on both the EPO website (*epo.org*, under *Applying for a patent → Fees → International (PCT) fees → Fees for international applications*) and the WIPO website (*wipo.int*, under *IP Services → PCT – The International Patent System → PCT Fee Tables*).

In addition, the amounts of the fees to be paid to the EPO can be found in the EPO's Schedule of fees and expenses published in the Official Journal and accessible via the EPO website (*epo.org*, under *Law & practice → Legal texts → Official Journal*).

The amount of fees to be paid for the benefit of the IB is fixed in Swiss francs and is specified in the Schedule of Fees which is annexed to the PCT Regulations (PCT Schedule of Fees) and forms an integral part thereof. If these fees are paid to the EPO, they must be paid in euros. Due to changes in the exchange rate between the euro and the Swiss franc, the equivalent amount is changed from time to time. Current fee rates are published in the PCT Newsletter, in WIPO's Official Notices (PCT Gazette) and in the EPO's Official Journal.

*Rule 96.1  
PCT Schedule of  
Fees*

### 3. Methods of payment

Fee payments to the EPO may be validly made by anyone: applicants, agents and any other person.

*Rule 14.1(c), 15.3,  
16.1(f), 57.2, 96.1  
OJ EPO 2022, A81  
OJ EPO 2015, A53*

All fees which are to be paid to the EPO must be paid in euros:

- by payment or transfer to a bank account held by the EPO; or
- by credit card; or
- by debiting a deposit account held with the EPO on the basis of a debit order filed in an electronically processable format (XML) using one of the accepted electronic means of filing, i.e. the EPO Online Filing software, Online Filing 2.0 or ePCT. Alternatively, a debit order can be submitted in electronic format via Central Fee Payment or via MyEPO. Details of payment by deposit account may be found in the Arrangements for deposit accounts (ADA) and their annexes, which can also be found on the EPO website (*epo.org*).

*OJ EPO 2017, A72  
OJ EPO 2022, A18  
OJ EPO 2022, A81*

*Supplementary  
publication 2,  
OJ EPO 2024  
OJ EPO 2022, A81  
OJ EPO 2023, A58*

*Rule 82quater.2* In the event of a general unavailability of the permitted electronic means of communication, the EPO will make use of the extension of time limits for the payment of fees, as for the performance of any other procedural acts, and will inform the IB accordingly. The EPO Contingency Upload Service may be used exceptionally to file debit orders on condition that the payment period expires on the day of the debit order's submission, the deposit account contains sufficient funds for the debit to be carried out, and evidence is provided (e.g. in the form of screenshots) that the payee is affected by such unavailability, outage or system malfunction, irrespective of its cause. If any of these conditions is not met, the debit order filed via the EPO Contingency Upload Service is invalid and thus will not be carried out.

*OJ EPO 2007, 626* Payment of fees by cheque delivered or sent directly to the EPO was abolished with effect from 1 April 2008.

*Art. 7(1) RFees* The date to be considered as the date on which a payment is made is established in accordance with the EPO's Rules relating to Fees.

#### **4. Fees to be paid to the EPO as receiving Office**

##### **4.1 Transmittal fee**

*Rule 14*  
*Art. 2(1) RFees*  
*Rule 157(4) EPC*  
*OJ EPO 2018, A4*  
*OJ EPO 2019, A3*  
*OJ EPO 2019, A6*

The transmittal fee is paid for the benefit of the EPO as receiving Office (RO/EP) and its amount is fixed by the EPO. It is to be paid within one month from the date of receipt of the international application. The amount payable is the amount applicable on that date of receipt. As of a date to be set by the President of the EPO, if the international application is filed online in character-coded format, no transmittal fee will have to be paid. That date will be published in advance in the EPO's Official Journal.

##### **4.2 International filing fee**

*Rule 15*  
*OJ EPO 2018, A101*

The international filing fee is collected by the RO/EP for the benefit of the IB and its amount is fixed by the IB. It is to be paid within one month from the date of receipt of the international application. The amount payable is the amount applicable on that date of receipt.

The amount of the international filing fee depends on the total number of sheets making up the international application (i.e. request, description, claims, any drawings, and abstract) at the time of filing, which appears under "Total number of sheets" in Box No. IX (check list) of the request. The fee consists of:

- a fixed amount (the "basic" filing fee part); and
- an additional amount (the "page fee" part) for each sheet above 30 (including the abstract, even if missing at the time of filing the international application).

*GL/RO 241*

Applicants must compute the additional amount themselves and not wait for a communication from the EPO, because as from expiry of the one-month time limit any missing amount may only be validly paid together with a late

payment fee (see A-III, 4.5). For any reductions that may apply (see A-III, 8.1).

The RO/EP will not confirm to the applicants that all fees have been duly paid, nor inform them in advance that an overpayment will be refunded (e.g. using Form PCT/RO/102).

However, if the RO/EP notes before the expiry of the time limit for payment of the relevant fee that the amount paid is not sufficient, it will either proceed to debit any missing amount from the applicant's deposit account where the applicant has authorised it to do so, or it may informally (e.g. by phone) invite the applicant to pay the shortfall before expiry of the time limit. If full payment of the amounts due has not been received upon expiry of the time limit, the RO/EP will proceed as described under A-III, 4.5.

In the event of overpayment, the RO/EP will inform the applicant by means of Form PCT/RO/132 that the refund due has been processed. No communication giving advance notice of the refund is sent.

If the application contains a sequence listing as part of the description, the pages forming that part are not taken into account for calculating the page fee if the following requirements are met:

- (i) the application is filed in electronic form,
- (ii) the sequence listing forming part of the application is filed in XML format in compliance with WIPO Standard ST.26 (see *Annex C* to the Administrative Instructions under the PCT, paragraph 4).

If any other option for filing a sequence listing is chosen – filing on paper, in image format or in another electronic format which is not XML – the additional amount of the international filing fee is calculated taking into account each page of the sequence listing. If necessary, this additional amount is calculated after conversion by the RO/EP of the file into the format of the main part of the description. The RO/EP then invites the applicant to confirm whether the content of that converted file is intended to form part of the description and to pay any corresponding page fee (Form PCT/RO/132) within a time limit of one month from the date of the invitation. The content of the converted file is not considered part of the international application if the applicant so indicates or fails, within that time limit, to pay the applicable fees.

*OJ EPO 2022, A60*

### 4.3 International search fee

The international search fee is collected by the RO/EP for the benefit of the EPO as International Searching Authority (ISA/EP) and its amount is fixed by the EPO. It is to be paid within one month from the date of receipt of the international application. The amount payable is the amount applicable on that date of receipt. For any reductions that may apply (see A-III, 8.2).

*Rule 16*  
*Art. 2(1) RFees*  
*OJ EPO 2018, A4*

If the international search fee is not fully paid within the prescribed time limit, the RO/EP proceeds as described under A-III, 4.5.

#### 4.4 Fee for a certified copy of the priority document

##### 4.4.1 Fee for establishment and transmittal of a certified copy of the priority document to the IB

*Rule 17.1(b) and  
(b-bis)  
Art. 3(1) Rfees  
OJ EPO 2019, A27  
OJ EPO 2024, A5  
PCT/AI 715 and 716  
PCT AG I 5.070  
PCT Newsletter  
4/2019*

The fee for establishment and transmittal to the IB of a certified copy of the priority document is paid for the benefit of the RO/EP and applies only if the RO/EP is requested by the applicant to prepare and transmit such a copy (e.g. by checking the corresponding box in Box VI of the PCT request form, PCT/RO/101) and if the earlier priority application was filed before the EPO (EP applications or earlier PCT applications filed at the EPO). Its amount is fixed by the EPO. It is not due if the applicant requests the IB to obtain a certified copy of the priority application from a digital library and indicates the Digital Access Service (DAS) access code on the PCT request form (PCT/RO/101, Box VI).

*OJ EPO 2020, A57*

The procedure whereby the EPO includes, free of charge, a copy of the earlier application from which priority is claimed in the file of a European patent application (cf. EPC Guidelines A-III, 6.7) does not apply in respect of an international application processed by the RO/EP.

##### 4.4.2 Fee for a certified copy of the priority document for the applicant

*Rule 21.2  
OJ EPO 2024, A5  
OJ EPO 2025, A7*

The fee for a certified copy of the international application for the applicant is payable to the RO/EP and is fixed by the EPO (see A-VI, 1.8). No fee is payable if the request has been filed using MyEPO, irrespective of whether the certified copy is issued electronically or on paper.

#### 4.5 Late payment fee

*Rule 16bis.2  
OJ EPO 1992, 383*

If the transmittal fee, the international filing fee and the search fee are not paid within the prescribed time limits, or if the amounts paid are not sufficient to cover the fees due, the RO/EP invites the applicant to pay the missing amount together with a late payment fee for its own benefit (Form PCT/RO/133). Such payment has to be made within one month from the date of the invitation.

The late payment fee is equal to 50% of the amount of the unpaid fee or, if the resulting amount is less than the transmittal fee, to an amount equal to the transmittal fee. The late payment fee may however not exceed the amount of 50% of the international filing fee as specified in the PCT Schedule of Fees (without taking into account any fee due for each page of the international application in excess of 30 pages).

If the applicant complies with the invitation (Form PCT/RO/133) within the indicated time limit, payment is deemed to have been made in due time.

If the applicant pays the fees after the time limit for payment expires but before the invitation is issued by the RO/EP (Form PCT/RO133), the payment is considered to have been received in time.

*Art. 14(3)(a)*

Failure to pay the missing amount with the late payment fee within the one-month time limit set in the invitation (Form PCT/RO/133) will result in the

international application being considered withdrawn. The RO/EP will so declare (Form PCT/RO/117).

Nevertheless, if the applicant pays the fees after the time limit set in the invitation expires (Form PCT/RO/133) but before the RO/EP has despatched the notification of withdrawal of the international application (Form PCT/RO/117), the payment is considered to have been received in time and the application will not be considered withdrawn.

*Rule 16bis.1(e)*

#### **4.6 Fee for requesting restoration of priority right**

The fee for requesting restoration of priority right is paid for the benefit of the RO/EP and its amount is fixed by the EPO. It is to be paid within the same time limit as for filing the request for restoration, which is two months from expiry of the priority period. The amount payable is the amount applicable on the date of receipt of the request for restoration.

*Rule 26bis.3(d), (e)*

### **5. Fees to be paid to the ISA/EP**

#### **5.1 Additional search fee**

The additional search fee paid in response to an invitation to pay additional fees after a finding of lack of unity (Form PCT/ISA/206, see B-VII, 6.2) is collected directly by the EPO as International Searching Authority (ISA/EP) and its amount is fixed by the EPO. This fee is to be paid within one month from the date of the invitation. The amount payable is the amount applicable on the date of receipt of the international application. For any reductions that may apply (see A-III, 8.2.1).

*Rule 40*

The applicant must also pay the ISA/EP an additional search fee (equal to the search fee) where the receiving Office notifies it of a correct element or part under Rule 20.5bis PCT after the start of the search and the applicant wants the search to be based on that correct element or part. This additional fee must be paid within one month from the date of the invitation to do so. No additional search fee is to be paid to the ISA/EP under Rule 40bis.1 PCT in the case of missing parts (Rule 20.5 PCT).

*Rule 40bis.1*

*Art. 2(1) item 2 RFees  
OJ EPO 2020, A81*

#### **5.2 Protest fee**

The protest fee is paid for the benefit of the ISA/EP and its amount is fixed by the EPO. It is to be paid within one month from the date of the invitation to pay additional fees after the finding of lack of unity (Form PCT/ISA/206, see B-VII, 6.3). The amount payable is the amount applicable on the date of payment.

*Rule 40.2(e)*

#### **5.3 Fee for the late furnishing of sequence listings**

The late furnishing fee is paid for the benefit of the ISA/EP and its amount is fixed by the EPO. It is payable within one month from the date of the invitation to furnish the nucleotide and/or amino acid sequence listing (Form PCT/ISA/225, see B-VIII, 3.2). The amount payable is the amount applicable on the date of payment.

*Rule 13ter.1(c)*

*OJ EPO 2024, A5*

*OJ EPO 2025, A64*

*OJ EPO 2021, A97*

*OJ EPO 2025, A66*

**6. Fees to be paid if a SIS request is submitted***Rule 45bis*

To obtain a supplementary international search, the supplementary search handling fee and the supplementary search fee have to be paid to the IB in Swiss francs.

**6.1 Supplementary search handling fee***Rule 45bis.2*

The supplementary search handling fee is collected by the IB for its own benefit and its amount is fixed by the IB. The supplementary search handling fee is to be paid within one month from the date of receipt of the supplementary search request (Form PCT/IB/375). The amount payable is the amount applicable on the date of payment. For any reductions that may apply (see A-III, 8.3).

**6.2 Supplementary search fee***Rule 45bis.3**Art. 2(1) RFees**OJ EPO 2018, A4*

The supplementary search fee is collected by the IB for the benefit of the EPO as Supplementary International Searching Authority (SISA/EP) and its amount is fixed by the EPO. It is to be paid within one month from the date of receipt of the supplementary search request (Form PCT/IB/375). The amount payable is the amount applicable on the date of payment.

**6.3 Review fee***Rule 45bis.6(c)*

The review fee is collected by the SISA/EP for its own benefit and its amount is fixed by the EPO. It is to be paid within one month from the date of the notification of lack of unity of invention (see B-XII, 10.4).

**7. Fees to be paid to the IPEA/EP****7.1 Handling fee***Art. 31(5)**Rule 57**GL/ISPE 22.44**OJ EPO 2018, A101*

The handling fee is collected by the EPO as International Preliminary Examining Authority (IPEA/EP) for the benefit of the IB and its amount is fixed by the IB. It is to be paid within one month from the date on which the demand (Form PCT/IPEA/401) was submitted or within 22 months from the priority date, whichever time limit expires later. The amount payable is the amount applicable on the date of payment. For any reductions that may apply (see A-III, 8.3).

If the handling fee is not fully paid within the prescribed time limit, the IPEA/EP proceeds as described under A-III, 7.5.

**7.2 Preliminary examination fee***Art. 31(5)**Rule 58**Art. 2(1) RFees**OJ EPO 2018, A4**GL/ISPE 22.44*

The preliminary examination fee is collected by the IPEA/EP for its own benefit and its amount is fixed by the EPO. It is to be paid within one month from the date on which the demand (Form PCT/IPEA/401) was submitted or within 22 months from the priority date, whichever time limit expires later. The amount payable is the amount applicable on the date of payment. For any reductions that may apply (see A-III, 8.4).

If the preliminary examination fee is not fully paid within the prescribed time limit, the IPEA/EP proceeds as described under A-III, 7.5.

**7.2.1 Additional preliminary examination fee***Rule 68.3*

The additional preliminary examination fee paid in response to an invitation to pay additional examination fees after a finding of lack of unity (Form PCT/IPEA/405, see C-V, 4.2) is collected by the IPEA/EP and its amount is fixed by the EPO. It is to be paid within one month from the date of the invitation. The amount payable is the amount applicable on the date of payment. For any reductions that may apply (see A-III, 8.4.1).

### 7.3 Protest fee

The protest fee is paid for the benefit of the IPEA/EP and its amount is fixed by the EPO. It is payable within one month from the date of the invitation to pay additional examination fees after a finding of lack of unity (Form PCT/IPEA/405, see C-V, 4.3). The amount payable is the amount applicable on the date of payment.

*Rule 68.3(e)*

### 7.4 Fee for the late furnishing of sequence listings

The late furnishing fee is paid for the benefit of the IPEA/EP and its amount is fixed by the EPO. It is payable within one month from the date of the invitation to furnish the nucleotide and/or amino acid sequence listing (Form PCT/IPEA/441, see C-VIII, 2.1). The amount payable is the amount applicable on the date of payment.

*Rule 13ter.2*

*OJ EPO 2024, A5*

*OJ EPO 2025, A64*

*OJ EPO 2021, A97*

*OJ EPO 2025, A66*

### 7.5 Late payment fee

Where the IPEA/EP finds that the amount paid to it is insufficient to cover the handling fee and the international preliminary examination fee or that no fees were paid within the time limit for payment, the IPEA/EP invites the applicant to pay to it the amount required to cover those fees together with a late payment fee, within one month from the date of the invitation (Form PCT/IPEA/440).

*Rule 58bis.1(a),*

*58bis.2*

*OJ EPO 1998, 282*

The late payment fee is 50% of the amount of the unpaid fees as specified in the invitation or, if the resulting amount is less than the handling fee, an amount equal to the handling fee. The amount of the late payment fee may not, however, exceed double the amount of the handling fee.

If the applicant complies with the invitation within the specified time limit, payment is deemed to have been made in time (Form PCT/IPEA/440).

If the applicant pays the fees after the time limit for payment expires but before the IPEA/EP has despatched the invitation (Form PCT/IPEA/440) to the applicant, the payment is considered to have been received in time.

*Rule 58bis.1(c)*

Failure to pay the missing amount and the late payment fee within the time limit set in the invitation (Form PCT/IPEA/440) will result in the demand being considered as if it had not been submitted, and the EPO will so declare (Form PCT/IPEA/407). The absence of a validly filed demand has no impact on the procedure before the EPO as designated Office because the time limit for entry into the European phase is always 31 months from the priority date.

*Rule 58bis.1(b)*

If the applicant pays the fees after the time limit set in the invitation expires (Form PCT/IPEA/440) but before the IPEA/EP has despatched the notification that the demand is considered not to have been submitted

*Rule 58bis.1(d)*

(Form PCT/IPEA/407), the payment is considered to have been received in time and the demand will not be considered as if it had not been submitted.

## 8. Reduction of fees

### 8.1 Reduction of the international filing fee

If one or more of the reductions mentioned below apply, the reduced amount should be indicated on the Fee Calculation Sheet which forms part of the PCT request form (PCT/RO/101).

#### 8.1.1 Reduction for applications filed in electronic form

The amount of reduction of the international filing fee is set by the IB and is applicable on the date of receipt of the international application.

For international applications submitted in electronic form, three different levels of reduction apply, depending on the format in which the application is filed, namely:

##### 8.1.1.1 Reduction for filing in PDF

This reduction applies if both the request form (PCT/RO/101) and the specification (description, claims and abstract) are filed in PDF.

##### 8.1.1.2 Reduction for filing the request in XML

This reduction applies if the request form (PCT/RO/101) is filed in character-coded format (XML), while the specification (description, claims and abstract) is filed in PDF.

##### 8.1.1.3 Reduction for filing request and specification in XML

This reduction applies if both the request form (PCT/RO/101) and the specification (description, claims and abstract) are filed in character-coded format (XML).

### 8.1.2 Reductions for applicants from certain states

The international filing fee is reduced by 90% if the requirements stipulated in point 5 of the PCT Schedule of Fees are met.

For filings at the RO/EP, the reduction applies only if the applicant is a natural person who is a national of and resides in an EPC contracting state complying with the criteria under point 5(a) PCT Schedule of Fees (an updated list can be found on the WIPO website).

If the application is filed with the RO/EP by more than one applicant, only one of them needs to be a national and resident of one of the EPC contracting states in question, but each applicant must fulfil the criteria mentioned under point 5 of the PCT Schedule of Fees.

The 90% reduction is calculated after deduction of the electronic filing reduction, if applicable (see A-III, 8.1.1).

*Point 4 PCT Schedule  
of Fees  
OJ EPO 2018, A101*

*AG 5.188*

*Point 5 PCT Schedule  
of Fees*

## **8.2 Reduction of the international search fee, additional search fee and the supplementary search fee**

### **8.2.1 Reduction of the international search fee**

*OJ EPO 2020, A4*

.

*OJ EPO 2025, A54*

*OJ EPO 2024, A8*

*Rule 18*

*PCT AG I 5.190*

The fee for the international search on an international application is reduced by 75% where the applicant or, if there are two or more applicants, each applicant is

- a natural person who is a national and resident of a state not party to the EPC which on the date of filing of the application is classified as a low-income or lower-middle-income economy by the World Bank;
- or
- a natural or legal person who is a national and resident of a state in which a validation agreement with the EPO is in force.

The list of these states can be found on the EPO website under "Reduction in international search and preliminary examination fees".

For information on the reduction of the previously paid international search fee for micro-entities under Rule 7a(3) EPC after entry into the European phase (see EPC Guidelines A-X 9.2 and EPC Guidelines A-X, 9.4).

#### **8.2.1.1 Reduction of the additional search fee**

The additional search fee is reduced by 75% under the same conditions as apply for the reduction of the international search fee (see A-III, 8.2.1).

### **8.2.2 Reduction of the supplementary search fee**

The supplementary search fee to be paid for the supplementary international search is reduced by 75% under the same conditions as apply for the reduction of the international search fee (see A-III, 8.2.1).

## **8.3 Reduction of the (supplementary search) handling fee**

The handling fee is reduced by 90% under the same conditions as for the international filing fee (see A-III, 8.1.2). This principle also applies to the supplementary search handling fee due under Rule 45*bis*.2.

## **8.4 Reduction of the preliminary examination fee**

The fee for international preliminary examination is reduced by 75% under the same conditions as for the reduction of the international search fee (see A-III, 8.2.1).

*OJ EPO 2020, A4*

*OJ EPO 2025, A54*

### **8.4.1 Reduction of the additional preliminary examination fee**

If the applicant fulfils the requirements for reduction of the preliminary examination fee, any additional preliminary examination fee is validly paid upon payment of the reduced amount.

## 9. Refund of fees

*OJ EPO 2022, A18*  
*OJ EPO 2024, A23*

Refunds are made to a deposit account held with the EPO or to a bank account. Since 1 April 2019 the EPO has no longer made refunds by cheque, and the EPO does not make refunds to credit cards. In general, the EPO will refund fees to any deposit account that the party to the proceedings before it indicates in its refund instructions. Parties are therefore also able to indicate a deposit account held by a third party. In the event of a discrepancy between the name of the deposit account holder and the account number indicated, the account number will prevail. Up-to-date refund instructions must be filed in an electronically processable format (XML).

If the EPO cannot make a refund to a deposit account held with it and the party to the proceedings is a user of MyEPO, the refund can be claimed directly in Central Fee Payment without a refund code. If the party is not a user of MyEPO, a refund code will be necessary to claim the refund in Central Fee Payment (a second communication containing the refund code will be issued by the EPO in this case). When claiming a refund, the party can select whether the refund is to be made to a bank account or to a deposit account held with the EPO. For accounts within the Single Euro Payments Area (SEPA), the only details required will be the IBAN and the name of the account holder. For non-SEPA bank transfers, parties may need to provide more information depending on the country to which the refund is to be transferred. The EPO will pay the transfer fees.

If parties would like all their refunds to be made to a deposit account held with the EPO, they will have to submit separate refund instructions to that effect for all applications concerned. Refund instructions filed for an international application before the EPO as RO or as an International Authority under the PCT will apply only to refunds due in the international phase. Detailed guidance on how and when to file refund instructions is provided in OJ EPO 2024, A23.

*Art. 13(2), (3) RFees*  
*OJ EPO 2023, A27*

Fees paid by mistake or without cause (e.g. because the EPO is not the competent RO or IPEA) will be refunded. Any amount paid in excess of the amount due is likewise refunded.

Rights for the refunding of fees paid in excess extinguish after four years from the end of the calendar year in which the right originally arose, unless a written reasoned claim is filed.

In addition, the following refunds may apply:

### 9.1 Refund of the international filing fee

*Rule 15.4*

The international filing fee is refunded where

- no international filing date can be accorded; or
- the application is withdrawn or considered withdrawn before its transmittal to the IB.

## 9.2 Refund of the (additional) international search fee

The international search fee is refunded where

*Rule 16.2 and 16.3  
Rule 41*

- no international filing date can be accorded; or
- the international application is withdrawn or considered withdrawn before its transmittal to the ISA; or
- the international application is withdrawn or considered withdrawn before the start of the international search; or
- the EPO benefits from the results of an earlier search it has already carried out on an application whose priority is claimed for the international application. The search fee paid will be refunded in part or in full, depending upon the extent to which the EPO benefits from that earlier search (see A-III, 9.2.1). This applies *mutatis mutandis* to any additional search fee paid.

*OJ EPO 2025, A26  
OJ EPO 2009, 99  
PCT AG I 5.073  
Agreement EPO-  
WIPO, Annex D-II,  
OJ EPO 2017, A115  
OJ EPO 2024, A29*

The EPO acting as ISA decides whether the requirements for the refund are met. No refund is made for an earlier search that the EPO did not carry out itself.

### 9.2.1 Examples of refunds where the ISR is based on earlier search

The situations described below are intended to illustrate the most common cases.

#### 9.2.1.1 Full refund

The "full refund" level applies where the EPO can make full use of the earlier search report for drawing up the international search report.

*OJ EPO 2009, 99, 2.1*

*OJ EPO 2025, A26*

This occurs, in particular, where the claims of the earlier and the later application are identical or where the claims of the later application are limited with respect to those of the earlier application, this limitation being due to

- (a) the deletion of alternative features from an independent claim or
- (b) the introduction of one or more limiting features into one or more of the independent claims of the later application where the limiting feature(s) was/were all contained in a dependent claim referring back to said independent claim(s) in the earlier application.

The international search fee is refunded as follows:

- 100% for searches with a written opinion;
- 70% for searches without a written opinion.

#### 9.2.1.2 Partial refund

The "partial refund" level applies where the EPO can make partial use of the earlier search report for drawing up the international search report.

*OJ EPO 2009, 99, 2.2*

*OJ EPO 2025, A26*

This occurs, in particular, where

- (a) the claims of the later application are broader than those of the earlier application and this broadening represents a further generalisation of the same invention as that searched in the earlier application, or
- (b) the claims of the later application are limited with respect to those of the earlier application, due to a limiting feature not disclosed in the earlier application but relating to the same invention as that searched in the earlier application.

The international search fee is refunded as follows:

- 25% in the case of an earlier search with written opinion;
- 17.5% in the case of an earlier search without a written opinion.

### **9.2.1.3 No refund**

*OJ EPO 2009, 99, 2.3*

No refund is due

*OJ EPO 2025, A26*

- (a) where the subject-matter claimed in the later application represents an invention different from that searched in the earlier application, or
- (b) the legal requirements for a refund are not fulfilled, for example where the priority of the earlier application is not claimed.

### **9.3 Refund of additional search fees and, where applicable, the protest fee**

*Rule 40.2(c) and (e)*

If the Review Panel finds that a protest was entirely justified, the additional search fees and the protest fee will be refunded.

If it finds that the protest was justified only in part, the corresponding additional search fees will be refunded, but not the protest fee (see B-VII, 7.2).

### **9.4 Refund of the supplementary search fee**

*Rule 45bis.3(e)*

*Agreement EPO-*

*WIPO, Annex D-II,*

*OJ EPO 2017, A115*

*OJ EPO 2024, A29*

The EPO as SISA will refund the supplementary search fee where,

- before it has started the supplementary search, the supplementary search request is considered not to have been submitted; or
- before it has started the supplementary search, the international application or the supplementary search request is withdrawn.

### **9.5 Refund of the review fee**

*Rule 45bis.6(d)(iii)*

If the Review Panel finds that the lack of unity objection was not justified, the review fee is refunded to the applicant (see B-XII, 10.4).

### **9.6 Refund of the handling fee**

*Rule 57.4*

Where the demand for international preliminary examination is withdrawn before it has been sent by the IPEA/EP to the IB, or where the demand is

considered not to have been submitted, 100% of the handling fee is refunded.

#### **9.7 Refund of the preliminary examination fee**

Where the international application or the demand for international preliminary examination is withdrawn before examination has commenced and within 30 months from the priority date, or where the demand is considered not to have been submitted, 100% of the fee for international preliminary examination is refunded.

*Rule 58.3 and  
90bis.4(a)  
Agreement  
EPO-WIPO,  
Annex D-II,  
OJ EPO 2017, A115  
OJ EPO 2024, A29*

#### **9.8 Refund of additional examination fees and, where applicable, the protest fee**

If the Review Panel finds that a protest was entirely justified, the additional examination fees and the protest fee will be refunded.

*Rule 68.3(c) and (e)*

If it finds that the protest was justified only in part, the corresponding additional examination fees will be refunded, but not the protest fee (see C-V, 5.2).

## Chapter IV – Special provisions

### 1. PCT Direct service (see also B-IV, 1.2)

#### 1.1 General remarks

When filing an international application claiming priority from an earlier national, European or international application already searched by the EPO (i.e. a "doublure"; see B-IV, 1.1), the applicant may submit to any receiving Office informal comments aimed at reacting to the objections raised in the search opinion established by the EPO for the priority application. At the EPO, this service is called "PCT Direct".

*OJ EPO 2017, A21*

Such informal comments are to be understood as arguments regarding the patentability of the claims of the international application and also possibly as explanations regarding any modifications to the application documents, in particular to the claims, in comparison with the priority application. If the requirements under A-IV, 1.2, are met, the informal comments will be taken into account by the EPO as ISA when it establishes the international search report and written opinion for the international application.

For the processing of applications under the PCT Direct service by the EPO as ISA (see B-IV, 1.2).

#### 1.2 Form of submissions

Applicants may request to have their international application processed under the PCT Direct service by filing a letter ("PCT Direct letter") containing informal comments aimed at overcoming objections raised in the search opinion established by the EPO for the priority application. The earlier application from which priority is claimed must have been searched by the EPO (international, European or national first filing, but not an international-type search).

The PCT Direct letter is to be presented as a separate document attached to the international application; it should be entitled "PCT Direct/informal comments" and clearly identify in the header the application number of the earlier application. The PCT Direct letter does not form part of the international application.

If the claims and/or the description of the international application differ from the earlier application, preferably a marked-up copy indicating the differences should be submitted. A copy of the earlier search opinion could also be annexed to the PCT Direct letter. It should be borne in mind that the letter, together with the annexed documents, will be made available to the public in accordance with the provisions on file inspection.

The PCT Direct letter, any marked-up copy of the claims and/or description, as well as the earlier search opinion, if annexed, are to be submitted as a single document in PDF (not as a ZIP file) and indicated in Box IX of the PCT request form (Form PCT/RO/101). In particular, the words "PCT Direct/informal comments" should be specified under point 11, "other", for filings on paper. For filings in electronic form using Online Filing 2.0 or WIPO's ePCT portal, the PCT Direct letter and any marked-up copy of the

claims and/or description are to be uploaded under the section "International Search" – "Use of earlier search and classification results" – "Availability of document(s) to the ISA" – "Other document(s) attached" – "Add other Document" by selecting Document Type "Applicant letter to ISA concerning earlier search ("PCT Direct")". The correct document is automatically reflected in the generated XML and PDF, which show in section IX-10 the PCT Direct letter as an attachment under "Other".

Informal comments filed under PCT Direct must be self-contained. Third parties must be able to fully understand these comments as they stand. If explicit references are made to the search opinion for the first filing, that search opinion should be annexed to the international application. The reason for this requirement is that the search report, the search opinion or any other submissions that are part of the file of the earlier application may not be publicly available.

### **1.3 Processing by the EPO as RO**

The PCT Direct letter and its annexes are transmitted to the EPO as ISA and to the IB, together with, respectively, the search copy and the record copy.

The PCT Direct letter and its annexes are made available to the public via file inspection in the European Patent Register and on WIPO's PATENTSCOPE.

For details on the procedure in the event of missing indications or missing informal comments, see GL/RO 116F and 116G.

For information on the procedure if informal comments are submitted after the filing of the international application, see GL/RO 116H.

### **1.4 Processing by the EPO as ISA**

For the procedure followed by the EPO as ISA when assessing a PCT Direct request (see B-IV, 1.2.2).

## **2. Withdrawals**

### **2.1 General remarks**

Applicants may withdraw their international application, one or more designations, priority claims, their request for supplementary international search, their demand or any or all elections by filing a notice of withdrawal within the prescribed time limits. Any such withdrawal is free of charge.

A notice of withdrawal must be signed by the applicant or, if there are two or more applicants, by all of them. It may instead be signed, on behalf of the applicant(s), by the duly appointed agent or common representative, but not by the "deemed" common representative under Rule 90.2(b). If the agent or the common representative has not yet been duly appointed, a power of attorney signed by all the applicants has to be submitted together with the notice of withdrawal; the requirement to submit a power of attorney to the EPO is not waived in such cases. If such a power of attorney is not

*Rule 90bis.1 to  
90bis.4  
PCT AG I 11.048,  
11.050, 11.056 and  
11.060*

*Rule 90bis.5  
OJ EPO 2004, 305*

filed together with the notice of withdrawal, the EPO will request the applicant(s) to submit one and the withdrawal will take effect on the date of its receipt. If no power of attorney is received before the expiration of the time limit for filing a withdrawal, the request for withdrawal will not be processed.

Moreover, the EPO will only process unqualified and unambiguous notices of withdrawal. If in doubt, the EPO will seek clarification of the applicant's or applicants' intention before any action is undertaken. *J 11/80*

## **2.2 Withdrawal of the international application**

Applicants may address a notice of withdrawal of their international application to the IB, the RO or, where a demand has been filed, to the IPEA, and may do so at any time prior to the expiration of 30 months from the priority date. *Rule 90bis.1*

The EPO as RO or IPEA will mark the notice of withdrawal of the international application with the date on which it was received and promptly transmit it to the IB. *PCT/AI sections 326 and 609*

For information on the refund of the international filing fee in the event of withdrawal of the international application, see A-III, 9.1; for information on the refund of the international search fee, see A-III, 9.2.

### **2.2.1 Conditional withdrawal**

Applicants may request the withdrawal of their international application on condition that the international publication can be prevented ("conditional withdrawal"). In such a case, the withdrawal does not become effective if the condition cannot be met, that is, if the IB has already completed the technical preparations for the international publication. It is recommended that conditional withdrawals be submitted direct to the IB, especially if the date of completion of the technical preparations is imminent. *GL/RO 318*

## **2.3 Withdrawal of designations**

An applicant may address a notice of withdrawal of any designations to the IB, the RO or, where a demand has been filed, the IPEA, and may do so at any time prior to the expiration of 30 months from the priority date. Withdrawal of the designation of all designated states is treated as withdrawal of the international application (see A-IV, 2.2). Withdrawal of a designated state which has been elected entails withdrawal of the corresponding election (see A-IV, 2.6). If the withdrawal of a designation reaches the IB prior to completion of the technical preparations for publication, the designation in question is not published. *Rule 90bis.2*

## **2.4 Withdrawal of priority claims**

An applicant may address a notice of withdrawal of one or more priority claims to the IB, the RO or, where a demand has been filed, to the IPEA, and may do so at any time prior to the expiration of 30 months from the priority date. *Rule 90bis.3*

Where the priority date of the international application has changed following withdrawal of a priority claim, any time limit which is computed *Rule 90bis.3*  
*GL/RO 321*

from the original priority date, and which has not already expired, is recomputed from the priority date resulting from that change. Time limits computed from the original priority date which have already expired are not reinstated (Rule 90bis.3(d)). Nevertheless, the IB may proceed with the international publication based on the original priority date if the notice of withdrawal of a priority claim reaches the IB after completion of the technical preparations for publication (Rule 90bis.3(e)).

*PCT/AI section 326*

The EPO acting as RO or as IPEA will mark the notice of withdrawal with the date on which it was received and promptly transmit it to the IB.

## **2.5 Withdrawal of the supplementary search request**

*Rule 90bis.3bis*

*PCT/AI section 520*

Applicants may withdraw their request for supplementary international search by addressing a notice of withdrawal to either the IB or the authority specified for the supplementary search, and may do so at any time before transmittal by the SISA of the supplementary international search report or of the declaration that no such report will be established. The EPO as SISA will mark the notice of withdrawal with the date on which it was received and promptly transmit it to the IB. For information on the refund of the supplementary international search fee by the EPO as SISA (see A-III, 9.4).

## **2.6 Withdrawal of the demand or of elections**

*Rule 90bis.4*

Applicants may withdraw their demand or any or all elections by addressing a notice of withdrawal to the IB, and may do so at any time prior to the expiration of 30 months from the priority date. The withdrawal takes effect on the date of receipt of the notice by the IB, the IPEA being notified of that date. If the applicant nevertheless submits the notice of withdrawal to the IPEA, the IPEA will mark the date of receipt on the notice and transmit it promptly to the IB. The notice is considered to have been submitted to the IB on the date marked by the IPEA.

*Rule 90bis.6(c)*

Where the demand or all elections are withdrawn, the IPEA is notified of the withdrawal by the IB and the processing of the international application by the IPEA is discontinued.

*GL/ISPE 22.20*

The demand or the copy thereof must be transmitted to the IB even where it has been withdrawn by the applicant. For information on the refund of the handling fee, see A-III, 9.6; for information on the refund of the preliminary examination fee in the event of withdrawal of the demand, see A-III, 9.7.

### 3. Applications disclosing nucleotide and/or amino acid sequences

If the international application discloses one or more nucleotide and/or amino acid sequences, it must contain a sequence listing drawn up in compliance with WIPO Standard ST.26 (the XML-based standard applicable for international applications filed on or after 1 July 2022). For international applications filed before 1 July 2022, the applicable standard before the EPO is WIPO Standard ST.25. Under WIPO Standard ST.26, a standard-compliant sequence listing must be filed for all sequence information meeting the length thresholds defined in WIPO Standard ST.26, paragraphs 7 and 8. The following paragraphs describe the practice applicable for international applications filed on or after 1 July 2022.

Any sequence listing not contained in the international application as filed will, if not allowable as an amendment under Article 34 PCT, not form part of the international application.

If an international application is filed in electronic form, a sequence listing forming part of such application and filed in XML format in compliance with WIPO Standard ST.26 is not taken into account for calculating the (page fee part of the) international filing fee (see A-III, 4.2). There will be no need to file a second copy for the purposes of international search and, where applicable, international preliminary examination.

If any other option for filing a sequence listing is chosen, the sum of the page fee part of the international filing fee is calculated, taking into account each page of the sequence listing (see A-III, 4.2). Furthermore, if the EPO is selected as ISA, SISA and/or IPEA, a sequence listing in electronic form in text format in compliance with Annex C to the PCT Administrative Instructions will be required (see B-VIII, 3.2 and EPC Guidelines A-XII, 5.6; A-XIII, 11.3).

WIPO has developed a tool called "WIPO Sequence" to assist applicants in preparing sequence listings compliant with WIPO Standard ST.26. Applicants are strongly advised to ensure they have downloaded the latest version of the software and also to sign up on the WIPO website for the WIPO Sequence newsletter in order to receive important announcements and information on software updates and related issues.

Where the EPO as receiving Office finds that a separate electronic file disclosing sequences appears to be in a format other than WIPO Standard ST.26 XML format, it will not consider that file to be part of the international application. Instead, it will convert the file into the format of the main part of the description and invite the applicant to confirm whether the content of that converted file is intended to form part of the description and to pay any corresponding page fee (Form PCT/RO/132) within one month of the date of the invitation. Any payment received by the EPO as receiving Office within this time limit will be considered as confirmation that the content of the converted file is to be part of the international application.

*Rule 5.2, 13ter.1*  
*OJ EPO 2024, A54, A55*  
*OJ EPO 2022, A60*  
*OJ EPO 2025, A64*  
*OJ EPO 2021, A97*  
*OJ EPO 2025, A66*  
*PCT/AI Sect. 101, 207, 208, 707(a) and (a-bis) and Annex C*  
*WIPO PCT Guide 5.099-5.104, 11.088*  
*PCT Newsletter 10/2021, 2, 02/2022, 11, 05/2022, 1*

*PCT/AI Sect. 707 (a-bis)*

*Rule 13ter.1*

*OJ EPO 2025, A64*  
*OJ EPO 2021, A97*  
*OJ EPO 2025, A66*

*OJ EPO 2022, A60*  
*PCT/AI Annex C, para. 26*

*OJ EPO 2022, A60*

The content of the converted file will not be considered part of the international application if so confirmed by the applicant or if the applicant does not pay the applicable fees within one month of the date of the invitation. It will then not be part of the priority document prepared by the EPO as receiving Office pursuant to Rule 17.1(b) PCT.

## Chapter V – Drawings

This chapter summarises the requirements for drawings in international applications.

An international application must contain drawings where they are necessary to understand the invention. Where they are not, but the nature of the invention admits of illustration by drawings, they are optional.

*Art. 3(2), 7  
PCT AG I 5.128*

### 1. Graphic forms of presentation considered to be drawings

#### 1.1 Technical drawings

Perspectives, exploded views, sections and cross-sections and details on a different scale are all considered to be drawings. So too are flow sheets and diagrams, such as functional diagrams and graphic representations of a given phenomenon which express the relationship between two or more parameters.

*Rule 7.1  
PCT AG I 5.129*

Where tables or chemical or mathematical formulae are included in the description, claims or abstract, they are not considered to be drawings and are thus not subject to the requirements for drawings. However, such graphic forms may be submitted as drawings, in which case they are.

*Rule 11.10  
PCT AG I 5.130-5.133*

Where such graphic forms of presentation are not submitted as drawings (see A-V, 11).

#### 1.2 Photographs or coloured drawings

The PCT makes no express provision for photographs or coloured drawings and, furthermore, according to Rule 11.13, drawings must be executed in durable, black, sufficiently dense and dark, uniformly thick and well-defined lines and strokes without colourings. Photographs and coloured drawings may, however, exceptionally be submitted where it is impossible to present in a black-and-white drawing what is to be shown. If colours are necessary to discern details, note that these details may be lost when the image is made available in black and white in the publication. For international applications filed electronically using ePCT or Online Filing 2.0, the original version of any drawing in colour or greyscale is also transmitted to the IB. That version is retained by the IB and made available to the public and national patent offices on PATENTSCOPE. The availability on PATENTSCOPE of the version as filed in colour or greyscale is indicated on the cover page of the international publication.

*PCT AG I 5.159  
GL/RO 146  
OJ EPO 2025, A57*

For further details on the processing of the drawings in colour and greyscale in the European phase, see EPC Guidelines A-IX, 1.2, A-IX 7.1, XIII, 10.1.

### 2. Presentation of drawings

#### 2.1 Grouping of drawings

Drawings must be presented on one or more separate sheets. All the figures constituting the drawings must be grouped together on a sheet or sheets without waste of space, but clearly separated from each other.

*Rule 11.10(a),  
11.13(j)  
PCT AG I 5.131-5.134*

Figures should not be separated by lines. The request, the description, the claims and the abstract must not contain drawings.

## **2.2 Reproducibility of drawings**

*Rule 11.2(a)*  
*PCT AG I 5.132*

Drawings must be so presented as to admit of direct reproduction by photography, electrostatic processes, photo offset and microfilming, in any number of copies.

## **2.3 Figure accompanying the abstract**

*Rule 3.3(a)(iii)*  
*PCT AG I 5.163,*  
*5.170 and 5.171*  
*GL/RO 151*

Where the international application contains drawings, the applicant must indicate, in the check list on the request form (Form PCT/RO/101), the number of the figure in the drawings which they suggest be published with the abstract.

The figure published with the abstract must be the one which best characterises the claimed invention and must be chosen from the drawings accompanying the international application. Generally, only one figure should be indicated. The abstract may exceptionally be illustrated by more than one figure where necessary information cannot be otherwise conveyed. A figure containing significant amounts of text should be avoided.

## **3. Requirements regarding the paper used**

*Rule 11.2(b), 11.2(c),*  
*11.3, 11.5 and 11.12*  
*PCT AG I 5.133*

If the international application is filed on paper, drawings must be on sheets of A4 paper (29.7 cm x 21 cm), which must be flexible, strong, white, smooth, non-shiny and durable. The sheets must be free from creases and cracks; they must not be folded. Only one side of each sheet may be used.

Under Rule 11.12, each sheet must be reasonably free from erasures and must be free from alterations, overwriting and interlineations. Non-compliance with this rule may be authorised if the authenticity of the content is not in question and the requirements for good reproduction are not in jeopardy.

## **4. Presentation of the sheets of drawings**

### **4.1 Usable surface area of sheets**

*Rule 11.6(c)*  
*PCT AG I 5.133*

On sheets containing drawings, the surface usable must not exceed 26.2 cm x 17.0 cm. The sheets must not contain frames around the usable or used surface. The minimum margins are as follows: top: 2.5 cm; left side: 2.5 cm; right side: 1.5 cm; bottom: 1 cm.

### **4.2 Numbering of sheets of drawings**

*Rule 11.7*  
*PCT/AI 207(b)*  
*PCT AG I 5.012,*  
*5.140 and 5.141*

All the sheets of the international application must be numbered in consecutive Arabic numerals. All sheets of drawings must be numbered in the centre of either the top or the bottom of the sheet but not in the margin, in numbers larger than those used as reference signs.

Sheets of drawings must be numbered as a separate series commencing with the first; the number of each sheet must consist of two Arabic numerals separated by an oblique stroke, the first being the sheet number

and the second being the total number of sheets of drawings (for example: 1/3, 2/3, 3/3).

## 5. General layout of drawings

If various figures are presented on the same sheet of drawings, they must be laid out according to the requirements for page-setting and numbering, and figures divided into several parts must comply with the requirements described in the subsections below.

### 5.1 Page-setting

The figures must be arranged on a sheet or sheets without wasting space, preferably in an upright position and clearly separated from one another. Where a figure cannot be presented satisfactorily in an upright position, it may be placed sideways with the top of the figure at the left side of the sheet. Thus, a figure which is broader than it is high may be set out so that the bottom of the figure lies parallel to and along the right-hand side of the sheet. In this case, if other figures are drawn on the same sheet, they should be set out in the same way, so that all the figures on a single sheet lie in the same position.

*Rule 11.13(j)*  
*PCT AG I 5.135*

### 5.2 Numbering of figures

The figures on the sheets of drawings must be numbered in Arabic numerals, consecutively, independently of the numbering of the sheets and, if possible, in the order in which they appear. The numbers of the figures should be preceded by "Fig.", irrespective of the language of the international application. Where a single figure is sufficient to illustrate the claimed invention, it should not be numbered and "Fig." should not appear. Numbers and letters identifying the figures must be simple and clear and may not be used in association with brackets, circles or inverted commas, except in the case of partial figures intended to form one complete figure, irrespective of whether they appear on one or several sheets. In this case the complete figure may be identified by the same number followed by a capital letter (for example: Fig. 7B).

*Rule 11.13(k) and*  
*49.5(f)*  
*PCT/AI 207(b)*  
*PCT AG I 5.141 and*  
*5.142*

The figures should preferably be set out, as far as possible, on each sheet in ascending numerical order from left to right and from top to bottom. If one of two figures illustrates on a larger scale a detail from the other, each figure should be numbered separately and, if possible, consecutively.

### 5.3 Whole figure

One sheet of drawings may contain several figures. Where figures on two or more sheets form in effect a single complete figure, the figures on the several sheets must be so arranged that the complete figure can be assembled without concealing any part of any of the figures appearing on the various sheets.

*Rule 11.13(i)*  
*PCT AG I 5.139*

Partial figures drawn on separate sheets must always be capable of being linked edge to edge, that is to say, no partial figure may contain parts of another partial figure. A very long figure may be divided into several parts placed one above the other on a single sheet. However, the relationship between the different parts must be clear and unambiguous. It is therefore

recommended that a smaller scale figure be included showing the whole formed by the partial figures and indicating the positions of the parts shown.

## **6. Prohibited matter**

*GL/RO 333*  
*PCT AG I 5.175*

As set out in Rule 9.1(i) and (ii), the international application must not contain drawings contrary to morality or public order. If it does, the applicant may be invited to voluntarily correct it (Rule 9.2).

## **7. Execution of drawings**

### **7.1 Drawings of lines and strokes**

*Rule 11.13(a) and*  
*11.13(f)*  
*PCT AG I 5.143 and*  
*5.144*

The drawings must be executed in durable, black, uniformly thick and well-defined lines and strokes. See A-V, 1.2, in respect of colour drawings, where these are exceptionally submitted. In all cases, the thickness of the lines and strokes must take into account the scale, nature, execution and perfect legibility of the drawing and of the reproductions. All lines in the drawings must, ordinarily, be drawn with the aid of a drafting instrument, except for those which by their nature do not permit the use of such instruments, for example irregular diagrams, ornamental structures and curved reference lines.

### **7.2 Shading**

*PCT AG I 5.158*

The use of shading in figures is allowed provided this assists in understanding them and is not so extensive as to impede legibility. Shading may, for instance, be used to indicate the shape of spherical, cylindrical or conical elements. Flat parts may also be lightly shaded. Such shading is allowed in the case of parts shown in perspective but not for cross-sections. Only spaced lines may be used for shading, not fully blacked out areas. These lines must be thin and as few in number as possible and contrast with the rest of the drawings.

### **7.3 Cross-sections**

#### **7.3.1 Sectional figures**

*PCT AG I 5.148*

Where a figure is a cross-section of another figure, the latter should indicate the position of the section and may indicate the viewing direction by arrows at each end. In addition, in order to allow each sectional figure to be quickly identified, especially where several cross-sections are made of the same figure, each end of the cross-section line should be marked on the diagram with the same single Arabic or Roman numeral which identifies the figure in which the section is illustrated.

#### **7.3.2 Hatching**

*Rule 11.13(b)*  
*PCT AG I 5.149*

A cross-section must be set out and drawn in the same manner as a normal view whose parts in cross-section are hatched with regularly spaced parallel oblique strokes, the space between the strokes being chosen on the basis of the total area to be hatched. Hatching should not impede the clear reading of the reference signs and reference lines. Consequently, if it is not possible to place reference signs outside the hatched area, the hatching may be broken off wherever reference signs are inserted. Certain types of hatching may be given a specific meaning. The hatching should be at a substantial angle to the surrounding axes or principal lines, preferably

45°. The various parts of a cross-section of the same item should be hatched in the same manner. The hatching of juxtaposed different elements should be angled in a different way. In the case of large areas, hatching can be confined to an edging drawn around the inside of the outline of the area to be hatched.

#### **7.4 Scale of drawings**

The scale of the drawings and the distinctness of their graphical execution must be such that a photographic reproduction with a linear reduction in size to two-thirds would enable all details to be distinguished without difficulty. In exceptional cases, where required, the scale of the drawing may be graphically represented.

*Rule 11.13(c)*  
*PCT AG I 5.150*

#### **7.5 Numbers, letters and reference signs**

Numbers, letters, reference signs and any other data given on the sheets of drawings, such as the numbering of figures and of the sheets, acceptable text matter, graduations on scales, etc., must be simple and clear, and not used in association with any brackets, inverted commas, circles or outlines whatsoever. Signs indicating minutes, seconds or degrees are permitted. Numbers, letters and reference signs should be laid out in the same direction as the diagram so as to avoid having to rotate the sheet. They should not be placed in the closed and complex parts of the drawings so as to interfere with a thorough comprehension of the drawings, and therefore should rarely cross or mingle with the lines. As a general rule, numbers, letters and reference signs should be placed as close as possible to the part in question.

*Rule 11.13(e)*  
*PCT AG I 5.152*

##### **7.5.1 Leading lines**

Reference lines (also referred to as leading lines), that is, lines between the reference signs (for example, reference numerals) and the details referred to, may be straight or curved and should be as short as possible. They must originate in the immediate proximity of the reference sign and extend to the feature indicated. Reference lines for certain reference signs may be omitted. Reference signs of this type, which are not connected to anything, will then indicate the surface or cross-section on which they are placed. In such cases the reference sign may be underlined to make it clear that the line has not been left out by mistake. Reference lines must be executed in the same way as other lines in the drawing.

*PCT AG I 5.145*

##### **7.5.2 Arrows**

Arrows may be used at the end of the reference lines provided that their meaning is clear.

*PCT AG I 5.146*

- A free-standing arrow indicates the entire section towards which it points.
- An arrow touching a line indicates the surface shown by the line looking along the direction of the arrow.
- Arrows may also be used in appropriate cases to show the direction of movement.

<i>Rule 11.13(h)</i> <i>PCT AG I 5.153</i>	<p><b>7.5.3 Height of the numbers and letters in the drawings</b></p> <p>The height of the numbers and letters must not be less than 0.32 cm. For the lettering of drawings, the Latin or, where customary, the Greek alphabet must be used.</p>
<i>Rule 11.13(l), (n)</i> <i>PCT AG I 5.154</i>	<p><b>7.5.4 Consistent use of reference signs in the description, claims and drawings</b></p> <p>Reference signs must be used in a manner which is consistent in the description, claims and drawings. In particular, reference signs not mentioned in the description must not appear in the drawings, and vice versa.</p>
<i>Rule 11.13(m)</i> <i>PCT AG I 5.155</i>	<p>A feature denoted by a reference sign must be denoted by the same sign throughout the international application.</p> <p>In the case of international applications dealing with complex subjects and incorporating a large number of drawings, a separate sheet listing all the reference signs should be included at the end of the description as a part of it.</p>
<i>Rule 11.13(m)</i> <i>PCT AG I 5.155</i>	<p><b>7.5.5 Consistent use of reference signs in the drawings</b></p> <p>A feature denoted by a reference sign must be denoted by the same sign throughout the international application.</p>
<i>Rule 11.13(g)</i>	<p><b>7.6 Variations in proportions</b></p> <p>Each element of each figure must be in proper proportion to each of the other elements in the figure, except where the use of a different proportion is indispensable for the clarity of the figure.</p>
<i>Rule 11.11</i> <i>Rule 11.9</i> <i>PCT AG I 5.156</i>	<p><b>8. Text matter in drawings</b></p> <p>The drawings must not contain text matter, except a single word or words when absolutely indispensable, such as "water", "steam", "open", "closed", "section on AB" and, in the case of electric circuits and block schematic or flow sheet diagrams, a few short catchwords indispensable for understanding. Any words used must be so placed that, if translated, they may be pasted over without interfering with any lines of the drawings.</p> <p>Any text matter which is indispensable must comply with the requirements for the writing of text matter.</p> <p>For indications of the type "section on AB", see A-V, 7.3.1.</p>
<i>Art. 3(4)(i)</i> <i>GL/RO 55, 57, 62 and 63</i>	<p>Where any text matter of the drawings is filed in a language which is different from the language of the description and the claims, the receiving Office will invite the applicant to furnish a translation of the text matter of the drawings into the language in which the international application is to be published (Rule 26.3ter). The receiving Office decides whether the correction was submitted within the two-month time limit under Rule 26.2 and, if so, whether the international application so corrected is or is not to be considered withdrawn. However, no international application may be considered withdrawn for lack of compliance with the physical requirements</p>

referred to in Rule 11 if it complies with them to the extent necessary for the purpose of reasonably uniform international publication (Rule 26.5).

## 9. Conventional symbols

Known devices may be illustrated by symbols which have a universally recognised conventional meaning and are generally accepted in the art provided no further detail is essential for understanding the subject-matter of the claimed invention. Other signs and symbols may be used provided that they are not likely to be confused with existing conventional symbols, that they are readily identifiable (i.e. simple) and that they are clearly explained in the text of the description. Different types of hatching may also have different conventional meanings as regards the nature of a material seen in cross-section.

*Rule 10.1(d) and (e)*  
*PCT AG I 5.157*

## 10. Amendments to drawings

The drawings can be amended during the international phase only if the applicant files a demand for international preliminary examination (see H-I, 3).

*Art. 34(2)(b)*  
*PCT AG I 5.162*

For the rectification of obvious mistakes, see B-III, 2.3.2, and H-I, 2. For the addition of an entire sheet of drawings omitted on the filing date, see A-II, 5.

*Rule 91*  
*PCT AG I 5.161*

If the drawings submitted on the filing date do not comply with the requirements in Rule 11 to the extent necessary for the purpose of reasonably uniform international publication, the EPO as receiving Office will invite the applicant to submit a correction within two months of the invitation (Form PCT/RO/106). If the EPO as receiving Office finds that the defects have not been corrected or have not been corrected on time, it will declare the international application withdrawn (Form PCT/RO/117). An international application may not be considered withdrawn for lack of compliance with the physical requirements in Rule 11 if it complies with them to the extent necessary for the purpose of reasonably uniform international publication.

*Rule 26*  
*GL/RO 153-159*

## 11. Graphic forms of presentation not considered to be drawings

Where tables or chemical or mathematical formulae are included in the description, claims or abstract, they are not considered to be drawings and are thus not subject to the requirements for drawings.

*PCT AG I 5.130*

### 11.1 Chemical and mathematical formulae

The description, the claims and the abstract may contain chemical or mathematical formulae. Such formulae may be written by hand or drawn if necessary but it is recommended that appropriate drafting aids or materials, such as stencils or transfers, be used. For practical reasons formulae may be grouped together on one or more sheets in the description and paginated with it. In such cases, it is recommended that each formula be designated by a reference sign and that the description contain references to the formulae whenever necessary.

*Rule 11.9(b), 11.10(b)*  
*PCT AG I 5.107*

Chemical or mathematical formulae must employ symbols in general use and must be drawn in such a way that they are completely unambiguous. Numerals, letters and signs which are not typed must be legible and

*Rule 11.9(d)*  
*PCT AG I 5.108*

identical in form in the various formulae, irrespective of the element of the international application in which they appear. Chemical or mathematical formulae appearing in the text of the international application must have symbols, the capital letters of which are at least 0.28 cm high. Where they appear on sheets of drawings, these symbols must be at least 0.32 cm high. All mathematical symbols used in a formula which appear in the description or on sheets of drawings should be explained in the description, unless their significance is clear from the context. In any case, the mathematical symbols used may be collated in a list.

## **11.2 Tables**

### **11.2.1 Tables in the description**

*Rule 11.10(c),  
11.10(d)  
PCT AG I 5.109*

The description may contain tables. For the sake of convenience, tables may be grouped together on one or more sheets of the description and paginated with it. If two or more tables are necessary, each should be identified by a Roman numeral (independently of the pagination of the description or drawings or of the figure numbering), by a capital letter, by a title indicating its content or by some other means. Each line and column in a table should begin with an entry explaining what it represents and, if necessary, the units used. As far as possible, all tables should be set out upright on the sheets. Where the tables cannot be presented satisfactorily in an upright position, they may be placed sideways, with the top of the tables on the left-hand side of the sheet.

### **11.2.2 Tables in the claims**

*Rule 11.10(c)  
PCT AG I 5.125*

The claims may include tables if this is desirable in view of the subject-matter involved. In such cases, the tables must be included in the text of the relevant claim; they may not be annexed to the claims nor may reference be made to tables contained in the description.

## Chapter VI – Examination of formal requirements

### 1. Claim to priority

This section is intended to summarise all formal requirements relating to priority claims in international applications. In the present edition, it focuses on formal requirements under Rule 4.10, defects in priority claims and corrections upon invitation as well as restoration of the priority right. It also provides additional information on the applicant's entitlement to claim priority under Article 87 EPC in the European phase before the EPO. Further relevant aspects will gradually be added in successive editions. For further information see F-VI.

#### 1.1 Formal requirements under Rule 4.10

In an international application, the applicant may claim the priority of one or more earlier applications. The claim needs to be made in the PCT request form (PCT/RO/101) and fulfil the following requirements:

*Art. 2(i)*  
*Art. 8(1)*  
*Rule 4.10*  
*PCT AG I 5.057 ff.*  
*GL/RO 166 ff.*  
*GL/ISPE 6.03*

- (a) The earlier application must have been filed in or for a country which is party to the Paris Convention for the Protection of Industrial Property ("Paris Convention") or in or for any member of the World Trade Organization that is not party to the Paris Convention.
- (b) The priority claim must indicate:
  - (i) the date on which the earlier application was filed;
  - (ii) the number of the earlier application;
  - (iii) where the earlier application is a national application, the country in which it was filed;
  - (iv) where the earlier application is a regional application, the authority with which the earlier application was filed and that is entrusted with the granting of regional patents under the applicable regional patent treaty;
  - (v) where the earlier application is an international application, the receiving Office with which it was filed.
- (c) Where the earlier application is a regional application or an international application, the applicant may, if desired, also indicate one or more countries party to the Paris Convention for which that earlier application was filed, even if this is not required by Rule 4.10(b)(ii). An indication of at least one country party to the Paris Convention or one member of the World Trade Organization for which the earlier application was filed is mandatory where the earlier application is a regional application filed with ARIPO.

*Art. 2(i)*  
*Art. 8(1)*  
*Rule 4.10*  
*GL/ISPE 6.03*

The words "in or for" any country or member mean that the earlier application the priority of which is claimed may be an earlier national, regional or international application. The earlier application may be for a patent or for the registration of a utility model or for an inventor's certificate.

### 1.2 Priority period

*Art. 8(2)(a)*  
*Rule 2.4*  
*Rule 26bis.1(a)*  
*Rule 26bis.2*  
*Rule 26bis.2(c)(iii)*  
*Art. 4C Paris*  
*Convention*

The date on which the earlier application was filed must fall within the priority period of 12 months preceding the international filing date. However, if the international filing date lies after, but within two months of, that period's expiry, a priority claim will not be considered void for the purposes of the international phase of the PCT procedure, irrespective of whether restoration of the right of priority is requested (see A-VI, 1.5).

*Rule 80.5*  
*Rule 82*  
*Rule 82quater*  
*GL/RO 171*

The priority period starts on the day following the date of filing of the earlier application. The RO/EP will thus not accept a priority claim relating to an application having the same date of filing as the international application and will inform the applicant that the claim will be disregarded unless the priority date can be corrected (PCT/RO/110; see A-VI, 1.4.1).

If the last day of the priority period falls on a day on which the EPO is not open for the receipt of documents or on which no mail is delivered due to an official holiday or other circumstance described in Rule 80.5, it expires on the next subsequent day on which none of these circumstances exists. However, the priority period may not be extended under Rule 82 or Rule 82quater in the event of irregularities in the mail service.

### 1.3 Inconsistency in the priority claim

*Rule 26bis.2(c)(iii)*  
*GL/RO 171*

Any indication in the priority claim must be consistent with the corresponding indication appearing in the priority document. However, if an indication in the priority claim is inconsistent with the corresponding indication in the priority document, the claim is not considered void for the purposes of the international phase of the PCT procedure. Instead, in such cases the RO draws applicants' attention to the inconsistency and invites them to correct the priority claim accordingly (PCT/RO/110; see A-VI, 1.4.1).

### 1.4 Defects in the priority claim

*Rule 4.10*  
*Rule 26bis.1(a)*  
*Rule 26bis.2*  
*GL/RO 167 ff.*  
*PCT AG I 6.038-6.042*

Where the RO finds that

- a priority claim does not comply with the requirements of Rule 4.10 (see A-VI, 1.1), or that
- the filing date indicated for the earlier application does not fall within the period of 12 months preceding the international filing date (see A-VI, 1.2, and A-VI, 1.4.2), or that
- any indication in a priority claim is inconsistent with the corresponding indication appearing in the priority document (see A-VI, 1.3, and A-VI, 1.4.2),

the RO, using Form PCT/RO/110,

- (i) invites the applicant to correct the priority claim (PCT/RO/110, Annex A), and/or
- (ii) if the filing date of the international application lies within two months of expiry of the priority period, draws the applicant's attention to the possibility of requesting restoration of the right of priority (PCT/RO/110, Annex B).

#### **1.4.1 Correction of the priority claim upon invitation**

The RO will invite the applicant to correct defects in a priority claim (indicated in Annex A of Form PCT/RO/110) within a time limit of 16 months from the priority date or, where the correction would cause a change in the priority date, 16 months from the priority date as so changed, whichever expires first, provided that a notice of correction may, in any event, be submitted until the expiry of four months from the international filing date.

*Rule 26bis.1(a)*

*Rule 26bis.2(a)*

*PCT/AI 314(a)*

*GL/RO 169*

*GL/RO 170*

Upon receipt of a response to the invitation to correct defects in a priority claim, the RO checks whether the indications furnished by the applicant have been received within the applicable time limit and whether they comply with the formal requirements of Rule 4.10 (see A-VI, 1.1). If so, the RO follows the procedure laid down in GL/RO 170.

The RO notifies the applicant accordingly, using Form PCT/RO/111, and sends to the IB and the ISA, respectively, a copy of that notification as well as a copy of the corresponding sheet of the PCT request containing the corrections.

If the notice correcting the priority claim is received before the RO declares the priority claim void (see A-VI, 1.4.2) and not later than one month after the expiry of the time limit, the response is considered to have been received before the expiry of the applicable time limit.

*Rule 26bis.2(b), last sentence*

#### **1.4.2 Failure to correct**

If, in response to the invitation to correct a priority claim, the applicant does not submit a notice correcting the priority claim before expiry of the applicable time limit (see A-VI, 1.4.1), that priority claim is, for the purposes of the PCT procedure, considered void and the RO so declares using Form PCT/RO/111. In addition to marking the PCT request in accordance with GL/RO 172, the RO also sends to the IB and the ISA, respectively, a copy of that declaration and a copy of the corresponding sheet of the request containing the marking.

*Rule 26bis.1(a)*

*Rule 26bis.2(b)*

*PCT/AI 302*

*GL/RO 169*

*GL/RO 171*

*GL/RO 172*

*PCT AG I 6.043*

**1.5 Restoration of the right of priority**

*Rule 26bis.3*  
*GL/RO 166C*  
*GL/RO 166D*  
*GL/RO 166E*  
*GL/RO 166G*  
*PCT AG I 5.064-5.069*  
*Art. 2(1) item 13*  
*RFees*

Where the international application has an international filing date which is later than, but within two months of, the date on which the priority period expired, the applicant may request restoration of the right of priority with the RO. This request may be made directly on the request form (Box No. VI) or separately (either upon receipt of the information from the RO using Form PCT/RO/110, Annex B (see A-VI, 1.4(ii)) or on the applicant's own initiative).

A request for restoration of the right of priority is admissible if:

- (a) the international filing date of the application is within the two-month period following the expiry of the priority period; where a priority claim in respect of the earlier application is not contained in the international application, the priority claim must be added (Rule 26bis.1(a)) within the same time limit;
- (b) the request is submitted within the two-month period following the expiry of the priority period and is supplemented by a statement of reasons;
- (c) the fee for requesting restoration of the right of priority (see also A-III, 4.6) is paid within two months of the date on which the priority period expired; this time limit may not be extended before the EPO as RO.

Where the applicant makes a request for early publication under Art. 21(2)(b), the request for restoration and the statement of reasons or evidence (Rule 26bis.3(b)(iii)), or any notice under Rule 26bis.1(a) adding the priority claim, must be filed, and the pertinent fee be paid (Rule 26bis.3(d); A-III, 4.6), before the technical preparations for international publication have been completed (Rule 26bis.3(e)).

*Rule 26bis.3(a)(i)*  
*OJ EPO 2007, 692*  
*GL/RO 166F,*  
*166J -166M*

The EPO as RO grants a request for restoration of the right of priority only if the due care required by the circumstances has been taken ("due care" requirement). To satisfy this requirement, the applicant must show to the RO's satisfaction that the failure to file the international application within the priority period occurred in spite of due care required by the circumstances having been taken. The standard of having exercised "due care" can only be met if the applicant has taken all measures which a reasonably prudent applicant would have taken. The statement of reasons accompanying the request should describe in detail the facts and circumstances that have led to the late filing as well as any remedial or alternative steps taken to attempt on-time filing of the international application. Due care is considered to have been taken if non-compliance with the time limit results either from exceptional circumstances or from an isolated mistake within a normally satisfactory monitoring system.

The practice of the EPO as RO defines exceptional circumstances as ones that are unrelated to ordinary working procedures and arise either unexpectedly, as for example a sudden serious illness, or owing to some kind of upheaval, such as an internal reorganisation entailing a move.

Whether exceptional circumstances occurred depends on the facts of the case, and the standard to be met for this is very strict. In particular, events of force majeure may be regarded as exceptional circumstances. An event of force majeure means an external, unforeseeable and/or unavoidable circumstance beyond the control of the applicant or agent. Disasters, such as hurricanes, volcanic eruptions, earthquakes, international conflicts and war, may be considered such events. Due care is generally regarded as having been taken if it is demonstrated that the consequences of the event could not have been predicted and/or avoided.

The assessment of whether the failure to file the international application within the priority period resulted from an isolated mistake within a normally satisfactory monitoring system depends, among other things, on the size of the company of the applicant or agent. The same standard of care as is required of the patent department of a large firm cannot be expected of an individual or a small applicant. In addition, a different standard of due care is required depending on whether the mistake can be ascribed to an applicant, an agent in charge or an assistant.

The EPO as RO considers the facts and circumstances of each particular case, applying the principles summarised in GL/RO 166J-166M. The case law established by the EPO boards of appeal (developed with respect to the re-establishment of rights under Art. 122 EPC) is also taken into consideration when assessing whether due care has been exercised in the respective case (see also EPC Guidelines, E-VIII, 3.2).

If the RO intends to refuse the request for restoration of the right of priority, as it finds that the statement of reasons is insufficient to determine whether the applicant has satisfied the due care criteria or that the due care criteria appear not to have been met, it invites the applicant to submit further evidence and/or observations on the intended refusal within a two-month time limit (Form PCT/RO/158). The RO explains in detail, in the Annex to Form PCT/RO/158, why it intends to refuse the request. After expiry of the two-month time limit, and taking into account the information available to it at this stage, the RO issues a decision to either restore the right of priority or refuse the request for restoration of the right of priority (Form PCT/RO/159).

*Rule 26bis.3(f), (g)*  
*GL/RO 166R,*  
*GL/RO 166S*

The RO transmits a copy of all related documents received from the applicant to the IB (including a copy of the restoration request, the statement of reasons and any declaration or other evidence), except if it decides, either upon a reasoned request by the applicant or on its own motion, that (parts of) certain documents are not to be transmitted. In the latter case, the RO notifies the IB accordingly. If the RO receives a reasoned request from the applicant not to transmit (a part of) a document to the IB, but nevertheless decides to transmit that (part of a) document to the IB, it also notifies the applicant of this decision (relevant box in Form PCT/RO/159).

*Rule 26bis.3(h-bis)*  
*PCT/AI 315*  
*GL/RO 166N*  
*GL/RO 166S*  
*GL/RO 166T*

The RO takes the decision not to transmit documents to the IB if it finds that a document or part thereof meets the requirements of Rule 26*bis*.3(h-*bis*), namely that:

- (i) a document or part thereof does not obviously serve the purpose of informing the public about the international application;
- (ii) publication or public access to any such document or part thereof would clearly prejudice the personal or economic interests of any person; and
- (iii) there is no prevailing public interest to have access to that document or part thereof.

A document or part thereof does not "obviously serve the purpose of informing the public about the international application" if it is clearly irrelevant for the disclosure or assessment of the international application as such. Making a document or a part thereof available to the public would "clearly prejudice the personal or economic interests of a person" if it would be harmful to that person's specific and concrete personal or economic interests. A merely abstract prejudice to hypothetical personal or economic interests is generally not sufficient.

*Rule 49ter.1*  
*PCT AG I 5.069*

A decision by the EPO as RO to restore the right of priority will be effective before the EPO as designated Office and, as a general rule, in all designated Offices, unless the respective designated Office has submitted a notification of incompatibility under Rule 49*ter*.1(g).

*Rule 26bis.2(c)(iii)*  
*WIPO PCT Guide*  
*5.062*

A decision by the RO on a request for restoration of the right of priority is not required for the international search if the application was filed within two months of the date on which the priority period expired because in that case the priority claim may not be considered void during the international phase. Where the priority claim in question is the only or the earliest one in the international application, it continues to serve as the basis for the calculation of all time limits during the international phase, including the time limits for entry into the national phases, i.e. also into the European phase.

*Rule 49ter.1*  
*Rule 49ter.2*

If no request for restoration of the right of priority has been filed by the applicant in the procedure before the EPO as RO or if the request for restoration has been rejected by the EPO as RO, the applicant may file a (new) request in the national phase, i.e. in the procedures before the EPO as designated Office and any other designated Office that has not made a reservation as to the applicability of Rule 49*ter*.1 and Rule 49*ter*.2. For the procedure before the EPO as designated Office (see EPC Guidelines E-VIII, 3).

## 1.6 Applicant's entitlement to claim priority

The applicant claiming the priority of an earlier application must be the applicant of the latter or the successor in title of the priority right. The question of whether the applicant is actually entitled to claim the priority of an earlier application is not examined during the international phase.

*Art. 8(2)(a)*  
*Art. 4A(1) Paris*  
*Convention*  
*PCT AG National*  
*Phase – National*  
*Chapter – EP.29*

For details on the procedure before the EPO as designated or elected Office (see EPC Guidelines A-III, 6.1).

## 1.7 Provision of the priority document

Where the applicant claims the priority of an earlier application, a certified copy of that earlier application ("the priority document") must be filed with the receiving Office or the International Bureau (IB) within 16 months of the priority date. However, if the earlier application was filed with the receiving Office, the applicant may request that the receiving Office transmit a certified copy of the earlier application to the IB. A checkbox is provided for that purpose in Box No. VI of the PCT request form.

*Rule 17.1(a) and (b)*  
*WIPO PCT Guide*  
*5.070*  
*PCT Newsletter*  
*03/2022, 8*

If the EPO as receiving Office is requested to prepare and transmit a certified copy of an earlier application to the IB, a fee is due (see A-III, 4.4). However, no fee is due if the IB is requested to retrieve a priority document via the Digital Access Service (DAS) and it is available there. If no request via DAS is present, the EPO as receiving Office does not include, free of charge, a copy of an earlier application in the file of an international application – even if that earlier application was a European application or an international application filed with the EPO as receiving Office.

*Rule 17.1(b) and (b-bis)*  
*Art. 3(1) RFees*  
*OJ EPO 2019, A27*  
*OJ EPO 2021, A43*  
  
*OJ EPO 2025, A52*

Where the earlier application was filed as a national application with a national office that participates in the DAS, the IB may be requested to obtain a certified copy of the earlier application from DAS. For that purpose, a checkbox and a text field for the required access code are provided in Box No. VI of the PCT request form. Similarly, where the earlier application was a European patent application filed on or after 1 November 2018, the IB can be asked to obtain a certified copy via DAS (that was the date on which the EPO started to participate in DAS for Euro-direct filings). Since 1 April 2019, it has also been possible to request retrieval of a certified copy via DAS where the international application claims priority from a previous international application filed with the EPO as receiving Office. Since a DAS access code is automatically generated by the EPO as receiving Office for every international application, there is no need for the applicant to check the box provided in the PCT request form for asking the receiving Office to make the international application available via DAS.

During the international phase before the EPO as receiving Office, electronic priority documents can be submitted, together with the PCT/RO/101, to the EPO or subsequently to the IB using ePCT. For further information on how to file the priority document see A-II, 1.3.

### 1.8 Certified copies of international applications

Where the applicant needs a certified copy of an international application which was filed with the EPO as receiving Office, a request may be filed with the EPO together with, where applicable, the payment of the relevant fee (see GL, A-III, 4.4.2). Certified copies requested via MyEPO will be issued by the EPO either electronically to the Mailbox or, if specifically so requested, on paper. If requested by other means, the certified copy will be issued on paper.

## 2. Designation of states

In filing an international application, applicants may seek patent protection or another form of protection (utility model, for example) for any PCT contracting state.

Upon filing of the PCT request, the applicant will obtain automatic and all-inclusive coverage of all designations available under the PCT on the international filing date, in respect of every kind of protection available and in respect of both regional and national patents. The (automatic) designation of "EP" covers all EPC contracting states for which the PCT and the EPC are in force on the filing date of the international application.

A decision on the EPC contracting states in which protection by way of a European patent is actually being sought need not be made until the application enters the European phase. It is important to note that if a state accedes to the EPC after the international filing date, the EPO cannot act as a designated Office for the EPC contracting state concerned and no European patent can be obtained for that state. In this respect, the date of entry into the European phase is irrelevant.

### 2.1 Non-designation for reasons of national law

For reasons of national law, checkboxes in Box No. V of the PCT request form provide for exceptions to the otherwise automatic designation of Germany (DE), Japan (JP) and the Republic of Korea (KR). Selecting the checkbox for these designations is not considered to be withdrawal of a designation, but rather to be non-designation of the state(s) concerned.

According to national law in each of these states, the filing of an international application which contains the designation of that state and claims the priority of an earlier national application filed in that state will have the result that the earlier national application ceases to have effect, with the same consequences as the withdrawal of the earlier national application. To avoid this effect, the appropriate box must be selected (Box No. V of the PCT request form). More information on "self-designation" can be obtained from the national patent offices concerned.

As regards the EPC contracting states, the problem of self-designation exclusively concerns Germany (DE), and only if protection via the grant of a national patent in Germany is sought, i.e. if the application actually enters the German national phase. The designation of Germany for the purposes of a European patent is not considered a self-designation and is thus not affected. Consequently, there is no reason for withdrawing the automatic designation of EP. If a non-designation of Germany is not indicated upon

*Rule 21.2*

*OJ EPO 2024, A5*

*OJ EPO 2025, A3*

*OJ EPO 2025, A7*

*OJ EPO 2025, A8*

*Art. 4(1)(ii)*

*Art. 11(1)(iii)(b)*

*Rule 4.9(a) and*

*(b) PCT*

*Art. 153(1) EPC*

*WIPO PCT Guide*

*5.052-5.053*

*Rule 4.9(b) PCT*

*WIPO PCT Guide*

*5.053*

*PCT Applicant's*

*Guide, Annex B*

*Art. 45(2) PCT*

filing, the international application can still enter the German national phase; however, if this is effected, the earlier German national application will be deemed withdrawn.

## **2.2 Closure of the national route**

The national law of a number of EPC contracting states stipulates that only a European patent may be obtained for these states on the basis of an international application. The countries which close off the route to a national patent in this way are Belgium (BE), Cyprus (CY), France (FR), Greece (GR), Ireland (IE), Latvia (LV), Lithuania (LT), Monaco (MC), Montenegro (ME), Malta (MT), Netherlands (NL), San Marino (SM) and Slovenia (SI).

## **3. Extension and validation states**

### **3.1 Extension states**

Between 1993 and 2009, the European Patent Organisation concluded what are known as "extension agreements" with a number of European states which had not yet acceded to the EPC at the time and were thus not "included" in the designation "EP", as well as with one which has not acceded to the EPC so far (Bosnia and Herzegovina). Under such an extension agreement and the relevant national law, it is possible for applicants to extend European patent applications and patents to the extension state concerned, where the extended patents will confer essentially the same protection as patents granted by the EPO for the member states of the European Patent Organisation. Valid extension requires firstly that the applicant submit a request for extension and pay the extension fee(s) in due time, i.e. within the period for performing the acts required for entry of an international application into the European phase or within six months of the date of publication of the international search report, whichever period expires later. A further requirement is that, on the international filing date, the extension agreement has to be in force and the extension state must both be a PCT contracting state and be designated for a national patent in the international application.

All extension states (whether former or current) were already PCT contracting states on the date of entry into force of their respective extension agreement. Moreover, since 1 January 2004, all PCT contracting states have been automatically designated for a national and, where applicable, a regional patent.

Extension may be requested for the following European state:

- Bosnia and Herzegovina (BA) (since 1 December 2004).

*OJ EPO 2004, 619*

*OJ EPO 2002, 463*  
*OJ EPO 2003, 1*  
*OJ EPO 2004, 481*  
*OJ EPO 2005, 299*  
*OJ EPO 2007, 406, 637*  
*OJ EPO 2008, 507*  
*OJ EPO 2010, 96, 394*  
*OJ EPO 2022, A78*

The extension agreements with Albania (AL), Croatia (HR), Latvia (LV), Lithuania (LT), Montenegro (ME), North Macedonia (MK), Romania (RO), Serbia (RS) and Slovenia (SI) terminated when these states acceded to the EPC. The extension system nevertheless continues to apply for all applications filed prior to the date on which each state's particular extension agreement terminated.

*OJ EPO 2009, 603*

In view of the time limit for paying extension fees, it is not necessary to decide whether to seek extension – or pay the extension fee due accordingly – prior to the application's entry into the European phase.

### **3.2 Validation states**

In addition to the extension agreements, the European Patent Organisation has concluded validation agreements with a number of states which are not a party to the EPC and thus not included in the designation "EP" (validation states). These validation agreements, unlike extension agreements, are not limited to European states. Pursuant to such agreements and the relevant national law, it is possible for applicants to validate European patent applications and patents in validation states, where the validated patents will confer essentially the same protection as patents granted by the EPO for the member states of the European Patent Organisation.

*OJ EPO 2015, A19*

In order to validate a European patent application or patent in a validation state, an applicant has to submit a request for validation and pay the validation fee in due time, i.e. either within the period for performing the acts required for entry of an international application into the European phase or within six months of the date of publication of the international search report, whichever period expires later. A further requirement is that, on the international filing date, the validation agreement has to be in force and the validation state must both be a PCT contracting state and be designated for a national patent in the international application. In view of the time limit for paying validation fees, there is no need to take a decision on the states for which validation is sought – or pay the validation fees due accordingly – prior to the application's entry into the European phase.

Validation may be requested for the following states

Morocco (MA)	since 1 March 2015	OJ EPO 2015, A18, A20 OJ EPO 2016, A5
Republic of Moldova (MD)	since 1 November 2015	OJ EPO 2015, A84, A85 OJ EPO 2016, A67
Tunisia (TN)	since 1 December 2017	OJ EPO 2017, A84, A85
Cambodia (KH)	since 1 March 2018	OJ EPO 2018, A15, A16
Georgia (GE)	since 15 January 2024	OJ EPO 2023, A105
The Lao People's Democratic Republic (LA)	since 1 April 2025	OJ EPO 2025, A22, A23, A24

#### 4. Designation of inventor

The inventor should always be identified unless there are special reasons for not doing so. The name and address of the inventor must be furnished in the PCT request form (Box No. III) if the applicant wants to enter the national phase of a state requiring that the data of the inventor be given in the request upon filing. The consequences of non-compliance are a matter of national law and do not affect the international phase. For up-to-date information on the national law of each of the PCT contracting states, see the WIPO PCT Guide, Annex B.

*Art. 4(1)(v)*  
*Rule 4.1(a)(iv)*  
*WIPO PCT Guide*  
*5.035-5.038*  
*PCT Newsletter*  
*8-9/2013, 8*  
*PCT Newsletter*  
*10/2020, 14*

In so far as the applicant aims to obtain a European patent, the data concerning the inventor – if not already submitted during the international phase – must be provided upon entry into the European phase (see EPC Guidelines A-XIII, 11).

*Art. 22(1)*  
*Rule 159, 163(1) EPC*

## Chapter VII – Languages

### 1. Admissible languages on filing

#### 1.1 General

The international application, i.e. the request, description, claim(s), drawing(s) and abstract, must be filed with the EPO as receiving Office in English, French or German.

*Art. 3(4)(i)*

*Rule 12.1*

*Rule 157(2) EPC*

An international application filed in another language will be transmitted to the IB to act as receiving Office instead of the EPO. This means that it is not possible to file an international application with the EPO as receiving Office in a language other than the three indicated in Art. 14 EPC for European patent applications not filed via the PCT route (Euro-direct applications).

*Rule 19.4(a)(ii)*

### 1.2 International application filed in multiple languages

#### 1.2.1 Abstract and text matter of the drawings

If the abstract and/or any text matter of the drawings is not filed in the same language as the description and claims, the applicant will be invited to correct the defect by the EPO as receiving Office (Form PCT/RO/106) within two months of the date of the invitation. If the applicant replies to the invitation within the prescribed time limit by submitting the translation in the language indicated in the invitation, the international filing date will remain unaffected.

*Rule 26.3ter(a),*

*GL/RO 62-64*

#### 1.2.2 Request

The request (including any declaration contained in the request under Rule 4.17) may be filed with the EPO as receiving Office in any official language of the EPO (e.g. the request filed in German and the rest of the application in English).

*Rule 12.1(c)*

*GL/RO 59*

If the request is not filed in an official language of the EPO, the applicant will be invited to correct the defect (Form PCT/RO/106) within two months of the date of the invitation.

*Rule 26.3ter(c)*

*GL/RO 60*

If the applicant replies to the invitation within the prescribed time limit by submitting the translation in one of the official languages of the EPO, the international filing date will remain unaffected.

### 1.2.3 Description and claims

#### 1.2.3.1 Sentences or short fragments of the description and/or claims in a language other than the language of the proceedings

If the description and/or claims contain sentences or short fragments in a language other than the language of the proceedings, the applicant will be invited by the EPO as receiving Office (PCT/RO/108) to submit a request for rectification under Rule 91 to the EPO as International Searching Authority together with the translation of the relevant parts in the language of the application.

*Rule 91*

If the requirements under Rule 91 are fulfilled, the rectification will be authorised and will be considered effective from the international filing date. Otherwise, the respective sentences or fragments of the description and/or claims may not be further considered for the purpose of international search and/or preliminary examination.

This scenario only applies where a few words or sentences are in a language other than the language of the proceedings.

### **1.2.3.2 Technical or non-technical terms used in the description and/or the claims in a language other than the language of the proceedings**

*Art. 6  
Art. 84 EPC  
T 61/03*

If the description and/or claims contain(s) technical or non-technical terms in a language other than the language of the proceedings, the EPO will assess whether the use of these terms is common or standard in the relevant technical field. In such a case, no translation will be required.

*Rule 91*

Otherwise, the applicant will be invited by the EPO as receiving Office to submit a request for rectification under Rule 91 (see A-VII, 1.2.3.1).

### **1.2.4 Sequence listing**

*Rule 12.1(d)  
PCT/AI Section 332  
(a-bis)  
PCT Newsletter 07-08/2022, 7*

For applications filed on or after 1 July 2022 which contain a sequence listing, the EPO as receiving Office not only accepts sequence listings with language-dependent free text in English or in the same language as used in the international application (French or German) but also permits language-dependent free text to be filed in both English and any other language within a single sequence listing.

## **2. Language of the proceedings**

*Rule 12.3  
Rule 55.2  
OJ EPO 2010, 572*

If an international application is filed with the receiving Office in one of the EPO official languages, that language will be the language of the proceedings before the EPO and may not be changed either during the international phase or on entry into the European phase (G 4/08).

If the international application is not filed with the receiving Office in one of the EPO official languages, the language of the proceedings before the EPO as International Authority will be the language of the translation furnished for the purposes of the search or, as the case may be, for the international preliminary examination. The following sections provide more detail on the requirement to file a translation.

### **2.1 Language for the purpose of the international search**

*Rule 12.3  
Art. 152 EPC  
Agreement  
EPO-WIPO, Art. 3  
and Annex A*

For the purpose of the international search by the EPO as International Searching Authority, the international application must be in one of its three official languages, i.e. English, French or German. Where the international application is filed in a different language, the applicant must file a translation with the receiving Office into one of the EPO three official languages. This translation must be furnished within one month of the date of receipt of the international application by the receiving Office.

*Rule 48.3  
OJ EPO 2010, 572*

If the application was not filed in a PCT language of publication, the language of the translation submitted for the purpose of the procedure

before the EPO as ISA determines the language in which the international application is published. In any case where the language of the international publication is an official language of the EPO, that language will be the language of the proceedings in the European phase and cannot be changed. Therefore, applicants should choose with care the language in which they submit a translation for the purpose of international search.

For international applications filed in Dutch see B-XI, 2.2.

## **2.2 Language for the purpose of the supplementary international search**

For the purpose of the supplementary international search by the EPO as Supplementary International Searching Authority, the international application must be in one of its three official languages, i.e. English, French or German. Where the international application is filed in a different language, and no translation into any of these languages has been filed for the purpose of the proceedings before the International Searching Authority or for the purpose of international publication, a translation into one of these languages must be filed with the IB together with the request for supplementary international search.

*Rule 45bis.1(b)(iii)  
Agreement  
EPO-WIPO, Art. 3  
and Annex B*

## **2.3 Language for the purpose of the international preliminary examination**

### **2.3.1 Language of the international application**

For the purpose of the international preliminary examination by the EPO as International Preliminary Examining Authority, the international application must be in one of its three official languages, i.e. English, French or German. If neither the language in which the international application was filed nor the language in which the application was published is one of the official languages of the EPO, the applicant must file a translation into one of these languages with the EPO as International Preliminary Examining Authority within the time limit for filing the demand.

*Rule 55.2  
Art. 152 EPC  
Agreement  
EPO-WIPO, Art. 3  
and Annex A*

This situation occurs, for instance, if the international application was filed in Spanish, and the Spanish Patent Office acted as ISA. However, if the international application was filed in Spanish but the EPO acted as ISA, a translation will have already been furnished to the EPO as ISA for the purposes of the international search, and the applicant need not furnish a further translation to the EPO as IPEA.

### **2.3.2 Language of the amendments**

Any amendments filed during international preliminary examination must be submitted in the language of proceedings before the EPO as IPEA. If they are initially not submitted or published in that language, the applicant must file a translation (see A-VII, 3.1).

*Rule 55.3 PCT  
WIPO PCT Guide  
10.055*

For details on the language to be used in the case of rectification, see A-VII, 3.1

**2.3.3 Language of the demand***Rule 48.3, 55.1 PCT*

The demand must be filed in the language in which the international application was filed, except in the following situations:

- If the international application was filed in a language other than the language in which it was published, the demand must be filed in the language of publication.
- If a translation of the application has to be filed with the EPO as IPEA, the demand must be filed in the language of that translation.

**3. Derogations from the language of the proceedings in written proceedings****3.1 Written submissions***Rule 12.2(b)(i)**Rule 92.2(b)**PCT/AI 104(a)**OJ EPO 1993, 540*

Any amendment and correction to the international application must be filed in the language of the proceedings. However, if the EPO did not act as RO and the international application was filed in a language other than the language of the proceedings, any rectification under Rule 91.1(b)(ii) and (iii) must be filed in both the language in which the application was filed and the language in which it was translated for the purpose of the procedure before the EPO (language of the proceedings).

Any other correspondence with the EPO as RO, (S)ISA and IPEA can be in any of the EPO official languages.

The EPO will, however, reply in the language of the proceedings.

**3.2 International applications filed in Dutch**

The EPO acting as ISA and IPEA accept international applications drawn up in Dutch if the application has been filed with the Netherlands Patent Office as RO.

*Rule 12.4, 43.4, 48.3**Agreement**EPO-WIPO,**Annex A(i)**OJ EPO 2017, A115**OJ EPO 2018, A17**OJ EPO 2018, A24*

Therefore, for such files, a translation is not required for the purpose of the international search by the EPO as ISA. However, under Rule 12.4(a), within 14 months of the priority date, a translation must be filed with the RO in a language of publication accepted by the RO for the purpose of international publication, i.e. English, French or German in the case of the Netherlands Patent Office as RO. The EPO as ISA will establish the ISR and WO-ISA in that language if it is already known at the time of carrying out the international search; otherwise they will be in the language of the request form, i.e. English, French or German. See also PCT Applicant's Guide, International Phase, Annex C, NL.

*Rule 12.4, 55.1,**55.2(a)**Agreement EPO-**WIPO, Annex A(i)**OJ EPO 2017, A115**OJ EPO 2018, A24*

If the EPO acts as IPEA, the applicant need not file a translation of the international application since the EPO will use the published version of the international application as received from the IB, which will be in English, French or German. It should be noted that the demand and amendments under Article 34 PCT must be submitted to the EPO as IPEA in the language of the international publication.

**3.3 Priority documents**

See GL/ISPE 6.17.

**3.4 Third-party observations**

See E-II.

**4. Correction of the translation**

See GL/RO 70.

**5. Authentic text of the international application**

The "record copy", the copy transmitted to the IB, is considered, for the purposes of the procedure under the PCT, to be a true copy of the international application. *Art. 12(2)*

Where a document in pre-conversion format has been submitted by the applicant together with the international application, that document may be used as a fallback in the event of conversion errors (see A-II, 1.2.1). *PCT/AI 706*

## Chapter VIII – Common provisions

### 1. Representation

#### 1.1 General principles

The PCT explicitly allows the receiving Office to apply its national law to the extent that it requires applicants to be represented by an agent having the right to represent them before it. On this basis, the EPC provisions concerning professional representation apply in respect of international applications processed by the EPO as receiving Office.

*Art. 27(7)*

*Art. 133(1), (2) EPC*

An agent is required by the EPO acting as receiving Office if the applicant has neither a residence nor their principal place of business in an EPC contracting state. Such applicants must act through an agent in all proceedings before the EPO acting as receiving Office except for filing the application and paying fees.

In view of the importance of careful preparation of the international application and of its proper processing, it is in any case highly advisable for applicants to use the services of an agent.

An appointed agent who has the right to represent the applicant before the receiving Office is automatically also entitled to act before the International Bureau, the International Searching Authority, any Authority specified for supplementary search and the International Preliminary Examining Authority ("agent for the international phase").

*Art. 49*

*Rule 90.1*

*PCT AG I 5.041-*

*5.051, 10.019-10.023,*

*11.001-11.014*

Information on the representation of the applicant in the international phase is to be indicated in Box No. IV of the PCT request form, in a separate power of attorney or via a separate notice referring to an existing general power of attorney, taking into account the instructions provided in the Notes to the PCT request form concerning Box No. IV and in GL/RO 117-121 as well as the information provided below.

*GL/RO 117-121*

#### 1.2 Representation by an agent

The following categories of agent ("professional representative" in EPC terminology) have the right to practise before the EPO as receiving Office:

*Art. 27(7)*

*Art. 134(1), (8) EPC*

*OJ EPO 2013, 500,*

*OJ EPO 2013, 535*

*OJ EPO 2025, A36*

*OJ EPO 2025, A48*

*PCT AG I 11.001-*

*11.004*

- professional representatives entered in the list of professional representatives maintained by the EPO (see EPC Guidelines A-VIII, 1.2);
- legal practitioners qualified to act as a professional representative in patent matters in an EPC contracting state and having their place of business in that state (see EPC Guidelines A-VIII, 1.3);
- associations of representatives and/or legal practitioners as defined above (see EPC Guidelines A-VIII, 1.4).

Only a person belonging to at least one of these categories may be appointed as an agent for an international application filed with the EPO as receiving Office.

If the agent is appointed using Box No. IV of the PCT request form, they must be indicated there by name unless they belong to an association of professional representatives and/or legal practitioners registered as such with the EPO. They can indicate any address they wish as long as it is in an EPC contracting state.

*Rule 4.7 and 90*  
*Rule 152(11) EPC*  
*OJ EPO 2013, 500,*  
*OJ EPO 2025, A48*

If an association of representatives and/or legal practitioners is appointed as agent using Box No. IV of the PCT request form, the name of the association must be indicated there. The number under which the association is so registered with the EPO may also be indicated.

If an association of representatives and/or legal practitioners is appointed, each member of the association may perform procedural acts on behalf of the applicant, and correspondence from the EPO is addressed to the association rather than one particular member.

*Rule 90.1(d)(ii)*  
*Rule 90.6(b)*  
*PCT AG I 11.004,*  
*11.012*

Further agents may be appointed at any time to represent the applicant either in the international phase in general or specifically before the EPO acting as International Searching Authority, Supplementary International Searching Authority or International Preliminary Examining Authority. The appointment of a new agent for the international phase in general is treated as revocation of any earlier appointment of an agent, unless otherwise indicated in the power of attorney appointing the new agent. Furthermore, an agent appointed for the international phase in general, unless otherwise indicated in the document appointing them, may appoint sub-agents to represent the applicant.

### **1.3 Representation by a common agent, common representative or "deemed common representative"**

*Rule 90.2*  
*PCT AG I 11.003,*  
*11.005-11.006*

If there are two or more applicants, each of them may choose to appoint their own agent, or they may choose to appoint a common agent for the international phase or one of the applicants who is entitled to file the international application to act as their common representative. The latter may in turn appoint an agent.

*Art. 27(7)*  
*Art. 133(2) and*  
*150(2) EPC*

If the appointed common representative has neither a residence nor their principal place of business in an EPC contracting state, the EPO as receiving Office will require the appointment of an agent.

If a common agent or common representative is appointed using Box No. IV of the PCT request form, their name and address must be indicated there.

*Rule 19.1, 90.2*  
*Art. 27(7)*  
*Art. 133(2) and*  
*150(2) EPC*

If no common agent or common representative is appointed, the applicant first named in the request who is entitled to file the international application with the EPO as receiving Office is considered to be the common representative. If such "deemed common representative" has neither a residence nor their principal place of business in an EPC contracting state, the EPO as receiving Office will require the appointment of an agent.

If no common agent is appointed, any correspondence is sent to the (deemed) common representative or, if the latter has appointed an agent,

to their agent, unless a different address is provided as the address for correspondence.

A deemed common representative is not entitled to sign notices of withdrawal on behalf of co-applicants without submitting evidence of their consent to such withdrawal. If a deemed common representative has appointed an agent, the latter may validly perform any act which could be performed by the deemed common representative. If a co-applicant of the deemed common representative has appointed an agent, such agent will not be considered the "agent of record" and will be entitled to act only on behalf of that co-applicant.

#### **1.4 Representation by an employee**

Natural or legal persons having their residence or principal place of business in an EPC contracting state do not need to be represented by an agent in proceedings before the EPO acting as receiving Office, (S)ISA or IPEA. They may, however, act in these proceedings through an employee, who need not be an agent (see A-VIII, 1.2) but who must be authorised (see A-VIII, 1.11, 1.12, 1.13).

*Art. 27(7)*

*Art. 133(3) EPC*

#### **1.5 Manner of appointment of an agent, common agent or common representative**

Appointment of an agent, common agent or common representative for the international phase requires a declaration to this effect. This can be made either in the PCT request form (Box No. IV) or in a separate notice ("power of attorney"). For this purpose the "PCT/Model of power of attorney" may be used, which is available on the WIPO website.

*Rule 90.4, 90.5*

*PCT AG I 11.007-*

*11.009*

For the appointment of an agent, a common agent or a common representative to be effective, the PCT request or the power of attorney must be duly signed by (all) the applicant(s) for whom the agent, the common agent or the common representative is intended to act. However, a power of attorney must only be submitted to the EPO if the EPO's waiver of the requirement to submit a separate power of attorney does not apply in the circumstances. For further information on separate powers of attorney and the EPO's waiver of the requirement to submit them (see A-VIII, 1.11 and 1.13).

Appointment of an agent or a common agent may also be effected by referring in the PCT request form (Box No. IX) or in a separate notice to an existing general power of attorney deposited with the EPO. A copy of the general power of attorney must only be furnished if the EPO's waiver concerning a copy of a general power of attorney does not apply in the circumstances. For further information on general powers of attorney and the EPO's waiver of the requirement to submit a copy of them (see A-VIII, 1.12-1.13).

#### **1.6 Address for correspondence**

Where no agent or common representative is appointed, any correspondence is sent to the address, indicated in Box No. II or III of the PCT request form, of the applicant (if there is only one applicant) or of the deemed common representative (if there are two or more applicants).

*Art. 27(7)*

*Rule 4.4(d)*

*Art. 150 EPC*

*OJ EPO 2014, A99*

However, if the applicant wishes correspondence to be sent to a different address, that address must be indicated in Box No. IV instead of the indication of an agent or common representative. In this case, and only in this case, the last check box of Box No. IV must be marked (that is, the last check box must not be marked if either of the check boxes "agent" or "common representative" in Box No. IV has been marked). For proceedings in the international phase before the EPO as receiving Office, International Searching Authority, Supplementary International Searching Authority or International Preliminary Examining Authority, the address for correspondence given may be that of any person in any country.

### **1.7 Representation before the EPO as International Searching Authority**

*Art. 49  
Rule 90.1(a), (b), (d)  
PCT AG I 11.001-  
11.014*

Applicants may be represented before the EPO as International Searching Authority (ISA) by the agent appointed on filing the international application and/or having the right to practise before the receiving Office, who is usually the agent for the international phase.

The agent appointed for the international phase – and thus including for proceedings before the ISA – may appoint a sub-agent to represent the applicant specifically before the EPO as ISA, provided that any person so appointed as sub-agent has the right to practise before the EPO acting as ISA. All communications issued by the ISA are then sent to the agent specifically appointed for proceedings before the EPO as ISA.

Applicants may also appoint an agent to represent them specifically before the EPO in its capacity as ISA. Any agent specifically appointed to act before the EPO as ISA must be entitled to practise before the EPO.

The applicant or agent for the international phase can appoint an agent specifically before the EPO as ISA by signing and submitting a separate power of attorney. Appointment may also be effected by reference in a separate notice to a duly deposited general power of attorney. In this case, the separate notice may be signed by the purported agent. The separate power of attorney or a copy of a general power of attorney must only be submitted to the EPO acting as ISA if the EPO's waiver of the requirement to submit it does not apply in the circumstances. For further information, see A-VIII, 1.11-1.13.

### **1.8 Representation before the EPO as Supplementary International Searching Authority**

*Art. 49  
Rule 90.1(a), (b),  
(b-bis), (d)  
PCT AG I 11.001-  
11.014*

Applicants may be represented before the EPO as Supplementary International Searching Authority (SISA) by the agent appointed on filing the international application and/or having the right to practise before the receiving Office, who is usually the agent for the international phase.

The agent appointed for the international phase – and thus including for proceedings before the SISA – may appoint a sub-agent to represent the applicant specifically before the EPO as SISA, provided that any person so appointed as sub-agent has the right to practise before the EPO acting as SISA. All communications issued by the EPO as SISA are then sent to the agent specifically appointed for proceedings before the EPO as SISA.

Applicants may also appoint an agent to represent them specifically before the EPO in its capacity as SISA. Any agent specifically appointed to act before the EPO as SISA must be entitled to practise before the EPO.

The applicant or agent for the international phase can appoint an agent specifically before the EPO as SISA by signing and submitting a separate power of attorney. Appointment may also be effected by reference in a separate notice to a duly deposited general power of attorney. In this case, the separate notice may be signed by the purported agent. The separate power of attorney or a copy of a general power of attorney must only be submitted to the EPO acting as SISA if the EPO's waiver of the requirement to submit it does not apply in the circumstances. For further information, see A-VIII, 1.11-1.13.

### **1.9 Representation before the EPO as International Preliminary Examining Authority**

Applicants may be represented before the EPO as International Preliminary Examining Authority (IPEA) by the agent appointed on filing the international application and/or having the right to practise before the receiving Office, who is usually the agent for the international phase.

*Art. 49  
Rule 90.1(a), (c), (d)  
PCT AG I 10.019-  
10.023*

The agent appointed for the international phase may appoint a sub-agent to represent the applicant specifically before the EPO as IPEA, provided that any person so appointed as sub-agent has the right to practise before the EPO acting as IPEA.

Applicants may also appoint an agent to represent them specifically before the EPO as IPEA. Any agent specifically appointed before the EPO as IPEA must be entitled to practise before the EPO.

The applicant or agent for the international phase can appoint an agent specifically before the EPO as IPEA either by completing Box No. III of the demand form (PCT/IPEA/401) and signing the demand, or by signing and submitting a separate power of attorney. Appointment may also be effected by reference in the PCT demand or in a separate notice to a duly deposited general power of attorney. In this case, the PCT demand or the separate notice may be signed by the purported agent. The separate power of attorney or a copy of a general power of attorney must only be submitted to the EPO acting as IPEA if the EPO's waiver of the requirement to submit it does not apply in the circumstances. For further information, see A-VIII, 1.11-1.13.

### **1.10 Representation before the EPO as designated or elected Office**

A (common) agent appointed in the PCT request as agent for an international application is appointed only for the international phase. This means that a professional representative authorised to act before the EPO and who acted for the applicant(s) in the international phase is not automatically considered to be the representative for the European phase. However, if the EPO is the receiving Office and the agent is appointed by a separate authorisation, the applicant(s) may, at the same time, indicate in that authorisation that the agent is also appointed to represent the applicant(s) before the EPO as designated or elected Office in the

*Art. 27(7), 49  
Rule 90.1  
Art. 134 EPC  
PCT AG I 11.001*

European phase. To designate an agent for the international and European phases at the same time, the applicant may use Form EPA/EPO/OEB 1003 or Form EPA/EPO/OEB 1004, which are available on the EPO website.

If an agent is appointed by reference to an existing general power of attorney, the appointment of the agent for the European phase too must be explicitly stated in the separate notice.

For details on representation before the EPO as designated or elected Office, see EPC Guidelines, A-VIII, 1 and A-XII, 6.

### **1.11 Power of attorney**

*Rule 90.4(b)* Generally, a separate power of attorney must be submitted to either the receiving Office or the International Bureau or, where it appoints an agent to represent an applicant specifically before the ISA, SISA or IPEA, to that Authority.

*Rule 90.4(c)* It must be duly signed and the name and address of the appointed person must comply with Rule 4.4.

*OJ EPO 2010, 335* However, the EPO in its capacity as receiving Office, ISA, SISA and IPEA has waived the requirement under Rule 90.4(b) that a separate power of attorney be submitted to appoint a (common) agent or a common representative (see A-VIII, 1.13). Thus, in cases where this waiver is applicable, the requirements of signature and proper indication of name and address under Rule 90.4(c) do not apply.

### **1.12 General power of attorney**

*Rule 90.5* A "general power of attorney" is a separate power of attorney appointing an agent to represent an applicant in relation to any international application which they may file. Generally, for such appointment to be effective:

- reference must be made in the PCT request, the PCT demand or a separate notice to the general power of attorney;
- the general power of attorney must have been deposited with the receiving Office or, in the case of appointment specifically before the ISA, SISA or IPEA, with that Authority;
- a copy of the general power of attorney must be attached to the PCT request, the PCT demand or the separate notice, as the case may be.

*OJ EPO 2010, 335* However, the EPO in its capacity as receiving Office, ISA, SISA and IPEA has waived the requirement under Rule 90.5(a)(ii) that a copy of a general power of attorney be attached to the PCT request, the PCT demand or a separate notice (see A-VIII, 1.13).

**1.13 Waivers – exceptions to applicability**

The waivers by the EPO with regard to the requirements under Rule 90.4(b) and Rule 90.5(a)(ii) do not apply to employees referred to in Art. 133(3) EPC if they are not also professional representatives or legal practitioners.

*Rule 90.4(e), 90.5(d)*  
*OJ EPO 2010, 335*  
*OJ EPO 2024, A77*  
*OJ EPO 2025, A45*  
*OJ EPO 2025, A47*

The waiver by the EPO with regard to the requirement under Rule 90.4(b) that a separate power of attorney be submitted to appoint a (common) agent or a common representative does not apply if the (common) agent or the common representative submits any notice of withdrawal referred to in Rule 90*bis*.1 to 90*bis*.4.

The waiver by the EPO with regard to the requirement under Rule 90.5(a)(ii) that a copy of the general power of attorney be attached to the PCT request, the PCT demand or the separate notice does not apply if the (common) agent submits any notice of withdrawal referred to in Rule 90*bis*.1 to 90*bis*.4.

Furthermore, the EPO acting as receiving Office, ISA, SISA or IPEA may require the filing of a separate power of attorney or a copy of a general power of attorney if necessary in the circumstances of a particular case, for example if:

- a procedural act is performed by a purported agent who is not the agent of record, unless the purported agent belongs to the same office as the agent of record, or both the purported agent and the agent of record are employees of the applicant or, if there is more than one applicant, of the common representative;
- there is doubt as to whether the agent or common representative is entitled to act.

**2. Form of documents****2.1 Documents making up the international application**

The physical requirements of the documents making up the international application, i.e. request, description, claims, drawings and abstract, are set out in Rule 11. Compliance with these requirements, which is checked by the receiving Office, is only required to the extent necessary for the purpose of reasonably uniform international publication.

*Art. 14(1)(a)(v)*  
*Rule 26.3bis*

See GL/RO 132-146.

**2.2 Later documents**

The requirements of Rule 10 and 11.1 to 11.13 also apply to any other document (e.g. replacement sheets, amended claims, translations) submitted after the filing of the international application.

*Rule 11.14*  
*GL/RO 132*

### 2.3 Number of copies

*Rule 11.1*  
*Rule 3.3(a)(ii)*  
*Rule 92.4(d) and*  
*(g)(ii)*

The documents constituting an international application must be filed with the EPO as receiving Office in one copy only. The same applies to any of the documents referred to in the check list of the PCT request form (Box No. IX).

### 2.4 Filing of subsequent documents

See A-II, 1.3.

## 3. Signature of documents

### 3.1 Documents filed after filing the international application

*Rule 90bis.5*  
*Rule 92.1(a)*  
*GL/RO 20*  
*GL/ISPE 22.56*

Any document submitted by the applicant in the course of the international procedure, other than the international application itself, must, if not itself in the form of a letter, be accompanied by a letter identifying the international application to which it relates. All letters must be signed by the applicant or by a duly appointed agent or common representative. A deemed common representative is entitled to sign on behalf of the co-applicants with the only exception of notices of withdrawal.

*Rule 53.2(b)*  
*Rule 53.8*  
*Rule 60.1(a-ter)*  
*Rule 90bis.5*  
*GL/ISPE 22.28-22.32*  
*OJ EPO 2010, 335*

A demand for international preliminary examination shall be signed by the applicant or, if there is more than one applicant, by all applicants. If the signature of one or more applicants is missing, the EPO as IPEA will not invite the applicant(s) to furnish the missing signature(s) provided that at least one of the applicants has signed the demand. The signature by one of the applicants is thus considered sufficient. It is also possible for (common) agents or common representatives to sign a demand on behalf of the applicant(s) who appointed them. Where the demand is signed by a (common) agent the EPO as IPEA will not invite the applicant(s) to file a (separate) power of attorney or a copy of a general power of attorney since the EPO has waived these requirements. A deemed common representative is entitled to sign on behalf of the co-applicants with the only exception of notice of withdrawal.

### 3.2 Signature of the PCT request and a power of attorney

*Rule 4.1(d), 4.15,*  
*26.2bis(a),*  
*51bis.1(a)(vi)*  
*GL/RO 122-128*  
*WIPO PCT Guide*  
*5.088-5.091*  
*PCT Newsletter,*  
*1/2020, 5*

The PCT request form must be signed by the applicant, the agent or the common representative (Box No. X of the PCT request form). Where applicable, the power of attorney must be signed by the applicant.

Where there are two or more applicants, each applicant must sign the request, or each applicant for whom an agent has been appointed must sign a power of attorney (Box No. IX of the PCT request form). However, if there is more than one applicant, the EPO as receiving Office will not invite the applicant to furnish the missing signature(s) if the PCT request form is signed by at least one of the applicants. Any designated Office, however, may require the missing signature of any applicant who has not signed the PCT request for that designated state.

The EPO as designated/elected Office does not require a missing signature to be submitted upon entry into the European phase.

The EPO as RO, ISA, SISA and IPEA has waived the requirement that, for the effective appointment of an agent, common agent or common representative, a signed separate power of attorney must be submitted to it if the PCT request is not signed by (all) the applicant(s). The EPO has also waived the requirement that a copy of the general power of attorney be attached to the PCT request or to a separate notice if appointment of a (common) agent is made by reference to a general power of attorney. For further details on powers of attorney, general powers of attorney and the waivers see A-VIII, 1.11-1.13.

### **3.3 Form of signature**

See EPC Guidelines A-VIII, 3.3.

### **3.4 Joint applicants**

For the PCT request and a power of attorney see A-VIII, 3.2.

For the demand for international preliminary examination see A-VIII, 3.1.

# Contents

## Chapter I – Introduction I-1

1.	<b>Purpose of Part B</b>	I-1
2.	<b>The examiner</b>	I-1
2.1	Consultation with other examiners	I-1
2.2	Search Division consisting of more than one examiner	I-1

## Chapter II – General II-1

1.	<b>International search and written opinion under Chapter I</b>	II-1
1.1	Competence of the EPO as ISA	II-2
2.	<b>Objective of the search</b>	II-3
3.	<b>Search documentation</b>	II-3
4.	<b>Search report</b>	II-3
5.	<b>Time limit</b>	II-3
6.	<b>Representation before the EPO as ISA or SISA</b>	II-3

## Chapter III – Characteristics of the search III-1

1.	<b>Scope of the search</b>	III-1
1.1	Completeness of the search	III-1
1.2	Effectiveness and efficiency of the search	III-1
1.3	Search in analogous fields	III-1
1.4	Search on the internet	III-1
2.	<b>The subject of the search</b>	III-1
2.1	Basis for the search	III-1
2.2	Interpretation of claims	III-1
2.2.1	Claims with explicit references to the description or drawings	III-1

2.3	Obvious mistakes and missing or correct parts/elements	III-2
2.3.1	General considerations	III-2
2.3.2	Request for rectification of obvious mistakes (Rule 91)	III-2
2.3.3	Incorporating missing parts or elements, or correct parts or elements, completely contained in the priority document	III-2
2.3.4	Correct elements or parts notified after the start of the search and additional fee	III-3
2.4	Anticipation of amendments to claims	III-4
2.5	Broad claims	III-4
2.6	Independent and dependent claims	III-4
2.7	Search on dependent claims	III-4
2.8	Combination of elements in a claim	III-4
2.9	Different categories	III-4
2.10	Subject-matter excluded from search	III-4
2.11	Nucleotide and amino acid sequences	III-4
2.12	Lack of unity	III-5
2.13	Technological background	III-5

## **Chapter IV – Search procedure and strategy** **IV-1**

<b>1.</b>	<b>Analysis of the application prior to searching</b>	<b>IV-1</b>
1.1	Taking into account results of an earlier search and classification	IV-1
1.2	PCT Direct applications	IV-1
1.2.1	Requests for PCT Direct	IV-1
1.2.2	Processing of PCT Direct letters	IV-2
1.3	Third-party observations	IV-2
1.4	Documents cited in the application	IV-3
<b>2.</b>	<b>Search strategy</b>	<b>IV-3</b>
2.1	Subject of the search; restrictions	IV-3
2.2	Formulating a search strategy	IV-3
2.3	Carrying out the search; types of documents	IV-3

2.4	Reformulation of the subject of the search	IV-3
2.5	Closest prior art and its effects on the search	IV-3
2.6	End of search	IV-3
<b>3.</b>	<b>Procedure after searching</b>	<b>IV-3</b>
3.1	Preparation of the search report	IV-3
3.2	Amended international search report	IV-4

## **Chapter V – Preclassification and IPC classification of international patent applications**

**V-1**

<b>1.</b>	<b>Definitions</b>	<b>V-1</b>
<b>2.</b>	<b>Preclassification (for file routing and distribution)</b>	<b>V-1</b>
2.1	Incorrect preclassification	V-1
<b>3.</b>	<b>IPC classification of the application</b>	<b>V-1</b>
3.1	Amended classification of late-published search reports	V-1
3.2	IPC classification when the scope of the invention is not clear	V-1
3.3	IPC classification in cases of a lack of unity of invention	V-1
3.4	Verification of the IPC classification	V-1

## **Chapter VI – The state of the art at the search stage**

**VI-1**

<b>1.</b>	<b>General</b>	<b>VI-1</b>
<b>2.</b>	<b>State of the art – oral disclosure, etc.</b>	<b>VI-1</b>
<b>3.</b>	<b>Priority</b>	<b>VI-1</b>
<b>4.</b>	<b>Conflicting applications</b>	<b>VI-1</b>
4.1	Potentially conflicting European and international applications	VI-1
4.2	National prior rights	VI-1

<b>5.</b>	<b>Date of reference for documents cited in the search report; filing and priority date</b>	<b><u>VI-2</u></b>
5.1	Verification of claimed priority date(s)	<u>VI-2</u>
5.2	Intermediate documents	<u>VI-2</u>
5.3	Doubts as to the validity of the priority claim; extension of the search	<u>VI-2</u>
5.4	Documents published after the filing date	<u>VI-2</u>
5.5	Non-prejudicial disclosures	<u>VI-2</u>
5.6	Matters of doubt in the state of the art	<u>VI-2</u>
<b>6.</b>	<b>Contents of prior-art disclosures</b>	<b><u>VI-2</u></b>
6.1	General remark	<u>VI-2</u>
6.2	Citation of documents corresponding to documents not available or not published in one of the official EPO languages	<u>VI-2</u>
6.3	Conflict between abstract and source document	<u>VI-3</u>
6.4	Insufficient prior-art disclosures	<u>VI-3</u>
6.5	Incorrect compound records in online databases	<u>VI-3</u>
<b>7.</b>	<b>Internet disclosures – technical journals</b>	<b><u>VI-3</u></b>

## **Chapter VII – Unity of invention** **VII-1**

<b>1.</b>	<b>General remarks</b>	<b><u>VII-1</u></b>
<b>2.</b>	<b>Lack of unity at the search stage</b>	<b><u>VII-1</u></b>
<b>3.</b>	<b>No request for payment of additional search fees</b>	<b><u>VII-2</u></b>
<b>4.</b>	<b>Cascading non-unity</b>	<b><u>VII-2</u></b>
<b>5.</b>	<b>Documents relevant only to other inventions</b>	<b><u>VII-3</u></b>
<b>6.</b>	<b>Reply from the applicant to the invitation to pay additional search fees</b>	<b><u>VII-3</u></b>
6.1	No payment of additional search fees	<u>VII-3</u>
6.2	Payment of additional search fees without protest	<u>VII-3</u>
6.3	Payment of additional search fees under protest	<u>VII-4</u>

<b>7.</b>	<b>Protest procedure</b>	<b><u>VII-4</u></b>
7.1	Admissibility of the protest as checked by the formalities officer	<u>VII-5</u>
7.2	The work of the Review Panel	<u>VII-5</u>
<b>8.</b>	<b>Lack of unity and incomplete search</b>	<b><u>VII-6</u></b>

## **Chapter VIII – Subject-matter to be excluded from the search** **VIII-1**

<b>1.</b>	<b>General remarks</b>	<b><u>VIII-1</u></b>
<b>2.</b>	<b>Subject-matter which the ISA is not required to search and examine</b>	<b><u>VIII-1</u></b>

10.4	Review procedure	<u>XII-5</u>
<b>11.</b>	<b>Combination of SIS and Chapter II</b>	<b><u>XII-6</u></b>

## Chapter I – Introduction

### 1. Purpose of Part B

Part B is drafted for and applies to searches and written opinions established by the EPO as ISA or SISA in the context of Chapter I of the Patent Cooperation Treaty (PCT).

### 2. The examiner

The examiner appointed to carry out the search and establish the written opinion normally works alone. However, their line manager may at this stage also preselect the examining division responsible for the application in the event of entry into the European phase. *GL/ISPE 15.08-15.09*

#### 2.1 Consultation with other examiners

Section B-I, 2.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 2.2 Search Division consisting of more than one examiner

Section B-I, 2.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*. *GL/ISPE 15.08*

## Chapter II – General

### 1. International search and written opinion under Chapter I

The procedure through which a PCT application proceeds from the filing of the application to the conclusion of the international phase comprises the international search and written opinion under Chapter I, which is mandatory for applicants, and the international preliminary examination under Chapter II, which is optional.

*Art. 15*

*Art. 33*

The objective of the international search is to discover the prior art which is relevant for the purpose of determining whether, and if so to what extent, the claimed invention to which the international application relates is or is not novel and does or does not involve an inventive step. The result of the search is communicated to the applicant in the form of an international search report. In some cases the International Searching Authority is not required to establish a search for some or all of the claimed subject-matter, e.g. because more than one invention is claimed or the application covers excluded subject-matter.

*Art. 17*

*Rule 43*

*GL/ISPE 15 and 16*

In its capacity as an International Searching Authority, the EPO is empowered not only to carry out the international search but also to formulate a preliminary and non-binding opinion on whether the claimed invention appears to be novel, to involve an inventive step and to be industrially applicable. When appropriate, an opinion will also be given on added subject-matter, unity, insufficient disclosure and clarity or support issues, as well as formal defects.

*Rule 43bis*

*GL/ISPE 17*

This opinion is sent to the applicant in the form of a written opinion of the International Searching Authority (WO-ISA) together with the search report. If no international preliminary examination report is to be established because the applicant did not file a demand for preliminary examination, or the demand has been withdrawn, the International Bureau will prepare a report, entitled "international preliminary report on patentability (Chapter I of the Patent Cooperation Treaty)" having the same contents as the written opinion. Even if the applicant filed any amendments under Article 19, the amendments will not be taken into consideration in the international preliminary report on patentability (PCT Chapter I).

*Rule 44bis*

*GL/ISPE 2.18*

The written opinion (and any informal comments filed by the applicant) will be made available to the public by the International Bureau at the same time as the international publication.

*Art. 21(3)*

*Rule 48.2*

*GL/ISPE 2.17*

Although the PCT procedure differs in some procedural and formal aspects from the European procedure, the criteria for search and examination with respect to novelty, inventive step, industrial applicability, unity, non-patentable subject-matter or exclusions, insufficient disclosure and clarity are in principle the same. This means that search and examination under the PCT is carried out in the same way and applying the same quality standard as for a European application in so far as the same requirements are examined.

There is no difference between an international and a European search, either in respect of the method and thoroughness of the search or in respect of the sources of prior art searched.

### 1.1 Competence of the EPO as ISA

The EPO is an International Searching and Preliminary Examining Authority for the vast majority of PCT contracting states. All applications are treated in the same manner irrespective of their country of origin.

*Art. 16, 32*  
*Rule 35, 59*  
*GL/ISPE 1.13-1.14*

*Art. 16*  
*Rule 35*  
*Art. 152 EPC*  
*Agreement EPO-  
WIPO, Art. 3(1)*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*WIPO PCT Guide*  
*7.002*

Although the EPO's competence to act as ISA is, in principle, universal, i.e. not restricted to international applications from e.g. EPC contracting states, it can act as ISA only on condition that the receiving Office where the application was filed has specified the EPO as ISA.

Most receiving Offices have specified the EPO as competent ISA. On 1 January 2024, the only states that had not specified the EPO as ISA (and IPEA) were: United Arab Emirates (AE), Australia (AU), Canada (CA), Democratic People's Republic of Korea (KP), Republic of Korea (KR) and Papua New Guinea (PG). Up-to-date information is available on the WIPO website.

*Agreement EPO-  
WIPO, Art. 3(3)*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*OJ EPO 2020, A35*  
*OJ EPO 2023, A37*

If the IB is acting as receiving Office, the EPO is competent as ISA/IPEA if the international application could have been filed with a receiving Office which specified the EPO as ISA/IPEA at the filing date.

*Rule 4.1(b)(iv),*  
*4.14bis*

If the receiving Office has specified more than one ISA, the applicant must indicate the chosen ISA in the PCT request (Box No. VII) and in the Fee Calculation Sheet (Box No. 2). Only one ISA may be selected. For example, the EPO may be chosen as ISA for applications filed with the USPTO and for applications in English filed with the JPO as receiving Office.

*Agreement EPO-  
WIPO, Art. 3(2),*  
*Annex A(i)*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*OJ EPO 2020, A35*  
*OJ EPO 2023, A37*

Applicants considering their choice of ISA are advised to bear in mind that the EPO will act as an IPEA only if the international search was carried out by the EPO itself or by . the Austrian, Finnish, Spanish, Swedish or Turkish Patent Office, the Nordic Patent Institute or the Visegrad Patent-Institute.

*OJ EPO 2009, 594*

If the EPO acts as main ISA or SISA, no supplementary European search is carried out after entry in the European Phase (see EPC Guidelines A-XIV, 1.1). Therefore, no search fee will be due on entry into the European phase.

If an international application is filed with the EPO acting as receiving Office, the EPO is the only competent ISA for the international search. Therefore, this need not be entered in Box No. VII of the PCT request form. Note that the EPO cannot be selected as ISA for supplementary international search (SIS) when the EPO was the main ISA.

*Art. 16 PCT*  
*Rule 4.1(b)(iv),*  
*4.14bis*  
*Art. 152 EPC*  
*Agreement*  
*EPO-WIPO, Art. 3(1)*  
*OJ EPO 2017, A115*  
*OJ EPO 2020, A35*

## 2. Objective of the search

The objective of the international search is to discover the prior art which is relevant for the purpose of determining novelty and inventive step. The international search as such, thus, does not differ from a European search.

*Art. 15*  
*Rule 33*  
*GL/ISPE 15.01*

## 3. Search documentation

Section B-II, 3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*Rule 34*  
*GL/ISPE 15.45-15.51*

## 4. Search report

An international search report is prepared containing the results of the search, in particular by identifying the documents constituting the relevant state of the art (see B-X, 9).

*Art. 18*  
*Rule 43*  
*GL/ISPE 16.01*

The search report is accompanied by a written opinion of the International Searching Authority (see B-XI).

*Rule 43bis.1*

## 5. Time limit

The time limit for establishing the international search report and the WO-ISA is three months from the receipt of the search copy by the ISA or nine months from the priority date, whichever occurs later. In practice this means that the search and the written opinion should be established no later than 16 months from the priority date.

*Rule 42.1, 43bis.1*  
*GL/ISPE 2.13, 16.05*

## 6. Representation before the EPO as ISA or SISA

Any attorney, patent agent, or other person, having the right to practise before the receiving Office with which the international application was filed may represent the applicant throughout the international phase, including before the EPO as ISA or SISA (see A-VIII, 1.1). Depending on which office acted as receiving Office, such agent or other person may or may not be a professional representative or legal practitioner entitled to undertake representation under Art. 134 EPC.

*Art. 49*

Representation before the EPO as ISA or SISA may also be undertaken by any agent (professional representative or legal practitioner) competent to act before the EPO and duly appointed for this purpose (see A-VIII, 1.7 and 1.8).

*Rule 90.1(b)*  
*Rule 90.1(b-bis)*

## Chapter III – Characteristics of the search

### 1. Scope of the search

#### 1.1 Completeness of the search

The scope of the international search is defined in Art. 15(4), stipulating that the International Searching Authority must endeavour to discover as much of the relevant prior art as its facilities permit and must, in any case, consult the documentation specified in the PCT Regulations (Rule 34). It follows from this definition ("as its facilities permit") that the scope of an international search is equivalent to that of a European search. International and European searches are thus fully identical in scope.

Art. 15(4)  
Rule 34

See also ISPE Guidelines 15.18 and 15.20.

#### 1.2 Effectiveness and efficiency of the search

Section B-III, 2.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 15.46-15.47

#### 1.3 Search in analogous fields

Section B-III, 2.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 33.2(b), (c)  
GL/ISPE 15.48-15.51

#### 1.4 Search on the internet

Section B-III, 2.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 15.56-15.59

Concerning the dating of internet citations, see G-IV, 6.4.

### 2. The subject of the search

#### 2.1 Basis for the search

The international search is carried out on the basis of the search copy of the application as transmitted to the ISA by the RO (see B-III, 2.3.1).

Art. 15(3)  
Rule 33.3(a)  
GL/ISPE 15.10

Concerning rectification of obvious mistakes and/or incorporation by reference of missing or correct parts or elements, see B-III, 2.3 and H-II, 2.2.2.

#### 2.2 Interpretation of claims

Section B-III, 3.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 15.21-15.23

##### 2.2.1 Claims with explicit references to the description or drawings

Although explicit references in the claims to features elucidated in the description or in the drawings are only permissible where "absolutely necessary", if claims contain such references, the examiner should strive to search these technical features as long as they are unambiguously defined by specific parts of the description.

Rule 6.2(a)  
GL/ISPE 5.10, 16.30

However, where the reference does not clearly identify which subject-matter of the description and/or drawings is to be considered as

included in the claim, the examiner may informally contact the applicant for clarification before the search is carried out (see B-VIII, 3.3). In the special case of "omnibus claims" (e.g. a claim reading "The invention substantially as herein described"), no request for informal clarification should be issued, and subsequently the search report will be designated as complete.

The procedure above should be followed regardless of whether or not the reference to the drawings and/or the description is allowable according to Rule 6.2(a).

Where the reference does not appear to be justified, the examiner should raise an objection in the written opinion.

## **2.3 Obvious mistakes and missing or correct parts/elements**

### **2.3.1 General considerations**

*Art. 19*  
*Rule 91.1*  
*GL/ISPE 15.10, 15.23*

Since there is no right to amend the application until after the international search has been established, the international search must be carried out on the basis of the search copy of the application as transmitted to the EPO as ISA by the RO, except that obvious mistakes or formal matters which are contrary to the PCT and are called to the applicant's attention by the RO may be corrected (see also H-IV).

### **2.3.2 Request for rectification of obvious mistakes (Rule 91)**

*Rule 91*

An applicant can request authorisation to rectify obvious mistakes in the international application (see H-IV, 2). The examiner (if the request relates to the description, claims or drawings) will have to assess whether such a request can be authorised according to the criteria set out in Rule 91 – see GL/ISPE 8.07-8.08. If RO has erroneously authorised such rectification, this may affect the search (see H-IV, 2.1).

*Art. 19*  
*GL/ISPE 15.10*

If the changes requested by the applicant before the receipt of the ISR are not rectifications, but rather amendments, the examiner must refuse them, because there is no right to amend the application until after the international search report has been established. This applies even if the applicant refers to them as rectifications and even if they would be allowable amendments not adding subject-matter to the application as originally filed. For example, reformulation of claims, deletion of technical terms, deletion or limitation of claims and the taking of subject-matter from the description into the claims must all be refused at this stage regardless of whether or not they might be allowable, since they are not rectifications, but rather substantive amendments.

### **2.3.3 Incorporating missing parts or elements, or correct parts or elements, completely contained in the priority document**

*Rule 20.5*

If applicants omit to file part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish it (them) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and Rule 20.6(a) and provided the missing part(s) and/or element(s) were completely contained in the priority document.

Similarly if applicants appear to have erroneously filed part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish the correct part(s) and/or element(s) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and 20.6(a) and provided the correct part(s) and/or element(s) were completely contained in the priority document (see A-II, 6).

*Rule 20.5bis*

The activity of the EPO as ISA depends on the decisions taken by the RO with regard to the international application and its filing date (see also A-II, 6). Therefore, in cases where the international application was corrected by the RO under Rule 20.5bis, the EPO as ISA will carry out the search on the basis of the international application including the correct element(s) and/or part(s) if:

- (a) the RO notifies it of the correct element(s) and/or part(s) before the start of the search; or
- (b) the RO notifies it of the correct element(s) and/or part(s) after the start of the search (including after its completion) and the applicant pays an additional fee equal to the search fee within one month of the date of the invitation to do so issued by the EPO (Rule 40bis.1 and Article 2(1) RFees) (see B-III, 2.3.4).

The examiner checks whether the RO's assessment of the "completely contained" criterion was correct (see H-II, 2.2.2). If the RO erroneously considered that the missing part(s) and/or element(s), or correct part(s) and/or element(s), were completely contained in the priority document, the search should be extended to include documents which would be relevant if the application were to be redated (such documents can be cited as "L" in the ISR).

See also B-XI, 2.1.

#### **2.3.4 Correct elements or parts notified after the start of the search and additional fee**

The RO may notify the ISA of correct part(s) and/or element(s) after the ISA has begun to draw up the international search report. In such cases, the EPO as ISA will invite the applicant to pay an additional fee equal to the search fee within one month of the date of the invitation (Form 208) (Rule 40bis.1 and Article 2(1) RFees).

*OJ EPO 2020, A36*

*OJ EPO 2020, A81*

If the EPO as ISA is notified of correct element(s) and/or part(s) after the search has started but before its completion and the additional fee is paid, the EPO will also complete the already initiated search and issue a non-official international search report and written opinion based on the international application as initially submitted. However, the non-official international search report and written opinion are issued only for the benefit of the applicant and any designated Offices which have given notice under Rule 20.8(b-bis) of an incompatibility. They therefore do not constitute the international search report under Rule 43 and written opinion

under Rule 43*bis*. The applicant thus has no obligation to respond to the non-official written opinion upon entry into the European phase.

Regarding the treatment in the European phase of correct element(s) or part(s) notified after the ISA has begun to draw up the international search report, please see Section C-III, 1.3 in the Guidelines for Examination in the EPO.

#### **2.4 Anticipation of amendments to claims**

Rule 33.3(b)  
GL/ISPE 15.25

Section B-III, 3.5 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **2.5 Broad claims**

GL/ISPE 15.26

Section B-III, 3.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **2.6 Independent and dependent claims**

GL/ISPE 15.27

Section B-III, 3.7 in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

#### **2.7 Search on dependent claims**

GL/ISPE 15.28

Section B-III, 3.8 in the Guidelines for Examination in the EPO applies *mutatis mutandis* (see also F-IV, 3.3).

#### **2.8 Combination of elements in a claim**

GL/ISPE 15.31

Section B-III, 3.9 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **2.9 Different categories**

GL/ISPE 15.32

Section B-III, 3.10 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **2.10 Subject-matter excluded from search**

Art. 17(2)(a)  
Rule 39  
GL/ISPE 15.33

The examiner may exclude certain subject-matter from the search. These exclusions may result from the international application including subject-matter which the EPO as ISA is not required to deal with (see B-VIII, 2). They may also arise because the description, claims or drawings fail to meet a requirement, such as clarity or support of the claims by the description, to such an extent that no meaningful search can be carried out for all or some of the claims (see B-VIII, 3).

#### **2.11 Nucleotide and amino acid sequences**

Rule 5.2, 13*ter*.1  
OJ EPO 2011, 372  
OJ EPO 2025, A64,  
OJ EPO 2021, A97  
OJ EPO 2022, A60  
OJ EPO 2024, A54,  
OJ EPO 2024, A55  
GL/ISPE 9.39, 15.12  
GL/ISPE 15.14A

If, after an invitation from the EPO as ISA according to Rule 13*ter*.1, the applicant has not submitted the sequence listing in the required format (in XML and complying with WIPO Standard ST.26) and in an accepted language and paid the late furnishing fee within the time limit set, the EPO as ISA will carry out the international search without the sequence listing to the extent that a meaningful search can be carried out (see also B-VIII, 3.2).

If, in addition to an ST.26-compliant sequence listing, another sequence listing is also filed in another format accepted for the filing of documents,

only the sequence listing complying with ST.26 will be taken into account when searching the application.

### **2.12 Lack of unity**

When the claims of the international application do not relate to one invention only, or to a group of inventions so linked as to form a single general inventive concept, the applicant will normally be invited to pay additional search fees. If the applicant does not pay any additional search fees in response to the invitation, the international search will normally be restricted to those parts that relate to the invention, or so linked group of inventions, first mentioned in the claims. If additional fees have been paid within the prescribed time limit, those parts that relate to the inventions covered thereby are also searched (see also B-VII).

*Art. 17(3)(a)*  
*GL/ISPE 15.24*

### **2.13 Technological background**

Section B-III, 3.13 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 15.30*

## Chapter IV – Search procedure and strategy

### 1. Analysis of the application prior to searching

#### 1.1 Taking into account results of an earlier search and classification

Applicants may request the ISA to take any earlier searches into account, including searches not carried out by the EPO.

*Rule 4.12, 12bis,  
Rule 23bis.1, 41.1*

Where priority is claimed from an earlier application for which the EPO carried out the search, the search results for the earlier application will be taken into account by the EPO as ISA irrespective of whether the applicant expressly requests this in the PCT request form (i.e. the continuation section of Box No. VII "Use of earlier search and classification results" does not need to be filled in). Depending on the extent to which the EPO benefits from that earlier search, the search fee paid will be refunded (see A-III, 9.2).

*Rule 4.12, 12bis,  
Rule 16.3, 41.1  
OJ EPO 2009, 99*

*OJ EPO 2025, A26*

A request to take into account an earlier search not made by the EPO has no impact on the work of the examiner, who will do an independent full-scope international search. However, the documents cited in the earlier search report (which will be available in the file) might be useful. No refund is made for an earlier search that was not carried out by the EPO itself.

For international applications filed on or after 1 July 2017, in carrying out the international search, the EPO as ISA may take earlier search results into account where the applicant makes a request to that effect under Rule 4.12 as well as in the cases envisaged under Rule 41.2. This means that the EPO as ISA will also be able to take earlier search and classification results into account where the international application claims the priority of one or more earlier applications in respect of which an earlier search has been carried out by the EPO, or where the RO has transmitted to the EPO as ISA a copy of the results of any earlier search or of any earlier classification under Rule 23bis.2(a) or (b), or where such a copy is available to the EPO as ISA in a form and manner acceptable to it.

*Rule 23bis.2 and 41.2*

#### 1.2 PCT Direct applications

Under PCT Direct, an applicant filing an international application claiming priority from an earlier national, European or international application already searched by the EPO (i.e. a "doublure"; see B-IV, 1.1) is able to react to any objections raised in the search opinion drawn up for the priority application. This simplifies the assessment of the international application and adds to the value of the international search report and written opinion established by the EPO.

*OJ EPO 2017, A21*

##### 1.2.1 Requests for PCT Direct

Applicants may request to have their international application processed under PCT Direct by filing a letter ("PCT Direct letter") containing informal comments aimed at overcoming objections raised in the search opinion established by the EPO for the priority application. Such informal comments are to be understood as arguments regarding the patentability of the claims of the international application and also possibly as explanations regarding

any modifications to the application documents, in particular to the claims, in comparison with the earlier application. PCT Direct letters do not form part of the international application.

Upon receipt of a PCT Direct letter, the international application will be processed under PCT Direct only where the following two requirements are met:

- (a) the informal comments are filed together with the international application with the receiving Office in the form specified in A-IV, 1.2, and
- (b) the international application claims priority of an earlier application searched by the EPO (European, national or international first filing).

### **1.2.2 Processing of PCT Direct letters**

PCT Direct letters filed with the receiving Office will be transmitted to the EPO as International Searching Authority and to the International Bureau of WIPO together with the search copy and record copy, respectively.

At the EPO as International Searching Authority, the examiner performing the international search will take informal comments filed under PCT Direct into account when preparing the international search report and written opinion, provided that they meet the requirements (a) and (b) listed in B-IV, 1.2.1 and that they are in the form specified in A-IV, 1.2.

The written opinion will reflect this by acknowledging the PCT Direct letter and addressing its content insofar as it is relevant to the international search procedure. The examiner, however, may make explicit reference to the earlier search opinion only if it is annexed to the PCT Direct letter.

In accordance with the PCT provisions on file inspection, PCT Direct letters will be available to the public on WIPO's PATENTSCOPE.

### **1.3 Third-party observations**

For general information on third-party observations in the PCT phase, see E-II.

If the formalities officer forwards third-party observations to the examiner before a final report (ISR, SISR or IPER) is established, the examiner should consider them in the same way as in the European procedure (see EPC Guidelines E-VI, 3). However, given that under the PCT third-party observations should refer to novelty or inventive step only, their relevance will in most cases depend on the relevance of the prior-art documents in support of them. Any document(s) provided to the examiner with the observations will either have been received from the IB or obtained by the formalities officer.

Third-party observations will normally not reach the examiner at the international search stage if the ISR is established and received by the IB on time, namely before publication of the application. However, this may happen when the international search is performed after an A2 publication.

If the third-party observations are relevant, the documents will be cited in the ISR and in section V of the WO-ISA. The examiner will take the third-party observations and the applicant's comments, if present, into account when drafting the WO-ISA.

*GL/ISPE 15.68*

If the third-party observations are not relevant or not sufficiently understandable, the documents will not be included in the ISR. The examiner will insert a comment in section V of the WO-ISA indicating that the third-party observations have been taken into account and found not to be relevant or that the third-party observations could not be taken into account, together with the reasons.

#### **1.4 Documents cited in the application**

See ISPE Guidelines 15.37.

### **2. Search strategy**

#### **2.1 Subject of the search; restrictions**

See ISPE Guidelines 15.41.

#### **2.2 Formulating a search strategy**

Section B-IV, 2.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 15.47*

#### **2.3 Carrying out the search; types of documents**

Section B-IV, 2.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 15.52*

#### **2.4 Reformulation of the subject of the search**

Section B-IV, 2.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 15.53*

#### **2.5 Closest prior art and its effects on the search**

Paragraphs 1 to 3 of section B-IV, 2.5 in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

See also ISPE Guidelines 15.60.

#### **2.6 End of search**

Section B-IV, 2.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 15.61*

### **3. Procedure after searching**

#### **3.1 Preparation of the search report**

Section B-IV, 3.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*Art. 18*

*Rule 43.5*

*GL/ISPE 15.67, 15.69*

*and 15.72*

*OJ EPO 2017, A106*

An information sheet regarding the search strategy is systematically annexed to all international search reports, including partial search reports. If the application lacks unity of invention, the data contained in this sheet will only concern the invention(s) for which the search fee(s) has (have)

been paid. The information sheet will contain certain details about the databases in which the examiner conducted the prior-art search, the classification symbols defining the extent of the search, and the keywords selected by the examiner or any other element relating to the invention to be searched and used to retrieve the relevant prior art. Upon publication of the international search report, the information sheet will be made available to the public via file inspection on WIPO's PATENTSCOPE and in the European Patent Register.

### **3.2 Amended international search report**

It might happen that there was an error in the international search report and the applicant requests correction of that error. In such a case the examiner should consider issuing a corrected ISR (and possibly WO-ISA).

Further reasons for amending the international search report are indicated in ISPE Guidelines 15.74.

## Chapter V – Preclassification and IPC classification of international patent applications

### 1. Definitions

Section B-V, 1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 2. Preclassification (for file routing and distribution)

Section B-V, 2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 2.1 Incorrect preclassification

Section B-V, 2.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 3. IPC classification of the application

Section B-V, 3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 43.3  
GL/ISPE 7.02-7.04  
GL/ISPE 15.39

#### 3.1 Amended classification of late-published search reports

See ISPE Guidelines 7.05.

#### 3.2 IPC classification when the scope of the invention is not clear

Section B-V, 3.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 7.06, 7.08

#### 3.3 IPC classification in cases of a lack of unity of invention

Section B-V, 3.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 7.07

#### 3.4 Verification of the IPC classification

Section B-V, 3.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## Chapter VI – The state of the art at the search stage

### 1. General

The general considerations relating to the state of the art with regard to the determination of novelty and inventive step are set out in G-IV.

### 2. State of the art – oral disclosure, etc.

According to Rule 33.1(a), relevant prior art consists of everything which has been made available to the public anywhere in the world by any means, thus including oral disclosure, use, exhibition and other non-written disclosures.

*Rule 33.1(a), (b)*

*GL/ISPE 11.22, 15.05*

Where a non-written disclosure occurs and both the non-written disclosure and a written account of it are publicly available before the relevant date as defined in Rule 64.1(b), the examiner will cite the written account in the search report and give the date of the written disclosure on the search report. In this case, the written disclosure constitutes the prior art.

*Rule 64.1(b), 33.1(c)*

If the written disclosure was made available to the public on or after the filing date of the international application concerned but the non-written disclosure was made available to the public prior to that date, the non-written disclosure constitutes the prior art and should be mentioned by indicating its kind and the date on which it occurred in public. The written disclosure will also be cited in the international search report along with the date on which it was made available to the public.

*Rule 64.2, 70.9*

### 3. Priority

Section B-VI, 3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*GL/ISPE 11.02-11.03*

### 4. Conflicting applications

#### 4.1 Potentially conflicting European and international applications

Generally, where the international search is concluded less than eighteen months after the international filing date of the application, it will not be possible at the time of the search to make a complete search for potentially conflicting European and international applications. This search therefore has to be completed during the mandatory top-up search if a demand under Chapter II PCT has been made (see C-IV, 5) or alternatively at the examination stage by the Examining Division if the application enters the European phase before the EPO (see EPC Guidelines C-IV, 7.1).

#### 4.2 National prior rights

Section B-VI, 4.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## **5. Date of reference for documents cited in the search report; filing and priority date**

### **5.1 Verification of claimed priority date(s)**

Section B-VI, 5.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 11.02-11.03.

### **5.2 Intermediate documents**

Section B-VI, 5.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **5.3 Doubts as to the validity of the priority claim; extension of the search**

Section B-VI, 5.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 11.06.

### **5.4 Documents published after the filing date**

Section B-VI, 5.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 11.11.

### **5.5 Non-prejudicial disclosures**

Potentially non-prejudicial disclosures should be cited in the international search report. Whether the disclosure falls within Art. 55(1)(a) or (b) EPC will be investigated by the Examining Division after the application has validly entered the European phase.

See also ISPE Guidelines 16.76.

### **5.6 Matters of doubt in the state of the art**

Section B-VI, 5.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 11.23 and 15.64-15.65.

## **6. Contents of prior-art disclosures**

### **6.1 General remark**

Section B-VI, 6.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **6.2 Citation of documents corresponding to documents not available or not published in one of the official EPO languages**

Section B-VI, 6.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

*Rule 51bis.1(a)(v)*  
*Art. 55 EPC*

**6.3 Conflict between abstract and source document**

Section B-VI, 6.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**6.4 Insufficient prior-art disclosures**

Section B-VI, 6.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**6.5 Incorrect compound records in online databases**

Section B-VI, 6.5 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**7. Internet disclosures – technical journals**

Section B-VI, 7 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 11.13.

## Chapter VII – Unity of invention

### 1. General remarks

Unity is assessed in the same way in the PCT and European procedures. However, the consequences of a finding of lack of unity at the search and/or examination stages are different under the PCT, as are the actions to be taken by the examiner. In particular, the applicant may be asked to pay additional search and/or examination fees and may do so under protest (see B-VII, 2; B-VII, 3; B-VII, 7; C-V, 2; C-V, 3 and C-V, 5).

The PCT does not provide for the possibility of filing a divisional application. However, once the international application has validly entered the European phase, it is possible to file divisional applications with the EPO as long as the application is pending (see EPC Guidelines A-XII, 4.3).

### 2. Lack of unity at the search stage

If the lack of unity finding is raised at the search stage, a search is conducted for the invention first mentioned in the claims and the applicant is invited to pay additional search fees with Form PCT/ISA/206 (hereafter referred to as "Form 206"). The applicant can then decide to:

*Art. 17(3)(a)*  
*Rule 13, 40.1*  
*GL/SPE 10*

- (i) not pay any additional fees,
- (ii) pay some or all fees without protest or
- (iii) pay some or all fees under protest.

At the same time as completing Form 206, the examiner completes the provisional opinion accompanying the partial search results (EPO Form 1707) for the searched first invention. Form 206 and EPO Form 1707 are sent together to the applicant. The examiner must give a complete and self-contained reasoning for the lack of unity in EPO Form 1707.

*OJ EPO 2017, A20*

Where the EPO acting as ISA finds an international application to be non-unitary, and where that international application claims more than one priority which has been searched by the EPO, the applicant is invited to pay additional fees even if all inventions were searched in the earlier applications. The amount refunded will be decided for each invention separately.

However, where the international application claims one priority only and the EPO has issued an opinion for said priority document, the following applies: the applicant is not invited to pay additional search fees for inventions that have been searched in the priority application and qualify for a full refund. All these inventions must be dealt with in the search report and written opinion. By contrast, the applicant is invited to pay additional search fees for all other inventions that do not qualify for a full refund. When no written opinion is issued for the priority application, the applicant is invited to pay additional search fees.

*OJ EPO 2025, A26*

### 3. No request for payment of additional search fees

Exceptionally it might be chosen not to request the applicant to pay additional search fees, even if an objection as to lack of unity occurs. This could be the case when the additional search effort for the other invention(s) is minor. In addition, no invitation to pay additional search fees should be issued when the other inventions are either not novel or do not possess an inventive step over the prior art at hand. However, it must be borne in mind that the written opinion under Chapter I must be written for all inventions that were searched, including those for which no additional search fees were requested. If additional search fees are not requested, for consistency reasons the examiner should not ask for additional examination fees should a demand for international preliminary examination under Chapter II be filed (see C-V, 3.3). Thus, when deciding on whether to ask for additional search fees, the examination effort for the whole procedure must also be taken into account.

If an objection of lack of unity has been raised but it was exceptionally chosen not to request the applicant to pay additional search fees, the ISR is issued for all inventions, indicating that the application lacks unity and listing the different groups of inventions. The WO-ISA is completed for all searched inventions. In Section IV of the WO-ISA, the examiner indicates that the requirement of unity is not fulfilled and that all claims have been searched and examined and provides full reasons on the separate sheet.

### 4. Cascading non-unity

If an international application is found to lack unity at the search stage, the invention first mentioned in the claims will be searched and the applicant is invited to pay additional search fees for the other invention(s) (see B.VII, 2).

If the applicant pays additional search fees for any of the other inventions, a search is carried out for those inventions.

If this further search reveals that one or more of these inventions also lack unity "*a posteriori*", only the first invention in each group of inventions is searched. The applicant will not be invited to pay another set of search fees at this stage of the proceedings.

An "*a priori*" non-unity objection cannot be raised at this stage, and the "*a posteriori*" non-unity objection should not be raised in borderline cases.

The WO-ISA will be drafted for all the searched inventions. Section III must be modified to cover the inventions actually searched. Under Section IV, full reasons must be given for all the non-unity objections raised. Under Section V an opinion as to novelty, inventive step and industrial applicability must be given for all searched inventions.

Claims not searched during the international phase can be prosecuted during the regional phase before the EPO in accordance with EPC Guidelines F-V, 7.1, as appropriate.

**Example**

A lack of unity objection is raised by the EPO acting as ISA, identifying four different inventions A, B, C and D. The first invention A is searched and the applicant is invited to pay further search fees for inventions B, C and D.

The applicant pays two further search fees for inventions B and C. During the additional search, B is found to lack unity "a posteriori" and is divided into the groups of inventions B1, B2 and B3.

In this case only B1 and C are searched, so in Section III of the WO-ISA the claims relating to inventions B2, B3 and D are indicated as not searched. In Section IV, full reasons must be given for why the claims of the application were divided into A, B, C and D and why B was further subdivided into B1, B2 and B3. Under Section V an opinion on patentability must be given for A, B1 and C.

Examination of the application in the European phase will be based on either A, B1 or C (see EPC Guidelines F-V, 7.1(iii)). For the claims relating to inventions B2, B3 and D, an invitation under Rule 164(2) EPC will be issued in accordance with EPC Guidelines F-V, 7.1(iv).

**5. Documents relevant only to other inventions**

The provisions of section B-VII, 1.3 in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

**6. Reply from the applicant to the invitation to pay additional search fees****6.1 No payment of additional search fees**

If, after an invitation to pay additional search fees, the applicant does not do so, the file will not be returned to the examiner, but the final search report and the WO-ISA, which were already prepared by the examiner at the initial search stage, will be sent out by the formalities officer.

If a demand for international preliminary examination selecting the EPO as IPEA has been filed, the EPO as IPEA will not perform the international preliminary examination in respect of any claims relating to an invention for which no additional search fee was paid and, therefore, for which no ISR was established (see C-V, 2).

During the European phase, the applicant may still pursue claimed inventions which were not searched in the international phase upon invitation to pay search fees by the examining division (see EPC Guidelines C-III, 3.2).

**6.2 Payment of additional search fees without protest**

If, after an invitation to pay additional search fees, the applicant has paid additional search fees without protest, a complete search will be carried out for the inventions for which search fees have been paid and the ISR will be issued for these inventions. The WO-ISA will be drafted for the claims for

which search fees have been paid. Section IV is to be filled out, and Section III must be modified to the actual payment of fees.

### **6.3 Payment of additional search fees under protest**

*Rule 40.2(c)*

*GL/SPE 10.66-10.69*

In reply to Form 206, applicants may pay some or all of the additional fees under protest. If they do so, then this triggers the protest procedure for determining whether the request for payment of the additional fees was justified (see also B-VII, 7).

If the applicant has paid additional search fees under protest and the Review Panel decided that the protest was fully or partly justified, the examiner will follow the decision of the Review Panel and will proceed to establish the ISR and WO-ISA for the inventions for which search fees have been paid. In the ISR the examiner will adapt the number of inventions and their definitions as well as the non-unity reasoning to be consistent with the decision of the review panel. In the WO-ISA, Section IV and the reasoning will be adapted to the decision of the Review Panel. Section III of the WO-ISA will be modified to the actual payment of fees. Under Section V an opinion as to novelty, inventive step and industrial applicability for all searched inventions will be given.

In the special situation where the protest was fully justified and where, as a consequence, the application is considered unitary, the examiner will follow the decision of the Review Panel and issue a final ISR with no indication of non-unity. In Section IV of the WO-ISA the examiner will indicate that the requirement of unity of invention is complied with and that the search report has been established in respect of all parts of the application; no reasons need to be given on the separate sheet. Under Section V, an opinion as to novelty, inventive step and industrial applicability for all claims will be given.

If the applicant has paid additional search fees under protest and the Review Panel decided that the protest was not justified, the examiner will follow the decision of the Review Panel and proceed to establish the ISR and WO-ISA for the inventions for which search fees have been paid. In the ISR and the WO-ISA (Section IV) the examiner will indicate that the requirement of unity is not complied with. Section III will be modified to the actual payment of fees, and under Section V an opinion as to novelty, inventive step and industrial applicability for all searched inventions will be given.

The final ISR and WO-ISA will be sent out together with the decision on protest (Form PCT/ISA/212) in order to ensure that both are consistent.

See also below B-VII, 7, for the protest procedure and the work of the Review Panel.

## **7. Protest procedure**

The procedure consists of a review within the ISA first by the formalities officer in charge of the file and then by a Review Panel.

**7.1 Admissibility of the protest as checked by the formalities officer**

Before initiating the protest procedure the formal admissibility of the protest in the sense of Rule 40.2(c) (Chapter I) must be checked.

*Rule 40.2(c) and 40.2(e)*

To be admissible the protest should satisfy the following requirements:

*GL/ISPE 10.66-10.67 and 10.69*

- (a) The applicant must have paid the prescribed protest fee (Rule 40.2(e)), and
- (b) The payment under protest must be accompanied by a reasoned statement, i.e. the reasoned statement should have been filed with the payment or at the latest within the time limit set in Form 206.

The reasoned statement must comply with Rule 40.2(c); i.e. applicants should argue why the international application complies with the requirement of unity of invention or why the amount of the required additional fee is excessive. In the protest applicants should question the number of additional fees that they have been invited to pay, and not the amount of a single additional fee.

The payment of the protest fee and the filing of a purported reasoned statement are assessed by specially trained formalities officers. If the formalities officer finds any deficiencies, the applicant is informed of them by way of Form 212 or Form 224. Any substantive analysis is made by the Review Panel when assessing the justification of the protest (see B-VII, 7.2). If the applicant merely submits a statement of disagreement without reasoning, the Review Panel will refer to the reasoning contained in the invitation to pay additional search fees (Form 206) when taking its decision.

**7.2 The work of the Review Panel**

If the applicant pays the additional fees under protest and the protest is found admissible, the case is referred to the director to appoint a three-member Review Panel, which comprises the examiner in charge, an examiner as chairperson of the Review Panel and a further examiner. This Review Panel will, in case of entry into the European phase, constitute the Examining Division. The names of the members of the Review Panel are made public on Form 212.

*GL/ISPE 10.68  
OJ EPO 2015, A59  
OJ EPO 2010, 322*

The Review Panel is appointed from the moment that the protest is found admissible. Its purpose is to determine, on the basis of the protest, whether the request for payment of additional fees by the examiner was justified on the basis of the reasoning given (see W 11/93). The review does not allow a re-evaluation to determine possible additional grounds for lack of unity (see W 9/07, Reasons 2.8).

The scope of the review is limited to those inventions for which additional fees have been paid. If the applicant's reasoning is not related to those inventions, the Review Panel will come to the conclusion that the protest is not or is only partially justified, depending on the case.

*GL/ISPE 10.70*

If the Review Panel determines that the protest is wholly justified, it will inform the applicant with Form 212 (Decision on Protest Chapter I). This also applies if the Review Panel's finding results in the application not lacking unity. It is not necessary to give any reasons unless the Review Panel decides that such reasoning would be beneficial. Furthermore, the Review Panel will order the reimbursement of all the additional fees and the protest fee. The search will be carried out and the written opinion established for the inventions for which the fees are paid (see B-VII, 6.3).

If the Review Panel considers that the protest is not justified at all, it will communicate this to the applicant using Form 212. Reasoning must be given, indicating why the request for payment of additional fees is upheld and addressing the applicant's relevant arguments. The search will be carried out and the written opinion established for the inventions for which the fees are paid (see B-VII, 6.3).

If the Review Panel considers that the protest is only partially justified, it will communicate this to the applicant using Form 212. Reasoning must be given, indicating why the request for payment of additional fees is partially upheld and addressing the applicant's relevant arguments. The search will be carried out and the written opinion established for the inventions for which the fees are paid (see B-VII, 6.3). The Review Panel will order the reimbursement of the corresponding additional fees but not the protest fee.

The formalities officer will send the decision of the Review Panel to the applicant and the IB. The decision on protest (Form 212) will be sent out together with the final ISR and WO-ISA in order to ensure that both are consistent.

After an invitation to pay additional search fees, the applicant may pay all of the additional fees under protest. If the Review Panel confirms the initial finding of lack of unity by finding the protest not justified, and if the application enters the European phase with unamended claims, the Examining Division will, as a rule, confirm the lack of unity and request the applicant to limit the claims to one invention and to file (a) divisional application(s) for the other invention(s). Alternatively, the applicant may amend the claims to render them unitary.

See also EPC Guidelines C-III, 3.4.

**8. Lack of unity and incomplete search**

The procedures for dealing with cases which lack unity and where in addition a meaningful search is not possible are dealt with in B-VIII, 3.6.

*Rule 13*

*Art. 17(2)(a)(ii)*

*Art. 17(3)(a)*

## Chapter VIII – Subject-matter to be excluded from the search

### 1. General remarks

The aim of the EPO as ISA is to issue international search reports which are as complete as possible. Nevertheless, there are situations in which the search report and the written opinion cover only part of the subject-matter claimed, or in which no search report is issued. This may be either because the international application includes subject-matter which the ISA is not required to deal with (see B-VIII, 2), or because of missing sequence listings (see B-VIII, 3.2), or because of lack of non-unity of invention (see B-VII, 2), or else because the description, claims or drawings fail to meet a requirement, such as clarity or support of the claims by the description, to such an extent that no meaningful search can be made of all or some of the claims (see B-VIII, 3). Applications of the latter kind are often referred to as "complex applications".

*GL/ISPE 9.01*

In particular, "complex applications" are dealt with in accordance with the present Guidelines and the ISPE Guidelines supplemented, where appropriate, by the EPO's practice as set out in the EPC Guidelines.

In principle, a declaration of no search under Art. 17(2)(a)(ii) should remain an exception. Under the PCT, even if the applicant amends the claims to overcome the objection, an additional search is not possible. When a declaration of no search is issued, the search must be performed at the examination stage without requesting an additional fee if the international application enters the European phase before the EPO and if the objection leading to the declaration has been overcome (see EPC Guidelines C-IV, 7.3). Therefore, at least some effort should be made to carry out a meaningful search of at least part of the claimed subject-matter.

*Art. 17(2)(a)(ii)*  
*GL/ISPE 9.40*

### 2. Subject-matter which the ISA is not required to search and examine

Art. 17(2)(a)(i) and Art. 34(4)(a)(i) together with Rule 39 and 67.1 are the equivalents of Art. 52(2), (3) and 53(b), (c) EPC concerning the exclusion from patentability of non-technical inventions, programs for computers, methods of doing business, medical methods and the exception to patentability for plant or animal varieties or essentially biological processes for the production of plants and animals, respectively. Since the PCT procedure does not lead to a grant, subject-matter which would be excluded from patentability under the EPC is identified as subject-matter for which the ISA and/or the IPEA is not required to carry out search and international preliminary examination (see B-VIII, 1 and B-VIII, 3). This includes, for example, use of an apparatus in methods of treatment or diagnosis performed on the human or animal body.

*Art. 17(2)(a)(i)*  
*Art. 34(4)(a)(i)*  
*Rule 39*  
*Rule 67.1*  
*GL/ISPE 9.02-9.15*  
*Agreement*  
*EPO-WIPO, Art. 4,*  
*Annex C*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*OJ EPO 2020, A35*  
*OJ EPO 2023, A37*

The criteria applied for the decision not to perform an international search are the same as for the European procedure. This means that the discretion of an ISA not to search subject-matter set forth in Rule 39.1 is exercised by the EPO as ISA only to the extent that such subject-matter is not searched under the provisions of the EPC.

For subject-matter which the ISA is not required to search under Art. 17(2)(a)(i) and where, as a consequence, an incomplete search report will be issued, the restriction should always be indicated both in the search report and in the WO-ISA.

*GL/ISPE 9.40*

Where the subject-matter of all claims constitutes a subject excluded from the search, a declaration of non-establishment of the international search report is issued pursuant to Article 17(2)(a) on Form PCT/ISA/203, indicating the reasons. A written opinion is established, even though, in the absence of a search, it cannot address the questions of novelty and inventive step and may not be able to address other questions, such as that of industrial applicability. The written opinion should contain full reasoning as to why the search is not possible.

### **2.1 Methods for treatment of the human or animal body by surgery or therapy and diagnostic methods practised on the human or animal body**

*Rule 39.1(iv)*

*GL/ISPE 9.08-9.10*

Claims directed to medical treatment which would fall under the exceptions to patentability under Art. 53(c) EPC should, in principle, also be exempted from international search.

Yet the EPO as ISA applies the same practice as for European applications, and the examiner will explain so in the WO-ISA.

In the table below, several types of claim involving a composition A or substance X in methods of treatment or diagnosis (hereinafter referred to as medical treatment) are listed. Depending on the situation, some of these could be patentable in an EP application (see also EPC Guidelines G-VI, 6.1).

	Claim wording	Excluded from patentability according to Art. 53(c) EPC
a	compound X for use as a medicament	NO
b	compound X for use in treating disease Y	NO
c	composition A containing X for use in treating disease Y (composition A may be generally defined)	NO
d	medicament containing compound X	NO
e	use of X in a composition A for the treatment of disease Y	YES
f	use of X as a medicament for the treatment of disease Y	YES

	Claim wording	Excluded from patentability according to Art. 53(c) EPC
g	use of X for the treatment of disease Y	YES
h	use of X for preparing a medicament	NO
i	use of X for the manufacture of a medicament for treating disease Y	NO
j	process for the preparation of a medicament for treating disease Y using compound X as an active ingredient	NO
k	method of treatment of disease Y using X	YES

For claims of type (a), (b) or (c), the examiner will search and examine the claims and assess the novelty and inventive step of the indicated uses, as is the case for an EP application. In the WO-ISA, a remark will be added that novelty and inventive step have been assessed according to EPO practice. The reason for adding this remark is that under Art. 54(4) and (5) EPC it is possible to obtain patent protection for any substance or composition comprised in the state of the art, for any use or specific use, respectively, in a (medical) method referred to in Art. 53(c) EPC, provided that such use is not comprised in the state of the art. Claims seeking this kind of protection may be drafted as "Substance X for use as a medicament/for use in therapy" or "Substance X for use in the treatment of disease Y", respectively (see also EPC Guidelines G-VI, 6.1).

For claims of type (d) or (h), the examiner will search and examine the claims and assess the novelty and inventive step thereof, as is the case for an EP application. In the WO-ISA, a remark will be added that novelty and inventive step have been assessed according to EPO practice.

For claims of type (i) or (j), the examiner will search and examine the claims and assess the novelty and inventive step of the indicated uses. In the WO-ISA, a remark regarding EPO practice with regard to such claims will be added.

For claims of type (e), (f), (g) or (k), in the vast majority of cases, a search report is established on the basis of the alleged effects of the product/composition, because their subject-matter can readily and in a straightforward manner be understood in terms of these effects. For reasons of efficiency an opinion on novelty, inventive step and industrial applicability will be given for (at least) the independent claims, as far as relating to the alleged effects of the compound/composition, as would be done for an EP application. A reservation concerning patentability will be added, indicating that at the EPO claims directed to a method of treatment or the use of a composition in a treatment are exempted from patentability,

*Rule 33.3(b)*

but that a claim directed to a composition or substance for such use would be admissible.

In some cases, no search report can be established for claims of type (e), (f), (g) or (k), because their subject-matter cannot readily and in a straightforward manner be understood in terms of the alleged effects of the compound/composition. For these claims, no assessment under Art. 33(1), i.e. novelty, inventive step and industrial applicability, will be carried out.

## **2.2 Subject-matter according to Rule 39.1(i), (iii), (v) and (vi)**

Section B-VIII, 2.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

The EPO applies options A9.07[2] and A9.15[2] of the Appendix to Chapter 9 of the ISPE Guidelines.

*Rule 39.1(iii)*  
*OJ EPO 2007, 592*

In particular, the EPO as ISA will not carry out an international search on an application to the extent that its subject-matter relates to no more than a method of doing business, in the absence of any apparent technical character.

Nevertheless, if the claimed subject-matter involves technical means, the EPO as ISA will consider the application and to the extent possible provide a search report for those parts of it which are more than mere business methods. However, to the extent that the technical means involved were widely available to everyone at the filing date, no documentary evidence is considered required because they are common knowledge, and no document will be cited in the ISR. Instead, a statement will be added that these technical means are considered so commonplace that no citation is considered necessary.

### **2.2.1 Computer -implemented business methods**

Section B-VIII, 2.2.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis* (see also B-VIII, 2.2).

## **3. No meaningful search possible**

The meaning of the word "meaningful" in the context of Art. 17(2)(a)(ii) is essentially a matter for the examiner to decide. The examiner's finding may change in the light of any reply from the applicant to the invitation for informal clarification, if available (see B-VIII, 3.3 and 3.4). The exercise of the examiner's discretion will depend upon the facts of the case.

*GL/ISPE 9.01*  
*Art. 17(2)(a)*  
*PCT Newsletter*  
*10/2007, 7*  
*Art. 17(2)(b)*

The term "meaningful search" in Article 17(2)(a)(ii) should be read to include a search that within reason is complete enough to determine whether the claimed invention complies with the substantive requirements, that is, the novelty, inventive step, and industrial applicability requirements, and/or the sufficiency, support and clarity requirements of Articles 5 and 6. Accordingly, a finding of "no meaningful search" should be limited to exceptional situations in which no search at all is possible for a particular claim, for example where the description, the claims or the drawings are totally unclear. If all claims are found unsearchable, the EPO as ISA will establish a "Declaration of Non-Establishment of International Search

Report" instead of an International Search Report and give reasons for the decision in that declaration and in the WO-ISA. To the extent that the description, the claims or the drawings can be sufficiently understood, even though parts of the application are not in compliance with the prescribed requirements, a search should be performed recognising that the non-compliance may have to be taken into account for determining the extent of the search. If only certain claims are found unsearchable, an ISR and a WO-ISA will be established in respect of the other claims. In that case the international search will be incomplete.

As there is no legal provision providing that an applicant must formulate the application in such a way as to make an economical search possible, "reasons of economy" cannot be used as a reason, or part of a reason, for issuing an incomplete search report.

### **3.1 Examples of impossibility to perform a meaningful search over the whole of the claimed scope**

A number of non-limiting examples will illustrate where a restriction of the search may find application:

- (i) claims lacking support; insufficient disclosure

*Art. 5 and 6*

One example would be a claim so broadly formulated that at least part of its scope is speculative, i.e. not supported by the disclosure of the application. In this case the broadness of the claim is such as to render a meaningful search over the whole of the claim impossible, and a meaningful search can be performed only on the basis of the narrower, disclosed invention, for example only on the basis of that part of the claim which is supported. In extreme cases, this may mean a search directed to only one or more of the specific examples disclosed in the description. The examiner should bear in mind that the requirements under Art. 5 and 6 concerning sufficiency of disclosure and support should be seen from the perspective of the person skilled in the art.

- (ii) claims lacking conciseness

An example would be where there are so many claims, or so many possibilities within a claim, that it becomes unduly burdensome to determine the matter for which protection is sought (for the case of multiple independent claims in the same category see B-VIII, 4). A complete search (or any search at all) may de facto be impossible.

*Art. 6  
Rule 6.1(a)  
GL/ISPE 9.25 and  
9.30*

It is noted that the EPO allows multiple dependent claims, provided that they do not detract from the clarity of the claims as a whole and that the arrangement of claims does not create obscurity in the definition of the subject-matter to be protected (see also F-IV, 3.4). In case of unclarity, it may be appropriate for the examiner to first invite the applicant for informal clarification before the search is carried out (see B-VIII, 3.3-3.6).

*Rule 6.4(a)  
GL/ISPE 9.41*

## (iii) claims lacking clarity

*GL/ISPE 9.22*

An example would be where the applicant's choice of parameter to define the invention renders a meaningful comparison with the prior art impossible, perhaps because the prior art has not employed the same parameter, or has employed no parameter at all. In such a case, the parameter chosen by the applicant may lack clarity (see Art. 6; cf. F-IV, 4.11). It may be that the lack of clarity of the parameter is such as to render a meaningful search of the claims or of a claim or of a part of a claim impossible, because the choice of parameter renders a sensible comparison of the claimed invention with the prior art impossible. If so, the search may possibly be restricted to the worked examples, as far as they can be understood, or to the way in which the desired parameter is obtained.

In all examples listed above, the examiner may where appropriate informally invite the applicant to provide clarification of the claimed subject-matter (see B-VIII, 3.3).

See ISPE Guidelines 9.01 and 9.19-9.30 for further information.

**3.2 Nucleotide and amino acid sequences**

*Rule 5.2, 13ter.1*  
*OJ EPO 2011, 372*  
*OJ EPO 2025, A64*  
*OJ EPO 2021, A97*  
*OJ EPO 2022, A60*  
*OJ EPO 2024, A54,*  
*OJ EPO 2024, A55*  
*GL/ISPE 9.39*  
*GL/ISPE 15.14A*

If the sequence listing of an international application is not available or does not comply with WIPO Standard ST.26 (see Annex C to the Administrative Instructions, paragraph 4), the EPO as ISA will invite the applicant to furnish a sequence listing complying with the standard or a translation in the form of a new sequence listing in a language acceptable to it, as the case may be, and pay a late furnishing fee, and to perform these steps within a non-extendable time limit of one month from the date of the invitation.

If, within the time limit set, the applicant has not submitted an ST.26-compliant sequence listing and paid the late furnishing fee, the EPO as ISA will carry out the international search without the sequence listing to the extent that a meaningful search can be carried out.

The examiner when performing the search will either:

- (i) issue a declaration under Art. 17(2)(a)(ii) and Rule 13ter.1(d) that no meaningful search on any claimed subject-matter is possible due to the failure of the applicant to comply with Rule 5.2 (no sequence listing) and/or Rule 13ter.1(a) (no computer-readable sequence listing);

or

- (ii) issue an incomplete search report with a declaration under Art. 17(2)(b) and Rule 13ter.1(d) that a meaningful search is not possible in respect of certain claimed subject-matter due to the failure to comply with Rule 5.2 (no sequence listing) and/or Rule 13ter.1(a) (no computer-readable sequence listing).

This also has consequences for the international preliminary examination procedure before the EPO as IPEA (see C-VIII, 2.1).

### 3.3 Informal clarification

Where the description, claims or drawings fail to comply with a requirement, such as clarity or support of the claims by the description, to such an extent that no meaningful search can be made, the examiner, before taking a decision under Article 17(2)(a)(ii) PCT, may informally contact the applicant in accordance with paragraphs GL/ISPE 9.34 and GL/ISPE 9.35 to clarify specific aspects of the application before the search is carried out. Such informal clarification may help the examiner to focus the search better. It is highly recommended to invite the applicant to provide such informal clarification before issuing an incomplete ISR or a declaration of no search. However, there is no legal obligation on the examiner to use it and no legal consequences in the PCT if the applicant does not respond. An incomplete search report or a declaration of no search may still be issued without prior clarification.

*GL/ISPE 9.34, 9.35  
OJ EPO 2011, 327*

Informal clarification may take the form of a telephone consultation or of a written request (Form PCT/ISA/207). In both cases the applicant can be given a short time limit (normally two weeks) to respond.

Any reference to the "applicant" in B-VIII, 3.3.1 and 3.3.2 includes any duly appointed agent.

#### 3.3.1 Informal clarification by telephone

In view of the short time limits in the PCT, a telephone consultation, for which minutes must be written, may be more appropriate. If the issues at stake can be clarified during the telephone consultation, no time limit will be given. If not, the short time limit referred to in B-VIII, 3.3 will be set. In the former case, the examiner will send the minutes of the consultation for information and will prepare the ISR and WO-ISA taking the result of the consultation into account. In the latter case, the examiner will send minutes setting the time limit, and wait for this time limit to expire before preparing the ISR and WO-ISA. They will take into consideration any on-time reply received from the applicant.

Where the applicant is registered for the EPO Mailbox service and/or PCT Link, the minutes will be sent to the Mailbox. Where the applicant is not so registered and the minutes set a time limit for reply, they are sent by regular mail and an email is also sent to the applicant to inform them accordingly. If an email address for the applicant is not available, the EPO acting as ISA may contact them by telephone to request one. Only if one is provided will an email be sent. Where the applicant is not registered for the EPO Mailbox service and/or PCT Link and the minutes do not set a time limit for reply, the minutes are sent by regular mail and no email is sent.

The EPO no longer issues urgent notifications by fax. The minutes of a telephone consultation will therefore no longer be communicated by this means.

*OJ EPO 2023, A15*

**3.3.2 Informal clarification by written request**

Alternatively, a written request for clarification can be sent. This is in particular appropriate when dealing with non-European representatives due to potential time zone differences and linguistic problems, and/or when the issue to be discussed is not suitable for a telephone consultation.

Where the applicant is registered for the EPO Mailbox service and/or PCT Link, the written request will be sent to the Mailbox. Where the applicant is not so registered, the written request is sent by regular mail and an email is also sent to the applicant to inform them accordingly. If an email address for the applicant is not available, the EPO acting as ISA may contact them by telephone to request one. Only if one is provided will an email be sent.

*OJ EPO 2023, A15*

The EPO no longer issues urgent notifications by fax. An informal written request for clarification will therefore no longer be communicated by this means.

**3.4 Reply to the invitation for informal clarification****3.4.1 Failure to reply in time or no reply**

*OJ EPO 2011, 327*

If the applicant does not reply within the set time limit to the invitation for informal clarification, the examiner will prepare the search report and WO-ISA to the extent possible without the requested clarification.

If the applicant replies after the time limit has expired, and the search report has not yet been established, the reply should be taken into account; if the search report has already been established the reply will not be taken into account.

**3.4.2 Reply in time**

If the applicant replies to the invitation for informal clarification, the examiner will prepare the search report and WO-ISA taking the reply into account.

**3.5 The content of the WO-ISA after an invitation for informal clarification and/or in case of a restriction of the search**

*Art. 17(2)(b)*

Generally, a restriction of the search will not always be indicated in the international search report. Rather the extent of the search as well as the reasons for the restriction will in many cases only be indicated in the WO-ISA, as explained below. The opinion given is normally restricted to what has actually been searched.

If after clarification a complete search can be made, the ISR will be designated as complete. Any outstanding clarity problem will be mentioned in Box VIII of the WO-ISA.

*Art. 17(2)(b)*

If only some of the claims and/or parts of the claims can be searched and it is not possible, on the basis of the description, to foresee a likely fallback position for the unsearched subject-matter, even taking any reply from the applicant into consideration, a precise indication of what has been searched with the corresponding claims, together with full reasoning why the search was restricted, are entered into both the ISR and the WO-ISA. In

addition, in the WO-ISA an opinion as to novelty, inventive step and industrial applicability of the searched subject-matter must be given.

If some claims or parts of claims cannot be searched but it is possible, on the basis of the description, to foresee a searchable fallback position, taking any possible reply from the applicant into consideration, the ISR will be filled out as for a complete search in respect of those claims. An indication which claims have been searched (in part), together with full reasoning why the search was restricted, and a precise indication of what has been searched are entered into the WO-ISA. In the ISR the cited documents will relate to the searched (or partially searched) claims only. In addition, in the WO-ISA an opinion as to novelty, inventive step and industrial applicability of the searched subject-matter must be given.

If, even taking any reply from the applicant into consideration, it is not possible to perform a search at all, a declaration of no search, together with full reasoning why, is issued instead of the ISR. The WO-ISA must contain full reasoning why the search is not possible. *Art. 17(2)(a)(iii)*

A restriction of the search due to exceptions mentioned in Rule 39 (e.g. medical treatment claims) must always be indicated in the search report. *Rule 39*

### **3.6 Combination of an incomplete search and lack of unity**

The requirements of unity of invention and the requirements of Art. 17(2)(a)(ii) are separate requirements. However, it is possible that an application both violates the requirements of clarity, disclosure, support or conciseness to such an extent that a meaningful search cannot be carried out, and lacks unity. In that case, the examiner can combine an incomplete search and a finding of non-unity. However, the applicant should not be invited to pay additional fees for subject-matter which will later not be searched under Art. 17(2)(a)(ii). Typically, a non-unity objection could be made first and then an incomplete search applied to the searched invention. In such a case the examiner may send an informal clarification request for the first invention only and include in the invitation to pay additional fees remarks on clarity problems related to further inventions. *Rule 13*  
*Art. 17(2)(a)(ii)*

However, if the complexity lies in lack of clarity, the search will be restricted first, and the non-unity objection applied to the clear parts of the claimed subject-matter.

In the case of a combination of non-unity and incomplete search:

- claims which have been partially searched will be indicated in Box IV and assigned to the relevant group of inventions listed on the separate sheet;
- claims which have not been searched at all will simply be indicated in Box III as not searched and do not need to be listed as belonging to a particular invention.

**4. Multiple independent claims per category***GL/ISPE 5.13-5.14*

Multiple independent claims in one category are per se not a reason for an incomplete search.

Generally, an opinion must be given on all searched claims. Only one independent claim in each category needs to be treated in detail; short comments would normally suffice for further independent claims.

Furthermore, if appropriate, an objection as to clarity and conciseness under Article 6 may be made under Box VIII of the WO-ISA. The EPO as ISA may exercise its discretion to ask the applicant to clarify the subject-matter to be searched, applying the same procedure as described under B-VIII, 3.3-3.4.

## Chapter IX – Search documentation

### 1. General

#### 1.1 Organisation and composition of the documentation available to the Search Divisions

Section B-IX, 1.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 1.2 Systematic access systems

Section B-IX, 1.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 2. Patent documents arranged for systematic access

#### 2.1 PCT minimum documentation

Section B-IX, 2.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*. *Rule 34.1(b)(i), (ii) and (c)*

#### 2.2 Unpublished patent applications

Since the search for conflicting applications that are not published at the time of the initial search is completed either during Chapter II in case a demand is filed or during the European phase, the documents which can be cited in the search report do not include unpublished patent applications (see B-VI, 4.1).

#### 2.3 Search reports

Section B-IX, 2.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 2.4 Patent family system

Section B-IX, 2.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 3. Non-patent literature arranged for systematic access

#### 3.1 Periodicals, records, reports, books, etc.

Section B-IX, 3.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 4. Non-patent literature arranged for library-type access

Section B-IX, 4.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## Chapter X – Search report

### 1. General

The results of the search will be recorded in an international search report. A number of different possible limitations of the scope of the search report exist. These are:

- (i) a declaration issued instead of the search report according to Art. 17(2)(a) (see B-VIII);
- (ii) an incomplete search report according to Art. 17(2)(b) (see B-VIII);
- (iii) a partial international search report due to a finding of a lack of unity according to Art. 17(3)(a) and Rule 13; and
- (iv) an incomplete search report due to missing sequence listings (see B-VIII, 3.2).

The Search Division is responsible for drawing up the international search report (see B-I, 2 and subsections).

This chapter contains the information which is necessary to enable the examiner to correctly prepare the search report.

A search report must contain no matter, in particular no expressions of opinion, reasoning, arguments or explanations, other than that required by the Form or referred to in B-X, 9.2.8. However, this does not apply to the written opinion (see B-XI, 3).

*Rule 43.9*  
*GL/ISPE 16.07*

### 2. Different types of search reports drawn up by the EPO as ISA

The EPO in its capacity as ISA will draw up the following types of search reports:

- (i) international search reports under the PCT; *Art. 16(1)*
- (ii) international-type search reports. For details, reference is made to EPC Guidelines B-II, 4.5. *Art. 15(5)*  
*GL/ISPE 2.22, 16.04*

### 3. Form and language of the search report

#### 3.1 Form

See ISPE Guidelines 16.08 and 16.09.

*Rule 43.10*

#### 3.2 Language

See ISPE Guidelines 16.11.

*Rule 43.4*

#### 3.3 Account of the search

Section B-X, 3.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**3.4 Record of search strategy***OJ EPO 2017, A106*

Since 1 November 2015, all search reports drawn up by the EPO under both the PCT and EP procedures, including partial search reports, have been automatically supplemented with an information sheet entitled "Information on Search Strategy". If the application lacks unity of invention, the data contained in this sheet only concerns the invention(s) for which the search fee(s) has (have) been paid. The information sheet is automatically generated based on the data entered by the examiner when drawing up the search report. It lists the databases in which the examiner conducted the prior-art search, the classification symbols defining the extent of the search, and the keywords selected by the examiner or any other element relating to the invention to be searched and used to retrieve the relevant prior art.

Upon publication of a search report drawn up under the PCT procedure, the information sheet will be made available to the public via file inspection on WIPO's PATENTSCOPE.

**4. Identification of the patent application and type of search report**

Section B-X, 4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**5. Classification of the patent application**

*Rule 43.3(a)*  
*GL/ISPE 16.52*

The EPO as ISA classifies the application according to the IPC and CPC.

**6. Areas of technology searched***GL/ISPE 16.53*

Section B-X, 6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**7. Title, abstract and figure(s) to be published with the abstract (as indicated on supplemental sheet A)**

*Rule 44.2*  
*GL/ISPE 16.33*

The international application must contain an abstract and a title (see also F-II, 2 and 3). If the search report is published together with the application (A1 publication), the examiner indicates on supplemental sheet A:

*Rule 8.1, Rule 38*  
*GL/ISPE 16.39-16.47*

(i) the approval or amendment of the text of the abstract, which should not exceed 150 words;

*Rule 37*  
*GL/ISPE 16.35-16.38*

(ii) the approval or amendment of the title of the invention (see also H-III, 7); and

*Rule 8.2*  
*GL/ISPE 16.48-16.51*

(iii) the figure which is to accompany the abstract. It is possible to indicate multiple figures from various sheets, but the overall size should not exceed what could fit on an A4 sheet.

*GL/ISPE 15.40*

If the application is to be published before the international search report is prepared (A2 publication, see EPC Guidelines B-X, 4), the examiner only needs to prepare the classification data. Titles, abstracts and figures are published as submitted by the applicant.

It is to be noted that first filings (i.e. applications not claiming priority from an earlier application) cannot be published as A2.

## 8. Restriction of the subject of the search

In the following cases, the international search report, the declaration issued instead of the search report under Art. 17(2)(a), or the incomplete or partial search report will indicate whether the subject of the search was restricted and which claims have or have not been searched:

*GL/ISPE 16.19*

*GL/ISPE 16.28-16.32*

- (i) lack of unity of invention (see B-VII).
- (ii) claims in respect of which no meaningful search or only an incomplete search can be carried out (see B-VIII).

*Art. 17(3)(a)*

*Rule 13*

In case (ii), the following situations may occur:

- (a) A declaration that a meaningful search has not been possible on the basis of all claims is issued instead of the search report; or
- (b) If a meaningful search has not been possible for one or more of the claims in part or in full, the claims concerned are mentioned in the incomplete search report and/or in the written opinion.

*Art. 17(2)(a)*

*Art. 17(2)(b)*

In case (a), the reasons for not carrying out the search should be indicated in the declaration.

In case (b), a limitation of the search will not always be indicated in the ISR. Rather, the extent of the search as well as the reasons for the restriction will in many cases only be indicated in the WO-ISA. See B-VIII, 3.5, for details of whether an indication under Art. 17 should be made in the ISR or only in the WO-ISA.

- (iii) missing sequence listings (see B-VIII, 3.2).

**11.6 Citation of video and/or audio media fragments available on the internet**

Section B-X, 11.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**12. Transmittal of the search report and written opinion**

The EPO forwards one copy of the search report or the declaration under Art. 17(2)(a) and of the written opinion to the IB and one copy to the applicant. Copies of all the cited documents are made available to the applicant (see EPC Guidelines B-X, 12 and B-X, 11.1), including machine translations annexed to the written opinion (when appropriate, see EPC Guidelines B-X, 9.1.3) and those documents appearing after the "&" sign

*Rule 44*  
*GL/SPE 16.86*  
*OJ EPO 2024, A68*

and designated to be copied and sent to the applicant (see EPC Guidelines B-X, 11.3).

## Chapter XI – The written opinion

### 1. The written opinion

Under Chapter I, at the same time as establishing the search report the search examiner must establish the written opinion of the ISA (WO-ISA) to be sent to the applicant together with the search report. The WO-ISA gives a preliminary and non-binding opinion on whether the claimed invention appears to be novel, to involve an inventive step and to be industrially applicable. When appropriate, an opinion will also be given on added subject-matter, unity, insufficient disclosure and clarity or support issues, as well as formal defects.

*Rule 43bis*  
*GL/ISPE 17*

The findings of the written opinion must be consistent with the document categories assigned in the search report and must also be consistent with any other issues raised in the search report, such as lack of unity of invention or limitation of the search.

If there are no defects in the application, the WO-ISA will state the reasons why the application is considered to fulfil the requirements of novelty, inventive step and industrial applicability.

The written opinion (and any informal comments filed by the applicant) will be made available to the public by the IB at the same time as the international publication.

*Art. 21(3)*  
*GL/ISPE 2.17*

If the application subsequently enters the EP phase, the applicant is obliged to reply to any negative WO-ISA or IPRP/IPER. The WO-ISA is thus comparable to the ESOP in the European procedure.

### 2. Basis of the written opinion (WO-ISA)

Applicants cannot amend the application before the search report has been communicated to them. Consequently, the WO-ISA will always relate to the application documents as originally filed or a translation thereof, and subject to the possibility of sequence listings being furnished later for the purposes of international search (see Rule 13~~ter~~.1). Furthermore, any reply filed by the applicant in response to an invitation for informal clarification (see B-VIII, 3.4) will also be taken into consideration when drawing up the written opinion.

*GL/ISPE 17.13*

Replacement pages or sheets, filed in response to an invitation by the receiving Office to correct defects in the international application, are deemed to be part of the international application "as originally filed". These sheets are identified with a stamp "SUBSTITUTE SHEET (RULE 26)" (see HIV, 1). Also, replacement pages or sheets for rectification of obvious mistakes under Rule 91 (see HIV, 2) are deemed to be part of the international application "as originally filed". These sheets are identified with "RECTIFIED SHEET (RULE 91.1)".

*Rule 26*  
*Rule 91.1*  
*GL/ISPE 17.16*

See H-IV, 2, for the procedure to follow if the rectified sheets contain added subject-matter.

## **2.1 Applications containing missing parts or elements, or correct parts or elements, incorporated by reference**

*Rule 20.5*  
*GL/ISPE 15.11*

If applicants omit to file part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish it (them) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and Rule 20.6(a) and provided the missing part(s) and/or element(s) was (were) completely contained in the priority document.

*Rule 20.5bis*  
*OJ EPO 2020, A36*  
*OJ EPO 2020, A81*

Similarly, if applicants appear to have erroneously filed part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish the correct part(s) and/or element(s) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and 20.6(a) and provided the correct part(s) and/or element(s) were completely contained in the priority document.

The activity of the EPO as ISA depends on the decisions taken by the RO with regard to the international application and its filing date; see also A-II, 6. Therefore, in cases where the international application was corrected by the RO under Rule 20.5*bis*, the EPO as ISA will establish the written opinion on the basis of the international application including the correct element(s) and/or part(s) if:

- (a) the RO notifies it of the correct element(s) and/or part(s) before the start of the search; or
- (b) the RO notifies it of the correct element(s) and/or part(s) after the start of the search (including after its completion) and the applicant pays an additional fee equal to the search fee within one month of the date of the invitation to do so issued by the EPO (Rule 40*bis*.1 and Article 2(1) RFees) (see B-III, 2.3.4).

See B-III, 2.3.3.

The examiner must check (as far as the documents needed are available) whether the RO's assessment of the "completely contained" criterion was correct (see H-II, 2.2.2). See also B-III, 2.3.3 and H-II, 2.2.2.2, for the impact on the search report and WO-ISA.

## **2.2 Applications filed in Dutch**

See A-VII, 3.2.

## **3. Analysis of the application and content of the written opinion**

### **3.1 The search division's dossier**

Section B-XI, 3.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## 3.2 Reasoned objections

### 3.2.1 Opinion on novelty, inventive step and industrial applicability

The opinion given in the WO-ISA is restricted to what has actually been searched; this should also be made clear in the WO-ISA.

A full explanation of the conclusions reached should always be given for all searched claims, regardless of whether this conclusion is positive or negative. Normally only one independent claim in each category is treated in detail; for negative conclusions regarding further independent claims, as well as for dependent claims, comments may be shorter.

### 3.2.2 Multiple independent claims

Multiple independent claims in one category are per se not a reason for a restriction of the search (see B-VIII, 4).

*GL/ISPE 5.13 and 5.14*

If appropriate, an objection as to clarity and conciseness under Article 6 may be made under Box VIII (see F-IV, 3.2). As an alternative, for cases where multiple independent claims in one category do not affect the clarity of the definition of the invention, a minor objection may be raised under Box VII.

### 3.2.3 Dependent claims – WO-ISA

Dependent claims should be indicated as complying or not with the requirements of novelty, inventive step and industrial applicability. Short statements of the reasons why the claims do not comply with these requirements should be given on the separate sheet. At the discretion of the examiner, more detailed comments may be made about selected dependent claims. If any claims are found to be novel and inventive, brief reasons for this too should be given on the separate sheet.

### 3.2.4 Clarity, conciseness, support and formal defects – WO-ISA

Major clarity, conciseness or support issues will be mentioned under Box VIII, unless they result in a meaningful search being impossible, in which case they will be treated under Section III.

Formal defects (e.g. reference signs, two-part form, acknowledgment of prior-art documents, etc.) as well as minor clarity issues will be dealt with under Box VII.

If the application is severely deficient and it is clear that the claims will have to be drastically redrafted anyway, it is not necessary to make objections with respect to minor clarity issues and/or formal issues.

## 3.3 Making suggestions

It is possible to make suggestions in the written opinion as to how certain objections raised may be overcome. However, examiners must not actually, of their own volition, make any final amendments to the application documents, however minor, for the reason that only amendments submitted by the applicant may be taken into consideration for the IPER. In no circumstances should the impression be given that compliance with the

*GL/ISPE 3.05, 17.71*

suggestions would lead to an allowable application under the EPC or any national law.

If no demand for Chapter II is filed, the WO-ISA will automatically be converted into an IPRP Chapter I. Therefore, the WO-ISA should not contain formulations suggesting to the applicant to actively file submissions.

### **3.4 Positive or negative WO-ISA**

The examiner needs to indicate whether the WO-ISA is to be considered positive or negative for further prosecution. The reason for this is that when entering the European phase the applicant is required to respond to the WO-ISA if it is negative, but not if it is positive (see EPC Guidelines A-XIV, 2.1.1, A-XIV, 3 and A.XIV, 3.1).

As a general rule, a WO-ISA is considered positive if it contains no objections at all or only minor objections which would not hinder a direct grant in the EP phase.

In the special case where the search report cites P and/or E documents but the priority could not be checked and there are no other objections, the WO-ISA is considered positive (since the examiner in the European phase first has to evaluate the validity of the priority and then decide whether a grant is still possible).

On the other hand, if the relevance of the document is independent of the priority being valid, detailed reasons for the novelty objection will be given, as well as an indication to the applicant that such a document would be relevant when entering the European phase before the EPO.

In the case of method of treatment claims which can easily be reformulated into an allowable format (see also B-VIII, 2.1), the above applies as well; i.e. if this is the only objection, the WO-ISA will be considered positive since such a reformulation can be done by the examiner at the grant stage in the European phase before the EPO.

In the special case of a non-unitary application, where all inventions searched were found to be novel and inventive, but still lacking unity – as the only objection – the WO-ISA is marked as negative.

Official designation of the examining division responsible for an application in the event of entry into the European phase is not possible in the international phase. However, if the division's prospective members are already known (see B-I, 2), the examiner appointed for the search and written opinion will consult them to check that they agree to issuing a positive search opinion.

### **4. Priority claim and the WO-ISA**

Normally, priority need only be checked if a relevant P or E document is found during the search. However, there may also be cases where the examiner immediately realises that the priority is not valid (e.g. in the case of an alleged doublure (see B-IV, 1.1) or a continuation-in-part

(see F-VI, 1.4)). Also, in case of restoration of priority rights, the examiner may insert a comment in Box II (see B-XI, 4.1).

#### 4.1 Restoration of priority

See F-VI, 3.7.

*Rule 26bis.3*

The examiner may receive an international application with a filing date which is later than the date on which the priority period expired but still within the period of two months from that date (i.e. up to 14 months later).

The examiner need not take any action in this case and will treat the international application as if it had been filed within the priority year. This is because the priority claim is automatically retained in the international phase if the filing date is within a period of 14 months from the claimed priority. The examiner may indicate in Box II of the WO-ISA that the priority period has been exceeded by x days.

If there is any change in the situation as regards the priority claim on entry into the European phase (Euro-PCT), the examiner will be informed.

If the examiner notices that the filing date exceeds the earliest priority date by more than 14 months from the claimed priority, this may be indicated in Box II of the WO-ISA. It should be noted that, even in such cases, the priority may actually be valid, e.g. where there has been a simple error in the indication of the priority claim which is open to correction.

#### 4.2 Use of "P" documents in the written opinion

If the priority document is not available, the opinion will be established on the assumption that the claimed priority is valid. In this case, no comments need be made regarding "P" documents, but the "P" documents will nevertheless be indicated under Section VI. For potentially conflicting patent documents which might give rise to an objection under Art. 54(3) EPC in the European phase, the statements in B-XI, 4.3, below regarding "E" documents apply.

*GL/ISPE 17.29(b)*

If the priority document is available, the examiner will check the validity of the priority and indicate any negative finding under Section II. Should the priority be found not to be valid, detailed comments will be made for these documents with respect to novelty and inventive step of the claimed subject-matter under Section V, since these documents then become prior art under Rule 33.1(a).

*GL/ISPE 17.29(c)*

Sometimes it is possible for the examiner to determine from the documents on file that the claimed priority is not valid. An example would be when during the search a document is found which shows that the priority document of the searched application is actually not the first application for the claimed invention.

Irrespective of whether the priority is valid or not, documents published after the priority date and before the filing date are indicated as "P" documents in their entirety, i.e. for all (searched) claims, in the search report.

### 4.3 Use of "E" documents in the written opinion

Although there are no harmonised provisions in the PCT Contracting States that correspond to Art. 54(3) EPC, such documents will be mentioned under Section VI if they are considered prejudicial to the novelty of at least one claim. If the relevance of the document is independent of the priority being valid or if the priority could be checked and was found invalid, reasons for the novelty objection will be provided, together with an indication that such a document would be relevant when entering the European phase before the EPO.

On the other hand, if the document would be relevant under Art. 54(3) EPC only if the priority is not valid, and this could not be checked, then no reasons need to be given.

### 5. Unity in relation to the written opinion

In the case of lack of unity where more than one invention has been searched, for each invention searched one independent claim in each category must be treated in detail.

See B-VII for further details.

### 6. The written opinion in cases of a restriction of the search

The extent of the search as well as the reasons for the restriction will in many cases only be indicated in the WO-ISA. See B-VIII, 3.5, for details of whether an indication under Art. 17 should be made in the ISR or only in the WO-ISA. The opinion given is then normally restricted to what has actually been searched.

Any argumentation and objections presented in the written opinion must be consistent with the restrictions of the search and the reasons therefor (see also B-VIII, 2, B-VIII, 3 and B-VIII, 3.1).

### 7. Sequence listings

Where the applicant has not filed an electronic sequence listing conforming to WIPO Standard ST.26 in response to a request from the ISA, or has not paid the late furnishing fee, the WO-ISA will indicate under Section III that the written opinion is limited to the same extent as the search was limited because the applicant failed to comply with Rule 5.2 (no sequence listing) and/or Rule 13ter.1(a) (no computer-readable sequence listing).

### 8. Options open to the applicant following receipt of the ISR and WO-ISA

There is no possibility for any form of dialogue between the applicant and the ISA on the content of the ISR and/or the WO-ISA. However, the applicant has the right to submit to the IB amendments to the claims pursuant to Article 19 PCT, as well as informal written comments on the WO-ISA. Moreover, the applicant may consider filing a demand for

*Rule 5.2*  
*Rule 13ter.1(a)*  
*OJ EPO 2011, 372*  
  
*OJ EPO 2025, A64*  
*OJ EPO 2021, A97*  
*OJ EPO 2022, A60*  
*OJ EPO 2024, A54,*

*and 15.14A*

*Art. 19*  
*Rule 46*  
*PCT Newsletter*  
*10/2004, 7*  
*6/2010, 8*

international preliminary examination under Chapter II PCT. See ISPE Guidelines 2.15.

If the international application subsequently enters the European phase, the applicant is required to respond to the WO-ISA or SISR prepared by the EPO or, where applicable, to the IPER prepared by the EPO as IPEA (see EPC Guidelines A-XIV, 2.21 and A-XIV, 3).

## Chapter XII – Supplementary international search (SIS)

### 1. General

The supplementary international search system is optional for both applicants and International Authorities. Its purpose is to enable applicants, during the international phase, to obtain further supplementary searches from other Authorities so that they have a better basis for deciding whether or not to enter the regional phase.

*Rule 45bis*  
*OJ EPO 2010, 316*  
*OJ EPO 2017, A115*  
*OJ EPO 2018, A24*  
*GL/ISPE 2.20, 15.76*

The EPO as SISA only accepts a limited number of SIS requests per year. Since 2010, the EPO has limited the number of SIS requests it will accept to 700 per year.

### 2. Time limits

An applicant can request a SIS up to the end of 22 months from the priority date. The request must be filed with the IB.

*Rule 45bis.1(a)*  
*GL/ISPE 2.20, 15.78*  
*PCT Newsletter*  
*10/2016, 1*

The SISA must start the search promptly after receipt of the necessary documents, though it may delay the start of the search until it has received the ISR from the main ISA, but not later than the end of 22 months from the priority date.

*Rule 45bis.5(a)*  
*GL/ISPE 15.82*

Where applicable, the applicant must, together with the SIS request, also furnish to the IB a copy of the sequence listing in an electronic format complying with the standard provided for in Annex C to the Administrative Instructions. The EPO will start the supplementary international search only upon receipt of that copy. If it is not received, the EPO will invite the applicant to furnish an electronic copy of the sequence listing complying with that annex and to pay a late furnishing fee.

*Rule 13ter, 45bis.5*  
*Agreement*  
*EPO-WIPO, Annex B*  
*OJ 2013, 542*  
*OJ 2017, A115*  
*OJ 2018, A24*  
*OJ 2020, A35*  
*OJ 2023, A37*

The supplementary international search report (SISR) must be established within 28 months from the priority date so as to allow the applicant to take it into account when deciding whether or not to enter the regional/national phase.

*Rule 45bis.7(a)*  
*GL/ISPE 15.94*

The file will therefore be sent to the examiner as soon as all the documents have been received, including the ISR from the main ISA. If, however, the ISR from the main ISA is not received within 22 months of the priority date, the file will be sent to the examiner to enable the start of the search.

### 3. Basis for the search

The SIS is always made on the claims as originally filed (or a translation thereof), irrespective of whether amendments have been filed under Art. 19 or 34.

*Rule 45bis.5(b)*  
*GL/ISPE 15.85*

In cases where the international application was corrected by the RO under Rule 20.5*bis*, the EPO as SISA will carry out the supplementary

international search on the basis of the international application including the pages submitted later and containing the correct element or part. This is the version that will have been searched by the main ISA.

#### **4. Scope of the search**

*GL/ISPE 15.93*

At the EPO the scope of a SIS is the same as for any other international search carried out by the EPO as ISA and is not limited to documentation in a specific language.

If an ISR from the main ISA is already available when the examiner carries out the SIS, it will be taken into account when establishing the SISR and written opinion.

#### **5. Limitation of the search for reasons other than non-unity**

*GL/ISPE 15.87*

With respect to limitations of the search for reasons other than non-unity (including the issuance of a declaration of no search), the same criteria apply as for any international search carried out by the EPO as ISA (see B-VIII, 2, 3 and subsections).

Any such limitation of the search will be indicated in the search report and/or the annexed explanations (of equal value to the information contained in a WO-ISA) as set out in B-X, 8 and B-XI, 6, with the exception that in the case of a declaration of no search (Form PCT/SISA/502) no explanations from the SISA are provided for. For any other limitation of the search, the reasoning will be given only in the explanations annexed to the SISR and an automatic reference thereto will be inserted in the SISR.

*Rule 45bis.5(d) and  
Rule 45bis.5(e)*

Furthermore, the SISA does not have to search claims which were not searched by the main ISA. However, the examiner will not limit the SIS merely on the grounds that the main ISA did so, but will make a case-by-case assessment based on EPO practice to determine whether the limitation made by the main ISA was appropriate under EPO practice.

For non-unity: see B-XII, 10.

#### **6. Filling out the search report**

*GL/ISPE 15.96*

The SISR is filled out in the same way as for any international search, with the exception that publication details do not have to be provided since the main ISA has already provided the publication data and IPC classes.

Examiners will not cite in the SISR a document already cited in the ISR unless they attach a different significance to it, e.g. as a Y document in combination with a newly cited document or where the main ISR has clearly failed to recognise the extent of the document's relevance.

Furthermore, it will be indicated in the SISR whether or not the main ISR was available and taken into account.

#### **7. Explanations under Rule 45bis.7(e)**

*Rule 45bis.7(e)  
GL/ISPE 15.96(iv), (v)*

No separate WO-ISA is established for a SIS. Instead, only a free-text sheet is used, and this will contain the same information as the separate sheet that is part of the WO-ISA in the form of "explanations". Upon entry

into the European phase, the applicant is obliged to respond to these explanations, as set out in Rule 161(1) EPC. A positive conclusion must be reasoned in the same way as in a WO-ISA/IPER.

Formally, the explanations under Rule 45*bis*.7(e) are part of the SISR (Form PCT/SISA/501) and are contained in an annex called the "Scope Annex".

Although the Scope Annex will concentrate on the documents cited in the SISR, in some circumstances it might be appropriate to raise objections based on documents cited in the ISR.

An example would be that of a document cited in the ISR which could be used as a Y document for inventive step for some dependent claims in the Scope Annex. In this case it might be necessary to cite the document again in the SISR as a Y document for those claims if this was not already indicated in the main ISR (see also B-XII, 6), and to provide argumentation in the Scope Annex.

It may also occur that although the EPO as SISA finds further pertinent prior art, objections may also be raised based on X and/or Y documents cited in the ISR. In such a case, the examiner may choose to base objections only on the documents cited in the ISR if considered expedient. Should the objections correspond to those raised in the WO-ISA from the main ISA, a mere reference to the WO-ISA objections will suffice.

There may also be cases where the ISR contains documents pertinent for novelty and/or inventive step and the EPO as SISA cannot find any further relevant documents (only possibly A documents). In such a case the following two possibilities will arise:

- (i) if the examiner agrees with the categories (X, Y) given in the ISR for these documents, it is not necessary to cite the documents again in the SISR. The examiner will then use the documents cited in the ISR to raise objections of lack of novelty and/or inventive step. If the WO-ISA from the main ISA has raised the same objections, and the examiner agrees with the given reasoning, a mere reference to the objections raised in the WO-ISA from the main ISA will suffice.
- (ii) if the examiner does not agree with some or all of the categories (X, Y, A) given in the ISR for any such documents considered pertinent and upon which the examiner wishes to base the objections in the Scope Annex, such documents will be cited again in the SISR.

In both these cases the A documents found by the EPO as SISA will be cited in the SISR.

Generally, an explicit re-evaluation of the objections raised in the WO-ISA will be avoided. The examiner will thus refrain from negatively commenting on any reasoning given in the WO-ISA, bearing in mind that national law differs amongst the PCT contracting states.

**8. Validity of priority and E/P documents**

At this stage the priority document should be available in the file and it can therefore be checked if E/P documents were found during the search. Should the priority document not be available, for the purposes of the search the priority is assumed to be valid. No indication in the Scope Annex is necessary.

If the priority is not valid, this will be explained in the Scope Annex, and any P documents found to be relevant will be dealt with in detail.

On the other hand, if the priority is valid, any cited P documents do not need to be dealt with in detail.

Any E document which is a potential Art. 54(3) EPC document will be dealt with in the Scope Annex. In this case the applicant's attention should be drawn to the relevance of such a document if the application enters the European phase before the EPO and a reasoned statement as to lack of novelty will be given.

**9. Copies of documents cited in the SISR**

*OJ EPO 2010, 316*  
*GL/ISPE 15.97*  
*OJ EPO 2024, A68*

Copies of all the cited documents are made available to the applicant. MyEPO users receive all cited documents electronically in their Mailbox. Applicants who/that have not opted for electronic notification via Mailbox only receive paper copies of non-patent literature and translations of cited patent literature by post, with digital copies of cited patent literature documents available in Espacenet ([espacenet.com](http://espacenet.com)).

**10. Non-unity****10.1 General procedure**

*Rule 45bis.6*  
*GL/ISPE 15.89-15.90*

In case of non-unity only one invention is searched; there is no possibility to pay additional fees for further inventions. Furthermore, the decision as to which invention should be considered the main invention and thus searched is handled differently for the SIS procedure, as set out in detail in B-XII, 10.2.

*Rule 45bis.1(d)*

Where the main ISA has already objected to lack of unity, the applicant can indicate together with the supplementary search request which of the inventions should be searched by the SISA. For further details see B-XII, 10.3.

*Rule 45bis.6(b)*

If on the other hand the main ISA has not objected to lack of unity, the EPO as SISA is free to do so, as the SISA is not bound by any finding on unity made by the ISA but merely obliged to take such a finding into account.

*Rule 45bis.6(c)*

As for any international search where lack of unity is objected to, the applicant has the right to protest against the non-unity finding. In the SIS procedure this protest is called a review (see B-XII, 10.4).

**10.2 Deciding what is to be considered the main invention**

The main invention will normally be the invention first mentioned in the claims. However, the examiner will exercise due discretion in selecting the

invention to be searched where the first mentioned invention is one for which no search report would be established, or else where the applicant has requested that the supplementary search should be limited to one of the inventions other than the first identified by the ISA responsible for the main international search. For details, see B-XII, 10.3.

### **10.3 The main ISA found that unity of invention is lacking**

If the main ISA has already objected to lack of unity and the examiner agrees with the assessment in the main ISR, this can be reported by simply referring to the ISR. If the examiner takes a different view from the main ISA or agrees with a revised view on unity of invention in a decision relating to a protest before the ISA, the reasoning will be set out in full so that it is easily understood by both the applicant and third parties. No reasons need be given why the lack-of-unity objection raised in the ISR could not be followed.

If the examiner finds that the application does not lack unity, a complete search is made for all the claims. No reasons need be given why the lack-of-unity objection raised in the ISR could not be followed.

Furthermore, if the main ISA has already objected to lack of unity, the applicant can indicate, on the supplementary search request form (in Box IV), which of the inventions identified by the main ISA the SIS should be based upon.

If the examiner agrees with the assessment of unity of invention made by the main ISA and the relevant claims are not excluded for any reason, the SIS will focus on the invention indicated by the applicant.

If examiners cannot follow the objection raised in the ISR, but raise a different non-unity objection, when deciding on the main invention to be searched, they will take the request by the applicant into account as far as possible. The examiner will provide complete reasoning for the lack-of-unity objection in the SISR and will include an explanation of the extent to which the applicant's request could be taken into account in view of the different non-unity objection raised by the EPO.

### **10.4 Review procedure**

If applicants do not agree with the finding of lack of unity by the SISA they can request a review of this finding. This procedure is similar to the protest procedure with the difference that additional fees cannot be paid.

*Rule 45bis.6(d)*  
*GL/ISPE 15.91*

If applicants request a review of the non-unity finding they must pay a review fee. If no fee is paid, the request for review is considered not to have been made.

Similar to the protest procedure, a Review Panel is established consisting of the examiner responsible for the file, an examiner as chairperson of the Review Panel and a further examiner. This Review Panel will, in case of entry into the European phase, constitute the Examining Division (see B-VII, 7.2). The examiner dealing with the file will make a first

assessment of the arguments made by the applicant and will then discuss the case with the members of the Review Panel to come to a decision.

The purpose of the Review Panel is to determine whether the lack-of-unity objection was justified on the basis of the reasoning given in the SISR. The review does not include re-evaluation to determine possible additional grounds for lack of unity.

Where the Review Panel determines that the objection was not justified, it will inform the applicant with Form 503; no reasoning needs to be given. Furthermore, it will order the reimbursement of the review fee. A corrected SISR must then be established on all claims.

If the Review Panel considers that the objection is completely or partially justified, it will communicate this to the applicant with Form 503. In these cases, reasoning must be given indicating why the objection is (at least partially) upheld. This reasoning should also address the applicant's relevant arguments. The review fee will not be reimbursed. In the case of an only partially justified lack-of-unity objection, a corrected search report taking the result of the review into account must be established.

#### **11. Combination of SIS and Chapter II**

If the ISA was one of the European International Searching Authorities (SE, ES, AT, FI, TR, NPI (XN) or VPI (XV)) the applicant can file a demand under Chapter II with the EPO and additionally a request for SIS by the EPO.

For such a file the examiner will first establish the SISR with Scope Annex and then continue with Chapter II.

*GL/ISPE 17.04*

Under Chapter II, a WO-IPEA (Form 408) will be sent to the applicant if there are objections, since the WO-ISA from another office is not recognised as a WO-IPEA (unlike an EPO WO-ISA) and the Scope Annex does not legally qualify as a WO-IPEA (see C-IV, 2.1).

| 3.  | Positive or negative IPER            | <u>VIII-2</u> |
| 4.  | Rectification of the IPER            | <u>VIII-2</u> |

**Chapter IX – Special requests** **IX-1**

- |    |  |             |
|----|--|-------------|
| 1. | Withdrawal of demand under Chapter II                | <u>IX-1</u> |
| 2. | Request for examination of a different set of claims | <u>IX-1</u> |
| 3. | Request for examination of certain claims only       | <u>IX-2</u> |
| 4. | Complaint against the findings at the search stage   | <u>IX-2</u> |

## Chapter I – Introduction

### 1. General remark

Chapters C-II to C-IX set out the general procedure for the international preliminary examination under PCT Chapter II, together with guidance on particular matters where necessary. They do not provide detailed instructions on matters of internal administration.

Matters of substantive law, i.e. the requirements which a PCT application must fulfil, are dealt with in Part F, Part G and Part H.

### 2. Work of an examiner

See ISPE Guidelines 3.05.

### 3. Purpose of international preliminary examination

While the search and the accompanying written opinion under Chapter I are mandatory for applicants, examination under Chapter II is optional. *GL/ISPE 3.02, 3.04*

The end product of the PCT procedure is the international preliminary report on patentability (IPRP) Chapter I or Chapter II. This report will be the result: *Rule 44bis and 70*

- i. either of further examination under Chapter II (see below) in the form of an international preliminary examination report (IPER) from the International Preliminary Examining Authority *Rule 70  
GL/ISPE 3.02*
- ii. or, if no demand under Chapter II is filed, of the International Bureau's conversion of the WO-ISA into an IPRP of the International Searching Authority, which is made public at 30 months from the priority date or shortly thereafter together with any informal comments submitted by the applicant. Such comments will be annexed to the report. Since no demand for preliminary examination under Chapter II has been filed, there is no re-examination of the WO-ISA. *Rule 44bis  
GL/ISPE 2.18*

In its capacity as an International Preliminary Examining Authority (i.e. under Chapter II of the PCT), the EPO is empowered to carry out international preliminary examination (IPE), the objective of which is to formulate a preliminary and non-binding opinion on whether the claimed invention appears to be novel, to involve an inventive step and to be industrially applicable. When appropriate an opinion will also be given on added subject-matter, unity, insufficient disclosure and clarity or support issues, as well as formal defects. *Art. 33(1)  
GL/ISPE 19.02*

The international preliminary examination does not lead to either a grant or a refusal of a patent; instead, at the end of the procedure, a report – the IPRP Chapter II or IPER – is established. The procedure under Chapter II allows the applicant to submit amendments and arguments in response to the WO-ISA and, if applicable, to a WO-IPEA, which will be taken into account when establishing the report. *Rule 66.1bis(b)  
GL/ISPE 3.19*

*Art. 32*

*Rule 59*

*GL/SPE 1.13-1.15*

The EPO is a Preliminary Examining Authority for the vast majority of PCT contracting states. All applications are treated in the same manner irrespective of their country of origin.

## Chapter II – Formal requirements to be met before the start of the international preliminary examination

### 1. Filing of the demand

The demand for international preliminary examination must be made using the prescribed form (PCT/IPEA/401).

*Art. 31(3)  
Rule 53*

A demand for preliminary examination selecting the EPO as IPEA and any further document relating to the Chapter II procedure (e.g. amendments and/or arguments filed under Article 34 PCT) must be filed with the EPO in Munich, Berlin or The Hague, in writing, by hand, by post or electronically. As of 1 November 2016 the ePCT service may be used for online filing of the demand under PCT Chapter II, and also for indicating the payment of fees related to the demand. The EPO filing offices are in the Central European Time (CET) zone i.e. UTC +1, and Central European Summer Time (CEST) zone i.e. UTC +2. CEST starts on the last Sunday in March and ends on the last Sunday in October. For emergency situations, including the rare cases of unavailability of the standard EPO filing tools, the EPO Contingency Upload Service is available for filing the demand with the EPO as IPEA.

*Art. 31(6)(a)  
OJ EPO 2018, A25,  
OJ EPO 2018, A45  
OJ EPO 2024, A41,  
OJ EPO 2024, A42  
Rule 92.4(e), (g)  
OJ EPO 2007,  
Spec. ed. 3, A.3  
(Art. 3 and 7 of the  
Decision)*

The EPO will indicate the date of receipt on the demand and promptly notify the applicant of that date.

If the applicant filed the demand incorrectly with the International Bureau (IB), a receiving Office, an International Searching Authority or a non-competent International Preliminary Examining Authority, that Office or Authority or the IB will mark the date of receipt and will transmit the demand to the EPO as IPEA.

*Rule 59.3*

The time limit for filing the demand for international preliminary examination with the EPO is as defined in Rule 54bis.1 (see C-II, 1.1 and 1.1.1).

#### 1.1 Time limit for filing the demand

Pursuant to Rule 54bis PCT, the demand may be validly submitted at any time prior to the expiry of the following time limits, whichever expires later:

*Rule 54bis.1(a)*

- three months from the date of transmittal to the applicant of the ISR and WO-ISA by the ISA or
- 22 months from the (earliest) priority date.

This time limit guarantees that applicants have at least three months from the date of mailing of the ISR to decide on the basis of the results of the international search laid down in the ISR and the WO-ISA whether they want to file a demand with amendments and/or arguments.

If the demand is submitted after expiry of this time limit, the demand is considered to have not been submitted.

*Rule 54bis.1(b)*

Possibilities to withdraw a demand and obtain a refund of the fees paid are limited (see A-III, 9.6 and 9.7, respectively).

### **1.1.1 Time limit for filing a demand to delay national phase entry**

Most contracting states apply Article 22 PCT as amended with effect from 1 April 2002. For these states, the 30/31-month time limit for entry into the national/regional phase applies regardless of whether the applicant has submitted the demand for international preliminary examination within 19 months of the (earliest) priority date.

*Rule 159(1) EPC  
Art. 22(3), 39(1)*

The EPO too applies Article 22 PCT as amended with effect from 1 April 2002. Therefore, the time limit for entry into the European phase is always 31 months from the priority date, irrespective of whether a demand has been filed or not.

*PCT Newsletter  
2/2005, 6*

However, in respect of a small number of designated Offices, the former wording of Article 22(1) PCT still applies. The list of contracting states for which it is still applicable is published on the WIPO website. According to the latest information from WIPO (status on 1 January 2024), the 20/21-month time limit applies to the following states: Luxembourg (LU) and United Republic of Tanzania (TZ). However, in respect of the regional designation of each of these states, the time limit under amended Article 22 PCT applies.

Therefore, if an applicant wants to enter the national phase for these states, the demand must be received by the competent IPEA within 19 months of the (earliest) priority date to secure the right to entry into the national phase being delayed until expiry of 30/31 months from the priority date.

Moreover, for these states, the applicant must respect the 19-month time limit even where the ISR and the WO-ISA are not yet available. In other words, a delay in the international search does not bring about a change in the 19-month time limit, since this time limit is exclusively calculated on the basis of the (earliest) priority date.

For states applying Article 22(1) PCT in its former wording, a demand filed with the EPO after expiry of 19 months from the priority date but prior to

- three months from the date of transmittal to the applicant of the ISR and the written opinion (WO-ISA) by the ISA or
- 22 months from the (earliest) priority date

is valid, but does not have the effect of postponing commencement of the national phase to 30/31 months from the priority date for the states in question.

## **2. The EPO as competent IPEA**

*Art. 31(6)(a) and 32,  
Rule 59.3*

The IPEA receiving the demand should ensure that it is competent to act as IPEA.

Although the EPO's competence as an IPEA is not restricted to international applications from EPC contracting states, restrictions of various nature limit its competence.

The EPO may only act as an IPEA if the receiving Office with which the international application has been filed has specified the EPO as IPEA. The same countries which have not (yet) specified the EPO as ISA have not (yet) specified the EPO as IPEA (see B-II, 1.1). In addition, Uruguay has not specified the EPO as IPEA. Up-to-date information is available in the annexes to the WIPO PCT Guide (see General Part I, 2.3 and 2.4, respectively).

*Agreement EPO-  
WIPO, Art. 3(2), (3)  
OJ EPO 2017, A115  
OJ EPO 2018, A24  
OJ EPO 2020, A35  
OJ EPO 2022, A37  
OJ EPO 2023, A37*

Where the international application has been filed with the IB, the EPO is competent as IPEA if the international application could have been filed with a receiving Office which has specified the EPO as IPEA.

In addition, as a further requirement, the EPO is competent to act as IPEA only if the international search has been carried out by the EPO or by the Austrian, Finnish, Spanish, Swedish or Turkish Patent Office, the Nordic Patent Institute (NPI) or the Visegrad Patent Institute (VPI).

If the EPO acts as IPEA, there is a reduction of 75% of the examination fee in the European phase.

### **3. Identification of the international application in the demand**

The international application must be identified by indicating the international application number, the international filing date, the title of the invention and the name and address of the applicant.

*Rule 53.6 and 60.1(b)*

### **4. Applicant's entitlement to file a demand**

The demand should contain the name and the address (including postal code and name of the country) of the applicant, the state of nationality and the state of residence.

*Art. 31(2)  
Rule 18.1 and 54*

Sole applicants must have their residence in, or be a national of, a PCT contracting state bound by PCT Chapter II. If there is more than one applicant, at least one of the applicants has to fulfil these requirements. Secondly, the international application must have been filed with a receiving Office of or acting for a PCT contracting state bound by PCT Chapter II. At present, all PCT contracting states are bound by PCT Chapter II. Therefore, these requirements do not stand in the way of any applicant wishing to file a demand for a pending international application.

### **5. Representation**

The demand should indicate the agent or common representative who has been appointed by the applicant(s) or a sub-agent who has been appointed by an agent appointed under Rule 90.1(a) ("the agent for the international phase") (see A-VIII, 1.9). They may also appoint an agent to represent them specifically before the EPO as IPEA under Rule 90.1(c). Moreover, the agent appointed for the international phase may under Rule 90.1(d) appoint a sub-agent to represent the applicant specifically before the EPO as IPEA.

*Art. 31(2)  
Rule 54  
Rule 90*

Any agent or other person having the right to practice before the EPO during the European phase is entitled to practice before the EPO as IPEA in respect of that application. The same applies to any agent or other person entitled to practice before the RO with which the international application was filed (Article 49 PCT) (see A-VIII, 1.1).

Where an agent is appointed, any correspondence intended for the applicant will be sent to the address indicated for the agent.

If there are two or more applicants and no common agent or common representative is appointed, all correspondence will be sent to the first-named applicant who has the right to file an international application with the receiving Office concerned, as this applicant will be considered to be the common representative ("deemed common representative") (see A-VIII, 1.3).

For common provisions on representation, see A-VIII.

## **6. Election of states**

*Art. 31(4)*

*Art. 37*

*Rule 53.7*

*GL/ISPE 22.11*

The filing of the demand constitutes the election of all contracting states which are designated and are bound by Chapter II of the PCT for a national and, where possible a regional, patent at the same time. If, after filing the PCT request, the applicant has validly withdrawn a designation, the filing of the demand cannot constitute the election of that state.

## **7. Signature**

*Rule 53.2(b), 53.8,  
60.1(a-ter), 90.3(a),  
90.4(a) and (b)*

The demand must be signed either by all the applicants or by the (common) agent or the common representative. If the signature of one or more applicants is missing, the EPO as IPEA will not invite the applicant(s) to furnish the missing signature(s) provided that at least one of the applicants has signed the demand.

*Rule 90.4, 90.5  
OJ EPO 2010, 335*

Where the demand is signed by a (common) agent, the EPO as IPEA will not invite the applicant(s) to file a (separate) power of attorney or a copy of a general power of attorney since the EPO has waived these requirements (see A-VIII, 1.13).

## **8. Basis for international preliminary examination**

*Art. 19 and 34  
Applicant's Guide  
Int. Phase, Annex E*

The preliminary examination is based on the international application either as filed or as amended under Article 19 or 34 (see also C-III).

Applicants must indicate in Box No. IV of the demand form (PCT/IPEA/401) on which basis they wish the IPEA to start the international preliminary examination – the application as originally filed or with amendments (Article 19 or Article 34); any translations; any comments about the WO-ISA (indexed ISOREPLY) or about the ISR; a sequence listing in the language of the IPE where applicable.

*Rule 66*

If amendments under Article 19 are to be taken into account, the applicant must enclose a copy of these with the demand (see C-VI, 1).

Amendments and/or arguments filed under Article 34 PCT should preferably be filed together with the demand. Furthermore, as the EPO will start the preliminary examination as soon as it is in possession of all the elements listed in Rule 69.1(a) PCT (see C-VI, 1), applicants who want to make amendments but are not ready to file them at the same time as the demand should always indicate this by selecting the appropriate checkbox or checkboxes in Box No. IV, item 1, of the PCT demand form (PCT/IPEA/401). Otherwise, the EPO will start the international preliminary examination on the basis of the application as filed. Subsequently filed amendments and/or arguments will only be taken into account by the EPO as IPEA if they are received before the point at which preparation of a written opinion or the IPER has actually started (see C-IV, 3). Moreover, if a second written opinion is established, subsequently filed amendments and/or arguments will be taken into account together with the second written opinion. Amendments and/or arguments not taken into account by the EPO as IPEA may be (re)filed with the elected Offices upon entry into the national phase.

*Rule 66.1(b), (c), (d)*  
*Rule 66.4bis*

The EPO acting as IPEA does not accept claims in the form of auxiliary requests, since this is not provided for under the PCT (see C-IX, 2).

Additionally, a fee for preliminary examination and a handling fee are to be paid (see A-III, 7.1 and 7.2).

*Rule 58.1 and 58.3*

## **9. IPEA file**

The EPO as IPEA promptly establishes the file when the conditions under Rule 69.1(a) are fulfilled, using the existing ISA file or creating a new file if the EPO was not the ISA.

*PCT/AI section 605*

## **10. Correction of deficiencies**

Certain defects might be corrected *ex officio* by the IPEA; for others, the EPO as IPEA invites the applicant to correct the defects within one month of the date of the invitation. If the applicant complies with the time limit, the demand is deemed to have been received on the actual filing date, provided that the demand as submitted sufficiently identified the international application. If the applicant does not comply with the invitation in due time, the demand is deemed not to have been submitted.

*Art. 31(3)*  
*Rule 53, 55 and 60*  
*GL/ISPE 22.37-22.41*

Where there is more than one applicant, failure to provide the required indications and/or the signatures of all the applicants will not result in an invitation being issued, as long as the required indications are available in

*Rule 60.1*

respect of one of the applicants entitled to file a demand and the demand is signed by one of them (see C-II, 7).

### **11. Payment and refund of fees**

*Rule 57 and 58  
GL/ISPE 22.42-22.48*

Both the preliminary examination fee and the handling fee must be received at the EPO as IPEA one month from the date of receipt of the demand or 22 months from the earliest priority date, whichever expires later (see A-III, 7.1 and 7.2).

*WIPO PCT Guide  
10.047*

The EPO cannot commence international preliminary examination before these fees have been paid. Late payment thus reduces the amount of time available for establishment of the IPER (see A-III, 7.5).

For the conditions for refunding the handling fee and the international preliminary examination fee, see A-III, 9.6 and 9.7, respectively.

### **12. Transmission of demand to the International Bureau**

*Rule 61.1 and  
90bis.4(a)*

The transmission of the demand to the International Bureau should be effected not later than one month after receipt of the demand.

### **13. Language requirements**

See A-VII.

## Chapter III – Documents forming the basis of the international preliminary examination

### 1. Substitute sheets and rectified sheets

Replacement pages or sheets, filed in response to an invitation by the receiving Office to correct defects in the international application, are deemed to be part of the international application "as originally filed". These sheets are identified with a stamp "SUBSTITUTE SHEET (RULE 26)" (see H-IV, 1). Also, replacement pages or sheets for rectification of obvious mistakes under Rule 91 are deemed to be part of the international application "as originally filed". These sheets are identified with "RECTIFIED SHEET (RULE 91.1)" (see H-IV, 2.2).

*Rule 26*  
*Rule 91.1*  
*GL/ISPE 17.16*

See H-IV, 2, for the procedure to follow if the rectified sheets contain added subject-matter.

### 2. Sheets filed under Rule 20.6 containing missing parts or elements or correct parts or elements

If applicants omit to file part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish it (them) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and 20.6(a) and provided the missing part(s) and/or element(s) were completely contained in the priority document.

*Rule 4.18*  
*Rule 20.3*  
*Rule 20.5*  
*Rule 20.5bis*  
*Rule 20.6*  
*OJ EPO 2020, A36*  
*OJ EPO 2020, A81*  
*GL/ISPE 6.01*  
*GL/ISPE 15.11*  
*GL/ISPE 17.16A*  
*GL/ISPE 18.07*  
*GL/ISPE 22.27*

Similarly, if applicants appear to have erroneously filed (a) part(s) of the application and/or (an) entire element(s) thereof (i.e. all of the description and/or all of the claims), they may still furnish the correct part(s) and/or element(s) at a later date without affecting the international filing date, subject to the requirements of Rule 4.18 and 20.6(a) and provided the correct part(s) and/or element(s) were completely contained in the priority document.

Such elements and/or parts are then considered to have been part of the application as originally filed, provided that they were notified to the ISA on time or the relevant additional fee was paid (see B-III, 2.3.3, B-III, 2.3.4, and B-XI, 2.1).

The examiner checks whether the RO's assessment of the "completely contained" criterion was correct (see H-II, 2.2.2).

See also H-II, 2.2.2.2, for the impact on the IPER.

See also EPC Guidelines C-III, 1.3, and EPC Guidelines A-XIII, 4.1.2, for the effect on the European phase.

### 3. Amended sheets

Any change, other than the rectification of obvious mistakes in the claims, the description or the drawings is considered an amendment. Unless withdrawn or superseded by later amendments, any change considered an

*Art. 19*  
*Art. 34(2)(b)*  
*Rule 66.5*  
*GL/ISPE 20.04*

amendment must be taken into consideration for the purpose of the international preliminary examination.

See H-II and H-III for details.

*Rule 70.12*

*GL/ISPE 17.49*

*PCT AG I 9.006*

It may happen that the replacement sheets contain formal defects: they may not comply with the physical requirements of Rule 11, or they may contain marked-up text, instead of only clean text. If, when preparing a WO-IPEA (Form 408) or the international preliminary examination report (Form 409), the examiner considers that there are still defects in the form of the international application, the examiner should include this opinion and the reasons for it in Box VII of the WO-IPEA and/or IPER.

*GL/ISPE 20.09*

#### **4. Added subject-matter**

All amended pages (description, claims, drawings) must be examined to see whether they introduce subject-matter not originally disclosed. The same criteria should be used as under Art. 123(2) EPC for the European procedure (see H-II and III).

Concerning the applicant's obligation to indicate the basis for the amendments in the application as originally filed, see H-I, 6.

*Art. 19(2)*

*Art. 34(2)(b)*

*Rule 70.2(c)*

If any newly filed claim, drawing or part of the description contains amendments which are considered to go beyond the disclosure as originally filed, the claim concerned is examined, taking into consideration only those technical features which have a basis in the application as originally filed, disregarding the amendments which are considered as introducing added subject-matter.

If that is not possible, the text of the claims as originally filed or amended under Art. 19(1) is examined and this information is entered on the cover sheet and in Section I of the WO-IPEA (Form 408) and/or of the IPER (Form 409). On the separate sheet, reasons must be given as to why the amendments introduce subject-matter not originally disclosed and why they are disregarded.

## Chapter IV – Examination of the WO-ISA and replies

### 1. General procedure

Under Chapter II, the reply to the WO-ISA, WO-IPEA (Form 408) or telephone minutes with possible amendments will be examined.

The final result of this examination under Chapter II is the issuance of the IPER (see C-VIII).

The examiner will first consider whether the objections raised in the WO-ISA have been overcome by the submitted arguments and/or amendments. If this is the case, the IPER will be issued directly, provided that the top-up search does not yield any pertinent prior art (see C-IV, 5.4). If objections have not been overcome or if pertinent prior art is found in the top-up search (see C-IV, 5.3 and 5.4), a further WO-IPEA or telephone minutes should be issued as set out in C-IV, 2.2.

If a further WO-IPEA or telephone minutes setting a time limit for reply are issued, the examiner will examine any reply from the applicant and will then as a rule draft the IPER directly even if objections still occur, unless there is an outstanding request for a telephone consultation (see C-IV, 2.2, and C-VII, 1). An exception could be if it is clear that minor amendments could be suggested during e.g. a short telephone consultation which would result in a positive IPER, so that it would appear procedurally expedient to solve these problems in the Chapter II phase.

*OJ EPO 2011, 532*

A second written opinion will be issued on condition that the applicant files in due time a substantive reply either to the WO-ISA established by the EPO or to the first written opinion established by the EPO as IPEA. Thus, before issuing a "negative" IPER, the EPO as IPEA will, as a rule, issue a second written opinion, thereby providing the applicant with a further opportunity to submit amendments and/or arguments to overcome any objections raised therein. A request for a second written opinion need not be filed.

*OJ EPO 2011, 532*

#### 1.1 Subject-matter which the IPEA is not required to examine

The EPO as IPEA will not perform an international preliminary examination on any claim for which no international search was performed. In this context it is not relevant whether the applicant files amendments and/or arguments that, allegedly, overcome the reasons for the decision of the ISA not to search the claims concerned (see C-IV, 4).

*Art. 17(2)(a)  
Rule 66.1(e),  
66.2(a)(vi)*

Furthermore, the EPO as IPEA will use its discretion not to carry out preliminary examination if the application relates to subject-matter listed in Rule 67 PCT to the extent that such subject-matter is not regarded as an invention or susceptible of industrial application or is excluded from patentability under the provisions of the EPC (see B-VIII, 2).

*Art. 34(4)  
Agreement EPO-  
WIPO, Art. 4  
OJ EPO 2017, A115  
OJ EPO 2007, 592*

Also, if the application fails to comply with the prescribed requirements to such an extent that no meaningful opinion can be formed on novelty,

inventive step or industrial applicability, no preliminary opinion on these questions will be established.

## 2. Despatch of a further written opinion (Form 408)

### 2.1 Procedure when the EPO was not the ISA

*Rule 66.1bis, 66.2,  
66.4, 66.4bis  
OJ EPO 2011, 532  
GL/SPE 3.19*

Where the ISR and WO-ISA were established by another European International Searching Authority (at present SE, ES, AT, FI, TR, NPI (XN) and VPI (XV)), the WO-ISA is not considered as the first written opinion for the procedure under Chapter II PCT and the examiner will examine the file, taking into account the WO-ISA and any reply from the applicant on file. If there are objections as to novelty, inventive step and/or industrial applicability, the examiner will send a WO-IPEA (considered to be the first written opinion) with a time limit for the applicant to reply as laid down in Rule 66.2(d) (normally two months).

If, despite the applicant's timely and substantive reply (in the form of amendments and/or arguments) to this WO-IPEA, there are still objections outstanding, possibly resulting from the top-up search in Chapter II (see C-IV, 5), a further written opinion or telephone minutes are issued as set out under C-IV, 2.2.

*Art. 34(2)(c)*

If the EPO as IPEA has no objections to the (amended) application for which preliminary examination has been requested, it may issue the IPER immediately if it is in possession of the elements listed in Rule 69.1(a) PCT.

### 2.2 Procedure when the EPO was the ISA

*Art. 33, 34, 35  
Rule 66.1bis,  
66.2-66.4  
OJ EPO 2011, 532*

A written opinion for the purposes of international preliminary examination is a notification issued by the IPEA which indicates any comments or objections concerning the international application. Pursuant to Rule 66.1bis(a) PCT, the WO-ISA is considered to be a (first) written opinion of the IPEA for the purposes of international preliminary examination. The EPO has notified the International Bureau under Rule 66.1bis(b) PCT that this provision is only applied by the EPO as IPEA to the extent that the WO-ISA has been established by the EPO acting as ISA.

Applicants must be given a further opportunity for interaction in Chapter II before a negative IPER is established, on condition that they have filed in due time a substantive reply to the WO-ISA in the form of amendments and/or arguments.

*OJ EPO 2011, 532*

Thus if, after reply to the WO-ISA, there are still objections outstanding, before issuing a negative IPER the examiner must send:

- as a rule, a (further) written opinion (Form 408, WO-IPEA), but:
- if a request for a telephone consultation was filed before the (further) written opinion was issued: telephone minutes;

- if a request for either a telephone consultation or a (further) written opinion (see C-VII, 1) was filed before the (further) written opinion was issued: a written opinion or telephone minutes,

in either case generally (see C-VII, 1) with a time limit to reply which is normally two months, in order to give the applicant a further opportunity to provide arguments and/or amendments in reply to any outstanding objections. Documents newly found during the top-up search (see C-IV, 5) are attached to the WO-IPEA or to the telephone minutes, as appropriate. *Rule 66.2(d)*

If the applicant has not submitted any response to the negative WO-ISA with the demand, and the top-up search in Chapter II does not reveal any new pertinent prior art, then a negative IPER, repeating the objections raised in the WO-ISA, will be issued directly.

In the exceptional situation of a non-unitary application, where all inventions examined were found novel and inventive, but still lacking unity as the only remaining objection, a negative IPER can be sent directly without a further WO-IPEA (see C-VIII, 3).

### **2.3 Supplementary international search (SIS) by another office**

When conducting preliminary examination under Chapter II, the examiner must also take into account any documents cited in any supplementary international search report (SISR) by another office which is available in the file.

If the SISR has not been received by the EPO 24 months after the priority date, the file will be sent to the examiner anyway. If, after checking, the examiner concludes that an invitation to pay additional fees in case of lack of unity (see C-V, 1) or a WO-IPEA (see C-IV, 2.2) has to be sent, this will happen as soon as possible without awaiting the SISR.

If neither an invitation to pay additional fees in case of lack of unity nor a WO-IPEA needs to be sent out before the IPER is established, the examiner waits until 27 months from the priority date to establish the IPER to allow the SISR to arrive and be taken into account.

If the IPER has not yet been established, the examiner will take the SISR into account when establishing the IPER. *Rule 45bis.8(c)*

### **2.4 Files arriving late**

If the demand has been validly received by the EPO very late, the examiner will telephone the applicant and explain the situation. In such cases applicants will then be asked whether they prefer to:

- discuss the application over the phone and receive a short time limit to file amendments (e.g. one to two weeks, set by the telephone minutes); or
- receive a WO-IPEA with a short time limit (e.g. one to two weeks); or
- receive a negative IPER without further interaction; or

- receive a WO-IPEA with a longer time limit, in which case the IPER will be issued late.

In those very exceptional cases where the file is so late that even with a time limit of one to two weeks the IPER would be issued after 28 months, applicants will be asked whether they would like a time limit to file amendments although the IPER will be late or prefer a timely but negative IPER without further interaction.

In the above-mentioned exceptional cases where after a telephone consultation the applicant does not wish to file amendments/observations but agrees that a negative IPER can be established directly, the examiner will send a direct negative IPER.

### **2.5 Request for a further written opinion**

Frequently applicants explicitly request a further written opinion (under Chapter II) if the examiner's opinion is still negative. If the applicant has not yet had a further opportunity to file amendments in Chapter II, this request must be granted (see C-IV, 2.2).

If the applicant has already had a further opportunity to file amendments, then as a rule the IPER is issued directly (but also see C-IV, 1).

### **3. Late-filed reply after a first or further WO-IPEA (408) has been sent**

In the PCT procedure, there is no loss of right for applicants if they do not meet the time limits for replying to a written opinion. The only risk the applicant takes with a late reply is that it might not be taken into account for establishing the IPER.

In practice, if the applicant's reply is received after the time limit set in the WO-IPEA (Form 408) but before an IPER (Form 409) has been started, the late-filed reply is taken into consideration for drawing up the IPER.

If a reply is received after the IPER has actually been started and the applicant has not met all the objections set out in the last written opinion, the late reply is not considered and the IPER is drawn up on the basis of the conclusions set out in the last WO-IPEA.

If a reply is received after the IPER has actually been started and all the objections set out in the last WO-IPEA have been met, the late-filed reply is taken into consideration for drawing up the IPER.

If no reply has been received, the IPER is drawn up on the basis of the conclusions set out in the last WO-IPEA.

*Rule 66.4bis*

*Rule 80.5*

*Rule 82*

*Rule 82quater*

*GL/ISPE 19.32*

*GL/ISPE 19.50*

*GL/ISPE 19.33*

## 4. Consequences of a restriction of the search

### 4.1 Submissions prompted by a restriction of the search or a declaration that no search is possible

If the search covered only some claims or part of one or more claims (see B-VIII), only the subject-matter which has been searched – as indicated in the ISR (see B-X, 8) and/or in the WO-ISA (see B-XI, 6) – can be the object of the international preliminary examination. It should always be made clear which claims have been examined. *Rule 66.1(e)*

After a restriction of the search, either because subject-matter is excluded from the search or because a meaningful search is not possible, or after a declaration that no search at all is possible, the applicant's reply may, at subsequent stages of the procedure, challenge the ISA's findings. *Art. 17(2)(a)(i) and (ii)*

However, the IPEA has no responsibility for actions taken by the ISA, and there is no provision in the PCT for an IPEA review of, or for an appeal against, such an ISA decision.

Any written arguments from the applicant relating to the completeness of the search are not to be treated as a communication with the IPEA, unless the applicant's reply contains a complaint against the findings at the search stage when the EPO acted as ISA (see C-IX, 4).

If the reply to the WO-ISA contains arguments challenging the findings at the search stage related to the restriction of the search, the examiner will mention in the WO-IPEA or IPER (under Section III) that the findings of the ISA cannot be reviewed by the IPEA.

If the applicant phones the examiner to discuss the issue orally, the examiner will inform the applicant that this is a matter which is the responsibility of the ISA under Chapter I of the PCT and that the procedure before the ISA is closed. *Rule 66.1(e)*

If the reply contains amended claims introducing unsearched matter, the applicant will be informed in the IPER (under Section III) that an opinion cannot be given for unsearched matter.

As explained in B-VIII, 1, an additional search may be made after entry into the European phase, in the examination phase, if the reasons for restricting the search can be overcome (see also EPC Guidelines C-IV, 7.3). This additional search is at no additional cost to the applicant.

### 4.2 Consequences of a declaration of no search or an incomplete search in subsequent European procedure

For unsearched subject-matter, no written opinion is established under PCT Chapter I and no examination is carried out under PCT Chapter II. Furthermore, there is no possibility to appeal the decision of the ISA (see C-IV, 4.1), so that even if the applicant were to succeed in convincing the examiner under Chapter II that the decision not to search certain subject-matter was incorrect, this has no consequences. However, in the European procedure the examining division must review the decision of the

search division (examiner) and take a final decision. This implies that in the European phase for the Euro-PCT application the examiner might have to reverse the decision of the ISA and perform a complete search (either because of the arguments filed or because of the claims having been redrafted so that a search can now be performed, see also EPC Guidelines C-IV, 7.3).

## 5. Top-up searches in PCT Chapter II

*Rule 66.1ter, 70.2(f)  
OJ EPO 2014, A57  
GL/ISPE 19.15,  
19.19-19.20*

A top-up search is mandatory at the outset of PCT Chapter II, subject to some exceptions (see C-IV, 5.2). The top-up search is performed by the EPO as IPEA in order to reveal any further relevant prior-art documents, in particular intermediate prior art that has become public since the international search was performed and that could become relevant under Article 54(3) EPC if the application enters the regional phase before the EPO. The date – or absence – of this top-up search must be indicated in the IPER.

### 5.1 Timing, basis and forms

*GL/ISPE 19.18*

The top-up search will be conducted before/at the same time as issuing the first WO-IPEA (Form 408)/telephone consultation or, where no written opinion is produced, the IPER (Form 409) (approximately within a month of the start of international preliminary examination). A further top-up search before issuance of the IPER is normally not necessary.

*Art. 34(3)(a)  
GL/ISPE 19.16*

In the case of non-unity where there is more than one invention claimed for which examination under Chapter II is demanded, the examiner will first issue an invitation to pay additional examination fees (Form 405) and then perform the top-up search for all inventions for which additional examination fees have been paid.

*Rule 70.2(f)*

The IPEA must indicate in the IPER whether or not a top-up search has been done. The date indicated in the form is the date of the latest top-up search. The box which indicates that no top-up search has been done is only ticked if all the claims are exempted from top-up search.

### 5.2 Exemptions from top-up search

*GL/ISPE 19.15*

As a general rule, a top-up search will be conducted for all the claims forming the basis for the Chapter II examination, as indicated in boxes I and III of the WO/IPER.

*Rule 66.1ter*

A top-up search is not conducted on:

*Rule 66.1(e)*

(a) subject-matter not searched by the ISA;

*Art. 34(3)*

(b) non-unity cases – inventions for which additional search fees were paid, but not additional examination fees;

*Art. 34(4)*

(c) subject-matter which, although not excluded from the search, is excluded from preliminary examination;

In addition to what is mentioned in Rule 66.1~~ter~~ PCT, the top-up search may be refused or limited by the EPO as IPEA:

- (d) where amendments contain added matter; *Art. 34(2)(b) and 19(2)*
- (e) where there is no letter explaining the basis for amendments and/or indicating what has been amended in the application; *GL/ISPE 19.17  
Rule 46.5(b) and 66.8*
- (f) where the EPO as ISA would not cite any documentary evidence as to the relevant state of the art (e.g. in case of "notorious knowledge" in the field of computer-implemented inventions).

In case (d) above, the examiner will perform the top-up search based on either the previous set of application documents or the amended set, ignoring the added subject-matter. In case (e) above, the same applies to unsupported amendments (see C-III, 4). *Rule 70.2(c)*

Where a top-up search is made for some claims or part of claims, there is no indication of:

- which claims are not covered by the top-up search (this should be derivable from the indications in Sections I and III of the WO/IPER); or
- why no or only a partial top-up search has been made.

### **5.3 Documents newly found in the top-up search, when further objections are present**

If the top-up search reveals pertinent prior art, according to present practice a WO-IPEA or a telephone consultation is the first action in Chapter II (see C-IV, 2.2). If a positive WO-ISA was drafted or the objections in the negative WO-ISA have been overcome by the applicant's amendments/arguments, see C-IV, 5.4. *GL/ISPE 3.22*

The documents found are indicated as follows: *GL/ISPE 19.21*

- (a) If the newly found documents are published after the filing date (E documents) and are relevant for novelty, they are mentioned in Section VI of the WO-IPEA and IPER (for the level of detail see B-XI, 4.3). *Rule 64.3*
- (b) If the newly found documents are published before the priority date and are relevant for novelty and/or inventive step, they are mentioned in Section V of the WO-IPEA and IPER and detailed reasoning is provided. *Rule 64.1*
- (c) If the newly found documents are published in the priority period (P documents) and are relevant for novelty and/or inventive step, and if the priority is (assumed to be) valid, the documents are mentioned in Section VI of the WO-IPEA and IPER; comments are optional

(see B-XI, 4.2). This applies only if there are other objections; otherwise, see C-IV, 5.4.

- (d) If the newly found documents are published in the priority period (P documents) and are relevant for novelty and/or inventive step, and if the priority is invalid, the documents are mentioned in Section V of the WO-IPEA and IPER and detailed reasoning is provided.

Documents found during the top-up search and mentioned in the WO-IPEA will also be mentioned in the IPER, unless rendered irrelevant by amendments or arguments provided by the applicant during the international preliminary examination. It will be always indicated in Box I of the IPER that additional relevant documents were found during the top-up search.

*OJ EPO 2024, A68*

Copies of all the cited documents are made available to the applicant. MyEPO users receive all cited documents electronically in their Mailbox. Applicants who have not opted for electronic notification receive only paper copies of non-patent literature and translations of cited patent literature by post, with digital copies of cited patent literature documents available in Espacenet (*espacenet.com*).

#### **5.4 Intended positive IPER and top-up search**

If a positive WO-ISA was drafted or the objections in the negative WO-ISA have been overcome by the applicant's amendments/arguments, and if the top-up search reveals:

- (a) no relevant documents, a positive IPER is issued directly.
- (b) pertinent prior art published before the priority date, a WO-IPEA or telephone minutes is/are issued (see C-IV, 2.2). Details of how the document is indicated can be found in C-IV, 5.3(b).
- (c) only P/E documents which are (could become) prior art under Art. 54(3) EPC in later EP proceedings (independently of the validity of the priority), a WO-IPEA with detailed novelty reasoning is sent (B-XI, 3.4); the document is introduced in Section VI and its possible relevance upon entry into the EP phase is indicated. Details of how the document is indicated can be found in C-IV, 5.3(a).
- (d) other P/E documents relevant for novelty and if the priority is (assumed to be) valid, a positive IPER is sent directly (B-XI, 3.4), and the document is mentioned in Section VI of the IPER.

*Rule 64.1*

## Chapter V – Unity of invention

### 1. Unity of invention under Chapter II

If an invitation to pay additional fees was issued during Chapter I and the applicant paid some or all of the required additional fees, and if, where applicable, the objection as to lack of unity was at least partly upheld during a protest procedure, then under Chapter II the applicant will normally be invited (using Form 405) to pay additional examination fees if all the searched inventions are also to be examined under Chapter II. Inventions for which no search fees were paid cannot be pursued and will thus also not be objected to or commented on. A review of the decision taken under Chapter I is not provided for in the PCT.

*Art. 34(3)(a)-(c)*

*Rule 68.2*

*GL/ISPE 10.74*

A single WO-IPEA/IPER is then drafted by the examiner, dealing with all the inventions for which examination fees have been paid.

In reply to the WO-ISA the applicant may have filed redrafted claims which differ substantially from those for which lack of unity was raised. In such a case it should be carefully considered whether:

- the lack of unity objection still applies to the new set of claims
- the amended claims relate to searched subject-matter
- the reasoning as to lack of unity has to be amended because of the new claims and/or the arguments presented.

Normally, the examiner under Chapter II agrees with the objection made at the search stage. Exceptionally, if this is not the case (e.g. if the search and WO-ISA were made by another office), it is possible to send out an invitation to pay further examination fees (Form 405) even if this was not done at the search stage. However, if a lack of unity objection was raised at the search stage resulting in a partial search and a different conclusion is reached under Chapter II, there is no possibility to ask for an additional search for unsearched subject-matter. In this case, examination in Chapter II is restricted to what has been searched.

Furthermore, it is possible that the original claims did not lack unity but the amended claims do. In such a case, if the amended claims lacking unity relate to unsearched subject-matter, they are not examined, and a WO-IPEA/IPER is established on searched subject-matter only (no Form 405 is to be sent out). It is also possible that the amended claims do not lack unity, but that these amended claims relate to subject-matter lacking unity with the originally searched invention or group of inventions. In such a case, the applicant is informed that the amended claims will not be examined in a WO-IPEA/IPER (no Form 405 is sent out). On the other hand, if e.g. the applicant has generalised the original independent claim so that it is no longer novel and lack of unity a posteriori occurs, then an invitation to pay additional fees is sent before the WO-IPEA/IPER.

*Rule 66.1(e)*

For information on the exceptional situation of a non-unitary application, where all inventions examined were found novel and inventive, but still lacking unity as the only remaining objection, see C-VIII, 3.

## **2. No payment of additional search fees**

If, in reply to the objection to lack of unity at the search stage, the applicant has not paid additional search fees, the WO-IPEA/IPER is based on the claims for which the search report and the WO-ISA have been drafted, taking amendments and arguments from the applicant into account. Section IV is not filled out.

## **3. Searched claims did not comply with unity of invention**

### **3.1 Payment of additional search fees without protest**

If, in reply to the objection to lack of unity at the search stage, the applicant has paid additional search fees without protest, and the application still lacks unity, the objection indicated on Form 206 and in the WO-ISA will normally be confirmed, where necessary adapted to the amendments/arguments filed by the applicant.

*Art. 34(3)(a)*  
*Rule 68.2*

Form 405 is sent out, requesting additional examination fees only for those inventions which have been searched and which are still present in the claims.

### **3.2 Payment of additional search fees under protest**

*Rule 68.3(c)*  
*GL/ISPE 10.78*

If, in reply to the objection to lack of unity at the search stage, the applicant has paid additional search fees under protest and

- (a) the Review Panel decided that the protest was fully justified, no invitation to pay additional fees (Form 405) is sent. The Review Panel's decision is followed and the WO-IPEA/IPER is established for all searched inventions;
- (b) the Review Panel decided that the protest was partly justified, an invitation to pay additional fees (Form 405) is sent, with the reasoning and the number of inventions adapted to the Review Panel's decision.

The examiner should ensure that the lack of unity objection raised at the search stage is still valid for the newly filed claims.

### **3.3 No request for payment of additional search fees**

*Rule 68.1*  
*GL/ISPE 10.76*

If, at the search stage, an objection of lack of unity was raised but exceptionally it was chosen not to request the applicant to pay additional search fees, the examination is carried out on the entire application. No invitation to pay additional fees (Form 405) is sent; instead, the WO-IPEA/IPER is established for all searched inventions. Under Section IV, it is indicated that the requirement of unity is not fulfilled.

#### **4. Applicant's reply to the invitation to pay additional fees (Form 405)**

##### **4.1 No payment of additional examination fees or failure to reply**

If, in reply to the invitation in Form 405, the applicant neither restricts the claims nor pays additional examination fees, or if the applicant does not reply, the WO-IPEA/IPER is established on the basis of the main or first invention mentioned in the invitation to pay additional fees (Form 405) and for which the search fee has been paid. Section IV is filled out and the reasons for lack of unity are given on the separate sheet.

*Art. 34(3)(c)*  
*Rule 68.4-68.5*  
*GL/ISPE 10.75*

If, in reply to the invitation in Form 405, the applicant restricted the claims, the examiner has to check whether the restricted set of claims is unitary and whether all claims relate to searched subject-matter.

If this is the case, the WO-IPEA/IPER is established on the restricted set of claims, and Section IV is not filled out.

If this is not the case, the WO-IPEA/IPER is established on the main or first invention mentioned in Form 405 and for which the search fee has been paid; Section IV is filled out, and any claims relating to non-searched subject-matter are indicated in Section III.

##### **4.2 Payment of additional examination fees without protest**

If, in reply to the invitation in Form 405, the applicant pays additional preliminary examination fees without protest, the WO-IPEA/IPER is established on the basis of those inventions for which examination fees have been paid. Section IV is filled out and the reasons for lack of unity are given on the separate sheet.

If, in reply to the invitation in Form 405, the applicant restricted the claims and paid additional fees, the examiner has to verify that the restricted set of claims does not contain more inventions than those for which additional fees have been paid and that the restricted claims relate to subject-matter that has been searched.

If this is the case, the WO-IPEA/IPER is established on the restricted set of claims, and Section IV is filled out.

If this is not the case, the WO-IPEA/IPER is established on as many inventions mentioned in Form 405 as additional fees have been paid for. Section IV is filled out and any claims relating to unsearched subject-matter are indicated in Section III.

In both cases the reasons for the lack of unity are given on the separate sheet.

##### **4.3 Payment of additional examination fees under protest**

In reply to Form 405, applicants may pay some or all of the additional fees under protest. If they do so, then this triggers the protest procedure for determining whether the request for payment of the additional fees was justified (see also C-V, 5).

*Rule 68.3(c) and (e)*  
*GL/ISPE 10.78*

**5. Protest procedure***Rule 68.3(c), (d)*

The protest procedure consists of a review within the IPEA first by the formalities officer and then by a Review Panel.

**5.1 Admissibility of the protest as checked by the formalities officer***Rule 68.3(c), (e)*  
*GL/ISPE 10.79*

Before initiating the protest procedure the formal admissibility of the protest in the sense of Rule 68.3(c) (Chapter II) must be checked.

To be admissible the protest should satisfy the following requirements:

- (a) The applicant must have paid the prescribed protest fee (Rule 68.3(e)), and
- (b) The payment under protest must be accompanied by a reasoned statement, i.e. the reasoned statement should have been filed with the payment or at the latest within the time limit set in Form 405 (Chapter II).

The reasoned statement must comply with Rule 68.3(c); i.e. applicants should argue why the international application complies with the requirement of unity of invention or why the amount of the required additional fee is excessive. In the protest applicants should question the number of additional examination fees that they have been invited to pay, and not the amount of a single additional fee.

The payment of the protest fee and the filing of a purported reasoned statement are assessed by specially trained formalities officers. If the formalities officer finds any deficiencies, the applicant is informed of them by way of Form 420 or Form 424. Any substantive analysis is made by the Review Panel when assessing the justification of the protest.

**5.2 The work of the Review Panel***GL/ISPE 10.80*

For the composition and purpose of the Review Panel, see B-VII, 7.2. The names of the members of the Review Panel are made public on Form 420.

The scope of the review is limited to those inventions for which additional fees have been paid. If the applicant's reasoning is not related to those inventions, the Review Panel will come to the conclusion that the protest is not or is only partially justified, depending on the case.

*GL/ISPE 10.81*

If the Review Panel determines that the protest is wholly justified, it will inform the applicant with Form 420 (Decision on Protest Chapter II). This also applies if the Review Panel's finding results in the application not lacking unity. It is not necessary to give any reasoning unless the Review Panel decides that such reasoning would be beneficial. Furthermore, the Review Panel will order the reimbursement of all the additional fees and the protest fee. The examination will be carried out on the inventions for which the fees are paid, and the non-unity reasoning and the number of inventions in the IPER (or WO-IPEA) will be adapted to the Review Panel's decision.

If the Review Panel considers that the protest is not justified at all, it will communicate this to the applicant using Form 420. Reasoning must be given, indicating why the request for payment of additional fees is upheld and addressing the applicant's relevant arguments. The examination will be carried out on the inventions for which the fees are paid.

If the Review Panel considers that the protest is only partially justified, it will communicate this to the applicant using Form 420. Reasoning must be given, indicating why the request for payment of the additional fees is partially upheld and addressing the applicant's relevant arguments. The examination will be carried out on the inventions for which the fees are paid, and the non-unity reasoning and the number of inventions in the IPER (or WO-IPEA) will be adapted to the Review Panel's decision. The Review Panel will order the reimbursement of the corresponding additional fees but not the protest fee.

The formalities officer will send the decision of the Review Panel to the applicant and the IB. The decision on protest (Form 420) will be sent out together with the WO-IPEA or IPER in order to ensure that both are consistent.

*GL/ISPE 10.82*

## Chapter VI – Time limits

### 1. Start of the international preliminary examination

The EPO as IPEA will start the international preliminary examination when it is in possession of all of the documents and fees required under Rule 69.1(a). It will not wait until the applicable time limit under Rule 54bis.1(a) has expired unless the applicant expressly requests it to do so.

*Rule 66.1,  
Rule 66.4bis,  
Rule 69.1(a),  
Rule 54bis.1(a)  
GL/ISPE 19.07*

Where the statement concerning amendments filed with the demand (Box No. IV, item 1, of the PCT demand form PCT/IPEA/401) indicates that the applicant would like the international preliminary examination to take into account amendments under Article 34 but the applicant failed to submit them with the demand, the IPEA will invite the applicant to submit the amendments within a set time limit, pursuant to Rule 60.1(g) (Form PCT/IPEA/431). The IPEA will not start the international preliminary examination until it has received them or before expiry of the time limit set in the invitation pursuant to Rule 60.1(g), whichever occurs first.

*Rule 53.9(c), 60.1(g),  
66.4bis, 69.1(e)*

Similarly, where the applicant would like the international preliminary examination to take into account amendments under Article 19 and any accompanying statements, the IPEA will not start the international preliminary examination before it has received a copy of the amendments.

The EPO as IPEA does not apply Rule 69.1(b) and 69.1(b-bis), i.e. it will not start the international preliminary examination at the same time as the international search.

### 2. Time limit for international preliminary examination

The time limit for establishing the international preliminary examination report is laid down in Rule 69.2. Where the documents required for the preliminary examination were received in due time, the EPO will establish the IPER within 28 months from the priority date.

*Rule 69.2(i)  
GL/ISPE 3.24, 19.10*

The applicant has a time limit of 31 months from the priority date to enter the European phase before the EPO.

*Rule 159(1) EPC  
Art. 22(1), (3)  
Art. 39(1)(a), (b)*

### 3. Extension of the time limit

Failure to meet the time limit set in the WO-ISA or the WO-IPEA does not constitute a formal loss of rights (see C-IV, 3).

Requests for extension of the time limit for replying to the WO-ISA where it is considered as a first opinion of the IPEA (see C-IV, 2.2) are handled by the formalities officers. As a rule, a one-month extension will be granted if requested before expiry of the normal time limit under Rule 54bis and on condition that the time limit so extended does not expire later than 25 months from the (earliest) priority date; further extensions are not allowed. The extension does not apply to the time limit for filing the demand, which cannot be extended.

*Rule 66.2(e)*

A request for extension of the time limit to reply to a WO-IPEA (Form 408) will be granted only if there is sufficient time available to grant the extension in view of the time limit laid down in Rule 69.2(i), i.e. if the extended time limit does not expire later than 27 months from the earliest priority date and the request is made prior to expiry of the set time limit.

If the ISR was delayed so that the time limit of 28 months for establishing the IPER cannot be met, the request for extension should be granted.

## Chapter VII – Other procedures in examination

### 1. Request for an interview or telephone consultation

Art. 34(2) gives the applicant the right to communicate orally with the IPEA. Thus, a request for a telephone conversation from the applicant or the agent (including those overseas) will be granted, but only after the subject-matter on which the international preliminary examination is to be based has been clarified, i.e. only after the applicant has filed a written response to the WO-ISA, or, if the international search report has raised an objection of lack of unity, to an invitation to restrict the claims or to pay additional fees (Form 405). In that way, the subject-matter to be discussed in the telephone conversation is clarified upfront. Requests for personal interviews are not granted. However, if a personal interview is requested, the examiner should inform the applicant by phone that it is the EPO's policy not to grant personal interviews, but that the matter can be discussed in the form of a telephone consultation subject to the above condition.

*Art. 34(2)*

*Rule 66.6*

*GL/ISPE 19.41-19.46*

If the applicant has requested a telephone consultation the following applies:

*OJ EPO 2011, 532*

- (a) as a general rule the applicant has, upon request, the right to one telephone consultation. Thus, if the applicant files a request for consultation by telephone before a second written opinion is issued, the EPO as IPEA will comply with it;
- (b) after a telephone consultation the applicant will be sent the minutes and should in general be given a time limit (normally two months) to file amended claims and/or arguments. In such a case, no second written opinion will be issued. If, in a telephone consultation, the applicant has expressed the intention not to file further observations/amendments, in other words if the applicant has agreed to receive an IPER without further interaction, minutes of the telephone consultation are sent and these are directly followed up with an IPER. No time limit is set in the minutes.
- (c) if, before issuance of the (further) written opinion (Form 408), the applicant has requested a telephone consultation and/or alternatively a further written opinion, the examiner has the discretion to decide which kind of interaction is most suitable for the application in question;
- (d) in the specific case of a telephone consultation being requested after issuance of the further written opinion but before the date on which the IPER is established, the request must be granted before a negative IPER is issued. However, in this case the applicant does not have the right to file further amendments, unless an agreement has been explicitly reached (see below).

*Rule 66.6*

*Rule 66.6*

When a telephone consultation is arranged, the matters for discussion should be clearly stated in advance. If the arrangement is made by telephone, the examiner should record the particulars and briefly indicate in the file (Form 428: minutes of telephone conversation) the matters to be

*GL/ISPE 19.45*

discussed as well as the date and time for the consultation. A copy of the arrangements recorded is sent to the applicant.

If the applicant wishes to discuss amended claims during a telephone consultation, a copy of such claims should be sent in advance to the examiner in order to enable appropriate preparation. The time limit for such submissions will be set by the examiner on the record of the arrangement.

*GL/ISPE 19.46*

The result of the telephone consultation is recorded by the examiner and added to the file. The recording will depend upon the nature of the matters under discussion and will be forwarded to the applicant.

If the consultation replaces the second written opinion or takes place after a reply to a second written opinion but has ended with an agreement on amendments, Form 428 will include:

- a warning that the amendments cannot be made by the IPEA and
- an invitation for the applicant to file amended sheets normally within one month, but at least one month before the deadline for the IPER (unless as agreed with respect to the late issue of the IPER).

In those cases where the consultation takes place after a reply to a second written opinion and no agreement has been reached, applicants are informed that their arguments will be taken into account when establishing the IPER.

Enquiries as to the processing of files may be filed online using the dedicated form (EPO Form 1012) (see the Notice from the EPO dated 2 August 2016, OJ EPO 2016, A66).

## **2. Confidentiality**

*Art. 38*

*Rule 94.2*

*GL/ISPE 3.26*

Without the applicant's authorisation, the IB and the EPO as IPEA may not allow access to the file of the international preliminary examination by third parties, except by the elected Offices once the IPER has been established.

*Art. 36(3)*

*Rule 71.1(a)*

*Rule 73.2*

*Rule 94.1(c), (d), (e)*

*GL/ISPE 3.25A*

Once the IPER has been established and transmitted to the IB, the latter sends a copy of the IPER, together with its translation (as prescribed) and its annexes (in the original language), to each elected Office. As from that time, the IB, on behalf of the EPO as elected Office, also furnishes copies of the IPER as well as of any document transmitted to it under Rule 71.1 by the IPEA to anyone who requests them.

*Rule 94.2(b), (c)*

Once the IPER has been established, at the request of any elected Office, the EPO as IPEA will provide access to any document contained in its file, except to any information in respect of which it has been notified by the IB that the information has been omitted from publication in accordance with Rule 48.2(l) or from public access in accordance with Rule 94.1(d) or (e).

*Rule 94.1(c)*

*Rule 94.3*

*GL/ISPE 3.27*

Provided international publication has taken place, once the IPER has been established, third parties may access the file of the international preliminary examination via those elected Offices whose national law allows access by

third parties to the file of a national application (see also EPC Guidelines A-XIII, 10.3). Such access may be allowed to the same extent as provided by the national law for access to the file of a national application.

### 3. Examination of observations by third parties

For details on third-party observations please refer to E-II.

For relevant third-party observations in Chapter II the following applies:

*GL/ISPE 17.69*

- (a) If a negative IPER is envisaged and a second written opinion has not been sent, a WO-IPEA (Form 408) is drafted taking into account the third-party observations and the applicant's comments where available, and referring to the new prior-art documents in section V (see also C-IV, 2.2).
- (b) If the IPER would have been negative even without the third-party observations and a WO-IPEA has already been sent before receipt of these observations, no further written opinion is sent before establishment of the IPER.
- (c) If a WO-IPEA has already been sent before receipt of the third-party observations and the IPER would have been positive without the third-party observations, a new WO-IPEA is issued or the applicant is called, whichever course of action is considered the more expedient, in particular in the light of the deadline for issuing the IPER.

In cases (b) and (c) above, the IPER is established taking into account the third-party observations and the applicant's comments, and referring to the new documents where appropriate in Section V of the IPER.

- (d) If a positive IPER is envisaged since, even though the third-party observations may refer to more relevant documents than the ones on file, they do not prejudice novelty and inventive step, the newly cited relevant documents are dealt with in the reasons in favour of patentability in Section V on the separate sheet as appropriate.

If the documents are relevant but do not add anything to what was already available, it is left to the examiner's discretion whether they need to be quoted in the IPER. For example, in those cases where the documents are a better starting point for the problem-solution approach, examiners may wish to review their argumentation in support of the positive assessment of inventive step.

Third-party observations which are not relevant or not sufficiently understandable (see E-II for observations not in an EPO official language) do not need to be dealt with substantially in the WO-IPEA and/or in the IPER. A comment is included in Section V of the WO-IPEA and/or in the IPER indicating that the third-party observations have been taken into account and found not to be relevant or that the third-party observations could not be taken into account and why.

## Chapter VIII – The IPER

### 1. Opinion given in the IPER (Form 409)

Art. 35(2) specifies that the report shall not contain any statement on the question of whether the claimed invention is or seems to be patentable or unpatentable according to any national law. Moreover, the purpose of the preliminary examination is merely to give an opinion, but it does not lead to a grant or a refusal of the application. In these circumstances, therefore, the report should not give the impression that any part of the application may or may not be allowable. It will only state whether or not the claims meet certain criteria.

*Art. 35(2)*  
*GL/ISPE 19.48*

### 2. Completing the IPER

The IPER is drafted in the same way as the WO-ISA, i.e. a positive or negative opinion will be given for all claims, taking into account the arguments and/or amendments submitted by the applicant.

Therefore, the same criteria apply to the IPER as to the WO-ISA with respect to all examination issues (see also B-XI).

In particular the IPER will only be established for claims which have been searched (as indicated in the WO-ISA); any amended claims that are directed to subject-matter not searched will not be considered and an indication will be made in Section III of the IPER (non-establishment of opinion), with reasons given on the separate sheet.

*Rule 66.1(e)*  
*GL/ISPE 19.25*

If no reply has been received to a written opinion or the objections raised in a previous written opinion are still valid, the comments contained in that written opinion can be transferred to the corresponding section in the IPER. However, if the applicant has submitted arguments in favour of the claims, then even if the objections previously raised are still valid, the examiner should, in a neutral way (i.e. without direct reference to the letter of reply in the sense of "see reply/arguments from the applicant"), deal with at least the main arguments from the applicant in order to ensure that the applicant knows that the arguments made have been considered.

If arguments, facts and evidence, such as the results of a comparative test, produced by an applicant in response to a written opinion are of crucial importance in assessing inventive step, the examiner may base the argumentation in the IPER on the applicant's response. This is of importance to other offices which need to know why a particular conclusion has been reached. However, since the IPER should be written in a neutral way and should be self-contained, the examiner should not append to the IPER portions of the applicant's reply or refer directly to the applicant's letter of reply.

## 2.1 Sequence listings

*Rule 5.2,  
13ter.2,  
66.1(e)  
OJ EPO 2011, 372  
OJ EPO 2013, 542  
OJ EPO 2025, A64  
OJ EPO 2021, A97  
OJ EPO 2022, A60  
OJ EPO 2024, A54,  
A55  
GL/ISPE 9.39, 15.12,  
15.13, 17.37*

Where a sequence listing in electronic form and compliant with WIPO Standard ST.26 is not available to the EPO as IPEA, the applicant may be invited to furnish such a sequence listing under Rule 13ter.1(a) and to pay the late furnishing fee under Rule 13ter.1(c) within a non-extendable period of one month from the date of the invitation.

Where no (complete) international search was carried out because the applicant did not file an electronic sequence listing conforming to WIPO Standard ST.26 in response to a request from the ISA or did not pay the late furnishing fee, the IPER will indicate under Section III that the examination is limited according to Rule 13ter.2 to the same extent as the search was limited because the applicant failed to comply with Rule 5.2 (no sequence listing) and/or Rule 13ter.1(a) (no computer-readable sequence listing). The examiner also indicates in Section III of the IPER that the examination is also limited according to Rule 66.1(e) because the search was incomplete. In such cases no invitation to file a sequence listing is issued by the EPO as IPEA and applicants are advised not to file sequence listings at this late stage.

## 3. Positive or negative IPER

As for the WO-ISA, the examiner needs to indicate whether the IPER is to be considered positive or negative. The same criteria apply as in B-XI, 3.4.

In the special case of a non-unitary application, where all inventions examined (normally after issuance of an invitation to pay additional fees (Form 405); see C-V, 1) were found novel and inventive, but still lacking unity – as the only remaining objection – the IPER is marked as negative. Under Section V, a positive statement as to novelty and inventive step is given for all examined inventions, and the objection as to lack of unity is reasoned under Section IV.

In this special case, the negative IPER can be sent directly without any further written opinion, as an exception to the general principle outlined in C-IV, 2.2, that prior to issuing a negative IPER a WO-IPEA (Form 408) is to be sent. The reason for this exception is that the applicant is entitled to have multiple inventions examined in Chapter II if additional fees have been paid, so that there is no objection to be raised in the WO-IPEA.

In the case of a non-unitary application where no additional search fees were paid and the report on the first invention is positive, the IPER is also marked as negative (because the non-unity objection will prevent a direct grant upon entry into the European phase) and can be sent directly. Under Section V, a positive statement as to novelty and inventive step is given for the first invention only. Section IV is not filled out (see C-V, 2).

## 4. Rectification of the IPER

*Rule 66.4bis*

Since an IPER is a non-binding opinion and not a decision, the PCT provides for neither opposition nor appeal against it. Establishment of the IPER is normally the end of the international phase. Any further observations or amendments the applicant wishes to make should therefore be addressed to the elected Offices and not to the IPEA.

Only when there is an error in the IPER or the IPER has been issued when in fact a second written opinion should have been issued (see C-IV, 2.2) will the file be transmitted to the examiner to decide whether or not to issue a corrected IPER.

*GL/ISPE 19.34*

In rare cases, the report may be incorrect, for example because it was based on wrong application documents or citations which are wrongly cited or are not comprised in the state of the art or on new documents cited for the first time in the IPER, or because amendments to the claims were overlooked.

In such cases, if there is at least one week before the actual deadline (normally 28 months from the priority date), a new Form 409 is completed with the correct information, and the corrected IPER is sent to the applicant and to WIPO.

*GL/ISPE 19.35*

In cases where there is less than one week before that deadline, or where the deadline has expired, applicants are called to ask whether they still wish to receive a corrected IPER. If this is the case, a corrected IPER is issued. If the applicant declines to wait for a corrected IPER because of the deadline, Form 428 (minutes of telephone consultation) is completed, indicating the error in the IPER such that, in the regional phase, the applicant may cite the content of this form as evidence, and Form 428 is transmitted for information.

If, despite the applicant's request for rectification, the IPER does not contain any of the defects mentioned above, the formalities officer informs the applicant with a standard letter that the international preliminary examination phase has come to an end. Any further comments may only be addressed to the elected Offices on entry into the national phase.

## Chapter IX – Special requests

### 1. Withdrawal of demand under Chapter II

Applicants are entitled to a refund of the whole amount of the international preliminary examination fee if the demand is withdrawn before 30 months from the priority date and on condition that international preliminary examination has not started. If the examiner has actually started to examine the file, no refund will be made. The starting date of international preliminary examination can in most cases be derived from Form PCT/IPEA/409, which in Box I, point 6, indicates the date of the top-up search (Rule 70.2(f)). C-IV, 5.1, explains that the top-up search is conducted at the start of international preliminary examination and is usually not repeated before the IPER is issued.

*Rule 58.3*

*Rule 90bis.4*

*OJ EPO 2017, A115*

*OJ EPO 2018, A24*

The withdrawal of the demand will be effective upon receipt of a notice from the applicant to the IB. However, the applicant may also submit the notice of withdrawal to the EPO as IPEA. In this case, the EPO as IPEA marks the date of receipt on the notice and transmits it promptly to the IB. The notice is considered to have been submitted to the IB on its date of receipt at the EPO as IPEA.

The signature of each applicant is required if the demand under Chapter II is withdrawn.

*Rule 90bis.5*

### 2. Request for examination of a different set of claims

The filing of different sets of claims for different elected States or of different (main and auxiliary) requests based on different sets of claims is not accepted since examining such claims is both time-consuming and against the intention of the PCT. Auxiliary requests are not provided for under the PCT because Rule 66.1(c) provides that, where Art. 19 amendments are made, the international preliminary examination is based on these amendments, unless they are superseded or reversed by a later amendment under Art. 34, and furthermore because Rule 70.16(a) provides for the annexing of the latest set of application documents to the IPER. The simultaneous examination of several co-pending requests is not compatible with the sequential consideration of single requests provided for in the above-mentioned Rules.

*Rule 66.1(c)*

*Rule 70.16(a)*

If it is clear which request is the preferred (e.g. the main request), the WO-IPEA/IPER is established on that request; a remark is added in the WO-IPEA/IPER that the treatment of different requests (or main and auxiliary requests) is not provided for under the PCT.

If it is not clear which request is preferred (different requests with no preferred order), the applicant is asked, preferably by telephone, to furnish one set only or to state which set/request should be used for the examination.

If the applicant does not reply and/or insists on a plurality of sets, the WO-IPEA/IPER is drawn up on the first set, with a remark on the separate sheet under Section I.

**3. Request for examination of certain claims only**

Applicants sometimes file a request for examination of certain claims only without actually restricting the set of claims, e.g. in order to achieve a positive IPER although the findings for some claims would be negative. An example would be where in reply to the WO-ISA, which contained a negative opinion on claims 1-5 and a positive one on claims 6 and 7, the applicant does not change the claims but asks that the IPER be established for claims 6 and 7 only.

*Art. 34(3)(c)*  
*Art. 34(4)(a)(i) and (ii)*  
*Art. 35(2)*

A request for examination of certain claims only is not accepted since the IPER is established on the claims on file and can only be restricted by the examiner, e.g. on the grounds of lack of unity with not all fees paid, unsearched claims, clarity or added subject-matter. A restriction at the request of the applicant would be contrary to Art. 35(2), which states that the IPER relates to "each claim". In such a case the applicant is informed that unless a restricted set of claims is filed the IPER will be established for all claims.

**4. Complaint against the findings at the search stage**

*Art. 17(3)(a),*  
*Art. 17(2)(a)(i) and (ii)*

If the search was restricted and the applicant complains about the findings at the search stage, the complaint will be dealt with by the Complaint Handling Unit at the EPO.

In order to ensure that a submission is treated as a complaint, applicants are advised to use the online complaint form and explicitly state that their reply is to be considered as a complaint. A letter of reply in which an applicant submits only substantive counterarguments contesting the findings of the ISA is not a complaint (see also C-IV, 4.1).

While there is no provision for a review based on substantive arguments, the ISA may exceptionally have to issue a corrected ISR in the event of a procedural flaw.

<b>Chapter VI – Notification</b>	<b>VI-1</b>

## **Chapter I – Introduction**

Part E contains guidelines for those procedural steps in respect of international applications which may occur at a number of stages in the procedure.

## Chapter II – Observations by third parties

Third parties may, anonymously if so desired, file observations under the PCT which, unlike observations under the EPC, should exclusively refer to prior art relevant to the novelty and/or inventive step of the invention claimed in the international application.

*PCT/AI sections 801-805*

*GL/ISPE 15.68, 16.57 and 17.69*

The observations are to be submitted electronically to the IB using the online tool provided by WIPO between the date of international publication and 28 months from the priority date of the international application. They may be filed in any language of publication; the cited prior art may be in any language. For more details, see the guide entitled "ePCT Third Party Observations" published by WIPO.

*Rule 48.3*

The applicant is notified by the International Bureau (IB) of any such observations and may file comments within 30 months from the priority date.

The IB will promptly communicate any third-party observation and any comment by the applicant to the ISA, the SISA and the IPEA, unless the (supplementary) international search report or the international preliminary examination report (IPER) has already been received by the IB.

Promptly after the expiration of 30 months from the priority date, the third-party observation(s) and the applicant's comment(s) will be sent to all designated Offices and elected Offices. The EPO as designated/elected Office will consider a third-party observation filed during the international phase after entry into the European phase as to its contents once that observation becomes available to it. However, provided the examining division has assumed responsibility, the EPO will make every effort to issue the next office action within three months of expiry of the period under Rule 161 EPC, but only on condition that the third party has clearly expressed its wish that such action be taken, and that the observation was substantiated and not filed anonymously. A third party wishing to achieve the above-mentioned result in the European phase should, therefore, make this clear in the observation or else file the observation with the EPO as designated/elected Office (see also EPC Guidelines E-VI, 3, last paragraph).

Any third-party observations/comments thereto will be made available for public inspection.

If the third-party observations and/or prior art are not in an official EPO language, the formalities officer at the EPO will invite the third party to submit a translation of the observations and/or the prior art in line with the European procedure (see EPC Guidelines E-VI, 3), but setting a shorter time limit within the boundaries of the required strict PCT deadlines. No invitation is issued if these deadlines cannot be respected or if the third-party observations were filed anonymously.

*Art. 14(1) EPC*

If the third-party observations and/or prior art are not in an official EPO language and a translation is not or cannot be filed, the examiner should

nevertheless take them into account to the extent that this is feasible, in particular when they seem to be *prima facie* relevant (e.g. from the drawings of the prior-art documents). The examiner may add a remark in the WO-ISA that a translation will be required to allow a detailed assessment of the document(s).

Even when third-party observations have been filed, the deadlines indicated for issuing the different office actions under the PCT should be respected in order to ensure timely issuance of the ISR, SISR or IPER.

For third-party observations received during Chapter I, see B-IV, 1.3. For third-party observations received during Chapter II, see C-VII, 3.

## Chapter III – Patent Prosecution Highway (PPH)

### 1. General

The Patent Prosecution Highway (PPH) enables an applicant whose claims have been determined to be patentable/allowable to have a corresponding application which has been filed with a PPH partner office processed in an accelerated manner while at the same time allowing the offices involved to exploit available work results.

Currently, the EPO's PPH partner offices are:

*OJ EPO 2016, A44*

JPO (Japan)	OJ EPO 2022, A115
MOIP (South Korea)	OJ EPO 2022, A115
CNIPA (China)	OJ EPO 2022, A115
USPTO (USA)	OJ EPO 2022, A115
ILPO (Israel)	OJ EPO 2020, A125
CIPO (Canada)	OJ EPO 2020, A137
IMPI (Mexico)	OJ EPO 2020, A21
IPOS (Singapore)	OJ EPO 2020, A138
IPA (Australia)	OJ EPO 2022, A58
SIC (Colombia)	OJ EPO 2022, A88
MyIPO (Malaysia)	OJ EPO 2020, A82
IPOPHL (Philippines)	OJ EPO 2020, A83
INPI (Brazil)	OJ EPO 2024, A99
INDECOPI (Peru)	OJ EPO 2022, A116
INAPI (Chile)	OJ EPO 2024, A56
IPONZ (New Zealand)	OJ EPO 2024, A98
MOIC (Bahrain)	OJ EPO 2025, A19

The PPH programmes with Rospatent (Russian Federation) and EAPO (Eurasia) have been suspended.

*OJ EPO 2022, A44 and A45*

Under the PPH (pilot) programme a PPH request can be based on:

- (i) the latest PCT work product (WO-ISA or IPRP/IPER) established by one of the PPH partner offices as ISA or IPEA (PPH based on PCT work products) (except under the PPH (pilot) programme with INPI (Brazil)); or
- (ii) any national work product (office action indicating patentable/allowable claims) established during the processing of a national application or of a PCT application that has entered the national phase before one of the PPH partner offices (PPH based on national work products).

### 2. PPH based on a WO-ISA established by the EPO as ISA

Where the EPO is the ISA and the international application contains claims that are determined to be patentable/allowable by the EPO as ISA, the applicant may under the PPH (pilot) programme request accelerated examination at the EPO's PPH partner offices when the application has entered the national phase before these offices. The procedures and requirements for filing a request with the EPO's PPH partner offices are available from their respective websites.

*OJ EPO 2015, A93*

Irrespective of the PPH (pilot) programme, any applicant may request accelerated examination under the PACE programme in the procedure before the EPO as designated Office at any time (see EPC Guidelines E-VIII, 4.1).

*OJ EPO 2015, A93*

**3. PPH based on an IPER established by the EPO as IPEA**

Under the PPH (pilot) programme, a PPH request can also be based on an IPER established by the EPO as IPEA. The procedures and requirements for filing a request with the EPO's PPH partner offices are available from their respective websites.

Irrespective of the PPH (pilot) programme, any applicant may request accelerated examination under the PACE programme in the procedure before the EPO as elected Office at any time (see EPC Guidelines E-VIII, 4.1).

## Chapter IV – Time limits in the international phase

### 1. Computation of time limits in the international phase

If a time limit in any procedure in the international phase starts to run upon issue of a communication, the day of the date of that communication is decisive for computing the end of that time limit.

*Rule 80.6*  
*Rule 126 - 129,*  
*131(2) EPC*  
*PCT Newsletter*  
*4/2021, 10*

If an applicant proves to the satisfaction of the EPO as receiving Office, ISA, SISA or IPEA that the dispatch of a communication did not take place on the date that the document bears, the actual date of mailing will be taken as the basis for computing the applicable time limit. Furthermore, if a communication was received more than seven days after the date it bears, the applicable time limit will be extended by the number of days by which the communication was received later than seven days after the date it bears.

### 2. Excuse of delays in meeting time limits and extension of time limits in the international phase

In the case of a delay in meeting time limits in the international phase due to force majeure, the applicant or any interested party has to provide the EPO with evidence that a time limit fixed in the PCT Rules was not met due to war, revolution, civil disorder, strike, natural calamity, epidemic, a general unavailability of electronic communications services or other like reason in the locality where the interested party resides, has their place of business or is staying, and that the relevant action was taken as soon as reasonably possible. Any such evidence must be provided to the EPO no later than six months after the expiry of the time limit applicable in the given case. If such circumstances are proven to the satisfaction of the EPO, the delay in meeting the time limit will be excused.

*Rule 82quater.1*  
*PCT/AI, Section 111*  
*WIPO PCT Guide*  
*11.065, 11.065A*

In the case of a delay in meeting time limits in the international phase due to the unavailability at the EPO of any of the permitted electronic means of communication or means of online payment, applicants may submit a request for excuse of the delay indicating that the time limit was not met due to the unavailability of one of the permitted electronic means of communication or means of online payment on a specific date. They are not required to submit evidence to the EPO. Reference to the notification from the EPO of unavailability of electronic means of communication as published by the International Bureau will be sufficient for the EPO to process the applicant's request. The applicants must, however, perform the relevant action on the next working day on which all permitted means of electronic filing or means of online payment are available. Applicants are informed without delay of the EPO's decision via Form PCT/RO/132.

*Rule 82quater.2*  
*PCT/AI, Section 111*  
*WIPO PCT Guide*  
*11.065B, 11.065C*  
*Official Notices (PCT Gazette) –*  
*26 November 2020,*  
*254-255*  
*PCT Newsletter*  
*12/2020, 1*  
*OJ EPO 2020, A120*

The EPO may also establish a period of extension of time limits within which a party has to perform an action before the EPO when a state in which it is located is experiencing a general disruption caused by an event listed in Rule 82quater.1(a) PCT which affects its operations.

*Rule 82quater.3*

*Rule 26bis.3*  
*OJ EPO 2020, A120*

The possibilities of excusing a delay due to force majeure or the unavailability of any of the permitted electronic means of communication or means of online payment and extending time limits provided for in Rule 82*quater*.1, 82*quater*.2 and 82*quater*.3 PCT only apply to time limits fixed in the PCT Rules. Therefore, they apply neither to the priority period pursuant to Article 8(2)(a) PCT in conjunction with Article 4C Paris Convention, nor to the time limit for entering the European phase in accordance with Articles 22 and 39 PCT. A right of priority may be restored only under strict conditions (see Rule 26bis.3 PCT, Guidelines A-VI, 1.5 and EPC Guidelines A-XV, 5). It is therefore recommended that any subsequent application be filed as early as possible. For the legal remedies available under the EPC in cases of non-observance of the time limit for entering the European phase, see EPC Guidelines A-XIII, 9.2.

## **Chapter V – External complaints**

External complaints may concern any service or product delivered by the EPO, including all PCT products, and may be submitted by any person, including applicants (see EPC Guidelines E-VI, 4).

## Chapter VI – Notification

In the international phase, the EPO notifies communications on paper or in electronic form.

Notification in electronic form may be effected to an activated EPO Mailbox, which can be accessed through MyEPO. For further details, see EPC Guidelines E-II, 2.3. International agents and applicants who do not have their residence or principal place of business in an EPC contracting state but are entitled to act as representatives before the EPO in PCT international phase proceedings can set up a PCT Link to receive electronic notification via Mailbox of communications from the EPO in the international phase where it acts as ISA, SISA or IPEA.

*OJ EPO 2024, A20,  
A21  
OJ EPO 2025, A27,  
A28*

Any interested applicant or agent can open an ePCT account and link their international applications to it. ePCT offers immediate online access to any document issued by the offices involved in the PCT procedure. Users can activate an automatic email notification service for newly added documents. ePCT can also be used to submit documents to participating receiving Offices (including the EPO), participating Authorities (including the EPO as ISA and IPEA) and the IB (see A-II, 1.2.1).

*OJ EPO 2014, A107*

<b>2.</b>	<b>Determining priority dates</b>	<b><u>VI-2</u></b>
2.1	Examining the validity of a right to priority	<u>VI-2</u>
2.2	The same invention	<u>VI-2</u>
2.3	Priority claim not valid	<u>VI-2</u>
<b>3.</b>	<b>Claiming priority</b>	<b><u>VI-2</u></b>
3.1	General remarks	<u>VI-2</u>
3.2	Declaration of priority	<u>VI-2</u>
3.3	Certified copy of the previous application (priority document)	<u>VI-2</u>
3.4	Translation of the previous application	<u>VI-2</u>
3.5	Withdrawal of priority claims	<u>VI-2</u>
3.6	Correction or addition of priority claim	<u>VI-3</u>
3.7	Re-establishment of rights in respect of the priority period	<u>VI-3</u>

## Chapter I – Introduction

Apart from the requirements of novelty, inventive step and industrial application, and the exclusion of subject-matter for which the ISA and/or IPEA is not required to carry out search and international preliminary examination, an international application must also satisfy a number of other requirements which are checked by the EPO as ISA and/or IPEA and reported on in the written opinion and/or IPER, as appropriate. These include substantive requirements such as sufficiency of disclosure (Art. 5), clarity of the claims (Art. 6) and unity of invention (Rule 13) as well as formal requirements such as the numbering of the claims (Rule 6.1) and the form of the drawings (Rule 11.10 to 11.13). These requirements are dealt with in the present Part F.

*Rule 43bis.1(a)*

*Rule 66.2(a)*

Part F also deals with the requirements relating to the right to priority.

## Chapter II – Content of an international application (other than claims)

### 1. General

The contents of the international application are set out in Article 3(2). The application must contain: *GL/ISPE 4.01*

- (i) a request;
- (ii) a description (see F-II, 4);
- (iii) one or more claims (see F-IV);
- (iv) one or more drawings (where required; see F-II, 5); and
- (v) an abstract (see F-II, 2).

This chapter discusses items (ii), (iv) and (v) insofar as they are the concern of the ISA and IPEA. Item (v) is dealt with first.

### 2. Abstract

#### 2.1 Purpose of the abstract

An international application must contain an abstract. The abstract merely serves the purpose of technical information and cannot be taken into account for any other purpose, particularly not for the purpose of interpreting the scope of the protection sought. *Art. 3(2), 3(3)*

#### 2.2 Definitive content

The abstract is initially supplied by the applicant subject to the exception provided for under Rule 38.2. The examiner conducting the main international search has the task of determining its definitive content, which will normally be published with the application. In doing this, he should consider the abstract in relation to the application as filed. If the search report is published later than the application, the abstract published with the application will be the one resulting from the procedure referred to in ISPE Guidelines 15.40. *Rule 8, 44.2*

This procedure does not apply to supplementary international searches for which the EPO is SISA, because the main ISA has already provided the publication data (see B-XII, 2). *GL/ISPE 16.34*

See also ISPE Guidelines 16.41.

#### 2.3 Content of the abstract

See ISPE Guidelines 16.42-16.43.

*PCT Newsletter  
04/2017, 9*

See also B-X, 7.

**2.4 Figure accompanying the abstract**

Section F-II, 2.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also ISPE Guidelines 16.42(c) and 16.48-16.51 and B-X, 7.

**2.5 Checklist**

Section F-II, 2.5 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**2.6 Transmittal of the abstract to the applicant**

Art. 18(2);  
Rule 44.2

The content of the abstract is transmitted to the applicant together with the search report (Form PCT/ISA/210, Box IV) (see B-X, 7(i)).

**2.7 Comments on the abstract by the applicant**

Rule 38.3

See ISPE Guidelines 16.45-16.47.

**3. The title**

Rule 4.3, 5.1(a)

The items making up the request do not normally concern the examiner, with the exception of the title. Rule 5.1(a) stipulates that the description "shall first state the title of the invention as appearing in the request".

The title must be short and precise. The examiner reviews the title in the light of the description and claims and any amendments thereto, to make sure that the title, as well as being concise, gives a clear and adequate indication of the subject of the invention. Thus, if amendments are made which change the categories of claims, the examiner should check whether a corresponding amendment, which may not go beyond the disclosure in the international application as filed, is needed in the title (see also B-X, 7). See also H-III, 7.

Rule 37, 44.2

For further provisions specifically related to the title, see ISPE Guidelines 16.35-16.38.

**4. Description (formal requirements)****4.1 General remarks**

Art. 5  
Rule 5.1  
GL/ISPE 4.02, 13.11  
PCT/AI Section 204

Section F-II, 4.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

The usage of the subheadings outlined in Section 204 of the Administrative Instructions under the PCT is recommended.

**4.2 Technical field**

Rule 5.1(a)(i)

See ISPE Guidelines 4.04.

**4.3 Background art**

Rule 5.1(a)(ii)

See ISPE Guidelines 4.05. The EPO applies option GL/ISPE A4.05[1] of the Appendix to Chapter 4 of the ISPE Guidelines.

**4.3.1 Format of background art citations**

Section F-II, 4.3.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.3.1.1 Examples of quotation for non-patent literature**

Section F-II, 4.3.1.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.3.1.2 Examples of quotation for patent literature**

Section F-II, 4.3.1.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.4 Irrelevant matter**

Section F-II, 4.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also F-II, 7.4.

**4.5 Technical problem and its solution**

See ISPE Guidelines 4.06-4.07.

*Rule 5.1(a)(iii), 9.1(iii)*

**4.6 Reference in the description to drawings**

See ISPE Guidelines 4.08.

**4.7 Reference signs**

See ISPE Guidelines 4.09.

**4.8 Industrial applicability**

The description should indicate explicitly the way in which the invention is capable of exploitation in industry, if this is not obvious from the description or from the nature of the invention (see also, G-III). The expression "capable of exploitation in industry" means the same as "susceptible of industrial application". In view of the broad meaning given to the latter expression in the Appendix to Chapter 14 of the ISPE Guidelines, A14.01[2].1(1) and A14.01[2].2, it is to be expected that, in most cases, the way in which the invention can be exploited in industry will be self-evident, so that no more explicit description on this point will be required; but there may be a few instances, e.g. in relation to methods of testing, where the manner of industrial exploitation is not apparent and must therefore be explicitly indicated.

*Art. 33(1), (4)*

*Rule 5.1(a)(vi)*

*GL/ISPE A14.01[2]*

Also, in relation to certain biotechnological inventions, i.e. sequences and partial sequences of genes, the industrial application is not self-evident and must be disclosed in the patent application.

**4.9 Manner and order of presentation**

See ISPE Guidelines 4.21.

*Rule 5.1(b)*

*PCT/AI Section 204*

**4.10 Terminology**

See ISPE Guidelines 4.22.

*Rule 10.2*

**4.11 Computer programs**

See ISPE Guidelines 4.23.

**4.12 Physical values, units**

Rule 10.1(a), (b),  
(d), (e)

See ISPE Guidelines 4.24. See also EPC Guidelines F-II, Annex 2.

**4.13 Registered trademarks**

Section F-II, 4.14 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**5. Drawings****5.1 Form and content of the drawings**

Rule 11.10-11.13

See A-V and ISPE Guidelines 4.28.

**5.2 Photographs**

The PCT Regulations are silent with regard to photographs. Nevertheless, they are allowed where what is to be shown (for instance, crystalline structures) cannot possibly be presented in a drawing. See A-V, 1.2, PCT AG I 5.159 and PCT Receiving Office Guidelines, Chapter VI, paragraph 146 (GL/RO 146).

Section F-II, 5.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**6. Nucleotide and amino acid sequence listings**

Rule 5.2

See ISPE Guidelines 4.15, A-III, 4.2, A-IV, 3 and H-II, 2.2.3.

For handling of non-compliant nucleotide and/or amino acid sequence listings at the search stage and during the PCT Chapter II procedure, see B-VIII, 3.2 and C-VIII, 2.1, respectively.

**6.1 Reference to sequences disclosed in a database**

Section EPC Guidelines F-II, 6.1 to 6.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**7. Expressions, etc., not to be used****7.1 Categories**

Rule 9.1

There are four categories of expressions which should not be contained in an international application, as specified in Rule 9.1. See ISPE Guidelines 4.29.

**7.2 Expressions or drawings contrary to morality or public order**

Rule 9.1(i) and (ii)

See ISPE Guidelines 4.29.

With regard to patentability issues with such matter, see G-II, 4.1.

**7.3 Disparaging statements**

Rule 9.1(iii)

See ISPE Guidelines 4.30.

**7.4 Irrelevant matter**

See ISPE Guidelines 4.31. See also F-II, 4.4.

*Rule 9.1(iv)*

**7.5 Omission of matter from publication**

See ISPE Guidelines 4.32.

*Art. 21(6)*

**Annex 1**

**Checklist for considering the abstract (see F-II, 2.5)**

Annex 1 to Section F-II in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## **Annex 2**

### **Units recognised in international practice (see F-II, 4.12)**

Annex 2 to Section F-II in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## Chapter III – Sufficiency of disclosure

### 1. Sufficiency of disclosure

A detailed description of at least one way of carrying out the invention must be given. Since the application is addressed to the person skilled in the art, it is neither necessary nor desirable that details of well-known ancillary features should be given, but the description must disclose any feature essential for carrying out the invention in sufficient detail to render it apparent to the skilled person how to put the invention into practice. A single example may suffice, but where the claims cover a broad field, the application should not usually be regarded as satisfying the requirements of Art. 5 unless the description gives a number of examples or describes alternative embodiments or variations extending over the area protected by the claims. However, regard must be had to the facts and evidence of the particular case. There are some instances where even a very broad field is sufficiently exemplified by a limited number of examples or even one example (see also F-IV, 6.3). In these latter cases the application must contain, in addition to the examples, sufficient information to allow the person skilled in the art, using common general knowledge, to perform the invention over the whole area claimed without undue burden and without needing inventive skill. In this context, the "whole area claimed" is to be understood as substantially any embodiment falling within the ambit of a claim, even though a limited amount of trial and error may be permissible, e.g. in an unexplored field or when there are many technical difficulties.

*GL/ISPE 5.45-5.51*

With regard to Art. 5, an objection of lack of sufficient disclosure presupposes that there are serious doubts, substantiated by verifiable facts. See also F-III, 4.

For the requirements of Art. 5 and of Rule 5.1(a)(iii) and (a)(v) to be fully satisfied, it is necessary that the invention is described not only in terms of its structure but also in terms of its function unless the functions of the various parts are immediately apparent. Indeed in some technical fields (e.g. computers), a clear description of function may be much more appropriate than an over-detailed description of structure.

*Art. 5*

*Rule 5.1(a)(iii) and (v)*

In cases where it is found that an application is sufficiently disclosed according to Art. 5 only in respect of a part of the claimed subject-matter, it may be appropriate for the examiner to first invite the applicant to provide informal clarification before the search is carried out (see B-VIII, 3.3-B-VIII, 3.6).

### 2. Sufficiency vs. additional subject-matter

See ISPE Guidelines 4.12.

*Art. 5*

*Art. 34(2)(b)*

### 3. Insufficient disclosure

See ISPE Guidelines 4.13.

*Art. 5*

If the claims for a perpetual motion machine are directed to its function, and not merely to its structure, an objection arises not only under Art. 5 but also

under Art. 33(4) in that the invention is not "industrially applicable" (see G-III, 1).

#### **4. Burden of proof as regards the possibility of performing and repeating the invention**

If there are serious doubts as regards the possibility of performing the invention and repeating it as described, the burden of proof as regards this possibility, or at least a demonstration that success is credible, rests with the applicant, who can discharge this burden of proof during the PCT Chapter II procedure or after entry into the European phase before the EPO. As regards the possibility of performing and repeating the invention, see also F-III, 3.

#### **5. Cases of partially insufficient disclosure**

##### **5.1 Only variants of the invention are incapable of being performed**

Section F-III, 5.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*. See also G-VII, 5.2.

##### **5.2 Absence of well-known details**

GL/ISPE 5.50

Section F-III, 5.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*. See also F-III, 1 and F-IV, 4.5 ff.

##### **5.3 Difficulties in performing the invention**

Section F-III, 5.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **6. Inventions relating to biological material**

##### **6.1 Biological material**

Rule 13bis

See ISPE Guidelines 4.16-4.17.

##### **6.2 Public availability of biological material**

Section F-III, 6.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

##### **6.3 Deposit and availability of biological material**

Rule 13bis

Rule 31-34 EPC

OJ EPO 2010, 498

PCT/AI Section 209

WIPO PCT Guide

11.075-11.087

PCT Newsletter

11/2014, 13

Under the PCT, the question as to whether a reference to deposited biological material must be included in an international application is left to the national law of the designated states. The PCT, however, prescribes the contents of a required reference and sets the time limit for providing such a reference.

Each designated Office decides whether a reference to biological material in accordance with the provisions of the PCT satisfies the requirements of its national law as to the content and the time limit for furnishing the reference. However, a national requirement may be added and become a PCT requirement upon notification to the IB. The EPO has made use of this possibility.

The EPO has notified the IB that the following additional matter should be indicated by an applicant wishing to enter the European phase:

*Rule 13bis.4, 13bis.7  
Rule 31(1)(d) EPC*

To the extent available to the applicant, relevant information on the characteristics of the biological material should be mentioned in the application as filed, and where the biological material has not been deposited by (one of) the applicant(s) but by someone else, the name and address of the latter person (the depositor) must be stated in the international application. Moreover, a document must be submitted to the IB within 16 months from the priority date in which the depositor:

- has authorised the applicant to refer to the biological material and
- has given unreserved and irrevocable consent to the deposited material being made available to the public.

Such authorisation is, however, not required if the depositor's rights to the deposited material are transferred to the applicant by the filing date of the international application at the latest. In that case, the document containing the transfer must be submitted instead. For further information see Annex L to the WIPO PCT Guide.

If any requirement concerning a reference to biological material is not met within 16 months of the priority date of the application, this **cannot** be remedied in the procedure before the EPO as a designated Office, i.e. upon entry into the European phase. As a consequence, the international application may be refused for insufficient disclosure in the course of the examination proceedings before the EPO as designated/elected Office.

Details of deposited biological material which are not included in the description should be supplied on a separate form (PCT/RO/134) (Box No. IX, checkbox No. 7 in the PCT request form). This form must likewise be used if the applicant wishes samples to be made available only to an expert nominated by the requester.

The furnishing of samples of biological material by the EPO takes place in conformity with Rule 13bis PCT and Rule 33 EPC. As a consequence, if the requirements of Rule 33 EPC are met, requests for the furnishing of samples of biological material are certified by the EPO in its capacity as designated Office vis-à-vis third parties as from international publication in an EPO language, i.e. during the international phase. The EPO has notified the IB that if the applicant wishes the biological material to be made available only by the issue of a sample to an expert nominated by the requester, the applicant must inform the IB accordingly before completion of the technical preparations for publication of the international application, where such publication takes place in one of the EPO's official languages. If the international application was not published in an official language of the EPO, notification of the expert solution may be submitted until completion of the technical preparations for publication of the translation of this application by the EPO as designated/elected Office. The fact that this solution has been chosen will be published by WIPO on its

*Rule 13bis.6

A61  
PCT Newsletter  
7-8/2010, 6  
11/2011, 5*

PATENTSCOPE website and/or, if applicable, on the front page of the published translation of the application.

#### **6.4 Priority claim**

Section F-III, 6.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **7. Proper names, trademarks and trade names**

See ISPE Guidelines 4.25.

For the assessment of the clarity of claims referring to a trademark (Art. 6), see F-IV, 4.8.

#### **8. Reference documents**

See ISPE Guidelines 4.26.

Where the reference document relates to the background art, it may be in the application as originally filed or introduced at a later date (see F-II, 4.3 and H-II, 2.2.5).

Incorporation of essential matter or essential features at a later date is, however, subject to the restrictions set out in H-II, 2.2.1. It may be that the examiner has requested the applicant to furnish the document referred to, in order to be able to carry out a meaningful search (see ISPE Guidelines 15.37).

#### **9. "Reach-through" claims**

Section F-III, 9 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **10. Sufficiency of disclosure and Rule 20.5(e) or Rule 20.5bis(e)**

Rule 20.5(e),  
20.5bis(e)

The application may contain sheets stamped "Not to be considered (Rule 20.5(e), 20.5bis(e) or 20.7)". This means that these sheets were not allowed by the receiving Office (for formal or substantive reasons) or that the applicant has withdrawn those parts or elements in order to avoid re-dating of the application. Such sheets thus do not form part of the application documents and should be ignored for search and examination.

In this case, the examiner must carefully evaluate whether the invention is still sufficiently disclosed without relying on the technical information contained in the withdrawn parts or elements. Should the examiner reach the conclusion that the requirements of Art. 5 are not satisfied, a corresponding objection is raised. See also F-III, 3 to F-III, 5.

#### **11. Sufficiency of disclosure and clarity**

GL/ISPE 4.12, 5.58

An ambiguity in the claims may lead to an insufficiency objection. However, ambiguity also relates to the scope of the claims, i.e. Art. 6 (see F-IV, 4). Normally, therefore, an ambiguity in a claim will lead to an objection under Art. 5 only if the whole scope of the claim is affected, in the sense that it is impossible to carry out at all the invention defined therein. Otherwise an objection under Art. 6 is appropriate.

In particular, where a claim contains an ill-defined ("unclear", "ambiguous") parameter (see also F-IV, 4.11) and where, as a consequence, the skilled person would not know whether they were working within or outside of the scope of the claim, this, by itself, is not a reason to deny sufficiency of disclosure as required by Art. 5. Nor is such a lack of clear definition necessarily a matter for objection under Art. 6 only. What is decisive for establishing insufficiency within the meaning of Art. 5 is whether the parameter, in the specific case, is so ill-defined that the skilled person is not able, on the basis of the disclosure as a whole and using common general knowledge, to identify (without undue burden) the technical measures necessary to solve the problem underlying the application at issue.

There is a delicate balance between Art. 5 and Art. 6 which has to be assessed on the merits of each individual case.

## Chapter IV – Claims (Art. 6 and formal requirements)

### 1. General

The international application must contain "one or more claims."

Art. 3(2), 6  
GL/ISPE 5.01-5.02

The claims must:

- (i) "define the matter for which protection is sought;"
- (ii) "be clear and concise;" and
- (iii) "be fully supported by the description."

This chapter sets out the appropriate form and content of the claims, together with how they should be interpreted for the purposes of assessing the novelty and inventive step of the inventions which they define and searching for prior art which may be relevant to making that assessment.

For form-filling of the written opinion in case of formal defects or of clarity, conciseness or support issues, see B-XI, 3.2.4.

### 2. Form and content of claims

#### 2.1 Technical features

Section F-IV, 2.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 6.3(a)  
GL/ISPE 5.04

It is not necessary that every feature should be expressed in terms of a structural limitation. Functional features are dealt with in F-IV, 6.5. For the specific case of a functional definition of a pathological condition, see F-IV, 4.22.

#### 2.2 Two-part form

See ISPE Guidelines 5.05 and ISPE Guidelines 5.22.

Rule 6.3(b)

#### 2.3 Two-part form unsuitable

See ISPE Guidelines 5.06 and ISPE Guidelines 5.07.

##### 2.3.1 Two-part form "wherever appropriate"

See ISPE Guidelines 5.08.

#### 2.4 Formulae and tables

See ISPE Guidelines 5.09.

Rule 11.10(a)-(c)

### 3. Kinds of claim

#### 3.1 Categories

See ISPE Guidelines 5.12.

For activities practised upon living things, see G-II, 4.2 and G-II, 5.4, which relate to subject-matter that may be excluded from search or preliminary examination.

#### 3.2 Number of independent claims

GL/ISPE 5.13-5.14

The PCT has no provision equivalent to Rule 43(2) EPC. However, plural independent claims in one category which comply with the requirement of unity of invention (see F-V, 1) may be objected to under Art. 6 if they result in a lack of clarity and conciseness (see also B-VIII, 4).

When assessing whether to raise an objection of lack of clarity or conciseness for such claims, the examiner will take examples (i) to (iv) in EPC Guidelines F-IV, 3.2 into account.

#### 3.3 Independent and dependent claims

Rule 6.4(a), 13.4  
GL/ISPE 5.15-5.16  
and A5.16[2]

Section F-IV, 3.4 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 3.4 Arrangement of claims

GL/ISPE 5.17

Section F-IV, 3.5 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 6.4(a), (b)  
and (c)

The EPO allows multiple dependent claims, provided that they do not detract from the clarity of the claims as a whole and that their arrangement does not create obscurity in the definition of the subject-matter to be protected. The EPO applies option GL/ISPE A5.16[2] of the Appendix to Chapter 5 of the ISPE Guidelines.

In case of unclarity, it may be appropriate for the examiner to first invite the applicant to provide informal clarification before the search is carried out (see B-VIII, 3.3 to 3.6).

See F-IV, 3.7 for claims referring to a claim in a different category.

#### 3.5 Subject-matter of a dependent claim

Section F-IV, 3.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 3.6 Alternatives in a claim

GL/ISPE 5.18

Section F-IV, 3.7 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

For the assessment of unity of invention of claims referring to alternatives, see F-V, 1.

**3.7 Independent claims containing a reference to another claim or to features from a claim of another category**

Section F-IV, 3.8 in the Guidelines for Examination in the EPO applies *mutatis mutandis*. GL/ISPE 5.19

**3.8 Claims directed to computer-implemented inventions**

Section F-IV, 3.9 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**3.8.1 Cases where all method steps can be fully implemented by generic data processing means**

Section F-IV, 3.9.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**3.8.2 Cases where method steps require specific data processing means and/or require additional technical devices as essential features**

Section F-IV, 3.9.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**3.8.3 Cases where the invention is realised in a distributed computing environment**

Section F-IV, 3.9.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4. Clarity and interpretation of claims****4.1 Clarity**

See ISPE Guidelines 5.31 and 5.32.

*Art. 6*

Where it is found that the claims lack clarity, it may be appropriate for the examiner to first invite the applicant to provide informal clarification before the search is carried out (see B-VIII, 3.3-B-VIII, 3.6).

**4.2 Interpretation**

See ISPE Guidelines 5.20. The EPO applies option A5.20[2] of the Appendix to Chapter 5 of the ISPE Guidelines.

Section F-IV, 4.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.3 Inconsistencies**

See ISPE Guidelines 5.29 and 17.70.

**4.4 General statements, "spirit" of invention**

See ISPE Guidelines 5.30.

**4.5 Essential features****4.5.1 Objections arising from missing essential features**

Section F-IV, 4.5.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.5.2 Definition of essential features**

Section F-IV, 4.5.2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.5.3 Generalisation of essential features**

Section F-IV, 4.5.3 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.5.4 Implicit features**

See ISPE Guidelines 5.33.

**4.5.5 Examples**

Examples illustrating essential features can be found in the Annex to section F-IV in the Guidelines for Examination in the EPO.

**4.6 Relative terms**

GL/ISPE 5.34

Section F-IV, 4.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.7 Terms like "about", "approximately" and "substantially"**

GL/ISPE 5.38

Section F-IV, 4.7 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.8 Trademarks**

See ISPE Guidelines 5.39.

See also F-II, 4.13 with regard to the need to acknowledge trademarks as such in the description. With regard to the effect of references to trademarks on sufficiency of disclosure (Art. 5), see F-III, 7.

**4.9 Optional features**

GL/ISPE 5.40

Section F-IV, 4.9 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**4.10 Result to be achieved**

GL/ISPE 5.35

Section F-IV, 4.10 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

It should be noted that the requirements for allowing a definition of subject-matter in terms of a result to be achieved differ from those for allowing a definition of subject-matter in terms of functional features (see F-IV, 4.22 and 6.5).

Moreover, claims pertaining to a result to be achieved may likewise pose problems in the sense that essential features are missing (see F-IV, 4.5).

**4.11 Parameters**

GL/ISPE 5.36

Section F-IV, 4.11 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

For the assessment of novelty of claims containing parameters, see G-VI, 6.

For further issues relating to clarity, lack of support and sufficiency of disclosure regarding parameters, see F-III, 11 and F-IV, 6.4.

#### 4.12 Product-by-process claim

Claims for products defined in terms of a process of manufacture are allowable only if the products as such fulfil the requirements for patentability, i.e. inter alia that they are new and inventive. A product is not rendered novel merely by the fact that it is produced by means of a new process. A claim defining a product in terms of a process is to be construed as a claim to the product as such. The claim may for instance take the form "Product X obtainable by process Y". Irrespective of whether the term "obtainable", "obtained", "directly obtained" or an equivalent wording is used in the product-by-process claim, it is still directed to the product per se and confers absolute protection upon the product.

GL/ISPE 5.26

As regards novelty, when a product is defined by its method of manufacture, the question to be answered is whether the product under consideration is identical to known products. The burden of proof for an allegedly distinguishing "product-by-process" feature lies with the applicant, who has to provide evidence that the modification of the process parameters results in another product, for example by showing that distinct differences exist in the properties of the products. Nevertheless, the examiner needs to furnish reasoned argumentation to support the alleged lack of novelty of a product-by-process claim, especially if this objection is contested by the applicant.

The EPO applies option GL/ISPE A5.26[1] of the Appendix to Chapter 5 of the ISPE Guidelines.

##### 4.12.1 Product claim with process features

Section F-IV, 4.12.1 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 4.13 Interpretation of expressions stating a purpose

Section F-IV, 4.13 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 5.21, 5.23

For claims directed to a known substance or composition for use in a surgical, therapeutic or diagnostic method, see G-II, 4.2.

#### 4.14 Definition by reference to use or another entity

Section F-IV, 4.14 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 5.37

#### 4.15 The expression "in"

Section F-IV, 4.15 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### 4.16 Use claims

The EPO applies the first sentence concerning "use" claims of point GL/ISPE A5.21 of the Appendix to Chapter 5 of the ISPE Guidelines.

GL/ISPE A5.21

Thus a claim in the form "the use of substance X as an insecticide" should not be interpreted as directed to the substance X recognisable (e.g. by further additives) as intended for use as an insecticide. Similarly, a claim for "the use of a transistor in an amplifying circuit" would be equivalent to a process claim for the process of amplifying using a circuit containing the transistor and should not be interpreted as being directed to "an amplifying circuit in which the transistor is used", nor to "the process of using the transistor in building such a circuit". However, a claim directed to the use of a process for a particular purpose is equivalent to a claim directed to that very same process.

Care should be taken when a claim relates to a two-step process which combines a use step with a product production step. This may be the case e.g. when a polypeptide and its use in a screening method have been defined as the only contribution to the art. An example of such a claim would then be:

"A method comprising:

- (a) contacting polypeptide X with a compound to be screened and
- (b) determining whether the compound affects the activity of said polypeptide;

and then formulating any active compound into a pharmaceutical composition."

Many variations of such a claim are conceivable, but in essence they combine (a) a screening step (i.e. using a specified test material to select a compound having a given property) with (b) further production steps (i.e. further transforming the selected compound for instance into the desired composition).

Two different types of process claim exist: (i) the use of an entity to achieve a technical effect and (ii) a process for the production of a product. The above claim and its analogues represent a combination of two different and irreconcilable types of process claim. Step (a) of the claim relates to a process of type (i), step (b) to a process of type (ii). Step (b) builds on the "effect" achieved by step (a), rather than step (a) feeding into step (b) a specific starting material and resulting in a specific product. This results in an unclear claim according to Art. 6.

#### **4.17 References to the description or drawings**

*Rule 6.2(a)*

See ISPE Guidelines 5.10.

#### **4.18 Reference signs**

*Rule 6.2(b)*

See ISPE Guidelines 5.11. If there is a large number of different embodiments, only the reference signs of the most important embodiments need be incorporated in the independent claim(s).

If text is added to reference signs in parentheses in the claims, lack of clarity can arise (Art. 6). Expressions such as "securing means (screw 13,

nail 14)" or "valve assembly (valve seat 23, valve element 27, valve seat 28)" are not reference signs in the sense of Rule 6.2(b) but are special features. It is unclear whether the features added to the reference signs are limiting or not. Accordingly, such bracketed features are generally not permissible. However, additional references to those figures, where particular reference signs are to be found, such as "(13 - Figure 3; 14 - Figure 4)", are unobjectionable.

A lack of clarity can also arise with bracketed expressions that do not include reference signs, e.g. "(concrete) moulded brick". In contrast, bracketed expressions with a generally accepted meaning are allowable, e.g. "(meth)acrylate" which is known as an abbreviation for "acrylate and methacrylate". The use of brackets in chemical or mathematical formulae is also unobjectionable. The use of brackets for providing physical values complying with the requirements of Rule 10.1 is unobjectionable as well.

#### 4.19 Negative limitations (e.g. disclaimers)

A claim's subject-matter is normally defined in terms of positive features indicating that certain technical elements are present. Exceptionally, however, the subject-matter may be restricted using a negative limitation expressly stating that particular features are absent. This may be done e.g. if the absence of a feature can be deduced from the application as filed.

GL/ISPE 5.41

Negative limitations such as disclaimers may be used only if adding positive features to the claim either would not define more clearly and concisely the subject-matter still protectable or would unduly limit the scope of the claim. It has to be clear what is excluded by means of the disclaimer. A claim containing one or more disclaimers must also fully comply with the clarity and conciseness requirements of Art. 6.

For the allowability of disclaimers excluding embodiments that were disclosed in the original application as being part of the invention, see H-III, 4.2. With respect to the allowability of a disclaimer not disclosed in the application as filed see H-III, 4.1.

The EPO applies option GL/ISPE A20.21[2] of the Appendix to Chapter 20 of the ISPE Guidelines.

#### 4.20 "Comprising" vs. "consisting"

Section F-IV, 4.20 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

GL/ISPE 5.24(a), (b)

#### 4.21 Functional definition of a pathological condition

Section F-IV, 4.21 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

See also G-II, 4.2.

#### 4.22 Broad claims

The PCT Regulations do not explicitly mention overly broad claims. However, objections to such claims may arise for various reasons.

GL/ISPE 5.42, 15.25

Where there are discrepancies between the claims and the description, the claims are not sufficiently supported by the description (Art. 6) and also, in most cases, the invention is not sufficiently disclosed (Art. 5, see F-IV, 6.1).

Sometimes an objection of lack of novelty arises, for example if the claim is formulated in such broad terms that it also covers known subject-matter from other technical fields. Broad claims may also cover embodiments for which a purported effect has not been achieved. On raising an objection of lack of inventive step in such cases, see G-VII, 5.2.

#### **4.23 Order of claims**

There is no legal requirement that the first claim should be the broadest. However, Art. 6 requires that the claims must be clear not only individually but also as a whole. Therefore, where there are a large number of claims, they should be arranged with the broadest claim first. If the broadest of a large number of claims is a long way down, so that it could easily be overlooked, the applicant should be required either to re-arrange the claims in a more logical way or to direct attention to the broadest claim in the introductory part or in the summary of the description.

Furthermore, if the broadest claim is not the first one, the later broader claim must also be an independent claim. Consequently, where these independent claims are of the same category, an objection may also arise under Rule 6 if they result in a lack of clarity and conciseness (see F-IV, 3.2).

#### **5. Conciseness, number of claims**

*Rule 6.1(a)*

See ISPE Guidelines 5.42.

The EPO applies option GL/ISPE A5.42[2] of the Appendix to Chapter 5 of the ISPE Guidelines.

Where it is found that the claims lack conciseness under Art. 6, it may be appropriate for the examiner to first invite the applicant to provide informal clarification before the search is carried out (see B-VIII, 3.3 to B-VIII, 3.6).

#### **6. Support in description**

##### **6.1 General remarks**

*Art. 6*

See ISPE Guidelines 5.43.

Regarding support for dependent claims by the description, see F-IV, 6.6.

##### **6.2 Extent of generalisation**

See ISPE Guidelines 5.52.

An invention which opens up a whole new field is entitled to more generality in the claims than one which is concerned with advances in a known technology.

##### **6.3 Objection of lack of support**

See ISPE Guidelines 5.44.

Once the examiner has set out a reasoned case that, for example, a broad claim is not supported over the whole of its breadth, the onus of demonstrating that the claim is fully supported lies with the applicant (see F-III, 4).

The question of support is illustrated by examples (i) to (iii) in EPC Guidelines F-IV, 6.3. See also ISPE Guidelines 5.53.

Where it is found that the claims lack support in the description under Art. 6, it may be appropriate for the examiner to first invite the applicant to provide informal clarification before the search is carried out (see B-VIII, 3.3-3.6).

#### **6.4 Lack of support vs. insufficient disclosure**

It should be noted that, although an objection of lack of support is an objection under Art. 6, it can often, as in examples (i) to (iii) of EPC Guidelines F-IV, 6.3, also be considered as an objection of insufficient disclosure of the invention under Art. 5 (see F-III, 1 to F-III, 3), the objection being that the disclosure is insufficient to enable the skilled person to carry out the "invention" over the whole of the broad field claimed (although sufficient in respect of a narrow "invention"). Both requirements are designed to reflect the principle that the terms of a claim should be commensurate with, or be justified by, the invention's technical contribution to the art. Therefore, the extent to which an invention is sufficiently disclosed is also highly relevant to the issue of support. The reasons for failure to meet the requirements of Art. 5 may in effect be the same as those that lead to the infringement of Art. 6 as well, namely that the invention, over the whole range claimed, extends to technical subject-matter not made available to the person skilled in the art by the application as filed.

*Art. 5, 6*

For example, where a technical feature is described and highlighted in the description as being an essential feature of the invention, to comply with Art. 6 this must also be part of the independent claim(s) defining the invention (see F-IV, 4.5.1). By the same token, if the (essential) technical feature in question is absent from the claims, and no information is given on how to perform the claimed invention successfully without the use of said feature, the description does not disclose the invention defined in the claim(s) in the manner prescribed by Art. 5.

An objection under both Art. 5 and Art. 6 may also be justified. An example would be a claim relating to a known class of chemical compounds defined by measurable parameters, when the description does not disclose a technical teaching allowing the skilled person to manufacture those compounds complying with the parametric definition, and this is not otherwise feasible by the application of common general knowledge or routine experimentation. Such a claim would be both technically not supported and not sufficiently disclosed, regardless of whether the parametric definition meets the clarity requirement of Art. 6.

*GL/ISPE 4.12, 5.58*

#### **6.5 Definition in terms of function**

See ISPE Guidelines 5.56.

See also F-IV, 2.1 and F-IV, 4.10.

### **6.6 Support for dependent claims**

Section F-IV, 6.6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

**Annex****Examples concerning essential features**

The Annex to F-IV of the Guidelines for Examination in the EPO contains examples of how to evaluate whether a claim contains all essential features of the invention. The examiner will apply the same criteria when assessing essential features under the PCT *mutatis mutandis*.

## Chapter V – Unity of invention

### 1. Assessment of and reasoning for unity of invention

Given the harmonisation of the definitions concerning unity of invention in Rule 13.1 and 13.2 PCT compared with Art. 82 EPC and Rule 44(1) EPC respectively, the formal criteria for unity in the EPC and the PCT systems are the same. Hence, search and substantive examination follow the same principles in both the European and PCT procedures as far as the reasoning for unity of invention is concerned.

Art. 150(2) EPC

As a consequence, the parts relating to the assessment of unity of invention and its reasoning in EPC Guidelines F-V, 1 to F-V, 3 and all their subsections apply *mutatis mutandis* to the PCT procedure, with the exception of those passages in EPC Guidelines F-V, 2.1 and F-V, 3.2.1 relating to Rule 43(2) EPC. Indeed, Rule 43(2) EPC, which concerns multiple independent claims in the same category, has no equivalent in the PCT. The sections of EPC Guidelines F-V dealing with Rule 43(2) EPC therefore do not apply for the purposes of the PCT. In the PCT procedure, multiple independent claims in the same category need to be considered under the Art. 6 conciseness requirement (see F-IV, 3.2 and EPC Guidelines F-IV, 3.2).

Intermediate documents cited under Rule 33.1(c) (see B-X, 9.2.4) are considered in the same way as documents under Art. 54(3) EPC (see EPC Guidelines F-V, 3.1) and cannot be used for a non-unity objection.

This is also the case for novelty-destroying documents cited under Rule 33.1(a) as accidental anticipation within the meaning of decisions G 1/03 and G 1/16 of the EPO's Enlarged Board of Appeal (see EPC Guidelines F-V, 3.1.2).

### 2. Lack of unity during search

In many and probably most instances, lack of unity will have been noted at the search stage. In such cases, a search is conducted for the invention first mentioned in the claims and the applicant is invited to pay additional search fees with Form PCT/ISA/206. See B-VII, 2.

Art. 17(3)(a)

Rule 40, 45bis.6

See also ISPE Guidelines 10.60 for the process at the international search stage and ISPE Guidelines 10.83 for the process at the supplementary international search stage.

EPC Guidelines F-V, 4 applies *mutatis mutandis*, with the exception of those aspects already covered above.

*Art. 34(3)(a)-(c)*  
*Rule 68*

### **3. Lack of unity during the PCT Chapter II procedure**

If an invitation to pay additional fees was issued during Chapter I and the applicant paid some or all of the required additional fees, and if, where applicable, the objection as to lack of unity was at least partly upheld during a protest procedure, then under Chapter II the applicant will normally be invited (using Form 405) to pay additional preliminary examination fees if all the searched inventions are also to be examined under Chapter II. Inventions for which no search fees were paid cannot be pursued and will thus also not be objected to or commented on. See C-V.

See also ISPE Guidelines 10.71 to ISPE Guidelines 10.73.

## Chapter VI – Priority

### 1. The right to priority

For the establishment of the WO-ISA in relation to the priority claim, see B-XI, 4 and subsections.

#### 1.1 Filing date as effective date

See ISPE Guidelines 6.01 and ISPE Guidelines 15.11 A, B and C.

*Art. 11, 14  
Rule 20*

#### 1.2 Priority date as effective date

When an international application claims the right of priority of the filing date of an earlier application, the priority date (i.e. the filing date of the earlier application) will be used to calculate certain time limits.

*Art. 2(xi)*

The priority claim must refer to an earlier application. The day of filing of the earlier application not being included in the priority period (Art. 8(2) PCT in conjunction with Article 4C(2) of the Paris Convention and Rule 2.4(a) PCT), the priority period starts on the day following the filing date of the earlier application. Thus, an "earlier" application is to be understood as an application that has been filed at least a day before the application claiming priority.

*Art. 8(1)  
Rule 2.4, 17.1 and 80*

Furthermore, the priority date becomes the effective date for the purposes of international examination, i.e. the written opinion (of either the ISA or the IPEA) and the international preliminary examination report. The relevant date for the purposes of the international search is always the international filing date.

*Rule 33.1, 43bis.1,  
64.1  
GL/ISPE 11.02-11.05*

See ISPE Guidelines 6.02.

#### 1.3 Validly claiming priority

See ISPE Guidelines 6.03 and ISPE Guidelines 15.11 as well as A-VI, 1.6.

*Art. 8(1)  
Rule 2.4, 4.10  
Rule 26bis.2*

#### 1.4 Subsequent application considered as first application

See ISPE Guidelines 6.04.

*Art. 8(2)(a)*

Examples of applications that cannot be recognised as a "first application" are:

- (i) US applications which are a "continuation" of a previous application ("con");
- (ii) US applications which are a "continuation in part" of a previous application ("cip"), in so far as the subject-matter in question was already disclosed in the original US application;
- (iii) national applications claiming priority from a previous national application or national utility model.

In the case of US con or cip applications, the first sentence of the description reads as follows: "This application is a continuation in part (continuation) of Serial Number .... filed .....". The following information is found on the title page under the heading "CONTINUING DATA\*\*\*\*\*": "VERIFIED THIS APPLICATION IS A CIP (or CON) OF .....". A form headed "Declaration for Patent Application" must also be attached to the end of the application (in this case the priority document), listing earlier foreign or US applications under the heading "foreign priority benefits under Title 35, United States Code, 119" or "benefit under Title 35, U.S.C., 120 of any United States application(s)".

### **1.5 Multiple priorities**

*Art. 8(1)* See ISPE Guidelines 6.05.

## **2. Determining priority dates**

### **2.1 Examining the validity of a right to priority**

See ISPE Guidelines 6.06.

### **2.2 The same invention**

See ISPE Guidelines 6.07 to ISPE Guidelines 6.09.

A disclaimer which is allowable under Art. 34(2)(b) (see H-III, 4.1 and H-III, 4.2) does not change the identity of the invention within the meaning of Art. 8. Therefore, such a disclaimer could be introduced when drafting and filing a successive international application, without affecting the right to priority from the first application not containing the disclaimer.

### **2.3 Priority claim not valid**

See ISPE Guidelines 6.10.

## **3. Claiming priority**

### **3.1 General remarks**

*Art. 11*  
*Rule 4.10* See ISPE Guidelines 6.11 and A-VI, 1.6.

### **3.2 Declaration of priority**

*Art. 8(1)*  
*Rule 4.10* See ISPE Guidelines 6.13 to ISPE Guidelines 6.15.

### **3.3 Certified copy of the previous application (priority document)**

*Rule 17.1 and 66.7(a)* See A-II, 1.3, A-III, 4.4 and A-VI, 1.7.

### **3.4 Translation of the previous application**

*Rule 66.7(b)* See ISPE Guidelines 6.17.

### **3.5 Withdrawal of priority claims**

*Rule 90bis.3* The applicant may withdraw a priority claim, made in the international application under Article 8(1), at any time prior to the expiration of 30 months from the priority date.

**3.6 Correction or addition of priority claim**

See ISPE Guidelines 6.11, ISPE Guidelines 6.16 and *Rule 26bis.1*  
ISPE Guidelines 8.10.

**3.7 Re-establishment of rights in respect of the priority period**

The applicant may file a request for restoration of the priority right up to two months after expiry of the priority year from the claimed priority.

*Rule 26bis.3*  
*PCT Newsletter*  
*07-08/2017, 15*

In the international phase, restoration can be granted under both the "due care" and "unintentional" criteria. The EPO as receiving Office and as designated Office in the regional phase will decide on the basis of the "due care" criterion (which is the same criterion as used for EP applications with respect to re-establishment of rights under Art. 122 EPC). If the EPO was not the receiving Office, the request may have been decided upon under the "unintentional" criterion.

If the priority right was restored by the receiving Office under the "due care" criterion, no new request need be filed with the EPO as designated/elected Office, since the EPO will, in principle, recognise the decision of the receiving Office. If, however, the EPO has reasonable doubt that the requirements for grant were not met, it will notify the applicant accordingly. In this communication the reasons for such doubt will be indicated and a time limit will be set within which the applicant may submit comments.

If the priority right was restored by the receiving Office under the "unintentional" criterion, a new request needs to be filed with the EPO as designated/elected Office, since the EPO is not bound by the decision of any receiving Office under the "unintentional" criterion.

A priority claim may not be considered invalid on the basis that the international application has an international filing date which is later than the date on which the priority period expired, provided that the international filing date is within two months of that date. The examiner may make a remark in the WO-ISA indicating the number of days by which the 12-month priority period has been exceeded.

*Rule 26bis.2(c)(iii)*

For filling out the WO-ISA where the filing date exceeds the earliest priority date by over twelve months and a further two months, see B-XI, 4.1.

## Chapter I – Patentability

### 1. General disclaimer

Under Art. 150(2) EPC, an international application filed under the PCT may be the subject of proceedings before the EPO. In such proceedings, the provisions of the PCT and its Regulations are applied, supplemented by the provisions of the EPC. In case of conflict, the provisions of the PCT and its Regulations prevail.

The EPO, acting as ISA or IPEA, has established practice on how the examiner assesses novelty and inventive step. For most subject-matter this practice is identical to that used in proceedings for European patent applications. However, for some subject-matter the ISPE Guidelines deviate from the practice in European proceedings, and for other subject-matter they recognise that different offices adopt different approaches. As a result of Art. 150(2) EPC, the EPO as ISA/IPEA will, for the assessment of novelty and inventive step, generally apply the provisions of the PCT and, where these are not sufficient, will base its assessment on its established practice. In the latter case, these Guidelines then state that "the principles as laid down in the corresponding section in the Guidelines for Examination in the EPO apply *mutatis mutandis*."

It should be borne in mind that when an international application validly enters the regional phase before the EPO, it is considered as a European patent application. Consequently, the EPO will apply its criteria for examination as laid down in the Guidelines for Examination in the EPO for any subject-matter.

### 2. General remarks

The aim of the PCT is to allow the applicant to obtain a preliminary and non-binding opinion on the patentability of the claimed subject-matter before entering the regional phase. The PCT procedure cannot serve the purpose of granting a patent as is the case for example under the EPC.

Art. 33(1)

Rule 43bis.1(a)

## Chapter II – Inventions

### 1. General remarks

The objective of the international preliminary examination is to formulate a preliminary and non-binding opinion on the questions whether the claimed invention appears to be novel, to involve an inventive step and to be industrially applicable.

Art. 33(1)  
Rule 43bis.1(a)

The PCT does not define what is meant by "invention", but Rule 39 and 67 contain a list of subject-matter for which the ISA or IPEA is not required to carry out an international search or an international preliminary examination, respectively (see also B-VIII, 2). The Agreement between the EPO and WIPO in relation to the functioning of the EPO as an International Authority under the PCT indicates the subject-matter which the EPO is not required to search or examine, and according to its Art. 4 and Annex C the discretion not to search or examine is exercised by the EPO as ISA and IPEA only to the extent that such subject-matter is not searched under the provisions of the EPC, specifically Art. 52(2), 52(3), 53(b) and 53(c) EPC.

Art. 34(4)(a)(i)  
GL/ISPE 9.02-9.15  
OJ EPO 2017, A115  
OJ EPO 2018, A24

### 2. Examination practice

Section G-II, 2 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 3. List of exclusions

See ISPE Guidelines 9.02 to ISPE Guidelines 9.15.

#### 3.1 Discoveries

Rule 39.1 and 67.1 do not explicitly exclude an international search or international preliminary examination on discoveries from being carried out by the ISA or IPEA, respectively. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(a) and Art. 52(3) EPC. Section G-II, 3.1, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 39.1, 67.1  
OJ EPO 2017, A115  
OJ EPO 2018, A24

#### 3.2 Scientific theories

See ISPE Guidelines 9.05. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(a) and Art. 52(3) EPC. Section G-II, 3.2, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 39.1(i),  
Rule 67.1(i)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

#### 3.3 Mathematical theories

See ISPE Guidelines 9.05. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(a) and Art. 52(3) EPC. Section G-II, 3.3, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 39.1(i),  
Rule 67.1(i)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

#### 3.4 Aesthetic creations

Rule 39.1 and 67.1 do not explicitly exclude an international search or international preliminary examination on aesthetic creations from being

OJ EPO 2017, A115  
OJ EPO 2018, A24

carried out by the ISA or IPEA, respectively. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(b) and Art. 52(3) EPC. Section G-II, 3.4, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **3.5 Schemes, rules and methods of doing business, performing purely mental acts or playing games**

Rule 39.1(iii),  
Rule 67.1(iii)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

See ISPE Guidelines 9.07, ISPE Guidelines A9.07 and ISPE Guidelines A9.07[2]. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(c) and Art. 52(3) EPC. Section G-II, 3.5, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **3.6 Programs for computers**

Rule 39.1(vi),  
Rule 67.1(vi)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

See ISPE Guidelines 9.15, ISPE Guidelines A9.15 and ISPE Guidelines A9.15[2]. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(c) and 52(3) EPC. Section G-II, 3.6, in the Guidelines for Examination in the EPO applies *mutatis mutandis* (see PCT-EPO Guidelines B-VIII, 2.2).

### **3.7 Presentations of information**

Rule 39.1(v),  
Rule 67.1(v)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

See ISPE Guidelines 9.11 to ISPE Guidelines 9.14. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 52(2)(d) and Art. 52(3) EPC. Section G-II, 3.7, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## **4. Exceptions to patentability**

### **4.1 Matter contrary to public order or morality**

Art. 21(6)  
Rule 9  
PCT AG I 5.175  
OJ EPO 2017, A115  
OJ EPO 2018, A24

Unlike the EPC, the PCT does not explicitly rule out the patentability of subject-matter for reasons of public order or morality. However, according to Rule 9, the application must not contain any expressions contrary to public order or morality, and under the Agreement between the EPO and WIPO the EPO may exclude matter which would be excluded under Art. 53(a) EPC. Generally, no search or preliminary examination is carried out on such matter by the EPO as ISA/IPEA. Section G-II, 4.1, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **4.2 Surgery, therapy and diagnostic methods**

Rule 39.1(iv),  
Rule 67.1(iv)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

See ISPE Guidelines 9.08-9.10. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 53(c) EPC. Generally, no search or preliminary examination is carried out on such matter by the EPO as ISA/IPEA. Section G-II, 4.2, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## 5. Exclusions and exceptions for biotechnological inventions

### 5.1 General remarks and definitions

"Biotechnological inventions" are inventions which concern a product consisting of or containing biological material or a process by means of which biological material is produced, processed or used. "Biological material" means any material containing genetic information and capable of reproducing itself or being reproduced in a biological system.

Rule 39.1(ii),  
Rule 67.1(ii)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

### 5.2 Biotechnological inventions

See ISPE Guidelines 9.06. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 53(b) EPC. Generally, no search or preliminary examination is carried out on such matter by the EPO as ISA/IPEA. Section G-II, 5.2, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

OJ EPO 2017, A115  
OJ EPO 2018, A24

### 5.3 Exceptions

The PCT, unlike the EPC, does not explicitly exclude carrying out an international search or an international preliminary examination on specific subject-matter related to biotechnological inventions. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 53 EPC. Generally, no search or preliminary examination is carried out on such matter by the EPO as ISA/IPEA. Section G-II, 5.3, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

OJ EPO 2017, A115  
OJ EPO 2018, A24

### 5.4 Plant and animal varieties, essentially biological processes for the production of plants or animals

See ISPE Guidelines 9.06. However, under the Agreement between the EPO and WIPO these fall within the EPO's discretion to exclude matter which would be excluded under Art. 53(b) EPC. Generally, no search or preliminary examination is carried out on such matter by the EPO as ISA/IPEA. Section G-II, 5.4 and subsections, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

Rule 39.1(ii),  
Rule 67.1(ii)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

### 5.5 Microbiological processes

See ISPE Guidelines 9.06. EPC Guidelines G-II, 5.5, applies *mutatis mutandis*.

Rule 39.1(ii),  
Rule 67.1(ii)  
OJ EPO 2017, A115  
OJ EPO 2018, A24

## **Chapter III – Industrial application**

### **1. General remarks**

See ISPE Guidelines 14.01 to ISPE Guidelines 14.03.

*Art. 33(4)*

### **2. Methodology**

See ISPE Guidelines 14.04 to ISPE Guidelines 14.06.

### **3. Industrial applicability**

See ISPE Guidelines A14.01[2].1.

## Chapter IV – Prior art

### 1. General remarks and definition

An invention is to be "considered novel if it is not anticipated by the prior art". The "prior art shall consist of everything which has been made available to the public anywhere in the world by any means which is capable of being of assistance in determining that the claimed invention is or is not new and that it does or does not involve an inventive step (i.e., that it is or is not obvious), provided that the making available to the public occurred prior to the international filing date". The scope of this definition should be noted. There are no restrictions whatsoever as to the geographical location where or the language in which the relevant information was made available to the public; also no age limit is stipulated for the documents or other sources of the information.

Art. 33(2), (3)  
Rule 33.1(a), (b)  
Rule 64.1, 64.2

See also ISPE Guidelines 11.01 and ISPE Guidelines 11.12.

The principles to be applied in determining whether other kinds of prior art, e.g. relating to use (which could be introduced e.g. by a third party, see E-II, ISPE Guidelines 16.57 and PCT/AI section 801), have been made available to the public are governed by Rule 33.1(a) and (b) and Rule 64.1 and 64.2. See G-IV, 6, for non-written disclosures that can be considered to be "print equivalent" or that are otherwise captured in a way which allows them to be seen or copied by others.

For the examination of the novelty of claimed subject-matter, see G-VI.

Art. 33(2)

A written description, i.e. a document, should be regarded as made available to the public if, at the relevant date, it was possible for members of the public to gain knowledge of the content of the document and there was no bar of confidentiality restricting the use or dissemination of such knowledge. For instance, German utility models ("Gebrauchsmuster") are already publicly available as of their date of entry in the Register of utility models ("Eintragungstag"), which precedes the date of announcement in the Patent Bulletin ("Bekanntmachung im Patentblatt").

### 2. Enabling disclosures

The principles as laid down in section G-IV, 2, in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

### 3. Date of filing or priority date as effective date

It should be noted that for the purpose of international preliminary examination all prior art is taken into account which was publicly available before the international filing date or, where a priority has been validly claimed, before the date of priority. It should be remembered that different claims, or different alternatives claimed in one claim, may have different effective dates, i.e. the date of filing or (one of) the claimed priority date(s). The question of novelty must be considered against each claim (or part of a claim where a claim specifies a number of alternatives), and prior art in relation to one claim or one part of a claim may include matter, e.g. an intermediate document (see B-X, 9.2.4), which cannot be cited against

Rule 64.1(a), (b)  
GL/ISPE 11.24-11.26

another claim or another alternative in the same claim because it has an earlier effective date.

*Rule 20.5*

If the applicant subsequently furnishes missing parts of the description, parts of the claims or all or parts of the drawings under Rule 20.5, the international filing date is the date on which the purported international application is completed by the furnishing of the missing parts, unless the missing parts are completely contained in the priority document and the requirements given in Rule 20.6 are satisfied, in which case the original filing date is maintained. The date of the application as a whole is thus either the date on which the missing parts are received or the original filing date (see C-III, 2, and H-II, 2.2.2).

*Rule 20.5bis*

If the applicant subsequently furnishes (a) correct element(s) (an element being the description or the claims) or correct parts of the description, parts of the claims or all or parts of the drawings under Rule 20.5*bis*, the international filing date is the date on which the purported international application is corrected by the furnishing of the correct elements or parts, unless the correct elements or parts are completely contained in the priority document and the requirements given in Rule 20.6 are satisfied, in which case the original filing date is maintained. The date of the application as a whole is thus either the date on which the correct elements or parts are received or the original filing date (see C-III, 2, and H-II, 2.2.2).

#### **4. Documents in a non-official language of the (S)ISA or IPEA**

Where applicants

- (i) dispute the relevance of a document in a non-official language cited in the search report (for procedure at the search stage (see B-X, 9.1.2 and 9.1.3), and
- (ii) give specific reasons,

examiners should consider whether, in the light of these reasons and of the other prior art available to them, they are justified in pursuing the matter. If so, they should obtain a translation of the document (or merely the relevant part of it if that can be easily identified). If they remain of the view that the document is relevant, they should send a copy of the translation to the applicant with the next communication in the PCT Chapter II phase.

##### **4.1 Machine translations**

In order to overcome the language barrier constituted by a document in an unfamiliar non-official language, it might be appropriate for the examiner to rely on a machine translation of the document, which should be sent to the applicant. If only part of the translated document is relevant, the particular passage relied upon should be identified. A translation has to serve the purpose of rendering the meaning of the text in a familiar language. Therefore mere grammatical or syntactical errors which have no impact on the possibility of understanding the content do not hinder its qualification as a translation.

A general statement that machine translations as such cannot be trusted is not sufficient to contest the value of the translation. If the applicant objects to the use of a specific machine translation, the applicant bears the burden of adducing evidence (in the form of, for instance, an improved translation of the whole or salient parts of the document) showing the extent to which the quality of the machine translation is defective and should therefore not be relied upon.

When the applicant provides substantiated reasoning for questioning the objections raised based on the translated text, the examiner will have to take these reasons into account, similarly to when the publication date is questioned.

## **5. Conflict with other applications**

### **5.1 Prior art pursuant to Rule 33.1(c) and 64.3**

Under the PCT, the prior art does not comprise the content of other applications filed or validly claiming a priority date earlier than – but published on or after – the date of filing or valid date of priority of the application being examined. However, attention must be drawn to such applications in the international search report and, where applicable, the preliminary examination report, as they may become relevant under Article 54(3) EPC (see also B-XI, 4.3). The "content" of an application means the whole disclosure, i.e. the description, drawings and claims, including:

*GL/ISPE 11.07-11.09*  
*Rule 33.1(c),*  
*Rule 64.3,*  
*Rule 70.10*

- (i) any matter explicitly disclaimed (with the exception of disclaimers for unworkable embodiments);
- (ii) any matter for which an allowable reference (see EPC Guidelines F-III, 8, penultimate paragraph) to other documents is made; and
- (iii) prior art insofar as explicitly described.

However, the "content" does not include any priority document (the purpose of such document being merely to determine to what extent the priority date is valid for the disclosure of the international application).

### **5.2 Co-pending applications**

The PCT does not deal explicitly with the case of co-pending international applications of the same applicant of the same effective date, see ISPE Guidelines 11.10.

## **6. Prior art made available to the public anywhere in the world by non-written disclosure**

A non-written disclosure is considered part of the prior art for the purposes of Art. 33(2) and (3) if it has been made available to the public prior to the relevant date of the application (i.e. the international filing date or, if a priority has been validly claimed, the earliest priority date).

*Rule 33.1(b),*  
*Rule 64.1, 64.2*  
*GL/ISPE 11.22*

**6.1 Types of non-written disclosure, in particular use, and instances of prior art made available in any other way**

*Rule 33.1(b),  
Rule 64.2*

Making available to the public may occur by means of oral disclosure, use, exhibition or other non-written means, including audio files, videos and other multimedia formats.

Use may be constituted by producing, offering, marketing or otherwise exploiting a product, or by offering or marketing a process or its application or by applying the process. Marketing may be effected, for example, by sale or exchange.

Prior art may also be made available to the public in other ways, as for example by demonstrating an object or process in specialist training courses or on television.

Availability to the public in any other way also includes all possibilities which technological progress may subsequently offer of making available the aspect of the prior art concerned.

**6.2 Matters to be determined as regards use**

*Rule 33.1(b),  
Rule 64.2*

When the ISA or the IPEA has gained knowledge of an object or process that has been used in such a way that it is comprised in the prior art (e.g. by a third party, see E-II, ISPE Guidelines 16.57 and PCT/AI section 801), the following details have to be determined:

- (i) whether there is a written disclosure that was made available to the public earlier than the relevant date as defined by Rule 64.1(b) which confirms the use of the object or the process;
- (ii) the date on which an alleged use occurred, i.e. whether there was any instance of use before the relevant date (prior use);
- (iii) what has been used, in order to determine the degree of similarity between the object used and the subject-matter of the application; and
- (iv) all the circumstances relating to the use, in order to determine whether and to what extent it was made available to the public, as for example the place of use and the form of use. These factors are important in that, for example, the details of a demonstration of a manufacturing process in a factory or of the delivery and sale of a product may well provide information as regards the possibility of the subject-matter having become available to the public.

**6.2.1 General principles**

Subject-matter should be regarded as made available to the public by use or in any other way if, at the relevant date, it was possible for members of the public to gain knowledge of the subject-matter and there was no bar of confidentiality restricting the use or dissemination of such knowledge. This may, for example, arise if an object is unconditionally sold to a member of the public, since the buyer thereby acquires unlimited possession of any knowledge which may be obtained from the object. Even where in such

cases the specific features of the object may not be ascertained from an external examination, but only by further analysis, those features are nevertheless to be considered as having been made available to the public. This is irrespective of whether or not particular reasons can be identified for analysing the composition or internal structure of the object. These specific features only relate to the intrinsic features. Extrinsic characteristics, which are only revealed when the product is exposed to interaction with specifically chosen outside conditions, e.g. reactants or the like, in order to provide a particular effect or result or to discover potential results or capabilities, therefore point beyond the product *per se* as they are dependent on deliberate choices being made. Typical examples are the first or further application as a pharmaceutical product of a known substance or composition and the use of a known compound for a particular purpose, based on a new technical effect. Thus, such characteristics cannot be considered as already having been made available to the public.

If, on the other hand, an object could be seen in a given place (a factory, for example) to which members of the public not bound to secrecy, including persons with sufficient technical knowledge to ascertain the specific features of the object, had access, all knowledge which an expert was able to gain from a purely external examination is to be regarded as having been made available to the public. In such cases, however, all concealed features which could be ascertained only by dismantling or destroying the object will not be deemed to have been made available to the public.

The principles as laid down in section G-IV, 7.2.1 in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

### **6.2.2 Agreement on secrecy**

The basic principle to be adopted is that subject-matter has not been made available to the public by use or in any other way if there is an express or tacit agreement on secrecy which has not been broken, or if the circumstances of the case are such that such secrecy derives from a relationship of good faith or trust. Good faith and trust are factors which may occur in contractual or commercial relationships (see EPC Guidelines G-IV, 7.2.2).

### **6.2.3 Use on non-public property**

As a general rule, use on non-public property, for example in factories and barracks, is not considered as use made available to the public, because company employees and soldiers are usually bound to secrecy, save in cases where the objects or processes used are exhibited, explained or shown to the public in such places, or where specialists not bound to secrecy are able to recognise their essential features from the outside. Clearly the above-mentioned "non-public property" does not refer to the premises of a third party to whom the object in question was unconditionally sold or the place where the public could see the object in question or ascertain features of it.

**6.2.4 Example of the accessibility of objects used**

A press for producing light building (hard fibre) boards was installed in a factory shed. Although the door bore the notice "Unauthorised persons not admitted", customers (in particular dealers in building materials and clients who were interested in purchasing light building boards) were given the opportunity of seeing the press although no form of demonstration or explanation was given. An obligation to secrecy was not imposed as, according to witnesses, the company did not consider such visitors as a possible source of competition. These visitors were not genuine specialists, i.e. they did not manufacture such boards or presses, but were not entirely laymen either. In view of the simple construction of the press, the essential features of the invention concerned were bound to be evident to anyone observing it. There was therefore a possibility that these customers, and in particular the dealers in building materials, would recognise these essential features of the press and, as they were not bound to secrecy, they would be free to communicate this information to others.

**6.2.5 Example of the inaccessibility of a process**

The subject of the patent concerns a process for the manufacture of a product. As proof that this process had been made available to the public by use, a similar already known product was asserted to have been produced by the process claimed. However, it could not be clearly ascertained, even after an exhaustive examination, by which process it had been produced.

**6.3 Prior art made available by means of oral description**

Rule 33.1(b),  
Rule 64.2, Rule 70.9  
GL/ISPE 11.22

If the prior art was made available to the public by an oral description before the relevant date (i.e. the date of filing of the application or, if applicable, the date of the earliest validly claimed priority) but a document which reproduces the oral description was only published on or after that relevant date, the ISR and the IPER draw attention to this non-written disclosure in the manner provided for in Rule 70.9 (Rule 33.1(b) and 64.2).

**6.4 Internet disclosures**

GL/ISPE 11.13-  
11.20

As a matter of principle, disclosures on the internet form part of the prior art. Information disclosed on the internet or in online databases is considered to be publicly available as of the date the information was publicly posted. Internet websites often contain highly relevant technical information. Certain information may even be available only on the internet from such websites. This includes, for example, online manuals and tutorials for software products (such as video games) or other products with a short life cycle, as well as audio files, videos and other multimedia formats.

As regards establishing the publication date and the standard and burden of proof, in particular with technical journals or "print equivalent" publications, the principles as laid down in the Guidelines for Examination in the EPO (G-IV, 7.5.1 to 7.5.6) apply *mutatis mutandis*.

**6.5 Standards and standard preparatory documents**

The principles as laid down in the Guidelines for Examination in the EPO (G-IV, 7.6) apply *mutatis mutandis*.

**7. Cross-references between prior-art documents**

If a document (the "primary" document) refers explicitly to another document (the "secondary" document) as providing more detailed information on certain features, the teaching of the latter is to be regarded as incorporated into the primary document if the document was available to the public on the publication date of the primary document. The relevant date for novelty purposes, however, is always the date of the primary document.

**8. Errors in prior-art documents**

The principles as laid down in the Guidelines for Examination in the EPO G-IV, 9 apply *mutatis mutandis*.

## Chapter V – Non-prejudicial disclosures

### 1. General

The PCT acknowledges that in certain cases the invention may have been disclosed before the relevant date for the purposes of the PCT in such a way that it is not considered to form part of the prior art in accordance with the national law of one or more designated Offices (Rule 51*bis*.1(a)(v)).

*GL/ISPE 16.76*  
*PCT/AI Section 215*  
*Rule 4.17(v)*

Therefore, it should be borne in mind that, upon validly entering the regional phase before the EPO, the standards for non-prejudicial disclosures as laid down in Article 55(1) EPC will be applied.

Consequently, the principles as laid down in Chapter G-V of the Guidelines for Examination in the EPO apply *mutatis mutandis*.

## Chapter VI – Novelty

### 1. Prior art pursuant to Art. 33(2)

Under the PCT, an invention is considered to be novel if it is not anticipated by the prior art. Everything which is made available to the public anywhere in the world by any means which is capable of being of assistance in determining that the claimed invention is or is not new and that it does or does not involve an inventive step (i.e., that it is or is not obvious), is considered prior art provided that such making available to the public occurred prior to the relevant date. In cases where the making available to the public occurred by non-written means, it constitutes prior art only if a written disclosure that occurred before the relevant date confirms the non-written disclosure. The relevant date is the international filing date or, where at least one priority has been validly claimed, the date of the earliest priority. It should be noted that in considering novelty (as distinct from inventive step), it is not permissible to combine separate items of prior art together. It is also not permissible to combine separate items belonging to different embodiments described in one and the same document, unless such combination has specifically been suggested, see also ISPE Guidelines 12.06.

*Art. 33(1) and (2)  
Rule 43bis.1(a)(i),  
Rule 33.1,  
Rule 64.1, Rule 64.2  
GL/ISPE 12.01, 12.02*

For the specific case of selection inventions see ISPE Guidelines 12.10.

Furthermore, any matter explicitly disclaimed (with the exception of disclaimers which exclude unworkable embodiments) and prior art acknowledged in a document, insofar as explicitly described therein, are to be regarded as incorporated in the document.

It is further permissible to use a dictionary or similar document of reference in order to interpret a special term used in a document.

*GL/ISPE 12.06*

### 2. Implicit features or well-known equivalents

A document takes away the novelty of any claimed subject-matter derivable directly and unambiguously from that document including any features implicit to a person skilled in the art in what is expressly mentioned in the document, e.g. a disclosure of the use of rubber in circumstances where clearly its elastic properties are used even if this is not explicitly stated takes away the novelty of the use of an elastic material. The limitation to subject-matter "derivable directly and unambiguously" from the document is important. Thus, when considering novelty, it is not correct to interpret the teaching of a document as embracing well-known equivalents which are not disclosed in the documents; this is a matter of inventive step.

*GL/ISPE 12.04*

### 3. Relevant date of a prior document

In determining novelty, a prior document should be read as it would have been read by a person skilled in the art on the relevant date of the document. For the purpose of assessing novelty the "relevant" date for written disclosures is the date as defined by Rule 64.1(b), i.e. either the international filing date of the application under consideration or, if a priority has been validly claimed, the application date of that earlier application (if the filing date of the application is within the two-month period after the expiry of the priority period of the earlier application, the relevant date is

*Rule 64.1, Rule 64.2,  
Rule 33.1(b)*

also the application date of that earlier application); for non-written disclosures see Rule 33.1(b), 64.1 and 64.2.

#### **4. Enabling disclosure of a prior document**

Rule 33, Rule 64  
GL/ISPE 12.02

Subject-matter described in a document can only be regarded as having been made available to the public, and therefore as comprised in the prior art pursuant to Rule 33 and 64, if the information given therein to the skilled person is sufficient to enable them, at the relevant date of the document, to practise the technical teaching which is the subject of the document, taking into account also the general knowledge at that time in the field to be expected of them.

Similarly, it should be noted that a chemical compound, the name or formula of which is mentioned in a prior-art document, is not thereby considered as known, unless the information in the document, together, where appropriate, with knowledge generally available on the relevant date of the document, enables it to be prepared and separated or, for instance in the case of a product of nature, only to be separated.

The EPO applies option A12.02[1] of the Appendix to Chapter 12 of the ISPE Guidelines.

The principles as laid down in section G-IV, 2 in the Guidelines for Examination in the EPO apply *mutatis mutandis*.

#### **5. Generic disclosure and specific examples**

GL/ISPE 12.08, 12.09

In considering novelty, it should be borne in mind that a generic disclosure does not usually take away the novelty of any specific example falling within the terms of that disclosure, but that a specific disclosure does take away the novelty of a generic claim embracing that disclosure, e.g. a disclosure of copper takes away the novelty of metal as a generic concept, but not the novelty of any metal other than copper, and one of rivets takes away the novelty of fastening means as a generic concept, but not the novelty of any fastening other than rivets.

#### **6. Implicit disclosure and parameters**

GL/ISPE 12.04

In the case of a prior document, the lack of novelty may be apparent from what is explicitly stated in the document itself. Alternatively, it may be implicit in the sense that, in carrying out the teaching of the prior document, the skilled person would inevitably arrive at a result falling within the terms of the claim. An objection of lack of novelty of this kind should be raised by the examiner only where there can be no reasonable doubt as to the practical effect of the prior teaching. Situations of this kind may also occur when the claims define the invention, or a feature thereof, by parameters. It may happen that in the relevant prior art a different parameter, or no parameter at all, is mentioned. If the known and the claimed products are identical in all other respects (which is to be expected if, for example, the starting products and the manufacturing processes are identical), then in the first place an objection of lack of novelty arises. The burden of proof for an alleged distinguishing feature lies with the applicant. No benefit of doubt can be accorded if the applicant does not provide evidence in support of the allegations. If, on the other hand, the applicant is able to show, e.g. by

appropriate comparison tests, that differences do exist with respect to the parameters, it is questionable whether the application discloses all the features essential to manufacture products having the parameters specified in the claims (Art. 5).

## **7. Examination of novelty**

In determining novelty of the subject-matter of claims, the examiner should remember that, particularly for claims directed to a physical entity, non-distinctive characteristics of a particular intended use should be disregarded. For example, a claim to a substance X for use as a catalyst would not be considered to be novel over the same substance known as a dye, unless the use referred to implies a particular form of the substance (e.g. the presence of certain additives) which distinguishes it from the known form of the substance. That is to say, characteristics not explicitly stated, but implied by the particular use, should be taken into account.

*GL/ISPE 12.05*

A known compound is not rendered novel merely because it is available with a different degree of purity if the purity can be achieved by conventional means.

### **7.1 Second or further medical use of known pharmaceutical products**

How the novelty of second or further medical use claims is assessed depends on the IPEA. The examiner at the EPO as IPEA examines the novelty of the subject-matter in view of the entry into the regional phase before the EPO and therefore will apply the principles as laid down in EPC Guidelines G-VI, 6.1 and subsections. See B-VIII, 2.1, for the treatment of medical use claims by the EPO as ISA.

### **7.2 Second non-medical use**

A claim to the use of a known compound for a particular purpose (second non-medical use) which is based on a technical effect will be interpreted by the EPO examiner as including that technical effect as a functional technical feature. The novelty of the use of the known compound for the known production of a known product cannot be deduced from a new property of the produced product. In such a case, the use of a compound for the production of a product will be interpreted as a process for production of the product with the compound. Therefore, it can be regarded as novel only if the process of production as such is novel.

## **8. Selection inventions**

Selection inventions deal with the selection of individual elements, subsets, or subranges, which have not been explicitly mentioned, within a larger known set or range. The examiner of the EPO as IPEA will assess the novelty of the subject-matter according to the principles laid down in EPC Guidelines G-VI, 7 and subsection.

*GL/ISPE 12.10*

## **9. Novelty of "reach-through" claims**

"Reach-through" claims are defined as claims attempting to obtain protection for a chemical product (and also uses thereof, compositions thereof, etc.) by defining that product functionally in terms of its action (e.g. agonist, antagonist) on a biological target such as an enzyme or

receptor. In many such cases, the applicant functionally defines chemical compounds in this way by reference to a newly identified biological target. However, compounds which bind to and exercise this action on that biological target are not necessarily novel compounds simply because the biological target which they act on is new. Indeed in many cases, applicants themselves provide test results in the application whereby known compounds are shown to exert this action on the new biological target, thus demonstrating that compounds falling within the functional definition of the "reach-through" claim are known in the prior art and so establishing that a reach-through claim relating to compounds defined in this way lacks novelty.

## Chapter VII – Inventive step

### 1. General

An invention is considered to involve an inventive step if, having regard to the prior art, it is not obvious to a person skilled in the art. Novelty and inventive step are different criteria. The question of whether there is inventive step only arises if the invention is novel.

Art. 33(3)  
GL/ISPE 13.01

### 2. Prior art; date of filing, date of priority

The "prior art" for the purposes of considering inventive step is as defined in Art. 33(3).

GL/ISPE 13.02

In determining what is to be considered prior art, the principles laid down in G-IV apply.

### 3. Person skilled in the art

The "person skilled in the art" should be presumed to be a skilled practitioner in the relevant field of technology, who possesses average knowledge and ability and is aware of what was common general knowledge in the art at the relevant date. They should also be presumed to have had access to everything in the "prior art", in particular the documents cited in the search report, and to have had at their disposal the means and capacity for routine work and experimentation which are normal for the field of technology in question. If the problem prompts the person skilled in the art to seek its solution in another technical field, the specialist in that field is the person qualified to solve the problem. The skilled person is involved in constant development in their technical field.

GL/ISPE 13.11

#### 3.1 Common general knowledge of the skilled person

Section G-VII, 3.1, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 4. Obviousness

Thus the question to consider, in relation to any claim defining the invention, is whether before the filing or priority date valid for that claim, having regard to the art known at the time, it would have been obvious to the person skilled in the art to arrive at something falling within the terms of the claim. If so, the claim is not allowable for lack of inventive step. The term "obvious" means that which does not go beyond the normal progress of technology but merely follows plainly or logically from the prior art, i.e. something which does not involve the exercise of any skill or ability beyond that to be expected of the person skilled in the art. In considering inventive step, as distinct from novelty, it is fair to construe any published document in the light of knowledge up to and including the day before the relevant date according to Rule 65.2 for the claimed invention and to have regard to all the knowledge generally available to the person skilled in the art up to and including that day.

Rule 65.1  
GL/ISPE 13.03,  
GL/ISPE 13.09,  
GL/ISPE 13.10

### 5. Problem-solution approach

In order to render the assessment of inventive step more objective, the EPO applies the so-called "**problem-solution approach**", which should be applied consistently.

GL/ISPE 13.08,  
GL/ISPE A13.08.1-  
GL/ISPE A13.08.9

In the problem-solution approach, there are three main stages:

- (i) determining the "closest prior art",
- (ii) establishing the "objective technical problem" to be solved, and
- (iii) considering whether or not the claimed invention, starting from the closest prior art and the objective technical problem, would have been obvious to the skilled person.

The EPO applies option A13.08.1 of the Appendix to Chapter 13 of the ISPE Guidelines.

### 5.1 Determination of the closest prior art

GL/ISPE 13.10,  
GL/ISPE A13.08.2

Generally, the principles laid down in section G-VII, 5.1, in the Guidelines for Examination in the EPO apply *mutatis mutandis*. The closest prior art is that which in one single reference discloses the combination of features which constitutes the most promising starting point for a development leading to the invention. In selecting the closest prior art, the first consideration is that it should be directed to a similar purpose or effect as the invention or at least belong to the same or a closely related technical field as the claimed invention. In practice, the closest prior art is generally that which corresponds to a similar use and requires the minimum of structural and functional modifications to arrive at the claimed invention.

### 5.2 Formulation of the objective technical problem

GL/ISPE A13.08.3-  
GL/ISPE A13.08.7

In the second stage, the examiner establishes in an objective way the **technical problem** to be solved. The method to do so is to study the application (or the patent), the closest prior art and the difference (also called "the **distinguishing feature(s)**" of the claimed invention) in terms of features (either structural or functional) between the claimed invention and the closest prior art, identify the technical effect resulting from the distinguishing features, and then formulate the technical problem.

The objective technical problem derived in this way may not be what the applicant presented as "the problem" in the application. The latter may require reformulation, since the objective technical problem is based on objectively established facts, in particular appearing in the prior art revealed in the course of the proceedings, which may be different from the prior art of which the applicant was actually aware at the time the application was filed. In particular, the prior art cited in the search report may put the invention in an entirely different perspective from that apparent from reading the application only. Reformulation might lead to the objective technical problem being less ambitious than originally envisaged by the application.

Section G-VII, 5.2, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### 5.3 Could-would approach

GL/ISPE A13.08.8,  
GL/ISPE A13.08.9

In the third stage the question to be answered is whether there is any teaching in the prior art as a whole that **would** (not simply could, but would)

have prompted the skilled person, faced with the objective technical problem, to modify or adapt the closest prior art while taking account of that teaching, thereby arriving at something falling within the terms of the claims, and thus achieving what the invention achieves.

#### **5.4 Claims comprising technical and non-technical features**

Section G-VII, 5.4, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

##### **5.4.1 Formulation of the objective technical problem for claims comprising technical and non-technical features**

Section G-VII, 5.4.1, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

##### **5.4.2 Examples of applying the steps listed in EPC Guidelines G-VII, 5.4**

Illustrative examples can be found in section G-VII, 5.4.2, and subsections G-VII, 5.4.2.1 to G-VII, 5.4.2.5, in the Guidelines for Examination in the EPO.

#### **6. Combining pieces of prior art**

In the context of the problem-solution approach, it is permissible to combine the disclosure of one or more documents, parts of documents or other pieces of prior art (e.g. a public prior use or unwritten general technical knowledge) with the closest prior art. However, the fact that more than one disclosure must be combined with the closest prior art in order to arrive at a combination of features may be an indication of the presence of an inventive step, e.g. if the claimed invention is not a mere aggregation of features.

*Rule 65.1*  
*GL/ISPE 13.12,*  
*GL/ISPE 13.13*

Section G-VII, 6 in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

#### **7. Combination vs. juxtaposition or aggregation**

The invention claimed must normally be considered as a whole. When a claim consists of a "combination of features", it is not correct to argue that the separate features of the combination taken by themselves are known or obvious and that "therefore" the whole subject-matter claimed is obvious. However, where the claim is merely an "aggregation or juxtaposition of features" and not a true combination, it is enough to show that the individual features are obvious to prove that the aggregation of features does not involve an inventive step.

*GL/ISPE 13.05,*  
*GL/ISPE 13.14(c),*  
*(d)*

#### **8. *Ex post facto* analysis**

It should be remembered that an invention which at first sight appears obvious might in fact involve an inventive step. Once a new idea has been formulated, it can often be shown theoretically how it might be arrived at, starting from something known, by a series of apparently easy steps. Examiners should be wary of *ex post facto* analysis of this kind. When combining documents cited in the search report, they should always bear in mind that the documents produced in the search have, of necessity, been obtained with foreknowledge of what matter constitutes the alleged

*GL/ISPE 13.15*

invention. In all cases they should attempt to visualise the overall state of the art confronting the skilled person before the applicant's contribution, and should seek to make a "real-life" assessment of this and other relevant factors. They should take into account all that is known concerning the background of the invention and give fair weight to relevant arguments or evidence submitted by the applicant, without the benefit of hindsight.

## **9. Origin of an invention**

While the claim should in each case be directed to technical features (and not, for example, merely to an idea), in order to assess whether an inventive step is present it is important for the examiner to bear in mind that an invention may, for example, be based on the following:

- (i) the devising of a solution to a known problem;
- (ii) the arrival at an insight into the cause of an observed phenomenon (the practical use of this phenomenon then being obvious).

Many inventions are of course based on a combination of the above possibilities, e.g. the arrival at an insight and the technical application of that insight may both involve the use of the inventive faculty.

## **10. Secondary indicators**

### **10.1 Predictable disadvantage; non-functional modification; arbitrary choice**

Section G-VII, 10.1, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **10.2 Unexpected technical effect; bonus effect**

Section G-VII, 10.2, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

### **10.3 Long felt need; commercial success**

See ISPE Guidelines 13.16-13.18.

## **11. Arguments and evidence submitted by the applicant**

Section G-VII, 11, in the Guidelines for Examination in the EPO applies *mutatis mutandis*.

## **12. Selection inventions**

Generally, the principles laid down in section G-VII, 12, in the Guidelines for Examination in the EPO apply *mutatis mutandis*. The subject-matter of selection inventions differs from the closest prior art in that it represents selected sub-sets or sub-ranges. If this selection is connected to a particular technical effect, and if no hints exist leading the skilled person to the selection, then an inventive step is accepted (this technical effect occurring within the selected range may also be the same effect as attained with the broader known range, but to an unexpected degree). The criterion of "seriously contemplating" mentioned in connection with the test for novelty of overlapping ranges should not be confused with the assessment of inventive step. For inventive step, it has to be considered whether the

skilled person would have made the selection or would have chosen the overlapping range in the hope of solving the underlying technical problem or in expectation of some improvement or advantage. If the answer is negative, then the claimed matter involves an inventive step.

The unexpected technical effect must apply to the entire range as claimed. If it occurs in only part of the claimed range, the claimed subject-matter does not solve the specific problem to which the effect relates, but only the more general problem of obtaining, for example, "a further product X" or "a further process Y".

**13. Dependent claims; claims in different categories**

See ISPE Guidelines 13.19.

**14. Examples**

See ISPE Guidelines 13.14.

2.2	Authorisation or refusal of the request for rectification of obvious mistakes in the application documents	IV-2
2.3	Allowability of rectifications	IV-2
2.4	Examples	IV-2

## Chapter I – The right to amend

Chapter H-I deals with the right to amend, while Chapters H-II and H-III deal with the allowability of amendments. Chapter H-IV is dedicated to the rectification of obvious mistakes.

### 1. Introduction

Notwithstanding the possibility to amend the claims before the IB under Art. 19, an international application may be amended during the PCT Chapter II procedure. There are a number of important aspects to consider.

Firstly, the amendments filed must be such that they can be taken into consideration by the EPO in its capacity as IPEA. The conditions governing timing and formal aspects are explained in H-I, 2 to H-I, 6.

Any change in the claims, the description or the drawings, other than a rectification of obvious mistakes under Rule 91, a correction under Rule 26 or the furnishing of missing parts under Rule 20.5 or correct elements or parts under Rule 20.5*bis*, is considered an amendment. Unless withdrawn or superseded by later amendments, any change considered an amendment must be taken into consideration for the purpose of the international preliminary examination.

*Art. 19*  
*Art. 34(2)(b)*  
*Rule 66.5*  
*GL/ISPE 20.04*

Secondly, amendments must be allowable, which means that they must not:

- (i) add to the application subject-matter which was not disclosed in the application as originally filed *Art. 19(2)*  
*Art. 34(2)(b)*
- (ii) introduce other deficiencies (such as lack of clarity in the claims). *GL/ISPE 20.09*

### 2. Amendments before receipt of the search report

There is no right to amend the application until after the international search report has been established. Obvious mistakes, on the other hand, may be corrected (see H-IV).

### 3. Amendments prior to the start of international preliminary examination

When filing the demand, the applicant should indicate on Form PCT/IPEA/401 which documents should form the basis for international preliminary examination. These may be:

*Art. 19*  
*Art. 34(2)(b)*  
*Rule 53.9*  
*Rule 66.1*  
*GL/ISPE 20.01-20.02*

- the international application as originally filed, or
- amendments to the claims under Art. 19 and/or
- amendments to the claims, the description and/or sequence listings filed as a part thereof and/or the drawings under Art. 34(2)(b).

The applicant may have filed amended claims under Art. 19 with the International Bureau after receipt of the search report and before the

*Rule 53.9(a)*

demand was filed. When filing the demand, the applicant may revert to the originally filed claims, reversing the amendments made according to Art. 19. If this is the case, preliminary examination proceeds on the basis of the originally filed set of claims.

*Rule 54bis,*  
*Rule 53.9(c),*  
*Rule 60.1(g),*  
*Rule 69.1(a)*  
*PCT AG I 10.010*

Amendments and/or arguments filed under Art. 34 should preferably be filed together with the demand. Where the applicant indicates in the statement concerning amendments filed with the demand that it is doing so, but fails to actually submit the amendments with the demand, the EPO as IPEA will invite the applicant to submit them within a set time limit (Form PCT/IPEA/431). Where the applicant has expressly requested postponement of the start of international preliminary examination until expiry of the time limit under Rule 54bis.1(a), the EPO as IPEA will take into account any amendments and/or arguments under Art. 34 which are filed before then (see also C-VI, 1).

The examiner should carefully check that the examination is based on the correct set of documents.

#### **4. Further opportunity to submit amendments**

*Art. 34(2)(b)*  
*Rule 66.4*

Together with the reply to the WO-ISA, the WO-IPEA or the minutes of a telephone consultation, the applicant has, subject to certain exceptions (see C-VII, 1(d)), the opportunity to submit (further) amendments under Art. 34 to the claims, description and/or drawings.

*Rule 66.4bis*  
*GL/ISPE 20.05*

Subsequently filed amendments and/or arguments will be taken into account by the EPO as IPEA only if they are received before the point at which preparation of a written opinion or the IPER has actually started.

For further details, see C-IV, 1 and C-IV, 2 and subsections, and C-VII, 1.

#### **5. Amended sheets**

*Rule 66.8*  
*GL/ISPE 20.06*

Amendments to the claims, the description and the drawings must be made by filing replacement sheets when, on account of the amendments, the replacement sheet differs from the sheets previously filed.

*Rule 46.5*  
*Rule 66.8(c)*

If amendments to the claims are filed, a complete set of the claims in replacement of all claims originally filed must be submitted.

If amendments to the description are filed, it is advisable to submit the complete amended description to avoid publication errors, such as wrong page breaks.

*Rule 92.4*  
*GL/ISPE 20.08*  
*OJ EPO 2024, A41*  
*PCT Gazette*  
*10.05.2024, 88*

The applicant may submit amendments using the EPO's filing tools or on paper. The EPO no longer accepts submissions by fax (a change with effect from 1 July 2024) and any transmission of a document by fax to the EPO shall be deemed not to have been received. Printed or typed amendments are preferred; handwritten amendments are, in general, not acceptable. Nevertheless, if the handwritten amendments are legible they may – at the discretion of the EPO – be admitted.

If amendments are made to a sequence listing contained in an application filed in electronic form, a sequence listing in electronic form comprising the entire listing with the relevant amendment must be filed.

*PCT/Al Annex C, 3ter*

## **6. Indication of amendments and their basis**

The applicant is obliged to indicate the basis in the application as originally filed for any amendments filed, i.e. the applicants may indicate in an accompanying letter

*Rule 46.5*

*Rule 66.8(a)*

*Rule 70.2(c-bis)*

- the differences between the application as originally filed and any amendments made,
- the basis for the amendments in the application as filed, and
- the reasons for any such amendments.

If the basis for any amendment is not indicated as required and is not apparent, the EPO will establish the written opinion and/or IPER as if no amendments had been filed and without first issuing a reminder. If an IPER is issued, this is indicated under Section I.

If a further WO-IPEA (Form 408) is sent (with respect for the principles set out in C-IV, 2.2), there should be a similar indication in the WO-IPEA as to which amendments could not be taken into account. Further, the applicant may also be reminded in this WO-IPEA to specify the basis for the amendments which may be filed in reply to the WO-IPEA. However, a WO-IPEA whose only content would be a request to indicate the basis for such amendments will not be sent; instead, the IPER is established directly.

## Chapter II – Allowability of amendments

### 1. Introduction

Once the EPO as IPEA has concluded that the amendments can be taken into consideration (see H-I), all amended pages (description, claims, drawings) must be examined to see whether they introduce subject-matter not originally disclosed. The examiner should apply the criteria used under Art. 123(2) EPC for the European procedure *mutatis mutandis*, as indicated below. It is important to note that an amendment which is taken into consideration by the EPO as IPEA is not automatically allowable.

GL/ISPE 20.09

With regard to establishing the WO-IPEA or IPER if any newly filed claim, drawing or part of the description contains amendments which are considered to go beyond the disclosure as originally filed, see C-III, 4.

### 2. Allowability of amendments

#### 2.1 Basic principle

The examiner should apply the guidelines of section H-IV, 2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

GL/ISPE 20.12

#### 2.2 Content of the application as "originally" filed – general rules

The examiner should apply the guidelines of section H-IV, 2.2, in the Guidelines for Examination in the EPO *mutatis mutandis*.

##### 2.2.1 Features described in a document cross-referenced in the description

The examiner should apply the guidelines of section H-IV, 2.2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

##### 2.2.2 Incorporating missing or correct parts or elements completely contained in the priority document

If the applicant files (a) missing or correct part(s) (i.e. part(s) of the description, part(s) of the claims and/or part(s) or all of the drawings) and/or (a) missing or correct element(s) (i.e. all of the description and/or all of the claims), the filing date of the application as a whole will be the date on which the part(s) and/or the element(s) was (were) subsequently furnished, unless the RO accepted the incorporation by reference of the missing or correct part(s) and/or element(s).

Rule 20.3

Rule 20.5

Rule 20.5bis

Rule 20.7

OJ EPO 2020, A81

An applicant therefore has the possibility to furnish parts of the application and/or entire elements which were erroneously omitted without affecting the international filing date by requesting their incorporation by reference to the priority document (see A-II, 5).

Rule 4.18

Rule 20.6

Similarly, an applicant therefore also has the possibility to request the correction of erroneously filed parts of the application and/or entire elements without affecting the international filing date by requesting their incorporation by reference to the priority document. This latter possibility is, however, not available before all ROs. In particular, the EPO acting as RO had notified the IB of the incompatibility of Rule 20.5bis(a)(ii) and Rule 20.5bis(d) with the legal framework under the EPC; see A-II, 6.

Rule 19.4(a)(iii)

Rule 20.5bis(a)(ii)

Rule 20.8(a-bis)

PCT Gazette

30.01.2020, 11-12

However, following the withdrawal of this notification of incompatibility with effect from 1 November 2022, the EPO as RO may now also process requests for incorporation by reference of the correct element or part for international applications filed on or after 1 November 2022. See A-II, 6.2.

The activity of the EPO as ISA and IPEA depends on the decisions taken by the RO with regard to the international application and its filing date (see B-III, 2.3.3 and B-III, 2.3.4, and B-XI, 2.1).

*Rule 4.18*

*Rule 20.3*

*Rule 20.5*

*Rule 20.5bis*

*Rule 20.7*

A request for incorporation by reference can only be filed before the RO within two months of the date of receipt of the purported international application (or at the invitation of the RO) provided that the priority claim was present at that initial date of receipt and only if the applicant can show that the missing or correct part(s) and/or element(s) was (were) completely contained in the priority document. Missing or correct parts and/or elements which have been accepted under this criterion are considered to be part of the application documents "as originally filed" (see B-III, 2.3.4 and B-XI, 2.1).

*Rule 20.5(e)*

*Rule 20.5bis(e)*

If the RO finds that the "completely contained" criterion is not met, the filing date of the application will be the date on which the part(s) and/or the element(s) was (were) subsequently furnished (unless, in the case of missing parts or of correct elements and/or parts, the applicant withdraws the subsequently furnished elements and/or parts). Where the EPO is (S)ISA or IPEA, the examiner must check (as far as the documents needed are available) whether the RO's assessment of the "completely contained" criterion was correct.

See also A-II, 5.

### **2.2.2.1 Test for "completely contained"**

*Rule 20.5(a)(ii)*

*Rule 20.5(d)*

*Rule 20.5bis(a)(ii)*

*Rule 20.5bis(d)*

*OJ EPO 2020, A81*

*GL/RO 205D*

*GL/ISPE 15.11*

The test for "completely contained" is stricter than the test for added subject-matter since it is a test whether the subsequently filed missing or correct part(s) and/or element(s) was (were) identical to the corresponding extract in the priority document, or a translation thereof.

Although the RO is responsible for the decision on whether the missing or correct part(s) and/or element(s) was (were) completely contained in the priority document, the examiner must check (as far as the documents needed are available) that the decision taken was correct.

If the EPO is the RO, the examiner is only required to check for additional technical content. This entails ensuring that the missing text has been inserted into the application in such a position that it has exactly the same meaning as it had in the priority document.

If the EPO is not the RO, the identity of drawings and the word-for-word identity of (parts of) the description/claim(s) must also be checked by the examiner (unless the documents needed are not available at this stage).

**2.2.2.2 Review by the examiner**

If the missing or correct part(s) and/or element(s) was (were) indeed completely contained in the priority document, the examiner will treat the file as having the filing date accorded by the RO. The examiner will proceed in the same way where unable to check whether the missing or correct part(s) and/or element(s) was (were) indeed completely contained in the priority document because, at the time of the search or the preliminary examination, the priority document(s) or any other document needed (i.e. the subsequently filed sheet(s) embodying the missing or correct part(s)/element(s) or the translation of the priority document) is (are) not available to the ISA or IPEA. If the documents needed for the check are not available, this will be indicated in the WO-ISA/IPER, in Section I of the separate sheet.

*Rule 20.5(a)(ii)*  
*Rule 20.5(d)*  
*Rule 20.5bis(a)(ii)*  
*Rule 20.5bis(d)*  
*OJ EPO 2020, A81*  
*GL/ISPE 15.11*

If the missing or correct part(s) and/or element(s) was (were) not completely contained in the priority document, the decision on the filing date made by the RO is still valid for the international phase. However, the examiner will indicate in the WO-ISA/IPER in Section I of the separate sheet that there are doubts as to whether the missing or correct part(s) and/or element(s) was (were) actually completely contained in the priority document. The search report and the WO-ISA or the IPER, as applicable, will also include documents which would be relevant if the application were to be redated (see B-III, 2.3.3).

If the receiving Office has granted a request for incorporation by reference of a missing element or part, or of a correct element or part, under Rule 4.18, 20.5(d), 20.6 and/or 20.5bis(d) but the EPO as IPEA does not consider that element or part to be completely contained in the priority application, it will indicate this in the IPER.

*Rule 4.18, 20.5(d),*  
*20.5bis(d), 20.6*  
*OJ EPO 2020, A81*  
*OJ EPO 2022, A71*

A review of the decision by the RO can only take place in the regional phase (Rule 82ter.1(b)).

After entry into the regional phase before the EPO (Euro-PCT phase) the applicant can withdraw the subsequently filed missing or correct parts and/or correct elements in order to avoid the redating of the application. In this case, it should be noted that amendments which are acceptable under the less strict criterion of Art. 123(2) EPC can always be filed during the Euro-PCT phase.

*Rule 82ter.1(d)*

**2.2.3 Sequence listings filed after the filing date**

Any sequence listing not contained in the international application as filed will – if not allowable as an amendment under Article 34 – not form part of the international application.

*Rule 13ter.1(c)*

See B-VIII, 3.2, for the effect on the search and B-XI, 7, for the effect on the WO-ISA. For the effect on examination in Chapter II, see C-VIII, 2.1.

**2.2.4 Priority documents**

It is not permissible to add to an international application matter present only in the priority document for that application, unless this is done under

the provisions of Rule 20.6 (see H-II, 2.2.2). For correction of errors, see H-IV.

### **2.2.5 Citation of prior art in the description after the filing date**

*GL/ISPE 20.10*

The examiner should apply the guidelines of section H-IV, 2.2.7, in the Guidelines for Examination in the EPO *mutatis mutandis*.

### **2.2.6 Clarification of inconsistencies**

*GL/ISPE 20.10*

The examiner should apply the guidelines of section H-IV, 2.2.8, in the Guidelines for Examination in the EPO *mutatis mutandis*.

### **2.2.7 Trade marks**

The examiner should apply the guidelines of section H-IV, 2.2.9, in the Guidelines for Examination in the EPO *mutatis mutandis*.

## Chapter III – Allowability of amendments – examples

### 1. Introduction

This chapter provides additional guidance and examples relating to a number of typical situations where compliance with Art. 19(2) and/or Art. 34(2)(b) is an issue. However, it must be borne in mind that the allowability of a specific amendment is ultimately to be decided on a case-by-case basis.

### 2. Amendments in the description

#### 2.1 Clarification of a technical effect

The examiner should apply the guidelines of section H-V, 2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*. GL/ISPE 20.15

#### 2.2 Introduction of further examples and new effects

The examiner should apply the guidelines of section H-V, 2.2, in the Guidelines for Examination in the EPO *mutatis mutandis*. GL/ISPE 20.16-GL/ISPE 20.17

#### 2.3 Revision of stated technical problem

The examiner should apply the guidelines of section H-V, 2.4, in the Guidelines for Examination in the EPO *mutatis mutandis*. GL/ISPE 20.18

#### 2.4 Reference document

The examiner should apply the guidelines of section H-V, 2.5, in the Guidelines for Examination in the EPO *mutatis mutandis*.

#### 2.5 Alteration, excision or addition of text in the description

The examiner should apply the guidelines of section H-V, 2.6, in the Guidelines for Examination in the EPO *mutatis mutandis*. GL/ISPE 20.19

### 3. Amendments in claims

#### 3.1 Replacement or removal of a feature from a claim

The examiner should apply the guidelines of section H-V, 3.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

#### 3.2 Inclusion of additional features

The examiner should apply the guidelines of section H-V, 3.2, in the Guidelines for Examination in the EPO *mutatis mutandis*.

##### 3.2.1 Intermediate generalisations

The examiner should apply the guidelines of section H-V, 3.2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

#### 3.3 Deletion of part of the claimed subject-matter

The examiner should apply the guidelines of section H-V, 3.3, in the Guidelines for Examination in the EPO *mutatis mutandis*.

**3.4 Further cases of broadening of claims**

The examiner should apply the guidelines of section H-V, 3.4, in the Guidelines for Examination in the EPO *mutatis mutandis*.

**3.5 Disclaimer disclosed in the application as originally filed**

GL/ISPE 20.21

The examiner should apply the guidelines of section H-V, 4.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

**4. Disclaimers not disclosed in the application as originally filed****4.1 The subject-matter to be excluded is not disclosed in the application as originally filed (so-called undisclosed disclaimers)**

The examiner should apply the guidelines of section H-V, 4.2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

The EPO applies option A20.21[2] of the Appendix to Chapter 20 of the ISPE Guidelines.

**4.2 The subject-matter to be excluded is disclosed in the application as originally filed**

The examiner should apply the guidelines of section H-V, 4.2.2, in the Guidelines for Examination in the EPO *mutatis mutandis*.

**5. Amendments to drawings**

It is normally not possible under Art. 34(2)(b) to add completely new drawings to an application, since in most cases a new drawing cannot be unambiguously derivable from the mere text of the description. For the same reasons amendments to drawings should be carefully checked for compliance with Art. 34(2)(b).

For drawings based on the priority document, see H-II, 2.2.2 and subsections.

**6. Amendments derived from drawings**

The examiner should apply the guidelines of section H-V, 6, in the Guidelines for Examination in the EPO *mutatis mutandis*.

**7. Amendments to the title**

Rule 5.1, 37

GL/ISPE 16.35-16.38

The sole purpose of the title is to inform the public about the technical information disclosed in the application. Based on Rule 37.2, the search examiner does not need the applicant's approval to compose or amend the title.

Under Rule 5.1, the title is considered to be a part of the description. Under Rule 37.2, in the absence of a title, or when the title does not comply with Rule 4.3 (i.e. it is too long or not precise enough), the search examiner can compose a title or amend the existing one. On the basis of these two rules taken in conjunction, the EPO as ISA may accept amendments of the title proposed by the applicant, provided that any such amendments do not go beyond the disclosure in the international application as filed.

Moreover, the title can be amended before the EPO as IPEA under Art. 34, like any other part of the description. *Art. 34*

The description should start with the same title as appears in the request (Form PCT/RO/101). Even if the title appears only in the request form, it is nevertheless considered to be a part of the application as filed. If the title appearing in the request form is not identical to the one appearing at the beginning of the description, the search examiner will consider the title not to be precise within the meaning of Rule 4.3 and will thus proceed in accordance with Rule 37.2 to establish a title. See also F-II, 3. *Art.3(2) PCT  
GL/SPE 4.03*

## Chapter IV – Correction of defects and errors

### 1. Substitute sheets (Rule 26)

If the RO finds defects under Art. 14(1)(a), it invites the applicant to correct them by submitting replacement sheets which will be marked "SUBSTITUTE SHEET (RULE 26)", and these will retain the original filing date if submitted within the set time limit.

*Art. 14*

*Rule 26*

*PCT/AI Section 325*

In cases where the EPO is not the RO, substitute sheets may already have been allowed by the RO concerned and the file will then contain these substitute sheets in addition to the originally filed documents.

Where the EPO is (S)ISA or IPEA, the examiner must check whether the substitute sheets contain amendments/corrections that go beyond the limits of Rule 26 PCT and breach the prohibition on adding subject-matter, and inform the applicant in case substitute sheets under Rule 26 PCT go beyond the disclosure on the filing date.

### 2. Request for rectification of obvious mistakes in the application documents (Rule 91)

#### 2.1 Introduction

An applicant can request authorisation to rectify obvious mistakes in the international application. Rectification is authorised on condition that:

*Rule 91.1(a)*

*Rule 91.1(c)*

*GL/ISPE 8.01*

- (i) the mistake is obvious to the skilled person, i.e. that something else was intended than what appears in the document concerned, and
- (ii) the rectification is obvious to the skilled person, i.e. that nothing else could have been intended than the proposed correction.

The applicant may submit a request for rectification of an obvious mistake in the description, claims and drawings (not the abstract) of the international application (including amended documents) to the ISA or the IPEA, which is the competent authority to authorise or refuse such rectification. If the obvious mistake is related to the request form (PCT/RO/101), it is the RO which authorises or refuses the rectification.

*Rule 91.1(b)(ii)*

*Rule 91.1(b)(iii)*

In cases where the EPO is not the competent authority with respect to the request for rectification but still needs to issue a PCT action, rectified sheets may already have been allowed by the competent authority concerned and the file will then contain these rectified sheets in addition to the originally filed documents.

Although the competent authority should not allow newly filed sheets that contain added subject-matter, it may happen that such rectified sheets do in fact contain amendments which go beyond the disclosure as originally filed. In such cases, this will be mentioned in the written opinion and/or report and, if necessary, the search and examination will be restricted to what was originally disclosed. However, the examiner is not required to systematically check such sheets for added subject-matter.

The language requirements for a request for rectification of an obvious mistake in the description, claims and drawings by the EPO as ISA or IPEA are set out in A-VII, 3.1.

## **2.2 Authorisation or refusal of the request for rectification of obvious mistakes in the application documents**

### *Rule 91.2*

In order to determine whether the request for rectification of obvious mistakes can be authorised, the examiner should check that the time limit for requesting rectification has not expired. The request for rectification can only be considered if it is filed with the competent authority within 26 months from the priority date.

If the request is too late, it is refused on that ground.

If the request is in time, the examiner must check whether the requested rectifications satisfy the above criteria (i) and (ii) (see H-IV, 2.1).

- If one or both of the criteria (i) and (ii) are not satisfied, the examiner will not authorise the request and will indicate the reasons.
- If the request is authorised, no reasons need to be given. The fact that a rectification of an obvious mistake has been taken into account will be indicated in the WO-ISA, WO-IPEA (Form 408) or IPER (Form 409) under Section I.
- If the request is authorised only in part, the examiner indicates which rectifications are not allowable, together with the reasons, and which rectifications are allowable. The fact that a rectification of an obvious mistake has been taken into account (in part) will also be indicated in the WO-ISA, WO-IPEA (Form 408) or IPER (Form 409) under Section I.

### *Rule 91.1*

*GL/ISPE 17.16*

*PCT/ AI Section 607*

Authorised replacement pages or sheets for rectification of obvious mistakes under Rule 91 are deemed to be part of the international application "as originally filed". These sheets are identified with "RECTIFIED SHEET (RULE 91.1)".

### *Rule 91.3(d)*

If authorisation of a request for rectification is refused, the applicant may request the IB in writing, within two months of the refusal, to publish the refused request together with the reasons for refusal, subject to payment of a special fee.

## **2.3 Allowability of rectifications**

The examiner will apply the same criteria in assessing the substantive allowability of proposed rectifications according to Rule 91.1 as for European applications according to Rule 139 EPC (see EPC Guidelines H-VI, 2.2.1).

## **2.4 Examples**

The examiner should apply the guidelines contained in the examples of section H-VI, 2.2.1, in the Guidelines for Examination in the EPO *mutatis mutandis*.

# List of sections amended in 2026 revision

## MAJOR AMENDMENTS

<b>GENERAL PART</b>	1	Clarification that all references to persons in the Guidelines are gender-neutral
	1.2.1	New subsection on relationship between the PCT-EPO Guidelines and the RO Guidelines
	1.3	New subsection on further sources of information
	1.4	New subsection on use of artificial intelligence
<b>PART A</b>	V, 1.2	Update on processing of colour drawings, OJ EPO 2025, A57
	VI, 2.2	New subsection on closure of national routes
<b>PART B</b>	VI, 2	New Rules 33 and 64 PCT
<b>PART E</b>	III, 1	Addition of Bahrain as one of EPO's PPH partner offices
<b>PART G</b>	IV, 1 IV, 6 IV, 6.1 VI, 1 VI, 3	Changes to reflect new Rules 33 and 64 PCT

## MINOR AMENDMENTS

<b>GENERAL PART</b>	1.2	New subsection based on content moved from former General Part, 2.4
	1.2.2	New subsection based on content moved from former General Part, 2.3
	2.3	Deletion of sections, content moved to new General Part, 1.2.2
	2.4	Deletion of sections, content moved to new General Part, 1.2

	3	Deletion of redundant information
<b>PART A</b>	1.2	Deletion of content already present in General Part
	II, 1.2.1 II, 3.1 IV, 1.2	Update to reflect decommissioning of EPO Online Filing (OLF)
	II, 6.2	Clarification that correction has no impact on international filing fee
	III, 4.2	Addition of information that amount of international filing fee depends on the total number of sheets
	III, 4.4.2	Update to reflect renaming of “MyEPO Portfolio” to “My EPO”
	III, 8.2	Restructured for better readability
	III, 9.2	Alignment with WIPO-EPO Agreement, Annex D-II
	III, 9.2.1	Update to reflect OJ EPO 2025, A26 concerning refund of the international search fee by the EPO acting as ISA
	VI, 1.7	Update to reflect OJ EPO 2025, A52 concerning electronic filing of documents
	VI, 1.8	Update to reflect OJ EPO 2025, A3, A7 and A8 concerning the issuing of electronic priority documents
	VI, 4	Clarification regarding designation of inventor
	VII, 2.3.2	Addition of reference to VII, 3.1
	VIII, 1.2	Updates regarding representation by an agent
	VIII, 3.2	Clarification regarding signature requirements
<b>PART B</b>	I, 2	Addition of information regarding prospective examining divisions
	II, 1.1	Deletion of redundant information
	IV, 1.1	Deletion of information regarding validity of priority
	VII, 1	Addition of cross-references to Part B and C

	VII, 2	Addition of information regarding payment of additional fees by the applicant in the case of a non-unitary application (EPO as ISA), even if all inventions have been searched in earlier applications
	VII, 4	Alignment with EPC Guidelines, Part B-VII, 1.2.2
	VIII, 2	Addition of information regarding use of an apparatus in methods of treatment or diagnosis performed on the human or animal body
	VIII, 3.6	Addition of information regarding combinations of non unity and incomplete search
	XI, 3.4	Addition of information regarding prospective examining divisions
	XI, 4.1	Addition of information regarding international applications with a filing date later than the date on which the priority period expired
	XI, 4.2	Clarification regarding “P” documents irrespective of whether the priority is valid or not
<b>PART C</b>	II, 2	Addition of exception for Uruguay
	III, 3	Addition of information regarding replacement sheets that have formal defects
<b>PART E</b>	IV, 2	Addition of reference to legal remedies under the EPC Guidelines
	VI	Deletion of phrase relating to ePCT
<b>PART F</b>	IV, 4.1	Addition of reference to ISPE Guidelines
	IV, 4.2	Addition of reference to EPC Guidelines
<b>PART G</b>	IV, 6.2.1 VI, 4	Addition of reference to principles laid down in the EPC Guidelines in the light of G 1/23
	IV, 6.4	Addition of information regarding multimedia disclosures
<b>PART H</b>	I, 5	Clarification regarding amended description
	III, 7	Clarification regarding differences between the title in the request form and in the description

	IV, 1	Clarification regarding cases where the EPO is not the RO
	IV, 2.1	Addition of information regarding cases where the EPO is not the competent authority with respect to requests for rectification

**EDITORIAL CHANGES**

<b>GENERAL PART</b>	2.3
<b>PART A</b>	II, 1.1 ; II, 1.2; II, 1.2.2; II, 1.3; II, 1.5; III, 3; III, 5.3; III, 7.4; III, 8.4; III, 9; III, 9.2.1.1; III, 9.2.1.2; III, 9.2.1.3; IV, 3; VI, 2.1; VI, 3.2; VIII, 1.10; VIII, 1.13
