Description of the invention for a patent
Description of addition to an invention for a patent

Description of addition to an invention for a patent
Patent application laid open
Granted patent for invention - Second level of publication
Granted patent for invention (non-publication of the application)
Transformed copyright certificate for patent

Adjusted patent for invention
Reissue patent
Supplementary protection certificate application
Supplementary protection certificate
Publication of an application for a certificate for a new variety of plant / animal breed - First level of publication
Certificate for a new variety of plant / animal breed - second level of publication
Transformed inventor's certificate in a certificate for a new variety plant / animal breed
Certificate for a new variety of plant / animal breed (no post on request)
Registered design
Translation of the claims to the European Patent
Corrected translation of the claims to the European Patent
Translation of the description to a European patent
Translation of the description to the amended European patent
Corrected translation of the description in a European patent
A new description to the European patent after a restriction procedure

Issued a certificate of registration of a utility model
Patent for utility model - the first level of publication, providing is the opportunity to familiarize or obtain a copy
Issued a patent for utility model - a second level of publication
Issued a patent for utility model (without the publication of the application)
Reissue patent for utility model
