HOW TO TEST OPS DEVELOPERS AREA SWAGGER
With activated OPS user account credentials you can login and test OPS Developers Area.

If you don’t have them, then please register first.

https://developers.epo.org/apis
When using first time, create a “dummy” app under My Apps after you Login.
I. Then click on APIs

II. Click to enter test area
1. Click to enter Swagger of the service you want to test
2. Enter your query, or just test with the example

3. After you enter a query and change Range, click „Try It Out“
4. Press Execute

5. Result and a status code
For any questions please contact OPS team via the form linked to this website: https://www.epo.org/en/searching-for-patents/data/web-services/ops
