

The screenshot shows the EPO Developer's Area page. The header includes the EPO logo, the text "Developer's Area", and navigation links for "Contact" and "Forum". A secondary header area contains the text "HEADER" and "epo.org". The main content area is titled "About Open Patent Services" and includes a "Register" link. A blue URL <https://developers.epo.org/apis> is shown next to the "Register" link. A dark grey box on the right contains the text: "With activated OPS user account credentials you can login and test OPS Developers Area. If you don't have them, then please register first." Two red arrows point from this box to the "Register" link and the "Login" link in the navigation bar. The page number "2" is visible in the bottom right corner of the screenshot.

The image displays two screenshots of the Developer's Area on the EPO website. The top screenshot shows the navigation menu with options like 'Content', 'Structure', 'Appearance', 'People', 'Configuration', and 'Help'. Below this, there are buttons for 'View', 'Edit', 'Outline', 'Track', and 'Access control'. The 'My Apps' link is highlighted with an arrow pointing to a callout box. The bottom screenshot shows the 'My Apps' page with the text 'These are your apps!' and 'Add more, edit or delete them as you like.' A button labeled 'Add a new App' with a plus sign is highlighted with a red box and an arrow pointing to the callout box.

The image shows a screenshot of the EPO OPS Developer's Area website. The main heading is "HOW TO TEST OPS DEVELOPERS AREA". The page features a dark header with the EPO logo and navigation links. A grey box labeled "I. Then click on APIs" points to the "APIs" link in the navigation menu. Below the menu, a breadcrumb trail shows "Home → API Documentation". A grey box labeled "II. Click to enter test area" points to the "OPS v3.2" link in the breadcrumb trail. The page content includes "EPO OPS v3.2 API Documentation" and a "Terms and Conditions" link. The top right corner of the screenshot shows "HEADER" and "epo.org".

The screenshot shows the 'Developer's Area' of the EPO website. The main heading is 'Open Patent Services API' with a version indicator '3.2 OAS 3.0'. Below this, there is a dropdown menu showing the URL 'https://ops.epo.org/3.2/rest-services' and an 'Authorize' button. A list of published API endpoints is shown, with the first entry 'GET /published-data/search Bibliographic data search service' having a red box around its dropdown arrow. A text box on the right contains the instruction: '1. Click to enter Swagger of the service you want to test'. The page number '5' is visible in the bottom right corner of the screenshot area.

The screenshot shows the 'Open Patent Services API' documentation page. The page title is 'Open Patent Services API' with version '3.2' and 'CAS 3.0' tags. The URL is 'https://ops.epo.org/3.2/test-services'. The 'Published' section shows a GET endpoint '/published-data/search' with a description 'Bibliographic data search service'. The parameters section includes 'Range' (string, range of elements requested, default 1-25) and 'q' (required string, search query, default 'biplastic'). A 'Try It Out' button is highlighted with a red box. The 'Responses' section is partially visible.

2. Enter your query, of just test with the example

3. After you enter a query and change Range, click „Try It Out“

The screenshot shows a REST client interface with the following components:

- Header:** "epo.org" on the right side.
- Method and URL:** "GET /published-data/search Bibliographic data search service".
- Parameters:** A table with two rows:

Name	Description
Range	Range of elements were requested
q <sup>required</sup>	Search query
- Execute Button:** A blue button with a right-pointing arrow, labeled "Execute".
- Request:** A terminal window showing the curl command:

```
curl -X 'GET' \
  -H 'Host: eps.epo.org/3.2/rest-services/published-data/search?Range=1-25&q=plastic' \
  -H 'accept: application/xml'
```
- Request URL:** `https://eps.epo.org/3.2/rest-services/published-data/search?Range=1-25&q=plastic`
- Server response:** A table with "Code" 200 and "Details" containing the XML response body:

```
<?xml version="1.0" encoding="UTF-8"?>
<html:stylesheet type="text/xml" href="/3.2/style/exchange.xml"?>
  <ops:coreId>published-data</ops:coreId>
  <ops:coreId>published-data</ops:coreId>
  <ops:biblio-search total-result-count="10000">
    <ops:query syntax="CQL">plastic</ops:query>
    <ops:query-builder>
      <ops:search>
        <ops:publication-reference system="eps.epo.org" family-id="60020018">
          <document-id type="docId">
            <country>US</country>
            <doc-number>2024006059</doc-number>
          </document-id>
        </ops:publication-reference>
      </ops:search>
    </ops:query-builder>
  </ops:biblio-search>
</html:stylesheet>
```
- Annotations:** A grey box on the left says "4. Press Execute" with an arrow pointing to the Execute button. A grey box on the right says "5. Result and a status code" with an arrow pointing to the response body.
